EXHIBIT NO. 114

SECRET

UNITED STATES PACIFIC FLEET

U. S. S. PENNSYLVANIA, Flagship

CinCpac file no.
A16/WPPac-46(16)
Serial 063W

PEARL HARBOR, T. H., July 25, 1941

From: Commander-in-Chief, U. S. Pacific Fleet.

To: Distribution List for WPPac-46.

Subject: WPPac-46.

1. The subject publication is distributed herewith. This Plan has not been approved by the Chief of Naval Operations but may be placed in circulation prior to the receipt of such approval.

2. Attention is invited to the Introduction, Chapter III, article 0301 of the Plan concerning the preparation of supporting plans by Task Force Commanders. At the present time it is desired that the following submit supporting plans for approval by the Commander-in-Chief:

Commanders Task Forces Two, Three, Six, Seven and Nine. (Commander Task Force Nine may, if he desires, delegate preparation of the plan to a Senior Officer of that type in the Hawaiian Area.)

The Commanders of the Naval Coastal Frontiers addressed may provide for the accomplishment of such tasks as are assigned them in this O-1 Plan, including suitable measures in their O-4 or other plans, rather than to prepare separate supporting plans for this O-1 Plan. The Commander Southeastern Force (Commander Cruiser Division Three) is required to submit the plan for operations of that force after its detachment from the Fleet to the Chief of Naval Operations for approval.

3. Supporting Plans as required above will be submitted for approval to the Commander-in-Chief prior to 20 August 1941. After approval they will be incorporated with the Fleet Plan as annexes as prescribed by the Commander-in-Chief.

4. Further annexes prepared by the Commander-in-Chief to cover operations to be undertaken in later phases of the war will be distributed when completed and approved.

5. Suitable binders for this Plan will be forwarded as soon as received by the command.

H. E. Kimm
H. E. KIMM

PEARL HARBOR, T. H., July 21, 1941

From: Commander-in-Chief, U. S. PACIFIC FLEET.

To: Distribution List for WPPac-46.

Subject: WPPac-46, promulgation of.

Enclosures:

- (A) Pages for WPPac-46; Reg. No. 5 including list of effective pages.
- (B) Receipt form in duplicate.

1. U. S. PACIFIC FLEET Operating Plan Rainbow Five (Navy Plan Rainbow Five) (WPPac-46) is promulgated herewith. Holders of Commanding Letters (U. S. Pacific Fleet Secret letter A16(R-5)040W of May 27, 1941) and the tentative Operation Plan promulgated thereby, will destroy them by burning and make report of destruction to the Commander-in-Chief, U. S. Pacific Fleet.

2. A receipt form is enclosed to be accomplished and forwarded to the Chief of Naval Operations (Registered Publications Section).

3. This publication will be handled and accounted for in accordance with the instructions contained in the Navy Regulations, the System of War Planning and the Registered Publication Manual.

4. This volume shall not be carried in aircraft, and when not in use, shall be kept in Class "A" storage as prescribed in the Registered Publication Manual.

5. IT IS FORBIDDEN TO MAKE EXTRACTS FROM OR COPY PORTIONS OF THIS PUBLICATION WITHOUT SPECIFIC AUTHORITY FROM THE CHIEF OF NAVAL OPERATIONS, EXCEPT AS PROVIDED FOR IN CURRENT EDITION OF THE REGISTERED PUBLICATION MANUAL.

6. SPECIAL WARNING—the contents of this publication shall be given the minimum dissemination compatible with thorough preparation of the subordinate plans.

P. C. Crosley,
P. C. CROSLY,
Flag Secretary.

H. E. KIMMEL.

SECRET

U. S. PACIFIC FLEET OPERATING PLAN RAINBOW FIVE
(NAVY PLAN O-1, RAINBOW FIVE)

INTRODUCTION

CHAPTER I. NAVY BASIC WAR PLAN (RAINBOW FIVE)

0101. Navy Basic War Plan (Rainbow Five) is the directive which this U. S. PACIFIC FLEET Operating Plan (Rainbow Five) is designed to implement in so far as the tasks assigned the U. S. PACIFIC FLEET are concerned. As the Basic Plan is in the possession of most of the recipients of this Fleet Plan, only particularly pertinent parts of it will be repeated herein. These parts have to do chiefly with assumptions, concepts of enemy action, and tasks.

[4]

CHAPTER II. FORMAT OF FLEET PLANS

0201. This Plan follows the standard War Plan form of WPL-8 except for small variations made for the purpose of facilitating ready reference and quick dissemination on the outbreak of war. These, in brief, are as follows:

a. In Part I the order of presentation is:

Chapter I—Task Organization.

Chapter II—Assumptions.

Chapter III—Information.

b. In Part II are incorporated:

Chapter I —Task assigned by Basic Plan.

Chapter II—Phases; and specific tasks, arranged by phases, for accomplishing the assigned mission together with (in a few instances) decisions as to how they will be initially carried out.

c. In Part III the first three chapters each cover one phase. Within each of those chapters the tasks assigned to each task force are grouped in a separate section, except the naval coastal frontiers, which are grouped together. Pertinent special information and logistic instructions are placed with the tasks given therein or they are placed in an appropriate annex of this O-1 Plan. Where a task requires coordinated action with other task forces, reference is simply made to the annex which comprises the plan for such coordinated action.

d. Sections 1 and 2 of Chapter IV, Part V are tentative fleet operation plans which, when completed by the assignment of forces actually available at the time, and modified to meet any change in the conditions which have been visualized in this Fleet War Plan (U. S. Pacific Fleet Operating Plan—Rainbow Five), are considered suitable, together with the annexes, for placing into effect the measures of Phase I and Phase IA of this Plan. In other words Chapter IV, Part V could be omitted as the material therein is completely covered in the text that precedes [5] them. They are included, however, for the sake of clarity and in order to have immediately available tentative fleet operation plans in the conventional form with which all concerned are familiar.

e. Annexes I, II, etc., are plans, special plans issued by the Commander-in-Chief for a particular purpose. They may be made effective separately if occasion requires. The forces affected are indicated in the annex itself. Some of the annexes may ultimately be only guides for promulgation of an operation order by despatch or letter.

f. Supporting plans of subordinate commanders, which are prescribed in the next chapter, are to be appended as lettered annexes.

[6]

CHAPTER III. SUBORDINATE PLANS

0301. Subordinate plans to support this Fleet Operating Plan will be prepared as follows:

a. The Commanders of the forces designated in the Task Organization in Chapter I, Part I of this Plan, will prepare supporting plans for each assigned task, the accomplishment of which would be facilitated by further planning.

2572 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

b. These supporting plans will be, as closely as practicable, in the same form of operation plans, and will be incorporated as annexes to this Fleet Operating Plan. Where the nature of the tasks lends itself to such procedure, the plan for their accomplishment may be in the form of a single annex. Where it is not the case, as where tasks are assigned in one or more of the Commander-in-Chief's annexes, several plans may be required.

c. Letter designations for annexes are assigned to each commander as shown below. The first annex to be prepared will be designated as "Letter-1", the second as "Letter-2", etc. It should be noted that if the nature of a task assigned at present does not require the preparation of a subordinate plan, the commander, the annex assigned him below will be vacant.

Task Force One.....	A-1
Task Force Two.....	B-1
Task Force Three.....	C-1
Aircraft Scouting Force.....	D-1
Submarines Scouting Force.....	E-1
Minecraft Battle Force.....	F-1
Base Force.....	G-1
Hawaiian Naval Coastal Frontier.....	H-1
Pacific Southern Naval Coastal Frontier.....	J-1
Pacific Northern Naval Coastal Frontier.....	K-1

d. In the subordinate plans, forces should, in general, be listed in the organization by organizations and approximate numbers of types rather than by name, unless it is known that specific units will be available.

e. If a commander considers it desirable to disseminate the considerations which have governed his decision and task assignments, he should append a brief and summarized estimate of the situation as an addendum to his plan. Auxiliary directives such as communication plans should also be appended as addenda to the task force commander's plan.

f. If the execution of the subordinate plans would be facilitated by still further preliminary planning, task force commanders should require their group commanders to submit plans for the accomplishment of the tasks assigned to the task force commander's plans. These will be designated as addenda and will not be incorporated with this Fleet Plan. They need be submitted only to the task force commander for acceptance.

g. If appropriate, each subsidiary plan will include in an addendum, the local requirements for carrying out the plan in so far as they can be foreseen. Such addenda may or may not be incorporated in the Fleet Plan, but, in every case, copies will be supplied to Commander Base Force.

h. The plans must be predicated upon realities and must provide for maximum possible utilization of forces presently available. Unless absolutely necessary, plans should not be based upon either conceptions or material not reasonably attainable. When material, equipment or personnel, not immediately available, is necessary for the successful execution of the measures to be undertaken, the commander shall be made the subject of an addendum. The commander concerned shall take immediate action to remedy the deficiencies, forwarding necessary correspondence through the Commander-in-Chief, U. S. Pacific Fleet. Thereafter the Commander-in-Chief shall be informed of corrections of these deficiencies as they occur.

i. Task force commanders will employ, in subdividing their forces, the same system of numbering subdivisions.

j. In numbering the pages of the plans which form annexes of this Fleet Plan, lower case letters to correspond to the letters assigned in subparagraph c shall be used. Thus the first page of the plan of Commander Task Force One will be "a-1".

[8]

CHAPTER IV. MOBILIZATION

0401. At the date of issue of this plan, the U. S. Pacific Fleet has virtually been mobilized, and is operating, with intensive security measures, from the Pearl Harbor base. It is expected, therefore, that the major portion of the Fleet will be ready for active service within four days of an order for general mobilization. To provide for the contingency of M-day being set prior to the date on which hostilities are to open, the day of execution of this Plan is designated throughout the Plan as W-day. The day that hostilities open with Japan will be designated J-day. This may or may not coincide with W-day.

[9] PART I. TASK ORGANIZATION, ASSUMPTIONS, INFORMATION

CHAPTER I. TASK ORGANIZATION

1101. The forces available to the Pacific Fleet are listed in the current Appendix II of the Basic Plan. In addition, the Commanders of the Pacific Southern, Pacific Northern, and Hawaiian Naval Coastal Frontiers, and the Commandants of the Naval Stations Guam and Samoa are considered to be officers of the U. S. Pacific Fleet, and, through them, the local defense and coastal forces are subject to the orders of the Commander-in-Chief.

1102. For planning purposes, tasks are assigned to the commanders of the current task forces in the Fleet and to certain other commanders who are to become task force commanders as indicated in paragraph 1107 below.

1103. As of July 1, 1941, the major task forces, their commanders, and their broad tasks for which they are training, are as follows:

Task Force One.—for covering operations—Commander Battle Force in command.

Task Force Two.—for reconnaissance in force and raiding operations—Commander Aircraft Battle Force in command.

Task Force Three.—for landing attack operations—Commander Scouting Force in command.

1104. The subdivision of the Fleet which is made in paragraph 1107 below is designed to provide a flexible overall task organization from which may be drawn the task forces to accomplish the operations which can be visualized at this time. It must be realized that, for most operations, certain units must be transferred between task forces, some will be absent in the navy yard or for other reasons, and, in some cases, two or more task forces will be merged under the command of the senior officer concerned. Also many of the tasks assigned to a task force in this plan do not require the employment of the whole task force. In such cases the task force commander will utilize such units of his force as are required to accomplish the assigned task.

[10]

CHAPTER I. TASK ORGANIZATION

1105. It is not expected that the Task Organization as shown below will be effective throughout the campaign. Rather it will be the basis for making up particular task organizations for the various operations that may be required. It will be the specific plans and orders in effect at any given time which will show the task organizations at that time.

1106. Units assigned to a task force or to a task group in the normal organization that are subsequently assigned to another task force or task group will thereafter continue as an integral part of the last organization to which assigned until released by the commander thereof. The commanders mentioned will release such units as promptly as the situation at the time permits when the period of assignment to their commands has terminated or when further reassignment is made by competent authority.

[11] 1107. The Normal Task Organization for this Plan is as follows:

1. *TASK FORCE ONE* Commander Battle Force

Batdivs 2, 4.....	6 BB
SARATOGA.....	1 CV
Crudivs 3, 9.....	5 CL
Desflot 1 less Desrons 5, 9.....	4 OCL#
	2 DL
	16 DD#
	2 AD

(#Includes Southeast Pacific Force of 2 OCL and 4 DD.)

2. *TASK FORCE TWO* Commander Aircraft Battle Force

Batdiv 1.....	3 BB
Cardiv 2 less YORKTOWN.....	1 CV
Crudiv 5.....	4 CA#
Desflot 2 less Desrons 4, 8 and Desdiv 50.....	1 OCL
	8 DD
	2 AD

(#Includes Atlantic Reinforcement of 4 CA.)

2574 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. **TASK FORCE THREE** Commander Scouting Force

Crdivs 4, 6.....	8 CA
Cardiv 1 less SARATOGA.....	1 CV
Desrons 4, 5.....	2 DI
	16 DI
Minron 3, less Mindivs 5, 6.....	5 DI
Available Transports Base Force.....	— AE
	— AE
2d Marine Div less Defense Batt.	
2d Marine Air Group.	
- [12] 4. **TASK FORCE NINE** (*Patrol Plane Force*) Commander Air
Scouting Force

All units of Aircraft Scouting Force.....	107 VE
	2 AV
	2 AV
	4 AV
Utility Squadron from Base Force.....	10 VJ
5. **TASK FORCE SEVEN** (*Undersea Force*) Commander Submarines Scou
Force

All units of Submarines Scouting Force except Sound School..	30 SS
	2 OS
	1 SM
	1 OL
	3 AS
	2 AS
	1 AM
6. **TASK FORCE EIGHT** (*Mining Force*) Commander Minecraft B
Force

All units of Minecraft Battle Force.....	1 CM
	8 DI
7. **TASK FORCE SIX** (*Logistic & Control Force*) Commander Base Force

All units of Base Force except AP, APD and Minron 3 less	8 DI
Divs 5 and 6 and 10 VJ.	4 AE
	6 AT
	1 AE
	13 AC
	2 AE
	1 AE
	2 AE
	1 AE
	10 AM
	4 AC
	U
	V
- [13] 8. **TASK FORCE FOUR** (*Hawaiian Naval Coastal Frontier*) C
mandant, Fourteenth Naval District.
Local defense forces.
9. **TASK FORCE FIVE** (*Pacific Southern Naval Coastal Frontier*) C
mandant, Twelfth Naval District.
Coastal and local defense forces.
10. **TASK FORCE TEN** (*Pacific Northern Naval Coastal Frontier*) C
mandant, Thirteenth Naval District.
Local defense forces.

[14] 1108. The Southeast Pacific Force and the Atlantic Reenforcement composed as indicated above, will operate under the Commander-in-Chief, U.S. Pacific Fleet until specifically detached by the Chief of Naval Operations. They will not, however, be sent to such distances from Pearl Harbor as would preclude their arrival in the Canal Zone twenty-one days after their transfer is ordered.

[15]

CHAPTER II. ASSUMPTIONS

Section 1. General Assumptions

1211. The general assumptions on which this Plan is based are:
a. That the Associated Powers, comprising initially the United States, British Commonwealth, (less Eire), the Netherlands East Indies, the Gov

ments in Exile, China, and the "Free French" are at war against the Axis powers, comprising either:

1. Germany, Italy, Roumania, Hungary, Bulgaria, or

2. Germany, Italy, Japan, Roumania, Hungary, Bulgaria, and Thailand.

Note.—As of 22 June war exists between the European Axis and Russia, and the latter may be tentatively considered as an ally against that part of the Axis but not necessarily against Japan.

b. That even if Japan and Thailand are not initially in the war, the possibility of their intervention must be taken into account.

c. That Latin American Republics will take measures to control subversive elements, but will remain in a non-belligerent status unless subject to direct attack; in general, the territorial waters and land bases of these Republics will be available for use by United States forces for purposes of Hemisphere Defense.

d. That the principal military effort of the Associated Powers will be in the Atlantic and European Areas, and that operations in other areas will be so conducted as to facilitate that effort. Therefore, transfer of units from the Pacific Fleet to the Atlantic Fleet is provided for in the Navy Basic Plan, and additional transfers may become necessary.

e. That the Asiatic Fleet will not be reinforced by the Pacific Fleet, but that eventually, if Japan enters the war, heavy British reinforcements will be made in the Far East.

[16] *Section 2. Special Assumption*

1221. That the Pacific Fleet is virtually mobilized and is based at Pearl Harbor, but regular navy yard overhauls are in progress which would reduce forces immediately available by about one-fifth.

[17]

CHAPTER III. INFORMATION

Section 1. General Information

1311. a. The Pacific Area, which is under the command of the Commander-in-Chief, Pacific Fleet, is that part of the area of the Pacific Ocean:

1. North of Latitude 30° North and west of Longitude 140° East.

2. North of the equator and east of Longitude 140° East.

3. South of the equator and east of Longitude 180° to the South American Coast and Longitude 74° West.

4. Less waters in which Canada may assume strategic direction of military forces.

b. In addition, the United States will afford support to British Naval Forces in the regions south of the equator, as far west as Longitude 155° East.

c. The Southeast Pacific Sub-Area, when established, will be that part of the Pacific Area south of the Panama Naval Coastal Frontier and between the West Coast of South America and approximately Longitude 95° West.

d. The Pacific Southern Naval Coastal Frontier includes the coastal zone extending from the northern boundary of California to the southern boundary of Mexico.

e. The Pacific Northern Naval Coastal Frontier includes the coastal zone of the Northwestern United States north of the northern boundary of California, and, in addition, Alaska.

f. The Pacific sector of the Panama Naval Coastal Frontier includes the coastal zone defined to be within a broken line drawn from the Mexico-Guatemala boundary to a point in Latitude 5° South, Longitude 95° West and thence to the Peru-Ecuador border, and to include the sea routes near the southern and western borders of that zone.

[18] g. The Hawaiian Naval Coastal Frontier consists of Oahu, and all the land and sea areas required for the defense of Oahu. The coastal zone extends to a distance of 500 miles from all the Hawaiian Islands, including Johnston and Palmyra Islands and Kingman Reef.

h. The Far East Area is defined as the area from the coast of China in Latitude 30° North, east to Longitude 140° East, thence south to the equator, thence east to Longitude 141° East, thence south to the boundary of Dutch New Guinea on the south coast, thence westward to Latitude 11° South, Longitude 120° East, thence south to Latitude 13° South, thence west to Longitude 92° East, thence north to Latitude 20° North, thence to the boundary between India and Burma.

i. In the Far East Area, responsibility for the strategic direction of the naval forces of the Associated Powers, except of naval forces engaged in supporting the

defense of the Philippines will be assumed by the British Naval Commander-in-Chief, China. The Commander-in-Chief, United States Asiatic Fleet, will be responsible for the direction of naval forces engaged in supporting the defense of the Philippines.

j. The Australia and New Zealand Area comprises the Australian and New Zealand British Naval Stations west of Longitude 180° and south of the equator. The British Naval Commander-in-Chief, China, is responsible for the strategic direction of the naval forces of the Associated Powers operating in this Area.

1312. The foregoing delineation of principal areas and the agreements for cooperation between the United States and the British Commonwealth are contained in the Report of United States-British Staff Conversations (ABC-Joint United States-Canada War Plan No. 2 (ABC-22) is now in the process of preparation. Similar agreements with the Netherlands East Indies are being made.

[19] 1313. The following principles of command will obtain:

a. As a general rule, the forces of the United States and those of the United Kingdom should operate under their own commanders in the areas of responsibility of their own Power.

b. The assignment of an area to one Power shall not be construed as restricting the forces of the other Power from temporarily extending appropriate operations into that area, as may be required by particular circumstances.

c. The forces of either Power which are employed normally under the strategic direction of an established commander of the other, will, with due regard to the type, be employed as task forces charged with the execution of specific strategic tasks. These task forces will operate under their own commanders and will not be distributed into small bodies attached to the forces of the other Power. Only exceptional military circumstances will justify the temporary suspension of the normal strategic tasks.

d. When units of both Powers cooperate tactically, command will be exercised by that officer of either Power who is the senior in rank, or if of equal rank, by the senior in grade.

e. United States naval aviation forces employed in British Areas will operate under United States Naval command, and will remain an integral part of United States Naval task forces. Arrangements will be made for coordination of operations with those of the appropriate Coastal Command groups.

1314. The concept of the war in the Pacific, as set forth in ABC-1 is as follows:

Even if Japan were not initially to enter the war on the side of the Associated Powers, it would still be necessary for the Associated Powers to deploy forces in a manner to guard against Japanese intervention. If Japan enters the war, the military strategy in the Far East will be defensive. The United States does not intend to add to its present military strength in the Far East but will employ the United States Pacific Fleet offensively in the manner best calculated to weaken Japanese economic power and to support the defense of the Malay barrier by diverting Japanese strength away from Malaysia. The United States intends to so augment its forces in the Atlantic and Mediterranean areas that the British Commonwealth will be in a position to release the necessary forces for the Far East.

Section 2. Enemy Information

1321. Information of the enemy will be disseminated prior to and on the execution of this Plan, by means of intelligence reports.

1322. Information which is of special interest with respect to a specific task is included with that task in Part III or in the Annexes.

[21] Section 3. Estimate of Enemy Action

1331. It is believed that German and Italian action in the Pacific will be limited to commerce raiding with converted types, and possibly with an occasional pocket battleship or heavy cruiser.

1332. It is conceived that Japanese action will be as follows:

a. The principal offensive effort to be toward the eventual capture of Malaya (including the Philippines) and Hong Kong.

b. The secondary offensive efforts to be toward the interruption of American and Allied sea communications in the Pacific, the Far East and the Indian Ocean, and to accomplish the capture of Guam and other outlying positions.

c. The offensive against China to be maintained on a reduced scale only.

d. The principal defensive efforts to be:

1. Destruction of threatening naval forces.

2. Holding positions for their own use and denying positions in the Central and Western Pacific and the Far East which may be suitable for advanced bases.

3. Protecting national and captured territory and approaches.

1333. To accomplish the foregoing it is believed that Japan's initial action will be toward:

- a. Capture of Guam.
- b. Establishment of control over the South China Sea, Philippine waters, and the waters between Borneo and New Guinea, by the establishment of advanced bases, and by the [22] destruction of United States and allied air and naval forces in these regions, followed by the capture of Luzon.
- c. Capture of Northern Borneo.
- d. Denial to the United States of the use of the Marshall-Caroline-Marianas area by the use of fixed defenses, and, by the operation of air forces and light naval forces to reduce the strength of the United States Fleet.
- e. Reinforcement of the Mandate Islands by troops, aircraft and light naval forces.
- f. Possibly raids or stronger attacks on Wake, Midway and other outlying United States positions.

1334. The initial Japanese deployment is therefore estimated to be as follows:

- a. Troops and aircraft in the Homeland, Manchukuo, and China with strong concentrations in Formosa and Hainan, fairly strong defenses in the Carolines, and comparatively weak but constantly growing defenses in the Marshalls.
- b. Main fleet concentration in the Inland Sea, shifting to a central position (possibly Pescadores) after the capture of Guam and the reinforcement of the Mandates.
- c. A strong fleet detachment in the Mindanao-Celebes area (probable main base in Halmahera).
- d. Sufficient units in the Japan Sea to counter moves of Russian Naval forces in that area.
- e. Strong concentration of submarines and light surface patrol craft in the Mandates, with such air scouting and air attack units as can be supported there.
- f. Raiding and observation forces widely distributed in the Pacific, and submarines in the Hawaiian Area.
- [23] g. Obsolete and weaker units on patrol of coastal areas and focal areas of lines of communication.
- h. Merchant ships in neutral ports or proceeding home via detours wide of usual routes.

[24]

PART II. OUTLINE OF TASKS

CHAPTER I. TASKS ASSIGNED BY NAVY BASIC PLAN—MISSION

2101. The Navy Basic War Plan (Rainbow Five) assigns the following tasks within the Pacific Area to the U. S. Pacific Fleet:

- a. Support the forces of the associated powers in the Far East by diverting enemy strength away from the Malay Barrier, through the denial and capture of positions in the Marshalls, and through raids on enemy sea communications and positions;
- b. Prepare to capture and establish control over the Caroline and Marshall Island area, and to establish an advanced fleet base in Truk;
- c. Destroy axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy;
- d. Support British naval forces in the area south of the equator as far west as longitude 155° east;
- e. Defend Samoa in category "D";
- f. Defend Guam in category "F";
- g. Protect the sea communications of the associated powers by escorting, covering, and patrolling as required by circumstances, and by destroying enemy raiding forces;
- h. Protect the territory of the associated powers in the Pacific area and prevent the extension of enemy military power into the Western Hemisphere by destroying hostile expeditions and by supporting land and air forces in denying the enemy the use of land positions in that hemisphere;
- i. Cover the operations of the naval coastal frontier forces;
- j. Establish fleet control zones, defining their limits from time to time as circumstances require;
- k. Route shipping of associated powers within the fleet control zones.

[25] CHAPTER II. TASKS FORMULATED TO ACCOMPLISH THE ASSIGNED MISSION

2201. It will be noted that the tasks assigned in the previous chapter are upon Assumption a2 of paragraph 1211 (Japan in the war). In formulating the Commander-in-Chief has provided also for Assumption a1 and divided tasks to be accomplished by the Pacific Fleet into phases, as follows:

- a. PHASE I—Initial tasks—Japan not in the war.
- b. PHASE IA—Initial tasks—Japan in the war.
- c. PHASE II, etc.—Succeeding tasks.

2202. Phase I tasks are as follows:

- a. Complete mobilization and prepare for distant operations; thereafter maintain all types in constant readiness for distant service.
- b. Maintain fleet security at bases and anchorages and at sea.
- c. Transfer the Atlantic reinforcement, if ordered.
- d. Transfer the Southeast Pacific Force, if ordered.
- e. Assign twelve patrol planes and two small tenders to Pacific Southern Naval Coastal Frontier on M-day.
- f. Assign two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier on M-day.
- g. Protect the communications and territory of the associated powers, prevent the extension of enemy military power into the Western Hemisphere, patrolling with light forces and patrol planes, and by the action of striking as necessary. In so doing support the British Naval Forces south of the equator as far west as Longitude 155° East.
- h. Establish defensive submarine patrols at Wake and Midway.

[26] 2202. i. Observe, with submarines outside the three mile limit, possible raider bases in the Japanese mandates, if authorized at the time by the Navy Department.

j. Prosecute the establishment and defense of subsidiary bases at Midway, Johnston, Palmyra, Samoa, Guam and Wake, and at Canton if authorized.

k. Continue training operations as practicable.

l. Move the maximum practicable portion of second Marine Division to Hawaii for training in landing operations.

m. Guard against surprise attack by Japan.

Phase IA

2203. Phase IA tasks are as follows:

- a. Continue tasks outlined in 2202 a, b, g, h, and k.
- b. Accomplish such of the tasks in 2202 c, d, e, f, and j as have not been completed.
- c. Make an initial sweep for Japanese merchantmen and enemy raiders and tenders in the northern Pacific.
- d. Continue the protection of the territory and communications of the associated powers, and of the naval coastal frontier forces, chiefly by covering operations.
- e. 1. Make reconnaissance and raid in force on the Marshall Islands.
- 2. If available cruisers and other circumstances permit, make cruiser attacks against Japanese shipping in waters between Hansai Shoto and Nanpo Shoto.
- f. Establish and maintain maximum practicable submarine patrols against Japanese forces and communications near the Japanese homeland.
- g. Maintain air patrols against enemy forces in the approaches to Oahu and outlying bases.

[27] 2203. h. Escort important shipping, including troop movements, between the Hawaiian Area and the West Coast.

i. Route shipping in the fleet control zone when established.

j. Augment the local defense forces of the Hawaiian Naval Coastal Frontier as necessary.

k. Move from San Diego to Hawaii the remaining units and equipment of the Second Marine Division.

l. Prepare to capture and establish control over the Marshall Islands.

Phase II and subsequent phases

2204. Tasks of Phase II and Subsequent Phases which can be formulated at this time are:

- a. Capture and establish a protected fleet anchorage in the Marshall Islands.

- b. Capture or deny other positions in the Marshall Island Area as necessary for further advance to the westward.
- c. Raid other Japanese land objectives and sea communications.
- d. Capture and establish an advanced fleet base at Truk.
- e. Continue uncompleted tasks of Phase IA.

[28]

PART III. TASK ASSIGNMENT

CHAPTER I. PHASE I

Section 1. TASK FORCE ONE

3111. *Task Force One* will perform tasks as required by the following paragraphs of this section.

3112. When directed release two small light cruisers and one destroyer division to become the Southeast Pacific Force as required by the navy basic plan.

3113. Perform the tasks assigned in the patrol and sweeping plan (Annex I).

[29]

Section 2. TASK FORCE TWO

3121. *Task Force Two* will:

Perform the tasks assigned in the patrol and sweeping plan (Annex I).

[30]

Section 3. TASK FORCE THREE

3131. *Task Force Three* will perform the tasks assigned in the following paragraphs of this section.

3132. Perform the tasks assigned in the Patrol and Sweeping Plan (Annex I).

3133. a. Move from San Diego to Hawaii the maximum practicable portion of the Second Marine Division, employing attached transports.

b. Make preparations and train for landing attacks on Japanese bases in the Marshalls for purposes of capture or demolition, with particular emphasis on plan for capture of Eniwetok.

c. 1. *Special Information.*

As of July 1, 1941, the Marine defenses in Hawaii and the outlying islands are as follows:

MIDWAY —34 officers
750 men
6 5"/51 caliber guns
12 3"/50 caliber AA guns
30 0.50 caliber machine guns
30 0.30 caliber machine guns
4 searchlights.

JOHNSTON—18 men
2 5"/51 caliber guns
4 0.30 caliber machine guns

PALMYRA —4 officers
101 men
4 5"/51 caliber guns
4 3"/50 caliber AA guns
4 0.50 caliber machine guns
4 0.30 caliber machine guns

[31]

OAHU —32 officers
620 men
4 5"/51 caliber guns
8 3"/50 caliber AA guns
20 0.50 caliber machine guns
16 0.30 caliber machine guns

NOTE: The above personnel are defense battalion personnel only and are in addition to personnel employed in guard duty, barracks duty, etc.

WAKE —None.

2. Task

Furnish additional defenses for outlying bases as may be requested by the Commander Hawaiian Naval Coastal Frontier and approved by the Commander-in-Chief.

[32]

Section 4. TASK FORCE NINE (PATROL PLANE FORCE)

3141. *Task Force Nine* will perform the tasks assigned in the following paragraphs of this section.

2580 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3142. On W-day transfer twelve patrol planes and two tenders to each of Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

3143. Perform tasks assigned in the patrol and sweeping plan (Annex I).

[33] Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)

3151. Task Force Seven will perform tasks as required by the following graphs of this section.

3152. a. Special Information.

1. There are indications that Axis raiders have been basing in the Marshall area.

2. The imminence of the entry of Japan into the war requires a development suitable for this eventuality.

3. NARWHAL and NAUTILUS are fitted to carry 13,500 gallons of aviation gasoline each for fueling patrol planes.

b. Task.

Maintain patrols required by the patrol and sweeping plan (Annex I).

c. Special Logistics.

Logistic replenishment at Pearl Harbor and to a limited degree at Midway.

3153. Assign one submarine division to Task Force Three as required for launch attack training.

3154. On W-day transfer two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier to assist in defense of the Alaskan sector. Continue administration of these units and rotate detail at discretion.

[34] Section 6. TASK FORCE EIGHT (MINING FORCE)

3161. Task Force Eight will:

Continue operations and training under commanders Task Forces One and Two.

[35] Section 7. TASK FORCE SIX (LOGISTIC & CONTROL FORCE)

3171. Task Force Six will perform tasks as required by the following paragraphs.

3172. Provide logistic service to the fleet and cooperate with Commander Hawaiian Naval Coastal Frontier in providing logistic services to outlying units.

3173. Perform tasks required by The Patrol and Sweeping Plan (Annex I).

3174. Maintain in the office of Commander Pacific Naval Coastal Frontier an officer to maintain liaison with respect to logistic requirements of the fleet, loading of base force and NTS vessels, and the routing and protection of fleet and Allied shipping. Maintain close liaison with Commander Hawaiian Naval Coastal Frontier for the same purposes.

3175. Transfer ten VJR to Commander Task Force Nine.

[36] Section 8. NAVAL COASTAL FRONTIERS

Task Force Four (Hawaiian Naval Coastal Frontier)

3181. Special Information.

The Basic Plan assigns the following tasks to the Commander, Hawaiian Naval Coastal Frontier:

a. Defend the Hawaiian Naval Coastal Frontier in Category "D". (Category "D"—May be subject to major attack). (N. B. The Commander-in-Chief, U. S. Pacific Fleet, does not consider Category "D" will apply during Phase I).

b. Protect and route shipping within the Hawaiian Naval Coastal Frontier.

c. Support the U. S. Pacific Fleet.

d. Support the Army and Associated Forces within the Hawaiian Naval Coastal Frontier.

3182. By this Fleet Plan, Task Force Four is assigned the tasks below.

a. Assist in providing external security for units of the Fleet in the Hawaiian Naval Coastal Frontier, in cooperation with the Army and the units of the Hawaiian Naval Coastal Frontier (as Commander, Base Defense) is already in effect.

b. Prosecute the establishment of subsidiary bases at Midway, Johnston, Palmyra, and Wake, and at Canton if authorized. Assist as practicable in the development of Samoa and Guam.

c. Make the facilities of outlying bases available for Fleet units operating in the vicinity; and directly and through own task group commanders coordinate with other task force and task group commanders in coordinating the activities at these bases. (See Annex IV.)

U. S. PACIFIC FLEET OPERATING PLAN—RAINBOW FIVE
(NAVY PLAN 0-1, RAINBOW FIVE)

PART III. TASK ASSIGNMENT

CHAPTER I. PHASE I

[37] 3182. d. Utilize units of the Fleet Marine Force, made available for the purpose, to defend Midway, Johnston, and Palmyra, and, when authorized, Wake and Canton.

Task Force Five (Pacific Southern) and Task Force Ten (Pacific Northern Naval Coastal Frontier)

3183. Commanders *Task Forces Five and Ten* perform tasks assigned by the Patrol and Sweeping Plan (Annex I).

[38] *Section 9. TASKS JOINTLY APPLICABLE*

3191. Until detached from the Fleet, all forces less those of Naval Coastal Frontiers will perform the following tasks:

a. Units in the Hawaiian Area complete mobilization at Pearl Harbor by the end of four W-day; units designated for early operations complete mobilization prior to the time designated for their operations to commence. Units on the Pacific Coast complete mobilization there as rapidly as possible.

b. Maintain vessels of all types in constant readiness for distant service.

c. Maintain internal and external security of forces at all times, cooperating with commanders of naval coastal frontiers while within the limits of those frontiers. Guard against surprise attack by Japanese forces.

d. Continue such training activities of the fleet as the commander-in-chief may direct.

e. Reinforce local defense and coastal forces as directed.

f. Protect the territory and communications of the associated powers, the operations of coastal forces, and troop movements by covering and other operations as directed by the commander-in-chief.

[39]

CHAPTER II. PHASE IA

Section 1. TASK FORCE ONE

3211. *Task Force One* will perform tasks as required by the following paragraphs of this section.

3212. Perform task assigned in the patrol and sweeping plan (Annex I).

3213. Reinforce and support operations of *Task Force two* as required in the Marshall reconnaissance and raiding plan (Annex II).

[40] *Section 2. TASK FORCE TWO*

3221. *Task Force Two* will perform tasks as required by the following paragraph.

3222. Conduct reconnaissance and raid in force against the Marshalls as required in the Marshall reconnaissance and raiding plan (Annex II).

[41] *Section 3. TASK FORCE THREE*

3231. *Task Force Three* will perform tasks as required by the following paragraphs of this section.

3232. Conduct initial sweep against enemy commerce and raiders as required in The Patrol and Sweeping Plan (Annex I).

3233. Reinforce *Task Force Two* as required by the Marshall Reconnaissance and Raiding Plan (Annex II).

3234. Move from San Diego to Hawaii the remaining units and equipment of the Second Marine Division and continue training for landing exercises.

3235. Continue task assigned in subparagraph 3133 c, 2.

[42] *Section 4. TASK FORCE NINE (PATROL PLANE FORCE)*

3241. *Task Force Nine* will perform tasks as required in the following paragraphs of this section.

2582 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3242. a. *Special Information.*

1. Patrol plane operations from Midway, Wake, Johnston, Palmyra, Canton are feasible, the extent of such operations being dependent upon defenses, facilities and supplies available at the time operations commence. Those defenses, facilities and supplies are being augmented. As of July 1, 1941, tenders cannot base at Wake or Canton, but Pan-American Airways' facilities may be used by special arrangement or by commandeering. A project for improvement of Wake as a base is underway. No such project for Canton has been approved.

2. No aircraft are assigned at present to the Commander, Hawaiian Naval Coastal Frontier.

3. Our submarines will assist in the defense of Midway and Wake, and habitually operate offensively in enemy waters.

4. Land defenses exist on outlying islands, as described in paragraph 1. Commander *Task Force Four* (Hawaiian Naval Coastal Frontier), is concerned with the defense of these outlying islands and will make them available for patrol plane operations.

5. It is believed that enemy action in the area subject to our patrol planes will comprise:

(a) Submarine raids and observation off Oahu and outlying islands and our lines of communication.

[43] (b) Surface raids on our lines of communications.

(c) Surface and air raids against Wake and possibly against Midway, Johnston, Palmyra and Canton.

(d) Possibly carrier raid against Oahu.

b. *Tasks.*

1. Perform patrols required by patrol and sweeping plan (Annex I).

2. Subject to the specific tasks prescribed elsewhere in this plan, operate patrol planes in the Hawaiian Area including outlying islands so as to gain the maximum possible information of advancing enemy forces. Use them offensively when other types of our own are not within striking distance, and the damage to the planes is small; or when the importance of inflicting damage on the enemy appears to justify the risk of receiving the damage which may be inflicted.

3. Coordinate the service of information with the operations of other forces.

4. Perform tasks assigned in the Marshall reconnaissance and raiding plan (Annex II).

5. Coordinate operations of patrol planes with submarines operating in the general area.

6. Withdraw patrol planes from advance bases when necessary to avoid proportionate losses.

[44] 3242. b. 7. Maintain not less than two squadrons (one may be a Squadron from base force) based on Oahu at all times. During the absence of major portions of the fleet from the vicinity of Oahu, such squadrons, if necessary, may be temporarily transferred to commander *Task Force Four* (Hawaiian Naval Coastal Frontier).

c. *Special Logistics.*

Logistic support at outlying bases will be supplied by own tenders, Hawaiian Naval Coastal Frontier, Base Force, and, if necessary, by Pan-American Airline facilities.

[45] Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)

3251. *Task Force Seven* will perform tasks as required by the following paragraph.

3252. a. *Special Information.*

1. Surface units of the Fleet will initially conduct the operations required by the Patrol and Sweeping Plan (Annex I) and the Marshall Reconnaissance and Raiding Plan (Annex II). Thereafter operations will be conducted for the capture of the Marshalls and Carolines, with occasional sweeps toward the Marshall Islands and the Japanese Homeland.

2. Our patrol planes will be operating from Midway, and possibly Wake and Johnston Islands.

3. Japan is developing extensively the defenses of the Mandated Islands. Land planes are known to be based at Saipan, Truk and Jaluit and have been reported at Marcus Island. Air fields are believed to exist at Wotje and Eniwetok. Port Lloyd in the Bonins is a minor operating base and some

usually base there and at Hachijo Jima. Aircraft may be present on Amami Oshima.

4. Considerable air strength is based on the Japanese Homeland but it is believed that, with many commitments elsewhere and a general lack of patrol planes, the air patrol surrounding the Homeland will not be particularly intensive.

5. The main units of the Japanese Fleet will probably be operating from the Inland Sea.

6. All important harbors will probably be mined and netted against submarines and are well fortified. A considerable number of small patrol craft must be expected.

[46] 3252. a. 7. The southwestern and western lines of communications from Japan may be considered vital needs and those toward the Mandates are very important.

8. It is expected that all Japanese Merchantmen will be armed or will be operating under naval control, and will therefore be subject to submarine attack. Specific instructions on this subject will be issued later.

9. Arrangements will be made with the Commander-in-Chief, Asiatic Fleet, to extend the Pacific Area sufficiently for submarines to pass through the Nansei Shoto as far south as Latitude 28°-30' N.

10. Mining Japanese waters outside the three mile limit may be planned. The specific authority for such mining will be issued later.

b. *Tasks*

1. Continue patrol of two submarines each at Wake and Midway.

2. Establish maximum practicable initial patrol off the Japanese homeland and thereafter maintain it at the maximum strength permitted by operating conditions, giving Stations the following priority.

YOKOHAMA
BUNGO CHANNEL
KII CHANNEL
TSUSHIMA
NAGASAKI
SHIMONOSEKI
TSUGARU

3. Inflict maximum damage on enemy forces including shipping, utilizing torpedoes and mines, and, if appropriate, gunfire.

[47] 3252. b. 4. Report important enemy movements by radio if success of attack mission is not thereby jeopardized.

c. *Special Logistics.*

Utilize facilities at Midway as necessary to increase endurance on patrol.

[48] *Section 6. TASK FORCE EIGHT (MINING FORCE)*

3261. *Task Force Eight* will:

Report to Commander Hawaiian Naval Coastal Frontier to augment the local defense forces during this phase.

[49] *Section 7. TASK FORCE SIX (LOGISTIC & CONTROL FORCE)*

3271. *Task Force Six* will:

Continue tasks assigned for Phase I and perform the tasks assigned in the patrol and sweeping plan (annex I) and the Marshall reconnaissance and raiding plan (annex II).

[50] *Section 8. NAVAL COASTAL FRONTIERS*

3281. *Task Force Five* (Pacific Northern) and *Task Force Ten* (Pacific Southern Naval Coastal Frontier) will:

Continue tasks assigned for phase I and perform the tasks assigned in the patrol and sweeping plan (annex I).

3282. *Task Force Four* (Hawaiian Naval Coastal Frontier) will:

Continue tasks assigned for phase I.

[51] *Section 9. TASKS JOINTLY APPLICABLE*

3291. *All task forces concerned:*

a. Continue tasks assigned in paragraph 3191.

b. Perform tasks assigned in the patrol and sweeping plan (annex I).

2584 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[52]

CHAPTER III. PHASES SUCCEEDING PHASE IA

Section 1. TASK FORCE ONE

3311. *Task Force One* will:

Cover operations of other forces as prescribed in the Eniwetok plan (annex —) and other plans for the capture of the Marshalls and Carolines.

[52a] Section 2. TASK FORCE TWO

3321. *Task Force Two* will:

Reenforce Task Forces One and Three as required in Eniwetok and other plans and perform such reconnaissance and raiding as is directed.

[52b] Section 3. TASK FORCE THREE

3331. *Task Force Three* will:

- a. Continue training for landing attacks.
- b. Perform tasks assigned in Eniwetok plan (annex —) and other operations involving landing attacks.
- c. Patrol as directed in subsequent plans.
- d. Continue task assigned in subparagraph 3133 c, 2.

[52c] Section 4. TASK FORCE NINE (PATROL PLANE FORCE)

3341. *Task Force Nine* will:

- a. Continue tasks assigned in subparagraphs 3242 b, 2, 3, 5, 6, and 7.
- b. Perform tasks assigned in Eniwetok plan (annex —) and other plans for the capture of the Marshalls and Carolines.

[52d] Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)

3351. *Task Force Seven* will:

- a. Continue tasks assigned in subparagraphs 3252 b, 1, 2, 3, and 4.
- b. Carry out tasks assigned in Eniwetok plan (annex —) and other plans for the capture of the Marshalls and Carolines.

U. S. PACIFIC FLEET OPERATING PLAN—RAINBOW FIVE (NAVY PLAN O-1, RAINBOW FIVE)

PART III. TASK ASSIGNMENT

CHAPTER III. PHASES SUCCEEDING PHASE IA

[52e] Section 6. TASK FORCE EIGHT (MINING FORCE)

3361. *Task Force Eight* will:

Perform such mining tasks as may be assigned in Eniwetok plan (annex —) and other operations and continue to augment local patrols as directed.

[52f] Section 7. TASK FORCE SIX (LOGISTIC AND CONTROL FORCE)

3371. *Task Force Six* will:

- a. Continue tasks prescribed in paragraphs 3172 to 3174.
- b. Prepare plans for the establishment of a fleet anchorage at Eniwetok and a fleet base at Truk after the positions have been captured.

[52g] Section 8. NAVAL COASTAL FRONTIERS

3381. *Task Forces Four, Five, and Ten* will:

Continue the tasks assigned in paragraphs 3182 and 3183.

[52h] Section 9. TASKS JOINTLY APPLICABLE

3391. *All task forces concerned:*

Continue tasks assigned in paragraph 3291.

[53]

CHAPTER IV. EXECUTION OF THE PLAN

3401. The execution of this Plan may be in one or two steps depending whether Japan does or does not become a belligerent on the first day of execution.

- a. If action against European Axis Powers only is to be taken the despatch shall be "EXECUTE NAVY PLAN OPTION DASH ONE RAINBOW FIVE PHASE ONE".

b. When action against JAPAN is to be taken the despatch for execution will be "EXECUTE NAVY PLAN OPTION DASH ONE RAINBOW FIVE PHASE ONE AFIRM".

3402. In the event of an overt act of war by a foreign power against the United States prior to the existence of a state of war, it is the duty of the senior commander on the spot to take such action in the defense of his command and the national interests as the situation may require, and report the action taken to superior authority at once.

[54]

CHAPTER V. INITIAL TRANSFER OF UNITS

3501. The table below gives, for ready reference, a summary of the transfers to be made in going from the current peace time organization to the task organization as of W-Day and as of J-Day. Those transfers for W-Day will be made upon the placing into effect of Phase I of this Plan. Those for J-Day will be made when the execution of Phase IA is ordered. Units concerned will report by despatch to the commanders of the task forces to which they are transferring.

From	To	Unit transferred	Transfer effected	Remarks
Taskfor 1.....	Southeastern Pacific For.	2 OCL.....	} When directed..	For rotation on patrol until J-Day.
Taskfor 3.....		1 Desdiv.....		
Taskfor 2.....	Taskfor 3.....	1 CL.....	W-Day.....	For rotation on patrol until J-Day.
	Atlantic Reen.....	1 CA.....	When directed..	If Atlantic Reen. is detached.
Taskfor 3.....	Taskfor 2.....	4 CA.....	When directed..	If Atlantic Reen. is detached.
	PSNCF.....	2 CA.....	When directed..	If Atlantic Reen. is detached.
		12 VPB.....	} W-Day.....	{ Administration remains. Units may be rotated.
		1 AVD.....		
Taskfor 9 (Patrol Plane Force).	PNNCF.....	1 AVP.....	W-Day.....	{ Administration remains. Units may be rotated.
Taskfor 7 (Under-sea Force).	PNNCF.....	12 VPB.....	W-Day.....	{ Administration remains. Units may be rotated.
		1 AVD.....	W-Day.....	{ Administration remains. Units may be rotated.
		1 AVP.....	W-Day.....	{ Administration remains. Units may be rotated.
	Taskfor 3.....	2 SS.....	W-Day.....	{ Administration remains. Units may be rotated.
		1 ASR.....	W-Day.....	{ Administration remains. Units may be rotated.
		NARWHAL or NAUTILUS.	W-Day.....	Base Samoa. Released on J-Day.
[55]				
Taskfor 8 (Minfor).	Hawaiian NCF.....	1 CM.....	J-Day.....	Until further orders.
Taskfor 6 (Logistic and Control For).	Taskfor 3.....	8 DM.....	W-Day.....	Base Samoa, released on J-Day.
		1 AO.....	J-Day.....	For fueling at sea ships in initial sweep. To revert when released.
	Taskfor 2.....	1 AO.....	J-Day.....	For fueling at sea ships in initial reconnaissance of MARSHALLS. To revert when released.
		2 AO.....	J-Day.....	Until further orders.
All Forces.....	Taskfor 9.....	10 VJR.....	J-Day.....	Until further orders.
	Hawaiian NCF.....	As directed.....	When directed..	For escort duty. To revert on completion.
	Taskfor 6 (Logistic and Control Force).	Any ship passing between West Coast and Hawaii.	Prior to scheduled date of departure.	

[56]

PART IV. LOGISTICS

CHAPTER I. GENERAL

4101. Commander Task Force Six (Logistics and Control Force) is charged with the logistic supply of the Fleet and, in cooperation with Commander Task Force Four (Hawaiian Naval Coastal Frontier), with supplying the present outlying bases in the Mid Pacific. He will make requests for replacements as required by paragraph.4322 g of the Navy Basic Plan. He will maintain a liaison officer in the office of Commander Task Force Five (Pacific Southern Naval Coastal Frontier) and, through him, will control the quantities and times of delivery of material and personnel requirements to the Fleet. In so far as practicable, a reserve of consumable supplies will be established and maintained at Pearl Harbor. After capture of bases in the MARSHALLS and CAROLINES a reserve of supplies will be maintained at these places, as permitted by storage and transportation facilities available.

2586 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4102. The supply of units of the Second Marine Division after they have reached the West Coast will be included with that of the Fleet.

4103. Special logistic instructions affecting particular tasks have been included in the task assignments in Part III and the Annexes of this Plan.

4104. For the benefit of Commander Task Force Six, Commanders of the task forces will include, in the plans which they prepare, their logistic requirements as far as they can be foreseen.

4105. The requirements of the U. S. Pacific Fleet are placed in the second priority classification by paragraph 4261 of the Navy Basic Plan.

[56a]

CHAPTER II. TRANSPORTATION

4201. Commander Task Force Six (Logistics and Control Force), through his liaison officer in the office of Commander Task Force Five (Pacific Southern Naval Coastal Frontier), will coordinate the transportation of material and personnel by Fleet transportation facilities and the Naval Transportation Service.

4202. The Naval Transportation Service vessels assigned to assist in the transportation of the Hawaiian and Alaskan areas will be shown in a revised Chapter II, Appendix II, of the Navy Basic Plan. If practicable, they will not be employed for transportation farther westward than Hawaii.

4203. The employment of commercial vessels to assist in transportation from the West Coast to Hawaii is most desirable and is acceptable to the Commander-in-Chief, U. S. Pacific Fleet.

[56b]

CHAPTER III. HOSPITALIZATION AND EVACUATION

4301. The facilities of the Fleet including those of hospital ships, advance base hospitals and mobile medical units will, as far as practicable, provide hospitalization for sick and wounded personnel.

4302. As necessary, such personnel will, under the coordinated supervision of the task force commanders responsible for the personnel and for the transportation facilities employed, be evacuated to the nearest shore establishment having adequate hospital space available.

4303. The ships concerned will furnish hospitalization to embarked personnel forces until ineffectives can be transferred ashore.

[56c]

CHAPTER IV. PRIZE CREWS

4401. The Navy Department will furnish prize crews as follows: U. S. Fleet—8; Southeast Pacific Force—8. If those for the Pacific Fleet are available, they will be placed aboard ships assigned to make the search for enemy merchant ships in the Patrol and Sweeping Plan (Annex I).

[56d]

CHAPTER V. SALVAGE

4501. All units, particularly of Task Force Six (Logistic and Control Force) and suitable units of Task Force Seven (Underseas Force) will render salvage service, as practicable, to naval and other vessels in the Pacific Area outside a zone lying 500 miles from the continental United States, Alaska, and Hawaii. Within the above mentioned zone, salvage service will be rendered by the nearest establishment.

[57]

PART V. SPECIAL PROVISIONS

CHAPTER I. TIME TO BE USED

5101. GREENWICH Civil Time will be used in carrying out this Plan.

[58]

CHAPTER II. COMMUNICATIONS

5201. Communications will be in accordance with USF-70 as modified in Annex III to this Plan.

[59]

CHAPTER III. LOCATION OF COMMANDER-IN-CHIEF

5301. The Fleet will be kept informed of the location of the Commander-in-Chief.

[60] CHAPTER IV. TENTATIVE OPERATION PLANS—PHASES I AND IA

5401. Tentative Operation Plans Nos. 1-R5 and 1A-R5 as formulated below are designed to facilitate the promulgation and execution of the tasks assigned for Phases I and IA of this U. S. Pacific Fleet Operating Plan (Rainbow Five). It is expected that they will be modified and executed by despatch when the corresponding Phase of this O-1 Plan is placed in effect as prescribed in paragraph 3401.

[61] Section 1. Phase I

United States Pacific Fleet
U. S. S. PENNSYLVANIA, Flagship
Place
Date

Operation Plan No. 1-R5

Initial Task Organization

(See paragraph 1107 of this Plan for normal organization)

(a) *Task Force One*—Commander Battle Force.—Normal units this task force plus $\frac{1}{2}$ minecraft less 1 cruiser in rotation to *Task Force Three* patrol pool.

(b) *Task Force Two*—Commander Aircraft, Battle Force.—Normal units this task force plus $\frac{1}{2}$ minecraft less one cruiser in rotation to *Task Force Three* patrol pool.

(c) *Task Force Three*—Commander Scouting Force.—Normal units this task force plus 1 cruiser each from *Task Forces One* and *Two* for cruiser patrol pool plus 1 SS from *Task Force Seven*, 1 AO from *Task Force Six*, and (on request) 1 patron and tender from *Task Force Seven* for South Pacific operations.

(d) *Task Force Nine* (Patrol Plane Force) (S. O. P. Airscofor Hawaiian Area).—Normal units this task force less 24 VP and tenders transferred to Naval Coastal Frontiers, and (if requested by *Commander Task Force Three*) 1 patron and tender to *Task Force Three*.

[62] (e) *Task Force Seven* (Undersea Force)—Commander Submarines, Scouting Force.—Normal units this task force less 2 SS and 1 ASR to *Task Force Ten* and 1 SS to *Task Force Three*.

(f) *Task Force Eight* (Mining Force).—Non-operative as such; normal units thereof being divided between *Task Forces One* and *Two*.

(g) *Task Force Six* (Logistic and Control Force)—Commander Base Force.—Normal units this task force plus any units transferred from other forces for escort duty West Coast-Hawaii less 1 AO to *Task Force Three*.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier)—Commandant, Fourteenth Naval District.—Normal units this task force plus units from other fleet forces when and if the Commander-in-Chief directs transfer.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier)—Commandant, Twelfth Naval District.—Normal units this task force plus 12 VP and tender from *Task Force Nine*.

(j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier)—Commandant, Thirteenth Naval District.—Normal units this task force plus 12 VP and tender from *Task Force Nine* plus 2 SS and 1 ASR from *Task Force Seven*.

[63] 1. Information, Assumptions, etc., as previously given in Parts I, II and III of Navy Plan O-1, Rainbow Five.

2. This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers and will support British Naval Forces south of the equator as far west as Longitude 155° East, while continuing training and guarding against attack by Japan.

3. (a) *Task Force One*.—(1) When directed release two small light cruisers and one destroyer division to become the Southeast Pacific Force as required by the Navy Basic Plan.

(2) Perform the task assigned in the Patrol and Sweeping Plan (Annex I).

(b) *Task Force Two*.—(1) Perform the tasks assigned in the Patrol and Sweeping Plan (Annex I).

(c) *Task Force Three*.—(1) Maintain the patrols required by the Patrol and Sweeping Plan (Annex I).

(2) Move from San Diego to Hawaii the maximum practicable portion of the Second Marine Division, employing attached transports.

(3) Make preparations and train for landing attacks on Japanese bases in the Marshalls for purposes of capture or demolition, with particular emphasis on plan for capture of Eniwetok.

2588 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[64] (4) Furnish additional defenses for outlying bases as may be required by Commander Hawaiian Naval Coastal Frontier and approved by the Commander-in-Chief.

(d) *Task Force Nine* (Patrol Plane Force).—(1) Transfer twelve patrol planes and two tenders to each of the Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

(2) Perform tasks assigned in the Patrol and Sweeping Plan (Annex I).
(e) *Task Force Seven* (Undersea Force).—(1) Maintain patrols required by the Patrol and Sweeping Plan (Annex I).

(2) Assign one submarine division to *Task Force Three* as required for land attack training.

(3) Transfer two submarines and one submarine rescue vessel to the Pacific Northern Naval Coastal Frontier to assist in defense of the Alaska sector. Continue administration of these units and rotate detail at discretion.

(f) *Task Force Eight*. (Mining Force).—(1) Continue training under Commander *Task Force One*.

(g) *Task Force Six* (Logistic and Control Force).—(1) Provide logistic services to the Fleet and cooperate with Commander Hawaiian Naval Coastal Frontier in providing logistic services to outlying bases.

[65] (2) Perform tasks required by the Patrol and Sweeping Plan (Annex I).
(3) Maintain in the Office of Commander Pacific Naval Coastal Frontier an officer to maintain liaison with respect to logistic requirements of the Fleet, loading of Base Force and Naval Transportation Service vessels, and the recruitment and protection of United States and Allied shipping. Maintain close liaison with Commander Hawaiian Naval Coastal Frontier for the same purposes.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier).—(1) Assist in providing external security for units of the Fleet in the Hawaiian Naval Coastal Frontier, in cooperation with the Army and the units concerned.

(2) Prosecute the establishment of subsidiary bases at Midway, Johnston, Palmyra, and Wake, and at Canton is authorized. Assist as practicable in the development of Samoa and Guam.

(3) Make the facilities of the outlying bases available for Fleet units operating in the vicinity and cooperate with Commanders of Mobile Forces in coordinating the military activities at these bases. (See Annex IV).

(4) Utilize units of the Fleet Marine Force, made available for the purpose to defend Midway, Johnston, and Palmyra, and, when authorized, Wake and Canton.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier).—(1) Perform tasks assigned by the Patrol and Sweeping Plan (Annex I).

[66] (j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).—(1) Perform tasks assigned by the Patrol and Sweeping Plan (Annex I).

(x) (1) Units in the Hawaiian area complete mobilization at Pearl Harbor within four days of date of execution of this Plan; units designated for operations complete mobilization prior to the time designated for their operations to commence. Units on the Pacific Coast complete mobilization there as rapidly as possible.

(2) Maintain vessels of all types in constant readiness for distant service.

(3) Maintain internal and external security of forces at all times, cooperate with the Commanders of Naval Coastal Frontiers while within the limits of their frontiers. Guard against surprise attack by Japanese Forces.

(4) Continue such training activities of the Fleet as the Commander-in-Chief may direct.

(5) Reinforce local defense and coastal forces as directed.

(6) Protect the territory and communications of the Associated Powers, coordinate operations of coastal forces, and troop movements by covering and other operations as directed by the Commander-in-Chief.

4. Logistic replenishment at Pearl Harbor, on the West Coast, and as specified provided for in the Annexes.

5. (a) Communications in accordance with U. S. F. Seventy, as modified in Annex III.

(b) Use Greenwich Civil Time.

(c) The Commander-in-Chief will keep the Fleet advised of his location.

Admiral, U. S. Navy,
Commander-in-Chief,
United States Pacific Fleet

[68] CHAPTER IV. TENTATIVE OPERATION PLANS—PHASES I AND IA

Section 2. Phase IA

Tentative

United States Pacific Fleet,
U. S. S. PENNSYLVANIA, Flagship,
Place
Date.

Operation Plan No. 1A-R5.

Initial task organization

(See Basic Fleet Plan for normal organization.)

(a) *Task Force One.* Commander Battle Force.—Normal units this task force less any cruiser absent on patrol with *Task Force Three* less 1 CV and all other large CL's to *Task Force Two* for reconnaissance of MARSHALLS.

(b) *Task Force Two.* Commander Aircraft, Battle Force.—Normal units this task force plus 1 CV and available CL's (approximately 4) from *Task Force One* plus 1 CV from *Task Force Three* less any cruiser absent on patrol with *Task Force Three*.

(c) *Task Force Three.* Commander Scouting Force.—Same as for Operation Plan 1-R5 less 1 CV to *Task Force Two* less 1 SS and 1 AO from SAMOA returned to their respective normal task forces plus 1 AO from *Task Force Six* for fueling at sea.

(d) *Task Force Nine* (Patrol Plane Force) Senior Officer Present, Aircraft, Scouting Force, HAWAIIAN AREA).—Same as for Operation Plan R5 1-.

[69] PART V. SPECIAL PROVISIONS

CHAPTER IV. TENTATIVE OPERATIONS PLANS—PHASES I AND IA

Section 2. Phase IA

(e) *Task Force Seven* (Undersea Force) Commander Submarines, Scouting Force.

Same as for Operation Plan 1-R5
plus 1 SS returned from *Task Force Three*.

(f) *Task Force Eight* (Mining Force)

Non-operative as such, normal units thereof being detached from *Task Forces One and Two* at end of Phase I and on commencement of Phase IA being transferred to *Task Force Four*.

(g) *Task Force Six* (Logistic and Control Force) Commander Base Force.

Same as for Operation Plan 1-R5,
plus 1 AO returned from *Task Force Three*
less 2 AO transferred to *Task Force Two*
less 1 AO transferred to *Task Force Three*.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier) Commandant, Fourteenth Naval District.

Normal units this task force
plus all units of Minecraft, Battle Force.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier) Commandant, Twelfth Naval District.

Same as for Operation Plan 1-R5.

(j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier) Commandant, Thirteenth Naval District.

Same as for Operation Plan 1-R5.

1. Information, Assumptions as previously given in Parts I, II, and III of this Navy Plan O-1, Rainbow Five.

[70] 2. This Fleet, while protecting the sea communications and territory of the Associated Powers in the Pacific Area, and supporting the operations of the British Navy south of the equator as far west as Longitude one hundred fifty-five degrees East, will:

(a) Conduct an initial sweep with light forces and aircraft against enemy merchant ships and raiders.

(b) Raid Japanese communications to westward of NANPO SHOTO with cruisers.

(c) Patrol Japanese homeland with submarines.

(d) Conduct a reconnaissance and raid against the MARSHALLS, in order to divert Japanese forces away from MALAYSIA, and to prepare for the capture of the MARSHALL-CAROLINE area.

3. (a) *Task Force One.*

(1) Perform task assigned in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(2) Reinforce and support operations of *Task Force Two* as required in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(b) *Task Force Two.*

(1) Conduct Reconnaissance and Raid in force against the MARSHALLS as required in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

[71] (c) *Task Force Three.*

(1) Conduct initial sweep against enemy commerce and raiders as required in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(2) Reinforce *Task Force Two* as required by the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(3) Move from SAN DIEGO to HAWAII the remaining units and equipment of the Second Marine Division and continue training for landing exercises.

(4) Continue preparations and training for landing attacks on Japanese bases in the MARSHALLS with particular emphasis on plan for capture of WETOK.

(5) Furnish additional defenses for outlying bases as may be requested by the Commander *Task Force Four* (Hawaiian Naval Coastal Frontier) and approved by the Commander-in-Chief.

(d) *Task Force Nine (Patrol Plane Force).*

(1) Subject to the specific tasks prescribed below, operate patrol planes in the HAWAIIAN Area including outlying islands so as to gain the earliest possible information of advancing enemy forces. Use them offensively only when types of our own are not within striking distance, and the risk of damage to our planes is small; or when the importance of inflicting damage on the enemy appears to justify the risk of receiving the damage which may result.

[72] (2) Perform patrols required by the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(3) Coordinate the service of information with the operations of other forces.

(4) Perform tasks assigned in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(5) Withdraw patrol planes from advance bases when necessary to avoid disproportionate losses.

(6) Maintain not less than two squadrons (one may be VJ squadron from *Task Force Four*) based on OAHU at all times. During the absence of major portions of the Fleet from the vicinity of OAHU, such squadrons may, at discretion, be temporarily transferred to Commander *Task Force Four* (Hawaiian Naval Coastal Frontier).

(e) *Task Force Seven (Undersea Force).*

(1) Continue patrol of two submarines each at WAKE and MIDWAY.

(2) Establish maximum practicable initial patrol off the Japanese Home Islands and thereafter maintain it at the maximum strength permitted by operational conditions, giving stations the following priority:

YOKOHAMA
BUNGO CHANNEL
KII CHANNEL
TSUSHIMA
NAGASAKI
SHIMONOSEKI
TSUGARU

[73] (The Commander-in-Chief will make arrangements for submarines to pass through that part of the Far Eastern Area in the NANSEI SHOTO south as Latitude twenty-eight degrees, thirty minutes North).

(3) Inflict maximum damage on enemy forces, including shipping, submarines, mines and torpedoes and, if appropriate, gunfire. Mining of Japanese waters outside the three mile limit may be planned. Specific authority for such operations will be issued later.

(4) Report important enemy movements by radio if success of attack mission is not thereby jeopardized.

- (f) *Task Force Eight* (Mining Force).
 (1) Report to Commander Hawaiian Naval Coastal Frontier to augment the local defense forces during this Phase.
 (g) *Task Force Six* (Logistics and Control Force).
 (1) Continue general logistic support of Fleet and assistance to outlying bases.
 (2) Perform tasks assigned in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five), and the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).
 (h) *Task Force Four* (Hawaiian Naval Coastal Frontier).
 (1) Continue tasks assigned in Operation Plan 1-R5, with regard for the probable increase in enemy activities.
 [74] (i) *Task Force Five* (Pacific Southern Naval Coastal Frontier).
 (j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).
 (1) Continue tasks assigned in Operation Plan 1-R5 with regard for the probable increase in enemy activities.
 (2) Perform the tasks assigned by the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).
 4. Logistic replenishment at PEARL HARBOR, on the West Coast, and as specially provided for in the Annexes.
 5. (a) Communications in accordance with Annex III to Navy Plan O-1, Rainbow Five.
 (b) Use GREENWICH Civil Time.
 (c) The Commander-in-Chief will keep the Fleet advised of his location.

Admiral, U. S. Navy,
 Commander-in-Chief,
 U. S. Pacific Fleet.

[I-1]

ANNEX I

United States Pacific Fleet,
 U. S. S. PENNSYLVANIA, Flagship
 Place
 Date

Patrol and Sweeping Plan
 No.

INITIAL TASK ORGANIZATION

- (a) Task Force One.
 (b) Task Force Two.
 (c) Task Force Three.
 (d) Task Force Nine (Patrol Plane Force).
 (e) Task Force Seven (Undersea Force).
 (f) Task Force Six (Logistic and Control Force).
 (g) Task Force Four (Hawaiian Naval Coastal Frontier).
 (h) Task Force Five (Pacific Southern Naval Coastal Frontier).
 (i) Task Force Ten (Pacific Northern Naval Coastal Frontier).
 (Units of these task forces initially same as in Operation Plan 1-R5.)
 1. Information and Assumptions as previously given in Parts I, II, and III of this Navy Plan O-1, Rainbow Five. Latest information of enemy dispositions, estimated intentions, and location of merchant shipping will be furnished by the Commander-in-Chief, U. S. Pacific Fleet, at time of execution.

2. *Phase I*

This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers by:

- [I-2] (a) Patrolling against enemy forces, particularly in the vicinity of the Hawaiian Islands; and on shipping lanes (1) West Coast-Hawaii, (2) Trans-Pacific westward of Midway and (3) in South Seas in vicinity of Samoa.
 (b) Escorting as conditions require and forces available permit.
 (c) Covering.
 (d) Employing striking forces against enemy raids and expeditions.
 (e) Routing shipping.

2592 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Phase IA

This Fleet will: (a) continue the operations of Phase I, except as to patrols, which will be modified or discontinued as necessary in order to carry out prescribed offensive operations;

(b) attack enemy communications by making initial sweep for enemy merchant ships and raiders, and by raiding Japanese sea communications west of Nanpo Shoto;

(c) reconnoiter and raid the Marshall Islands.

Subsequent Phases

This Fleet will: (a) continue operations of Phase I except as to patrols, for further directives will be issued later.

3. (a) Task Force One.

(1) Cover territory, forces and shipping of the Associated Powers as directed [I-3] (2) Furnish one cruiser (in rotation as practicable) to Task Force Three for cruiser patrol pool; and be prepared to furnish, on order, other patrol ships, a striking force, or both.

(3) While en route in accordance with Marshall Reconnaissance and Recon Plan (Annex II to Navy Plan O-1) conduct such sweep as information and circumstances at the time permit without interference with the primary task.

(b) Task Force Two.

(1) Furnish one cruiser (in rotation as practicable) to Task Force Three for cruiser patrol pool. (In case of detachment of Atlantic reinforcement this paragraph is applicable).

(2) Be prepared to furnish, on order, other patrols or a striking force, or (3) Develop contacts made by patrol planes from Oahu if vessels of Task Force Three are not within supporting distance of such contacts.

(4) While en route in accordance with Marshall Reconnaissance and Recon Plan (Annex II to Navy Plan O-1) conduct such sweep as information and circumstances at the time permit without interference with the primary task.

(c) Task Force Three, reenforced with one cruiser each from Task Force One and Two (for cruiser patrol pool), *NARWHAL* or *NAUTILUS* from Task Force Seven (Undersea Force), and one oiler from Task Force Six (Logistic and Communications Force), also further reenforced by one squadron of patrol planes and tenders from Task Force Nine (Patrol Plane Force) (by request on Commander Task Force Nine) when the situation in the South Pacific requires and facilities there permit.

(1) Patrol against enemy units that may attack own and allied communication lines, operating in general as follows:

[I-4] (a) Maintain two cruisers (one, if Atlantic Reenforcement is detached) on patrol between Hawaii and the Pacific Coast in areas more than five hundred miles from land. Reserve such ships either in Hawaii or on Pacific Coast.

(b) (i) Maintain two cruisers, two destroyers, one submarine and one destroyer in the South Pacific based on Samoa, normally keeping one cruiser on patrol within one thousand miles of Samoa along routes to New Zealand.

(ii) When the situation in the South Pacific requires and facilitates there permit request from Commander Task Force Nine (Patrol Plane Force) assignment of patrol squadron and tenders; and advance it into that area for operations.

(iii) Coordinate activities of unit operating in the South Pacific with British naval forces as far west as longitude one hundred fifty-five degrees East and situation at the time makes expedient; and in accordance with such directives as may from time to time be issued.

(c) Maintain one cruiser, based on Midway, on patrol to the northward of the Midway-Marianas line, in the vicinity of trans-Pacific trade routes.

(2) Upon commencement of Phase IA, dispatch two heavy cruisers in communication to raid Japanese communications westward of the Nanpo Shoto, and return to base when fuel situation or other circumstances require. Arrange directly with Commander Task Force Six for fueling such cruisers at or near Midway on return passage, and on return as may be feasible. The Commander-in-Chief will make arrangements with the Commander-in-Chief, Asiatic Fleet, concerning utilization of the portion of the Far Eastern Area involved.

[I-5] (3) Upon commencement of Phase IA, discontinue patrols required by paragraph 3 (c) (1) and sweep for enemy merchant ships, operating along the following general lines:

(a) Samoa based cruisers and destroyers sweep northward to latitude twenty degrees thence to rendezvous designated by Task Force Commander for operations.

in conjunction with the Marshall Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1). Other Samoa based units rejoin their normal commands.

(b) Cruisers on patrol between West Coast and Hawaii sweep or search for specific enemy merchantmen, as Task Force Commander may require enroute to rendezvous designated by him for operations in conjunction with Marshall Raid.

(c) Other available units conduct maximum practicable sweep in general area bounded by Hawaiian Island chain, latitude forty-six North, and longitudes one hundred sixty-seven West and one hundred eighty; such sweep to occupy about six days, and to begin on or as soon after J-day as possible.

(d) Units operating in the foregoing northerly area originate radio traffic to indicate an advance toward Japan via a northern route.

(4) (a) Upon completion of sweep directed in subparagraph (3) (c) above, rendezvous with oiler supplied by *Task Force Six* (Logistics and Control Force) in latitude twenty-seven North, and one hundred seventy-eight West, or other rendezvous you may have designated. Fuel and proceed to join *Task Force Two* (Marshall Reconnaissance and Raiding Plan, Annex II to Navy Plan O-1) on twelve J-day at rendezvous Tare in latitude sixteen North, longitude one hundred seventy-seven East or other designated time and rendezvous.

(b) If any units will be delayed in joining *Task Force Two*, advise the commander thereof as to the extent of the delay.

[I-6] (c) If conflict of tasks exists, operations against inferior enemy forces within striking distance take precedence over joining *Task Force Two*.

(5) If Atlantic Reinforcement is detached, assign two heavy cruisers to *Task Force Two*. (In such event the assignment of one cruiser from *Task Force Two* to *Task Force Three*, hitherto mentioned will, of course, not be made).

(d) *Task Force Nine* (Patrol Plane Force).

(1) Having due regard for time required to overhaul and upkeep planes and for conservation of personnel, maintain maximum patrol plane search against enemy forces in the approaches to the Hawaiian area.

(2) Initially base and operate one patrol plane squadron from Midway. At discretion increase the number of planes operating from bases to westward of Pearl Harbor to two squadrons, utilizing Johnston and Wake as the facilities thereat and the situation at the time makes practicable.

(3) Be prepared, on request of Commander *Task Force Three*, to transfer one patrol squadron and tenders to that force for prompt operations in the South Pacific.

(4) Be particularly alert to detect disguised raiders.

(5) In transferring planes between bases, conduct wide sweep enroute.

(6) Planes engaged in training operations furnish such assistance to Naval Coastal Frontiers in which based as may be practicable.

(7) Effect closest cooperation practicable with surface forces engaged in sweeping during initial sweep of Phase IA.

[I-7] (8) Modify patrols as necessary in order to carry out tasks assigned in Marshall Raiding and Reconnaissance Plan (Annex II to Navy Plan O-1).

(9) Units operating from outlying bases cooperate, to the extent compatible with assigned tasks, with other forces thereat. Be guided by principles of command relationship set forth in Annex IV to Navy Plan O-1.

(e) *Task Force Seven* (undersea Force).

(1) Maintain two submarines on patrol at Wake and two at Midway for gaining information and for attack on enemy units approaching those places.

(2) Be prepared, if Commander-in-Chief directs, during Phase I to conduct observations, by submerged submarines from outside the three-mile zone, of probable radar bases in the Japanese Mandates.

(3) At commencement of Phase IA, or earlier if so directed, establish patrols off the Japanese homeland as prescribed in the basic Fleet Plan.

(4) Route submarines advancing to westward for patrols so as to cover wide front. Coordinate such routing with other patrol and sweeping operations, including that prescribed for cruisers in the area westward of Nanpo Shoto, so as to avoid contact of submarines with own forces.

(5) Keep Commander-in-Chief and task force commanders concerned advised as to location and routes of own submarines.

(6) Transfer NAUTILUS or NARWHAL to *Task Force Three* for operations in South Pacific during Phase I.

(f) *Task Force Six* (Logistic and Control Force).

(1) Through liaison with Commanders of *Task Force Five* (Pacific Southern) and *Task Force Four* (Hawaiian) [I-8] Naval Coastal Frontiers ensure that routing of shipping is in accordance with general directives of the Com-

mander-in-Chief and is coordinated with the protection offered by Fleet and with the routing and protective measures of the British in the South

(2) Escort important ships or convoys by using combatant vessels en route or from the West Coast and Hawaii, which vessels are made available for purpose. If escort is found necessary and suitable vessels will be not available by modifying schedules of escorts or convoys, make suitable representation to the Commander-in-Chief as far in advance as possible.

(3) During Phase I maintain one oiler at Samoa to operate under Commander *Task Force Three*.

(4) Provide oiler to fuel at sea units of *Task Force Three* on eight J-latitude twenty-seven North, Longitude one hundred seventy-eight West time and place designated by commander of that Task Force.

(5) See also oiler requirements under Marshall Reconnaissance and Plan (Annex II to Navy Plan O-1).

(g) *Task Force Four* (Hawaiian Naval Coastal Frontier).

(1) Coordinate, as practicable, patrol in coastal zone with patrols by other forces.

(2) Through liaison with Commander *Task Force Six* (Logistics and Force) and Commander *Task Force Five* (Pacific Southern Naval Coastal Frontier) coordinate routing and escort of shipping in the Hawaiian Naval Coastal Frontier with that in the Fleet Control Zone, when and if established, and in the Pacific Area.

[I-9] (h) *Task Force Five* (Pacific Southern Naval Coastal Frontier)

(1) Coordinate routing of shipping with the protection afforded by Fleet and by British forces in accordance with current situation, and with directives that may be issued by the Commander-in-Chief.

(2) Conduct such search and patrols in vicinity of own theater as practicable with available forces. Keep the Commander-in-Chief fully advised of information gained. Also, when circumstances warrant, communicate such information direct to any Fleet forces in the vicinity.

(3) In the initial stages of Phase IA, particularly, cooperate with any Fleet forces in the vicinity in locating enemy merchantmen within flying range of the West Coast, obtaining assistance and cooperation of Army units as is practicable.

(i) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).

(1) Conduct such search and patrols in vicinity of own theater as practicable with available forces. Keep the Commander-in-Chief fully advised of information gained. Also, when circumstances warrant, communicate such information direct to any Fleet forces in the vicinity.

(2) In initial stages of Phase IA, particularly, cooperate with any Fleet forces in the vicinity in locating enemy merchantmen within flying range of the West Coast, obtaining assistance and cooperation of Army units as is practicable. is especially desired to cover until eight J-Day UNIMAK PASS and the main area to the southward of Dutch Harbor that daily flights and available planes permit.

(x) (1) This plan effective simultaneously with Navy Plan O-1, Rainbow

[I-10] (2) All task forces make available to Commander *Task Force Four* (Logistics and Control Force) for escort duty, all ships enroute between the East and West Coast.

(3) Destroy enemy combatant ships encountered.

(4) Capture or destroy enemy merchant ships encountered.

(5) Investigate neutral merchant ships encountered; send them to port for adjudication if investigation warrants; or if necessary and permissible under international law, destroy them. (See "Instructions for the Navy of the United States Governing Maritime Warfare").

(6) Seize any opportunity to inflict disproportionate damage on the enemy by modifying or discontinuing plans in operations if necessary in order to do so.

(7) Disseminate pertinent information to other Task Force Commanders under conditions of radio silence and other circumstances permit.

(8) Aircraft attempt, without taking undue risk, to force merchant ships from the vicinity of supporting surface vessels or to United States' ports.

(9) This plan effective with Navy Plan O-1.

(10) Be prepared to transfer units of Southeast Pacific Force and Army Air Force Reinforcement on short notice. So employ such units that if transferred

can reach Canal Zone within twenty-one days. If transferred, such units proceed along routes and conduct such sweeps as the Commander-in-Chief may prescribe.

(11) Continue such training as these and other prescribed operations permit.

[I-11] 4. Logistics as in Navy Plan O-1, Rainbow Five.

5. Provisions of Part V Navy Plan O-1, Rainbow Five apply.

Admiral, U. S. Navy,
Commander-in-Chief,
United States Pacific Fleet.

[II-1]

ANNEX II

United States Pacific Fleet
U. S. S. PENNSYLVANIA, Flagship
Place
Date

Marshall Reconnaissance and Raiding Plan No. ———

Initial Task Organization.

- (a). Task Force One.
- (b). Task Force Two.
- (c). Task Force Three.
- (d). Task Force Nine (Patrol Plane Force).
- (e). Task Force Seven (Undersea Force).
- (f). Task Force Six (Logistic and Control Force).

Units of these task forces initially same as in Operation Plan 1A-R5.

1. (a) Information.—(1) This plan covers the initial operations in the MARSHALLS for carrying out the basic task of diverting Japanese strength away from the MALAY BARRIER through the denial and capture of positions in the MARSHALLS.

2. This force will:

(a) Reconnoiter the MARSHALLS, particularly ENIWETOK, preparatory to a raid in force and to eventual capture, in order to develop the mobile and land defenses and material installations therein.

(b) Raid the MARSHALLS with ships and aircraft and small landing groups in order to destroy enemy mobile forces, fixed defenses and facilities.

[II-2] 3. (a) Task Force One.—(1) Transfer available large light cruisers and carrier to Task Force Two on J-Day.

(2) About Five J-Day, depart PEARL HARBOR with remainder of force and proceed to rendezvous with Task Force Two at Point Tare on Eleven J-Day. If delay in arriving at rendezvous is in prospect, advise Commander, Task Force Two, of the probable time of arrival. Transmit any such message prior to departing from the PEARL HARBOR area, if possible. Sweep as practicable along the route as required by Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(3) If the Commander-in-Chief is not present upon making the rendezvous, Commander Task Force One assume general charge of all further operations in connection with this reconnaissance and raid, and direct Commander Task Force Two to commence the raid at a suitable time after he has reported ready.

(4) Upon making rendezvous, assume command of battleships of Task Force Two.

(5) Cover operations of Task Force Two, as reenforced, from the area to the northward of the MARSHALLS, furnishing such support to that force as developments require, and keeping its commander informed as to the location of Task Force One. Detail escorts for any damaged ships of Task Force Two which it may be necessary to return to base.

(6) Utilize security offered by operations of patrol planes at WAKE.

[II-3] (7) After Task Force Two has completed raids and rejoined, if the Commander-in-Chief is not present, Commander Task Force One carry out further operations of a similar nature or conduct the combined forces to PEARL HARBOR at discretion.

(b) Task Force Two, reenforced as provided in this plan, reconnoiter and raid the MARSHALLS, carrying out the following approximate procedure:

(1) On One J-Day, unless otherwise directed, depart PEARL HARBOR with reinforcements provided by this Plan and proceed toward TAONGI; battleships and destroyer screen at fifteen knots, remainder of force at twenty knots. Sweep

along the route in accordance with Patrol and Sweeping Plan (Annex I to Plan O-1, Rainbow Five) and furnish security as practicable to *Task Force One*. Furnish destroyer escort to oilers as prescribed in paragraph 3 (f) (1).

(2) Five J-Day, fuel the advance group from oilers at Rendezvous 7 or other designated rendezvous.

(3) Six J-Day to Nine J-Day reconnoiter the MARSHALLS as follows:
(i) Reconnoiter by air such atolls as weather conditions, forces, time and opportunities permit, giving particular attention to ENIWETOK, BIKINI, Rongerik, LAP, WOTJE, JALUIT, KWAJALEIN, MALOELAP and ARNO.

Reconnoiter ENIWETOK particularly with a view to an early attack for its selection. [II-4] (ii) So conduct reconnaissance as to leave the enemy in doubt as to what further reconnaissance is about to be undertaken, or as to what places may be attacked.

(iii) Supplement air reconnaissance by reconnaissance from surface units by landing patrols, and raid with forces immediately available if the situation and developments at the time indicate that such supplementary action is desirable and feasible.

(iv) Utilize both photographic and visual observations to determine accurately as practicable the opposition that may be expected to raids and parties; and the targets suitable for air and surface bombardment. Of particular interest are:

- ships and aircraft;
- storage tanks;
- power plants and radio installations;
- docks;
- air fields;
- storehouses and other buildings;
- guns and observation posts;
- mines;
- channel and beach obstructions;
- other defense installations;
- beaches suitable for landing operations;
- extent of anchorage area;
- hydrographic, topographic, and meteorological features.

(v) Retire on own battleships or *Task Force One* for assistance should circumstances require.

(vi) Operate battleship group to furnish support as necessary.

(vii) Unless persistent bad weather or other unforeseen developments prevent, adjust operations to complete reconnaissance in four days or less after initial flights over enemy territory.

[II-5] (viii) Upon the completion of reconnaissance, withdraw *Task Forces One* and *Three*. Transfer battleships to *Task Force One*. *Task Force Three* will merge into *Task Force Two* at this time.

(ix) Study and analyze information gained in reconnaissance; determine the atolls to be raided and the specific objectives for attack. Complete plans therefor, with due regard for subparagraph (4) below, and issue to the Commander-in-Chief, if present, with information and aerial photographs retained, and copy of raiding plan.

(x) Report by visual (or by destroyer if out of signal distance) to the Commander-in-Chief, if he is within the general area, otherwise to the Commander of *Task Force One*, the time it is desired to place the raiding plan into effect.

(4) Beginning about Thirteen J-Day, when directed, carry out the raiding plan. In preparing and carrying out the raiding plan, be guided by the following:

(i) Make such additional air reconnaissance immediately prior to attack as meets the existing situation.

(ii) Attack the selected objectives with air and surface forces, the selection of attack being at the discretion of the Task Force Commander and designed to provide the best economy of force. Avoid directing enemy attention in any way to the objectives of attack.

[II-6] (iii) The priority of objectives is as follows:

- combatant ships, tenders, and aircraft;
- other ships;
- fuel tanks;
- power and radio installations;

- troop concentrations;
- storehouses;
- other installations.

(iv) Except in unusual circumstances, no vessel expend more than twenty-five per cent of bombs or ammunition on *fixed* objectives.

(v) Where conditions appear favorable, land personnel to demolish installations and eliminate enemy personnel.

(vi) Do not enter lagoons with ships.

(vii) Make suitable arrangements for the protection of and withdrawal of damaged ships, requesting escorts from *Task Force One*.

(viii) If sufficient weakly held positions are developed to warrant further raids, carry them out, otherwise discontinue raids at discretion and join *Task Force One*.

(c) *Task Force Three*.—(1) If Atlantic Reenforcement has been detached, transfer two heavy cruisers at PEARL HARBOR to *Task Force Two*.

(2) If carrier is available, assign it to *Task Force Two* for this operation beginning J-Day.

[II-7] (3) While in the Northern Pacific carrying out the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five) employ radio to deceive enemy as to intentions in the MARSHALLS.

(4) If available, assign combat unit of about one hundred fifty marines to each cruiser which will eventually join *Task Force Two*.

(5) Upon completion of the task assigned in the Patrol and Sweeping Plan on about Ten J-Day, join *Task Force Two* with cruisers and destroyers at Point Tare or other designated rendezvous. Thereafter operate as part of *Task Force Two* until released upon completion of the raiding operation of this plan.

(d) *Task Force Nine* (Patrol Plane Force) coordinate operations of patrol planes with those of other forces as follows:

(1) Prior to Five J-Day advance maximum practicable patrol plane strength to WAKE, MIDWAY, and JOHNSTON, leaving not less than two operating squadrons at OAHU.

(2) JOHNSTON-based planes, during passage of units of other forces to the westward, search along the route of advance from the vicinity of JOHNSTON to longitude one hundred seventy-eight degrees west.

(3) MIDWAY-based planes search sectors to the southwestward of MIDWAY to prevent surprise attack across that sector on units operating toward the MARSHALLS.

[II-8] (4) WAKE-based planes make preliminary air reconnaissance of TAONGI and BIKAR on Five J-Day, or as soon thereafter as practicable, and acquaint Commander *Task Force Two* with the results. Thereafter, conduct search, to the extent that available planes and supplies will permit, to prevent surprise attack from the westward by enemy surface forces on own units operating toward the MARSHALLS.

(5) On completion of the raiding operations of *Task Force Two* resume normal operations as required by paragraph 3242b. of the Fleet Operating Plan.

(e) *Task Force Seven* (Undersea Force).—No primary tasks in connection with this plan are assigned but:

(1) Submarines which may have been in the MARSHALLS in carrying out the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five) report enemy information obtained.

(2) While en route to patrol stations to the westward:

(i) Seize opportunities to damage important enemy units.

(ii) Avoid contacts with own forces.

(iii) Force Commander keep other forces advised of location and movements of submarines.

(f) *Task Force Six* (Logistic and Control Force). Despatch two oilers to carry out the following:

(1) Proceed on J-Day with destroyer escort provided by Commander *Task Force Two*, to rendezvous with the advance group of *Task Force Two* on Five J-Day at Point Tare, or as directed by Commander *Task Force Two*.

[II-9] (2) Thereafter conduct fueling and proceed as directed by Commander *Task Force Two*.

(x) (1) Seize every opportunity to damage the enemy, but avoid engaging at a disadvantage.

(2) Be alert to detect and destroy enemy mobile forces, particularly raids or expeditions which may be directed at our outlying islands.

(3) Restrict the use of radio to a minimum.

(4) This plan effective simultaneously with the execution of Phase IA of U. S. Pacific Fleet Operating Plan (Rainbow Five).

2598 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4. (a) Fuel from oiler as prescribed in paragraph 3 (f) above.
- (b) Fuel destroyers from large ships at discretion of force and group commander.
- (c) Logistic support for submarines and patrol planes as in U. S. Pacific Operating Plan (Rainbow Five).
5. (a) Communications in accordance with Annex III to Navy Plan Rainbow Five.
- (b) Use GREENWICH Civil Time.
- (c) Rendezvous Tare: Latitude sixteen degrees North; Longitude one hundred seventy-seven degrees East.
- (d) The Commander-in-Chief will keep the Fleet advised as to his location.

Admiral,
Commander-in-Chief,
United States Pacific Fleet

Communication Plan No. 1, Rainbow Five

USF-70 effective as modified herein. The numbered parts, sections, paragraphs of USF-70 listed are effective in toto, or as indicated. Unnumbered parts, sections, or paragraphs are not effective unless specifically made so by Task Force Commanders by supplementary communication plan.

1110. Effective.

1120. Effective. Unless otherwise directed this communication plan is effective coincident with the placing in effect of Navy Plan O-1 Rainbow Five.

1170 to 1178. Effective.

1179. Effective. The above procedure shall be used for Radar contact. No receiver not supplied by Bureau of Ships shall be used for this or any purpose until it has been thoroughly tested to assure that it does not transfer carrier from its oscillating circuit.

1180. Effective.

1190. Effective.

1212. Effective.

1220. Effective.

1330. Allied communications in Pacific Area are governed by SP 02376 Eastern Theater by current Andus publications.

[III-2] 2120. Condition 19 effective.

2131. Effective.

2200. The radio frequency plans are as set forth in Appendix B, USF-70, that Naval Coastal Frontier Defense Communication Plans will be governed by Article 4005, 1(a) of WPDNC-46.

No transmission shall be made on 500 kcs. frequency without the authority of the O. T. C. of a Task Force.

When the O. T. C. of a Task Force or component at sea considers that it is justified by the importance of the traffic concerned he may transmit to the nearest shore radio station that guards the Naval Calling Frequency (or to Radio Washington or Honolulu on the 4235 kc series. He shall not, in extreme emergency and when he is sure that the situation justifies it, answer calls or receive traffic on 355 kc, except by interception.

The various circuit guards required shall be so disposed as to permit the minimum number of ships to set watches on the radio direction finder, and listening equipment and other intelligence equipment as directed by Task Force Commanders.

The Senior Commander of Units from different task organizations operating in the same area shall arrange for rapid means of inter-communications, preferably by available shore stations. Task Organization Commander in a port or operating area shall establish an area radio frequency for use under circumstances where visual systems will not serve. In port radio shall not be used [III-3] inter-communication or communication with shore when a visual link or line of sight exists or may be established.

Guard NPM Primary Fox regardless of geographical position.

2300. Effective.

2400. Effective.

2510. CSP-1161 effective with this communication plan and shall be used in lieu of CSP-776 for Task Organization command traffic.

2520. Use effective Confidential Radio Call Sign lists and ciphers for administrative traffic.

2540. Effective.

2720. Effective.

2740. Effective.

3000. Effective.

4120. Effective.

5000. Effective.

5230. Until receipt of satisfactory radio recognition device for aircraft the following approach and recognition procedure shall govern the approach of Naval aircraft to either units of the Fleet or Naval outlying island bases. Separate special procedure will be prescribed for major bases and areas.

Aircraft approach from outside of gun range in simple cruising formation (if more than one plane) on bearing 045° T. or 225° T. [III-4] on odd days (GCT), and 135° T. or 315° T. on even days (GCT), from center of formation or station at 1000 feet or under. (These bearings may be changed if necessary by local authorities.) They shall never approach from the bearing on the sun when the sun is low.

If station does not recognize plane as friendly it challenges by making "Zs" on searchlight, or by training searchlight with red filter on plane if available; otherwise at shore bases use a red smoke bomb during daylight and a red rocket at night.

On seeing challenge plane, or leading plane if there is a formation, replies as follows:

(a) *Daytime*.—On odd day of the month (GCT), leave formation, circle to the right and, when back on the approach course, dip right wing twice, on even days (GCT), leave formation, circle to the left and, when back on approach course, dip left wing twice. This must be made distinctive, dipping the wing about 30 degrees to the prescribed side and returning to horizontal after each dip.

(b) *Nighttime*.—Turn on running lights and proceed as for daytime replies to challenge, except circling may be omitted; or make emergency identification pyrotechnic signal prescribed in effective CSP.

When approaching aircraft are recognized as friendly, the recognition station shall [III-5] train on the approaching aircraft a powerful searchlight, make "Fs" or show green colored light. Those signals indicate to planes that they are recognized as friendly and will not be fired on.

In a Fleet formation the recognition stations will be, unless otherwise designated, those ships on the outer circle closest to approach bearings 045° T. and 225° T. or 135° T. and 315° T. (depending on the day) from Fleet center.

0131. Effective.

6200. Effective.

6400. Effective.

6500. Effective.

6610. Effective.

7000 (less 7100). Effective.

[IV-1]

ANNEX IV

Command relationships and coordination of activities at outlying bases

1. Forces operating from outlying stations or bases, under this Plan, may consist, broadly, of the following:

(a) Local Defense Forces, consisting of the local garrison and the local defense forces (which may include submarines and aircraft especially designated for this purpose), operating under the direct control of the base or station commander, and with the primary mission of defending the base or station against hostile attack.

(b) Fleet forces consisting of submarines, airplanes and possibly surface ships or detachments, operating under a fleet task force commander or commanders, whose missions, while contributing indirectly to local defense, are primarily dictated by broader strategical and tactical considerations in connection with other operations.

2. Command relationships, under these conditions, will be governed by following:

(a) The base or station commander will, normally, command and direct operations of local defense forces, in accordance with the directive of the Commander Hawaiian Naval Coastal Frontier (Commandant, Fourteenth Naval District). This base commander, a task group commander under the Commander Hawaiian Naval Coastal Frontier, who is himself a task force commander under the Commander-in-Chief, may, on occasion, also have functions of command in connection with Fleet units in the vicinity.

(b) Fleet forces will, normally, be operated in accordance with directives of their respective Fleet task organization commanders. In entrance and exit, use of facilities, arrangements for berthing and services, etc., they will conform to and be guided by the local regulations.

(c) In the event of contact with enemy forces which may threaten the base or the forces operating [IV-2] therefrom or in connection therewith, the senior officer present in the base area will assume command of all forces and activities in the vicinity as necessary to take appropriate action against the threatening enemy. As it is entirely possible that such procedure may temporarily divert Fleet forces from some broader task contemplated by their task force commander of the Commander-in-Chief, local commanders must bear this in mind and reduce such diversion to a minimum. They must also, within the limits of the information available to them, and as permitted by the urgent local situation, so direct any action taken by Fleet units under their temporary command, as to further the broad operating plan in effect.

(d) To obviate to a maximum the difficulties which are inherent in the command and communication relationships at such bases, it will be necessary to insure that all interested commanders, including the commanders of bases concerned, are made information addressees of all appropriate plans, orders, reports of enemy forces. Commanders of all forces within the area will ensure that the base or station commander, as well as the Senior Officer Present, is familiar with the general nature of their orders and with their general operations (unless specifically directed otherwise).

(e) In general, the question of command in such circumstances is covered by articles 801 and 1486, U. S. Navy Regulations.

(f) The shifting of vessels, squadrons, or other units within an area may result in consequent changes in seniority among those actually present.

3. (a) A Base Defense Plan and a supporting Communication Plan will be prepared under the direction of the Commander Hawaiian Naval Coastal Frontier. They must provide for the Fleet units present participating in the defense, and for adequate communications among the various fixed and mobile forces, both local and Fleet. Commander Hawaiian Naval Coastal Frontier will furnish copies of such plans to appropriate fleet force commanders. [IV-2] The latter will, whenever practicable, supply copies to units of their command prior to departure for operations at the outlying base. A unit commander arriving in the area without receiving the plans in advance, however, will obtain them as soon as possible after arrival.

(b) The Base Defense Plan should be analogous to the one currently in effect for the Pearl Harbor area. The Senior Officer Present, in exercising his functions of command (paragraph 2 (c) of this Annex) should normally conform to the Base plans.

(c) The Communication Plan should include provisions for:

(1) Inter-communication between units of the local defense forces, and between such forces and the local defense commander.

(2) Communication between local defense commanders and fleet task organization commanders.

(3) An area radio frequency which may be used within that area for both (1) and (2) above and for inter-communication between the fleet task organization commanders present.

OFFICE OF THE COMMANDANT
FOURTEENTH NAVAL DISTRICT
AND
NAVY YARD, PEARL HARBOR, HAWAII, U. S. A.

COMMUNICATION INTELLIGENCE SUMMARY
1 NOVEMBER 1941.

- GENERAL- Traffic volume a little less than normal, receiving conditions fair but traffic rather slow. The first day's yield of new calls not very great. Fleet calls only changed, shore station calls and shore addresses not changed. It is believed that tactical calls also remain unchanged but not enough intercepted traffic to so state definitely. The same garble table for calls is employed so the change amounts to a reassignment of calls previously used. New calls have appeared but it is thought that they were formerly assigned to obscure units or were in reserve. All of the major Fleet calls are identified and a small amount of individual calls were recovered today. Because the new calls are not yet lined up save for the major Fleet Commanders and all time today was spent in call recovery, this summary will deal only with general impressions.
- COMBINED FLEET- The FIRST FLEET was not very active today in radio traffic. The CINC SECOND FLEET appears to have originated quite a bit of traffic to addresses placed in submarine and carrier category. No indications of movement of any of these units. COMBINED FLEET tactical circuits were heard but little tactical traffic copied due to interference by NPM.
- CARRIERS- The COMMANDER CARDIVS was mentioned in despatches from Tokyo and he took a fair amount of traffic on the Fleet Broadcast.
- SUBMARINES- Nothing to report. Calls of the Submarine Fleet not well lined up yet.
- THIRD FLEET- This Fleet very active as before. The SECOND and FIRST BASE FORCES are still maraballing their MARUs and the CINC is very busy with Tokyo.
- CHINA- The activity of HAINAN BASE continues. The KASHII sent several messages from Saigon.

2602 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

2 November, 1941

GENERAL - Traffic volume normal for Sunday. Receiving conditions were fair but bulk of traffic derived from the major shore circuits. Solution of new call system progressing satisfactorily but volume of accumulated traffic in new system not yet large enough to permit more than casual identification of individual calls. The number of alternate calls for major commands is increased over last system. So far there are seven alternate calls for the Combined Fleet.

Third Fleet traffic is still on a very high level. The combined air Force traffic is also very high with the Commander of the Combined Air Force originating many dispatches. It appears that he is now in Taiwan. Traffic to SAMA and BAKU is on a very high level. Tokyo and The China Fleet Intelligence bureaus are originating periodic despatches, those from Tokyo being prefixed WIMI. There were several high precedence dispatches from Tokyo with the major fleet commanders as addressees.

COMMUNICATION INTELLIGENCE SUMMARY
3 November 1941

GENERAL - Traffic volume slightly under normal although fair for Monday. Receiving conditions good but all circuits slow. General messages continue to emanate from TOKYO communications. Such an amount is unprecedented and the import is not understood. A mere call change does not account for activities of this nature. The impression is strong that these messages are periodic reports to the Major Commander of a certain nature. Dummy traffic is again being sent on the TOKYO broadcasts. Naval intelligence TOKYO addressed two WIMI messages to Chief of Staff Combined Fleet and to FUMI 8 (unidentified).

COMBINED FLEET - Commander in Chief Combined Fleet sent an urgent message to SUMIL information all Major Commanders, Combined Fleet, Naval Intelligence Tokyo, the Chief of Naval General Staff, and Bureau of Personnel. Commander in Chief, Combined Fleet also was associated in traffic with offices in the mandates, principally RNO PALAO. The Commander in Chief, Combined continues to be associated with the Carriers and Submarines.

THIRD FLEET - Third Fleet traffic continues at a high level. A movement report by RATI66(unidentified) was addressed to Commander in Chief Third Fleet for information.

AIR - A WE address today broke down as "ITIKOUKUU KANTAI". The literal reading of this as "1st Air Fleet" is correct it indicates an entirely new organization of the Naval Air Forces. There are other points which indicate that this may be the case. An old call (YOME7) while never identified seemed to be in a high position with respect to the Carriers and the Air Corps. Upon movement of air units to TAIWAN the association of CarDiv 4 and CarDiv 3 with units of the Combined Air Force was apparent. Their association in a command sense between shore based air and fleet air had never occurred before but under the concept of an AIR FLEET can easily be accepted. Traffic in the Air Force continues at a high level.

2604 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

4 November 1941

GENERAL - Traffic volume normal with all circuits easily readable. More tactical traffic copied than for past few days. Combined Fleet and Carriers heard on tactical circuits. TOKYO Naval Intelligence sent four messages to Major Commanders. One of these was for information Chief of Staff China Fleet and one other for information of Chief of Staff Second Fleet.

AIR - High traffic level of air activities continues. Most significant of the air despatches were some in which various air corps were addressed and BAKO included for information. One from Yokosuka Air was addressed to SANCHOW Island Radio for information TAKAO Air Corps. BAKO was also noted as an addressee in several messages from SASEBO and originated two messages to SASEBO and TOKYO. Commander Carriers also addressed a message to two unidentified calls for information of Commander Combined Air Force, Commander in Chief, Combined Fleet, CarDivs Collective, BAKO and others. The Commander Combined Air Force addressed a message to Commander in Chief Third Fleet.

MANDATES - The RNO PALAO was active today, being addressed by Commander in Chief, Fourth Fleet and sent several messages to TOKYO and YOKOSUKA. The PALAO weather station sent a long code message addressed to nearly all the islands of the Mandates. MARCUS Island appears as an originator. No Change in the location of Fourth Fleet units noted.

SUBMARINES - No activity noted.

COMMUNICATION INTELLIGENCE SUMMARY
5 November 1941

GENERAL - Traffic volume above normal. All circuits heard and receiving conditions were fair to good. TOKYO very active as an originator, sending out many messages of general address. Two WIMI messages in Kana Code sent by NGS to Chief of Staff CarDiv and TIYAAA (unidentified) respectively. The Intelligence Offices of China Fleet and TOKYO continue active with many despatches passing between the two.

THIRD FLEET - Two units of the Third Fleet appear today in TAKAO area. Since these calls are as yet unidentified (RIGI4 and YOA2) it is not known how much of this fleet they represent. It is fairly certain that the Commander in Chief, Third Fleet has not yet left the Sasebo area although it is expected that he will before long. One message which may be a movement report from him was received late on the 5th. The present state of call recovery on the Third Fleet does not permit of an estimate of the movement involved.

A unit of the First Fleet, identified today as CARDIV 4 appeared today at BAKO. This Carrier Division was addressed as "less PUTA SHOTAI" (2nd Section ?) Whether or not there are other units at BAKO is not known. The Commander CARDIVS has been associated with SAMA and BAKO in several despatches today. The following were also associated, SANCHOW ISLAND, TAKAO AIRCORPS, CANTON (China) and YOKCHAMA Air. The RNO TAIHOKU originated many despatches to TOKYO and the French Indo China Forces. A TAIWAN originator sent one to Lieut. Comdr. SHIBA at the Embassy THAILAND for information to HANCI and the Commander French Indo China Forces.

BAKO originated numerous despatches to the Empire and to the Major Fleet Commanders.

The South China Fleet was also the recipient of many despatches from TOKYO.

Despite the uncertainty due to the Change of Calls it is believed that there is now being effected a concentration of naval forces in the BAKO area which will comprise the Third Fleet as organized in SASEBO for the past month and will be augmented by heavy air forces and Combined Fleet units to an unknown extent.

2606 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

6 November, 1941

GENERAL - Traffic volume slightly above normal. Receiving conditions were fair, regular strong but heavy static on night watches interfered somewhat. Today the specific call-up on the Tokyo broadcast was eliminated. Formerly Tokyo radio called the unit concerned when the dispatch was addressed to a member of that unit. Beginning yesterday afternoon all broadcast messages are addressed to a single call without regard to the addressee of the message. The recovery of the radio organization will be hampered by this new advance in Communication Security. Moreover there were nine messages today on this broadcast from which the address and originator were missing. This may be the start of complete elimination of headings on broadcast circuits. Tokyo addressed a WIWI message to the Chiefs of Staff of the Combined Fleet and Submarine Force.

TAKAO-BAKO AREA - It is now certain that there is a very heavy air concentration on Taiwan. This comprises practically the entire Combined Air Force including the Commander and his staff plus at least one carrier division and an unknown amount of the fleet air arm. No additional units of the Third Fleet were located there today but it is believed that CinC Third Fleet is now enroute BAKO from SASEBO. From traffic association it is believed that some Second Fleet units are in Takao area but this has not yet been proven. The South China Fleet Command has been active in dispatches to Taiwan addresses.

COMBINED FLEET - A large amount of Combined Fleet traffic is now appearing with secret (tactical) calls in use.

MANDATES - The Mandates traffic has dropped off somewhat. The Sixth Defense Force at Truk and the RNO PALOA continue to be the most active units.

COMMUNICATION INTELLIGENCE SUMMARY7 November, 1941

GENERAL - Volume of intercepted traffic larger than usual. Due to the use of the general call "All Major Force Flags" on the UTU for delivery to all Combined Fleet units, affiliation of unidentified calls with forces to which attached is very difficult. Use of large number of alternate calls for major fleet forces, many of which have not yet been definitely identified or associated with known calls, renders the picture more confusing. Appearance of the prefix "JITSU" (authenticator for bonafide traffic) in several messages indicates that a communication drill is being held but without indication as to what units are participating and therefore much of the traffic is suspected of being "drill". Jaluit Radio is handling traffic direct with Yokosuka Radio probably due to congestion of Mandate circuits from the Marshalls caused by heavy concentrations in that area.

AIR - Continued high traffic level for all classes of air activities, mainly centered in the Taiwan area, but also with all air activities in the Mandates included in headings of messages. Despatches originated by Fourth Fleet Command included Air Forces, Base Forces, Air Stations, and all types of Mandate activities in long headings.

FLEET - Fourth Fleet Command remains in Truk area. There are indications that portions of the First Fleet may be moving to the Takao area but identifications are not sufficiently certain to confirm this.

Greatest effort is being made to increase the number of identified calls to facilitate analysis of the traffic but Orange changes in methods of handling fleet traffic renders this more difficult than had been hoped.

2608 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

8 November 1941

GENERAL -

Normal volume of intercepted traffic with no "dummies" appearing on the WTU. All WTU traffic was broadcast to the general call only. The Staff Communication Officer of the French Indo-China Force (So. Exp. For.) sent a despatch action to S.C.O. Combined INFO. S.C.O. Second Fleet, Combined Air Force, unidentified fleet unit, Radio stations at Tokyo, Palao and Takao. This may indicate a contemplated coordination of communications between the Indo-China-South China areas and the Palao Island-Taiwan area. Secret calls were used very little as compared to the past few days and only three circuits were heard using them, including the Combined Fleet Commanders circuit and Air Station Net. North Japan-Ominato circuits were quiet. All mandate circuits were active, with heavy interchange of traffic involving all classes of Mandate addressees in all areas, but with continued emphasis on the Palao area at one end and the Jaluit-Marshall area on the other. Chichijima Air Station was included in much of the traffic between Empire Offices and Saipan Air with Jaluit Base Force included for information. Inclusion of Chichijima usually presages an air movement between Mandates and Empire but the Units involved are unidentified. Commander of unidentified shore activity (MEO 60) previously associated with the Fifth Fleet, was addressed at Chichijima Air which tentatively identifies him as an air activity. Previous association of the Fifth Fleet traffic with Fourth Fleet and Yokosuka tends to confirm the belief that Fifth Fleet operations are, or will be, in the area adjacent to Chichijima-Marcus, supplementing the Fourth Fleet in the lower island areas.

FLEET -

Chief of staff First Fleet originated a despatch through Kure Radio. Batdiv Three of the First Fleet appears to be operating separately from the main force, possibly in connection with Cardiv Three and Four in the Taiwan-Naha area. An apparent movement report from Cardiv Four was addressed to CinC Combined Fleet, First Fleet, Cardiv Commander, Combined Air Force Commander and to movement offices at Tokyo, Yokosuka, Kure, Maizuru and Sasebo. Traffic from the Commander Indo-China Force is heard from the Japanese radio station at Saigon rather than from the KASHII, indicating that the staff is based ashore at present. Identifiable submarine activity was noted.

AIR -

Takao and Mandates continue to be the center of air activities. The area between Chichijima, Naha, Takao, Palao and Jaluit appears to be particularly concerned with movement of air force and auxiliaries, while the formation of a force under Combined Air Commander in the Takao-Bako area appears to be nearly completed as indicated by reports addressed to CinC. Combined, Naval Minister, Commanders of Cardivs, Combined Air Force, First

Handwritten: 44
P. # 17

COMMUNICATION INTELLIGENCE SUMMARY

6 November, 1941

AIR - (Continued)

Fleet and shore addresses generally associated with movements or organization changes. This force is believed to include CarDiv Four, and possibly CarDiv Three, with a number of auxiliaries and units of the Combined Air Force, also possibly some units from the First Fleet. Lack of identification renders composition of the force highly speculative and area of operations obscure. Prior to change of calls, much traffic was exchanged between China, South China and Indo-China while at present most traffic includes Palao.

2610 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

9 November 1941

GENERAL -

Traffic volume heavy for Sunday. Receiving conditions fair but heavy static caused numerous garbles and fragmentary messages. Navy Minister sent several messages of general address including one to all First and Second class Naval stations. Practically all of the general messages carried SAMA as an information address. Carrier Division Three arrived at Takao and there are indications that Carrier Division Four will return to Sasebo from Takao. The Flagship of Carrier Divisions is AKAGI and is in Sasebo area. Some tactical traffic today shows units of Combined Fleet still operating. The association of Batdiv Three and Mandate addresses, especially Saipan may indicate operations of that unit in the Marianas. The JINGEI was communicating with SAMA, HAINAN today. The Chief of Staff of the French-Indo China Force is in Tokyo.

One message today addressed to CinC. Combined Fleet was routed to MAIZURU for delivery but this is believed a communication error. The Third Fleet appears to be still in Sasebo area but it was noted that considerable traffic passed between Hainan, Taiwan addresses and the Third Fleet. The Fifth Fleet is still being organized with no indications yet that it has assembled. The Eighteenth Air Corps at Saipan originated much traffic to Yokosuka Air Corps.

COMMUNICATION INTELLIGENCE SUMMARY

10 November, 1941

GENERAL - Traffic volume normal, receiving conditions good. There were fewer general messages sent today than for the past few weeks. Tokyo Intelligence still active and addressing dispatches to all Major Commanders. The Mandates construction traffic has decreased considerably. Call recovery is progressing but has been slowed down by the general call-up used on Fleet broadcast.

COMBINED FLEET - Believed to be mostly in Kure area. A staff officer of BatDiv Three was addressed there today and it is likely that this whole division is there also. The CinC, Second Fleet was located at Kure today as well as two cruiser divisions.

THIRD FLEET - The greater portions of this fleet still in Sasebo area. Several movement reports have been noted by units of this fleet but none have been noted other than individual ships. At least two units of this fleet still at Takao. CinC Three originated one movement report for information of CinC Fourth Fleet.

FOURTH FLEET - Little activity. CinC. Fourth remains in vicinity of Truk with major portion of his command. The Staff Communication Officer of Submarine Force sent a message to the CinC. Fourth for information of Jaluit.

FIFTH FLEET - One unit of this fleet located at Chishijima.

AIR - The Combined Air Force Command is still talking to Sana and the South China Fleet. From one address it appears that the Commander of Carrier Division Three is with the Combined Fleet. Several units of the Carrier Divisions are in port at Kure and Sasebo. CinC. Combined Air Force is still in Takao.

COMMUNICATION INTELLIGENCE SUMMARY
12 November 1941.

GENERAL - Traffic volume normal for past two days with receiving condition about average. The general character of the traffic has been administrative with most of it being between shore logistic and technical activities. The D. F. net was active today with very little activity shown yesterday. Intercept operators have commented adversely on the major shore network which comprises all of the major naval activities in the Empire. Traffic has been moving slowly over this circuit. The reason is the non-cooperation of the operators and the definite lack of control exercised by TOKYO radio stations. TOKYO Intelligence is still sending messages to the major commands but the remainder of TOKYO traffic has been mostly from the technical bureaus.

COMBINED FLEET - The Fleets remain relatively inactive in the KURE area. The association of BATDIV 3 with the Fourth Fleet and several Mandates stations is born out by a D. F. position on the flagship of BATDIV 3 which places him about halfway between CHICHIJIMA and MARCUS Island. Their position was obtained on the 4th when this unit was not yet identified. No subsequent bearings have been obtained. Also associated with this BATDIV are a Submarine Squadron and possibly CARDIV 4 although the association of this CARDIV (Lately returned from TAKAO) is not positive. The Third Fleet remains at SASEBO with the only activity exhibited in the Base Forces.

AIR - CARDIV 3 returned to KURE from TAKAO as reported by CAVITE. Most of air activity confined to dispatches between carrier and shore establishments.

FIFTH FLEET - Nothing to report.

FOURTH FLEET - The Defense Forces of the Mandates fairly active. The volume of construction traffic has definitely fallen off. The Commander Submarine Force is still adding JALUIT and today COMSUBRON 2 addressed a message there. AIRRON 24 sent a movement report but no indication of the direction. Communication exercises were held by JALUIT and several stations in that area. YOKOHAMA Air Corps was addressed at RUOTTO.

CHINA - The previous activity of SAMA and the French Indo China Forces and bases continues.

COMMUNICATION INTELLIGENCE SUMMARY

13 November 1941.

GENERAL - Traffic volume normal with receiving conditions good. Several messages of high precedence intercepted, some of them are:

1. UNIWIFI despatch in five numeral from TOKYO Intelligence to Chief of Staff Combined Air Force, INFO RNO TAIHOKU, BAKO Naval Station.
2. WIVI from N.G.S. to MAIZURU INFO Chief of Staff Fourth Fleet.
3. NIFAWIFI from N.G.S. to Commander in Chief Combined Fleet, INFO Commander in Chief South China Fleet, Commander Third Fleet and SAMA, HAINAN.
4. UNIWIFI from N.G.S. to Secretary First Fleet.
5. (2 messages) WIVI to same address as 3 above.
6. A 3 part NIKAWIFI from N.G.S. to Commander in Chief Combined Fleet, INFO Commander in Chief French Indo China Fleet.
7. One UNI message from Commander in Chief China Fleet to SAMA, INFO Commander in Chief Third Fleet and Commander in Chief Combined Fleet.

This is the only occurrence in some time of anyone save the TOKYO intelligence activity using the WIVI prefix. Both TOKYO and the China Fleet Intelligence Bureau were active all day with despatches to the Major Commanders.

The direction finder net was again active all day with CHINKAI, ORU 7 (near CHINKAI), JALUIT, SAIPAN, and TAIWAN sending in bearing reports.

COMBINED FLEET - The activity of BATDIV 3 is not clear. The flagship is operating and was located by D. F. as reported yesterday. The Commander of BATDIV 3 is located in YOKOSUKA. The Division Communication Officer is communicating with TRUK, SAIPAN and PALAO. The other ships in this division remain unlocated but it is assumed, lacking evidence to the contrary, that they are with the flagship. Other units of First Fleet seem inactive. One Cruiser Division of Second Fleet is associated in traffic with PALAO and may be in that area.

THIRD FLEET - Still located in SASEBO, the Commander in Chief has been active in the traffic, being addressed by both TOKYO and Commander in Chief Combined Fleet. The First BASE FORCE Commander originated several messages but no indication of change of location.

FOURTH FLEET - The Commander in Chief Fourth Fleet is in communication with the Sixth BASEFORCE JALUIT. Several messages were exchanged. He appears to be preparing for a move from TRUK but no movement has yet occurred. SUBRON 2 is again in communication with JALUIT and today originated a movement report, but no indication of direction.

Page 1 of 2.....

49

2614 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

AIR - Carriers remain relatively inactive. The SMTTSU is still with them and a few may be engaged in target practice near KURE. The Combined AIRFORCE is still mostly located in TAIWAN and the usual high traffic level between its component Air Corps still exists.

CHINA - The Commander in Chief China Fleet was addressed in one by the RNO TAIHOKU. His Chief of Staff is still in SHANGHAI. 5

COMMUNICATION INTELLIGENCE SUMMARY

14 November. 1941

GENERAL - Traffic volume a little under normal due to poor to fair receiving conditions throughout the day. The Naval Ministry originated several AlNav dispatches. There were three WIMI messages originated today.

1. UNIWIMI from N.G.S. and BUMIL to Chief of Staff Fourth Fleet, Information Chief of Staff Combined Fleet and YOKOSUKA.
2. WIMI from N.G.S. and BUMIL to Chief of Staff Combined Fleet, Chief of Staff Third Fleet, YOKOSUKA and SASEBO.
3. UNIWIMI from N.G.S. to ANI758 (Chief of Staff of an unidentified unit), Information Chief of Staff Combined Fleet and Chief of Staff Combined Air Force.

Direction Finder Net active with SASEBO station sending in bearings in addition to the others. Tactical circuits heard during day with a fair amount of activity.

COMBINED FLEET - Little activity noted. The flagship of BatDiv Three is still operating but no further information on this division. Two Combined Fleet units appear active in the traffic. They are DesRon Three (normally in First Fleet but has been operating with Second Fleet) and CruDiv Seven of Second Fleet. Both of these units have been associated in traffic with the South China Fleet and the French Indo China Force. They may proceed to the South China area in near future.

THIRD FLEET - Still in Sasebo area. The CinC. has been addressed by Tokyo to a great extent and is still associated with South China activities in traffic. It has been noted that the association between the Third Fleet and units of the Combined Air Force is growing. Especially the Second Base Force has been talking with several Air Corps among whom is the Kure Air Corps. Will air units be embarked in ships of the Base Force?

FOURTH FLEET - No movement yet from the TRUK area. It appears that the Fourth Fleet Staff is fairly well split up. Various officers of the staff were addressed at Tokyo and at unidentified locations.

SUBMARINES - No particular activity. One unit evidently enroute PALAO and Submarine Squadron Two (now in Kure area) still being addressed by Tokyo and Yokosuka originators.

AIR - One Air Squadron of the Combined Air Force is at HOIHOW, HAINAN. The Commander of the Air Force is still at TAKAO with a good representation of his command. The Carriers remain in home waters with most of them in port.

2616 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATIONS INTELLIGENCE SUMMARY

15 November 1941

GENERAL - Traffic volume normal, with a number of general address messages originated by Communication Division, Tokyo, to Radio Officers, Ominato, U K 9 (D.F. Station in Marshalls), Jaluit, Palao, Truk, Saipan, Takao and Sasebo Radios, Staff Communication Officers All Major Flagships, Staff Communication Officer South Expeditionary Force and two apparent collective shore addressors. Traffic from all stations mentioned except Sasebo and Ominato to D. F. Control and Plotting Room Tokyo information to Staff Communication Officer Combined Fleet was received. No messages of the D. F. type were detected so it is presumed that the interchange had to do with arrangements for drill or organization of the net. The Minister of the Navy originated one airtel and one to all Major Commands and collective shore. Tokyo personnel and Tokyo Communication Division originated several to collective fleet and shore. Significance is not determined though it is believed possible that a further partial change of shore and air calls may be in prospect. The Empire air station net was normally active using tactical calls. Secretary First Fleet originated one Urgent Code to unidentified (MINE 55), Staff Communication Officer Carrier Division Four (at Sasebo) and Commanding Officer of Batdiv Three flagship.

COMBINED FLEET - Same as yesterday, same units (Batdiv Three, Desrons One and Three) associated through traffic with South Expeditionary Force. CinC Second Fleet was the most active originator and appeared to be arranging operations of units involving First, Second, Carrier and Air Units.

THIRD FLEET - Inactive.

FOURTH FLEET - Apparent movement of Fourth Fleet units in prospect or underway, with continued emphasis on the Marshalls Area. CinC Fourth traffic still being handled from the Truk area, with Air-ron Twenty-four (Kamoi) and associated Yokohama and Chitose air units involved in some movement, direction undetermined. All Marshall Island activities, including unidentified Army Forces, exchanging traffic freely.

SUBMARINE FORCE - Little activity detected. It is believed that some submarine activity is operating or preparing to operate in the Marshall area, from communication arrangements underway between Staff Communication Officer Submarine Force and same Fourth Fleet, information to Jaluit. Jaluit has been heard working on various frequencies, using tactical calls and procedure associated with submarine operations, but no identifications of calls have been made.

huk
Pg 28- 528

COMMUNICATION INTELLIGENCE SUMMARY

15 November 1941

AIR - Continued air traffic to and from Takao area, with unidentified Airron (formerly YONE 7) including South Expeditionary Force and Sama addressees in traffic. Composition of this force and purpose still speculative but believed to be preparing to move southward to work with the South Expeditionary Force.

The large number of alternate calls used by major forces renders analysis of traffic headings very slow and difficult, but identifications and recoveries of alternates are improving as a greater volume of November traffic becomes available for research.

2618 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

16 November 1941

GENERAL - Traffic volume approximately normal for week-end period. A new form of despatch heading appeared in a series of dispatches broadcasted on the regular UTM series. Only the originator or the address of the dispatch appeared; it is assumed that the other pertinent call or address may be buried in the text. These dispatches were with one exception (in 5 numeral text) all in the nine-Kana period separator system and the single call in the heading fitted in each case Line seven of the call garble table.

A dispatch was originated by the Navy Minister addressed to all Major Fleets and general addresses to this effect:

"Today the House of Peers and House of Representatives by means of a decision adopted the following resolution transmitted as follows:

1. Resolution of House of Peers - (Expressed deepest thanks and emotion to Army and Navy for their glorious service over a long period to the Empire and expressed condolences, etc., for those fallen in battle.
2. Resolution of House of Representatives - Expressed thanks, etc., to all officers and men of Army, Navy and Air Force for their 4 1/2 years service (in China affair) and for their contribution to the establishment of a permanent world peace. Gave prayers for well being of all hands, etc.."

FIRST AND SECOND FLEETS - Majority of First and Second Fleet Units remain in the general Kure area. The units of these two fleets that have been most active from dispatch heading viewpoint in the last ten days appear to be:
Airon Seven (3 Chitose class)
Carrier Division Four
Destroyer Squadron Seven
Destroyer Squadron Three
Battleship Division Three
Cruiser Division Seven.

It is rather singular that the CinC. Second Fleet has assumed an important role in addressing for action several first fleet and other fleet units recently. In some of these dispatches the call identified as Southern Expeditionary Force (Indo-China Force) appears. Associations of addresses in several dispatches have thrown the Second and Third Fleets with the Combined Air Force and in other dispatches, there appears to be an association between First Fleet, Carrier Divisions and the Mandates.

COMMUNICATION INTELLIGENCE SUMMARY

16 November 1941

FIRST AND SECOND FLEETS - (Continued)

It is apparent that Destroyer Squadron One has been or is operating with the Carrier Divisions and Battleship Division Three while Cruiser Division Seven and Destroyer Squadron Three have been operating together. Iwakuni Air sent short priority dispatch to the ATAGO, Second Fleet cruiser and submarine units indicating some joint minor exercises in that area.

THIRD FLEET - Believed inactive in Sasebo - Kure area.FOURTH FLEET - FUJITSU, a Tokyo address originated one UNI dispatch to an unidentified fleet unit (LEN 33), information to CinC. Combined Fleet, Communication Officer, Fourth Fleet, Saipan Base Force, Kure Movement Officer, CinC, Fifth Fleet, Tokyo Intelligence, and NEO 66, believed to be a shore based air activity in Chichijima-Marcus area.FIFTH FLEET - Prior to the change of calls on 1 November, the composition of the Fifth Fleet was very indefinite but appeared to contain several naval auxiliary type vessels. Since 1 November, little has been recovered of the composition of this mythical fleet but it is definite that some units are operating in the general Yokosuka Chichijima-Marcus.SUBMARINES - Little activity. Communication Officer, Submarine Force originated one priority dispatch to unidentified address, information to Combined Fleet Communication Officer. Association of Submarine Force and Fourth Fleet commands continues.

2620 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

17 November, 1941

GENERAL - Traffic volume normal with receiving conditions good. More traffic with single call heading appeared on the broadcast circuit. These dispatches numbered serially and each call different but all fitting the same line in the call garble table. Since these messages are transmitted each hour on the hour and are of approximately the same length it appears that they are drill messages. It is feared that they constitute a test of straight broadcasting without a heading. Since none of this traffic has been found going in to Tokyo it is probably originated in the Navy Ministry. Very few messages of general address were noted. Tactical circuits in the Mandates were heard during the day with radio Saipan controlling.

COMBINED FLEET - No movement from the Kure area of any major portion of the First or Second Fleets. The CinC. Second Fleet very active as an originator today. He continues to address units which are ~~now~~ normally under his command. He also addressed the CinC. Third Fleet, Palau Forces, and the Chief of Staff Fourth Fleet.

THIRD FLEET - Inactive at Sasebo. The Staff Communication Officer of Third Fleet was addressed by the R.N.O. Palau.

FOURTH FLEET - The greater part of the activity in the Mandate area centered about the Third Base Force at Palau and the Sixth Base Force at Jaluit. Both these activities originated traffic.

AIR - The Commander of the Combined Air Force remains in Takao and was addressed frequently by SAMA, HAINAN and was in two instances addressed by the Fourth Fleet. The carriers are mostly in the Kure-Sasebo area with the exception of a few which are operating in the Kyushu area.

CHINA - SAMA was again active today with dispatches to the Combined Fleet Staff, Combined Air Force, Third Fleet and Bako. The R.N.O. Taihoku addressed a dispatch to CinC. China, Sanchow Island, SAMA, Bako, CinC. South China, and Chief of Staff Combined Air Force.

THU

COMMUNICATION INTELLIGENCE SUMMARY

18 November 1941

GENERAL - Traffic volume a little under normal with receiving conditions fair to poor. Tokyo originators active with several messages of general address emanating from the Communication Section. The double originator HUKIL and M.G.S. sent one NIKAWIMI to the Chief of Staff Combined Fleet for information to all First Class Naval Stations. HUKIL also addressed an urgent dispatch to SALIA, information to R.N.C. TAINOKU, Chief of Staff South China Fleet and Chief of Staff Combined Fleet. Another Tokyo originator, believed to be M.G.S., sent an urgent message to Chief of Staff Combined Fleet, Chief of Staff French Indo China Force and Chief of Staff Second Fleet. MAIZURU Naval Station also sent an urgent message to Chief of Staff Combined Fleet, Second Fleet, Combined Air Force, French Indo China Force and for information to M.G.S. The Tokyo Direction Finder plotting section sent three long dispatches to the entire Direction Finder Net which was very active today with many bearings reported. The Vice Chief Naval General Staff sent one to Chief of Staff Carrier Divisions and Chief of Staff French Indo China Force.

COMBINED FLEET - CinC. Combined Fleet very prominent as both an originator and addressee. Since this officer is always included in the address of every important message, he will no longer be mentioned as an addressee unless he is the only addressee. The association between the CinC Second Fleet and the French Indo China Forces and Combined Air Force is very plain. He was addressed by CinC. French Indo China Force today in an urgent NIKAI dispatch. Several units of the Combined Air Force also addressed several dispatches to him. Battleship Division Three, the Carrier Divisions and two destroyer squadrons have been associated in traffic. Several dispatches occurred today, being addressed by M.G.S. and the Commander Carrier Divisions in several instances. The CinC. Third Fleet also addressed several dispatches to him. These form the indication that CinC. Second Fleet will be in command of a large Task Force comprising the Third Fleet, Combined Air Force, some carrier divisions, and Battleship Division Three. No movement from home waters has been noted.

THIRD FLEET - The Commander Second Base Force originated what appears to be a movement report. He also sent one to R.N.C. TAIHOKU, information to CinC. Third Fleet. There were other units tentatively placed in Third Fleet who sent dispatches in which the Tokyo movement report office was an addressee. It is expected that the Third Fleet will move from the Sasebo area in the near future. This Second Base Force was having quite a bit of traffic with several Air Corps a while ago and may be transporting air units or equipment.

FOURTH FLEET - Not much activity in this fleet. The amount of traffic between this fleet and Palao is noticeable with the submarines still interested in Jaluit.

2622 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

19 November, 1941

GENERAL - Traffic volume normal. Traffic from Fourth Fleet and Mandates was noticeably less than usual. Traffic on the northern circuits also very light. Some tactical traffic received from Combined Fleet units. There has been a noticeable increase in the afloat traffic over the normal amount usually seen. Fleet units seem to have a great deal of business with other Fleet units both within and outside of their own organization. Staff Officers are frequently addressed at other than their normal locations. The activity at Tokyo has subsided somewhat in that there were fewer general messages than for the past few days. Tokyo Intelligence sent out several messages addressed to Second Fleet, Submarine Force and Carrier Divisions. One was sent to SAJ'A for information to French Indo China Forces and South China Fleet. The Navy Minister sent out two AlNavs. The Direction Finder net is still active with all stations sending in reports and Tokyo plotting station making reports to major commanders.

COMBINED FLEET - The flagship of Battleship Division Three appears today at Sasebo, its southern jaunt apparently having been completed. Destroyer Squadron Four and Two appear associated with the Third Fleet. CinC. Second Fleet continues his activity, being still associated with Combined Air Force, French Indo China Force, Third Fleet, and today with Carrier Division Three. Carrier Division Three was in Takao and returned to the Empire a week ago and has been associated with Third Fleet since. A Bako activity addressed the Chief of Staff Second Fleet, Third Fleet and Combined Air Force. The Chief of Staff Second Fleet addressed an urgent dispatch to CinC. French Indo China Fleet information to Third Fleet and Commander Cruiser Division Five.

THIRD FLEET - Active as noted above. Several more units of this fleet and of the Base Forces originated movement reports but no indication of direction. CinC. Third Fleet is still in Sasebo.

FOURTH FLEET - Activity in Mandates still centers about the Third Base Defense Force at Palao. Traffic between this force, Tokyo and the Second Fleet was considerable. One call (SITI 4) appears at Jaluit today. This call has been identified as Carrier Division Four and if the one message is correct it appears that this Carrier Division (ZUIKAKU) is in the Jaluit area. This is not confirmed as no other indications have been found and its presence at Jaluit is doubted, attributing the message to be a communication error.

FIFTH FLEET - Flagship located at Yokosuka. The CinC. Fifth Fleet appeared in a few dispatches from Tokyo but no other activity seen.

COMMUNICATION INTELLIGENCE SUMMARY

20 - 21 November 1941

GENERAL - Traffic volume for past two days has been higher than normal. Tokyo originators active with messages addressed to all major commanders. N.G.S. sent a UNI WIWI to Commandant BAKO for information to Chief of Staff South China Fleet and Canton. The Personnel Bureau at Tokyo become very active on the 21st sending out a series of long personnel messages. The activity at Tokyo identified as R.D.F. plotting stations increased his recent high volume of messages with a long four part message addressed to all major commanders. He also addressed several dispatches to the Direction Finder net, indicating the employment and results being obtained by this activity. The traffic load on the Tokyo-Takao circuit was very heavy on the 21st, so heavy that the circuit was in duplex operation most of the mid-watch.

COMBINED FLEET - Flage of both First and Second Fleets are in Kure area and most of both fleets remain in Kure-Sasebo area. Battleship Division Three still in Yokosuka area. Traffic to and from the CinC. Second Fleet continues abnormally high. A list of units addressed by him or who sent traffic to him and CinC. Third Fleet over the past two days follows:

MIRA 3	(Carrier Division Three)	ENO 7	(Unidentified)
TAZ 1	(Airron 7)	AKU 8	(Air Unit)
KAME 5	(Airron 6)	KUSU 7	(Unidentified)
YAWI 1	(Crudiv 5)	SATU 88	(Unidentified)
KENU 3	(Crudiv 7)	KUNI 88	(Unidentified)
RESE 4	(Desron 3)	OYU 9	(Unidentified)
AKI 0	(Desron 4)	KONA 0	(Unidentified)
TIYA 7	(Comdr. 1st Base For)	NOTU 6	(Unidentified)
SASE 3	(Comdr. 2nd Base For)	NETE 5	(Unidentified)
YOMO 9	(Desron 5)	NSI 3	(Unidentified)
REA 2	(Shiogama Air Corps)	SUTE 1	(Unidentified)
KUNO 9	(Zrimo)	YAYU 1	(Unidentified)
KIBC 3	(Air Unit?)	MARE 5	(Unidentified)
TUZ 7	(Unidentified)	Plus 11 Marus.	

This list is not the complete estimate of forces being assembled by him but only the ones occurring in the past two days. Each one appeared not only with the CinC. Second Fleet but with the Third Fleet and with one of the units now in South China or a Taiwan-South China Address. A complete list is being made up but was not finished at this writing. Assuming that the entire Second Fleet will be included in this organization and that each unit addressed will either participate or contribute somewhat to the Task Force it appears that it will comprise a good portion of the navy. One item stands out - so far there has been practically no submarine units mentioned by the Second or Third Fleets in connection with South China activities. Commander Submarine Force has not been included in traffic. He does appear in Tokyo Fourth Fleet and Mandates traffic.

Page 1 of 2.....

Pg #32

2624 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

7741

COMMUNICATION INTELLIGENCE SUMMARY

20 - 21 November 1941

MANDATES AND FOURTH FLEET - The R.N.O. Palao and Palao radio stations have remained active with the Fourth Fleet and Yokosuka for days. This is taken to indicate a coming concentration of forces in Palao which would include the Fourth Fleet and some of the Second Fleet who has also been active with the R.N.O. Since the activity of the Second Fleet Commander has been so great it may be that he will assign some non-Second Fleet units to that area but just which ones is not yet known. From information from radio sources there is no indication of any concentration now at Palao beyond the Third Base Force which is based there. There has been no traffic for other fleet units routed there and the Maru traffic to Palao is far less than the normal flow to that area. With the arrival of Sittou (yesterday reported as either a carrier unit or submarine unit and now identified as a submarine squadron of the Submarine Fleet) the concentration of naval forces in the Marshalls is far greater than that existing at Palao.

JALWIT

COMMUNICATION INTELLIGENCE SUMMARY

22 November 1941

GENERAL - Traffic volume somewhat greater than normal. Only one tactical circuit heard today, indicating that Combined Fleet tactical exercises are now completed. The Navy Minister originated several AlNava and sent two other messages, one to CinC Fourth Fleet and one to Yokosuka and Commander Submarine Squadron Five. Tokyo Intelligence sent out the usual long messages to CinC Combined Fleet, CinC Second Fleet and CinC Third Fleet. BuMil addressed Fourth Fleet, Truk, Pagan Civil Engineering Section at Peleliu and Yokosuka. Another unidentified Tokyo originator sent a priority message to all major flags and China Fleet, information to ANOS at Taihoku and Palao. Sasebo addressed one to Chief of Staff French Indo China Force, information Chief of Staff Second Fleet, Bako, Sama, Chief of Staff South China, Chief of Staff Third Fleet, Commander Cruiser Division Seven and Commander Destroyer Squadron Three. Cruiser Division Seven and Destroyer Squadron Three to South China Area soon? While the Direction Finder Net is still active, the station at Palao sent in more bearings than usual for that station.

COMBINED FLEET - CinC. Combined originated only one dispatch to two unidentified calls, one a Maru, for information to CinC. Third Fleet. CinC. Second Fleet was again prolific with many messages addressed to Third Fleet and Combined Air Force. The amount of traffic interchanged between these three commanders was very great. One message addressed many units as follows:

CinC. Second Fleet. To: NETE 5 (Crudiv ?), KOO 2 (Subron 5) TIYU 66 (CinC. Third Fleet), SUYO 44 (CinC. Comb. Air Force), MIRA 9 (CarDiv 3), RESE 4 (Desron 3), KORE 4 (Second Fleet) (Collective), less Crudiv 8 and unidentified 2nd Fleet unit), SUTI 2 (BatDiv 3) (at Kure and Sasebo), AirRon 7 (at Kure), SUTI 1 (?) (at Kure), SATU 8 (?) (at Kure), KETA 8 (AKASHI) (at Kure) META 2 (ASAHII MARU), TUFU 2 (?), NARI 33 (CinC. China Fleet), KAKX 66 (CinC. South China Fleet), MISI 66 (CinC. Comb. Fleet).

THIRD FLEET - CinC. Third Fleet received a dispatch from "RIKUGUN SANBOUTSU MAEDATI SEUZU (at Tainoku). This is translated as "Army Chief of Staff MAEDATI and indicates the linking of the Taiwan Army Forces with Third Fleet. The CinC Third Fleet continues his association with Combined Air Forces.

FOURTH FLEET - CinC Fourth Fleet was mostly occupied with the Sixth Base Force at Jaluit and AirRon 24 now in Jaluit area. The Third Base Force at Palao and the RNO Palao are still addressing the CinC Fourth and Yokosuka. He also received one from Commander Submarine Force.

CHINA - The Commander French Indo China Force sent one message to CinC. Combined Fleet for information to CinC. Second Fleet. Bako sent one to Secretary Fourth Fleet and Secretary Submarine Fleet, Secretary Carrier Divisions, Secretary Fifth Fleet, Sama and French Indo China Fleet.

Page 1 of 1.....

3/ H/K L/S
Pg. #34

2626 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

23 November, 1941

GENERAL - Traffic volume normal. High precedence traffic has increased. Some of the high precedence dispatch headings are listed:

1. MAYURU (Tokyo address) to HORONO MUSEKU (Collective Shore
Precedence Information Chiefs of Staff Combined,
NIKA-MIWI 1st, 2nd, 3rd, 4th, 5th and Southern
Expeditionary Force. ✓
 2. Third Fleet Chief of Staff to Second Fleet Chief of Staff
Information Combined and Southern
NIKA Expeditionary Force Chief of Staff. ✓
 3. KESANA EONO (Tokyo) to Chiefs of Staff Third Fleet and Southern
Expeditionary Force. Information
"SAIKUJUTI" at Sawa Hainan. ✓
- MIWI
4. SUTE 1 (Unidentified Fleet unit) to Radio Takao, Hainan,
Flagship NKA 2, information Radio
NIKA Tokyo and Second Fleet flagship. ✓
 5. Imakuni Air to Iwakuni Air Detachment at NAF
Information Kure, Ma. O, and MINO 3
in Takao. ✓
- KIU

Personnel Tokyo also originated several priority dispatches to First Fleet, Third Fleet, and others. The following ME address was followed by Sasebo Radio in the delivery of a personnel Bureau dispatch "SAHOTI.RENGO.RI.SI".

An unidentified fleet unit (SUTE 1) listed recently in Kure appeared on radio circuit with Takao Radio. Also on this circuit were the following:

- KENU 3 - CruDiv 7 Flagship
- HOWI 2 - Fleet unit associated with Second Fleet.
- KIE 8 - Fleet unit associated with Second Fleet.
- KUSE 5 - Naval Auxiliary associated with Second Fleet.

The above units received delivery of the long NIKA dispatch originated by CinC Second Fleet on the 21st of November and which appeared to outline the forces expected to operate in the Indo-China general area.

COMBINED FLEET - CinC Combined was included, as always, in all exchange of fleet commander traffic, but no important messages originated by him were intercepted. First Fleet was very quiet. Second Fleet messages mentioned in summaries of 22nd were still being circulated but Third Fleet appeared as the most active unit in today's traffic. Indications are that Third Fleet units are underway in

Page 1 of 2.....

625
Pg. #35

COMMUNICATION INTELLIGENCE SUMMARY

23 November, 1941

a movement coordinated with the Second Fleet, Combined Air Force and French Indo China Force. Commander French Indo China Force (So. Exp. For) was included in all important traffic from Second, Third and Combined Air Commanders, Hainan addressees were included in nearly all high precedence messages concerning these forces and may indicate a rendezvous of forces in that area. Palao appeared as an information addressee on a portion of the traffic. Fourth Fleet activity involved Palao area on one end and Marshalls on the other. With no means of substantiating the impression, it is believed that more submarines are operating in, or from, the Marshalls than it has been possible to definitely place from radio interceptions. It is recalled that there was an exchange between Staff Communication Officers of the Submarine Force and Fourth Fleet with Jaluit included as either action or information around November 1st and that Jaluit opened a direct circuit to Yokosuka early this month, apparently to relieve traffic congestion from that area. Jaluit Radio has been heard on various frequencies using, and working with units using tactical or secret type calls, while the main submarine frequency of 6385/12770 has been relatively inactive.

AIR - Combined Air Traffic remains associated with Taiwan area, while the Mandate Air units continue high level of activity, covering the whole Mandate area. Carrier Divisions were relatively quiet, but with Carrier Division Three definitely associated with Second Fleet operations.

CHINA - CinC. China and South China not included with the Second, Third, Air Force and Southern Expeditionary Force traffic and were quiet. Bearings from Cavite and Guam place CinC. South China east of Taiwan, but this is believed questionable.

Nothing was seen to contradict impressions gathered during the past few days and summarized previously, that movement of forces is either imminent or actually underway, at least in part, to the southward, with covering forces operating from the Mandates, and possibility of a striking force assembled or gathering in the Palao area.

2628 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

24 November, 1941

GENERAL - Traffic volume normal. High precedence traffic above normal. Traffic analysis impressions are unchanged from yesterday's report. The difficulties of identifications have prevented more definite information of vessels (and fleets to which attached) that appear to be moving south from Kure-Sasebo area. If the poor reception prevailing here the last two days can be disregarded and the assumption made that Radio Heeia intercepted their "share" of the total traffic, the following impressions are worth something:

- (a) The falling off of traffic to China addresses.
- (b) The increased activity among third fleet addresses with a high percentage of what appears to be movement reports.
- (c) The above normal activity in the Mandates both ashore and afloat addresses.

The association of Second Fleet, Third Fleet and Southern Expeditionary Force continues as usual. Palao and Jaluit appear prominently in despatch traffic, the Second Fleet Commander with the former, and the Submarine Force Commander with the latter.

FIRST AND SECOND FLEETS - Very little activity in First Fleet. The radio call believed to represent the flagship of Cruiser Division Seven originated a dispatch to Commander Cruiser Division Seven, CinC. Second Fleet, Commander Southern Expeditionary Force, and Radio Sama, Takao, Sasebo, and Tokyo. The CinC. Second Fleet continues to appear as the Task Force Commander of a large number of units from First and Second Fleet plus Carrier Division Three and Combined Air Force units.

THIRD FLEET - Large number of dispatches involving Third Fleet units, some of which appear to be movement reports. The fact that CinC. Third Fleet appears as information addressee on many dispatches to and from Second Fleet units indicates that these two fleets will be closely associated in any future operations. Yesterday, a large number of dispatches associating Carrier Division Three with CinC. Third Fleet.

FOURTH FLEET AND MANDATES - Fourth Fleet appears to be concentrated in Truk area since all of the recent definite reports from Fourth Fleet vessels have come from Truk. Air Squadron Twenty-four and perhaps a large number of submarines from the Submarine Force are in the Marshall Area.

SUBMARINES - Comparatively little activity.

CHINA - Comparatively quiet.

CARRIERS - No definite indications of location.

COMBINED AIR FORCE - Commander Kanoya Air appears on the Tokyo. Otherwise no change.

COMMUNICATION INTELLIGENCE SUMMARY25 November, 1941

GENERAL - Traffic volume normal. Receiving conditions much improved over last two days. Tokyo personnel bureau active with messages to various units. Tokyo originated one UNI WIWI to CinC. Combined Fleet, CinC. Second Fleet, CinC. Third Fleet, CinC. Fourth Fleet and CinC. French, Indo China Force plus Yokosuka, Kure and Maizuru. The Navy Minister originated several AlNavs. A Direction Finder Net, controlled by Tokyo radio was active with secret calls being sent by the five stations. The entire fleet traffic level is still high which leads to the conclusion that organizational arrangements or other preparations are not yet complete.

COMBINED FLEET - Little activity by CinC. First Fleet. CinC. Second Fleet remains highly active as an originator, addressing Third Fleet, Air Forces and South China units. A Second Fleet unit and a submarine division or squadron arrived in Takao communication zone today. Crudivision Seven which previously arrived there has been associated with Destroyer Squadron Three which indicates the presence of that unit in Takao vicinity. Palao and Second Fleet still exchanging messages. Two new units to be associated with CinC Second Fleet and the Task Force now forming are the North China Fleet and Defense Division One.

AIR - Through the identification of a call made today Genzan Air Corps has been in Saigon since the eighteenth. We believe that other units of the Combined Air Force have moved from Taiwan to the French Indo China Area although this is not yet verified. One or more of the Carrier Divisions are present in the Mandates.

FOURTH FLEET - CinC. Fourth Fleet is still holding extensive communications with the Commander Submarine Fleet, the forces at Jaluit and Commander Carriers. His other communications are with the Third, Fourth and Fifth Base Forces.

2630 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

26 November, 1941

GENERAL - Traffic volume normal. All circuits heard well except for Tokyo-Takao circuit which faded early. Traffic picture about the same as for the past week. Intra-fleet traffic still very heavy and Tokyo Bureaus still dispatching AlNave. The Tokyo Intelligence and Direction Finder plotting units addressed a succession of urgent dispatches to the major commands and to the CinC. Second and Third Fleets in particular. The only MAN schedule was NRI5 which was first broadcast on the twenty-fifth. Takao and Bako originated more traffic today than usual, it was addressed to Third Fleet mostly but the CinC. Second Fleet and the China Fleets came in for their share. Tokyo radio is working the ISUZU (flagship South China) SAMA and CAMRANH Bay radio stations directly. Takao is also working

(1% ASA) ITSUBA (Spratleys).

COMBINED FLEET - Cruiser Division Seven today began receiving traffic via SAMA, indicating the arrival of that unit in Hainan waters. While no indications were seen that Destroyer Squadron Three also arrived it is probable that this unit is still in company with Cruiser Division Seven and is also present at Hainan. The Takao, former flagship of the Second Fleet became active in the traffic today being associated with the Second and Third Fleets. The tanker HAYATOMO appeared in several of CinC. Second Fleet's dispatches today as well as the SOYO MARU. No movement is evident yet of any of the flags of the newly formed force. The traffic between Second, Third, Fourth Fleets and the Combined Air Force still continues at it's high level.

FOURTH FLEET - No change in Truk location. CinC. held extensive communication with Saipan forces as well as Palao forces. The KATQRI and CinC. Submarine Fleet appear to be at or near Chichijima.

FIFTH FLEET - The CinC. Fifth Fleet was included in some of the dispatches of the Second Fleet and is associated with the new Task Force.

SUBMARINES - As noted above Commander Submarine Force is in Chichijima area. The Submarine Squadron NETEJ's location is somewhat uncertain today due to one dispatch being routed to MAIZURU. The routing of this dispatch is doubted because of the indication of her arrival at Takao yesterday and her previous association with Cruiser Division Seven.

CHINA - Two Marus of the Third Fleet left Bako for SAMA today.

THIRD FLEET - Active as above but no indication of large scale movement from the Sasebo area.

COMMUNICATION INTELLIGENCE SUMMARY

27 November 1941

GENERAL - Traffic volume a little below normal due to poor signals on the frequencies above 7000 kcs. Tokyo-Takao circuit unreadable on mid-watch. Some tactical traffic intercepted from carriers. Bako, Sama, and Saigon active as originators, addressing traffic to each other and to the Chiefs of Staff of Second, Third Fleets and Combined Air Force. Bako addressed the Chief of Staff Third Fleet information Destroyer Squadrons Four and Five and Chief of Staff Second Fleet. The main Tokyo originator today was the intelligence activity who sent five despatches to the major commanders. The Direction Finder activity was very high with all stations sending in bearings including the Marshall Islands Stations which has been silent for the past four days.

COMBINED FLEET - No further information as to whether or not Destroyer Squadron Three is in Hainan area but is believed to be still with Cruiser Division Seven in that area. There is still no evidence of any further movement from the Kure-Sasebo area. The Chief of Staff Combined Fleet originated several messages of general address. He has been fairly inactive as an originator lately. CinC. Second Fleet originated many messages to Third Fleet, Combined Air Force, and Bako.

THIRD FLEET - Still holding extensive communication with Bako, Sama, South China Fleet and French Indo China Force. The use of WX addresses is increasing, those occurring today were:
 "JAINATIMUTATTAISANBOTSU" (in Taihoku)
 "KOROKKITSIKI"
 "KIZUTTAISITA"TAI" (in care of RYUJO)
 "HIZEN"AIKUNDAIGORREUSU"
 There is nothing to indicate any movement of the Third Fleet as yet.

FOURTH FLEET - CinC. Fourth Fleet frequently addressed dispatches to the defense forces in the Mandates. Jaluit addressed messages to the Commander Submarine Force and several submarine units. The Saipan Air Corps held communication with Jaluit and CinC. Fourth Fleet. The Civil Engineering Units at IJIMA and ENIATON were heard from after being silent for weeks. Chitose Air Corps is in Saipan and Air Squadron Twenty-four is still operating in the Marshalls. No further information on the presence of Carrier Division Five in the Mandates.

AIR - An air unit in the Takao area addressed a dispatch to the KORYU and SHOKAKU. Carriers are still located in home waters. No information of further movement of any Combined Air Force units to Hainan.

SUBMARINES - Commander Submarine Force still in Chichijima Area.

Page 1 of 1....

COMMUNICATION INTELLIGENCE SUMMARY

November 28, 1941.

GENERAL - Traffic volume normal. Communications to and from South China and between Mandates and Empire very heavy. No tactical traffic seen. As has been previously reported the suspected Radio Intelligence net is very active and is becoming more so. The TOKYO plotting activity addressed more messages to the Radio net than previously and most of these sent for information to the Major Commanders. Much traffic also was directed to NREG (the TOKYO D.F. Command) from all eight stations in the Mandates and OMINATO. This Command also originated messages of high precedence to the Major Fleet Commanders. This activity is interpreted to indicate that the R.I. net is operating at full strength upon U.S. Naval Communications and IS GETTING RESULTS. |||

TOKYO originators were active with messages of high precedence to the Commander in Chief's of the Second and Third Fleets and Combined Air Force. The Navy Minister sent to Alnavs. The Chief of the Naval General Staff sent one to the Chief of Staffs of Combined Air Force, Combined Fleet, Fourth Fleet, Third Fleet, French Indo-China Force, Second Fleet and RNO PALAO. The BUAERO sent one to Chief of Staff Fourth Fleet info IMI SI and 11th Air Corps at SAIPAN.

COMBINED FLEET - No indication of movement of any Combined Fleet units. Commander in Chief Second Fleet originated his usual number of despatches to Third Fleet and Combined Air Force. The units paid particular attention to by the Commander in Chief Second Fleet were CEMOIVS Five and Seven and DESRONS Two and Four and SUBRON Five. No traffic today from the TAKAO (CA).

THIRD FLEET - Little activity from Third Fleet units save for the Commander in Chief. The impression is growing that the First Base Force is not present with the bulk of the Third Fleet in GASEBO but it is not yet located elsewhere. The Army Commander in TAIHOKU is still holding communications with the Commander in Chief Third Fleet. Two Third Fleet units arrived at BAKO and are apparently returning to KURE from BAKO.

FOURTH FLEET - Bulk of Fourth Fleet still at TRUK. The Commander in Chief Fourth addressed message to the Sixth Base Force at JALUIT and the Fourth Base Force at TRUK. Yokohama Air Corps is at RUOTTO and WOTJE and held communications with AIRRON Twenty-Four and KAMOI.

SOUTH CHINA - SAMA sent several messages to shore addresses in the Empire. SAMA also addressed the OMURA AIR CORPS in several messages which went for information to SAIGON and TOKYO. TAKAO radio station addressed the Chiefs of Staff Combined Fleet, Second Fleet, the French Indo China Force and Combined Air Force. TAKAO Air Corps addressed SUKUGAWA Air Corps and YOKOSUKA Air Corps. A representative of a HAINAN office now at SAIGON originated several messages to the Naval Bases at SASEBO and KURE. The Commander in Chief China Fleet originated more traffic than usual and addressed his fleet collectively for information to the Commander in Chief Second and Commander in Chief Third Fleets.

SUBMARINES - Except for the mention of SUBRON Five and Six in two despatches there was no submarine activity today.

COMMUNICATION INTELLIGENCE SUMMARY

29 November 1941

GENERAL - Traffic volume above normal. The traffic to South China still very high. Automatic transmissions was attempted on the Tokyo-Takao circuit but was a failure and traffic sent by hand. A good share of today's traffic is made up of messages of an intelligence nature. Tokyo Intelligence sent eleven messages during the day to Major Commanders both ashore and afloat, while the radio intelligence activity at Tokyo sent four long messages to the Major Commanders. In addition to the stations normally reporting to Tokyo, radio Yokosuka sent in reports. This station had not previously been seen to submit reports. The Direction Finder Net controlled directly by Tokyo was up during the night with much activity. One message for Jaluit Radio Direction Finder Station included Commander Submarines for information. The Navy Minister originated his usual two AllNavs and the Naval General Staff addressed Commanders Second Fleet, Third Fleet, Combined Air Force and the South China Units. The unit which has been addressed as the "103rd Air Group" originated one dispatch today whose address was composed entirely of enciphered calls. It is apparent that he has no Navy call list. One address was "JUTIKOUKUUKANTAI" "11th AIR FLEET". Since this has appeared before it is evident that the use of KANTAI is intentional making the existence of an air fleet positive. Its composition is unknown.

COMBINED FLEET - The arrival of Air Squadron Seven in Takao area is confirmed. The presence of Cruiser Division Four in that area is not confirmed nor denied. The dispatches today indicate that the following units are under the immediate command of CinC. Second Fleet:

CARDIV THREE	DESRON TWO	1CL-13DD
SURRON FIVE	DESRON FOUR	1CL-13DD
SURRON SIX	THIRD FLEET	
CRUDIV FIVE	FRENCH INDO CHINA FORCE	
CRUDIV SEVEN		

Associated with Third Fleet are two Battleships but their assignment is not yet definite. Aside from messages which were addressed to Third Fleet, China and South China Fleets, Combined Air Force and the Naval General Staff, Commander in Chief Second Fleet was mainly occupied with the units listed above. Only one message from Commander in Chief Combined Fleet was seen. This was addressed to YOKOSUKA, Combined Air Force, CRUDIV Four and BUNILAFF. The HUXI sent one message to Chief of Staff Third Fleet

THIRD FLEET - Commander in Chief Third Fleet sent one message to Commander Five, Number Two Base Force, Number One Base Force, Defense Division One and Comdesron Two and Four. He held extensive communications with the Commander in Chief Second Fleet and BAKA. Two more units of Third Fleet made movement reports.

FOURTH FLEET - Relatively inactive today. Sent one message to Commander in Chief Second Fleet, Commander in Chief Third Fleet and Combined Air Force. He is still in TRUK area.

2634 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SUBMARINES - Traffic for Commander Submarine Force was routed through SAIPAN today. He was at CHICHIJIMA yesterday.

SOUTH CHINA - CRUDIV Seven now in SA'IA made a movement report but direction was not indicated. The French Indo China Force Commander addressed several messages to Second and Third Fleets as well as TOKYO. The Commander in Chief China Fleet was active in addressing the South China Naval Bases and the South China Fleets, all for information to Commander in Chief Second Fleet.

COMMUNICATION INTELLIGENCE SUMMARY

November 30, 1941.

GENERAL - Traffic volume less than for past few days. Today's traffic consisted largely of despatches bearing old dates, some as far back as 26 November. No reason can be given for the retransmission of these messages unless the high volume of traffic for past few days has prevented the repetition of despatches. The number of despatches originated on the 30th is very small. The only tactical circuit heard today was one with AKAGI and several MARUS. The TOKYO Intelligence activity originated two WIVL despatches to Major Fleet Commanders. One urgent despatch was sent by NGS to Chiefs of Staff, Combined, Second, Third, Fourth, and Fifth Fleets, Combined Air Force; Submarine Force and China Fleets.

COMBINED FLEET - The Chiefs of Staff of the Combined Fleet and First Fleet are in KURE. In the same message the Chief of Staff Second Fleet was not at any location. Other traffic indications are that he is at sea. Commander in Chief Second Fleet sent one to his usual addressees of the Third Fleet and Combined Air Force but also included KOKKO and HIYER, which places them as members of his Task Force. The Commander in Chief Second Fleet is no longer adding PALAO activities and has not for past two days. The RNO PALAO today addressed two messages to TAIWAN GUN'SIREIBU (TAIWAN Army Headquarters).

THIRD FLEET - Commander in Chief Third Fleet addressed two messages to COMDESRAN Two, Four and Five; COMCRUDIV Five; First and Second Base Forces and Defense Division One for information to Commander in Chief Second Fleet. No information obtained as to the location of the Commander in Chief Third Fleet, which gives the strong impression that he is underway.

FOURTH FLEET - Believed to be still in TRUK area. D.F. activity in Marshall a little greater today than normal. JALUIT addressed Commander Submarine Force and AIRRON 24 in one despatch. The continued association of JALUIT and Commander Submarine Force plus his known progress from the Empire to CHICHIJIMA to SAIPAN makes his destination obviously the Marshalls. Since one of his large units (SITI 4) arrived in the Marshalls some time ago this unit cannot agree with Com 16 that there is not a submarine concentration in that area. Every evidence points to a concentration of not only the small Fourth Fleet submarines there but also a good portion of the Fleet submarines of the Submarine Force. AIRRON 24 plus YOKOHAMA AIR CORPS presence in that area points to intended air-submarine operations from the Marshalls. Also the presence of a unit of plane guard destroyers indicates the presence of at least one carrier in the Mandates although this has not been confirmed.

SOUTH CHINA - BAKO active with despatches to Second and Third Fleets, Combined Air Force and SAHA. Commander in Chief China Fleet becoming more and more active as an originator with despatches to the Task Force. He made a movement report with the South China Fleet as an information addressee. The Staff Communication Officer of the South China Fleet was addressed at Shanghai today.

SECRET
COMMUNICATION INTELLIGENCE SUMMARY

1 December 1941

GENERAL - All service radio calls of forces afloat changed promptly at 0000, 1 December. Previously, service calls changed after a period of six months or more. Calls were last changed on 1 November, 1941. The fact that service calls lasted only one month indicate an additional progressive step in preparing for active operations on a large scale. For a period of two to three days prior to the change of calls, the bulk of the radio traffic consisted of dispatches from one to four or five days old. It appears that the Japanese Navy is adopting more and more security provisions. A study of traffic prior to 0000, 1 December indicates that an effort was made to deliver all dispatches using old calls so that promptly with the change of calls, there would be a minimum of undelivered dispatches and consequent confusion and compromises. Either that or the large number of old messages may have been used to pad the total volume and make it appear as if nothing unusual was pending.

FIRST FLEET - Nothing to indicate that this fleet as a fleet is operating outside of Empire waters. ~~It is indicated that the~~
~~large percentage of the fleet is concentrated in the~~
~~Second Fleet Task Force area in the South China Sea and the~~
~~Indo-China area.~~

SECOND FLEET - This fleet is believed proceeding from the Kure-Sasebo area in the direction of South China and Indo-China. Takao does not appear to play an important role in today's traffic; consequently, the assumption is made that this fleet is passing up Takao. Certain units of the Second Fleet Task Force are definitely in the Indo-China area (Cruiser Division Seven and Destroyer Squadron Three most prominent).

THIRD FLEET - Nothing to report except that the same association of Second, Third Fleets and Combined Air Force with South China and Indo-China Forces continues.

FOURTH FLEET - No change in the Fourth Fleet or Mandates area.

FIFTH FLEET - Nothing to report.

SUBMARINES - Large number of the Submarine Force believed to be in the area to the eastward of Yokosuka-Chishijima and Saipan. Flagship somewhere in this general area.

CARRIERS - No change

COMBINED AIR FORCE - No change.

WAC

COMMUNICATION INTELLIGENCE SUMMARY

2 December 1941

GENERAL - The most prominent factor in today's traffic is the apparent confusion in the routing of traffic for certain major parts of the Japanese Fleet. There were instances where the same dispatch was repeated several times after it appeared on the Tokyo broadcast and also where Takao Radio received the same dispatch that it had previously sent. ComSixteen reported Second and Third Fleets in Takao area and that Takao Radio was broadcasting traffic to these fleets. This broadcast was not uncovered here and contrary to location report, there was one indication that these two fleets were not close to Takao. In several instances Takao Radio forwarded traffic to Tokyo for these fleets. Summing up all reports and indications, it is believed that the large fleet made up of Second, Third and First Fleet units has left Empire waters but is either not close enough to Takao for good communication or is proceeding on a course not close to Takao. The change of calls on December first has prevented this office from making definite statements at this date of the units now in the Southern area. To further complicate the situation, Shanghai Radio handled a considerable amount of traffic which obviously was originated by and destined for units in the Takao area. The Chief of Staff, South China area continues to appear in Shanghai. ComSixteen reported nine submarines proceeding south by Camranh Bay. This group is believed to comprise both Submarine Squadrons five and six, which units normally operate with the First Fleet but have been included repeatedly in the Second Fleet Task Force for Southern operations. There was a very high percentage of high precedence traffic originated both by major forces afloat and Tokyo. Hainan continues as a prominent address. Palao and Third Base Force is holding the same relative importance.

FIRST FLEET - Despite the lack of positive identifications, the First Fleet appears relatively quiet. From inconclusive evidence, it appears as if there may have been a split in the original or normal Combined Fleet Staff and that these may be two supreme commanders with staffs. As an example, traffic routing indicates one Combined Fleet call associated with the Second and Third Fleets and apparently in company while another Combined Fleet call appears not associated with the Second and Third Fleets.

SECOND FLEET - No units have stood out prominently the last two or three days. This is partly due to lack of new identifications but contributes somewhat to the belief that a large part of the Second Fleet is underway in company. Cruiser Division Seven and Destroyer Squadron Three are unlocated and unobserved since change of calls.

77-74

SECRET

COMMUNICATION INTELLIGENCE SUMMARY

2 December 1941

THIRD FLEET - Nothing to report. Shanghai appeared in an indirect way in some of the Third Fleet traffic.

MANDATES - Association of Submarine Force and Fourth Fleet continues. Some traffic for Fourth Fleet units still going through Truk.

CARRIERS - Almost a complete blank of information on the Carriers today. Lack of identifications has somewhat promoted this lack of information. However, since over two hundred service calls have been partially identified since the change on the first of December and not one carrier call has been recovered, it is evident that carrier traffic is at a low ebb.

COMBINED AIR FORCE - This force continues to be associated closely with Second, Third and Indo-China Fleets. Some units of the Combined Air Force have undoubtedly left the Takao area.

SECRET

OFFICE OF THE COMMANDANT
FOURTEENTH NAVAL DISTRICT
AND
NAVY YARD, PEARL HARBOR, HAWAII, U. S. A.

COMMUNICATION INTELLIGENCE SUMMARY - 3 DECEMBER 1941

GENERAL- Traffic volume normal with receiving conditions good. Present state of call recovery does not permit much detailed information to be obtained. The extensive use of alternate calls by the major commands slows up identification of even these units. Very few units have been positively identified so far. The Chief of the Naval General Staff originated three long despatches to the CINC COMBINED, SECOND and THIRD FLEETS. The Tokyo Intelligence originated nine despatches to the same addresses.

The presence of the CINC SECOND FLEET in Taiwan waters is not revealed by radio traffic. In some traffic from Takao the CINC SECOND FLEET is indicated as having previously received the messages while in others to Tokyo he is indicated for delivery by that station. It is the impression that both SECOND and THIRD FLEETS are underway but are not verified by Radio Intelligence means.

There are some FOURTH FLEET Units in the Marshall Islands area including some of the FOURTH FLEET Staff. The identity of these units is not known. The SIXTH BASE FORCE at Jaluit addressed several messages to CINC FOURTH.

Some Swatow Units were addressed at Saigon today indicating a movement of some South China Units to Saigon. Bako originated many despatches to the KMO Taihoku and the Task Force Commander.

No information on submarines or Carriers.

SECRETCOMMUNICATION INTELLIGENCE SUMMARY

4 December 1941

GENERAL - Traffic volume normal with fair receiving conditions. Takao Radio today instituted a fleet broadcast system using the prefix UTU in heading so that there are now two fleet broadcasts in operation. So far only a few messages have been placed on the Takao broadcast. There were a large number of urgent messages today, most of these from Tokyo to the major commanders. Among others Tokyo Intelligence originated a seven part message to Chiefs of Staff China Fleet, Combined Fleet, Third Fleet, South China Fleet, French Indo-China Force and Sama. In all, this activity sent twelve messages to the major commanders.

COMBINED FLEET - The outstanding item of today's traffic is the lack of messages from the CinC. Second Fleet and CinC. Third Fleet. These previously very talkative commanders are now very quiet. While the Fleet calls are not yet well identified, the lack of traffic from these commands cannot be ascribed to that. These two commands are still prominent as addressees. It is now believed that the CinC. Second Fleet is in the vicinity of Takao and that the apparently conflicting evidence is due to traffic destined for the Tokyo UTU broadcast which CinC. Second Fleet is still copying. The CinC. Combined Fleet sent one message to an unidentified unit for information to Third Base Force Palao, CinC. Second Fleet and CinC. Third Fleet.

FOURTH FLEET - The CinC. Fourth Fleet sent a message to Chief of Staff Combined Air Force, information to Eleventh Air Corps, Chitose Air, Air Squadron Twenty-four, Third Base Force at Palao and Fourth Base Force at Truk. No further check could be made today on the presence of Fourth Fleet units in the Marshalls. Jaluit appeared many times in today's traffic being associated with Commander Submarine Force, Tokyo Radio and MUSEI 88 (which is believed to be an oil tanker).

SOUTH CHINA - Hako continues as an active originator addressing many messages to Sama and Saigon. Except for traffic between South China Commanders, all units in that area quiet.

COMMUNICATION INTELLIGENCE SUMMARY

December 5, 1941

GENERAL - Traffic volume heavy. All circuits overloaded with Tokyo broadcast going over full 24 hours. Tokyo-Mandates circuit in duplex operation. There were several new intercept schedules heard. OMINATO radio working SAMA and BAKO sending fleet traffic. The Takao broadcast handling traffic to Second and Third Fleet while the Tokyo broadcast is still handling traffic for these units also. It is noted that some traffic being broadcast is several days old which indicates the uncertainty of delivery existing in the radio organization.

There were many messages of high precedence which appears to be caused by the jammed condition of all circuits.

A plain language message was sent by the Captain, JENAI, from Tokyo to Takao probably for further relay addressed to FUJIHARA, Chief of the Political Affairs Bureau saying that "in reference to the Far Eastern Crisis, what you said is considered important at this end but proceed with what you are doing, specific orders will be issued soon".

COMBINED FLEET - Neither the Second or Third Fleet Commanders have originated any traffic today. They are still frequently addressed but are receiving their traffic over broadcast. They are undoubtedly in Takao area or farther south since the Takao broadcast handles nearly all their traffic. No traffic from the Commander Carriers or Submarine Force has been seen either.

THIRD FLEET - In one WE address a "Chief of Staff" sent a message to "Commander Fourteenth Army aboard RYUJOMARU in Third Fleet. HITOTYONGUN.SATI (IRO 1 REUZKU MARU). A number of MARUS have been addressing the CinC. Third Fleet.

FOURTH FLEET - The Secretary, Fourth Fleet and Staff Communication Officer of the Fourth Fleet were addressed at Jaluit today strengthening the impression that the CinC. Fourth Fleet is in the Marshalls. The Commander of the South China Fleet has been addressing Palao radio and, the RMO PALAO and the Commander Second Fleet.

SOUTH CHINA - SAMA addressed much traffic to CinC. Second Fleet. BAKO continues as an active originator with many dispatches to Second and Third Fleet. The Commander Combined Air Force appears to be busy with the movement of Air Corps. SHIOGAMA Air and at least two unidentified corps are moving, probably to Indo-China.

*Written Saturday P. M.
6 December 1941.*

COMMUNICATION INTELLIGENCE SUMMARY
December 6, 1941

GENERAL - Traffic volume very heavy with a great deal of old traffic being transmitted. Messages as far back as 1 December were seen in the traffic. This is not believed an attempt to maintain a high traffic level but is the result of confusion in traffic routing with uncertainty of delivery. The stations now holding broadcasts are TOKYO (with 3 distinct and separate broadcasts), SAIPAN, OMINATO and TAKAO.

Yesterday's high level of traffic from TOKYO originators was maintained with the Intelligence activity still sending periodic messages. Practically all of TOKYO's messages carry prefixes of high priority.

COMBINED FLEET - Still no traffic from the Second and Third Fleet Commanders. These units are sending their traffic via the TAKAO and TOKYO broadcasts. The Commander in Chief Combined Fleet originated several messages to the Carriers, Fourth Fleet and the Major Commanders.

FOURTH FLEET - The Commander in Chief Fourth Fleet is again in the TRUK area. It is doubtful that he ever went to JALUIT although it is certain that some members of his staff were there over the past few days. There is a definite close association between the Third Base Force at PALAO and the forces in South China. This unit is constantly sending messages to the Chief of Staff of the Second Fleet, Third Fleet, Indo-China Forces and BAKO. It is being almost entirely neglected by Commander in Chief Fourth Fleet under whose command it normally operates. RONGELAB radio addressed the PALAO weather observer.

FIFTH FLEET - This fleet appears dispersed about the JAPAN Sea with OMINATO broadcasting traffic for this unit.

SUBMARINES - The Commander Submarine Force originated two messages to his command. These are the first two originated since 1 December. He is definitely in the MARSHALLS.

SOUTH CHINA - Nothing new to report. BAKO, SAMBA and TAKAO still sending many messages to the Task Force.

Date

1 November, 1961.

The following information is from a source which has been thoroughly reliable in the past:

From 1 Nov. the navigation through KAKI, SHIMAI is restricted as follows. Seven fixed buoys are in the channel.

- (1) Lighted buoy: From KAKI JIK lighted buoy 17 degrees, 6500 meters (3.57 miles). Lighted painted black.
- (2) Lighted buoy: From KAKI JIK lighted buoy 104 degrees, 6500 meters (3.55 miles). Painted black.
- (3) Lighted buoy: From KAKI JIK lighted buoy 104 degrees, 6700 meters (3.65 miles). Painted red.
- (4) Flag buoy: From KAKI JIK lighted buoy 97 degrees, 6600 meters (3.51 miles).
- (5) Flag buoy: From buoy (4) 190(1704) degrees, 500 meters (.27 miles).
- (6) Flag buoy: From KAKI JIK LIGHT 88 degrees, 4900 meters (2.67 miles).
- (7) Flag buoy: From buoy (6) 170 degrees, 500 meters (.27 miles)

NAVIGATION

Sail to the east of buoy (1) and between lighted buoys (2) and (3). Sail to the east of the northern four buoys because the area to west of them is dangerous. Do not enter this area.

When meeting (another ship) going to the entrance between buoys (2) and (3), the ship leaving port is to wait.

There will probably be maintenance by naval patrol vessels and by the lookout station on the northwest point of KAKI JIK YAMA.

Take care!

CinCAF has no information confirming the Dutch report of a Japanese Expeditionary Force near Fukuoka. His information does not indicate any change of units other than the Fourth Fleet in the main body. There is a concentration of that force. It is possible that there will be an increase in the number of transports and other vessels. There has been a concentration of 30 - 40 Arus in the area since the middle of October. Cinc Fourth Fleet has been informed that the Japanese fleet that Airon 24 has also been informed that the Japanese fleet has one battleship division and two divisions of cruisers to proceed to the mandates but so far there is no indication that the movement has begun.

The British report that Germany is obtaining rubber from Saigon in the following shipments. All routine is from Saigon to Bordeaux around Cape Horn. Six thousand tons was shipped in two Japanese ships on 15 October and 14 November respectively. Five thousand tons is to be shipped in a German ship on about one December. The Japanese ships may be German vessels under Japanese charter. The ships have not yet been identified.

Opanav reports that the chances of any favorable result coming out of the present negotiations with Japan are very doubtful. It is his opinion that this, coupled with the statements of the Japanese government, and the movements of their military and naval forces, indicates that they may make a surprise aggressive movement in any direction, including an attack on the Philippines or Guam. The Chief of Staff of the Army concurs in this opinion. Senior Army Officers in the Far East, Pacific and West Coast areas (including Panama) have been informed. . Utmost secrecy is enjoined regarding this opinion in order to not further complicate the present tense situation or to precipitate Japanese action.

Serial No. 13

Date 25 Nov 1941

For the past month the Commander Second Fleet has been organizing a Force composed of the following:

Second Fleet - Third Fleet (including 1st and 2nd Base Forces and 1st Defense Division) - Combined Air Force - Desron Three -

Airdiv 7 - Subron 5 - possibly units of Batdiv 3 (from First Fleet)

These units are linked with the South China Fleet and French Indo-China Force as well as the Naval Stations at Sams, Takao and Bako. The ^{been} Commander Second Fleet has intensely/interested in operations at Palao and the Third Base Force which is at Palao.

The Combined Air Force has assembled at Takao with some indications that certain units have moved on to Hainan.

The Third Fleet is believed moving in the direction of Takao and Bako.

The Second Base Force appears to be transporting the equipment of air forces to Taiwan.

An unidentified Second Fleet unit and a submarine unit appears to be in the vicinity of Takao. Crudiv 3 and Desron 3 appear to be an advance unit and may be enroute South China. A strong concentration of submarines and aircraft is believed in the Marshalls comprising Airdiv 24, at least one Crudiv and one third of the submarine force.

Com 14 believes the above indicates a strong force is preparing to operate in South Eastern Asia while certain units operate from Palao and the Marshalls.

Absolutely reliable reports from Singapore are that the following procedure will be carried out on Japanese news broadcasts in the event that diplomatic relations are on the verge of severance: On ordinary Tokyo news broadcasts, the following words repeated five times beginning and the end will have this significance:

HIGASHI HIGASHI : Japanese - American

KITA KITA : Russia

NISHI NISHI : England (including occupation of Thai ^{or} invasion of Malaya and NEI)

On Japanese language foreign/broadcasts, the following sentences repeated twice in the middle and twice at the end will be used:

"HIGASHI NO KAZE AME" (American)

"KITA NO KAZE KUMORI" (Russia)

"NISHI NO KAZE HARE" (England)

The British and Com 16 are monitoring the above broadcasts.

SECRETINTELLIGENCE REPORT

Reliability
Rating A-1 Serial No. 101 Date 1 Dec 1941

Absolutely reliable agent in Bangkok reports that on the 29th conferences were in progress considering plans to force the British to attack Thai at Padang Bessa near Singora as counter move to Japanese landing at Kota Bharu. Thai, at present, intends to consider the first invader as her enemy therefore Japan believes this landing in Malay would force the British to invade Thai at Padang Bessa. Thai would then declare war against the British and call on Japan for help. This plan appears to have the approval of the Thai Chief of Staff Bijitto. Up until 25 November Thai government circles have been sharply divided between pro-British and pro-Japanese but now those favoring Japan seem to have silenced the anti-Japan group and intend to force Premier Pibul to make a decision. They expect early and favorable developments.

in ATAGO

CinC Second Fleet, and the CinC Third Fleet have put in their appearance in the TAGAO Area. The Commander Southern Expeditionary Force in the CHOKAI has arrived at SAMA, HAINAN.

The U. S. Ambassador at Bangkok on the 30th requested permission to destroy all but a limited number of Codes.

Three I-class submarines were sighted bearing 070 distant 180 miles from SAIGON, course 180 speed 15.

Nine (9) ORANGE Submarines sighted at 0230 GCT 2nd Latitude 13-10, longitude 110-00 East course 180 speed 10.

Reported at CAMRANH Bay 21 ORANGE transports with a six plane patrol overhead.

COMMUNICATION INTELLIGENCE SUMMARIES

of

9 & 10 December 1941

showing

ASSUMED COMPOSITION OF JAPANESE STRIKING FORCE

COMMUNICATION INTELLIGENCE SUMMARY

9 December 1941

COMBINED FLEET - The Combined Fleet Commander-in-Chief and Staff are believed to be in Empire waters. There appeared to be a split in this command in Mid-November which led to the belief that the operations as initiated by Second Fleet Commander in South East Asia occasioned a supreme Commander in Empire waters with a secondary Commander-in-Chief Combined Fleet in South East Asia or elsewhere.

2nd
1st
3rd
FIRST FLEET - First Fleet is believed to be temporarily in the background as some first fleet units should be operating with the Second and Third Fleets and the majority of the remainder is operating with the Carrier Divisions. Battle Ship Division One and Two have disappeared as far as our identifications are concerned. Battleship Division Three is believed to be operating with Carrier Divisions which outfit is in turn divided so that MIYE I and KIRISHIMA are operating with Striking Force #1 in the Blue Pacific and HARUNA and KONGO are probably with the or a #2 Striking Force. Destroyer Squadron One and ABUKUMA are believed also in the #1 Striking Force. From one dispatch in plain text and associations, it appears likely that Striking Force #1 is still in the Oahu-Midway area (Lat. 32 N Long. 164 W).

SECOND FLEET - Cruiser Division Eight of this Fleet may be operating with Striking Force #1. Other units are probably with the Commander-in-Chief, Second in Southeast Asia. One indication is that the bulk of the Second Fleet is operating against Malay and Singapore while the Third Fleet took care of Luzon. The indications continue that Second Fleet, Third Fleet and Combined Air Force are under one command; also that Indo-China Force and South China Force seem to have lost some of the close association with this combination, probably because South China and Indo-China Force are holding the South China Coast and Indo-China.

THIRD FLEET - Together with some units of the Combined Air Force is probably operating against the Philippines and also in Malay. The close connection of Palao with Third Fleet addresses and Palao prior to war is the basis for this assumption.

FOURTH FLEET - Operating in the Mandates. No recent indications of operations of this fleet outside of the Mandates. On one hand there is a close connection between Fourth Fleet and Fifth Fleet in the north; on the other hand Submarine Force and Fourth Fleet must be working together in the defense of the southern flank. Air Squadron Twenty-four figures prominently in the traffic and is still in the Marshall area. Saipan Radio initiated a broadcast similar to Takao. Jaluit appears to have taken over some of the primary duties of a radio intelligence unit and is assumed to be headquarters in the "Field".

Page 1 of 1.....

795

2674 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

9 December 1941

FIFTH FLEET - Definite information that this fleet is in the northern area continues. Ominato Radio handles traffic to and from the Fifth Fleet units. This fleet appeared to shift from Yokosuka north to Ominato area shortly before war opened. The composition of this fleet is still somewhat obscure but is believed to have very few so called fleet vessels. Probably as large percent of fleet auxiliaries and converted air tenders?

CARRIERS - #1 Striking Force operating in Blue Pacific. Believed to comprise Carrier Division One - AKAGI (Flagship Cardiac)

Carrier Division Two - KANSA
HIRYU
SORYU

Carrier Division
Four (or Five) - SHOKAKU
ZUIKAKU

Cruiser Division Eight
Destroyer Squadron One
KIRISHIMA -

First Section BatDiv Three.
HIYET.

By deduction #2 Striking Force, if such an organization exists comprises Carrier Division Three - RYUJO
HOSHO

Carrier Division
Five (or four) - KORYU

and probably other combatant units. Carrier Division Three RYUJO were definitely associated with Second and Third Fleet prior to war.

SUBMARINES - A strong force of submarines believed to be operating with Fourth Fleet and another force operating with Carrier Divisions.

CHINA - China Fleet Commanders in normal bases or locations.

COMMUNICATION INTELLIGENCE SUMMARY

10 December 1941

GENERAL - Traffic volume continues very high with proportionate amount of high precedence traffic. The actual amount of traffic intercepted at Heeia has not increased materially since the Eighth but this is due to the concentration of efforts on obtaining all transmissions of Japanese vessels in the Hawaiian area somewhat at the expense of obtaining the maximum traffic on all known circuits. There were very few signals identified as emanating from the immediate Hawaiian area. A great many bearings have been obtained the last two days in the sector 295 - 300 true from Oahu; since most calls involved have been tentatively identified as vessels in the North China and Takao areas, increased activity in that region may be the reason therefor. The Navy Minister originated the following dispatch to the Secretary of the Combined Fleet which was broadcasted from Takao Radio:

"164. From the Cabinet, Prime Minister and Admiral Arihara Takaza Igo received a request for a congratulatory telegram as follows addressed to all hands (?).
"Congratulations (upon) there having been attained manifold results (war results) (at) the outset of the naval war. We pray for the success of the fortunes of war for all ranks of officers and enlisted men".

COMBINED FLEET - No change.

FIRST FLEET - No indications of any change. The calls identified as First Fleet have practically disappeared from the traffic lately. This is submitted as a partial strengthening of the opinion that the First Fleet has lost its identity as such and has been split between Carrier Divisions and the large task force operating in the Malay area. The report of United States bomber action on a HARUNA type Battleship in the Philippine area, if true, substantiates this.

SECOND AND THIRD FLEETS - Appear to be "intact" in the South eastern Asia area.

FOURTH FLEETS - Commander-in-Chief, Fourth Fleet and some of the Fourth Fleet vessels definitely show in the Mandates. It is believed that Air Squadron Twenty-four is still in the Marshall area and that the Commander-in-Chief, Fourth Fleet is in the Truk area. While complete coverage at Heeia is not possible under present conditions, the available traffic does not indicate the previous association between Palao and Second-Third Fleet combination.

2676 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

COMMUNICATION INTELLIGENCE SUMMARY

FIFTH FLEET - No apparent change in the available information on this fleet. Considerable activity has been noted in the High North and Ominato area shore stations.

SUBMARINES - Commander Submarine Force continues to show in the routing of traffic to and from Mandate stations, particularly the Marshall Island area. From all the reports of submarine activity in the Hawaiian area and the well established fact that Submarine Squadrons Five and Six went south to Malay prior to declarations of war, it appears that practically all submarines are away from Empire waters or that our estimates of Japanese submarine strength were lower than actual numbers.

CARRIERS - Very little radio activity the past twenty-four hours. One possible significant clue to Carrier Divisions future operations was contained in a despatch from Tokyo Radio to the Commander of First Air Fleet flagship, AKAGI, listing a long string of Tokyo Broadcast messages which it is assumed provided a reminder or check on those dispatches which should have been received for the First Air Fleet during the period 7 - 10 December. To this office, the inference is that for the past three days (during radio silence in Hawaiian waters), a check up was not practicable but now may be done without breaking radio silence. While this may be far-fetched, it still remains a possibility.

CONFIDENTIAL Intelligence Bulletin No. 45-41.

(A) ORGANIZATION OF THE JAPANESE FLEETS. October 30, 1941. (10574)

The following revision of Op-16-F-2, O.N.I. Serial #27-41 supersedes and replaces the former report on this subject.

The principal change consists of a further increase in the number of fleet commands. This has arisen from the regrouping of aircraft carriers and seaplane tenders into separate forces, and from the creation of special task forces in connection with the southward advance into Indo-China. The regrouping has resulted in a notable specialization within the various commands, as shown below.

MAJOR FLEET COMMANDS

I. Combined Fleet

1. First Fleet	(Battle Force)	3 Batdivs, 1 Crudiv, 2 Desrons
2. Second Fleet	(Scouting Force)	4 Crudivs, 2 desrons, etc.
3. Third Fleet	(Blockade & Transport Force)	Small craft.
4. Fourth Fleet	(Mandate Defense Force)	1 Desron, 1 Subron and many small units.
5. Fifth Fleet	?	?
6. Sixth Fleet	(Submarine Fleet)	6 Subrons
7. Carrier Fleet	(Aircraft Carriers)	5 Cardivs
8. Combined Air Force	(Seaplane tenders, etc.)	4 Airrons, & shore based planes.

II. Japanese Naval Forces (Staff Headquarters) in China.

1. First China Exped. Fleet.	(Central China)	Gunboats
2. Second China Exped. Fleet.	(South China)	1 CA, 1 CL and small craft.
3. Third China Exped. Fleet.	(North China)	Torpedo Boats, etc.
4. Southern Exped. Fleet.	(Saigon)	1 CL, transports and mine craft.

CONFIDENTIAL Intelligence Bulletin No. 45-41.

The Japanese Navy now includes more vessels in active service than ever before. More merchant ships have been taken over by the Navy, and the line between merchant ship and naval auxiliary grows fainter all the time. The base forces and guard divisions in the Mandated Islands have also greatly increased the strength of the Navy, which is on full-war-time footing.

COMBINED AIR FORCE

Kanoya Naval Air Station, Hdqtrs.

Shore-based land planes and seaplanes. The organization provides for great mobility. Air units are ordered to work with other forces, and return to the Combined Air Force pool when their mission is fulfilled. The named Air Groups (e.g. the Takao Air Group) are not tied down to their stations, but are sent freely wherever they are needed. Furthermore, the various air squadrons and air groups frequently split into smaller units, and are scattered over wide areas.

Because of this extreme mobility, the picture is constantly changing. Accordingly, the following list makes no attempt to indicate all the temporary groupings into which the various units may be combined.

SHIP-BASED SQUADRONS

2692 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

CONFIDENTIAL

Intelligence Bulletin No. 15-11.

(B) JAPANESE FORCES AND INSTALLATIONS IN THE MANDATED ISLANDS.

1. FOURTH FLEET, which may be termed the MANDATE FLEET, apparently administers the Naval activities, afloat and ashore and also the Army Garrisons units in the Mandated Islands. While the forces afloat exercise administrative jurisdiction over the Mandate area, the Yokosuka Naval District is directly responsible for the supply of stores, material and provisions. Truk is the headquarters for supply and munitions and has been principle Fourth Fleet operating base.

2. Up to the present the entire Mandated Islands have been lightly garrisoned, the majority of the garrison units being Naval Defence Forces ("special Landing Forces" corresponding to our Marine Corps) but some Army troops are believed to be on SAIPAN, PALAO, PONAPE, TRUK and JALUIT. The total garrison force has been estimated at fifteen thousand. In addition, there are Civil Engineering Units engaged in development work on various islands. Working in conjunction with these are naval engineering units, naval ordnance specialists, navy yard units with civilian navy yard workers and technicians. The network of naval radio stations has been greatly expanded, meteorological stations and high frequency direction finders installed at strategic locations, aviation facilities increased both in scope and number, and shore-batteries emplaced on strategic islands of key Atolls.

3. It is apparent that a decision to expedite the fortification, expansion of facilities and militarization of the Mandated Islands, was made late in 1940, probably concurrently with the signing of the Tripartite Pact. The movement of naval auxiliaries, small and medium cargo, freight-passenger vessels (ex-merchant marine) to the Mandates began in December, 1940, and has increased in scope and number until some seventy odd vessels are engaged in this traffic, the average number present in the Mandate area at any one time being some forty odd vessels.

4. The function of supply of munitions, supplies, material and provisions to the Mandates is under the YOKOSUKA Naval District with a Headquarters for Civil Engineering, Munitions, Military Stores and Supplies for the Mandates centered at Truk, although this function is normally under the jurisdiction of Yokosuka as the Mandates are in the First (HQ - YOKOSUKA) Naval District.

5. The Commanders of the 3rd, 4th, 5th, and 6th Base Forces are subordinate commanders under Commander-in-Chief, 4th Fleet; they have a designated Flagship and a Headquarters or Administrative Section, the latter remaining ashore at the home base regardless of the movements of the command or the Flagship. Each Base Force contains a DEFENCE FORCE, detachments of which are stationed on outlying islands of that general area. Four Ro Class submarines have been reported to be attached to the PALAO BASE FORCE.

CONFIDENTIAL Intelligence Bulletin No. 45-41.

6. Considerable air activity has been in evidence in the SAIPAN, PALAO-PELELIU, TRUK, PONAPE and JALUIT-KNAJALEIN areas. Close cooperation has been noted between the Defence Forces and the Aircraft activities at their home bases. Foreign steamers nearing the SAIPAN area have been subject to aircraft observation and close scrutiny by Patrol planes, Bombers and Fighters. Heavy land plane bombers and patrol planes, undoubtedly ORANGE, have made reconnaissance flights over the Gilbert Islands (TARAWA, BUTARITARI, and BERTU).

7. The distribution of material, personnel, and installations in the Mandated Islands is indicated in table "A". While this is admittedly incomplete and may be subject to inaccuracies, it represents the latest and best intelligence on this subject. In addition to those listed in Table A, there are a number of potential bases, principally in the lagoons of the naturally protected atolls, which may be used as emergency bases or may be earmarked for "priority two" development.

8. The latest information (up to 25 November 1941) indicates that the present distribution of the Air forces (believed to be a temporary strategical disposition rather than a permanent assignment) in the Mandates is:

<u>Identification</u>	<u>Location</u>	<u>Includes</u>
Airron 24	Marshall Area	(AV) KAKOI (AV?) Maru ex-CHITOSE Air Group ex-YOKOHAMA Air Group
11th Air Group	PALAO Area	
16th Air Group	PALAO Area	
17th Air Group	TRUK	
18th Air Group	SAIPAN	
19th Air Group	BIJEI Is. (Jaluit Atoll)	
Air Station (and Air Group?)	WOTJE	
Air Station (and Air Group?)	KNAJALEIN	
<u>1</u> AIR GROUP	TRUK	

The exact composition of these Air Groups is unknown and the estimates of total/strength in the Mandates vary widely: 62 - 268 planes.

NOTES TO ACCOMPANY SKETCH OF JALUIT

1. Aviation Facilities - Two landing fields, each with a hangar capable of housing twenty medium sized planes. Engineering Shop (camouflaged) situated between the two fields. Adjacent storehouses (galv. iron) camouflaged. Diesel fuel and gasoline storage in camouflaged, above-ground tanks adjacent to air fields. Diesel power plant (June-1940). Eighty planes reported based here (November, 1940).

On beach opposite southern air field is Naval Air Station having small ramp and one hangar for seaplanes (June 1940). This may be an auxiliary as present indications point to naval air Base on Imieji (EIDJ) Is.

2. Headquarters - Two story concrete building. Large building to SE of Headquarters is Post Office and Telephone central. Flagstaff adjacent to Post Office is also used as signal tower. In town are many one story concrete stores. Good bitumen and powdered coral roads.

3. Radio towers - Two steel combination radio and lookout towers 400 feet high. Diesel engine power plant near southern tower (1940).

4. Shore Batteries - Bases and trunnions along the three quarter mile waterfront street called the Marine Parade (1940) (guns not mounted in June, 1940 but are now). Also three 6" guns and a battery of four 4.7" field pieces. Barracks for regular garrison of 500 soldiers (1940) (probably enlarged now).

Mobile Batteries - Machine guns and AA guns mounted on Diesel-tractor towed trailers. 10" searchlights on pneumatic tired truck assemblies (1940).

5. Government Pier - 600 feet long, 75 feet wide (18'-25' alongside) equipped with two railroad tracks and three 10 ton mobile cranes. Storehouse on end of pier (1940).

6. Mole - 150' concrete mole constructed parallel to shore line along NW corner of JABOR (1933).

7. Conspicuous red building (may be red-roofed building)(1936).

8. South Seas Trading Co. PIER (N.B.K. or "NABO") also called "SYDNEY Pier". Two water tanks and warehouses. Coal and briquette storage (1938).

9. Two buildings (resembling hangars) with tracks leading down to water from one of them (beaching gear? -- small marine railway?). A gasoline storage located near the two buildings. (1936).

FEBRUARY 11, 1941.

From: The Chief of Naval Operations.
To: The Chief of the Bureau of Ordnance.
Subject: Experimental and Development Work on Nets and Booms.
Reference: ALUSNA London Dispatch 041625 of February 5, 1941.

1. Reference (a) requested information concerning all promising experimental and development work on nets and booms done by the U. S. Navy since March 1940.

2. As far as this Office is aware, no such work has been done other than the making of minor modifications to the Admiralty designs. It is considered that experimental and development work should be undertaken. If necessary, additional personnel for this purpose should be secured.

3. There appears an urgent need for an anti-torpedo net which can be laid and removed in certain harbors in a short time for temporary use, and which will give good if not perfect protection from torpedoes fired from planes. The present Admiralty type net is designed to withstand torpedoes armed with cutters, and its appurtenances are very heavy. A lighter net which will stop a torpedo not armed with cutters would furnish some protection, especially against torpedoes which would explode on contact with a metal net.

4. Effort should be made to reduce the weights of the present Admiralty nets and booms and their appurtenances without reducing their efficiency in order that they may be more readily handled. As a beginning, it is also suggested that plans be made to test sections of the old A/S net and of the new, as well as indicator nets, by attacking submarines. While such tests may duplicate British experiments, valuable lessons may be learned. It is requested that this office be kept informed of development work and all tests and experiments conducted with nets and booms.

H. R. STARK.

NAVY DEPARTMENT
OFFICE OF THE CHIEF OF NAVAL OPERATIONS
Washington, Feb. 15, 1941.

From: The Chief of Naval Operations
To: The Commander-in-Chief, Pacific Fleet
Subject: Anti-torpedo baffles for protection against torpedo plane attacks, Pearl Harbor.

1. Consideration has been given to the installation of A/T baffles within Pearl Harbor for protection against torpedo plane attacks. It is considered that the relatively shallow depth of water limits the need for anti-torpedo nets in Pearl Harbor. In addition the congestion and the necessity for maneuvering room limit the practicability of the present type of baffles.

2. Certain limitations and considerations are advised to be borne in mind in planning the installation of anti-torpedo baffles within harbors, among which the following may be considered:

(a) A minimum depth of water of seventy-five feet may be assumed necessary to successfully drop torpedoes from planes. One hundred and fifty feet of water is desired. The maximum height planes at present experimentally drop torpedoes is 250 feet. Launching speeds are between 120 and 150 knots. Desirable height for dropping is sixty feet or less. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered.

(b) There should be ample maneuvering room available for vessels approaching and leaving berths.

(c) Ships should be able to get away on short notice.

(d) Room must be available inside the baffles for tugs, fuel oil barges and harbor craft to maneuver alongside individual ships.

(e) Baffles should be clear of cable areas, ferry routes, and channels used by shipping.

(f) Baffles should be sufficient distance from anchored vessels to insure the vessels' safety in case a torpedo explodes on striking a baffle.

(g) High land in the vicinity of an anchorage makes a successful airplane attack from the land side most difficult.

(h) Vulnerable areas in the baffles should be so placed as to compel attacking planes to come within effective range of anti-aircraft batteries before they can range their torpedoes.

(i) Availability of shore and ship anti-aircraft protection, balloon barrages, and aircraft protection.

(j) Availability of naturally well protected anchorages within a harbor from torpedo plane attack for a number of large ships. Where a large force such as a fleet is based, the installation of satisfactory baffles will be difficult because of the congestion.

3. As a matter of interest the successful attacks at Taranto were made at very low launching heights at reported ranges by the individual aviators of 400 to 1300 yards from the battleships, but the *depths of water* in which the torpedoes were launched were *between 14 and 15 fathoms*. The attacks were made in the face of intensive and apparently erratic anti-aircraft fire. The eastern shore line of the anchorage and moorings were protected by numerous balloon barrages, but there was no trawler borne balloon barrage to the west. The torpedoes were apparently dropped inside of the nets, probably A/T nets.

4. It is considered that certain large bays and harbors, where a fleet or large force of heavy ships may be anchored and exposed with a large body of water on an entire flank, should have that flank protected by a series of baffles if the water is deep enough for launching torpedoes. The main fleet anchorage at Scapa Flow, for instance, has an A/T net extending slightly to the north of a line between Calf of Flotta and Cava Island protecting the main fleet anchorage. The depth of water where this net is laid is approximately 17 fathoms. On the other hand constricted harbors, in which practically all available space is taken up by anchorages, and which is relatively deep probably must depend upon other defense measures. It might be possible and practicable to provide in some places, which are not protected by relatively shallow water, anti-torpedo baffles practically surrounding a limited [2] number of berths for large ships, such as battleships or carriers. An extreme example of this is furnished at the present time by the French at Dakar, where double nets surround the Richelieu; she is placed similarly as in a dry dock, and evidently would have to open a section of the net to be hauled clear. The depth of water at Dakar, however, is very shallow.

5. The present A/T nets are very expensive, extremely heavy, their heavy anchors and moorings take up about 200 yards of space perpendicular to the line of the net, take a long time to lay, and are designed to stand up under heavy weather conditions. There is apparently a great need for the development of a light efficient torpedo net which could be laid temporarily and quickly within protected harbors and which can be readily removed. It is hoped that some such net can be developed in the near future.

6. Recommendations and comments of the Commander-in-Chief are especially desired.

Subj: Anti-Torpedo Baffle for Protection Against Torpedo Plane Attacks.

1. In previous correspondence, the Commandants and local joint planning committees have been requested, where considered necessary, to submit recommendations concerning the employment of nets and booms in their defenses. In nearly all cases the recommendations received were limited to harbor entrances. One of the reasons for this was that the Department, after previously making a study of many harbors, submitted certain proposals for consideration by the districts, but did not specifically propose any protection against torpedo plane attacks.

2. The Commandants and local joint planning committees are requested, if they have not already done so, to consider the employment of and to make recommendations concerning anti-torpedo baffles, especially for the protection of large and valuable units of the Fleet in their respective harbors, and especially at the large fleet bases.

3. In considering the use of A/T baffles, the following limitations, among others, may be borne in mind:

[2] (a) A minimum depth of water of 75' may be assumed necessary to successfully drop torpedoes from planes. About 200 yards of torpedo run is necessary before the exploding device is armed, but this may be altered.

(b) There should be ample maneuvering room available for vessels approaching and leaving berths.

(c) Ships should be able to get away on short notice.

(d) Room must be available inside the baffle for tugs, fuel oil barges and harbor craft to maneuver alongside individual ships.

(e) Baffles should be clear of cable areas, ferry routes, and channels used by shipping.

(f) Baffles should be sufficient distance from anchored vessels to insure the vessels' safety in case a torpedo explodes upon striking baffle.

(g) High land in the vicinity of an anchorage makes a successful airplane attack from the land side most difficult.

(h) Vulnerable areas in the baffles should be so placed as to compel attacking planes to come within effective range of anti-aircraft batteries before they can range their torpedoes.

(i) Availability of shore and ship anti-aircraft protection, balloon barrages, and aircraft protection.

(j) Availability of naturally well-protected anchorages within the harbor from torpedo plane attack on a number of large ships. Where a large force such as a Fleet is based, the establishment of certain baffles would be difficult because of congestion.

To: The Chief of Naval Operations.

Subject: Anti-torpedo baffles for protection against torpedo plane attacks.

Reference: (a) CNO Classified ltr serial 010230 of February 17, 1941.

1. In reply to reference (a) the following comment and recommendation on anti-torpedo baffles for vessels moored in Pearl Harbor is submitted.

(a) The depth of water in and alongside available berths in Pearl Harbor does not exceed forty-five (45) feet.

(b) There is limited maneuvering area in Pearl Harbor for vessels approaching and leaving berths which prevents the departure of a large group of vessels on short notice.

(c) Most of the available berths are located close aboard the main ship channels, which are crossed by cable and pipe lines as well as ferry routes. The installation of baffles for the fleet moorings would have to be so extensive that most of the entire channel area would be restricted.

2. Other harbors in the Fourteenth Naval District have a water depth limitation similar to Pearl Harbor.

3. In view of the foregoing the Commandant does not recommend the installation of baffles for moorings in Pearl Harbor or other harbors in the Fourteenth Naval District.

- (c) CNO ltr. OP-30C Serial 18530 of Jan. 21, 1941.

1. The Commandant is directed to lay the net defenses in the Fourteenth Naval District, when the procurement of material permits, if this meets with the approval of the Commander-in-Chief, Pacific Fleet. The Bureau of Ordnance has been requested to expedite the procurement of the necessary material.

2. The laying of the above defenses will necessitate certain protective measures to shipping and to the nets, and will necessarily place the harbors to some extent in a situation similar to that existing under war conditions. In reference (a) the Commandant was directed to take preliminary steps to be prepared to lay the nets and to properly tend them after laying. In reference (b) an estimate of personnel necessary at the beginning of a war was submitted for information. In reference (c) the Commandants were authorized to confer with Local Coast Guard authorities concerning necessary additional navigational aids. Local regulations and instructions considered necessary for the information and control of shipping should be taken up with the District Engineer, U. S. Army, and the District Commander, U. S. Coast Guard.

3. The present standard A/T net is 30 feet in depth, which when suspended protects to a depth of 35 feet when not affected by currents. Hence, it is possible that magnetically fired torpedoes may be fired under the nets and exploded below ships berthed inside of the nets. It is suggested, therefore, that the inner of the double A/T nets be suspended as much as 15 feet in order to give necessary vertical protection where the depth of water permits torpedoes being fired under the nets and under ships berthed inside. The suspension of the inner net decreased partially the protection furnished by two nets for shallow running torpedoes. Later it may be advisable to order aprons to be secured to the present type of net.

1. In reference (a) the Commandants were requested to consider the employment of and to make recommendations concerning anti-torpedo baffles especially

for the protection of large and valuable units of the fleet in their respective harbors and especially at the major fleet bases. In paragraph 3 were itemized certain limitations to consider in the use of A/T baffles among which the following was stated:

"A minimum depth of water of 75 feet may be assumed necessary to successfully drop torpedoes from planes. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered."

2. Recent developments have shown that United States and British torpedoes may be dropped from planes at heights of as much as three hundred feet, and in some cases make initial dives [2] of considerably less than 75 feet, and make excellent runs. Hence, it may be stated that it can not be assumed that any capital ship or other valuable vessel is safe when at anchor from this type of attack if surrounded by water at a sufficient distance to permit an attack to be developed and a sufficient run to arm the torpedo.

3. While no minimum depth of water in which naval vessels may be anchored can arbitrarily be assumed as providing safety from torpedo plane attack, it may be assumed that depth of water will be one of the factors considered by any attacking force, and an attack launched in relatively deep water (10 fathoms or more) is much more likely.

4. As a matter of information the torpedoes launched by the British at Taranto were, in general, in thirteen to fifteen fathoms of water, although several torpedoes may have been launched in eleven or twelve fathoms.

From: The Chief of Naval Operations

To: The Chief of Bureau of Ordnance.

Subject: Experimental and Development Work on Nets and Booms.

Reference:

- (a) Op-30C Serial 07830 of 11 February 1941.
- (b) Op-30C1 Serial 027730 of 9 April 1941.
- (c) Alusna London ONI Report Serial 1674, Mono. Index Guide No. 910-4000 of 24 July 1941.
- (d) ONI Serial 1745 Guide No. 910-4000 of 1 August 1941.

1. It is suggested that in order that progress may be made in solving some of the problems which confront us, that a small group of officers, engineers and draftsmen be assigned exclusively to planning improvements in net and boom designs and to development and experimental work. The group, it is suggested, may be aided by using the facilities of the Net Depots at Tiburon and Newport. It is suggested that these two depots appear suitable as centers for experimental and development work.

2. In references (a) and (b) the Chief of Naval Operations indicated the desirability of undertaking some research and development work. Among other suggestions, the need for a lighter anti-torpedo net was stressed, which can be laid and removed in harbors in a short time for temporary use, and which will give good if not perfect protection from torpedoes fired from planes.

3. Designs are requested to be prepared giving A/T net protection to one or more large ships moored in harbors against torpedo plane attack in which the

2706 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

A/T net may be placed completely around one or more large ships, similar to placing the ship (or ships) in a "dry-dock" of A/T net. It may be assumed that the currents inside of most harbors are not as great as at the entrances, and the moorings of such nets may be of less weight and less extensive than for the present A/T nets which are designed principally for harbor entrances. As such nets may desired for advance bases, as little weight and volume of material as possible is desirable. As little space as possible should be taken up by the nets in order not to take up too much anchorage space.

4. Designs of A/T nets which might be attached to booms on ships or floating off of ships at anchor are requested to be prepared in conjunction with the Bureau of Ships. In a design of this type it may be possible to do away with mooring the nets. A net which deflects rather than stops the torpedo may possibly be designed.

5. Reference (c) is a preliminary Admiralty report on the development of a torpedo net defense for merchant ships at sea. It is requested that the Bureau of Ordnance in conjunction with the Bureau of Ships undertake a similar development work for the protection of ships underway at sea.

6. It is possible that in our Navy the assumption has been reached that anchorages protected by nets are secure. Nets are defensive measures and, in general, are without destructive means. Patrol vessels are required in conjunction with net defenses, and of the two measures of defense, the vessels, capable of offensive action, are probably the more important. It is not believed that the tests with nets conducted by the British should be accepted as conclusive. While one test of torpedo firing against an A/T net has been conducted by the Bureau, the torpedo was not equipped with cutters. No other tests have as yet been held. It may be well to repeat and to extend the British tests. It may be worthwhile to know the exact damage which will be done to an anti-torpedo net from a torpedo fired in the net.

7. Until the present in great measure reliance in this mode of defense has been placed on British designs, experiments and tests. It is considered that now we should be in a position to take more progressive action. In this letter it is realized that the requests made are not concrete and definite, but serve only to indicate several of the problems toward the solution of which action may be directed.

R. E. INGERSOLL,
Acting.

PEARL HARBOR, T. H., Sep 20, 1941.

1. In view of anti-submarine defenses approved for and now in process of installation at Honolulu and Pearl Harbor, the Commander-in-Chief does not desire to reopen the question of anti-submarine nets thereat.

2. With reference to laying defensive mine fields off those harbors, it is believed there is insufficient prospect of commensurate return for the restricted maneuverability and risks involved to our own ships.

3. The Commander-in-Chief has noted with approval the action initiated toward obtaining suitable radar for protection of channel entrance. He would like to see this matter vigorously prosecuted. Please keep him informed as to progress.

4. WPL-46 assigns salvage in these waters as a task for the forces afloat, assisted by such facilities as the shore establishment may be able to provide. Organization and assembly of equipment is now in process under Commander Base Force. It is requested that the results of the study and inventory referred to in paragraph (3) of the reference (a) be made available to Commander Base Force and that, if and when necessity arises, appropriate local facilities and technical facilities be furnished him.

H. E. KIMMEL.

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, 3 October 1941.

From: The Chief of Naval Operations
To: The Chief of Bureau of Ordnance
Subject: A/T Net Defenses, San Francisco Bay.
Reference: (a) Proceedings of meeting of Local Joint Planning Committee,
Northern California Sector, Pacific Coastal Frontier, of September 17, 1941.

Enclosure: (A) Copy of reference (a).

1. Enclosure (A) is forwarded for information.
2. Attention is invited to paragraph 3 of the enclosure. The Chief of Naval Operations considers it urgent to develop an anti-torpedo net which can be made up, towed to a desired location, and quickly laid. The use of pontoons, as suggested, does not appear to solve this question; a reduction in the number of moorings, at present necessary for the standard net, would seem to be required.

EXHIBIT NO. 117

PATROL WING TWO
U. S. NAVAL AIR STATION
Pearl Harbor, Hawaii, U. S. A., 16 Jan. 1941.

From: The Commander Patrol Wing TWO.
To: The Chief of Naval Operations.
Via: (1) The Commander Scouting Force.
(2) The Commander-in-Chief, U. S. Fleet.
Subject: Patrol Wing TWO—Readiness of.
Reference: (a) OpNav Conf. serial 095323 to the Commander-in-Chief, U. S. Fleet—"Protection of Fleet Aircraft."

1. I arrived here on October 30, 1940, with the point of view that the International situation was critical, especially in the Pacific, and I was impressed with the need of being ready today rather than tomorrow for any eventuality that might arise. After taking over command of Patrol Wing TWO and looking over the situation, I was surprised to find that here in the Hawaiian Islands, an important naval advanced outpost, we were operating on a shoestring and the more I looked the thinner the shoestring appeared to be.

2. (a) War Readiness of Patrol Plane Squadrons is dependent not only on the planes and equipment that comprise these squadrons, but also on many operating needs and requirements at Air Stations and outlying bases over which the Patrol Wing Commander has no direct control. Needs and requirements for War Readiness include: spare planes, spare engines, hangar and beach equipment, squadron equipment, spare parts, stores, material, bombs, ammunition, base operating facilities, overhaul and repair facilities, qualified personnel to man all base facilities and shops, all in sufficient adequacy to insure continuous operating readiness. These cannot be provided overnight. The isolation of this locality from the source of supply, the distance, and time involved, make careful and comprehensive long distance planning mandatory. I am informed that in the past, the average interval between the normal request and receipt of material has been nine months.

(b) Reference (a) reads, in part, as follows: "In about one year practically all fleet aircraft except Patrol Wing TWO will have armor and fuel protection". As there are no plans to modernize the present patrol planes comprising Patrol Wing TWO, this [2] . . . evidently means that there is no intention to replace the present obsolescent type of patrol planes in Patrol Wing TWO prior to one year and that Patrol Wing TWO will be practically the last Wing to be furnished new planes. This, together with the many existing deficiencies, indicates to me

2708 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

that the Navy Department as a whole does not view the situation in the Pacific with alarm or else is not taking steps in keeping with their view.

3. (a) Presumably, the offices and bureaus concerned are familiar with the situation in the Hawaiian Area over which they have particular cognizance; certainly enough correspondence has already been written concerning patrol plane needs to enable bureaus and offices to take the necessary steps to provide and to anticipate such needs.

(b) If war should break in the Pacific, there is much work cut out for patrol planes and undoubtedly much will be expected of them. Considerably more attention will have to be paid to anticipating their needs and action taken to provide deficiencies by all the bureaus and offices concerned if patrol planes are to perform according to expectations.

4. It is therefore urgently recommended that those concerned with War Plans and those in the Planning and Procurement Divisions of all bureaus and offices view the patrol plane situation in the Hawaiian Area in the light of the International situation in the Pacific; that each bureau and office check and recheck their planning and procurement lists for present requirements and future needs and that immediate steps be taken to furnish the personnel, material, facilities and equipment required and under their cognizance, to meet the present emergency and probable eventualities. The tremendous and all consuming work of those in the Navy Department is fully appreciated and there is no intent to criticize or to shift responsibility. This letter is written merely in an effort to insure that we may not be "too late".

5. The following are some of the deficiencies and requirements referred to above:

[3] (a) For Patrol Wing TWO:

1. Replace present obsolescent type patrol planes with high performance modern types having latest approved armor and armament features and in such numbers as the readiness of base operating facilities will permit.

2. Provide squadron spares and squadron equipment in excess so as to have available a sufficiency to provide for shift of operations to outlying bases.

3. Provide bomb handling equipment of latest design in sufficient amounts as to reduce to minimum the time element involved in rearming both at normal base and outlying bases.

4. Provide ordnance material to fill and maintain full squadron allowances.

5. Provide increased number of aircraft torpedoes when additional storage is available. Twenty-four aircraft torpedoes are now stored at the Submarine Base, Pearl Harbor, T. H.

6. Expedite completion and assignment of patrol plane tenders. At present, the tenders for Patrol Wing TWO consists of the U. S. S. WRIGHT and the U. S. S. SWAN. The WRIGHT now is not available due to Navy Yard overhaul until March 17, 1941.

(b) For Naval Air Station, Pearl Harbor, T. H.:

1. Increase capacity for overhaul and repair of patrol planes, engines, instruments, radio and ordnance material, and provide manufacture and stowage of breathing oxygen, to anticipate [4] operating needs both now and as estimated for the future, through addition of shop space, additional shops, additional personnel, additional equipment, additional supply of spare parts and stock.

2. Increase and improve bomb storage and ammunition storage through enlargement and preparation of present storage and installation of bomb handling equipment.

3. Construction of squadron's ready ammunition storage.

4. Additional bombs in Hawaiian Area.

5. Additional ferries or other suitable means for transporting bombs from Ammunition Depot across water surrounding Ford Island to Naval Air Station, Pearl Harbor, T. H.

6. Increase supply facilities through additional stowage, additional supply personnel (officer and enlisted), additional facilities for handling supplies, assistance in obtaining and increasing the amount of spares and supplies on hand, and simplification of requisitioning spare parts and supplies.

7. Increase machine gun and rifle range facilities in Pearl Harbor Area to provide for more effective ground training for personnel of patrol squadrons based on Naval Air Station, Pearl Harbor, T. H.

8. Provide for torpedo war head stowage at some suitable location readily accessible to the [5] Naval Air Station, Pearl Harbor, T. H.

9. Increase barrack space to provide for increased personnel at Naval Air Station and for personnel of additional patrol squadrons as may be assigned.

(c) For Naval Air Station, Kaneohe:

1. Expedite completion; providing the operating facilities necessary to permit basing and efficiently operating the number of patrol squadrons intended to base thereon, including dredging the patrol plane operating area to the extent recommended, dredging ship channel, housing of the necessary personnel, supplying equipment for the various buildings, supplying necessary boats and supplying adequate station personnel. Anticipate engine and plane overhaul facilities to meet War requirements.

(d) For Keehi Lagoon:

1. Take necessary steps to expedite the development of Keehi Lagoon for a patrol plane base.

(e) Outlying Bases: Wake, Johnston, Palmyra:

1. Expedite completion of operating facilities with particular regard to dredging ship channels; dredging landing and take-off areas; providing gasoline and oil reserves and issue facilities; bomb and ammunition supply and stowage; concrete ramps and parking area.

(f) For Midway:

1. Expedite completion and establishment of Midway as an outlying operating base with the assignment of necessary personnel and with facilities and equipment to provide for the basing thereon of two patrol plane squadrons.

(g) General:

1. Stop the normal shifting and rotating between sea and shore and between other activities of personnel, officer and enlisted, in Patrol Wing TWO, Naval Air Station, Pearl Harbor, and Naval Air Station, Kaneohe, until all personnel complements have been brought up to the requirements necessary for war-time operations.

2. Provide two sets additional beaching gear and two boats fitted with gasoline bowser tanks for use at each of the following outlying bases: Wake, Midway, Johnston, Palmyra, Guam and Canton.

UNITED STATES FLEET

SCOUTING FORCE

U. S. S. INDIANAPOLIS, Flagship

PEARL HARBOR, T. H., Jan 21, 1941.

First endorsement to CPW2 conf. ltr. PW2/A16-3/(022) of 1/16/41.

From: Commander Scouting Force.

To: The Chief of Naval Operations.

Via: Commander-in-Chief, United States Fleet.

Subject: Patrol Wing TWO—Readiness of.

1. Forwarded.

2. The Commander Scouting Force appreciates that the efforts of the Department toward the completion of adequate defense measures must necessarily be based upon the development of the entire Naval Establishment rather than concentration upon one point. He believes, however, that the importance of Pearl Harbor as the spear-head of our defenses in the Pacific, and the essential role of Patrol Wing TWO not only in the defense of Pearl Harbor but also in any operations to the westward, warrant early and full attention to the needs cited by the Commander of that Wing.

3. Commander Scouting Force has, since his arrival in this area as Commander Hawaiian Detachment, been much concerned at the lack of adequate material and facilities for proper and efficient operation of Patrol Wing TWO in war. He has effected such remedial measures as lay within his power, and has urged upon the Department such matters as the enlargement of the originally-planned installation at Kaneohe Bay and the provision of gasoline

2710 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

and lubricating oil reserve supplies at outlying-island bases so that these bases might be utilized temporarily without awaiting the arrival of tenders.

4. In view of the location of Pearl Harbor and the island bases, and the functions of Patrol Wing TWO in war in the Pacific, the Commander Scouting Force therefore recommends strongly that measures toward fulfilling the needs cited by Commander Patrol Wing TWO be given the highest priority in the Department's program and accomplished at the earliest practicable moment.

/s/ ADOLPHUS ANDREWS.

UNITED STATES FLEET

U. S. S. PENNSYLVANIA, Flagship

PEARL HARBOR, T. H., Jan 31, 1941.

Second endorsement to CPW2 conf. ltr. PW2/A16-3/(022) of 1/16/41.

From: Commander-in-Chief, United States Fleet.

To: The Chief of Naval Operations.

Subject: Patrol Wing TWO—Readiness of.

1. Forwarded, concurring with the basic recommendation and with the first endorsement by Commander Scouting Force.

2. The Commander-in-Chief appreciates the spirit in which the basic letter, urging action toward effective readiness for missions that may be demanded of Patrol Wing TWO, has been written. He also appreciates the fact that action has already been initiated or, in some cases, is not readily practicable at this time with respect to a number of the basic recommendations; and that separate correspondence with respect to much of this material is already in circulation.

3. It is the Commander-in-Chief's opinion, however, that the basic letter, summarizing as it does the entire patrol plane situation in the Hawaiian area, presents a very valuable picture of the overall requirements that are urgently needed if the potentialities expected of patrol planes are to be even approximately realized. Therefore, full review of the subject, accompanied by appropriate action toward expediting or initiating needed developments, is urged.

4. Attention is particularly invited to:

(a) The desirability of better priority in the delivery of improved patrol planes to Patrol Wing TWO.

(b) The great importance of increased bomb and torpedo supply, including not only bulk storage, but also ready storage at Naval Air Station Pearl Harbor, together with suitable handling and loading equipment at the Air Station, and improved transportation from bulk storage. In this connection, provision at the Naval Air Station should include two "fills" for five patrol plane squadrons and one aircraft carrier group.

(c) The vital necessity of expediting the readiness at outlying island developments of the basic essentials: gasoline and oil storage, bomb and ammunition storage, parking area, ramps and dredged approaches thereto. This latter subject has been discussed informally with representatives of the Commandant Fourteenth Naval District and is understood to be receiving full consideration. Departmental support, if and as needed, is urged.

/s/ J. O. RICHARDSON.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 17, 1941.

In reply refer to: AG 354.2/JAX

Subject: Maximum Readiness of Aircraft in Hawaiian Area.

To: Commanding General, Hawaiian Division,
Commanding General, Hawaiian Separate Coast Artillery Brigade,
Commanding General, Hawaiian Air Force.

1. In a recent confidential letter of instructions to commanders of the six major echelons of the United States Fleet, Admiral H. E. Kimmel, Commander-in-Chief, Pacific Fleet, expressed the pressing necessity for maximum readiness in the Hawaiian area, particularly for Pearl Harbor defense, of all available aviation components. I am in agreement with Admiral Kimmel in his belief that much remains to be done for adequate future effectiveness in this respect, but that much can now be done with means now available, to make arrangements for local employment of aviation more effective than they now are.

2. With above in mind and under provisions contained in Joint Control Frontier Defense Plan, Hawaiian Coastal Frontier, Hawaiian Department and 14th Naval District, 14 April 1939, joint planning representatives have been selected from echelons concerned in order that detailed plans and recommendations may be undertaken. Upon completion, plans and recommendations will have been formulated to implement the following;

a. Joint Air Exercises. Desirability of intensified attention to this subject. Frequency and scope. Degree of coordination. Improvement along practical lines.

b. Communications. Fully satisfactory communications between all Army and Navy air activities, both in the air and on the ground. Direct and instantaneous communication, in particular, between all Army and Navy air fields. Continuation of and renewed stress upon Joint communication exercises.

c. Air Command. Determination of responsibility and degree under various conditions. Arrangements between the two services for such direct exercise of air control as may be necessary.

d. Landing Fields, Mutual Use. "Scattering" plans, including dispersion of patrol planes. Familiarization of Navy and Army aircraft personnel with one another's landing fields and facilities, including actual practice in mutual use and servicing.

[2] *e. Aircraft Recognition and Familiarization.* Recognition signals between air and ground. Familiarization of all personnel—air, ground, and ship—with all local Navy and Army types.

f. Alert Watches. Determination of suitable alert watch conditions. Requirements for all naval aircraft types. Size and composition of watches. Watches with and without ship-based planes present. Conservation of personnel and material.

g. Armament and Re-armament. Plans for adequate accomplishment with means now available. Ready storage. Speed. Replenishment.

h. Alarm and Detection. Effective and instantaneous air alarm arrangements. Detection by RADAR (and otherwise) and tracking of enemy planes. Possible restriction of own planes to specific operating areas for this purpose. Similarly, control of air traffic approaches.

i. Employment of balloon barrages, smoke and other special devices for improving defenses of Pearl Harbor.

j. High priority to increase of pursuit aircraft and anti-aircraft artillery, and establishment of air warning net.

k. Effective coordination of Naval and Military aircraft operations, and ship and shore anti-aircraft gun fire, against surprise aircraft raids.

l. Joint readiness for immediate action in defense against surprise aircraft raids against Pearl Harbor.

2714 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

m. Joint exercises, at least once weekly, designed to prepare Army and Navy forces on Oahu for defense against surprise aircraft raids.

3. In the joint planning enumerated herein it is directed that all echelons or individuals concerned render every possible aid and cooperative assistance to the end that maximum needs for Army-Navy joint action may be met.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

PEARL HARBOR, T. H.,
1200, 30 November, 1941.

Memorandum for the Commander in Chief.

STEPS TO BE TAKEN IN CASE OF AMERICAN-JAPANESE WAR WITHIN THE NEXT TWENTY-FOUR HOURS

1. Despatch to Pacific Fleet that hostilities have commenced.
2. Despatch to Task Force Commanders:
 - (a) WPL 46 effective.
 - (b) Sweeping plan cancelled.
 - (c) Comairbatfor and units in company with him (Task Force 8) carry out present mission. Upon completion cover WAKE against enemy operations until joined by Task Force Three. Remainder of Task Force Two (now at sea in operating areas, return to PEARL HARBOR.
 - (d) Raiding and Reconnaissance Plan effective, modified as follows: Cancel cruiser operations west of NANPO SHOTO; delay reconnaissance until Task Forces Two and Three are joined; Batdiv One join Task Force One; Task Force Three with units of Task Force Two present in PEARL HARBOR depart ----- and rendezvous with Comairbatfor at Point "A" at -----; Commander Base Force send two tankers to Point "A" with utmost dispatch, report expected time of their arrival.
 - (e) Send one Marine Bombing Squadron to MIDWAY.
- [2] 3. (a) I would not modify the movements of the WRIGHT now enroute WAKE to MIDWAY, nor REGULUS, enroute PEARL to MIDWAY, nor ships bound to CHRISTMAS and CANTON.
- (b) I would continue WILLIAM WARD BURROWS to WAKE, directing Comairbatfor (Com Task Force 8) to have two destroyers join her as escort.
- (c) I would not withdraw any civilian workmen from outlying islands.
- (d) I would provide two destroyers to escort SARATOGA from longitude 150° west to PEARL HARBOR. (Under present set-up, Commander Task Force Three has been directed to furnish this escort from his force which would be at sea on arrival of SARATOGA. Under the plan of paragraph 2, above, this order should be transferred to Com Task Force One. This note added by Good).
- (e) I would not direct any change in passage of shipping to and from MANILA, nor would I send any added escorts, nor dispose any cruisers toward CALIFORNIA or SAMOA until further developments occur.

[1] Secret

PEARL HARBOR, T. H.
1200, December 5, 1941.

Memorandum for the Commander in Chief.

RECOMMENDED STEPS TO BE TAKEN IN CASE OF AMERICAN-JAPANESE WAR WITHIN THE NEXT FORTY-EIGHT HOURS

1. Send despatch to Pacific Fleet that hostilities have commenced.
2. Send despatch to Task Force Commanders:
 - (a) WPL 46 effective. (Execute O-1A R5 except as indicated in (b) and (c) below. (The SS and VP plans will become effective without special reference to them).
 - (b) Commence sweeping plan, including cruiser operations west of Nanpo Shoto, cancelled.

(c) Raiding and Reconnaissance Plan effective, modified as follows: Delay reconnaissance until Task Forces Two and Three are joined; Batdiv One join Task Force One. Commander Base Force send two tankers with utmost despatch to rendezvous with Task Force Three to eastward of Wake at rendezvous to be designated.

(d) Comairbatfor and units in company with him (Task for 8) return to Pearl at high speed, fuel and depart with remainder of Taskfor Two, less BBs, to join Task Force Three.

(e) LEXINGTON land Marine aircraft at Midway as planned (p. m. 7 Dec) and proceed with ships now in company (Taskfor 12) to vicinity of Wake.

(f) Comtaskfor Three proceed to join LEXINGTON group. Return DMS to Pearl.

[2] 3. (a) Do not modify the movements of REGULUS at MIDWAY (departing 9th), nor ships bound to CHRISTMAS and CANTON.

(b) Direct that WILLIAM WARD BURROWS continue to WAKE but delay arrival until 10th. Direct that LEXINGTON group send two destroyers to join BURROWS prior to her arrival at WAKE.

(c) Do not withdraw any civilian workmen from outlying islands.

(d) Provide two destroyers to escort SARATOGA from longitude 150° west to PEARL HARBOR.

(e) Do not change passage of shipping to and from MANILA nor send any added escorts, nor dispose any cruisers toward CALIFORNIA or SAMOA until further developments occur.

(s) C. H. McMorris.

KIMMEL EXHIBIT 5 TO REPORT OF ACTION

PATROL WING TWO,
U. S. NAVAL AIR STATION,
Pearl Harbor, T. H., December 19, 1941.

Memorandum for Admiral H. E. Kimmel, U. S. Navy.

MY DEAR ADMIRAL: In accordance with our conversation of yesterday, I am forwarding to you the following information:

1. Availability and Disposition of Patrol Planes on morning of 7 December, 1941:

Squadron	In commission	Total available for flight	Location	Under repair	Ready at base	In air
VP-11.....	12 PBY-5.....	12	Kaneohe.....	0	12	0
VP-12.....	12 PBY-5.....	11	Kaneohe.....	1	11	0
VP-14.....	12 PBY-5.....	10	Kaneohe.....	2	7	13
VP-21.....	12 PBY-3.....	11	Midway.....	1	4	17
VP-21.....	1 PBY-3 (spare).....	1	Pearl Harbor.....	1	0	0
VP-21.....	1 PBY-3.....	12	Pearl Harbor.....	2	12	0
VP-22.....	14 PBY-3.....	12	Pearl Harbor.....	1	11	0
VP-24.....	6 PBY-5.....	5	Pearl Harbor.....	1	1	14

RECAPITULATION

Squadron	In commission	Total available for flight	Under repair	Ready at base	In air
At Kaneohe.....	36	133	3	30	13
At Pearl.....	33	28	5	24	14
At Midway.....	12	11	1	4	17
Total.....	81	72	9	58	14

[2]

NOTES

¹ 3 planes armed with two depth charges each conducting search of assigned fleet operating areas in accordance with U. S. Pacific Fleet Letter No. 2CL-41 (Revised) (Task Force NINE Operating Plan (9-1). 3 planes in condition 2 (30 minutes notice).

² 5 planes conducting search of sector 120°-170° radius 450 miles; departed Midway at 1820 GCT. 2 planes departed Midway at same time to rendezvous with U. S. S. LEXINGTON at a point 400 miles bearing 130° from Midway to serve as escorts for Marine Scouting planes. Four planes, additional plants, armed with 2-500 pound bombs each were on the alert at Midway as a ready striking force. These four planes took off at about 2230 GCT upon receipt of information on the attack on Pearl Harbor, and searched sector 060° to 100° radius 400 miles. One plane was under repair in the hangar at Midway. A spare plane was under overhaul at Pearl Harbor.

³ Four planes conducting inter-type tactics in area C-5 with U. S. Submarine.

⁴ All planes, except those under repair, were armed with machine guns and a full allowance of machine gun ammunition.

[3] 2. Material condition:

(a) Of the 81 available patrol planes 54 were new PBY-5's; 27 were PBY-3's having over three years service. The PBY-5's were recently ferried to Hawaii, arriving on the following dates:

Squadron	Number planes	Arrival date	Squadron	Number planes	Arrival date
VP-11.....	12	28 Oct. 1941.....	VP-23.....	12	23 Nov. 1941.
VP-24.....	6	28 Oct 1941.....	VP-14.....	12	23 Nov. 1941.
VP-12.....	12	8 Nov. 1941.....			

(b) The PBY-5 airplanes were experiencing the usual shake-down difficulties and were hampered in maintenance by an almost complete absence of spare parts. In addition, a program for installation of leakproof tanks, armor, and modified

2722 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

engine nose sections was in progress. They were not fully ready for war until these installations were completed, nor were extensive continuous operations practicable until adequate spare parts were on hand.

(c) The 12 PBY-3 airplanes at Pearl Harbor (VP-22) had returned from Midway on 5 December after an arduous tour of duty at Midway and Wake since 17 October. This squadron was in relatively poor material condition because of its extended operations at advance bases with inadequate facilities for normal repair and upkeep. In addition 10 of its planes were [4] approaching 18 months service and were due for overhaul.

(d) It should be noted that the material situation of the patrol squadrons made the maintenance of continuous extensive daily searches impracticable. Under such conditions the PBY-5's were to be expected to experience numerous material failures which would place airplanes out of commission until spare parts arrived. The PBY-3's of Patrol Squadron TWENTY-TWO at Pearl were scheduled for a week of upkeep for repair and maintenance.

(e) Under the circumstances, it seemed advisable to continue intensive expansion training operations and improvement of the material military effectiveness, at the same time preserving the maximum practicable availability of aircraft for an emergency. Under the existing material and spare parts situation, continuous and extensive patrol plane operations by the PBY-5's was certain to result in rapid automatic attrition of the already limited number of patrol planes immediately available by the exhaustion of small but vital spare parts for which there were no replacements.

(f) In this connection it should be noted that there were insufficient patrol planes in the Hawaiian Area effectively to do the job required. For the commander of a search group to be able to state with [5] some assurance that no hostile carrier could reach a spot 250 miles away and launch an attack without prior detection would require an effective daily search through 360° to a distance of at least 800 miles. Assuming a 15-mile radius of visibility this would require a daily 16 hour flight of 84 planes. A force of not less than 200 patrol planes, adequate spare parts and ample well trained personnel would be required for such operations.

(Signed) P. N. L. BELLINGER,
Rear Admiral, U. S. Navy,
Commander Patrol Wing TWO.

Pearl Harbor, T. H., 1 Jan. 1942.

From: The Commander, Patrol Wing TWO

To: Senior Member, Board Investigating Activities of December 7, 1941.

Subject: Data Requested by Board.

1. In accordance with your request I am sending herewith six (6) copies of Report of Army-Navy Board of 31 October, 1941.

2. The dates on which Pearl Harbor Air Raid Drills were held are as follows:

24 April, 1941,
12 May, 1941,
13 May, 1941,
19 June, 1941,
10 July, 1941,
26 July, 1941,
1 August, 1941,

20 August, 1941,
5 September, 1941,
27 September, 1941,
13 October, 1941
27 October, 1941,
12 November, 1941.

P. N. L. BELLINGER

CONFIDENTIAL

REPORT OF ARMY-NAVY BOARD 31 OCTOBER 1941

[1] In compliance with radiogram to the Commanding General, Hawaiian Department, dated 2 October 1941 and a similar radiogram to the Commandant, 14th Naval District, a Joint Army-Navy Board was convened to prepare recommendations covering the allocation of aircraft operating areas for all purposes

for the entire Hawaiian Area with particular recommendations on the jurisdiction of the Kahuku Point Area. The board met at 0000 October 7, 1941 and frequently thereafter until final recommendations were submitted. Present were:

Major General F. L. Martin, U. S. A.
Rear Admiral P. N. L. Bellinger, U. S. N.
Brigadier General H. C. Davidson, U. S. A.
Lieutenant Commander S. E. Burroughs, U. S. N.

1. A general discussion was held concerning the various Army-Navy aviation activities, the available training areas, the present congestion of aircraft areas, the expected expansion of aircraft of both services in the near future with the attending operational difficulties which such expansion would produce.

2. In order that the board could intelligently approach the problem which confronted it, it was necessary to have such information as was available as to the total number of airplanes of both services for which operating facilities should be made available. The following lists show the number of airplanes which were considered.

Navy

14th Naval District Aircraft: 84 Patrol planes, 48 VSO seaplanes.
Fleet Aircraft: 750 airplanes (10 Aircraft Carrier Groups).
Cruiser and Battleship Seaplanes: 75 seaplanes (approximately).
Patrol Wings One and Two: 98 Patrol planes.
[2] *Marine Aircraft Groups:* 162 airplanes
Utility Aircraft: 88 Airplanes (various types)
Total, 1305.

Army

54 Group program:

Total	781
-------	-----

Air Fields Available:

Oahu

Army: Hickam Field, Wheeler Field, Bellows Field.

Navy: Ford Island, Ewa, Kaneohe.

Air Fields Proposed: Kahuku, John Rodgers, (Commercial), Barbers Point, Keahi Lagoon (commercial—under construction).

[3] *Outlying Islands—Hawaiian Archipelago*

Army: Barking Sands, Kauai; Burns Field, Kauai (Commercial—too small for bombardment airplanes); Morse Field, Hawaii; Hilo, Hawaii (Municipal Airport); Lanai (Under construction); Homestead Field, Molokai (Used jointly Army-Navy and commercial).

Navy: Maui (Navy and Commercial; Hilo (Temporary facilities patrol planes).

3. The problem confronting the board as it pertains to Naval aviation was summed up by the Naval representatives as follows:

a. The Navy requires shore air bases for the use of carrier aircraft in order to maintain them in a proper state of training for war readiness. With the imminent increase in numbers of Army and Navy aircraft operating from Oahu, the congestion of air space for training and the shortage of suitable sites for air bases on Oahu must be recognized as becoming serious problems. Lack of suitable harbor and dock facilities in islands of the Hawaiian group other than Oahu precludes the development of these islands as bases for carrier-based aircraft, since it is essential that carrier planes be readily accessible to their parent vessels. For this reason Oahu is the only logical island for the development of additional facilities for shore basing of carrier air groups. Carrier aircraft, when based on shore, must, on account of the nature of their functions, be considered in a mobile state of readiness and not definitely fixed or attached to any shore base. Nevertheless, there must be provided on shore suitable and adequate facilities for the basing and operating of such aircraft just as definitely and specifically as if they were intended to be shore based permanently. It is estimated that approximately ten carrier air groups will be shore based in the Hawaiian Area at any one time. It is essential that shore bases be available for these air groups in order that a proper state of training may be maintained. These shore bases must necessarily be located on the island of Oahu where transportation facilities are available between bases and berths of parent vessels both for transferring personnel and equipment, and for reasons of readiness. In addition, in order to provide air space and fields for the conduct of daily training of these air groups, adequate aviation facilities must be available not only on Oahu but on other islands of the Hawaiian Group.

b. The Navy has under lease approximately 70 acres of land on Kahuku Point. There is a landing strip and a dive bombing target on this area that is continually in use by shore-based carrier aircraft in connection with training operations. If this area is given over to the Army for construction of an air base, its loss will be strongly felt even now, when congestion on Oahu is but a portion of [4] that of the future, and adjustments must be made not only for loss of the existing landing strip and target area, but also for the reduction of the Navy air space involved. With the arrival of each additional carrier group in Oahu, further adjustments will be required to permit the necessary training to proceed.

c. The principal joint task assigned to Army and Navy forces permanently based in the Hawaiian Islands is "to hold Oahu as a main outlying Naval base." The importance of Oahu in the Hawaiian Group is due entirely to the existence of the Pearl Harbor Naval Base and its attending activities. The existence of Army Forces and Navy District Forces in great numbers in the Hawaiian Islands is solely for the purpose of maintaining the usefulness of Pearl Harbor as a base for the various units of the Fleet. The value of the Pearl Harbor Naval Base to the Fleet is in providing means for Fleet units to be maintained and continued in effecting operating readiness at a point well advanced to the westward. It therefore appears that any military or Naval air units on Oahu which unnecessarily interfere with the maintenance of proper readiness of Fleet units and which are not required on Oahu for the security of Oahu, but are required in the Hawaiian Area, should be based on other islands of the Hawaiian Group.

d. It appears necessary, to develop to maximum practicable capacity all sites on Oahu considered suitable for air bases; to construct auxiliary fields where practicable; and, at the same time, to avoid creating an undesirable degree of air congestion in the vicinity of Oahu that will defeat operating effectiveness. In planning the above developments, due consideration should be given to providing adequate dispersion.

e. To provide for future requirements of Army and Navy air forces in the Hawaiian Islands, it appears necessary to develop all suitable air base sites on islands of the Hawaiian Group, other than Oahu, to their maximum practicable capacities. In order to carry out estimated requirements, these developments should precede or at least proceed with any further developments on Oahu. This may not be entirely practicable of accomplishment, but every effort should be made to do so. A far-sighted policy in which currently foreseen needs are subordinated to and coordinated with a general plan of ultimate development should be adopted now. Otherwise, inevitable future expansion will cause a more difficult problem to arise at a later date.

f. There is every desire of the Navy to cooperate with the Army to the fullest extent, but in the case under consideration there is insufficient space on the island of Oahu for the numbers of aircraft involved, even in current plans, to base thereon at the same time. As both services are basing their requirements on the part they are expected to play in national defense, it follows that final decision as to the action to be taken should be based on the effect of the various alternatives on over-all national defense.

[5] 4. The problem confronting the board as it pertains to Army aviation was summed up by the Army representatives as follows:

a. The mission of the Army on Oahu is to defend the Pearl Harbor Naval Base against all attacks by an enemy. The contribution to be made by the Hawaiian Air Force in carrying out this mission is:

(1) To search for and destroy enemy surface craft within radius of action by bombardment aviation.

(2) To detect, intercept and destroy enemy aircraft in the vicinity of Oahu by pursuit aviation.

b. Due to the limited range of pursuit aviation and the uncertainty of ascertaining the direction of approach of enemy aircraft making an attack on the Pearl Harbor Naval Base, it is mandatory that the air fields from which pursuit aviation operates, in the performance of this mission, be situated on the Island of Oahu. Under no other condition could there be assurance that enemy aircraft could be intercepted before they reached their bomb release line. The minimum requirements of pursuit aviation for its mission is two groups. The number of airplanes at present allocated to a pursuit group, which is 163, necessitates two air fields be available on this island. One of these groups is now permanently located at Wheeler Field where atmospheric conditions at times offer an obstacle to their continuous operation. To insure that at least one group of pursuit aviation may operate without being hampered by weather conditions, it should be located at approximately sea level elevation. The Kahuku Point area has been selected as having the necessary level ground and weather prevailing to satisfy these conditions. Furthermore, by having all Army pursuit aviation located at Wheeler Field and Kahuku Point, it makes it possible to carry out the pursuit mission and training therefor on the north side of Oahu, removing all pursuit aircraft from the air congestion which prevails over the Pearl Harbor area. The Kahuku Point area also lends itself to the establishment of ground targets, in its immediate vicinity, which are so essential to proper progress in pursuit training. This still leaves one group at Wheeler Field without proper ground gunnery facilities which cannot be obtained on the Island of Oahu. The nearest point where these facilities can be made available is on the Island of Molokai where one gunnery range has been established.

c. There is allocated to the Hawaiian Air Force 39 A-20-A airplanes which form the support command to assist the ground forces of the Hawaiian Department in their mission of defending the Pearl Harbor Naval Base. These airplanes must, of necessity, be closely associated with the ground troops which they serve, both for training and to facilitate their employment in time of war. The home for the support command is established at Bellows Field.

[6] d. The bombardment command of the Hawaiian Air Force consists of 182 heavy bombers. To relieve congestion, all of the training for heavy bombardment is conducted over water or land areas removed from the Island of Oahu. This number of heavy bombers over-taxes the capacity of Hickam Field, their home station, to such an extent that provisions must be made for the training of approximately one-half of this force from outlying fields on other islands of the Hawaiian Archipelago.

e. To establish permanent stations for air organizations on other islands in this group entails changing the defense plans for these islands that security for these bases may be established. This would require a decided increase in the number of ground troops or such a dispersion of available forces as to destroy their effectiveness. This cannot be done except at enormous expense of time and money. For this reason the home base for bombardment aviation and the large quantities of bombs and other supplies necessary for continued operations must be placed under the protection of the ground defense installations on Oahu. Operations may be conducted from outlying fields in the Hawaiian group in the beginning of the attack but as the attack is pressed home these bombers will be forced to fall back upon their protected home bases. While the training of bombardment units is normally conducted in areas distant from the Pearl Harbor area, it would be practically impossible to control this force in

time of actual hostilities if they were stationed on outlying islands. Radio is the sole means of communication and is too susceptible to interference to furnish a positive medium of control. A positive means of communication is a prime requisite for successful air operations. It must be in being and constantly used prior to the beginning of hostilities. Further, it must be pointed out that bombardment aviation must be protected by every available means of ground and anti-aircraft defense, i. e., pursuit aviation antiaircraft artillery and aircraft warning service. Duplication of these defenses on outlying islands is manifestly prohibitive. Therefore, as pursuit concentrations for the defense of Oahu must be located on Oahu, it is imperative that bombardment aviation must be based on Oahu under the protection of the Interceptor Command.

f. The 20 transports must of necessity operate from Hickam Field as that is the base at which technical supplies are concentrated for which the transports furnish transportation to outlying fields where training is being conducted. Supply and maintenance facilities also require the same protection from the ground and air as is required for grounded bombardment aviation.

g. In the case of actual war, the majority of the Fleet units, with their carriers attached, would be at sea, leaving ample air field facilities for such naval aviation as might be left behind and for all Army aviation participating in the defense of these islands. Therefore, the problem which confronts this board is to find a solution which will permit the maximum use of existing air fields for aviation training for both the Army and the Navy and to suggest such sites as might be developed to increase these facilities.

[7] h. A careful survey has been made of the entire Island of Oahu for sites on which landing fields can be constructed. On this island, with the exception of the Kipapa Gulch area, all level ground that might be available for air fields is either so occupied, projects are underway for preparation of air fields, or the turbulence in the air created by the close proximity of mountain ranges precludes such development. The site commonly referred to as the Kipapa Gulch area will accommodate two 5,000-foot runways free from obstructions. The greatest handicap to the use of this area is that it is about two-thirds of the distance between Pearl Harbor and Wheeler Field which would further increase the congestion of the air over this part of the island. It would also remove from cultivation a highly productive tract of land. The Kipapa Gulch area is the only site remaining where an air field could be constructed. The principal objection to the use of this site, which is congestion of the air over the Pearl Harbor area, is much less of a handicap should this site be used for the training of carrier groups than it would be as a station for Army pursuit aviation. The use of this site by the Navy would permit the concentration of carrier-group training for Naval aviation on the south side of the island of Oahu, at Barber's Point, Kipapa Gulch, and Ford Island. As the training from these stations would be entirely under Naval control it lends itself to aerial traffic regulations which would be difficult to attain if large numbers of airplanes of the two services were intermingled. The Kipapa Gulch area is advantageously located for occupancy of carrier-group aviation in that the site is readily accessible to the parent vessels of the carrier groups. It would permit facility in the transfer of personnel and supplies to and from the parent vessel in Pearl Harbor. It would be advantageous in making for ease of supervision of the training of all carrier-based Naval aviation.

i. The Army is cognizant of the fact that with the increase in carrier-based aircraft contemplated for this area, serious problems arise as to sufficient air and ground space on Oahu. It is also cognizant of the fact that air units in Hawaii will, within the next few months, be reinforced with pursuit and bombardment aircraft for which bases must be available now, while the additional carriers anticipated for this area will not be available for an elapsed time of from one to three years.

j. That far-sighted and long-range planning must be done there can be no doubt. But, provisions for aircraft which may be available within three years should not be allowed to disrupt the plans, training and employment of the Army Air Force units in this area at a time when they may be required for immediate use against a hostile threat.

k. This problem can be solved by restricting the number of carrier groups to that which can be adequately accommodated on existing Navy facilities and those Navy projects which are now under development.

[8] 5. *Conclusions:*

That the board concludes that it has been presented with a problem for which a satisfactory solution to all concerned cannot be obtained due to the fact that—

a. The Army estimates its requirements from directives emanating from the War Department.

b. The Navy estimates its requirements from directives emanating from the Navy Department.

c. There is insufficient space on the Island of Oahu to provide for the estimated future requirements of both the Army and the Navy.

6. *Joint recommendations:*

a. That it be agreed that in order not to delay starting the development of an important strategical base, the board recommends:

(1) That the Kahuku Point area be developed immediately by the Army as an air base.

(2) That as the Army representatives hold that the Kahuku Point air base should be available for Army air units solely and the Navy representatives hold that the Kahuku Point air base should be available for temporary use by the Navy when circumstances so require, the extent of availability of this base to the Navy as well as the extent of the availability to the Navy of all other Army air bases on the Island of Oahu, be left to the determination of higher authority as the solution of this problem transcends the prerogatives of this board.

b. That progress be continued on the development of air bases on islands of the Hawaiian Group, other than Oahu, which are now under construction.

c. That in order to reduce air congestion on Oahu, all existing and new sites of strategical importance on islands of the Hawaiian Group other than Oahu, suitable for air bases and auxiliary operating fields be expanded or developed to maximum practicable capacities and that such developments have the same high priority as any development proposed for the Island of Oahu.

d. That all sites on the island of Oahu suitable for air bases and auxiliary operating fields be developed to maximum practicable capacities at the same time avoiding the creation of an undesirable degree of air congestion in the vicinity of Oahu.

e. That the existing revised Joint Army-Navy agreement relating to operating areas be placed in force—adjustments which may become necessary, from time to time, to be accomplished by conference between local representatives.

EXHIBIT NO. 121

FACTS AND CORRESPONDENCE ABOUT ADMIRAL KIMMEL'S RETIREMENT

FACTS ABOUT ADMIRAL KIMMEL'S RETIREMENT

On 25 January 1942 I was informed by Rear Admiral Greenslade, U.S.N., Commander 12th Naval District, San Francisco, California, that Rear Admiral Randall Jacobs, U.S.N., Chief of the Bureau of Navigation, Navy Department,

2728 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Washington, D. C., had telephoned an official message to be delivered to me which stated that Admiral Jacobs had been directed by the Acting Secretary of the Navy to inform me that General Short had submitted a request for retirement. I took this as a suggestion that I submit a similar request and on 26 January I submitted a request for retirement. Until I received this message from the Navy Department I had not even thought of submitting a request for retirement.

On 28 January I was informed by Rear Admiral Greenslade that Admiral H. R. Stark, U.S.N., Chief of Naval Operations, had telephoned a message for me to the effect that my notification of General Short's request for retirement was not meant to influence me.

I thereupon submitted my letter of 28 January in which I stated, "I desire my request for retirement to stand, subject only to determination by the Department as to what course of action will best serve the interests of the country and the good of the service."

Subsequently I learned from Admiral Jacobs that the Official directing him to inform me that General Short had submitted a request for retirement was not the Acting Secretary, but the Secretary of the Navy, Mr. Knox.

On 22 February 1942 in a letter to Admiral Stark, Chief of Naval Operations, I stated in part: "I submitted this request solely to permit the Department to take whatever action they deemed best for the interest of the country. I did not submit it in order to escape censure or punishment."

The approval of my request for retirement included the statement: "This approval of your request for retirement is without condonation of any offense or prejudice to future disciplinary action."

I was notified through the public press on or about 1 March 1942 that the Secretary of the Navy had directed that charges and specifications be prepared to bring me to trial by General Court Martial at some future time.

Subject: Duty.

1. Supplementing the statement in my request for retirement dated 26 January 1942, I wish to again state that I stand ready to perform any duty to which the Navy Department may assign me.

[s] H. E. Kimmel,
H. E. KIMMEL.

Letter from Admiral Stark

FEBRUARY 23, 1942.

DEAR MUSTAPHA: I tried to get you by phone last night at the St. Francis where Jacobs told me you were staying, only to find out you are not registered there. I then called Johnny Greenslade, and I trust he got over to you what I wanted to say, which was particularly to clear any doubts in your mind so far as I could regarding the situation here.

Also, I should have so liked just to talk to you for a couple of minutes and, incidentally, to send you some birthday wishes, which are almost due.

It might not have just fitted to have said "Happy Birthday", but I do wish it and I also know that it will be just as happy as you will to make it, and that the measure of that happiness will be commensurate with your innermost strength.

We all have a tough year ahead amid the present clouds of uncertainty, and we all need courage that will enable us to think bravely, act wisely, and endure. I do not have to tell you that my faith in one Husband Kimmel and in the fine fiber in his innermost makeup is such that I know it will carry him through, regardless of how rough the going.

I told Kit I was going to drop you a line this morning when I had failed to reach you last night, and she said to be sure to join all her good wishes with mine to you and to Dot.

Sincerely,

Rear Admiral H. E. KIMMEL, U. S. N.

c/o Rear Admiral J. W. Greenslade, U. S. N.

Twelfth Naval District, San Francisco, California.

22 FEBRUARY 1942.

DEAR BETTY: I started writing this letter a few minutes after Pye gave me your letter of 21 February. I thank you for the letter and for the information contained therein. I also thank you for your other letters which I have not answered.

I understand from your letter that I will not be retired for the present, that I will be in a leave status until some further action is taken.

I submitted my request for retirement because I was notified that Short had done so and took that notification as a suggestion for me to do likewise. I submitted this request solely to permit the department to take whatever action they deemed best for the interests of the country. I did not submit it in order to escape censure or punishment.

When I was notified that the notification in regard to Short was not meant to put pressure on me, I submitted my second letter on the subject.

When the fact that Short and I had submitted requests for retirement was published to the country, I was astounded that the department would put Short and me in such light before the public.

On February 19, I received notification by the Secretary that I would be placed on the Retired list on March 1, 1942. Paragraph 2 of this letter states, "This approval of your request for retirement is without condonation of any offense or prejudice to future disciplinary action."

I do not understand this paragraph unless it is to be published to the country as a promise that I will be disciplined at some future time.

I stand ready at any time to accept the consequences of my acts. I do not wish to embarrass the government in the conduct of the war. I do feel, however, that my crucifixion before the public has about reached the limit. I am in daily receipt of letters from irresponsible people over the country taking me to task and even threatening to kill me. I am not particularly concerned except as it shows the effect on the public of articles published about me.

I feel that the publication of paragraph two of the Secretary's letter of February 16 will further inflame the public and do me a great injustice.

I have kept my mouth shut and propose to continue to do so as long as it is humanly possible.

I regret the losses at Pearl Harbor just as keenly, or perhaps more keenly than any other American citizen. I wish that I had been smarter than I was and able to foresee what happened on December 7. I devoted all my energies to the job and made the dispositions which appeared to me to be called for. I cannot now reproach myself for any lack of effort.

I will not comment on the Report of the Commission, but you probably know what I think of it. I will say in passing that I was not made an interested party or a defendant.

2730 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

All this I have been willing to accept for the good of the country out of my loyalty to the Nation, and to await the judgment of history when all the factors can be published.

But I do think that in all justice the department should do nothing further to inflame the public against me. I am entitled to some consideration even though you may consider I erred grievously.

You must appreciate that the beating I have taken leaves very little that can be added to my burden.

I appreciate your efforts on my behalf and will always value your friendship, which is a precious thing to me.

My kindest regards always.

/s/ H. E. KIMMEL.

LETTER FROM ADMIRAL STARK

Op10-KR

FEBRUARY 21, 1942.

DEAR KIMMEL: A few days ago I thought that you would have something definite before long. I am inclined to think now that this is not the case, and that for the time being at least you will just be continued on leave. I know that from your standpoint this is terribly indefinite, but I believe that if you knew all the cross-currents you would concur with this decision and that it is made with much thought regarding your own interest.

Pending something definite, there is no reason why you should not settle yourself in a quiet nook somewhere and let Old Father Time help this entire situation, which I feel he will—if for no other reason than that he always has.

I would like you to know the remark the Secretary made a day or two ago and that was:

"As for Kimmel, he has conducted himself in an exemplary fashion since this thing happened." And to which I believe the entire Navy would give a hearty "Aye, Aye!"

We realize how tough it is, but again I am counting on you to rise above it and be master of yourself in the future just as you always have been in the past.

Every good wish.

Sincerely,

Admiral H. E. KIMMEL,
Fairmont Hotel, San Francisco, California.

LETTER FROM ADMIRAL STARK

21 FEBRUARY 1942.

DEAR KIMMEL: Unless I am mistaken, you have another landmark in the near offing. May I send you some thoughts which I recall from something I once read and which is in substance:

On this occasion, instead of a wish for a happy birthday, knowing as I do that it will be just as happy as you choose to make it, and instead of wishing you the happiest year just ahead, knowing as I do that the measure of happiness will be exactly commensurate with what you, in your innermost strength, choose to make it; I wish for you, amid the clouds of uncertainty, **COURAGE**—courage that will enable you to think bravely, act wisely, and endure; courage to defend all the virtues and therefore itself, the greatest of them; courage that will steel the arm without clouding the brain; courage that can and will lift both body and mind above their present levels and capacity. Make over your own world. Let your courage be its architect. May God give you strength, wisdom, balance, courage, and hope.

Affectionately,

Rear Admiral H. E. KIMMEL, USN,
c/o Rear Admiral J. W. Greenslade.

1. Reference (A) was submitted after I had been officially informed by the Navy Department that General Short had requested retirement.

2. I was officially informed today by the Navy Department that my notification of General Short's request was not intended to influence my decision to submit a similar request.

3. I desire my request for retirement to stand, subject only to determination by the Department as to what course of action will best serve the interests of the country and the good of the service.

/s/ H. E. Kimmel.
HUSBAND E. KIMMEL.

LETTER FROM ADMIRAL STARK

Op-10 Hu

27 JANUARY 1942.

DEAR KIMMEL: Yesterday Jacobs called up directing Greenslade to continue you on leave.

Our feeling here is that until definite action is taken regarding your future orders, it is better for you not to return to any temporary duty. We also think that it would be well for the two Secretaries to confer before any final action is taken and at the moment Colonel Knox is out of the City and will not be back until Thursday.

I showed the Secretary and the President your splendid letter stating that you were not to be considered and that only the country should be considered.

Marshall informed me yesterday while we were talking over the situation, that Short had submitted a request for retirement. We all thought this information would be of interest to you and Jacobs sent it on to Greenslade. I do not want you in any sense to consider the transmission of this information as request on you by the Department to follow suit. We do not desire to influence your initiative in any way. If and when we have any definite recommendations—suggestions—we will definitely say so.

I do want you to know that we will try and solve the problem on the basis of your letter—"whatever is best for the country"; that is about all I can say.

That you are sitting on a question mark hoping for something definite at the earliest possible moment, we realize and I can assure you you are very much in our thoughts.

Every good wish as always.

Sincerely,

Rear Admiral H. E. KIMMEL, USN,
c/o Rear Admiral John W. Greenslade,
12th Naval District.

P. S. The information about Short is confidential. I do not know what action will be taken on his request.

Copy to Adm. Jacobs.

LETTER FROM ADMIRAL STARK

HRS/hu

29 DECEMBER 1941.

DEAR KIMMEL: Just received your note of 24 December 1941.

You certainly are entitled to a short leave and shall have it.

Don't worry about our finding duty for you. I value your services just as much as I ever did and more and I say this straight from the heart as well as the head.

If there is any way in which I can help you when you arrive here, call on Kit and me at once.

We had a great and wonderful surprise yesterday when Kewpie called up from San Francisco. The head of the concern her husband works for had informed me they were going to close their business out in Honolulu so it was a joy that transportation was made available for them and I have just dropped Admiral Bloch a line telling him of our appreciation.

Every good wish in the wide world as always and with the admonition of the old Irishman who said "if you can't be cheerful, be as cheerful as you can."

Sincerely,

Rear Admiral H. E. KIMMEL, USN,
Fleet Post Office, Pearl Harbor, T. H.

Fort Shafter, T. H., 5 August 1941.

SIG. 676.3 AWS

Subject: Aircraft Warning Facilities for the Hawaiian Department.
To: Commander in Chief, U. S. Pacific Fleet Pearl Harbor, T. H.

1. The Army's Aircraft Warning Facilities for the Hawaiian Department are rapidly approaching completion. Small scale operations is expected in the immediate future. Subsequent to the original setup the AWS has been greatly augmented. The results of this augmentation, however, are not expected to materialize for some months.

2. The Department Air Warning Service Board, consisting of officers from all instrumentalities associated with the Air Defense, has been reactivated and is now constituted as a liaison and advisory council on AWS affairs. Inasmuch as the Navy has shown considerable interest in the AWS and has initiated plans for a similar system of their own, it seems greatly to the interest of both services to have a Naval officer as contact or liaison officer between Army and Navy AWS activities. I believe that in this manner our efforts along these lines will be highly cumulative and that the prospects for future joint Army-Navy cooperation greatly enhanced.

3. Accordingly, your assistance would be appreciated in effecting arrangements whereby an officer from your Headquarters be detailed to serve as liaison officer between your Headquarters and mine.

(S) C. C. BLOCH.

2736 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Secret

12 JUNE 1941.

Rear Admiral C. C. BLOCH, USN,
*Commandant 14th Naval District,
Navy Yard, Pearl Harbor, T. H.*

MY DEAR ADMIRAL BLOCH: As you are doubtless aware, fifteen key enlisted men and one officer of the Signal Company, Aircraft Warning, have recently gone to sea on cruises on board the CALIFORNIA, CHICAGO, CHESTER, and PENSACOLA. While at sea, these men received valuable instruction and experience in the operation of RADAR equipment, preparing them for the operation of similar Army equipment. Upon their return, the personnel receiving instructions were unanimous in expressing their gratitude for the consideration accorded them on these cruises and for the opportunity to become associated with the fleet personnel.

It is anticipated that the Army Aircraft Warning Service will be placed in operation in the near future. Due to the interest expressed by the Navy radio operators in the Army equipment, I will cause arrangements to be effected to afford such naval personnel as you may desire to inspect the Army equipment shortly after it has been placed in operation.

Will you transmit to Admiral Kimmel and to the other Naval Commanders concerned my appreciation for the instructions afforded these men. Both services should reap great benefit in the near future from the security which will be afforded them from the increased efficiency of the Aircraft Warning Service Personnel.

Very sincerely yours,

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

2. Since the visit of Captain Mountbatten, R.N., who gave his views on this subject and the experiences of the British along parallel lines, this and allied matters have been under consideration by: (a) Commander-in-Chief, U. S. Pacific Fleet; (b) Commanding General, Hawaiian Department; (c) Commandant, Fourteenth Naval District.

3. On receipt of reference (a), a paraphrased copy of this dispatch was sent to the Commanding General, Hawaiian Department; his comments in connection therewith are given in reference (b), enclosure (A).

4. The Commander-in-Chief, U.S. Pacific Fleet, accompanied by the Commandant, Fourteenth Naval District, has visited the underground chambers at Aliamanu Crater and had their functions explained in a brief way by the Commanding General, Hawaiian Department. If one or more of these chambers were to be assigned to the Navy, it is not apparent that any real benefit would be derived therefrom.

5. The Commander-in-Chief, U.S. Pacific Fleet, has offices ashore, as has Commander Submarines, Scouting Force. It appears certain that at the outbreak of hostilities, even though the Commander-in-Chief may return to his flagship, Commander Base Force will have to have offices ashore. Accordingly, the Commander-in-Chief has requested that suitable offices be constructed for the Commander-in-Chief, Commander Base Force, and Commander Submarines, Scouting Force. I do not believe that the Commander-in-Chief or the Fleet operations would be benefitted by being in a common office building with the Commanding General and the Commandant, Fourteenth Naval District. As a matter of fact, I am inclined to believe that his best interests would be served by being in a building with only agencies of the Fleet therein.

[2] 6. There has been established in this district a joint harbor control post; this is located at District Headquarters. Here there are provisions for officers of the Coast Artillery, the Army Air Corps, the Fleet Air Detachment, and the Submarine Force, all in addition to the district officers who work in connection with the local defense forces. So far as can be ascertained without actual experience in war, this post fulfills the requirements of the area.

7. In addition to the above, funds are available for and construction will soon be undertaken on a bomb-proof communication center adjacent to District Headquarters. Provision will have to be made in case of air raids for certain features of the harbor control post to occupy this bomb-proof shelter.

8. The Commandant feels that no delay is acceptable in providing for the present needs of the Commander-in-Chief. His needs are real and immediate. What should be done later in connection with a combined operating center can best be determined by actual experience.

(Signed) C. C. BLOCH.

Chief of Naval Operations (by clipper mail).

2738 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[1] Confidential

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 29 October, 1941.

Admiral C. C. BLOCH,
Commandant, 14th Naval District,
Pearl Harbor, T. H.

DEAR ADMIRAL BLOCH: Receipt is acknowledged of your letter of October 21, 1941, file No. C-A16-1/A&N/ND14 (01101), with reference to a combined operating center and command post for Army and Navy functions in this Department.

While I am strongly in favor of combined operating centers for equivalent units of Army and Navy forces, I do not believe that all of the operating centers should be combined into one single building. There are strong strategic and tactical reasons why the various Army functions cannot be located together in the same structure. The different elements have distinct missions, and while it is necessary to establish close liaison and communications between these various Army headquarters, it is equally necessary that they be located in separate command posts for efficiency of individual operation. Also if the various Army headquarters were to be combined in one location, we would be confronted with technical problems involving communications to subordinate elements which would be extremely difficult to solve. From a security standpoint, I do not believe that this combination of Army activities would be advisable; a lucky hit effecting either the structure or communication would have a far greater adverse effect than a similar hit on one of the separate command posts.

The Army already has its command posts under construction and these will be completed in the near future. The Department command post is in the Allamapu Crater, the 18th Bombardment Wing is on the southwest outer slopes of Allamapu, and the Interceptor command post consisting of fighter planes, anti-aircraft artillery and the aircraft warning service, is at Fort Shafter. The command post of the Hawaiian Air Force is also to be located at Fort Shafter. Communications facilities are now available to all these locations, and arrangements can easily be made to expand each into a combined operating center for the equivalent Army and Navy units. All of these structures are being built underground by tunneling methods; this requires a minimum of material. A combined operating center located in the vicinity of Pearl Harbor would probably have to be a cut and cover type of structure and to afford the same protection that we now have in the tunnels, it would have to be very massive. Under present conditions securing the necessary materials would be difficult.

[2] It is therefore suggested that instead of a single operating center, consideration be given to the construction of additional space for Navy units adjacent to the existing command posts of equivalent Army units. This suggestion would mean that the Navy structure for the Commander-in-Chief of the fleet, the Commandant 14th Naval District, and various fleet echelons would be located in the Allamapu Crater, that the command post for Patwing two would be located adjacent to the Army command post for the 18th Wing, and that the Navy fighters could be located adjacent to the Army's Interceptor command post, and that space for the Navy Air Headquarters could be made available either adjacent to the headquarters of the Army Air Force, or with Patwing two.

Very sincerely yours,

/s/ WALTER C. SHORT,
Lieutenant General, U. S. ARMY,
Commanding.

UNITED STATES FLEET
U. S. S. PENNSYLVANIA, Flagship

My
PEARL HARBOR, T. H.

1st Endorsement on Com-14 C-A16-1 A&N/ND14 (01171) dated Nov. 3, 1941

From: Commander-in-Chief, United States Pacific Fleet.

To: The Chief of Naval Operations.

Subject: Combined Operating Center for Army and Navy.

1. The Commander-in-Chief, U. S. Pacific Fleet has given careful consideration to the question of a combined operating center for the Army and Navy in Hawaii. On its face, the proposition sounds attractive, but unless it can be shown that the advantages of such an establishment outweigh the disadvantages, its creation is not only unjustified, but may be undesirable.

2. The conditions likely to exist on Oahu, in the event of war, are definitely different from those prevailing in Europe and which dictated the establishment of the combined headquarters and operating centers in Great Britain. Sustained attack of any kind is unlikely. The mission of the Army and the Fleet are considerably different—the operation of one being defensive and local while the operations of the other are offensive and far flung. Strategic, rather than tactical cooperation, is indicated and therefore the necessity for rapid receipt and exchange of information and arrival at quick decisions is of less importance.

3. On the other hand, there are manifest disadvantages, among which are the following:

(a) A combined operating center would not relieve the necessity for local centers for individual forces and its communication system would be very complex. This complexity might well complicate, rather than simplify, the flow of orders and information.

(b) It might well result in over centralization for large scale operations and thus tend to deprive subordinates of necessary initiative.

(c) It would result in loss of contact, by virtue of physical separation from subordinate commanders, with those commanders and their activities. A location suitable for the Army is not suitable for the Navy and vice versa.

(d) There would be serious consequences if such a center or its communication system were damaged or destroyed.

(e) It would tie the respective commanders to an immobile post—with the post necessarily in an inactive area.

(f) It would have at least a psychological tendency to divert Fleet units to defensive tasks.

4. The above considerations primarily apply to a combined operating center for the Army and the Fleet. They are applicable, also, but in less degree, to the Army and the Commandant, Fourteenth Naval District. Undoubtedly, there is need for close cooperation and liaison between those commanders, much of which is now provided for in current plans. The Harbor Command Post provides for liaison and joint control of shipping, identification of vessels, fire of coast artillery and related questions. Offensive air operates under unity of command by the Navy. Defensive air operates under unity of command by the Army. Command posts are in existence for the control of these operations and, as pointed out by General Short, it is very doubtful that a central command, superimposed on these separate and local command posts, would add much to cooperation. Nor would the disadvantages enumerated above be much reduced.

5. In view of the above, the Commander-in-Chief, U. S. Pacific Fleet, is of the opinion that the establishment of a combined operating center for the Army and Navy in Hawaii is not only unnecessary, but definitely undesirable. The recommendation of the Commandant, Fourteenth Naval District, in paragraph (1) is concurred in and it is further recommended that the construction of the building for the Commander-in-Chief, U. S. Pacific Fleet, Commander Submarines Scouting Force, and Commander Base Force be proceeded with without further delay.

(Signed) H. E. KIMMEL.

SECOND MEMORANDUM ENDORSEMENT

From: The Director, Radio Liaison Division.
To: The Director, Naval Districts Division.
Subject: Combined Operating Center for Army and Navy.

1. Forwarded.

2. Due to the many and complex facilities under the organization responsible for defense in any given land area bordering the ocean, the most perfect set-up for command is one in which the supreme command is exercised by one officer best equipped of any for the task, in direct and immediate touch with his staff, comprising intelligence, plans, operations, and communications.

3. Because our defense is under two officers, Army and Navy, we must try and arrange matters so that where component parts of the commands are interwoven these two can function as nearly as possible as one. If the duties of the Commanders beyond command and operation duties, i. e., training duties, materiel duties, and command of local units of their respective over-all commands, will interfere with the most efficient exercise of their primary duty, which is their higher duty in command of the over-all command, then the higher command should be relieved of detail duties (except for inspection for over-all efficiency) of the lower commands under him, and additional subordinate officers should be ordered to assume these duties. The two higher commands of the two services will then be free to choose together the joint operating center, with their respective staffs, without regard to the lower command duties.

4. Without opportunity for consultation and evaluation of the same information, it is not possible for two widely separated staffs to prepare efficiently decisions on complex matters of immediate urgency for the two opposite service commanders as well as if they have immediate access to one another. This is indisputable. Therefore, it should be accepted, and everything within reason subordinated to that principle, as the most efficient high command possible is necessary.

5. In other words, if the duties of the Commandant at Pearl Harbor and the Commanding General at Fort Shafter, in Hawaii, are such that their local duties make it essential that they remain at the Navy Yard and with the troops, respectively, my answer is that there should be additional officers assigned specifically for the supreme command in Hawaii, and staff officers for Plans, Operations, Intelligence, and Communications transferred to these officers, and that a protected location for their offices be provided. Certainly the importance of the broader duties is such that their efficiency should not be confused due to the local duties and routine.

(Signed) S. L. HOOPER.

(c) CNO and Chief of Staff's joint letter quoted in CNO confidential file Op-22-A2 (SC) A16-3 (9), Serial 0115422 of October 23, 1941, subject: "Joint Army and Navy Training" and in AG 354.2 (10-3-41) dated October 17, 1941, subject: "Joint Army and Navy Training".

(d) CNO despatch 182010 of December 1941.

(e) Adjutant General's message AG 370.26 of December 19, 1941.

1. Operations during the present war have demonstrated the value of close personal contact of the commanders of Army, Navy, and Air Forces engaged in a given theater of war. In nearly all cases the combatant forces which have had such close personal contact or complete unity of command have been successful.

2. Present Instructions for Joint Action of the Army and Navy, reference (a), provide for Joint Action of the Army and Navy, reference (a), provide for mutual cooperation of the Army and Navy at all times, and for unity of command in certain contingencies by joint agreement or when directed by the President. Instructions regarding joint planning are contained in references (a), (b), and (c).

[2] 3. The ideal method of obtaining close personal contact between Army, Navy, and Air Force commanders on shore is through the use of a joint operations center for each Frontier and subdivision of the Frontier. Commendable progress in approaching this ideal has been made in the North Atlantic Coastal Frontier, where a "Joint Operations Office" has been established, and in various Coastal Frontiers where joint Harbor Entrance Control Posts have been placed in operation. A layout plan showing one of these centers is enclosed for your information.

4. The recent joint directive of the Chief of Naval Operations and Chief of Staff, reference (c), provided for a joint training program in the Coastal Frontiers. Actual joint operations, as required by this directive, were expected to indicate existing deficiencies of joint organization and planning and to point the way towards improvement in joint military efficiency.

5. The establishment of Joint Operations Centers in Coastal Frontiers, sectors, and sub-sectors where joint operations are being carried on or are likely to be carried on has been directed by references (d) and (c). Early completion of these operations centers is desired.

(S) G. C. MARSHALL,
Chief of Staff.

Commander, Pacific Northern Naval Coastal Frontier.

Commander, Hawaiian Naval Coastal Frontier.

Commander, Philippine Naval Coastal Frontier.

"Subject: Joint Army and Navy Training

[2] Reference: (a) Joint Action of the Army and the Navy, 1935 (FTP-155).

"1. There is need for frequent and closely coordinated joint training of army field forces and naval operating forces, to the greatest extent compatible with other urgent preparations for war.

"2. Due to the employment of the U. S. FLEET and the training program of the major portion of Army forces, the scheduling of Grand Joint Exercises is not practicable at this time.

"3. Consideration is now being given to joint training for overseas expeditions employing elements of the Third Division, U. S. Army, and the Second Division, U. S. Marine Corps; and employing elements of the First Division, U. S. Army, and First Division, U. S. Marine Corps, in Puerto Rico. Similar joint training for other units of the Army will be initiated by the War and the Navy Departments, as the situation permits. In general, such training will be accomplished by the assembly of a Task Force.

"4. A large field for joint training exists in the coordinate operations required between the Army and the Navy in Coastal Frontiers. Such operations might involve:

"(a) Joint air defense operations, both for attack and defense, including operations of antiaircraft, barrage balloon, and aircraft warning units.

"(b) Joint signal communications, between Army and Navy forces, including ground, sea, and air.

"(c) The operation of harbor entrance control posts and inshore patrol, and the coordinated functioning of personnel in defense of the harbor. The cooperation of the Coast Guard and other government agencies may be obtained.

"(d) The operation of internal security measures in Army and Navy posts and stations; exercises in passive defense measures for the prevention of damage by hostile action or sabotage to Army and Navy defense installations; [3] and liaison with Civilian Defense agencies.

2746 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"5. The preparation of Joint Coastal Frontier Defense Plans (and their subsidiary plans) is a necessary preliminary to coordinated operations of ground, sea and air forces required in defense of the Coastal Frontiers. Based upon these plans, and closely paralleling actual operations which are likely to occur and in anticipation of which the plans are drawn, joint training exercises shall be held at frequent intervals with special emphasis on joint communications. To provide for the use of mobile air forces, and other defensive measures provided by the Army Air Forces, situations should be assumed in the training exercises, where necessary, which place them in a higher category of defense than that prescribed in the joint color plan. Provisions shall be made to alternate command in the exercise of unity of command, and also for the conduct of the exercises under the principle of mutual cooperation.

"6. Naval Coastal Frontier Commanders, Army Air Force Commanders in the continental United States, and Army Defense or Department Commanders shall undertake coordinated operations monthly, if practicable, and at least bi-monthly. It is recommended that staff problems requiring coordinated action be conducted at least weekly and that continuous training of joint signal communication personnel be conducted. Where the use of mobile air forces and other defensive measures are required, joint training shall be undertaken to the greatest extent compatible with other urgent preparations for war.

"7. It is desired that:

"(a) Commanders concerned prepare promptly Joint Coastal Frontier, Joint Sector, and Joint Subsector Defense Plans, based on the directives contained in Joint Army and Navy Basic War Plan—RAINBOW No. 5, and in accordance with Army and Navy Operations Plans as issued.

"(b) In accordance with the conditions in paragraphs 5 and 6 of this letter, the Commanders of the Naval Coastal Frontiers, Commanding Generals of the Army Air Forces in the continental United States, and Commanding Generals of [4] the Defense Commands and Departments initiate a program of minor joint exercises.

"(c) Copies of these programs be furnished the Chief of Naval Operations and the Chief of Staff of the Army, as soon as prepared.

"(d) Reports of exercises be submitted in accordance with paragraph 119.b., Chapter VII, Section II of reference (a).

stallations; and liaison with Civilian Defense agencies.

"5. The preparation of Joint Coastal Frontier Defense Plans (and their subsidiary plans) is a necessary preliminary to coordinated operations of ground, sea and air forces required in defense of the Coastal Frontiers. Based upon these plans, and closely paralleling actual operations which are [3] likely to occur and in anticipation of which the plans are drawn, joint training exercises shall be held at frequent intervals with special emphasis on joint communications. To provide for the use of mobile air forces, and other defensive measures provided by the Army Air Forces, situations should be assumed in the training exercises, where necessary, which place them in a higher category of defense than that prescribed in the joint color plan. Provisions shall be made to alternate command in the exercise of unity of command, and also for the conduct of the exercises under the principle of mutual cooperation.

"6. Naval Coastal Frontier Commanders, Army Air Force Commanders in the continental United States, and Army Defense or Department Commanders shall undertake coordinated operations monthly, if practicable, and at least bi-monthly. It is recommended that staff problems requiring coordinated action be conducted at least weekly and that continuous training of joint signal communication personnel be conducted. Where the use of mobile air forces and other defensive measures are required, joint training shall be undertaken to the greatest extent compatible with other urgent preparations for war.

"7. It is desired that:

"(a) Commanders concerned prepare promptly Joint Coastal Frontier, Joint Sector, and Joint Subsector Defense Plans, based on the directives contained in Joint Army and Navy Basic War Plan—RAINBOW No. 5*, and in accordance with Army and Navy Operations Plans as issued.

"(b) In accordance with the conditions in paragraphs 5 and 6 of this letter, the Commanders of the Naval Coastal Frontiers, Commanding Generals of the Army Air Forces in the continental United States, and Commanding Generals of the Defense Commands and Departments initiate a program of minor joint exercises.

"(c) Copies of these programs be furnished the Chief of Naval Operations and the Chief of Staff of the Army, as soon as prepared.

"(d) Reports of exercises be submitted in accordance with paragraph 119.b., Chapter VII, Section II of reference (a).

/s/ H. R. STARK,
Chief of Naval Operations.

/s/ G. C. MARSHALL,
Chief of Staff."

[4] * Sufficient information to carry out this directive is contained in WPD WDOP-R5-41 and WPD WDCP-R5-41. However, Joint Basic War Plan Rainbow No. 5 is undergoing revision and a copy will be sent to you in the near future.

By order of the Secretary of War:

/s/ E. S. ADAMS,
Major General
The Adjutant General.

Copies furnished:

The Chief of Coast Artillery;
The Chief Signal Officer;
The Divisions of the War Department General Staff;
The Chief of Naval Operations.

EXHIBIT NO. 124

SECRET

From: Washington (Memora)
To: Tokyo
August 18, 1941
Purple (GA)

4700 (Part 1 of 8)

At half past four the afternoon of the 18th, I had a private and secret interview with the President (the Secretary of State was present). The President, opening his remarks by saying that he had spent some few days enjoying life at sea, remarked that sailing was fine, and little fog had been encountered to mar the pleasure of the voyage. He went on to say that he sailed on his yacht, transferred to a warship, and then kept a rendezvous at a point off the Maine coast. Then, speaking as though there were many advocates of war, he took up the business of the interview and, holding notes in his hand, he said, "The Secretary of State, you, and I are continuing our efforts to bring about peace in the Pacific, but no one else is." I said, "There are many among the third powers who desire war in the Pacific." He affirmed this, and continued by saying, "The United States, Britain, and probably the Soviet too, hope for peace in the Pacific. But there are not many others who desire it."

(Part 2 of 5)

After joking about "our German friend" who maintains no warships in the Pacific, the President said, "Neither you, the Secretary of State, nor I, have come up through the diplomatic ranks and, therefore, do not observe diplomatic conventions. What we have here is not in the form of a diplomatic document, nor is it in the form of an aide memoire but is merely what we want to say." Having said this, he read in a clear-cut, spirited manner the material which I incorporated into my #707^a and then said, "I have no desire to put these things in writing." Yet he seemed to be of the opinion that it should be expressed in writing.

I expressed myself on the following points:

ITEM - The Japanese Government is sincere in its desire to bring about an adjustment of Japan-American diplomatic relations.

ITEM - The Japanese Government would like to be advised as to the possibility of arranging an interview with Prince KONO.

ITEM - The Japanese Government would like to be advised as to the possibility of informal conversations being realized in the near future along lines of conversations of the past few months.

ITEM - The Japanese Government, having already expressed its various opinions with regard to the French Indo-China question to the Secretary of State, feels that no additional explanations are necessary.

ITEM - The Japanese Government wishes to advise that Prince KONO is willing for an exchange of opinions along general lines from the viewpoint of world peace.

ITEM - The Japanese Government has every expectation that the finest statesmanship will be exercised by the United States Government. The Japanese Government will reciprocate in like manner.

I went on to say: "We have every confidence in your exemplary statesmanship and your ability to settle matters." The President listened closely to my remarks. Holding the Memoire outlined in my #708^b in his hand, he said: "Geographically speaking, it is impossible for me to go to

The President said: "The Japanese Prime Minister has (never?) been either to (this city?) nor to Seattle. How about Juneau? (It seems to me that he was once in Alaska (visiting?) Sitka^b, though I am not sure.) How many days would it take from Japan?"

I replied: "About ten days. I believe."

"How about the middle of (?)?"

I replied: "I think it would be all right up until about that time."

Then he continued by saying: "For these reasons I have made a few changes in this paper." He then explained that it is merely for geographical reasons that he had stricken out the word "President" from the original text in which it was stated that the President himself would be present, and he read the paper to me. He added the remark: "It is not that I welcome the 'closed door' such as we have today, but, since we have been forced to it by Japan's actions, there is only one country that can open the door. This time it's Japan's turn." He changed his subject to that of French Indo China, stating that an official representing the Secretary of State was -----.

The President from beginning to end maintained an extremely tasteful attitude and received me with kindness. (I got the impression that he was undoubtedly thrilled at the reception given by the British people to the joint British-American peace terms which he had succeeded in getting from CHURCHILL in his conversations with him during the past few days. (Unlike the independent declaration by the American Government in Wilson's Fourteen Points, this time, because of the insistence of the United States, joint peace terms by England and America were achieved.) In addition, some 14 or 15 days of life at sea, which he likes so well, have left him in the best of spirits.) Furthermore, the Secretary of State when we parted asked me to call any time that I so desired. The China question, being a separate problem, was not referred to at all in our conversations today.

During the course of our conversations, the President casually mentioned by name Postmaster General WALKER as being ardently endeavoring to bring about Japanese-American good will and, with regard to the early realization of the suggested interview, it seems that he had spoken in its favor.

With regard to our conversations of this day, I shall make a full report of my humble opinions separately.

#719 (in 2 parts, complete).

The fact that upon his return to the capital on Sunday, the President wished to see me before any other person, with the exception of the Secretary of State with whom he talked for several hours, clearly indicates the graveness with which he views Japanese-U.S. relations. It is apparent that the note contained in my message #707* was prepared in advance of the President's return. I have already reported that while reading the note, the President interrupted himself on several occasions to make minor and major comments thereon.

The note with I relayed to you as my message #708**, on the other hand, seemed to contain much that was the President's own attitude and opinion. From that, it seems as if the President was inclined to be in favor of our proposal on certain conditions.

However, when I said that the latter depended entirely on the President's statesmanship, he replied that the United States was not in favor of the "closed door" and that it was Japan's turn to figure out ways and means of opening it.

The impression I got throughout my talks with him was that he harbored other desires. There is no room for doubt, however, that the President hopes that matters will take a turn for the better.

According to recent comments in the newspapers, the President is fearful of the dangers of the United States being drawn into a war in the Far East. Apparently, he believes that there is a 50-50 chance that Japan will attempt further aggression.

It is true that by our proposing that talks be held between the leaders of the two countries, the attitude of the U.S. Government has been considerably eased. However, it is of the utmost importance that this matter be kept strictly secret for if it should once leak out, attempts will be made from every direction to destroy the project. I feel above all else that it is essential that a strict secrecy be maintained in Japan, also.

We, too, are giving this matter our careful attention and study, and should we stumble on to some good

(Part 1 of 2)

During my conversation with a member of the Cabinet, he remarked, "The President has a broad-minded view of the world and is not anti-Japanese. In his past speeches and in his recent statement he has never referred to Japan. As soon as he returned to Washington he had the Secretary of State take up the question of the proposed Japanese-American conference and replied to you. This is an unprecedented thing and it seems that Japan should reciprocate in a like manner." So I replied by saying that it was with a strong resolution that the Japanese Government had come thus far in dealing with this question; whereupon the Cabinet member replied, "It is equally true in the case of the President. Above all, even if there is no real justification for it, the country is replete with anti-Japanese sentiment."

#723. Part 1 of 2.

It seems that the President believes that he could meet with Premier KONOYE depending on circumstances (my #722^A). It is not hard to imagine that he is also of the opinion that he would like to take this matter out of the hands of the authorities and settle it himself because of the general situation. It may be said that the President had made this proposal so that he could make his last political stroke at this moment when Japanese-American feelings are at their worst. It is well for Japan to respond in a like generous spirit to this move on the part of the President. It would be well also to leave the decisions of the concrete points until some future date - - - - - and show that there is nothing that would conflict with - - - - - and I think it is imperative that we thus bring about the resumption of the informal negotiations which have been disrupted.

From this standpoint, I am submitting a proposal we have drawn up (- - - #724^A). There may be points in it that need to be dealt with more in detail. Should I think of any points that should be added I will wire them later. This

#723. Part 2 of 2.

It explains the immutable policy of our government based on the important statements by Prime Minister KONOYE and Ministers HIRANUMA, ARITA and MATSUOKA and attempts to correct misunderstandings regarding this policy. I believe that since it is limited to those points included in the American proposal, it would be accepted as a sufficient statement and is within the possibility of the United States giving it careful consideration. Of course, it is not wise to refer to those points which the President had not taken up. This is only a convenient method for opening Japanese-American negotiations and is not of a nature that could be proclaimed to the world as Japan's national policy.

I would like to have this proposal considered by the Foreign Office bearing in mind the points I have mentioned above. If the Japanese Government is determined to adjust Japanese-American relations, this is the time. Losing this opportunity, there will be no other that we can take. If the meeting is to take place about the middle of September, as the President has suggested, there is left for preliminary negotiations less than two months, in fact a little more than a month. Besides, if the meeting is really to take place, it would be necessary to

Strictly confidential.

Reference is made to the communication conveyed, on August 17th, 1941, to the Japanese Ambassador by the Secretary of State and the President of the United States.

The Government of the United States mentions certain circumstances and measures considered as favorable to a peaceful settlement in the Pacific area. In an atmosphere of world crisis and international tension, it is difficult to ascertain whether an event is a cause or a consequence.

Accordingly, not unlike the press in Japan, much news and editorial comment in the United States has forecasted the long and hard struggle for the outcome of American-British policy in the Far East. Appropriate indications have been made by the press to indicate how, with the assistance of Russia, Japan would be deprived of natural resources and eventually expelled from the Asia region. Meanwhile, the United States had to suppress its sources which could be interpreted in Japan as indicative of a continuing policy entirely at variance with our then current Asiatic conversations.

1724. (Part 2 of 7)

The Government of the United States considers that certain of its actions vis-a-vis Japan have been only counter-measures to policies and procedures prejudicial to American interests and principles. On the other hand, the Government of Japan considers that its own actions have been dictated by considerations responsive to hazards, circumstantial and political, affecting the national sufficiency and protection of Japan.

It is quite conceivable that both Governments are right.

With admirable modesty of mind, the Government of the United States has seemed, frequently, unaware that the words of policy are weighted with the immense power of America's natural endowment and potential might. The President of the United States, and the Secretary of State, in their own unquestioning adherence to the way of peaceful procedures, might find it difficult to believe that other nationals, anywhere, could consider themselves threatened by the United States.

Yet, so long as they lack that assumption of possible threat (so convincingly eliminated from South America by the good neighbor policy) there will be some, geographically less well endowed and, by nature, poor in essential resources, who will feel compelled to consider defensively their relations with the United States.

(Part 3 of 7)

It is not, therefore, surprising that temporary measures taken by the Government of Japan for the protection of its own equitable and necessary supply of living commodities, should be interpreted, though never so intended nor operated, prejudicial to the procurement by the United States of essential raw materials.

Equally, it is not surprising that, lacking such guarantees as are mentioned in the communication of August 17th, and in default of a consummated understanding with the United States, the Government of Japan felt compelled by current conditions to take certain measures of precautionary defense.

Accordingly, the Government of Japan appreciates that, having indicated difficulties, the Government of the United States now encourages an exchange of basic policies and attitudes as the foundation of an understanding that will condition lasting and extensive peace in the Pacific area.

For such peace, the Government of Japan is ready for such a united effort toward a peaceful settlement covering the entire Pacific situation. The Government of Japan would be proud to make sacrifices.

724 (To be handled in government code.) Part 4 of 7.

The government of Japan, with lively appreciation, endorses as its own, without qualification, the recent "program attainable by peaceful methods". As outlined in the communication of August 17, 1941, the program is such as has long been desired and sought by Japan.

The government of Japan desires, for itself and all others, the application in the entire Pacific area of the principle of equality of commercial opportunity and treatment. The government of Japan desires to make possible for itself and all countries, access to raw materials and to all of her essential commodities. The government of Japan desires cooperation by all nations of the Pacific, on a voluntary and peaceful basis, for the utilization of available resources of capital, technical skillfull, and progressive economic leadership for the purpose of building up not only their own but also the economy of regions where the productive and distributive capacities can be improved, in such manner that for the nations and peoples concerned, purchasing power will be increased, living standards raised and conditions conducive to peace will be created.

Purple (English text)

#724

(Part 5 of 7)

(To be handled in Government Code)

If such a program, based upon peaceful and constructive principles, is adopted for the Pacific and if, thereafter, any of the countries or areas in the Pacific were menaced, the Government of Japan would cooperate with the other nations in extending assistance to any nation so threatened. The Government of Japan believes that such a program if faithfully carried out, with the consideration for the relative conditions of the various nations, would preclude the extension, by any one country, of political or military control to attain economic right of a definitely monopolistic or preferential character. In those cases where the production and distribution of essential commodities are vested in monopolies, it is expected that the Government of the United States will use its great influence to see that all countries are given fair and guaranteed share of the distribution of the products of such monopolies, and at a fair price.

Moreover, the Government of Japan rejects any intention of territorial aggrandizement or exploitation of other peoples. It desires the orderly establishment of effective, responsible, independent sovereignty in a united China. It desires the political inviolability of all Pacific nations.

#724. To be handled in Government Code.

(Part 6 of 7)

The Government of Japan does not desire, unless forced thereto by political or economic aggression, that the East Asian region should be cut away from a world economy of equitable and peaceful processes, but it does desire that the principle of non-discrimination should be operative and exercised by other nations, no less than by Japan, for both citizenry and commerce. The Government of Japan has sought to express, in its international procedures, the cultural and ethical ideals of peace and harmony which are part of Japanese national culture. Japan participated in the League of Nations and cooperated in various disarmament conferences. But multiple events of world turmoil — of discrimination — of boycott and barriers — of personal indignities and attack, motivated the Governments, responsible for the welfare of the Japanese people, to take certain counter measures which they would have preferred to avoid. Some of these measures, whether faction or alliance, were interpreted as aggressive.

The Government of Japan has no intention and no alliance and no policy of aggression. The Government of Japan conceives its people as members of the family of nations, each of whom ought to live, and let live, under the common bond of brotherhood and just tolerance.

#724

(Part 7 of 7)

We consider that the natural position and circumstances of Japan and her people is not incomparable to that of Britain; and the deprivation of economic opportunity by boycott and discrimination are measures against which, not less than against military attack, the precepts of national security and honor require resistance. It is this policy of resistance, extended to armed conflict, that has been interpreted by some as aggressive.

But, the Government of Japan prefers a policy of cooperation and desires to sincerely respond to the cordial, penetrating proposals of the President of the United States and the Secretary of State by the rapid conclusion of our informally negotiated, and almost completed, understanding. The meeting of the responsible head of our respective Governments would confirm and give such sanction to our purposes that peace in the Pacific would be insisted with the date of that meeting.

It is with great good will that the Government of Japan anticipates the complete resumption of the historic friendship with the United States.

- - - (Preamble and first couple of lines missed).

- - - in view of this request (the said Ambassador notified me, also, on the 15th), I had the various circles concerned make investigations, I said. I went on to say that we are trying to dispose of the matter in accordance with the desires expressed by the United States and that I was certain that I would be able to submit a reply to him at an early opportunity.

Then, on condition that he keep it strictly confidential and "off the record" I talked to him for over two hours concerning the matter contained in my message #452. I pointed out to him, in accordance with the lines contained in my previous messages, the absolute necessity of displaying some real statesmanship if we are to surmount the crisis which now confronts us.

So saying, I strongly urged that the proposed talks take place. I added that since he had worked so tirelessly during the past nine years in behalf of Japanese-U.S. friendship, I was counting on his services in the promotion of these talks.

The above is for your information.

JD-1: 4380. Mr. Nomura is directed to feel out the attitude of U.S. officials on arranging a meeting between Pres. Roosevelt and Premier Prince Kono for a friendly discussion of steps that may be taken for conclusion of an "understanding" to guarantee peace in the Pacific.

JD-1:

 (Purple-GA)

#725

According to reports along the lines of those contained in my #722*, there are indications that the President himself is becoming seriously interested in participating in the resumption of the negotiations to revise Japanese-U.S. relations. It is even said that the latter half of the note which I sent to you as my message #708**, was composed by the President himself. I have also heard that he expects to have me hand our reply to that note directly to him. For these reasons, I believe that it would be well if we omitted all of the involved and complicated points in the composition of our reply and instead have it in the most simple and direct phraseology as possible. In my opinion, I think it would be to our interest if we omitted expressions like "continuance of encirclement" as it appears in section three of my message #724***. Other corrections which I would make would include the changing of the phrase "of discrimination, of boycott, and barriers, of personal intorrities and attack" as it appears in section 18, to, simply, "circumstances in the recent past". I also feel that it is essential that we point out the fact that we place much emphasis on the point concerning the guaranteeing of the safety of the Far East.

*JD-1: 4695. Nomura reports the gist of a conversation with a Cabinet member in which he is told of President Roosevelt's interest in the proposed conference (with Monrovia) and of his (the Cabinet member's) hope for its success.

**JD-1: 4696. Text of memorandum handed to Mr. Nomura by the President.

***JD-1: 4735. Text of Mr. Nomura's (proposed) reply to the President's note.

 23 August 1941
 (Purple-CA)

#495

(Strictly Confidential)

According to newspaper reports, it is alleged that a British-U.S.-Soviet conference will be held early in September. This comes at the same time as the reports that the United States is shipping goods to aid the Soviet Union, which in many respects confirms the already existing rumors of "encirclement". Under these circumstances, if the proposed talks between the leaders of Japan and the United States comes subsequent to the above referred to tripartite conference, the general impression would be that Japan had given in in the face of the threat of "encirclement".

We are, therefore, doing everything in our power to rush our reply to the United States and at the same time to bring about the "leaders conference" at an earlier date. Under these circumstances, will you please exert as much effort as possible to accomplish this. At the same time will you please draw the United States' attention again to the matter contained in the last part of my message #487.*

*JD-1: 4694. Tokyo's intentions regarding her northern policy are outlined to Amb. Nomura for his information, with the request that should the U.S. question the increase of Jap troops in the North, it should be explained as a precautionary measure taken to offset dangers that might arise from a Soviet defeat and subsequent political confusion in Eastern Russia. Also, that should the U.S. ship vital materials to Russia via Japanese coastal waters, it would provoke the feelings of the Japanese people and have an unfavorable effect on the question of readjusting U.S.-Japanese relations.

#502 (Part 1 of 2) (To be handled in Government Code)

I am very much pleased to learn from the document which you handed to Ambassador NOMURA on August 17 that you are in agreement with the idea contained in our proposal regarding holding a meeting between you and me.

Today, when the whole world is in confusion, for the two countries of Japan and the United States, who hold the key to world peace, to drift as we are drifting toward the worst of relations, not only is an unfortunate thing in itself but also means the downfall of world civilization. The reason for Japan being so concerned over the question of peace in the Pacific lies in no other than her desire not only to improve the relations between Japan and the United States, but also to contribute to the realization of world peace through the opportunity which such improved relations would afford.

It seems to me the reason that Japanese-American relations have come to be so bad as they are today is to be found largely in the fact that the governments of the two countries have been lacking in mutual understanding and have repeatedly doubted and misconstrued each other's intentions. It seems also to have been due to machinations on the part of third-power countries. Unless we begin with the elimination of such causes, we cannot by any means hope that the relations between the two countries could be adjusted. Herein lies the reason for my proposing that I meet you face to face for the purpose of frankly exchanging our views.

however, the method upon which we have hitherto been replying; namely, the method of informal negotiations, which was disrupted in July—though it may have been, on the whole, appropriate in consideration of the attitude then taken and of the matters discussed—even if continued from now on with a view of having the leaders of the two governments later giving recognition to the matters discussed, is not a suitable method under the present circumstances in which rapid changes are taking place and the possibility of an unfortunate condition arising is unforeseeable. I believe the need of the moment is for the leaders of the two countries to meet face to face and to discuss whether there is any possibility of saving the present situation by studying together with a proper perspective the important questions which affect the whole area of the Pacific Ocean lying between the two countries, and to do this without being bound by the customary method of negotiations. It would be all right to have the details settled by those officials specializing in such matters according as the necessity arises after the leaders have conferred on them.

This is the idea underlying my proposal. It is my earnest wish that you would accept this proposal in an understanding spirit and reciprocate. The situation being such as explained above, I am eagerly

Japan (Part 1 of 2) (To be handled in Unprocessed Code)

The Imperial Government has received the communication which was given to the Japanese Ambassador in Washington on August 17, 1941, and sets forth the viewpoint as follows:

The Government of the United States, claiming that the position and actions which Japan took in French Indo-China have departed far from the basis upon which the conference leading to an armistice by peaceful means of problems affecting the Pacific area should be conducted, claims that the Japanese Government would abandon its major economic activities, adjust its attitude, and work toward the program of peace in the Pacific, in accordance with the principles outlined in the program which the United States upholds. At the same time, the United States Government claims that the Japanese Government would not with a change of heart take those actions admitted regarding Japan's present position and plans. Furthermore, the United States Government has emphatically stated the fact that it will react at once to any method of Japan whereby should Japan take any further steps in line with the policy of militarily dominating Japan's neighboring countries by direct or indirect means which are in the nature of a threat to Japan.

(Note: In displaying this communication,)

(PSS (Part 2 of 2) (Do not handle in Government code.)

The Government of Japan cannot help but feel deeply regrettable that despite Japan's past pledges and her repeated explanations concerning her activities and measures toward other countries, the United States Government is still harboring misunderstanding and fear. The Government of the United States refers to certain situations and measures which it considers harmful to the peaceful settlement of problems affecting the Pacific area and does so on the basis solely of the fundamental conception to which it has pledged itself. However, in such a world crisis as we face today and in such an atmosphere of international confusion, it is exceedingly difficult to judge whether a certain incident is the cause or the result. It is, furthermore, dangerous to base that judgment exclusively upon certain political facts only. The Government of Japan cannot but point out how harmful such a judgment is to lasting peace.

When a country's natural and peaceful programs is interfered with or when its right of existence is threatened from without, for that country to take measures to cope with the threat or to resort to armaments for its defense not only is unavoidable, but also must be said to be a most natural thing from the standpoint of maintaining peace. Therefore, before criticizing such counter-measures or defensive measures, to ascertain the cause and to correct the situation must be regarded as the greatest factor for a speedy establishment of peace.

(Part 2 of 7)

We shall not consider at this time those things which have happened in the far past. However, if the matter is regarded in the light of recent incidents, we find that many newspaper articles and editorials in the United States have predicted that a British-American joint policy in the Far East would result in a threat to Japan and have hinted the formation of an anti-Japanese front by Britain, the United States, and the Netherlands Indies. In the meantime, in conflict with the friendly conversations that were taking place at the time between Japan and the United States, the United States Government has expressed its intention of applying a continuous and unfriendly policy of pressure and has taken measures which might deprive Japan of the opportunity of obtaining the natural resources necessary to Japan. Although the United States considered some measures as having been taken in opposition to Japan's policy and activities which the United States considered as harmful to her rights and to the principles she upheld, on the other hand, the Japanese Government believed that her action was governed by certain measures which she had taken to cope with circumstantial and political obstacles which affected her national requirements or self-sufficiency and defense.

It should not be forgotten, then, as pointed out, that the government of any country considers as just proved to be readily the reports which regarded by another country, and that is often enough to be a cause for suspicion as well. Looking back upon past incidents, we have found some evidence which the United States Government was

SECRET

Dept. State
Wash. D.C.
August 20, 1941
Fuzhou

4485 (Part 4 of 5) (To be handled in Government code.)

Because of the fact that the President of the United States and the Secretary of State have a firm conviction to peaceful aims, it cannot be too difficult for them to believe that the people in other countries should feel that they are threatened by the United States. It should be clearly borne in mind that as long as this threat is not lightened, the people in the countries which are less directly attacked than the United States (especially because of the strategy of resources) cannot help but regard their relations with the United States in a defensive way. Japan believes that in everything peaceful happiness can be obtained only by really understanding the position and the circumstances which affect the others, rather than by anticipating the individual acts of the others. From this standpoint, the Government of Japan is pleased with the fact that the United States encourages the exchange of opinions regarding the policy and attitude which result from the basis of the understanding which is essential to a lasting and broad peace in the Pacific area.

(Part 5 of 7)

The steps which Japan has taken for the joint defense of French Indo-China, as stated repeatedly in the past, and for their purpose lessening of the nobility of the China incident which originated from the threat against Japan's right of existence. They constituted also a policy which became, for reasons of self-defense, inevitable for the purpose of maintaining peace in the Pacific by coping with various threats which tended to disrupt that peace, and thereby to achieve an equitable supply of materials which were essential to the country. It was not the nature of merely making a threat. Therefore, should the China incident be settled or should a just peace be established in the Far East, the Government of Japan, as you already know, is willing to withdraw its troops immediately from French Indo-China. In order that every bit of possible doubt may be wiped out, the Government of Japan reiterates here the statement it has repeated in the past—that her steps with regard to the joint defense of French Indo-China were not taken with the intention of making that area a basis from which to advance by force into the neighboring areas. From the statements made above, we believe that Japan's attitude toward Manchuria is self-evident. Also, as regards Japanese-Chinese relations, the Japanese Government is to state clearly here that on August 26, 1941, the Japanese Government respects the terms of the Sino-Japanese anti-communist agreement and refrains from taking actions which are a threat to Japan and Manchuria or are in contravention to the spirit of this agreement. Japan will not resort to

ARMY

21478

Page 10
SECRET

SECRET

military action against that country. It is, therefore, an earnest desire on the part of the Japanese Government that the United States Government refrain from any action that would instill fear in the Japanese, or any nation of the people in those countries which might fear a threat by the United States and Soviet Russia acting jointly.

2100 (Page 4 of 7) (To be handled as Government code.)

In order that we might do this, the Imperial Government has not hesitated to exercise force toward the various countries adjacent to her.

The Government of the United States has given no reason for having said that these Imperial discourses between the Governments of Japan and the United States have for their purpose the discovery of some far negotiation leading to do with bringing about a possible settlement of the entire Pacific area as a means of creating a program which will achieve mutual peaceful purposes. In this respect the Government of Japan has consistently in accord. Furthermore, the Government of the United States has said to show that she will give no consideration to any program except those leading to do with any of the rights and prerogatives of either Japan or of the United States, or otherwise with the principles which have been observed by the United States in the past. This attitude appears equally to the principles which the Government of Japan has adopted in its fundamental national policy.

The Imperial Japanese Government believes that the Government of the United States maintains that the program leading out of these Imperial discourses will not have principles and justice which will be applicable to any of the world's nations. Therefore, to make one part of the world which is the Pacific. In order that...

SECRET

enjoying favorable conditions or having advantages over other countries economically, politically, militarily, from the point of view of natural resources or geographically shall assume an attitude of strict impartiality with regard to cooperation and to the distribution of such advantages.

It is natural and essential that, first of all satisfying the requirements essential to the existence of a country in a spirit of reciprocity, adjustments should be made in relation to the areas adjacent to it. It is furthermore more important in hastening the establishment of peace.

(Part 7 of 7)

To be handled in government code.

I believe that the opinions of the Imperial Government as set forth above are clear and concise. We believe that it is paramount for the maintenance of peace in the Pacific that the governments of Japan and the United States confer dispassionately and constructively together on problems great and small.

From this point of view it is my fervent belief that it would be highly significant for the leaders of both countries to meet together for an immediate conference. However, in order that such a conference can be conducted in the most friendly manner, I believe that it is essential to immediately quash the impression that this step is due to pressure put upon the Japanese Government by the Government of the United States. The Japanese Government is convinced that the Government of the United States is in the main interested in the establishment of world peace and Japan has decided to reciprocate and in the light of the present international situation has decided to endorse the early inception of this conference.

Re my #803 .

(A) For convenience's sake, in exchanging messages in the future on this question, please insert the paragraph numbers in the order used in the caption telegram.

1. (The section beginning "The Government of the United States" and repeating the content of recently received documents)

2. (The section beginning "The Government of Japan cannot help but feel deeply regrettable that despite Japan's past pledges, etc.")

3. (The section beginning "The steps which Japan has taken for the joint defense of French Indo-China, etc.")

4. (The section beginning "The Government of the United States has gone on record as having said that, etc.")

5. (The section beginning "The Imperial Japanese Government believes that the Government of the United States considers, etc.")

6. (The section beginning "I believe that the opinions of the Imperial Government as set forth above, etc.")

(B) The following are explanations of the points in the caption telegram which need special attention:

(1) Our opinions regarding this question were set forth briefly in response to those views which the United States Government freely submitted with the request that we do likewise.

ARMY

SECRET

SECRET

We made our views clear, believing that by so doing we might find in due time points upon which the two parties can agree in a friendly spirit and that because of this the meeting of the leaders of the two countries would prove to be effective.

a - S.I.S. Nos. 21474-80 which give Japan's viewpoints with regard to American-Japanese negotiations.

Purple (GA)

509

(Part 2 of 3)

(2) With regard to Part 3, "should a just peace be established in the Far East." This means, for example, when the CHIANG regime has become merely a local regime as a result of the closing of routes used to aid that regime; when Japanese-Chinese relations have, on the whole, actually returned to normalcy; and when it is possible to secure efficiently and justly materials from French Indo-China, Japan will be willing to consider withdrawing her troops even if a complete settlement of the China incident has not been achieved. In other words, it was a statement made because of the desire to allow as much flexibility as possible when the conversations are to be begun.

(3) With regard to Part 5. (A). "... which will be applicable to the whole world, etc." was inserted out of consideration of the fact that if the principles and desires expressed by the other side are applied merely within the Pacific area, we would suffer various restrictions within the East Asia sphere of co-prosperity in which we hope to establish a new order, while the United States, on the other hand, would not be bound by any pledge with regard to her relations with her adjacent areas. Since this would result in an arrangement which would be one-sided insofar as it affects Japan, I thought that the principle should be such as may be applied to the entire world.

a - The parts referred to do not correspond to parts in the translated message; Part 3 mentioned above corresponds to Part 8 in the translated message, and Part 5 to Part 6.

#809 (Part 3 of 3.)

(B) With regard to that section in which it is stated that countries enjoying favorable conditions or having advantages, over other countries should assume an attitude of strict impartiality with regard to cooperation and to the distribution of such advantages, we wish to point out the logical reasons for cooperation in the application of leadership to the end of bringing about steps for an equitable distribution of resources by those countries who are advantageously situated, and the passage has to do with the proposal by the United States with reference to equality of economic opportunity and treatment. In other words, it hints the idea that it is natural that Japan should assume peaceful economic leadership within the East Asia Sphere of Co-prosperity.

(C) As to the words to the effect that it is natural and essential that adjustments should be made in a spirit of reciprocity in relation to the areas adjacent, etc., the passage clarifies the fact that Japan is inevitably, as well as naturally, endeavoring to bring about peace on the basis of the principle of equality in her relation with Manchukuo and China; that is to say, on the basis of the principle of good neighborliness to the end of establishing the East Asia Sphere of Co-prosperity. It also goes to show that the

Page 1.

ARMY

SECRET

SECRET

policy of adjacent countries each respecting the conditions peculiar to the other, is not a policy, as the United States alleges it to be, of securing a position superior to the others. This has many points in common with the American Monroe policy.

The passage in which appear the words "first of all satisfying the requirements essential to the existence of a country" came from the idea of so-called (joint defense ?) which the United States Government referred to. This passage was given with the idea also of a joint defense in China in our mind.

In other words, (A), (B) and (C) were brought out as a precaution against the possibility of our being too narrowly restricted when the discussion takes place concerning the method by which the East Asia Sphere of Co-prosperity should be established.

Re my #748^a.

Today, the 28th, at 11:00 a.m. in accordance with your instructions, I had an interview with the President (the Secretary of State was present.) I gave him at that time your message as well as the English text of your #503^b. While the President was reading the message he flatteringly commended it. Having read it thoroughly, in discussing the point having to do with discrimination he smilingly and cynically said, "Though I am looking forward to conversations with Prince KONOYE, I wonder whether invasion of Thailand can be expected during those conversations just as an invasion of French-Indo China occurred during Secretary HULL'S conversations with your Excellency." However, I could see that he was well pleased. He continued by saying, "I am looking forward to having approximately three days talk with Prince KONOYE. The main thing that I am interested in is the saving of time. Hawaii is out of the question for according to the constitution the President must sign bills passed through the Houses of Congress within ten days and I cannot have the Vice-president do it for me."

(Part 2 of 2)

He explained that in this respect it is different with the Japanese Government in that the Japanese Government could appoint an acting minister and added that if it is going to be in Juneau, it would take three days to Seattle, and the round trip from that point on being ten days, if we had fourteen days in all, we would be able to do it, but it would be impossible if it is going to be in Hawaii, since it would take three weeks. I, therefore, told him that insofar as the Japanese Government is concerned, their chief object is to hold a conference, and question of the place of the conference is secondary. I promised that I would communicate the details to the government. I then said that we would like to have the earliest possible date set, whereupon the President replied that he did not object to having an early date set, but he did not give the immediate reply as to when.

The President added also that the recent meeting with CHURCHILL was to have taken place in ----- this year but had been postponed on account of the Balkan War and that the meeting was held after the Congress had approved of it. The conversation between the President and me was as given above. These conversations will be continued.

As you have been advised by other messages concerning this matter, no information of the "leaders' conference" should be allowed to leak out until it is definitely settled upon. You should be perfectly well aware that such leaks may make it impossible to get some things done which otherwise would be well within the realm of possibility.

On the 28th, however, the Domei and other press dispatches, report that in an interview to the press you made references to Premier Konoye's message. (We suppressed those dispatches here). Hereafter will you please refrain from making any mention of this until you have communicated with this office.

Although we were able to suppress the above mentioned dispatches, in view of the channel through which they arrived, we are of the opinion that a fairly large group of people are now aware of the news. We are at present figuring out ways and means of making the best of the situation. In the meantime, will you take every precaution against any leakage of the contents of the message.

Regarding my message #510*

In view of our domestic situation and the delicate international situation, we had intended to keep this matter a strict secret for the time being. However, now that the matter has been made public in your area, we fear that there will be further misunderstanding if we should attempt to suppress or censor the news here. Being of the opinion that it would be best to publicly announce the contents of section 2 of paragraph 5 of the separate message, we did so at 2:30 p.m. on the 29th.

It should be superfluous to mention that because we must take into consideration our relations with Germany and Italy, and in view of the exceedingly complex domestic situation, there is much danger that the project will fail if information is allowed to leak out before a settlement is reached. Bear this in mind and take every precaution to guard against leaks. You should conduct your negotiations, as they were being conducted during your unofficial talks, in such a manner so as to avoid attracting any attention. (We do not feel that the contents of the discussion on the 28th should be made public at this time). Hereafter, will you please get in touch before you make any public statements. We realize, of course, that you may let an opportunity slip by by this delay, but please look upon such an occurrence as being unavoidable under the present circumstances.

With regard to the location at which the "leaders' conference" should take place, we mentioned Hawaii after giving consideration to our dignity and also because early in the discussions the United States suggested Hawaii.

We do not insist upon Hawaii, but if it is not to take place there, we feel that we should avoid selecting a place which is a part of either nation, but select a spot on the high seas. Please discuss this matter along those lines.

With regard to maintenance of security, in view of the matter contained in your message #754**, will you please request the Americans to cooperate fully. (You are aware that our relations with Germany and Italy may be unfavorably affected by announcements made in the United States. It is quite possible that the United States proposed that the announcement be made to estrange Japan from Germany and Italy. We expect to have

10. SHIP

1941

REMARKS

[illegible]

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The distance from the point of origin to the point of destination is 100 miles.
 2. The distance from the point of origin to the point of destination is 100 miles.
 3. The distance from the point of origin to the point of destination is 100 miles.
 4. The distance from the point of origin to the point of destination is 100 miles.
 5. The distance from the point of origin to the point of destination is 100 miles.
 6. The distance from the point of origin to the point of destination is 100 miles.
 7. The distance from the point of origin to the point of destination is 100 miles.
 8. The distance from the point of origin to the point of destination is 100 miles.
 9. The distance from the point of origin to the point of destination is 100 miles.
 10. The distance from the point of origin to the point of destination is 100 miles.

(The remaining portion of Exhibit 125 is a map reflecting the Disposition of the U. S. Pacific Fleet, 7 Dec. 1941 and particularly the location of the USS *Wright* on 27 November and 7 December, 1941. This map will be found reproduced as Item No. 33 in EXHIBITS-ILLUSTRATIONS to proceedings of the Joint Committee.)

EXHIBIT NO. 126

NAVY DEPARTMENT,
Washington, D. C., February 3, 1941.

General Order No. 143

ORGANIZATION OF THE NAVAL FORCES OF THE UNITED STATES

1. General Orders Nos. 68 and 102 are hereby canceled.
2. Effective February 1, 1941, the Naval Forces of the United States are by this order organized into:

The United States Fleet, comprising:
 (a) The United States Atlantic Fleet,
 (b) The United States Pacific Fleet,
 (c) The United States Asiatic Fleet;
 The Naval Coastal Frontier Forces,
 Special Task Forces,
 Special Duty Ships,
 The Naval Transportation Service,
 Naval District Craft.

The assignment and administrative organization of units pertaining to the foregoing will be as prescribed by the Chief of Naval Operations either in special orders or in the "Assignment of Units in the Organization of the Seagoing Forces of the U. S. Navy," and the "Assignment of Units to Naval Districts and Naval Stations."

3. The United States Atlantic Fleet, the United States Pacific Fleet, and the United States Asiatic Fleet are administrative and task organizations, and normally operate under the instructions or orders of the Navy Department. Each is under the command of a flag officer having the title "Commander-in-Chief, United States Atlantic (or Pacific, or Asiatic) Fleet." The geographical limits of command of the Commander-in-Chief, United States Asiatic Fleet, shall include the Western Pacific and the Indian Oceans and tributary waters. The eastern limit shall be the 180th meridian south of latitude 50° north and the 160th meridian east of Greenwich, north of latitude 50° north. The western limit shall be Asia, Africa, and, south of Africa, the 20th meridian east of Greenwich.

4. The United States Atlantic Fleet, the United States Pacific Fleet, and the United States Asiatic Fleet together comprise the United States Fleet, whose commander-in-chief is appointed from among the commanders-in-chief of the component fleets. The United States Fleet is an administrative organization for training purposes only, and is a task organization only when two or more fleets are concentrated, or are operating in conjunction with each other.

5. Under the Chief of Naval Operations, the Commander-in-Chief, United States Fleet will, through Type Commanders, prescribe standards and methods of training for all of the seagoing forces and aircraft of the Navy. Type Commanders will be designated in the "Assignment of Units in the Organization of the Seagoing Forces of the U. S. Navy", and customarily, so far as possible, the type commander will be in the same fleet as the Commander-in-Chief, United States Fleet.

[2] 6. The Commander-in-Chief, United States Fleet, is senior to the other Commanders-in-Chief. When two or more fleets are concentrated, or are operating in conjunction with each other, the senior Commander-in-Chief is responsible to the Chief of Naval Operations for joint operations.

7. The Naval Coastal Frontier Forces, when formed, are administrative and task organizations, and operate under the Naval Coastal Frontier Commanders. Where Naval Coastal Frontiers have more than one Naval District in them, Naval Coastal Frontier Forces are subdivided into "Naval Coastal Forces" and "Naval Local Defense Forces", operating under the Naval Coastal Frontier Commanders and the Naval District Commandants, respectively. Where Naval Coastal Fron-

ties include but one Naval District, the Naval Coastal Frontier Forces consist only of Naval Local Defense Forces. Commandants of Naval Districts and Commanders of Naval Coastal Frontiers have administrative responsibility direct to the Navy Department for Naval Local Defense Forces and Naval Coastal Forces, respectively. Commanders of Naval Coastal Frontiers have task responsibility to the Chief of Naval Operations for Naval Coastal Frontier Forces.

8. Special Task Forces may be formed from time to time under the Chief of Naval Operations for the accomplishment of particular tasks.

9. Special Duty Ships are those assigned to outlying naval stations, to survey duty, and to such other special details as may be designated. They operate under orders of the commandants of the stations to which they are assigned or under the Chief of Naval Operations, depending on the type of duty they are performing.

10. The Naval Transportation Service is composed of such units as may be assigned to it by the Chief of Naval Operations. This service operates directly under the Chief of Naval Operations.

11. Naval District Craft are under the command of the commandant of the naval district or station to which assigned. They consist of such naval craft and floating equipment of the district as are not in the "Naval Local Defense Force."

FRANK KNOX,
Secretary of the Navy.

NAVY REGULATIONS SETTING FORTH THE GENERAL DUTIES OF A COMMANDER-IN-CHIEF

"(1) The commander in chief shall take all practicable steps to keep the ships of his command ready for battle. (Navy Regs. Article 687.)

"(2) He is responsible for the indoctrination, drill, training, and efficient administration and operation of the fleet and the coordination of its various units in strategic and tactical employment.

"(3) He shall make recommendations to the Navy Department as to the composition and organization of the fleet and as to all matters pertaining to its military efficiency and control. He shall submit schedules of employment and cruising itineraries to the department in accordance with its instructions."

"The commander in chief shall carry out all drills and exercises in accordance with the customs of the service, the instructions of the department, and the drill books and other publications of a similar nature. This shall be done in such manner as will most conduce to maintaining the fleet in constant readiness for war in all its phases." (Navy Regs. Article 692.)

"(3) He shall also be governed by the following rules:

"(a) He has the sole right to correspond directly with the Navy Department concerning any official matter connected with the fleet.

"(b) He shall keep the Secretary of the Navy fully informed of the movements of the fleet. These general reports shall not be considered as taking the place of separate letters on separate subjects." (Navy Regs. Art. 699.)

"The use of force against a foreign and friendly state or against anyone within the territories thereof is illegal.

"The right to self-preservation, however, is a right which belongs to States as well as to individuals, and in the case of States it includes the protection of the State, its honor, and its possessions, and the lives and property of its citizens against arbitrary violence, actual or impending, whereby the State or its citizens may suffer irreparable injury. The conditions calling for the application of the right of self-preservation cannot be defined beforehand, but must be left to the sound judgment of responsible officers, who are to perform their duties in this respect with all possible care and forbearance. In no case shall force be exercised in time of peace otherwise than as an application of the right of self-preservation as above defined." (Navy Regs. Article 723.)

"The Commander-in-Chief of the United States Fleet is vested with authority to exercise control of the operations of fleet aircraft units from naval air stations, to allocate among units of the fleet the services, facilities, equipment, and spaces made available to the fleet, and to establish priorities with respect to repair and overhaul of aircraft of the fleet." (Navy Regs. Article 1554.)

(2) Aircraft Operations, and aviation shore facilities.

(3) Coordination of aviation activities of the Fleet.

(4) Employment of aircraft in tactical exercises, analysis and reports thereon.

(5) The development of aircraft tactics, gunnery and doctrine.

(6) Naval air operating policy.

(b) Assists War Plans Officer in the preparation of War Plans.

(c) Keeps informed as to the effectiveness of aircraft units of the Fleet.

(d) Assists Operation Officer in the preparation of Fleet Schedules dealing with aircraft and aircraft services.

(e) Consults with Gunnery Officer in connection with aircraft and anti-aircraft gunnery. Handles Aircraft Gunnery Reports.

(f) Member of Schedule Board.

(g) Has cognizance of, keeps informed of aircraft material matters.

[12] 225. *Fleet Aerological and Personnel Officer—96.*

(a) In charge of the aerological office and keeps the Commander-in-Chief and members of his staff advised of weather conditions as concerns the planning and executions of Fleet Operations. Assists War Plans Officer.

(b) Advises with reference to the establishment of new aerological units in matters concerning:

(1) Equipment.

(2) Personnel.

(3) Weather information required.

(c) Coordinates aerological activities in the Fleet, including:

(1) Collection and dissemination of weather reports.

(2) Weather forecasts and advisory storm warnings.

(3) Aerological research.

(d) Exercises supervision over the training and instruction of aerological personnel.

(e) Prepares such weather summaries as are required in connection with orders for Fleet Problems and Tactics.

(f) Consults with Gunnery Officer in connection with atmospheric ballistic information pertaining to gunnery.

(g) Advises with reference to exchange of weather information between the Fleet and the U. S. Weather Bureau or other activities maintaining meteorological facilities.

(h) In charge of all matters relating to:

(1) Orders for officers and enlisted personnel.

(2) Naval Reserve Officers on active duty.

(3) Transportation in ships of the Fleet.

(4) Congressional mail regarding personnel matters.

(5) Action on leave requests for all officers and preparation of endorsements for signature of Admiral, Chief of Staff and Flag Secretary, depending upon the rank of officer requesting leave.

(6) Examinations and promotions.

(7) Navy Relief and Red Cross.

(i) In charge of entertainment and welfare of enlisted personnel.

(j) Shore Patrol.

(k) Liberty for the Fleet.

228. Staff Duty Officer—14.

(a) Such Officers as may be designated by the Chief of Staff shall stand a day's duty in port and a watch on the Flag Bridge at sea when a watch is established.

(b) The officer having the day's duty shall:

(1) Receive routine reports.

(2) Act on routine matters.

(3) Act as necessary on matters when the officer having cognizance and his relief are absent, informing officers concerned of action taken as soon as possible.

(4) Attend the side when the Flag Lieutenant is not available. The procedure for tending the side is laid down in Section X of these Staff instructions.

(5) Regulate movements of Admiral's Barge, Chief of Staff's Gig, and Staff boats in absence of Flag Lieutenant or outside of working hours. The Officer-of-the-Deck will keep the Staff Duty Officer and Flag Lieutenant informed of the movements of the Admiral's Barge, Chief of Staff's Gig, and Staff Duty boats.

[13] (6) Keep informed as to Staff Officers on board or absent from the ship.

(7) In the absence of the Flag Lieutenant see that boarding calls on visiting men of war are made by an officer from Fleet flagship.

(8) Receive aerological forecasts from the Aerologist and when bad weather is forecast transmit the necessary information to the ships present.

(9) Initial all dispatches, taking action if necessary when action officer is not on board.

(10) See that the Commander-in-Chief and the Chief of Staff are kept informed of all important matters, and particularly that they are informed promptly upon their return to the ship of all important matters that occur during their absence; and similarly keep the Operations Officer informed of all ship movements observed by the signal watch.

(11) Examine all mail received during the absence of the Flag Secretary or his regularly designated relief, and decide what action if any shall be taken.

(c) Day's duty will begin at 0600, except Sundays and holidays when it will begin at 1100. The sequence will be uninterrupted by the fact that the ship may be at sea when regular watches are set.

(d) The duties of the Staff Duty Officer assume particular importance when, in the absence of the Commander-in-Chief, Chief of Staff, or other members of the staff, he is called upon to make decisions in cases of emergency, or on matters which cannot be delayed for reference to higher authority or to the officers having cognizance. This fact makes it imperative that all officers standing duty keep themselves informed as to existing situations, the policies of the Commander-in-Chief and the usual and proper manner of taking action on all matters which may arise.

(e) In important emergency cases the Staff Duty Officer will take such action as may be necessary. Instructions should be obtained by the most expeditious manner of communication with the Chief of Staff and, failing to locate him, with the Commander-in-Chief. The Operations Officer should, if practicable, be fully informed of the situation.

(f) When civilians or officials, other than personal friends of the Commander-in-Chief or officials whose status is a matter of doubt, come on board the flagship to confer with the Commander-in-Chief, he shall first present them to the Chief of Staff, Flag Lieutenant, or in their absence, to the Operations Officer.

(g) Should an emergency arise necessitating action involving the Fleet Relief Force, the Staff Duty Officer will carry out the following:

- (1) Notify the Commander-in-Chief, Chief of Staff and Operations Officer.
- (2) Send staff boats to landing, keeping one at ship as may be advisable.
- (3) Land field radio and signalmen if BASRAD is out of commission.

(h) Assignment of Berths.

Requests for berths are received occasionally by the Staff Duty Officer for immediate action during the absence of the Operations Officers. To assist the Staff Duty Officer in assigning berths, an anchorage chart is kept in the Operations Office, together with a copy of current instructions. See also the Commander-in-Chief's current letter in regard to anchorage assignments.

(i) In the absence of the Commander-in-Chief, or Chief of Staff, he shall take steps to correct any defects in external Fleet routine which would constitute an adverse reflection on the Fleet.

(j) Leave—Relief for Day's Duty.

(1) The Day's Duty list for Staff Duty Officers is prepared on the basis that the sequence will not be interrupted by the fact that the ship may be at sea. Nor is it to be interrupted by absence on duty, illness or leave.

(2) Staff Duty Officers are "Relief Officers" in inverse order of seniority. A Relief Duty List is posted in the Staff Duty Book. When an officer stands a relief duty watch, he will inform the senior watch officer. The next officer on the list then becomes the "Relief Duty Officer."

(3) For extended periods of leave, greater than 10 days the Relief Duty Officer will take the duty for the officer scheduled for the Day's Duty. For shorter periods of leave, officers are expected to arrange for their own reliefs by agreeable shifts with other Staff Duty Officers. In every case, inform the Senior Staff Duty Officer of the arrangements made.

Sea Watches

(k) An officer of the Staff shall be on the bridge at all times when the Fleet flagship is underway in company with vessels of the Fleet acting as a unit.

(l) He is the representative of the Commander-in-Chief on the bridge and bears the same relation to him that the Officer-of-the-Deck bears to the Captain of the ship. He shall keep himself informed of the location of all units and ships in whatever disposition or formation the Fleet is at the time; whatever land or lights are in sight; whether either are likely to be seen; and of all other particulars which may be of use to the Commander-in-Chief in keeping the ships of the formation out of danger.

(1) In case of emergency, when neither the Commander-in-Chief nor the Chief of Staff is on the bridge, he shall make such signals as are required by the circumstances, reporting his action immediately to the Commander-in-Chief, the Chief of Staff and the Operations Officer. **ACT FIRST. REPORT AFTERWARDS.** Under all other conditions the formation shall not be maneuvered without the authority of the Commander-in-Chief or the Chief of Staff. Furthermore, under these latter conditions, the Staff Duty Officer shall report the circumstances to the Operations Officer. Also, he shall call the Flag Lieutenant and Operations Officer to the bridge at once if immediate action is required—otherwise those officers shall be informed of the time when their presence on the flag bridge will be required and the reasons therefore.

(m) He shall promptly report to the Commander-in-Chief, through the Chief of Staff, all land, shoals, rocks, lighthouses, beacons, buoys, discolored water, vessels, or wrecks sighted; all changes of weather or shifts of wind; all signals made; all changes in speed, formation, disposition, or course; in general, all occurrences worthy of notice.

(n) He shall handle all dispatches which in port are routed to the Officer having the day's Staff duty.

(o) When the Flag Lieutenant is on the Bridge he will handle all tactical signals, relieving the Staff Duty Officer of this function of his usual duties.

(p) **RECORD OF EVENTS:** A Record of Events during the watch will be kept by the Staff Officer on watch assisted by a duty yeoman. This record will include items of importance, movements, major and minor contacts with the enemy, aerial and submarine activity, weather information, etc. **THE RECORD OF EVENTS** will be typed in quadruplicate, signed by the Officer on watch and handled as follows: Original to be placed in a file folder in Flag Plot. (This folder will be kept in Flag Plot, until the completion of the exercise, when it shall be turned over to the file yeoman by the yeoman securing the watch.) At 0800 each day the three copies of the **RECORD OF EVENTS** covering the watches of the preceding 24 hours shall be turned over to the Flag Office for the following distribution: one copy to the Admiral, one copy to the Chief of Staff, and one copy to the Operations Officer.)

(q) When necessary to make a signal to change course or speed to avoid a vessel or unit having the right of way, make such changes great enough, and execute the signal soon enough to leave no doubt in the minds of the other officers of the deck as to your intentions. Avoid crossing ahead of vessels or units having the right of way.

[15] (r) When fog closes in:

- (1) Order bridge radios manned if not already in effect.
- (2) Order fog buoys streamed.
- (3) Order fog searchlights manned.
- (4) Comply with Fleet Communication letter—2RL-41 summarized briefly as follows:
 - (a) Take soundings at short intervals to ensure safety of the formation.
 - (b) Designate a ship to: At least half-hourly or oftener; obtain bearings from shore radio direction finder stations, and radio bearings of ships in company.
 - (c) Plot all bearings and soundings on a chart. This ensures safety.
 - (d) Establish a transmitting and receiving watch, (on distress frequency).
 - (e) Provided Radio restrictions so permit broadcast in plain language followed by International Code: visibility conditions, names of ships in company, position, and time of origin GCT. If other ships reply to this safety transmission shift to 422 kcs. and exchange information.

227. The night order book is written by the Commander-in-Chief for guidance of officers having night watches. Each officer having a night watch shall initial the book after reading the orders, and before relieving the watch. The night order book is prepared by the Fleet Navigator (12).

228. Nothing herein is intended to contravene existing regulations or to preclude taking such additional precautions as may seem desirable.

[16]

SECTION III—BATTLE STATIONS

300. The Combat Organization of the Staff is covered in a separate confidential issue of this section. It is distributed to the flagship and flag personnel only.

[17]

SECTION IV—FLAG OFFICE PERSONNEL AND GENERAL INSTRUCTIONS

401. The authorized Flag Allowance of yeomen is:

Chief Yeoman.....	3
Yeoman 1st class.....	4
Yeoman 2nd class.....	5
Yeoman 3rd class.....	6
Total	18

Yeoman on board are assigned in general as follows:

- 1 Yeoman—In general charge.
- 1 Yeoman—Admiral, Chief of Staff and Flag Lieutenant.
- 1 Yeoman—Flag Secretary and Division Officer.
- 3 Yeomen—Operations and Assistant Operations Officers.
- 2 Yeomen—War Plans Officers.
- 2 Yeomen—Communication, Radio, and Comm. Security Officers.
- 1 Yeoman—Intelligence Officer.
- 1 Yeoman—Aviation Officer.

- 1 Yeoman—Gunnery Officer.
- 1 Yeoman—Engineer and Maintenance Officer.
- 1 Yeoman—Aerological Officer.
- 1 Yeoman—Files and Correspondence Classification.
- 1 Yeoman—Outgoing Mail Desk.
- 1 Yeoman—Communication Office.

These assignments will be augmented by yeoman strikers. Yeoman strikers will also be assigned to other Flag Office details, such as incoming mail, File Section, Tracer desk, etc.

402. Assignment of yeomen will necessarily depend largely on their individual aptitude for certain duties, and their availability. One Pharmacist's Mate is included in the Flag Allowance and is assigned to the Fleet Medical Officer. One Marine Sergeant Major is assigned to the Marine Officer.

403. Whenever an officer finds that he requires additional clerical assistance, he will apply to the Flag Secretary. Additional clerical assistance can in this way be secured with a minimum of delay and without interfering with the routine of the office.

404. The Chief Yeoman in charge has general supervision of the Flag Office and personnel under the Flag Secretary, who is in direct charge of the offices of the Commander-in-Chief. The Chief Yeoman in Charge is responsible for the cleanliness of the offices and storerooms, for the carrying out of the office instructions, for the conduct and proper performance of duty by the enlisted personnel and for regulating watch lists, liberty and leave in accordance with existing instructions and orders. He will supervise the drawing of office supplies against the flag allotment, issuing of stationery, etc., and exercise care that expenditures are kept within requirements.

405. *Routine Duty.*

(a) Routine hours of duty in flag offices and print shop are as follows:

Daily-----	0800 to 1600
Half Holidays-----	0800 to 1130

(b) *Handling of work outside regular office hours.*—Routine work outside of regular office hours will be handled by the yeoman of the officer desiring such work done, when that yeoman is on board, otherwise by the duty section. There is always a duty printer on board who sleeps in the print shop.

(c) No uncompleted work shall be stowed away in office desk drawers, but shall be kept above the desks in labeled baskets or envelopes, and available to the staff officers concerned, or to the duty section, if required.

[18] 406. *Handling of mail upon arrival in port.* The taking up and distribution of mail upon arrival in port will, without exception, be an "all hands" job. All yeomen will prepare routing sheets and assist in clearing up all mail received. No liberty will be granted on arrival in port until such mail has been received, routed and distributed to the cabinets of the officers concerned.

407. *Liberty and Leave.*

(a) Liberty and leave for the flag office personnel will be regulated to conform, as closely as work will permit, to that of the flagship. Subject to the approval of the officers for whom the yeomen work, after routine working hours, or Saturdays after 1130, Wednesday afternoons, Sundays and holidays, will be considered routine liberty periods. Liberty cards are issued under the supervision of the Division Officer for all flag personnel.

(b) All requests for other than regular liberty shall first be referred to the officer for whom the yeoman works, the Flag Division Officer and to the Chief Yeoman in Charge for designation of relief if required, then to the Flag Secretary for approval or disapproval. If the request is one for leave and is approved by the Flag Secretary as Head of Department, it will then be sent to the Executive Officer for issuance of formal leave papers.

408. *Cleanliness of Offices.*

(a) The cleanliness of flag offices and storerooms will be under the supervision of the Chief Yeoman in Charge. Each yeoman will be required to keep his own desk neat and clean, as well as the desk of the officer for whom he works. Offices will be cleaned daily, prior to 0800, and a field day shall be held between 1200 and 1300 each Friday.

(b) Flag offices, shops, storerooms and other spaces will be included in the commanding officer's inspection of adjacent ship spaces. Personnel in charge of offices, shops, storerooms and other flag spaces shall have their spaces open and ready and shall stand by for inspection at the times designated in the

daily schedule issued by the flagship. Yeomen shall have the drawers of their desks neatly stowed and ready for removal should they be directed to do so by the inspecting officers.

409. Flag Office Duty Section.

(a) The Flag Office personnel will be divided into duty sections of not less than three men, one of whom shall be a competent stenographer. Duty changes at 0900 daily, Sundays excepted. The Duty Section will function in the Flag Office during the following hours:

Daily -----	0730 to 0815
	1130 to 1300
	1600 to 2200
Half Holidays -----	0730 to 0815
	1130 to 2200
Whole Holidays -----	0730 to 2200

(b) The duty section will handle all emergency work outside of regular working hours and if the Outgoing Mail Yeoman is not on board, will mail all signed outgoing correspondence. The entire duty section will remain in the flag offices during the hours specified in subparagraph (a) except:

(1) Only one rated man need remain in the flag office during mealtimes.

(2) When the press of work permits and when in the discretion of the senior duty yeoman their services are not immediately required, members of the duty section may be allowed to attend the evening movies on deck, subject to call; however, one rated member of the duty section shall remain in the flag office during the authorized absence of the rest to attend the movies. From time to time, if the Staff Duty Officer grants permission to do so, the offices may be locked and keys turned over to him, during movies, smokers, etc.

[19] (3) When the Flag is based temporarily ashore, the Duty Section will maintain a continuous one-man security watch in the Flag Office during the following hours:

Daily -----	1600 to 0800
Half-holidays -----	1200 to 0800
Holidays -----	0800 to 0800

This watch will be armed, the primary duty of which is to prevent unauthorized persons from entering the Fleet War Plans Offices and all other Flag Offices of the Commander-in-Chief. This Security Watch will normally be sufficient to remain in the Flag Office after working hours. The entire Duty Section is available for call by the Staff Duty Officer at any time.

(c) *Handling of mail and correspondence.* Before going on liberty the incoming and outgoing mail yeomen will inform the senior duty yeoman of any special instructions, who in turn will inform his section. Special instructions may be:—To watch for special correspondence expected in the incoming mail—to see that certain U. S. or guard mail is dispatched. File numbers will not be entered on incoming mail by the duty section unless the correspondence is of an urgent nature, in which case a file number will be entered on the routing sheet and file yeoman notified when he returns from liberty. Incoming correspondence shall be made ready for the examination of the Staff Duty Officer with minimum delay and report shall be made to him that it is ready for his examination. On board ship, immediately after the end of working hours, the duty section shall gather up all confidential and other important correspondence from the Staff Officers' rooms and retain such correspondence in the Flag Office overnight, distributing it immediately after 0800 the following working day. In offices ashore, immediately after the end of working hours, the duty section shall gather up all confidential correspondence from the desks of the Staff officers and deposit it in the locked cabinet provided for this purpose. Just prior to 0800 the next working day, the correspondence shall be returned to the respective officers desks.

(d) *Security of Flag Offices.* The duty section will stand watch in the main flag office. The offices will be secured promptly at 2200 and keys turned over to the Flag Secretary, if on board, otherwise to the Staff Duty Officer. If, for any urgent reason, it is desired to keep offices open after 2200, permission should be requested from the Staff Duty Officer. Flag offices shall never be left unguarded. Outside regular working hours a constant check should be kept on the Staff offices, operations office, and file room to see that it is either occupied by staff personnel, or locked. If it is necessary for everyone to leave flag offices on duty, the last person to leave will lock offices and take keys with him, posting

a note on main flag office door as to who has keys. Offices should be reopened as soon as possible.

(e) *Visitors to flag offices.* No general visitors will be permitted. Other than flag personnel admitted by senior duty yeoman, only officers and men on duty, or persons accompanied by staff duty officer, will be permitted in the flag offices outside of working hours.

(f) *Waste paper baskets in Cabins and Staterooms.* Waste paper baskets in Admiral's Cabin, Chief of Staff's Cabin and Staff officers' staterooms will be emptied and the contents burned, or stowed in flag office pending burning, at the following times:

Regular working days-----	1500
Half and Whole Holidays-----	1115

[20] 410. *Security of Classified Matter.* All personnel of the staff of the Commander-in-Chief, whose duties require handling of classified matter, shall acquaint themselves with the Navy Regulations and other instructions pertaining to the security of classified matter.

(a) *Offices, Print Shop, Multilith Shop, Flag Plot, Officers' Staterooms.* Flag personnel are responsible that classified matter under staff routing, or in spaces in which flag activities are paramount, is constantly attended. *Attended, as employed herein, signifies that the matter is receiving care while being used, or that it is under surveillance with respect to possible pilferage or perusal by unauthorized persons, or that it is under lock.*

(b) *Trash and waste.* Will be removed from flag activities and burned at times specified in subparagraph 403 (f). Should the incinerator be secured, or out of commission, such rubbish will be returned to flag offices, flag plot, print or multilith shops for retention awaiting suitable opportunity for its burning. The Senior Duty Yeoman will personally supervise collection and burning as set out in 403 (f). However, during routine hours of duty (see Article 405), this may be done by a rated yeoman designated by the Chief Yeoman in Charge.

(c) *Keys.* The key to the flag storerooms, the keys to the flag offices and mimeograph shop, and duplicate keys to the print shop and multilith shop are in the custody of the Flag Secretary. The Chief Printer and the Duty Printer will each retain a key to the print shop, and the Multilith Printer will retain a key to the multilith shop. Keys to the Flag Office files will be in the custody of the Flag Secretary, Gunnery Yeoman, File Yeoman, or Duty Yeoman. At the end of working hours, whenever classified matter is being produced in the print shop or multilith shop, the keys to the print shop galley racks and stowage locker will be placed in the main flag office key locker. During office hours the key to the flag offices will be in the main flag office. When offices are secured for the night, the keys to confidential files will be placed in the main flag office key locker and the keys to the flag offices turned over to the Flag Secretary, if on board, otherwise to the Staff Duty Officer. Except as herein specified, personnel are forbidden to have duplicate keys to flag offices and print shop spaces in their possession.

(d) *Files, Lockers, Storerooms.* Access to the flag storeroom by other than regularly authorized personnel may be had upon application to the Flag Secretary. In all cases when a confidential file jacket is to be removed from the flag offices, a receipt will be required from the recipient.

(e) Nonconfidential file jackets should be obtained from the File Yeoman or in his absence from the duty yeoman. If the file jacket is to be removed from the flag office, a receipt will be signed by the recipient.

(f) Classified matter may be removed from the Print Shop only at the instance of the officer for whom the work is being done, or an officer of the Staff. Classified matter will not be allowed to remain in the multilith shop overnight, but will be stowed under lock in the print shop stowage locker.

[21]

SECTION V—HANDLING OF CORRESPONDENCE

501. (a) *Incoming Mail,* is delivered to the Incoming Mail Desk.

(b) Upon receipt of Registered U. S. Mail in the Main Flag Office, it shall be taken immediately to the Secret Mail Officer or the Chief Yeoman designated as Secret Mail Yeoman. In their absence the mail shall be taken to the Duty Communication Watch Officer who shall open it and extract the envelopes marked "SECRET". A receipt for the envelopes so retained shall, in all cases, be obtained on the "Incoming Registered Guard Mail Log". The envelopes marked "CONFIDENTIAL" shall be returned to the Flag Duty Yeoman. All "SECRET"

mail received by the C. W. O. shall be logged in the book provided for that purpose, and then taken to the Staff Duty Officer who shall open it in order to determine its urgency. If the Staff Duty Officer retains any of the Secret Mail his receipt therefor shall be obtained. All Secret Mail shall be delivered to the Secret Mail Officer at the first opportunity.

(c) Incoming personal mail for the Commander-in-Chief will be delivered to his orderly and placed on his desk. If Admiral is not on board, it will be placed in the routing cabinet in the Flag Office and will be delivered upon the Admiral's return to the ship.

(d) Incoming personal mail for other staff officers will be delivered by a Flag Office messenger immediately upon its receipt in the Flag Office. In the absence of any Staff Officer his personal mail will be placed in the routing cabinet in the Flag Office and delivered to him upon his return to the ship.

502. Urgent Correspondence. When URGENT correspondence is received on board, routing sheets shall be prepared immediately, an URGENT tag securely attached to and visible on the routing sheet, and correspondence delivered by hand to the Flag Secretary, or in his absence, to the Staff Duty Officer. Such correspondence shall be shown to Action Officer and a copy delivered to him if desired, prior to routing to other officers. If a copy is delivered to Action Officer, a notation of this fact will be made on routing sheet. If file yeoman are not on duty or in the office when URGENT mail is received, such mail shall be assigned a file number by the Duty Yeoman and handled as indicated above. No correspondence, or other papers, shall be kept visible as the top paper on the correspondence. If correspondence or other papers are of an urgent nature and no URGENT tag accompanies it, the officer concerned shall indicate to this yeoman that the matter is urgent and the latter shall then attach an URGENT tag.

503. Routine Correspondence.

(a) *Incoming Mail Yeoman.* Opens all incoming mail immediately upon its receipt, except U. S. registered mail, which is handled in accordance with subparagraph 501 (b), above. (See Section VI for method of handling registered U. S. mail by receiving officers.)

Logs the envelope number and descriptive data of all correspondence received via registered guard mail and U. S. Mail.

Carefully checks all incoming mail to insure that it is complete and the listed enclosures are attached, or in case enclosures have been forwarded under separate cover keeps a memorandum check-off record of such enclosures so that they can be readily identified and properly distributed upon receipt.

Passes correspondence to File Yeoman and then, after File Yeoman has assigned office file numbers, prepares routing slips for all matter received except certain routine reports designated by the Flag Secretary, and MAILGRAMS. MAILGRAMS received by registered mail are logged and then sent to the Flag Communication office without being taken up on routing slips.

After routing slips have been typed, detaches memorandum routing slip and delivers mail to Chief Yeoman in Charge. From data shown on the retained memorandum routing slips, maintains the Incoming Mail Log in loose-leaf form. This log shall be a permanent record of all correspondence received and will show:

[22]

Date of receipt.

Office of origin.

File and serial number of office of origin.

Date of correspondence.

Subject.

Circus file number of jacket in which permanently filed.

Serial number of routing slip on which correspondence has been taken up.

(b) *File Yeoman.* Assigns file numbers. (See Article 505).

(c) *Chief Yeoman in Charge.* Routes correspondence.

(d) *Flag Secretary.* Confirms routing of correspondence, or changes routing where required.

(e) *Tracer Yeoman.* Removes routed correspondence from the outgoing basket of the Flag Secretary, detaches duplicate routing sheet, stamps date of delivery to first officer indicated in order of routing and delivers the correspondence (except URGENT—see Article 502), through routing cabinet to officers concerned in accordance with the assigned order of routing.

Files duplicate routing sheet as a tracer against outstanding correspondence in the office.

(f) *Yeoman Concerned.* Takes cognizance of and removes all correspondence from routing boxes of officers for whom he works and delivers to officers as directed.

When the officer for whom he works is absent, he will return the correspondence checked to that officer for information, to the Tracer Yeoman, to be checked to the next officer in the order of routing, and deliver Action correspondence to the assigned relief officer.

(g) *Officer concerned.* In general, papers will pass from one officer to another via Tracer Yeoman as indicated on the routing sheet.

Correspondence requiring action will be routed first, if the Flag Secretary deems it necessary, to the Action Officer, the latter being responsible that other interested officers are consulted before letter or endorsement is prepared.

Correspondence routed for information should not be placed in the routing cabinet for an officer temporarily absent until it has been noted by all other officers checked for information.

Ordinarily, when necessary data is available, action should be completed on correspondence within forty-eight hours after receipt.

Any officer desiring to hold correspondence, in order to compile data, reports, etc., should return the correspondence to the files and draw it from the files when needed.

A list will be furnished each officer on Tuesday showing all correspondence which the records of the Flag Office indicate has been in his possession since the preceding Tuesday. Officers indicated as being charged with the correspondence should check this list and mark in the column provided the items which they have in their possession.

(h) *Yeoman Concerned.* Prepares outgoing letter or endorsement as directed (See Article 504).

[23] Keeps outgoing basket of officer for whom he works empty—delivering routed correspondence on which action is required or taken to Tracer Yeoman.

Insures that officer concerned has initialed in the space provided on the routing sheet and that notation is made when action is taken by a method other than a letter or endorsement.

(i) *Tracer Yeoman.* Delivers through the routing cabinet, correspondence on which routing is incomplete.

Scrutinizes all correspondence on which routing is complete to see that no correspondence requiring action goes to file and that officers concerned have initialed in the space provided on the routing sheet.

The correspondence to be finally cleared by the Tracer Yeoman falls into three classes:

(1) Incoming letters on which no action is required, or on which dispatch action was taken and so noted on the original routing slip.

(2) Incoming letters which were endorsed or are the basis for additional correspondence.

(3) Letters originated by the Commander-in-Chief with no incoming correspondence attached.

When correspondence described by (1) above has completed its routing the Tracer Yeoman will destroy his duplicate routing slip, initial in the space provided on the original routing slip under "Tracer," and pass this correspondence to the File Yeoman. However, if there is a cross file, the duplicate routing slip shall not be destroyed but will be attached to the correspondence for filing.

When correspondence described by (2) above has completed its routing the Tracer Yeoman will destroy his duplicate routing slip (unless it has a cross file number) initial in the upper right-hand corner of the file copy of the Commander-in-Chief's action, and on the original routing slip, and pass this correspondence to the File Yeoman.

504. *Outgoing Mail.*

(a) *General:* Dates and serial numbers will be stamped by the Outgoing Mail Yeoman after the letter is actually signed. The original sheet of correspondence of a personal nature shall not bear a file or serial number. The originator's yeoman shall address envelopes for this class of correspondence.

The use of staples in fastening correspondence should be limited to printed or mimeographed letters of two or more pages. Staples shall then be used in the upper left hand corner.

Letterhead paper shall be used for the original sheet and all copies of correspondence.

(b) Correspondence for signature shall be prepared and assembled as follows:

(1) Sheets shall be arranged in numerical order from bottom to top, i. e., page one on the bottom, last page or endorsement on top. Enclosures to the entire correspondence shall be in alphabetical sequence, fastened directly behind the letter or endorsement to which it is an enclosure and securely fastened by brass fasteners, with ends turned over the face of the sheet. When enclosures are too bulky to be attached, then a separate slip with notation should indicate that the enclosures have been temporarily retained by the originator.

(2) In preparing endorsements, reference should be made to the basic correspondence as prescribed by Fleet Regulations.

(3) In preparing a letter, the originator shall:

Indicate the distribution, acknowledgement (if desired), signature, and obtain file number from file yeoman or, in the case of a reply, assign same file number as has been placed on the routing sheet of the incoming letter plus the originator's symbol number.

[24] Ascertain that there is a:

(A) Green file copy (pinned on top of a complete copy of the incoming correspondence with the routing sheet on the bottom.)

(B) Yellow information copy. The day following the mailing of correspondence, information copies shall be bound and routed to all officers. After completion of routing, these copies shall be destroyed.

(C) Pink Copy. This is retained by the tracer yeoman until the correspondence is signed, after which it is sent to the outgoing mail desk and subsequently returned to the originator bearing the date and serial number.

(4) The original and all copies shall show in the upper right-hand corner the initials of the yeoman typing the letter and the originator's symbol number immediately following the file number.

(5) Correspondence shall be clipped together with paper clips in the following order: Original and copies for information addresses; file copy (green); information copy (yellow); pink copy. The green copy shall extend at least an inch to the right side of the correspondence to permit the initials of the originator (indicated by red diagonal mark) as well as other interested officers (indicated by pencil diagonal mark).

(c) *Correspondence to be printed.* Four copies shall be typed, original on green paper, copy on white bond for the printer, one yellow information copy and one pink copy. The word "PRINT" shall be typed on the left side of the last page, opposite the signature, and immediately over the word "DISTRIBUTION." When the green copy (original) has been signed, it will pass through the outgoing mail desk to be numbered and dated, and for the preparation of a printing order.

(d) *Correspondence to be mimeographed.* In order to reduce the amount of typing required for letters that will be mimeographed, the yeoman doing the typing will insert a green sheet provided for this purpose under the stencil when cutting the latter. When this impression copy has been signed by the Admiral or Chief of Staff, the Flag Secretary affixes his authentication, using a stencil stylus, and the stencil and impression copy are then delivered to the Outgoing Mail Yeoman for entry of date and serial number, mimeographing, (done by the Mimeograph Yeoman), and ultimate mailing. (Article 504 (j) (10).)

(e) *Multiple Address Letters.* Multiple address letters are those addressed to more than one office. The original of the multiple address letter shall be made on green paper, and one onion copy shall be made for each addressee. These onion skin copies shall be checked off by the yeoman preparing the correspondence, an arrow check being placed immediately after the office addressed. All action copies of multiple address letters shall be authenticated by the Flag Secretary. The original (green), arranged in the manner prescribed in Art. 504 (b) (5), will be signed by the Commander-in-Chief or Chief of Staff and is kept as the file copy.

(f) *When a letter is required to be rewritten,* the pink copy shall be removed from the file on the tracer desk and all copies of the letter as originally prepared shall be immediately destroyed except the one copy on which corrections have been indicated. This copy shall be attached to the pink copy of the letter as rewritten and will be returned with the pink copy to the yeoman of the officer taking action. With the exception of recommendations on a subject made by various staff officers, these instructions shall also apply to rough drafts of letters or endorsements. Copies of letters on which corrections have been made and

rough drafts of letters or endorsements shall not be filed in the correspondence files unless retention in the files is indicated.

(g) Letters that have not been signed should be returned to the tracer yeoman in order that the latter may inform the originator accordingly, meanwhile returning to him the pink copy.

[25] (h) When correspondence is signed by other than the Commander-in-Chief, the following words shall be typed immediately below the name of the officer signing:

<i>Signed by</i>	<i>Signature</i>	<i>Typewritten</i>
Chief of Staff	—	NAME
Operations Officer when Chief of Staff is absent	—	Chief of Staff NAME
Flag Secretary or Flag Lieutenant (Authentication of multiple address letters).	—	Acting Chief of Staff NAME
Flag Secretary or Flag Lieutenant (for single address letters).	—	Flag Secretary (or Acting Flag Secretary) NAME Flag Lieutenant
		NAME by direction

(1) When information addressees are directed to take action by copy of letters or endorsements, such copy shall be authenticated by the Flag Secretary.

(j) When correspondence is ready for signature the following procedure shall be followed:

(1) Deliver to Tracer Yeoman.

(2) *Tracer Yeoman.* Uses the pink copy for tracing correspondence circulating through the staff for initialing. When correspondence is initialed by all officers except Flag Secretary and Chief of Staff, delivers to Chief Yeoman in Charge.

(3) *Chief Yeoman in Charge.* Checks correspondence to see that it is complete and in agreement with regulations, policies and current instructions.

(4) *Flag Secretary.* Checks correspondence to see that it is complete and that it is in agreement with regulations, policies and current instructions.

Brings to the attention of officers concerned any conflicting or inconsistent orders or instructions.

Authenticates all multiple address letters, and copies of letters or endorsements directing action. Signs single address letters.

Releases printed and mimeographed letters for mailing.

(5) *Tracer Yeoman.* Removes correspondence from the outgoing basket of Flag Secretary.

Delivers correspondence signed "By direction" to the Outgoing Mail Yeoman, attaching pink.

Places unsigned correspondence in the Chief of Staff's box in the routing cabinet and indicates by notation on pink copy date and time that it has been placed in Chief of Staff's box in the routing cabinet for signature or initialing.

(6) *Chief of Staff's Orderly or Yeoman.* Removes correspondence from Chief of Staff's box in the routing cabinet, and delivers to Chief of Staff for initials or signature.

Removes correspondence from outgoing basket of Chief of Staff and delivers to Tracer Desk.

(7) *Tracer Yeoman.* When correspondence is initialed by Chief of Staff, places it in Commander-in-Chief's box in the routing cabinet, indicating by notation on pink copy date and time that it has been placed in Commander-in-Chief's box for signature. Delivers mail signed by the Chief of Staff to the Outgoing Mail Yeoman, attaching pinks.

(8) *Flag Secretary.* Removes correspondence from the Commander-in-Chief's box in the routing cabinet. Sees that all correspondence is initialed by Chief of Staff and delivers to the Commander-in-Chief for signature.

[26] *Tracer Yeoman.* When correspondence has been signed by the Commander-in-Chief removes pink copies from tracer file, and attaches same to the letters to which they belong; delivers them to Outgoing Mail Yeoman.

Makes daily check on pink copies where letters are outstanding.

(10) *Outgoing Mail Yeoman.* Insures that correspondence is complete; encloses, if any, attached; properly arranged (See Art. 504 (b)); initialed by Flag Secretary; signed; that there are sufficient copies for all action and information addressees; that each copy of CONFIDENTIAL correspondence is so marked; that information and pink copies have been prepared where necessary.

Returns correspondence which is found to be delinquent in any of the above respects to the Chief Yeoman in Charge for corrective action.

Stamps serial number (except on personal letters) and date on original and all copies; stamps date of mailing on file information and pink copies, and initials file copy.

Provides for the registry of all records of proceedings of Naval Courts and Boards, all SECRET and CONFIDENTIAL correspondence and other correspondence as directed. Maintains a record of all registry numbers and records the serial file number or other description of the correspondence for which each register number is used.

Is responsible for the correct addressing of envelopes for all mail passing over the Outgoing Mail Desk and for its being placed in the mail properly protected to insure its delivery free from damage by normal handling. In connection with the former, he shall keep himself informed of the location and prospective movements of all ships and transfers of all Flags.

Requests instructions from Flag Secretary regarding mailing of multiple addressed letters, operation orders, plans, etc., to Commanders who are absent when several of the vessels under their command are present with the Commander-in-Chief.

Under the direction of Flag Secretary determines the distribution and number of copies necessary to be printed or mimeographed using "U. S. Fleet Mail Distribution Lists" or such other distribution as may be assigned. Prepares Distribution Memorandum on Printing Orders.

Prepares Printing Order and forwards with White copy of the letter to be printed to print shop. The print shop shall send the Printing Order with each proof to the yeoman designated to proof-read it. This yeoman shall initial in the space provided for each proof and when correct in all respects and considered ready for printing the yeoman shall refer the final proof and the printing order to the originating officer, who shall, if he approves for printing, initial on the Printing Order in the space "Read and found correct". The Flag Secretary will release all letters for printing and distribution. The green (file copy) is held by the Outgoing Mail Yeoman until the letter is printed and mailed, when it is given to the Tracer Yeoman for necessary action. Yellow and pink copies, are handled in the same manner as for other outgoing correspondence. The date sent to the print shop, instead of the date of mailing will appear on the file copy. When distribution is made and entered in the outgoing mail log, a printed copy with original "Printing Order" securely attached thereto, shall be sent to file.

NOTE: The Mimeograph Yeoman will mimeograph the required number of copies shown on the Distribution Memorandum.

A copy of each mimeographed letter originating in the office of the Commander-in-Chief will be marked "INFORMATION COPY", and will be handled in the same manner as other "Information" copies.

[27] When the Distribution Memorandum is released for mailing by the Flag Secretary, the Outgoing Mail Yeoman mails the printed or mimeographed letter and furnishes the Tracer Yeoman with the necessary copies for a Staff Distribution; stamps date of mailing and initials on the Distribution Memorandum; sends file copy to the Tracer Yeoman with the Distribution Memorandum securely attached thereto.

Assigns and maintains a record of serial numbers, in their proper numerical sequence, of Operation Plans, Operation Orders, U. S. and Pacific Fleet Letters, Memoranda, Notices, etc.

Insures that when required, URGENT tags are securely attached to the correspondence, and to the outside envelope. (See Article 502).

Removes any SPECIAL NOTICE tags before mailing.

Handles all guard mail, incoming and outgoing, and will promptly inform Flag Secretary of any variation from the scheduled trips called for by Fleet Regulations. Logs registered number, originator and addressee of all incoming registered guard mail. Delivers incoming mail to Incoming mail Yeoman, and has outgoing mail ready for Guard Mail Petty Officers at the designated times. When the ship is at the Navy Yard, is responsible that necessary guard mail trips are made to the Commandant's Office.

At the end of each day, checks numerical sequence and enters in the outgoing mail log, loose leaf form, all correspondence mailed that day. This log shall be a permanent record of correspondence mailed and will show:

- (1) Serial number of letter.
- (2) Cincpac file number of jacket in which filed.

- (3) To whom sent.
- (4) Date of letter.
- (5) Subject.

The above date shall also be entered for all mimeographed and printed letters dated and serialled that day, even though they are not mailed on that day. A note "Mailed on -----" shall be made in "Subject" column of log and the date of mailing inserted on the date the mimeographed or printed letter is mailed.

Confidential and Secret correspondence will be so designated in the log and, in the case of secret correspondence, the subject will not be entered.

When correspondence has been entered in the log, gives file copies to Tracer Yeoman, pink copies to the yeoman of the officer taking action as indicated by the officer's number (not the initials of the yeoman).

Arranges yellow information copies in numerical sequence and prepares routing sheets next morning and delivers to Chief Yeoman in Charge.

(11) *Tracer Yeoman*. Takes appropriate action being governed by the preceding provisions of this Article.

(12) *File Yeoman*. Handles correspondence as directed in Article 506-1.

505. FILE NUMBERS. The file yeoman will assign file numbers to all correspondence. If the File Yeoman is not on duty or in the office when URGENT mail is received, such mail shall be handled as directed in Article 502. In assigning file numbers to correspondence, the File Yeoman shall use the U. S. Navy Filing Manual as the basis for filing arrangement. Correct file numbers are essential in order to locate correspondence readily. A new jacket shall be prepared for each new number so assigned.

506. In addition to the standard file numbers assigned to outgoing correspondence, the originator's symbol number and a serial number will be used. The originator's symbol number shall be placed after the file number and enclosed in parenthesis. The serial number will appear after the word "Serial" and will not be in parenthesis. New serial numbers will be started on each [28] January 1st, and will run throughout the calendar year. The first figure of all CONFIDENTIAL serial numbers shall be a "0".

506.1 The File Yeoman shall:

Scrutinize correspondence to see that none goes to file unless complete action has been taken; that routing sheet has been initialed by all officers and the Tracer Yeoman and that original routing sheet is attached to correspondence.

Prepare correspondence for file, retained spare copies in the spare copy file when action is so indicated on routing sheet.

File correspondence. CONFIDENTIAL correspondence must actually be placed in the jackets by the File Yeoman himself. He may utilize his assistants for filing correspondence of a lower classification.

Check off, in colored pencil, all entries in the incoming and outgoing mail logs to see that all mail received and originated has been checked to file. Undue delays shall be reported after check has been made with the Tracer Yeoman.

Keep an up-to-date Index of the files.

Cooperate with the Tracer Yeoman in preparing the Weekly List of Outstanding Correspondence.

507. Where correspondence treats of more than one subject, it shall be filed under the principal subject, and cross-index tracers prepared and filed under the other subjects treated or referred to. Cross-index tracers shall be printed on white paper.

508. Yeomen preparing correspondence shall type the file number appearing on the routing sheet, the symbol number of the originator in parenthesis and the word "Serial" below the file number after which the serial number will be entered by the Outgoing Mail Yeoman.

509. FILING OF PRINTED MATTER. Fleet Letters, Memoranda, Notices, etc., must be kept in an unbroken serial titled file for ready reference in addition to being placed in the subject file jacket. Care must be taken to make cross-index files complete and to make sure that signed copy is filed.

None of the above matter will be removed from the files merely because it has been cancelled or superseded, but a notation to this effect shall be made on the file copy showing reference numbers of the dispatch or letter cancelling and superseding it. Extra copies held for issue will, however be destroyed. Whenever the number of spare copies of a particular publication is low, or a request for spare copies is large, the requests will be referred to the Flag Secretary. Normally requests from ships should be handled by Type commanders.

510. WEEKLY CHECK OF OUTSTANDING CORRESPONDENCE. On Tuesdays of each week a sight check will be made by the Tracer Yeoman of all outstanding correspondence that records indicate has been in the possession of an officer since the preceding Tuesday, and a list prepared for each such officer showing correspondence thus outstanding. The duplicate routing sheet will be used as a "tickler" tracer for checking outstanding letters in the office. A notation will be made on the outstanding correspondence sheet showing the date the check was made and the officer who acknowledges having each piece of correspondence in his possession on that date.

511. If, after making a thorough canvass of the offices, no trace can be found of a letter that has not moved in its routing from one officer to another within the past week, the outstanding correspondence sheet will be delivered to the Flag Secretary with a report of the search.

512. Lists of outstanding correspondence checked to the Admiral and Chief of Staff will be delivered to the Flag Secretary.

[29]

SECTION VI—CONFIDENTIAL AND SECRET CORRESPONDENCE

601. Confidential mail shall be handled in accordance with Article 410 and the following:

(a) All correspondence classified as **CONFIDENTIAL** will have the word "**CONFIDENTIAL**" stamped and typed, or printed in the upper left-hand corner, under file number, of each sheet.

(b) All routing sheets for confidential correspondence shall be printed on blue paper and are plainly marked "**CONFIDENTIAL**".

(c) All confidential correspondence will be filed in separate filing cases known as "the **CONFIDENTIAL** files".

(d) All confidential correspondence placed in U. S. or Guard Mail will be placed in double envelopes with the inner envelope stamped "**CONFIDENTIAL**". Confidential correspondence forwarded by U. S. Mail or Guard Mail must be registered.

602. **SECRET** correspondence shall be handled in accordance with the following instructions:

(a) *Storage and Handling.*

(1) **SECRET** correspondence files shall be kept in a safe under the immediate supervision of the Secret Mail Officer; except correspondence regarding War Plans which may be retained by the War Plans Officer, and that concerning Communication Intelligence which may be retained by the Fleet Security Officer.

(2) The yeomen assigned to the War Plans Officer and the Secret Mail Yeoman are authorized to handle secret correspondence. Secret correspondence shall not be typed or handled by any enlisted personnel other than the yeoman who have been so authorized. Secret correspondence must not be permitted to pass out of the personal custody of staff officers at any time.

(b) *Incoming Mail.*

(1) The Secret Mail Officer, or in his absence, his authorized relief, the duty communication officer, will receive all incoming Officer Messenger Mail, and show same to the Flag Secretary or in the latter's absence to the Staff Duty Officer.

(2) Incoming mail marked **SECRET** will be handled by the Secret Mail Officer subject to instructions by the Flag Secretary.

(3) The Secret Mail Yeoman, under the supervision of the Secret Mail Officer, shall log all incoming **SECRET** correspondence, attach secret routing slips, and deliver to the Flag Secretary for routing.

(4) The Secret Mail Officer or the Secret Mail Yeoman shall deliver the **SECRET** correspondence to the staff officers concerned. Receipts shall be obtained for all **SECRET** correspondence left in the custody of officers. Officers not having authorized secret stowage shall not retain correspondence overnight.

(c) *Outgoing Mail.*

(1) An officer desiring to originate a **SECRET** letter shall prepare a rough draft in long hand or dictate the letter to a yeoman authorized to handle secret correspondence. The letter shall be typed and delivered by personnel authorized to handle secret documents to staff officers concerned for initialling and signature.

(2) The file copy of outgoing secret correspondence prepared by the War Plans Officer may be retained in his files. In such cases a copy of the letter shall be delivered to the Secret Mail Officer for filing in the secret correspondence files.

[30] (3) **SECRET** correspondence will be forwarded in accordance with Article 76 (4), U. S. Navy Regulations.

(4) Outgoing SECRET mail will be marked with an identification number of five figures preceded by CINCPAC or CINCUS as appropriate. Franked cards bearing a return receipt shall be enclosed with each letter and will indicate the identity of the letter by both the serial and shipment numbers.

[31]

SECTION VII—LIBRARIES

701. Every effort will be made to maintain an office library of official publications required for reference by members of the Staff. Officers are requested to advise the Flag Secretary of publications they desire to have ordered.

The office library consists of various books and pamphlets, such as:—Annual Reports, Regulations, Bureau Manuals, Registers, Directories and miscellaneous publications. The library will be added to as publications are received from time to time. Any publications carried in the library which have become obsolete will be submitted to the Flag Secretary, who will issue the necessary instructions as to their disposition.

Each publication is listed and assigned a serial number, and filed according to that number.

The File Yeoman will be responsible for the proper classification and filing of the library.

702. The Commander-in-Chief's Library is maintained under the supervision of the Fleet Public Relations Officer. It consists principally of non-fiction although some works of fiction may be included. The books are kept in bookcases in the Admiral's and guest cabins and elsewhere as necessary. The Fleet Public Relations Officer will publish to the staff a list of books on hand and lists of additions as received. All members of the staff are invited to make use of the facilities afforded by this library. It is desired to augment and improve the Commander-in-Chief's library. To this end suggestions as to books which should be obtained are requested from all members of the Staff. Keys to the bookcase of the Commander-in-Chief's Library will be kept in the key locker in the flag office.

[32]

SECTION VIII—RAPID COMMUNICATIONS OF COMMANDER-IN-CHIEF,
UNITED STATES PACIFIC FLEET*Part A—General**801. Drafting of Despatches.*

(a) In order that the Commander-in-Chief may set an example of propriety in drafting of despatches, all officers of the Staff will familiarize themselves with the provisions of Communication Instructions relative to that subject. Communication watch and coding board officers should bring to the attention of originating officers all violations of these instructions and recommend necessary corrections. In no case will a change in a despatch be made without the consent of the originating officer.

(b) An officer originating a non-classified or restricted despatch will have the message typed by his own yeoman, or duty yeoman. After it has been initialed by the originating officer it will be delivered to the communication watch officer who will obtain the initials of the information and releasing officers and supervise the transmission of the despatch.

(c) An officer originating a classified despatch will write or type the message on an outgoing classified despatch blank. After initialing by the originating officer it will be delivered to the communication watch officer who will obtain initials of the information and releasing officers, have the despatch encrypted and supervise its transmission.

(d) All despatches will normally be released only by the Admiral or Chief of Staff. In case of emergencies or special circumstances, despatches may be released by other members of the Staff.

(e) An officer desiring to have a message passed to supplementary addresses for action or information will inform the communication watch officer who will prepare the necessary despatch or procedure signal and obtain initials of originating, information and releasing officers.

802. Security of Communications.

(a) Visual methods or landline will be used for transmission of despatches whenever practicable. The use of radio for transmission of administrative despatches shall be kept at a minimum.

(b) If a delay in the delivery of a despatch is acceptable, such message should be sent by despatch mail (mailgram). Mailgrams should be used particularly

for transmission of despatches to information addressees when it is desirable that their radio calls do not appear in the heading of the radio despatch.

803. Distribution of Despatches.

(a) Copies of all outgoing and incoming non-classified and restricted administrative despatches are provided for the Admiral, Chief of Staff, Operations Officer, Staff Duty Officer, Flag Secretary and Communication Officer. Outgoing despatch books also contain a copy for the originating officer. Incoming despatch books also contain an action copy and two information copies which are available to any member of the Staff who may request such copies from the communication orderly. The Communication Officer's copies of despatches will be placed on a file in the Staff Office where they will be available for perusal by all members of the Staff.

(b) Only one copy of outgoing and incoming classified administrative despatches (other than restricted despatches) will be made. Paraphrases of secret and confidential despatches shall be kept at a minimum and will be furnished only at the specific request of officers, and must be returned to the coding room for burning when no longer needed. Paraphrases of secret messages will be furnished only to the action or originating officer, and shall be receipted for in the same manner as registered publications.

[33] (c) Only four copies of the translations of tactical despatches will be made for distribution to appropriate boards.

804. Routing and Delivery of Despatches. (Internal)

(a) Correct and complete routing of despatches is a function of the communication watch officer.

(b) The Staff Duty Officer should see all despatches when the action officer is not on board. In such cases instructions will be requested by the orderly from the Staff Duty Officer as to whether the latter will accept responsibility for the message or whether it should be held for the action officer.

(c) Whoever initials the message for the action officer and accepts the action copy assumes full responsibility for taking the required action and for informing the designated action officer of the action taken.

805. Movement Reports.

(a) The movement report sheets and cards will be corrected and maintained by communication personnel under the supervision of the communication watch officer designated as Movement Report Officer.

(b) Movement reports of the flag plane will be originated by the pilot making the flight and will be prepared and released by the flagship.

806. Fleet Coding Board.

(a) The fleet coding board will consist of four officers of the Staff and five officers detailed by the Commanding Officer of the Fleet Flagship.

(b) The fleet coding board will be charged with encrypting and decrypting messages sent or received by the Commander-in-Chief or the Fleet flagship, as directed by the Fleet Communication Officer.

(c) The Communication Security Officer will be responsible for the organization and training of the fleet coding board.

807. Shutting Down Transmitters.

Except in case of emergency, permission for securing transmitters must be obtained from the Fleet Communication Officer.

[34] **Part B—Instructions for Communication Personnel**

806. Administrative Communication Organization.

(a) The following stations will normally be manned:

- (1) Main radio room;
- (2) Signal bridge;
- (3) Main communication station;
- (4) Flag communication office;
- (5) Coding room.

(b) The communication watch will normally consist of:

- (1) Communication Watch Officer
- (2) Coding Board Officer
- (3) Communication Supervisor
- (4) Communication Yeoman
- (5) Communication Orderly
- (6) Radio Supervisor
- (7) Signal Supervisor
- (8) Radio Operators
- (9) Signalmen

(c) The communication watch officer will stand a day's duty, relieving the watch at 0800. He will inform his relief regarding unfinished business, effective organization, frequency plan in effect, circuits up, visual signalling conditions, and all pertinent information necessary for the proper conduct of his duties.

(d) The coding board officer will stand a day's duty, relieving the watch at 0800. He will inform his relief regarding unfinished business and all pertinent information necessary for the proper conduct of his duties.

(e) Relief Communication Watch Officers. The first and second relief communication watch officers will maintain a continuous watch in the Flag Communication Office during working hours. The second relief communication watch officer will stand watch from 0800 until after lunch. The first relief communication officer will stand watch from after lunch until 1530, at which time he will be relieved by the communication watch officer with the day's duty. Other relief communication watch officers are available for duty when the traffic situation requires.

(f) The first and second relief coding board officers will maintain a continuous watch in the Coding Room during working hours. The watches will correspond to those stood by relief communication watch officers. Other relief coding board officers are available for duty when the traffic situation requires.

(g) Communication Supervisor. The communication supervisor will stand a day's duty under the administrative organization in the Main Communication Station. He will act as an assistant to the communication watch officer. The time of relieving and hours on watch will be the same as those prescribed for the communication watch officer. The watches for the communication supervisors will be arranged by the Senior Chief Radioman and will be approved by the Assistant Communication Officer.

(h) The radio and signal supervisors shall maintain continuous watches in the Main Radio Room and Signal Bridge respectively. The watches for supervisors will be arranged by the leading radio and signal chief petty officers and will be approved by the flagship's Radio and Signal Officers, respectively.

(i) Communication Yeoman. Communication yeomen will maintain a continuous watch in the Flag Communication Office. The watches will be arranged by the Senior Communication Yeoman and approved by the Assistant Communication Officer.

[35] (j) The flagship will provide sufficient communication orderlies to permit a continuous watch in the Flag Communication Office. When the flagship is underway a continuous watch will also be maintained on the Flag Bridge. Orders for the communication orderlies will be promulgated by the Assistant Communication Officer.

(k) Watches prescribed in the preceding articles will not be exchanged without permission of the officers concerned.

800. Tactical Communication Organization.

(a) The following Stations will normally be manned :

- (1) Main Radio Room ;
- (2) Signal Bridge
- (3) Main Communication Station ;
- (4) Flag Communication Office
- (5) Flag Bridge Radio Station ;
- (6) Flag Bridge Communication Office ;
- (7) Coding Room.

(b) The communication watch normally consists of :

- (1) Communication watch officer ;
- (2) Coding board officer ;
- (3) Two communication yeomen ;
- (4) Two communication orderlies ;
- (5) Communication Supervisor ;
- (6) Radio Supervisor ;
- (7) Signal Supervisor ;
- (8) Radio Operators ;
- (9) Signalmen ;
- (10) Additional members of coding board as necessary.

(c) Communication watch officers shall maintain a continuous watch in the Flag Bridge Communication Office. Off-watch communication watch officers are available for handling administrative traffic and coding duties as the situation requires.

(d) **Coding Board Officers** shall maintain a continuous watch in the Coding Room. **Off-watch coding board officers** are available for coding duties as the situation requires.

(e) The Chief Radioman assigned to the Flag Allowance shall maintain a day's duty watch in the Main Communication Station, and a continuous watch as radio supervisor in the Flag Bridge Radio Station. This watch list may be augmented by qualified first class radiomen as required.

(f) The radio and signal supervisors shall maintain a continuous watch in the Main Radio Room and Signal Bridge.

(g) Communication yeomen shall maintain continuous watches in the Flag Bridge Communication Office and the Flag Communication Office.

(h) The flagship will provide sufficient communication orderlies to permit continuous watches in the Flag Communication Office and on the Flag Bridge.

810. Duties of Communication Watch Officer.

(a) The communication watch officer is in direct charge of the communications of the Commander-in-Chief.

(b) The communication watch officer is responsible for the efficiency of the communication watch and will require an alert and military watch of all communication personnel.

[36] (c) The communication watch officer is responsible for complete and rapid internal distribution of despatches and for the expeditious handling of outgoing traffic.

(d) The communication watch officer is responsible for the handling of encrypted despatches and the efficiency of the coding watch.

(e) The communication watch officer must be fully cognizant of the effective organization of the Fleet and is responsible for setting up and maintaining the communication channels required by the organization.

811. Duties of Coding Board Officers.

(a) The coding board officer is in charge of the operation of the Commander-in-Chief's coding room.

(b) The coding board officer is responsible for expeditious, accurate and efficient encryption and decryption of despatches.

(c) The coding board officer must be fully cognizant of the rules for cryptographic security and will ensure strict observance of these rules in the handling of the encrypted traffic of the Commander-in-Chief.

(d) The coding board officer is responsible for the custody of the cryptographic aids, publications and devices in the coding room.

812. Qualification of Communication Watch Officers and Coding Board Officers.

Upon reporting for duty communication watch officers and coding board officers must undergo sufficient instruction to qualify taking over a watch. To be considered qualified a communication watch officer or coding board officer must:

(a) have a working knowledge of Communication Instructions, Basic Communication Plan, Frequency Plans and Tactical Instructions;

(b) have a working knowledge of the call systems, the General Signal Book and Signal Vocabulary;

(c) have a thorough knowledge of the U. S. Fleet Staff Instructions and Staff Organization;

(d) have a thorough knowledge of the operation of the communication plant of the Fleet Flagship;

(e) be proficient in the use of all cryptographic systems held by the Commander-in-Chief.

(f) have a thorough knowledge of the principles and rules of communication and cryptographic security and their application.

813. Routing of Despatches.

(a) Full and complete routing of despatches is a function of the communication watch officer. A despatch must be seen by every officer having a possible interest in it. Intelligent and complete routing requires a thorough knowledge of the Staff organization and a careful application of this knowledge to each despatch.

(b) Copies of despatches concerning routine reports and requests should not be delivered to the Admiral. Such despatches will be marked "NN" and the Admiral's copy will be delivered to the Assistant Communication Officer for disposition.

(c) Classified despatches, other than restricted, shall be routed to the Chief of Staff, Operations Officer, Communication Officer and Communication Security Officer in addition to action or information officers. The Chief of Staff shall be the first to see classified despatches and shall approve the routing prior to further

delivery. When the Chief of Staff is not available despatches may be shown to the action officer prior to final approval of the routing.

(d) The flag is responsible for delivery of messages addressed to the flagship. Copies of such messages and copies of messages which are not addressed to, but which are of interest to the flagship, shall be delivered to the flagship communication office for internal distribution.

[57] 814. *Delivery of despatches.*

(a) The communication watch officer will be responsible for requiring orderlies to deliver all messages promptly between 0800 and 2230 unless otherwise directed. Between 2230 and 0700 messages will be delivered to action and information officers when so directed by the communication watch officer. In case of doubt, messages will be delivered regardless of the hour. Priority despatches will always be delivered to the action officer immediately.

(b) Delivery of all traffic accumulated during the night will be completed by 0600 daily.

(c) Speed in delivery of despatches, especially those of priority precedence, is essential and the system must not be allowed to delay action. However, it is also essential that despatches be accurately written up. It is the responsibility of the communication watch officer to insure that a complete and accurate copy of all despatches is delivered to the proper officers as soon as possible.

815. *Emergencies.*

(a) The communication watch officer should bear in mind that speed in the delivery of a message indicating an emergency is the primary consideration.

(b) Make use of the telephone as well as messengers. Above all, do not let the system delay action.

(c) Call relief watches as necessary to assist in handling the situation and retain them on watch as long as required.

(d) Be prepared to handle any emergency at night. Before turning in leave clear and definite instructions to be notified immediately in the case of any unusual occurrence.

816. *Encrypted Despatches.*

(a) If time permits, the encryption of each outgoing encrypted despatch will be checked prior to transmission by an officer other than the one who encrypted the despatch. If time does not permit the encryption to be checked prior to transmission it will be checked as soon as possible thereafter.

(b) All intercepted encrypted despatches will be delivered to the coding room where they will be decrypted for information if traffic conditions permit.

817. *Intercepted Traffic.*

Intercepted traffic of possible interest to the Commander-in-Chief will be written up and distributed for information. Each copy will be marked "Written up for Cincpac information."

818. *Radio Logs.*

Radio logs shall be kept in accordance with Articles 1412-1417, Communication Instructions, 1937. The communication watch officer will examine radio logs carefully during his watch for despatches addressed to the Commander-in-Chief, for violations of communication instructions, for intercepted despatches of possible interest to the Commander-in-Chief, and to ascertain that circuit discipline is being maintained.

819. *Transmitting and Receiving Data.*

Transmitting and receiving data will be recorded by the radio operator or signalman as indicated below:

Radio

- (1) Time of Delivery or Receipt
- (2) Frequency
- (3) Operator's sign.

Visual

- (1) Time of Delivery or Receipt
- (2) System
- (3) Signalman's sign.

[38] Communication Files.

(a) **General File.** The general file includes one copy of each message transmitted or received. Service messages (except despatches) shall be stapled to the message to which they refer. Procedure signals not classified as service messages and messages not bearing time groups shall be filed according to time of receipt or delivery. Classified, mailgrams (other than restricted) shall be filed in the classified files and a tickler filed in the general file.

(b) **Shore station Schedule Files.** A copy of each message received by I or F method shall be filed in these files. A separate file shall be maintained for each shore station. Messages shall be filed by shore station serial numbers.

(c) **Movement Report File.** A copy of each notice or modification to the Ship Movement Report Sheets shall be placed in this file.

(d) **Flag Files.** The flag file includes one copy of each message originated by the Commander-in-Chief, addressed to the Commander-in-Chief, or written up for information of the Commander-in-Chief. These messages shall be filed in chronological order of time groups under the headings incoming and outgoing.

(e) **Alnav File.** A copy of each alnav message shall be placed in this file in order of alnav number.

(f) **Fleet File.** A copy of each fleet message shall be placed in this file in order of fleet number.

(g) **Classified Files.** Translations of classified despatches shall be placed in these files in order of coding room serial number. Secret despatches shall be placed in a file separate from the regular classified files.

(h) **Tactical Translation Files.** The tactical translation files contain one copy of the exact translation of each encrypted tactical despatch and one copy of each plain language tactical despatch. Messages will be filed in chronological order of date time groups.

[40] SECTION IX—REGISTERED AND OTHER SECRET AND CONFIDENTIAL PUBLICATIONS

901. The Communications Security Officer is responsible to the Commander-in-Chief and to the Department for the custody of all registered publications.

902. A Communication Watch Officer, designated as Registered Publications Officer, is the custodian of registered and other secret and confidential publications. He shall receipt to the Fleet Communication Security Officer for all registered publications and for other important confidential, secret or restricted documents which must be accounted for by the Commander-in-Chief.

903. All registered and other important publications shall be catalogued to show their receipt and the safes in which they are stowed. No registered publication shall be issued except on written receipt of an authorized individual, which receipt shall be obtained at the time of issue. Other confidential or secret publications and important documents shall be handled in a similar manner.

904. In accounting for registered publications when preparing quarterly returns, each publication actually must be sighted by the officers taking the inventory.

905. Confidential and secret publications shall be kept only in authorized stowages.

906. The Coding Board Officer on watch shall be responsible for the publications in the communication office safes. The Registered Publications Officer shall make a weekly inventory of the contents of the communication office safes.

907. The Registered Publications Officer shall be the only person regularly in possession of the combinations of safes containing un-issued registered publications, except for: (a) communication office safes; (b) War Plans safe; (c) Security Officer's safe. In order that access to any safe may be had in the absence of the regular custodian, the Registered Publications Officer shall maintain in sealed envelopes the combinations of all safes assigned to the Staff. These sealed envelopes shall be kept in the communication office secret safe. Prompt report shall be made to the regular custodian of a safe whenever the envelope containing the combination thereto is opened for any purpose.

908. The Registered Publications Officer shall change the combinations of all safes when he first receipts for the registered publications, and from time to time thereafter; particularly subsequent to the opening of a safe by another officer.

909. The Registered Publications Officer shall keep a record of all "shipment memoranda" to insure receipt of all new matter. He is responsible that all publications in his custody are corrected to date. It is desirable that members of the staff correct their own publications; but even though they do so, their work shall be checked by the Registered Publications Officer, who is responsible for their being corrected.

910. When not actually in use, war plans shall be stowed in the safes especially provided for them. Corrections to the war plans shall be made under the direction of the War Plans Officer. War plans shall not remain out of the above safes overnight. The War Plans Officer shall have custody of all War Plans in use by the War Plans Section, receipting for them to the Registered Publication Officer.

[41]

SECTION X—RELATIONSHIP BETWEEN FLAG AND SHIP

A—Station keeping and maneuvering of flagship

1001. When in formation, the flagship will normally maneuver in obedience to signal in the same manner as other vessels of the formation.

1002. The Commander-in-Chief will, however, as circumstances warrant, verbally direct the flagship to make changes in course, speed, or position.

1003. When, for any reason, the movements of the flagship are no longer to be directed by the flag, the Captain of the flagship will be so informed. He will be further informed as may be practicable, of the interval during which he is expected to act independently.

1004. When in position, the commanding officer is responsible for the station keeping, course, and speed of the flagship as circumstances dictate.

B—Honors

1005. Responsibility for rendering proper honors lies with the flagship except that no gun salutes shall be fired without the authority of the Commander-in-Chief. Advance information as to honors shall be furnished by the Flag Lieutenant or Staff Duty Officer.

C—Personnel

1006. Officers of the Staff shall be careful to preserve the unity of command of the flagship. To this end they shall give no orders to the officer-of-the-deck except in an emergency. Personal requests may be made to subordinate officers of the flagship but official requests to the ship shall always be made direct to the Captain or Executive Officer. Such requests should be headed, "The Admiral desires you-----Etc."

1007. The Flag Division Officer and the Junior Division Officers will be the Communication Watch Officers or Coding Board Officers so designated.

1008. Leave and liberty for all men assigned special duty with the flag will be regulated by the Flag Secretary who will regulate it to conform as closely to that of the flagship, as flag work will permit. (See Article 407 (a)). The flagship will regulate, control, and administer the following functions pertaining to flag personnel:

- (a) Reports, inspections, records and accounts, and advancements in ratings.
- (b) Personal requests (via Flag Secretary).
- (c) Disciplinary matters.

(d) The division parade is assigned by the flagship. The Flag Division Officer is in charge at division parade. He reports to the Executive Officer at quarters, the number of unauthorized absentees.

1009. The following instructions govern the routine muster of flag personnel:

(a) All flag personnel except the marines will muster at quarters with the flagship.

(b) The marines assigned as flag allowance, will muster with the ship's marine detachment.

1010. Flag Division personnel will be stationed for abandon ship drill and will report at quarters for this drill unless excused. At fire and collision drills and general quarters, Flag division personnel will, when men detailed by the ship have failed to do so, secure ports, etc., in offices and other places devoted strictly to Flag activities. The Flag division, will not go to quarters for these drills except that radio and visual communications will actually be manned.

[42] 1011. The Flag division officer and the Junior Flag division officers will conduct bag and bedding inspections of the Flag Division. The ship will provide berthing and messing for all personnel of the Flag Division. Flag Division personnel under the direction and supervision of the Flag Division Officer will clean all compartments dedicated exclusively to Flag use. Boat crews, under the direction of the Flag Lieutenant, will clean the barges and staff boats; the signal force, under the direction of the Flag Lieutenant, will clean the Flag Bridge and Flag Conning Tower.

1012. All members of the Staff shall be assigned battle stations which will be manned when "General Quarters" is sounded. Enlisted men of the Flag not required for Staff Battle Stations will be assigned to ship battle stations. Enlisted men of the Flag will stand Flag condition and cruising watches, but will not stand ship cruising watches.

1013. The Flag Lieutenant is in direct charge of the boat crews, chauffeur, signal force, Admiral's mess attendants, boats, and automobiles (Band and Orchestra if assigned), and is directly responsible to the Commander-in-Chief for their appearance, training and performance. The ship is responsible for maintenance and upkeep. The Flag Lieutenant, and, in his absence, the Staff Duty Officer, regulates the employment of the Staff motor boats and the Chief of Staff's barge when it is used as the Staff duty boat. He will prepare the schedules for all staff motor boats, prescribing the routine hours for securing and the places of securing away from the ship and will furnish information as to liberty of boat crews, after securing, to the Flag Secretary. The Officer-of-the-Deck will keep the Flag Lieutenant, and in his absence, the Staff Duty Officer, informed of the movements of the barges and the staff motor boats.

1014. The Commanding Officer of the Flagship shall be responsible that all safety precautions of the barge and staff gig be made as are required by existing regulations and instructions.

D—Routine Reports

1015. In order that the routine reports to the Commander-in-Chief may be complete and uniform, the Commanding Officer of the flagship is requested to promulgate the following instructions:

(a) *At Anchor*

(1) The Officer-of-the-Deck shall make reports to Commander-in-Chief as follows:

- (a) The hours of 0800, 1200 and 2000.
- (b) Ship's Movements.
- (c) All marked changes in the weather.
- (d) Display of storm signals.
- (e) All occurrences worthy of notice.

(2) The Officer-of-the-Deck shall report salutes fired, exchanges of official calls, shifting of personal flags and movements of ships to the Commander-in-Chief, the Chief of Staff, and to the Flag Lieutenant, or in the absence of the Flag Lieutenant to the Staff Duty Officer.

(3) The Officer-of-the-Deck shall announce requirements for Staff attendance at the accommodation ladder by loud speaker: "Staff Gangway". Boat gongs shall also be sounded in number equal to the number of side boys required in attendance; e. g., for Admiral and Vice Admiral, eight (8) gongs; for Rear Admiral, six (6) gongs; and for Captain, four (4) gongs. The above procedure shall be carried out by the Officer-of-the-Deck in sufficient time for the Commander-in-Chief, the Chief of Staff, and the Flag Lieutenant, or, in his absence, the Staff Duty Officer, to reach the Quarter Deck and properly meet visiting officers. When the Commander-in-Chief is leaving the ship, the Officer-of-the-Deck will notify the Flag Lieutenant, or in his absence, the Staff Duty Officer, and the Chief of Staff, when the barge or automobile is alongside.

(4) The signal Bridge supervisor shall report all movements of ships getting underway, or coming to anchor, shifting of personal flags, exchange of salutes, and any occurrences worthy of notice to the Officer-of-the-Deck.

[43] (5) When the Admiral has retired, the Officer-of-the-Deck shall make necessary reports to the Staff Duty Officer who will indicate what action is to be taken.

(6) During the night the Officer-of-the-Deck shall report to the Staff Duty Officer only such movements of ships as he deems necessary. The Signal Bridge supervisor will report to the Flag Lieutenant or to the Staff Duty Officer, prior to 0800, any movements of ships occurring during the preceding night.

(b) *Underway* (1) The Officer-of-the-Deck shall report to the Commander-in-Chief via the Staff Duty Officer on watch on the Flag Bridge:

- (a) The sighting of land, rocks, shoals, lighthouses, beacons, buoys, and discolored water.
- (b) All vessels or wrecks discovered.
- (c) All marked changes in the weather.
- (d) All occurrences worthy of notice.

If the ship is operating independently, the Officer-of-the-Deck shall make the above listed reports direct to the Chief of Staff and officer with the day's Staff Duty.

(2) If the Commander-in-Chief should be on the Navigating Bridge, the Officer-of-the-Deck will make reports direct to him, reporting thereafter to the Staff Duty Officer on watch.

(3) When underway making passage or outside the usual operating areas the Navigator shall report the ship's position at 0800, 1200 and 2000.

EXHIBIT NO. 127

Confidential.

UNITED STATES PACIFIC FLEET

AIRCRAFT SCOUTING FORCE

FLEET AIR DETACHMENT,
NAVAL AIR STATION, SAN DIEGO, CALIFORNIA.

Dec. 18, 1941.

From: Commander Aircraft, Scouting Force, Pacific Fleet.

To: The Chief of Naval Operations.

Via: The Chief of the Bureau of Aeronautics.

Subject: Procurement of Long Range Bombing Landplanes for Patrol Wing Two.

1. Commander Patrol Wing Two has expressed an urgent need for long range landplane bombers, for use initially as patrolling aircraft covering the approaches to Oahu. Further uses of these planes in long range photographic reconnaissance and in offense are many. He has stated further that he has temporarily under his command from the Army a squadron of B-17 airplanes for such operations in conjunction with his VPB's and that for purposes of liaison, indoctrination and familiarization, he is assigning Naval Aviators to those aircraft as second pilots on their joint patrol missions.

2. Commander Aircraft, Scouting Force concurs in the request of Commander Patrol Wing Two and strongly recommends the immediate transfer from Lend Lease or other source of 15 B-17 (Boeing) or B-24 (Consolidated) bombers for this purpose and that an increase in that number in the future, as circumstances and experience may dictate, be considered. With the high speed of these aircraft, the additional area covered during daylight hours on a search adds immeasurably to security. Particularly is this true during the shorter days in winter.

3. Germane to this recommendation is the highly desirable possibility of the early establishment of patrol plane operating facilities at Magdalena Bay, Baja California, from which could be covered effectively the southwest approaches to the United States in conjunction with the patrol being conducted from San Diego. Provision of a squadron of subject landplane bombers in the Hawaiian area might serve to release for operation at Magdalena Bay, one of the three Patrol Squadrons to be equipped presently at Alameda.

4. In view of the current situation, this is being forwarded direct. The approval or comment of the Commander-in-Chief, U. S. Pacific Fleet is requested.

J. S. McCain.

Copy to: CinCpac, Comscofor, Computwing 2.

Secret—No. 18

HEADQUARTERS HAWAIIAN AIR FORCE,
OFFICE OF THE AIR FORCE COMMANDER,
Hickam Field, T. H., 22 December, 1941.

In reply refer to:

Memorandum to Roberts Commission:

1. Since my arrival I have issued orders or instructions for security and employment of the Hawaiian Air Force as follows:

- a. Ordered immediate wider dispersal of airplanes, supplies and personnel.
- b. Directed surveys to be made of additional fields for operation of aircraft on the Island of Oahu.
- c. Required the movement of pursuit into Hickam Field area for more positive protection in the event of adverse weather at the former base at Wheeler Field.

d. Mover obsolescent B-18 and A-20s to Bellows Field to eliminate the airplane congestion at Hickam Field. A-20s were later moved to Wheeler Field.

e. Moved one squadron B-17s to Wheeler Field to further relieve congestion at Hickam Field.

f. Directed that all planes be camouflaged. Those arriving from the mainland to be painted immediately upon arrival.

g. Directed plans be completed for air transport of aircraft ammunition to Maui and Molokai, capable of dispatch on two hours notice.

h. Have issued orders on alerts as follows:

"1. 30 before sunrise to 0800, and one (1) hour before sunset to 30 after sunset 1/8 Army Pursuit and Navy fighters in air.

"All other Army and Navy planes including pursuit excepting searching planes warmed up, manned and ready to take off.

"2. Between 0800 and one (1) hour before sunset:

1/8 Army and Navy Pursuit in air.

1/6 Army and Navy Pursuit warmed up, manned and ready to take off.

"All other Army and Navy planes including fighters excepting searching planes on one hours notice.

"3. One (1) hour after sunset, 30 minutes before sunrise ¼ planes on one (1) hours notice, ¾ on four (4) hours notice."

e. I have visited all operating airdromes, made ground reconnaissance of areas where additional airdromes are to be located, have discussed tactical operations, administrative problems, morale and rewards with all major commanders.

j. I have conferred with Com. Pat. Wing Two and expect to submit to the Department Commander within twenty four hours revised plans for the employment of the Air Force in the Hawaiian area.

k. I have directed that plans be made and they are well underway for the use of certain elements of the Air Force in offensive operations.

l. Commanding General, 18th Bombardment Wing, directed to have striking force of minimum of 18 b-17's available at all times.

m. Directed that a positive system of aircraft and surface ship identification be arranged.

(S) C. L. Tinker

C. L. TINKER,

Brigadier General, U. S. Army, Commanding.

[1] F1
Confidential

UNITED STATES PACIFIC FLEET

AIRCRAFT SCOUTING FORCE

FLEET AIR DETACHMENT,

NAVAL AIR STATION,

San Diego, California, Dec. 24, 1941.

From: Commander Aircraft, Scouting Force, Pacific Fleet.

To: The Chief of the Bureau of Aeronautics.

Subject: Procurement of Four-Engine Land Planes—Request for.

1. Contract 78903 dated 19 November 1940, is for the delivery of 200 PB2Y-3 airplanes. A supplementary contract 78903 dated 30 June 1941, is for the delivery of 54 airplanes, presumably PB2Y-4's. The progress report on this contract submitted by the Inspector of Naval Aircraft, San Diego, for the period ending 30 November 1941, estimates the delivery of the airplanes in quantity in October 1942. These estimated delivery dates are extremely disappointing as four-engine airplanes are urgently required. Experiences with Consolidated Aircraft, would indicate that this October 1942 delivery date will not be anticipated.

2. Commander Aircraft, Scouting Force believes that a part of our patrol aircraft should be long range land plane types. So long as there are prepared fields from which these planes may operate, the advantages to be derived from their operation are numerous. Among them are:

(a) Greater ease and celerity in handling and servicing after flight (a big item when number and fatigue of beach crews is considered).

(b) Quicker to get off on a mission.

(c) Cover larger area in daylight search.

(d) Higher speed and ceiling permits of long range photographic reconnaissance of enemy defended positions with infinitely less hazard.

(e) Greater striking power, particularly in a torpedo attack.

[2] Need for this type has been keenly felt in the last two weeks. The seaplane, however, still must be used from advanced bases in areas where no landing field exists.

3. A comparison of the performance of the B-24-D, and the PB2Y-3 airplane, which information has been obtained from the specifications, is tabulated below as a matter of interest:

<i>B-24-D</i>	<i>PB2Y-3</i>
Performance @ 41,000# V max @ 25,000 ft. with military power—316 MPH.	Performance @ 66,000# V max @ 20,000 ft.—236 MPH.
Operating speed @ 25,000 ft.—220 MPH.	
Service ceiling—34,000 ft.	Service ceiling—22,300 ft.
Service ceiling any two engines—19,000 feet.	
Range at operational speed carrying 8 1,000# bombs—2,000 miles.	Range at combat load carrying 4 1,000# bombs—2,370 miles.
Bomb Load:	Bomb Load:
4—2,000 lb. or	8—1,000 lb. or
8—1,000 lb. or	8—500 lb.
8—500 lb. or	In addition 4 1,000 lb. bombs can be carried on external tanks.
12—300 lb. or	
20—100 lb.	
Armament:	Armament:
1 .50 cal. Nose gun and 500 rounds	1 .50 cal. bow gun and 400 rounds.
2 .50 cal. top guns (twin mount) and 800 rounds.	2 .50 cal. side waist and 800 rounds.
2 .50 cal. bottom guns (twin mount) and 600 rounds.	1 .50 cal. tunnel and 400 rounds.
2 .50 cal. tail guns (twin mount) and 1,000 rounds.	1 .50 cal. upper waist and 400 rounds.
Total—7 .50 caliber—2,900 rounds ammunition.	2 .50 cal. tail (twin mount) and 800 rounds.
	Total—7 .50 caliber—2,800 rounds ammunition.

[3] 4. This command has been informed by Consolidated Aircraft officials that the B-24-D is now in production, and will be produced in increasing number. Further the B-24-D is a less expensive plane and lends itself to production better than the PB2Y type.

5. Accordingly, Commander Aircraft, Scouting Force recommends that negotiations be undertaken with the Army Air Corps to obtain a total of sixty B-24-D airplanes at the earliest opportunity. Whether or not the PB2Y-3 contract could be reduced by that number would depend on the course of events.

Your 911145. Comairscfor 312913. Fully agree. However the necessary detachment patrol 22 and nonavailability additional patrol planes from mainland for at least several months makes situation here very critical. Total patrol planes 68, Army heavy bombers 44. Impossible satisfactorily meet simultaneous requirements for effective daily research reasonable air striking force material maintenance and personnel fitness. Best possible results being obtained but

2870 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

searches far from positive and air striking force too small. Replacement 17 PBV-3 planes here by Army B-24 planes would make vital improvement in situation for both search and striking. Attention this connection invited comairscor for serial #755 of December 18 with which CINCPAC heartily concurs. Subject fully covered in separate correspondence being forwarded airmail. Crews can be spared from here for taking over and ferrying B-24's. With background patrol plane qualification this can be quickly accomplished. Urgently recommend favorable consideration and immediate initiation action.

Withdrawals of Army bombers and Navy patrol planes from this theatre even though temporary for other projects leave us dangerously weak against aircraft carrier and other forms of attack. Retention of Oahu is by no means assured with present available forces. Navy patrol wings should be increased to 144 planes composed of both seaplane and landplane types for maintenance effective search. Carrier squadrons should be filled and kept filled to full allowance of spares to insure maximum effective seaborne striking force. To maintain even present daily search imposes greater load on material and personnel than can be much longer continued. See my 041001. See Commanding General Hawaiian Departments despatch of even date to War Department with which CINCPAC strongly concurs. ComdGenHaw Detp informed by mail.

The Honorable The ATTORNEY GENERAL,

Washington, D. C.

(Attention: Wendell Berge, Assistant Attorney General.)

SIR: Reference is made to your letter dated May 22, 1941 in which you asked my opinion concerning the prosecution of the several Japanese Sub-Consular Agents in Hawaii and also my radiogram of May 31, 1941 relative to the same matter.

Immediately after receiving your letter, I contacted Mr. R. L. Shivers, Special Agent in charge of the Federal Bureau of Investigation and Agent F. G. Tillman, who has been assigned to Japanese matters exclusively. Although I have been aware of this general situation for some time, no reports concerning these matters have been submitted to this office. Mr. Shivers brought with him, at my request, a copy of the investigative report of Special Agent F. G. Tillman, dated at Honolulu, March 10, 1941, in reference to ITSUO HAMADA, concerning a violation of the Registration Act. From my conversation with Mr. Shivers and Mr. Tillman and from the information set out in the report, I think that a successful prosecution could be had against this individual and other Japanese Sub-Consular Agents in the Territory if the facts are substantially the same in all of these cases. Mr. Shivers advises me that about forty of these cases have been investigated completely and would be ready for immediate prosecution, and that the facts in the remaining two hundred or so are approximately the same and they could be brought up to date with very little notice.

In a conference with representatives of the Army and Navy in which Captain I. M. Mayfield represented the Admiral of the 14th Naval District and Colonel M. W. Marsden represented the Commanding General of the Hawaiian Department, Captain Mayfield stated that it was the opinion of the Admiral that prosecution should be instituted immediately against these Japanese Sub-Consular Agents and that it should be handled in a routine manner so as to cause as little disturbance as possible. Colonel Marsden stated that it was the opinion of the Commanding General of the Hawaiian Department who is charged with the internal security of the Islands, that prosecution at this time would be detrimental to the general plans of the Army and would probably have a bad effect on work already done. It is also the Commanding General's opinion that the majority of the American citizens of Japanese ancestry will be loyal to the United States and that prosecution at this time of the Sub-Consular Agents would only tend to aggravate the situation and probably materially effect the loyalty of these individuals. The Army has conveyed the opinion to the Japanese population as a whole that they will be taken care of and given full protection of the law if they are loyal to the United States.

It is my opinion that these prosecutions should be instituted at the earliest possible time if they do not conflict with any policy of the State Department or other Departments of the Government. I think it has been clearly developed from investigation that these Sub-Consular Agents exercise an enormous influence on the Japanese population in the Territory and all evidence indicates the fact that they are the sources of information for the Consul and the Agents through whom he delivers his instructions to the Japanese in the Territory.

I think that if we ever hope to divorce the influence of the Consul and Tokyo from the Japanese people in the Territory of Hawaii, it should be begun immediately and that this would be one of the best steps in that direction.

During the conference with the Army and Navy and other conferences that I have had with individuals in Honolulu in reference to this situation, it is impossible to predict just what reaction the Japanese population as a whole in the Territory would have to such a step, but it is my opinion that the good that would be done would far outweigh any evil that might result.

No further action will be taken on this matter until advice is received from you.

Respectfully,
AMT:JB

ANGUS M. TAYLOR, Jr.,
United States Attorney,
District of Hawaii.

A true copy. Attest:
/S/ THOMAS C. HART,
Admiral, U. S. Navy, Retired,
Examining Officer.

Exhibit 32 (2).

WENDELL BERGE
Assistant Attorney General

DEPARTMENT OF JUSTICE,
Washington, June 13, 1941.

Re: Co 800.01B11 Registration—Koike, Yoshio
The Honorable The SECRETARY of STATE.

SIR: This will acknowledge the receipt of your letter dated June 11, 1941, in the above-entitled matter, in reply to our letter of April 10, 1941. It is understood that you have also received a number of investigative reports from the Federal Bureau of Investigation concerning Japanese consular officers in Hawaii.

The Criminal Division has concluded from the investigative reports that these individuals have acted as agents of the Japanese Government. It appears that the Japanese Government requires detailed reports concerning the lives and activities of all persons in Hawaii whom it considers as Japanese citizens. However, the Japanese Government seems unwilling to employ the necessary consular staff to carry out this program. To accomplish its purpose, it appoints numerous Japanese citizens in Hawaii as agents to aid in this work. While these agents receive no compensation from the Japanese Government, they are commissioned to act, and apparently can only act, with the consent of the Japanese

2872 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Government; their activities are for the benefit of the Japanese Government; and their work is in furtherance of matters required by the Japanese Government.

Apparently none of these agents have been notified to the Secretary of State, but there remains the question of whether or not they are "diplomatic or consular officers or attaches". It is the view of the Criminal Division that they cannot be so considered and that they have, therefore, violated Section 233 of Title 22 of the United States Code.

It is noted that you have inquired of the Japanese Embassy to ascertain whether forms have been forwarded by the Embassy to the Department of State with regard to all Japanese Government officials on whose behalf exemption is claimed from the provisions of the Act approved June 15, 1917, and certain other acts, and that you will advise us further in this matter when an answer is received from the Japanese Embassy.

The United States Attorney for the District of Hawaii has recommended that prosecutions should be instituted at the earliest possible date against these agents for violation of said Section 233, if said prosecutions do not conflict with any policy of the Department of State or other Department. He states that the good that would be done in restricting the enormous Japanese influence in Hawaii would far outweigh any evil that might result.

It will be greatly appreciated if you will advise us as soon as possible whether or not the Department of State considers these agents as "diplomatic or consular officers or attaches" and of any statement the Department of State may be pleased to make with reference to the contemplated prosecutions.

Respectfully,

For the Attorney General,

WENDELL BERGE,
Assistant Attorney General.

JUNE 26, 1941.

In reply refer to
Co 800.01B11 Registration—Kolke, Yoshio

The Honorable ROBERT H. JACKSON,
Attorney General.

MY DEAR MR. ATTORNEY GENERAL: I acknowledge the receipt of Mr. Berge's letter of June 13, 1941 in regard to the matter entitled "Yoshio Kolke—Registration Act".

With reference to the inquiry concerning the status of Kolke and other individuals whose names have been set forth in reports received from the Federal Bureau of Investigation who are said to be performing certain services on behalf of the Japanese Government in Hawaii, I may say that while this Department has no information concerning the personal status of these individuals with reference to the Japanese Government, they are not considered to have the status of diplomatic or consular officers or attaches who are accredited to this Government and, accordingly, the Department perceives no objection to the contemplated prosecution of these individuals for violation of the provisions of Title VIII of the Act of June 15, 1917 (Title 22, United States Code, section 233).

Sincerely yours,

DEAN ACHESON,
Assistant Secretary.

JWB
PA/H
MMH

In reference to the attached file, 800.01B11 Registration Kolke, Yoshio/8, you may note that:

Under date June 26, 1941, the Department wrote to the Attorney General, in reference to reports received from the Federal Bureau of Investigation concerning the performing of certain services in Hawaii on behalf of the Japanese

Government, stated that the Department perceives no objection to prosecution of the persons concerned for violation of the provisions of the Act of 1917 requiring the notification to the Department of agents of foreign governments.

The Secretary of War, in a letter of July 25, 1941, to the Attorney General on the same subject, expressed opposition to the proposed prosecutions and strongly recommended that a warning be issued to any unregistered Japanese Consular agents.

A copy of the July 25 letter of the Secretary of War was supplied to this Department by the Department of Justice under cover of a letter of August 4, 1941, which states that the enclosure is being transmitted to this Department for its "information". The Department of Justice does not indicate what is to be its decision in the matter of the proposed prosecutions; but the fact that the objections of the Secretary of War are communicated to the Department gives rise to the inference that the Department of Justice is not at present contemplating proceeding with the prosecutions.

DEPARTMENT OF JUSTICE,
Washington, August 4, 1941.

Re: Japanese Consular Agents in Hawaii, Your File Co. 800.01B11—Registration, Kolke, Yoshio

The Honorable, the SECRETARY OF STATE:

SIR: Reference is made to your letter dated June 26, 1941, concerning the prosecution of Japanese consular agents in Hawaii under Section 233 of Title 22, United States Code.

There is inclosed herewith for your information a photostatic copy of a letter dated July 25, 1941, from the Secretary of War, concerning this matter.

Respectfully,

/s/ WENDELL BERGE.
Assistant Attorney General.

WAR DEPARTMENT,
Washington, July 25, 1941.

The Honorable The ATTORNEY GENERAL.

DEAR MR. ATTORNEY GENERAL: Upon receipt of your letter of July 14, 1941 on the subject of the prosecution of certain unregistered Japanese consular agents in the Territory of Hawaii I dispatched a secret radiogram to the Commanding General, Hawaiian Department, directing him to radio his recommendations stating clearly his reasons and objections if any to the proposed prosecutions.

A paraphrased copy of his reply is attached hereto.

I concur in the statements and objections set forth by the Commanding General, Hawaiian Department, and strongly recommend that a warning be issued to these unregistered Japanese consular agents, through their accredited Consul General in Honolulu, to register by a certain date, say within a period of thirty days after promulgation of the warning, under penalty of prosecution for violation of our laws.

I believe that such a warning will effect the desired registration and contribute materially toward the Commanding General's campaign to secure the loyalty of the Japanese population of the Territory.

Sincerely yours,

/s/ HENRY L. STIMSON,
Secretary of War.

1 Inclosure: Paraphrase of Radiogram.

2874 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

**PARAPHRASE OF CODE RADIOGRAM RECEIVED AT THE WAR DEPARTMENT AT 9:58,
JULY 22, 1941**

Hawaii, filed July 21, 1941.

We are at present engaged in a counter propaganda campaign whose object is to encourage loyalty of the Japanese population of Hawaii on promise of fair treatment. The present outlook of results of this campaign on entire population is very favorable. Success of the campaign would promote unity and greatly reduce proportions of our defense problem. Espionage Act of June 15, 1917 referred to in your radio of July 19, 1941 has been in effect here since August 1939 with no attempt at local enforcement. As result of careful survey of situation, considering available facts and opinions FBI and other Federal agencies I believe not over ten per cent of the unregistered consular agents in Hawaii are aware they have violated our laws. I believe further that prosecution at this time would unduly alarm entire population and jeopardize success our current campaign to secure loyalty Japanese population.

In my opinion fair play demands that warnings be given to consular agents to register by a certain date on penalty of prosecution. I believe development of loyalty among Japanese population more important than punishment of a few individuals. It is impracticable to place total Japanese population of one hundred sixty thousand in concentration camps.

SHORT.

INDEX OF EXHIBITS

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
1-----	23 11-15-45	1	Selection of intercepted diplomatic messages sent and received by the Japanese Government and its foreign establishments between July 1 and Dec. 8, 1941.
2-----	24 11-15-45	254	Selection of intercepted messages sent and received by the Japanese Government and its foreign establishments between Dec. 2, 1940, and Dec. 8, 1941, concerning military installations, ships movements, espionage reports, etc.
3-----	87 11-16-45	317	Navy Department dispatch No. 252203 dated Nov. 25, 1941, directing the routing of trans-Pacific shipping through Torres Straits.
4-----	142 11-16-45	318	Chart showing plotting record of early plane flights Dec. 7, 1941, obtained by Opana Radar Detector Station.
5-----	153 11-16-45	318	Army compilation of documents, tables, photographs, and maps offered by Colonel Thielen as illustrating his narrative statement.
6-----	153 11-16-45	337	Navy compilation of documents, tables, photographs, and maps offered by Admiral Inglis as illustrating his narrative statement.
7-----	172 11-17-45	391	Photostatic copy of Opana Radar Detector Station plot, submitted by Senator Ferguson, identified by Admiral Inglis, previously marked "Exhibit 3-B in evidence" in proceedings before Army Pearl Harbor Board.
8-----	233 11-19-45	391	Material obtained by Army and Navy primarily from Japanese sources, relating to Japanese plans for Pearl Harbor attack. (See table of contents attached to this exhibit.)
8-A-----	1792 12-18-45	413	Report dated Nov. 29, 1945, from General MacArthur, Tokyo, with further reference to Japanese plans for Pearl Harbor attack.
8-B-----	1792 12-18-45	415	Report dated Nov. 29, 1945, from General MacArthur, Tokyo, with further reference to Japanese plans for Pearl Harbor attack.
8-C-----	1792 12-18-45	424	Report dated Dec. 4, 1945, from General MacArthur, Tokyo, with further reference to Japanese plans for Pearl Harbor attack.

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
8-D-----	2480 1-5-46	425	Report dated Dec. 13, 1945, from General MacArthur, Tokyo, with further reference to Japanese plans for Pearl Harbor attack.
9-----	256 11-19-45	923	Selection of letters between Admiral H. R. Stark and Admiral J. O. Richardson, from Jan. 18, 1940, to Feb. 10, 1941. (See table of contents attached to this exhibit.)
10-----	279 11-20-45	1000	Letter dated Jan. 24, 1941, from Secretary of Navy to Secretary of War regarding defenses of Pearl Harbor, and reply by Secretary of War, dated Feb. 7, 1941; letter from Adjutant General to Commanding General, Hawaiian Department, dated Feb. 7, 1941, transmitting the above letters with instructions and receipt therefor.
11-----	319 11-21-45	1006	Memorandum dated Oct. 16, 1940, from Admiral Richardson to Admiral Hart, concerning a proposed blockade of Japan in the event of aggressive action over the reopening of the Burma Road.
12-----	363 11-21-45	1013	Letters from War Department and Navy Department with enclosures, dated Nov. 7, 1945, and Nov. 14, 1945, respectively, to Congressman Frank B. Keefe, concerning data on amounts requested by the services, amounts approved by the Bureau of the Budget, and contract authorizations for the years 1932 through 1941.
13-----	387 11-21-45	1019	Study of the air situation in Hawaii dated Aug. 20, 1941, by Maj. Gen. F. L. Martin, Commanding General, Headquarters Hawaiian Air Force, for Commanding General, Army Air Forces, through Commanding General, Hawaiian Department.
14-----	397 11-21-45	1040	Letter dated Apr. 14, 1941, from Assistant Adjutant General, Hawaiian Department to the Adjutant General, entitled "Air Defense of Pearl Harbor" in reply to letter of Feb. 7, 1941, on this subject (see exhibit No. 10), enclosing Annex No. 7 to Joint Coastal Frontier Defense Plan, Joint Estimate Hawaiian Air Force, and Patrol Wing 2 (Naval Base Defense Air Force), and Field Order No. 1 NS (Naval Security).
15-----	401 11-23-45	1042	Dispatches from Ambassador Joseph E. Grew, Tokyo, to Department of State, dated Jan. 27, 1941, Nov. 3, 1941, and Nov. 17, 1941; memorandum dated Feb. 1, 1941 from Chief of Naval Operations to Commander-in-Chief, Pacific Fleet, advising him of contents of above message dated Jan. 27, 1941, which reported Japan would make surprise attack on Pearl Harbor in event of trouble with United States.

16-----	401 11-23-45	1061	(a) Memorandum "Estimate Concerning Far Eastern Situation", dated Nov. 5, 1941, for the President, by General Marshall and Admiral Stark; (b) Minutes of The Joint Board for Nov. 3, 1941; (c) Memorandum "Far Eastern Situation" dated Nov. 3, 1941, for General Marshall by General Gerow.
16-A-----	3839 2-6-46	1077	Undated note from President Roosevelt to Secretary Hull, attached to letter dated Oct. 30, 1941, from Secretary Morgenthau to the President, transmitting a message from Generalissimo Chiang Kai-shek.
16-B-----	4341 2-13-46	1081	Message dated Nov. 7, 1941, from President Roosevelt to Prime Minister Churchill, delivered through the Department of State.
17-----	402 11-23-45	1083	Memorandum "Far Eastern Situation" dated Nov. 27, 1941, for the President, by General Marshall and Admiral Stark.
18-----	402 11-23-45	1084	Documents relating to proposed " <i>Modus Vivendi</i> ," including Secretary Hull's recommendation dated Nov. 26, 1941, to President Roosevelt. (See table of contents attached to this exhibit).
19-----	402 11-23-45	1201	Memorandum dated Nov. 29, 1941, by Secretary Hull for the President, and attached draft of a proposed message from the President to Congress, and proposed message from President to Emperor of Japan.
20-----	402 11-23-45	1226	Message dated Dec. 6, 1941, from President Roosevelt to Emperor of Japan, and related documents, including draft of proposed message dated Oct. 17, 1941.
21-----	402 11-23-45	1246	Two dispatches dated Dec. 6, 1941, from Ambassador Winant, London, to State Department; memorandum of conversation dated Nov. 30, 1941, between Secretary Hull and British Ambassador, with attached memorandum; memorandum handed to Mr. Hornbeck by Netherlands Minister on Nov. 21, 1941; dispatch from Secretary of State to United States Consul, Manila, P. I., dated Nov. 29, 1941. All documents concern intelligence information relating to Japanese military and naval units in the Far East.
22-----	458 11-23-45	1252	(a) British draft, dated Aug. 10, 1941, of proposed parallel communications to Japanese Government; (b) Two messages from the President (at Atlantic Conference) to Secretary Hull, Nos. 121645 and 160115; (c) Draft, dated Aug. 15, 1941 (not used), of proposed communication to the Japanese Ambassador brought to State Department by Sumner Welles following (Atlantic) conference between the President and British Prime Minister.
22-A-----	1694 12-15-45 2065 12-31-45	1262	Revised draft (not used), dated Aug. 16, 1941, of draft dated Aug. 15, 1941 ((c) above), of proposed statement to the Japanese Ambassador, prepared by Sumner Welles. (See p. 556, vol. II, Foreign Relations of the United States, Japan 1931-1941, Joint Committee Exhibit No. 29, for text of statement made to Japanese Ambassador by the President on Aug. 17, 1941.)

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
22-B-----	1783 12-18-45	1269	Memorandum, dated Aug. 10, 1941, prepared by Sumner Wells of his conversations that date at the Atlantic Conference with Prime Minister Churchill and Sir Alexander Cadogan, concerning proposed parallel action with reference to Japan.
22-C-----	1783 12-18-45	1275	Memorandum, dated Aug. 11, 1941, prepared by Sumner Wells, of conversations that date at the Atlantic Conference between President Roosevelt and Prime Minister Churchill, attended by Welles, Sir Alexander Cadogan, and Harry Hopkins concerning "British-American Cooperation".
22-D-----	1783 12-18-45	1292	Memorandum, dated Aug. 11, 1941, of conversation between Sumner Wells and Sir Alexander Cadogan, concerning "British-American Cooperation" at the Atlantic Conference, and Welles' subsequent conversation with the President.
23-----	476 11-24-45	1300	Message, dated Nov. 26, 1941, from Prime Minister Churchill to President Roosevelt, transmitted by Ambassador Winant.
24-----	476 11-24-45	1300	Message, dated Nov. 30, 1941, from Prime Minister Churchill to President Roosevelt, transmitted by Ambassador Winant.
25-----	574 11-26-45	1301	Dispatch, dated Dec. 1, 1941, from Ambassador Grew, Tokyo, to Secretary of State, reporting reaction in Japan to the Secretary's proposal of Nov. 26, 1941 (the so-called Ten-Point Note). See pp. 766 to 770, vol. II, Foreign Relations of the United States, Japan 1931-1941, for proposal dated Nov. 26, 1941, to the Japanese Government.
26-----	634 11-27-45	1303	Dispatch, dated Sept. 24, 1940, from Ambassador Grew, Tokyo, to Department of State concerning general policy toward Japan (so-called "green light" dispatch).
27-----	670 11-27-45	1315	"Peace and War, United States Foreign Policy, 1931-1941", Introduction (pamphlet edition, 1942), Department of State Publication 1853.
28-----	670 11-27-45	1315	"Peace and War, United States Foreign Policy, 1931-1941", Introduction and Documents (cloth edition, 1943), Department of State Publication 1883.
29-----	670 11-27-45	1315	"Foreign Relations of the United States, Japan, 1931-1941", vols. I and II (1943). Department of State Publication 2008.
30-----	670 11-27-45	1315	"Ten Years in Japan", by Joseph C. Grew, Simon and Schuster (1944).

INDEX OF EXHIBITS

IX

31.-----	787 11-28-45	1316	Six dispatches bearing various dates from April 4 to Dec. 2, 1941, from United States diplomatic officials in foreign countries reporting to the Department of State inquiries and comments of Japanese representatives in those countries concerning possible break in United States-Japanese relations.
32.-----	778 11-29-45	1326	Selection of messages between War Department and Hawaiian Department from July 8 to Dec. 7, 1941. Included are certain messages sent by the War Department to the Western Defense Command, to General MacArthur in the Philippines, and to Commanding General, Panama, as well as their replies. (See table of contents attached to this exhibit.)
33.-----	778 11-29-45	1334	Selection of Military Intelligence Estimates prepared by G-2, War Department, Washington, D. C., covering period July 7 to Dec. 6, 1941. (See table of contents attached to this exhibit.)
33-A.-----	2092 12-31-45	1385	Secretary of War's copy of memorandum, dated Oct. 2, 1941, from Col. Hayes A. Kroner to the Chief of Staff, concerning "Japanese-American Relations", bearing note in handwriting of Secretary Stimson.
34.-----	825 11-30-45	1889	Memorandum, dated Oct. 18, 1941, by Brig. Gen. L. T. Gerow, for Chief of Staff, concerning "Resignation of Japanese Cabinet" and proposed message to Army outpost commanders.
35.-----	828 11-30-45	1390	Memorandum, dated Jan. 31, 1942, prepared by Brig. Gen. Sherman Miles, concerning "Warnings Sent to Hawaii Prior to Dec. 7, 1941", with enclosures.
36.-----	830 11-30-45	1393	Photostatic copy of draft of General Marshall's message of Nov. 27, 1941, to General Short, containing phrase "hostile action possible at any moment", which draft contains a sentence that did not appear in the message as transmitted to General Short. (See Exhibit No. 32 for message sent.)
37.-----	839 11-30-45	1395	Selection of dispatches sent and received by the Navy Department entitled "Basic Exhibit of Dispatches". (See table of contents attached to this exhibit.)
38.-----	841 11-30-45	1409	Paraphrase of message, dated Dec. 3, 1941, from General Miles to Military Attaché, Tokyo, concerning the handling of his codes and secret documents.
39.-----	928 12-4-45	1409	Memoranda for the record on events of Dec. 7, 1941, by Brig. Gen. L. T. Gerow, Acting Assistant Chief of Staff; Col. W. B. Smith, Secretary, General Staff; Brig. Gen. Sherman Miles, Acting Assistant Chief of Staff, G-2; Col. J. R. Deane, Secretary, General Staff.
40.-----	954 12-4-45	1412	Dispatch, dated Dec. 7, 1941, from CinCAF to OPNAV (979045) concerning report of promised armed support to British under certain conditions.
41.-----	988 12-5-45	1413	Information from documentary evidence on interception, decoding, and translating of Japanese message; Nos. 901, 902, 907, 910 (so-called pilot message, 14 part message, 1 o'clock delivery message, and code destruction message).

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
42-----	990 12-5-45	1416	Copy of Army Regulation No. 10-15, dated Aug. 18, 1936, with amendments up to Dec. 7, 1941, entitled "General Staff—Organization and Duties".
43-----	997 12-5-45	1422	Instructions dated Jan. 27, 1941, of Chief of Naval Operations and Chief of Staff concerning staff conversations to be held with representatives of British Commonwealth.
44-----	1001 12-5-45	1423	Compilation entitled "Copies of Defense Plans", which contains extracts from various basic Army and Navy plans, to illustrate defensive measures contemplated against air attack. (See table of contents attached to this exhibit.)
45-----	1019 12-5-45	1471	Memorandum, dated Nov. 27, 1941, by Brig. Gen. L. T. Gerow, for the Chief of Staff, concerning "Far Eastern Situation" and warning messages to outpost commanders.
46-----	1027 12-5-45	1472	Photostatic copies of replies by General MacArthur and General Short to warning messages of Nov. 27, 1941, with routing slip.
47-----	1041 12-5-45	1476	Supplementary documents concerning the Nov. 5, 1941 Marshall-Stark memorandum for the President (see Exhibit No. 16), including dispatch dated Nov. 3, 1941, from Ambassador Gauss to State Department; message dated Nov. 2, 1941, from Chiang Kai-Shek to President Roosevelt; memorandum for Director of Naval Intelligence concerning "Dispatch from Alusna, Chungking, 300850"; dispatch 300850 from Alusna, Chungking, to OPNAV dated Oct. 30, 1941, and another same date, same correspondents; message dated Oct. 28, 1941, from General Magruder, Chungking, to War Department.
48-----	1044 12-5-45	1481	Two memoranda dated Nov. 17, 1941, by Brig. General Gerow, for the Chief of Staff, concerning "Method of Coordination of Command in Coastal Frontiers", and letter dated Dec. 20, 1941, to Gen. Delos C. Eimmons, from General Marshall, concerning unity of command in Hawaii.
48-A-----	2093 12-31-45	1484	Memorandum, dated Dec. 5, 1941, from General Marshall for General Gerow, concerning coordination of command.
49-----	1053 12-6-45	1485	Report dated Mar. 27, 1941, of United States-British Staff conversations (ABC-1).
50-----	1053 12-6-45	1551	Report of American-Dutch-British Staff conversations at Singapore, dated Apr. 27, 1941 (A. D. B.).

INDEX OF EXHIBITS

xi

51	1053 12-6-45	1585	Report entitled "Joint Canadian-United States Basic Defense Plan No. 2" (ABC-22).
52	1053 12-6-45	1593	Compilation of communications between the War Department and General Herron at Hawaii, concerning 1940 alert of Hawaiian Department. (See table of contents attached to this exhibit.)
53	1063 12-6-45	1600	Compilation of correspondence between General Marshall and General Short from Feb. 7 to Oct. 28, 1941. (See table of contents attached to this exhibit.)
54	1067 12-6-45	1627	"Notes on General Council Meeting", Feb. 19, 1941, concerning "Defense Objectives" (revised Feb. 13, 1941).
55	1067 12-6-45	1628	Minutes of "Conference in the Office of the Chief of Staff", on Feb. 25, 1941, at which air defense of Pearl Harbor was discussed.
56	1076 12-6-45	1630	Memorandum, dated May 13, 1941, concerning "Dispersion and Protection of Aircraft, Hawaiian Department" by Brig. Gen. Harry J. Malony, for the Chief of Staff.
57	1077 12-6-45	1631	Minutes of "Conference in the Office of the Secretary of War, May 19, 1941", concerning use of planes in proposed expedition against Martinique, referring to supply of B-17 bombers that were not dispatched to Hawaii.
58	1088 12-6-45	1632	List of President's appointments with military representatives from Oct. 1 to Dec. 7, 1941; telephone calls through White House switchboard on Dec. 6 and 7, 1941; White House dinner guests on Dec. 6, 1941; list of President's appointments on Dec. 6 and 7, 1941. (See table of contents attached to this exhibit.)
59	1092 12-6-45	1635	General Marshall's aide memoire to the President concerning "Defense of Hawaii".
60	1094 12-6-45	1636	General Marshall's memorandum for the President concerning "Ground Forces".
61	1112 12-7-45	1640	Photostatic copy of Dec. 7, 1941, warning sent by General Marshall to theater commanders.
62	1284 12-10-45	1641	Minutes of The Joint Board meeting, Nov. 26, 1941, at which the situation in the Pacific was discussed
63	1345 12-11-45	1644	Top Secret Report, Army Pearl Harbor Board, and Top Secret Memorandum of Judge Advocate General in connection therewith.

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
64-----	1544 12-13-45	1645	Tentative draft of Standing Operating Procedure, Hawaiian Department, dated July 14, 1941.
65-----	1541 12-13-45	1677	Memorandum, dated July 3, 1941, from the Chief of Naval Operations and the Chief of Staff, U. S. Army, to Special Navy and Army Observers, London, instructing them to advise British that United States disapproves A. D. B. Report for reasons stated.
66-----	1642 12-15-45	1680	Dispatch, dated Dec. 6, 1941 (061255), from CinCAF to OPNAV, and memorandum dated Dec. 6, 1941, by R. E. Schuirmann, for the State Department, relating contents of the dispatch which reported the sighting of Japanese convoys in Far Eastern waters.
67-----	1642 12-15-45	1682	Intercepted messages, dated Aug. 17, 1941, from Japanese Ambassador Nomura to the Japanese Government, repeating the material handed him that date by President Roosevelt after the President's return from the Atlantic Conference (so-called "parallel action message").
68-----	1675 12-15-45	1689	Log of U. S. S. <i>Boise</i> for period Nov. 25 to Dec. 7, 1941, inclusive, and map showing position of the ship on certain dates.
69-----	1677 12-15-45	1715	Table showing scheduled inspections of ships at Pearl Harbor during October, November and December 1941.
70-----	1695 12-15-45	1716	Message, dated Aug. 18, 1941, from President Roosevelt to Prime Minister Churchill, concerning the President's statements to the Japanese Ambassador on Aug. 17, 1941.
71-----	1696 12-15-45	1719	Message, dated Aug. 25, 1941, from State Department to Ambassador Grew, Tokyo, quoting an extract from radio address of Prime Minister Churchill on Aug. 24, 1941. The extract refers to Japanese policies.
72-----	1696 12-15-45	1721	Dispatch dated Aug. 1, 1941, from State Department to Ambassador Grew, Tokyo, and the Ambassador's reply dated Aug. 2, 1941; both concerning the report of Japanese aggression against Thailand; digest of Secretary of State's news conference on Aug. 6, 1941, when he was questioned concerning reports of Japanese aggression against Thailand.
73-----	1700 12-15-45	1727	Three State Department drafts, all dated Oct. 16, 1941, of a proposed message from the President to the Emperor of Japan, and a memorandum expressing views of officers in the Far Eastern Division of State Department on the matter. No message was sent to the Emperor at that time (fall of the Konoye cabinet in Japan).

74-----	1703 12-15-45	1735	Three messages from State Department to Far Eastern offices, advising American citizens to leave the Orient, dated Oct. 6, 1940, Feb. 11, 1941, and Nov. 19, 1941.
74-A-----	2768 1-19-46	1741	Memorandum, dated Dec. 4, 1941, from Far Eastern Affairs Division officers to the Secretary of State concerning British suggestion on exchange of nationals with Japanese Government in event of hostilities.
75-----	1705 12-15-45	1744	Three messages, all dated Nov. 26, 1941, from Secretary Hull to Ambassador Grew, Tokyo, explaining the delivery of the so-called "Ten Point Note" on that date to the Japanese Ambassadors and their oral comments upon its receipt, and furnishing Ambassador Grew with the text of the note.
76-----	1709 11-15-45	1754	Translation of notes regarding discussion between Adolf Hitler, Foreign Minister von Ribbentrop, State Minister Meissner, and Japanese Foreign Minister Matsuoka in Berlin, Apr. 4, 1941, as introduced at the Nuremberg trials on Nov. 23, 1945.
77-----	1712 12-15-45	1757	Message, dated Aug. 31, 1940, from United States Embassy, Peiping, China, to State Department presenting summary of situation in Japan and Manchuria as prepared by A. T. Steele, correspondent for Chicago Daily News, which summary is referred to in Ambassador Grew's message dated Sept. 12, 1940 (Joint Committee Exhibit No. 26), his so-called "green light" dispatch.
78-----	1724 12-17-45	1768	Navy dispatches concerning "Kra Peninsula Alert (1941)". (See table of contents attached to this exhibit.)
79-----	1724 12-17-45	1770	Navy dispatches concerning Netherlands East Indies Alert (1941). (See table of contents attached to this exhibit.)
80-----	1724 12-17-45	1774	Office of Naval Intelligence "Fortnightly Summary of Current National Situations" dated Nov. 1, Nov. 15, and Dec. 1, 1941.
81-----	1724 12-17-45	1837	Selection of Office of Naval Intelligence periodic estimates and memoranda dated from Apr. 17 to Dec. 6, 1941.
82-----	1728 12-17-45	1864	Navy Regulations concerning Duties of Intelligence Division (OP-16).
83-----	1754 12-17-45	1866	Message, dated Dec. 3, 1941 (831850), from OPNAV to CinCAF, CinPAC, COM 14, and COM 16, advising them of instructions Japanese sent on Dec. 2, 1941, to certain consular and diplomatic posts to destroy most of their codes and secret documents.
84-----	1775 12-17-45	1867	Transcript of telephone call on Dec. 3, 1941, between Japanese citizen in Honolulu and person in Tokyo (so-called "Mori telephone call").

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
85	1799 12-18-45	1870	Selection of Navy Department memoranda reporting Japanese fleet locations during period Nov. 4 through Dec. 3, 1941.
86	1825 12-18-45	1901	Tabulation showing Naval combatant strength of the Axis and Allied Powers as of May 1, 1941, and Dec. 7, 1941, in both Atlantic and Pacific Ocean areas.
87	1889 12-19-45	1907	Memorandum, dated Dec. 15, 1945, prepared by Maj. Gen. George V. Strong, concerning "Alert of Panama and Hawaiian Departments on June 17, 1940", with attached documents referred to therein.
88	1912 12-19-45	1937	Sections of document "Organization of the Office of Naval Operations, Oct. 23, 1940", concerning duties of "War Plans Division (OP-12)".
89	1938 12-20-45	1937	Memorandum prepared by Gen. L. T. Gerow regarding the respective responsibilities of the Army and Navy "For Defense Against Air Attack in Hawaii".
90	2066 12-31-45	1941	Dispatch dated Dec. 18, 1941, from the State Department to the American Legation, Bern, Switzerland, concerning Swiss Government's offer to represent American interest in Japanese-occupied territories, and instructions for closing of diplomatic stations under certain emergencies.
91	2067 12-31-45	1950	Dispatches dated Dec. 15, 1941 (2), Feb. 16, 1942, and Mar. 25, 1942, from Ambassador Grew, Tokyo, to State Department, relating action taken in Tokyo to destroy codes, ciphers, and confidential papers and records after outbreak of hostilities.
92	2068 12-31-45	1960	Photostatic copy of pp. 591 to 618, vol. 377, Official Reports of the Parliamentary Debates, House of Commons, containing statement by Prime Minister Churchill before the House of Commons on Jan. 27, 1942.
93	2075 12-31-45	1974	Photostatic copy of p. 2, G-2 Record Section Register of Incoming Cables on Dec. 5, 1941.
94	2078 12-31-45	1975	3 intercepted messages dated Nov. 26, 1941, from Ambassador Nomura to the Japanese Government, transmitting the so-called "Ten Point Note" which was handed to the Japanese Ambassador by Secretary Hull on that date.
95	2091 12-31-45	1987	Memoranda dated July 12, 1940, by Stanley K. Hornbeck, concerning his conversation with Admiral J. O. Richardson on July 11, 1940, and a handwritten note by Admiral H. R. Stark.

INDEX OF EXHIBITS

XV

96	2091 12-31-45	1989	Memorandum dated July 16, 1940, and study "Reflections on Certain Features of the Far Eastern Situation and certain problems of United States Far Eastern Policy, July 4, 1940", attributed to Stanley K. Hornbeck.
97	2091 12-31-45	2007	Memorandum dated Sept. 21, 1940, by Stanley K. Hornbeck, for Under Secretary Sumner Welles, concerning a Navy proposal for execution of a fleet problem involving simulated attack on the Panama Canal during January 1941, and three related memoranda.
98	2093 12-31-45	2014	Memorandum dated Nov. 26, 1941, by Secretary Stimson for the President concerning "Japanese Convoy Movement Toward Indo-China".
99	2094 12-31-45	2015	Memorandum dated Sept. 26, 1944, prepared by J. W. Ballantine and M. M. Hamilton, relating their recollection of the delivery of intercepted Japanese messages to Secretary Hull's office by Lieutenant Commander Kramer on the morning of Dec. 7, 1941.
100	2095 12-31-45	2016	Transcript of Interrogation on Dec. 8, 1941, of (Japanese) Prisoner of War No. 1, by Naval Intelligence officers at Honolulu, statement by the prisoner, and memorandum concerning "Investigation of Japanese Submarine Aground in Waimanalo Bay".
101	2095 12-31-45	2023	Log of U. S. S. <i>Enterprise</i> from Nov. 24 to Dec. 16, 1941, inclusive.
102	2095 12-31-45	2107	Log of U. S. S. <i>Lexington</i> from Dec. 5 to Dec. 8, 1941, inclusive.
103	2095 12-31-45	2118	"Report of Action With Japanese Air Force at Oahu, T. H., Dec. 7, 1941", by Commander. <i>Enterprise</i> Air Group to his Commanding Officer, dated Dec. 15, 1941.
104	2095 12-31-45	2122	"U. S. S. <i>Lexington</i> War Diary" for period Dec. 7 to Dec. 25, 1941, inclusive.
105	2096 12-31-45	2140	Certain estimates of Japanese Situation and Intentions as made by British agencies and relayed to this Government during period from Oct. 21, to Nov. 22, 1941.
106	2096 12-31-45	2144	Compilation of letters between Admiral H. R. Stark and Admiral H. E. Kimmel from Jan. 13 to Dec. 12, 1941.
107	2349 1-4-46	2258	"Appendix to Narrative Statement of Evidence at Pearl Harbor Investigations", prepared by Navy Department. It contains endorsements by Secretary James Forrestal, Judge Advocate General, Admiral T. L. Gatch, and Chief of Naval Operations, Admiral Ernest J. King, to the Hewitt Report, and endorsements by the same officials to the Report of the Navy Court of Inquiry's Findings of Fact.

Exhibit No.	Hearings, page and date introduced	Exhibits Page No.	Description
107-A	2479 1-5-46	2393	"The Findings, Conclusions and Action by the Secretary of the Navy", including the Fourth Endorsement by Secretary Forrestal to the Report of the Navy Court of Inquiry, and a summary of an offer by the Navy Department of a General Court Martial for Rear Adm. H. E. Kimmel.
108	2364 1-4-46	2432	Memorandum, dated Nov. 2, 1944, by Stanley K. Hornbeck attached to his memorandum of Feb. 28, 1944, which related to an attached third memorandum by Mr. Hornbeck dated Nov. 27, 1941, entitled "Problem of Far Eastern Relations. Estimate of situation and certain probabilities", described by him as "a memorandum regarding the contents of which there have been leaks and misrepresentation".
109	2476 1-5-46	2444	Guide to Symbols, and series of maps submitted by Admiral R. N. Turner, showing the location of ships Dec. 1 to 6, inclusive, 1941.
110	2477 1-5-46	2444	Compilation of letters from Admiral H. R. Stark to Admiral T. C. Hart, from Feb. 9, 1940, to Nov. 8, 1941.
111	2495 1-15-46	2457	Letter dated Dec. 5, 1941, from President Roosevelt to Mr. Wendell Willkie, concerning proposal from Australian Minister for Mr. Willkie to make a trip to Australia, together with related correspondence and memoranda.
112	2496 1-15-46	2458	Dispatches and other material referred to in footnotes to Admiral Kimmel's prepared statement before the Joint Committee. (See table of contents attached to this exhibit.)
113	2558 1-16-46	2502	Letter, dated Aug. 13, 1941, from Admiral Kimmel to Pacific Fleet Task Force Commanders, concerning Employment Schedules, U. S. Pacific Fleet, Second Quarter, Fiscal Year 1942, and attached Employment Schedules for Task Forces 1, 2, and 3.
113-A	2807 1-19-46	2532	Letter, dated Feb. 21, 1941, from Admiral Kimmel to Pacific Fleet Commanders, concerning "Battle Organization and Condition Watches".
113-B	2807 1-19-46	2534	Pacific Fleet Confidential Letter 14CL-41, dated Oct. 31, 1941, concerning "Task Forces—Organization and Missions".
113-C	3449 1-31-46	2538	(a) Revised Employment Schedules of Task Force 9, submitted pursuant to Pacific Fleet Confidential Letter 14CL-41, together with documents which approve same; (b) Watch and Duty Schedules for Patrol Wing 2 (December 1941).

INDEX OF EXHIBITS

XVII

114	2558 1-16-46	2568	WPPac-46, and letters from Admiral Kimmel to his commanders, dated July 21 and July 25, 1941, promulgating WPPac-46, which is U. S. Pacific Fleet Operating Plan—Rainbow Five (Navy Plan O-1, Rainbow 5).
115	2558 1-16-46	2601	Communications Intelligence Summaries concerning location of Japanese Fleet Units: (a) Fourteenth Naval District Summaries, dated Nov. 1 to Dec. 6, 1941; (b) Pacific Fleet Intelligence Officer Reports dated Oct. 27 to Dec. 2, 1941; (c) Pacific Fleet Intelligence Memorandum dated Dec. 1, 1941. (See table of contents attached to this exhibit.)
115-A	3449 1-31-46	2672	Fourteenth Naval District "Communication Intelligence Summaries of Dec. 9 and 10, 1941, showing assumed Composition of Japanese Striking Force".
115-B	3450 1-31-46	2677	Pacific Fleet Intelligence Bulletin No. 45-41, dated Nov. 27, 1941.
116	2558 1-16-46	2700	Selection of correspondence of Admiral H. R. Stark, Admiral H. E. Kimmel, and others from Feb. 11, 1941, to Oct. 3, 1941, concerning anti-torpedo baffles for protection of ships in harbor against torpedo plane attacks.
117	2559 1-16-46	2707	Selection of Army and Navy correspondence from Jan. 16, to Feb. 14, 1941, concerning the air defenses of the Hawaiian Islands.
117-A	5015 2-20-46	2713	Letter dated Feb. 17, 1941, concerning "Maximum Readiness of Aircraft in Hawaiian Area," from Gen. W. C. Short to his Commanders.
118	2559 1-16-46	2714	Memoranda, dated Nov. 30 and Dec. 5, 1941, of Admiral Kimmel, entitled "Steps to be Taken in Case of American-Japanese War within Next Twenty-Four Hours".
119	2559 1-16-46	2716	Radio Log of Bishop's Point Radio Station, Oahu, T. H., Dec. 7, 1941.
120	2559 1-16-46	2721	(a) Memorandum dated Dec. 19, 1941, by Admiral Bellinger for Admiral Kimmel concerning "Availability and Disposition of Patrol Planes on morning of Dec. 7, 1941"; (b) Compilation of dates on which Pearl Harbor Air Raid drills were held during 1941; (c) Report of Army-Navy Board dated Oct. 31, 1941, convened to prepare recommendations covering the allocation of aircraft operating areas, Hawaiian area.
121	2561 1-16-46	2727	Statement by Admiral H. E. Kimmel and copies of correspondence submitted by him, concerning the circumstances of his retirement by the Navy Department, and related matters.
122	2588 1-16-46	2735	Selected correspondence in June and August 1941 of Admiral H. E. Kimmel, Admiral C. C. Bloch, and Gen. W. C. Short concerning aircraft warning facilities for the Hawaiian Department.

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
123.....	2588 1-16-46	2736	Selection of correspondence, memoranda, and dispatches concerning the proposed construction of a combined operating center for Army and Navy in Hawaii from Oct. 29, 1941, to Jan. 7, 1942.
123-A	5015 2-20-46	2743	Additional selection of correspondence and memoranda concerning Joint Operations Centers for Army and Navy from Oct. 17, 1941, to Jan. 10, 1942. (See also Exhibit No. 123.)
124.....	2674 1-17-46	2749	Intercepted Japanese diplomatic messages between Washington and Tokyo, dated Aug. 18 to Aug. 29, 1941, inclusive, concerning United States-Japanese negotiations and the United States note to Japan dated Aug. 17, 1941. These intercepted messages are additional to those published in Joint Committee Exhibit No. 1.
125.....	2678 1-17-46	2801	Log of the <i>U. S. S. Wright</i> from Nov. 27 to Dec. 7, 1941, inclusive, and chart of locations of the ship on Nov. 27 and Dec. 7, 1941.
126.....	2767 1-19-46	2832	(a) Navy Department General Order No. 143, dated Feb. 3, 1941, entitled "Organization of the Naval Forces of the United States"; (b) excerpts from Navy Regulations, setting forth the general duties of a Commander in Chief; (c) Pacific Fleet Staff Instructions (1941), dated July 14, 1941.
127.....	2768 1-19-46	2867	Correspondence, memoranda and dispatches concerning the aircraft situation in Hawaii after Dec. 7, 1941. (See also Exhibit No. 112, p. 77, for letter dated Jan. 7, 1942, by Admiral Nimitz on same subject.)
128.....	2768 1-19-46	2870	Selected correspondence relating to the proposed prosecution of Japanese consular agents in Hawaii, recommended by United States Attorney in Hawaii by letter dated June 4, 1941.
129.....	2842 1-19-46	2875	Navy Basic War Plan—Rainbow No. 5 (WPL-46), and letter dated May 26, 1941, from Admiral H. R. Stark promulgating the plan.
130.....	2879 1-21-46	2941	Selection of memoranda and dispatches contained in files of State Department concerning Japanese and United States air reconnaissance in Pacific prior to Dec. 7, 1941, including dispatch dated Nov. 29, 1941, from Ambassador Grew to State Department forwarding note from Japanese Government protesting reported flight of United States planes over Taiwan Nov. 20, 1941, and State Department's reply to Ambassador Grew.
131.....	2892 1-21-46	2943	Testimony of Admiral H. E. Kimmel before the Roberts Commission, Navy Court of Inquiry, and Army Pearl Harbor Board.

132-----	2917 1-21-46	2943	Selected items obtained by War Department from General MacArthur's Headquarters, Tokyo (see pp. 7874-7877, Joint Committee Transcript): (a) Memorandum "Report on Conference between Foreign Affairs Minister Togo and the American Ambassador, 7:30 a. m., Dec. 8, 1941"; (b) Memorandum "Gist of Conference between Foreign Affairs Minister Togo and the British Ambassador, 8:00 a. m., Dec. 8, 1941"; (c) Memorandum written by one Matsumoto, Head of Treaty Bureau, Japanese Ministry of Foreign Affairs, "On the Declaration of War against the United States and Great Britain--Meeting of Privy Council, Dec. 8, 1941."
132-A----	5137 2-20-46	2946	Additional selected items obtained by War Department from General MacArthur's Headquarters, Tokyo (see pp. 13662-13665 Joint Committee Transcript): (a) Diplomatic messages between Tokyo and Washington which had not been completely intercepted, being Washington to Tokyo Nos. 881, 941, and Tokyo Circular Nos. 2288, 2313 and 2193; (b) Memoranda of three conversations on Aug. 19, 29 and 30, 1941, between German Ambassador Ott and Japanese Foreign Minister Toyoda and Vice-Minister Aman; (c) Memoranda dated Sept. 6 and 13, 1941, concerning basic conditions for a peace settlement between Japan and China; (d) Memorandum dated Nov. 26, 1941, summary of the progress of Japanese-American negotiations.
133-----	2965 1-23-46	2953	Statement by Maj. Gen. Walter C. Short, of events and conditions leading up to the Japanese attacks Dec. 7, 1941, introduced at his request. Identical with exhibit he introduced before Roberts Commission and Army Pearl Harbor Board.
134-----	2965 1-23-46	3124	Dispatch dated Nov. 29, 1941, from War Department to Gen. W. C. Short, concerning reinforcement of advance Pacific bases, and five charts and Bureau of the Census publication on the Population characteristics of Hawaii used by General Short in his prepared statement before the Joint Committee.
135-----	2965 1-23-46	3171	Compiled summary of evidence concerning time of sending and receipt of War Department warning messages of Nov. 27-28, 1941, and replies thereto, together with photostatic copies of the messages.
136-----	2966 1-23-46	3187	Memorandum dated Nov. 14, 1941, by Lt. Col. C. A. Powell, Signal Officer, Hawaiian Department, concerning operation of radar equipment during recent military exercises, and attached transmitting memorandum for Special Assistant to Secretary of War.
137-----	2966 1-23-46	3187	Four original reports concerning training and operations time schedules of radar stations, Hawaiian Department, from Nov. 27 to Dec. 7, 1941, inclusive, and related material.
138-----	2976 1-23-46	3195	Photostatic copy of memorandum bearing approval of Gen. W. C. Short of report prepared by Gen. F. L. Martin dated Aug. 20, 1941, entitled "Study of the Air Situation in Hawaii". (See Joint Committee Exhibit No. 13.)

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
139	3006 1-23-46	3196	Two reports dated Oct. 17 and 25, 1941, entitled "G-2 Estimate of International (Japanese) Situation" by Lt. Col. G. W. Bicknell, Assistant G-2, Hawaiian Department.
140	3188 1-26-46	3203	Selection of memoranda by the Secretary of War, Chief of Staff, Judge Advocate General, including proposed charges against Maj. Gen. W. C. Short, retired, prepared by the office of the Judge Advocate General, and related material.
141	3311 1-28-46	3254	File of Capt. E. M. Zacharias, U. S. Navy, entitled "Notes, Correspondence, and Reports Relating to Pearl Harbor and Events Leading Up to It".
142	3324 1-29-46	3302	Compilation of Material Relating to so-called "Winds" code. (See table of contents attached to this exhibit.)
142-A	3324 1-29-46	3318	(a) Memorandum dated Dec. 5, 1941, concerning interception by Portland F. C. C. station of Japanese Weather Broadcast; (b) Federal Communications Commission, Radio Intelligence Division, Night Watch Log for Nov. 24 to Dec. 8, 1941, inclusive.
142-B	3674 2-4-46	3321	Additional material concerning translation of Circular No. 2494, from Tokyo, dated Dec. 7, 1941 (see p. 251, Exhibit No. 1), subsequent to the original translation.
142-C	3741 2-5-46	3322	Letter dated Feb. 4, 1946, from State Department to Committee Counsel enclosing paraphrases of three messages, two from London dated Dec. 15, 1945 and Jan. 31, 1946, and one from The Hague, dated Jan. 26, 1946, regarding the so-called "winds" messages, indicating no interception by the British or Dutch Governments of a "winds execute" message prior to Dec. 8, 1941.
142-D	3780 2-5-46	3323	Material from Hawaiian office, Federal Communications Commission, concerning the so-called "winds" code.
143	3929 2-7-46	3332	Proceedings of the Roberts Commission appointed Dec. 18, 1942, by the President. (See Parts Nos. 22 through 25.)
144	3929 2-7-46	3332	Proceedings of the Inquiry conducted by Admiral Thomas C. Hart, U. S. Navy, retired, pursuant to precept dated Feb. 12, 1944, of the Secretary of the Navy. (See Part No. 26.)
145	3929 2-7-46	3332	Proceedings of the Army Pearl Harbor Board, convened by the Secretary of War pursuant to the provisions of Public Law 339, 78th Cong., approved June 13, 1944. (See Parts Nos. 27 through 31.)

146	3929 2-7-46	3332	Proceedings of the Navy Court of Inquiry, convened by the Secretary of the Navy pursuant to the provisions of Public Law 339, 78th Cong., approved June 13, 1944. (See Parts Nos. 32 and 33.)
147	3929 2-7-47	3332	Proceedings of Investigation conducted by Col. Carter W. Clarke, U. S. Army, Sept. 14, 15, and 16, 1944, and continued from July 13 to Aug. 4, 1945. (See Part No. 34.)
148	3929 2-7-46	3332	Report of Investigation during the period Nov. 23, 1944, to Sept. 12, 1945, conducted by Lt. Col. Henry C. Clausen, A. U. S., for the Secretary of War, and supplementary to the proceedings of the Army Pearl Harbor Board. (See Part No. 35.)
149	3929 2-7-46	3332	Proceedings of the inquiry conducted by Admiral Henry Kent Hewitt, U. S. N., pursuant to precept dated May 2, 1945, of the Secretary of the Navy, and supplementary to the proceedings of the Navy Court of Inquiry. (See Parts Nos. 36 through 38.)
150	4083 2-8-46	3333	Letter dated Mar. 18, 1944, from Admiral H. E. Kimmel, retired, to Admiral W. E. Halsey, suggesting questions for Comdr. A. D. Kramer concerning the so-called "winds" message.
151	4421 2-13-46	3335	Six memoranda prepared by Capt. L. F. Safford, U. S. Navy, during May, June, and July, 1945 in connection with the inquiry conducted by Admiral H. K. Hewitt, concerning intercepted Japanese messages. (See table of contents attached to this exhibit.)
152	4794 2-18-46	3351	Memorandum dated Dec. 23, 1941, "General Observations of Damage by Projectiles in the City of Honolulu on Dec. 7, 1941", prepared by employees of the Honolulu Board of Water Supply, and a map of the city of Honolulu, T. H., showing points struck by projectiles, Dec. 7, 1941.
153	5009 2-19-46	3353	Prepared statement dated Dec. 1, 1945 entitled "The War Record of Civilian and Industrial Hawaii", with attached Exhibits, submitted to the Joint Committee by the Hawaiian Sugar Planters' Association.
154	5013 2-20-46	3430	Compilation of selected correspondence between Gen. H. H. Arnold and Gen. F. L. Martin from Aug. 15 to Nov. 27, 1941. (See table of contents attached to this exhibit.)
155	5068 2-20-46	3435	Original Radar Plot of Detector Station OPAÑA, Dec. 7, 1941.
156	5122 2-20-46	3436	Memorandum dated June 21, 1941 prepared by Col. Moses W. Pettigrew concerning "Final Recommendations Far Eastern Intelligence Organization".
157	5201 4-11-46	3441	Reports, findings, and conclusions of Roberts Commission, Army Pearl Harbor Board, Navy Court of Inquiry and Hewitt Inquiry, with endorsements. (See Part No. 39.)

Exhibit No.	Hearings, page and date introduced	Exhibits page No.	Description
158	5201 4-11-46	3441	Compilation of selected documents obtained from State Department files relating to United States-British Conversations concerning the Japanese situation. (See table of contents attached to this exhibit.)
159	5201 4-11-46	3488	Compilation of selected material obtained from State Department files relating to United States-Chinese Conversations concerning the Japanese situation. (See table of contents attached to this exhibit.)
160	5240 4-11-46	3502	Transcript of remarks of the President on the occasion of the meeting of his cabinet at 8:30 (p. m.) and continuing at 9 o'clock with legislative leaders, on Dec. 7, 1941.
161	5241 4-11-46	3508	Drafts of Secretary Knox and Secretary Stimson of a proposed message for the President to deliver to Congress on the state of relations with the Japanese Government. (See Joint Committee Exhibit No. 19 for final draft by Secretary Hull.)
161-A	5464 5-23-46	3520	Draft of a proposed message to Congress as prepared in the State Department, which contains suggestions made in the memoranda by Secretary Stimson and Secretary Knox, as shown in exhibit No. 161.
162	5269 4-11-46	3534	Log of the Watch Officer, Office of the Chief of Naval Operations, from 1145, Dec. 6, 1941, to 2000, Dec. 7, 1941.
162-A	5464 5-23-46	3543	Naval communications referred to by serial numbers in Log of the Watch Officer, as shown in exhibit No. 162.
163	5292 4-11-46	3557	Log of the U. S. S. <i>Helena</i> from Nov. 26 to Dec. 7, 1941, inclusive.
164	5292 4-11-46	3593	Reports made by Gen. W. C. Short and his subordinate officers to the War Department concerning the attack on Oahu, T. H., Dec. 7, 1941.
165	5292 4-11-46	3643	Copy of a partial translation of a document relating to a Feb. 23, 1941, conference between German Foreign Minister von Ribbentrop and Japanese Ambassador Oshima.
166	5468 5-23-46	3648	State Department dispatch No. 5682 dated Dec. 5, 1941, to the American Embassy in London. (This dispatch is mentioned in American Embassy, London, dispatch No. 5923 dated Dec. 6, 1941, to State Department, which appears in exhibit No. 21.)

167	5468 5-23-46	3652	(a) State Department file copy of document handed by Secretary Hull to the Japanese Ambassador on Nov. 26, 1941 (the so-called Ten-Point Note); (b) State Department statement to the press on Nov. 26, 1941, relating to the delivery of (a); (c) State Department Press Release No. 585, dated Dec. 7, 1941, concerning the delivery and text of (a); and (d) memorandum dated Dec. 2, 1941, concerning President Roosevelt's remarks at his press conference that date, relating to delivery of (a) and general Far East matters.
168	5468 5-23-46	3666	Compilation of documents from State Department files which are dated in November and December 1941, concerning a proposed <i>modus vivendi</i> , which documents supplement those introduced as exhibit No. 18. (See table of contents attached to this exhibit.)
169	5469 5-23-46	3696	Compilation of documents relating to conversations between State Department officials and representatives of the Thailand Government, between Aug. 6 and Dec. 8, 1941. (See table of contents attached to this exhibit.)
170	5469 5-23-46	3789	Compilation of documents from War Department files concerning the retirement of Maj. Gen. Walter C. Short, and related matters. (See table of contents attached to this exhibit.) These documents supplement those introduced as exhibit No. 140.
171	5469 5-23-46	3942	Compilation of documents from Navy Department files concerning the retirement of Admiral Husband E. Kimmel, and related matters. (See table of contents attached to this exhibit.)
172	5469 5-23-46	3978	Compilations made by War and Navy Departments of data concerning airplanes and antiaircraft guns produced and their distribution from Feb. 1 to Nov. 30, 1941.
173	5469 5-23-46	3985	Memoirs of Prince Konoye, former Prime Minister of Japan, and related documents.
174	5469 5-23-46	4030	Compilation of miscellaneous documents from State Department files. (See table of contents attached to this exhibit.)
175	5470 5-23-46	4115	Memorandum from Secretary of Navy dated Dec. 5, 1941 and letter from Secretary of War dated Dec. 6, 1941, submitting estimates concerning Japanese forces in Indochina and adjacent areas, to the Secretary of State for delivery to the President, and memorandum dated Dec. 6, 1941, from Secretary of State for the President.
176	5470 5-23-46	4121	Compilation of location of United States naval forces in the Atlantic, Pacific, and Far East, also foreign naval forces in the Pacific and Far East, as of Dec. 7, 1941.
177	5470 5-23-46	4132	Compilation of State Department documents dated in 1939, concerning a proposal made by former Japanese Prime Minister Baron Hiranuma for United States-Japanese understanding. (See table of contents attached to this exhibit.)

Exhibit No.	Hearings, page and date intro- duced	Exhibits page No.	Description
178-----	5470 5-23-46	4209	Compilation of documents from Ambassador Joseph C. Grew to the President and the State Department, and attached memoranda. (See table of contents attached to this exhibit.)
179-----	5470 5-23-46	4241	Miscellaneous documents from the files of the late President F. D. Roosevelt, as furnished to the Committee, concerning Far East matters.
180-----	5471 5-23-46	4551	Organization charts of the Army and Navy at Washington, D. C., and Hawaii, as of Dec. 7, 1941.
181-----	5520 5-23-46	4565	The United States News, extra number, Sept. 1, 1945, publishing reports of the Army Pearl Harbor Board and the Navy Court of Inquiry, and related documents.
182-----	5537 5-23-46	4702	Compilation of military intelligence estimates, prepared by G-2, War Department, for period Jan. 1 to July 1, 1941.
183-----	5468 5-23-46	4766	Material compiled at request of Senator Ferguson by letter dated May 20, 1946, to Committee counsel (p. 5464), including data concerning the test bombing of the <i>Utah</i> by the Army Air Corps in 1937, and data concerning the program of the Army Air Corps for 1940-45 production of B-17 4-engine bombers.

SECRET

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, May 26, 1941.

Op-12B-5-McC
(SC)A16(R-5)
Serial 060512

From: The Chief of Naval Operations.

To: Distribution List for WPL-46.

Subject: Promulgation of Navy Basic War Plan—Rainbow No. 5 (WPL-46).

Enclosures:

(A) Pages for WPL-46, Registered No. 92, including List of Effective Pages.

(B) Receipt form in duplicate.

1. Navy Basic War Plan—Rainbow No. 5 (WPL-46) is promulgated herewith.
2. Report receipt, and check of contents, on the form provided as enclosure (B).
3. The highest priority in the preparation of war plans is assigned to plans required by WPL-46.

4. It is desired that the preparation and distribution of these plans be accomplished with the least possible delay. To this end, all planning based upon the directives of WPL-13, WPL-14, WPL-42, and WPL-44 will be discontinued until plans based upon WPL-46 are completed.

5. Appendix II, Chapter IX, prescribing the composition of the Naval Transportation Service will be issued as a change to this plan. If this plan is executed prior to the issue of Chapter IX, specific directives will be issued to provide for the initial sea transportation requirements of the plan.

6. The extreme importance of the security of this Navy Basic War Plan—Rainbow No. 5, cannot be over-emphasized. In this respect, attention is invited to the instructions contained in "The System of War Planning", and in the "Registered Publication Manual".

7. Plans and estimates of requirements for the preparation for war service of vessels to be taken over from private sources, as indicated in the tables of Appendix II, will be classified as confidential. Attention is invited to paragraph 1105 of WPL-8.

[iv] 8. This plan shall not be carried in aircraft except by authority of the Chief of Naval Operations, and when not in use shall be kept in Class "A" stowage as prescribed in the "Registered Publication Manual".

9. IT IS FORBIDDEN TO MAKE EXTRACTS FROM OR COPY PORTIONS OF THIS PUBLICATION WITHOUT SPECIFIC AUTHORITY FROM THE CHIEF OF NAVAL OPERATIONS, EXCEPT IN SUBORDINATE PLANS BASED UPON THIS PUBLICATION.

H. R. STARK.

From: The Chief of Naval Operations.

To: The Distribution List for WPL-46.

Subject: Change No. 1, WPL-46.

1. Make the following pen and ink corrections to WPL-46:

(a) On Page 45

Paragraph 3511.a.2.(f), first line—Change 13,400 to 6,400.

Paragraph 3511.a.2.(g), first line—Change 23,600 to 12,600.

Paragraph 3511.a.2.(i), first line—Change 44,000 to 23,000.

(b) On Page 80

Paragraph 4601, first line,—after “will be” insert “prepared as”.

(c) On Page 30 of Appendix I

Paragraph 51.a.(13), first line—Change 13,400 to 6,400.

Paragraph 51.a.(14), first line—Change 23,600 to 12,600.

(d) On Page 31 of Appendix I

Paragraph 51.a.(16), first line—Change 44,000 to 23,000.

2. Insert this letter in the front of WPL-46.

3. The urgency of delivery of this document is such that it will not reach the addressees in time by the next available officer courier. The originator therefore authorizes the transmission of this document by registered mail within the continental limits of the United States.

NAVY DEPARTMENT,
OFFICER OF THE CHIEF OF NAVAL OPERATIONS,
Washington, July 1, 1941.

Secret

From: The Chief of Naval Operations.
To: The Distribution List for WPL-46.
Subject: The establishment of Naval Coastal Frontiers.
Reference:

- (a) GO No. 142.
- (b) GO No. 143.
- (c) WPL-46.

1. The Naval Coastal Frontiers prescribed in paragraphs 3122, 3232 and 3312 of WPL-46 are hereby established.

2. The boundaries of the Naval Coastal Frontiers are as prescribed in Annex I, Appendix I, WPL-46.

3. The command relations prescribed in Part III, Chapter I, Section 3, and Part III, Chapter II, Section 4, of WPL-46, are hereby made effective and, in accordance with the provisions of these sections, the conflicting provisions of General Order No. 142 are suspended.

4. For the present, Naval Coastal Frontier Forces as prescribed in General Order No. 143 will not be formed. Vessels assigned to Naval Districts and Naval Stations will continue in these assignments, and, until further orders, new assignments of vessels will be made to Naval Districts or Naval Stations, rather than to Naval Coastal Frontier Forces, Naval Coastal Forces, or Naval Local Defense Forces.

5. The Bureau of Navigation will issue orders assigning officers to additional duties as Commanders, Naval Coastal Frontiers as indicated:

Commandant, 3rd Naval District—Commander, North Atlantic Naval Coastal Frontier;

Commandant, 6th Naval District—Commander, Southern Naval Coastal Frontier;

Commandant, 10th Naval District—Commander, Caribbean Naval Coastal Frontier;

Commandant, 15th Naval District—Commander, Panama Naval Coastal Frontier;

Commandant, 12th Naval District—Commander, Pacific Southern Naval Frontier;

Commandant, 13th Naval District—Commander, Pacific Northern Naval Frontier;

Commandant, 14th Naval District—Commander, Hawaiian Naval Coastal Frontier;

Commandant, 16th Naval District—Commander, Philippine Naval Coastal Frontier.

6. The establishment of the Naval Coastal Frontiers, and the orders to the commanders thereof, is assigned a *RESTRICTED* classification. The limits of the Naval Coastal Frontiers remains in a *SECRET* classification. Correspondence relating to Naval Coastal Frontiers will be classified according to its nature.

7. Transmission of this document by registered mail within the continental limits of the United States is authorized.

INTRODUCTION

CHAPTER I. ORIGIN, BASIS, AND SCOPE OF THIS PLAN

0101. This Navy Basic War Plan—Rainbow No. 5 was prepared under the direction of the Chief of Naval Operations.

0102. It is based upon the Report of the United States-British Staff Conversations (Short Title ABC-1), the Joint Canada-United States Defense Plan (Short Title ABC-22), and the Joint Army and Navy Basic War Plan—Rainbow No. 5.

0103. The United States-British Staff Conversations (ABC-1) and the Joint Canada-United States Defense Plan (ABC-22) will be given only a limited distribution to holders of this plan. These documents are referred to in this plan by their short titles. Their essential features, so far as concerns war operations, are incorporated in the Joint Army and Navy Basic War Plan—Rainbow No. 5, which is included in this plan as Appendix I.

0104. This plan provides for the initial organization, composition of forces and tasks for the Naval Establishment in a Rainbow No. 5 War.

0105. After the execution of this plan has been directed, no attempt will be made to maintain the tables of Appendix II corrected up to date. Changes in the composition of forces will be made by direction of the Chief of Naval Operations and shown subsequently in the "Assignment of Units in the Organization of the Seagoing Forces of the U. S. Navy," and in the "Assignment of Units to Naval Districts and Naval Stations."

[6]

CHAPTER II. EXECUTION OF THIS PLAN

Section 1. EXECUTION OF THE ENTIRE PLAN

0211. a. Upon the receipt of the following ALNAV despatch, the Naval Establishment will proceed with the execution of this plan in its entirety, including acts of war: "EXECUTE NAVY BASIC WAR PLAN RAINBOW No. 5".

b. The date of the above despatch will be M-day unless it has been otherwise designated.

[7]

Section 2. EXECUTION OF A PART OF THIS PLAN

0221. A preliminary period of strained relations of uncertain duration is anticipated, during which time certain preliminary steps provided for in this plan may be directed by the Chief of Naval Operations.

0222. Mobilization may be directed prior to directing the execution of this plan or any part thereof. The order to mobilize does not authorize acts of war.

0223. This plan may be executed in part by a despatch indicating the nations to be considered enemy, the tasks to be executed, or excepted, and the preliminary measures to be taken in preparation for the execution of the entire plan or additional tasks thereof.

[8]

CHAPTER III. AGREEMENTS WITH ASSOCIATED POWERS OTHER THAN THE BRITISH COMMONWEALTH

0301. The substance of agreements reached with Associated Powers other than those with the British Commonwealth, including Canada, insofar as they relate to the operation of naval forces, will be made available to the holders of this plan, as soon as made, by revision of this Chapter III of the Introduction.

0302. Brazil, for the purposes of defense of the Western Hemisphere, has agreed to permit United States naval forces to use the ports of RECIFE and BAHIA.

a. There is at present no time limit on the duration of stay in these ports.

b. They are available for refreshment and upkeep, and for the purchase and delivery of fuel, consumable supplies and fresh provisions within the limited capacities of the ports.

c. A United States Naval Observer is stationed at each port.

d. On first entry, two days confidential advance notice of arrival should be given to the United States Naval Observer at the port via the United States Naval Attache, Rio de Janeiro. This notice should include information in regard to communicable diseases and last port visited. Pratique and customs clearance are not required.

e. For repeated entry, incident to extended operations in the vicinity, local arrangements as to notice may be made with the Brazilian Captain of the Port, through the United States Naval Observer.

[9] PART I. TASK ORGANIZATION. INFORMATION AND ASSUMPTIONS

CHAPTER I. TASK ORGANIZATION

1101. The task organization, by which this Navy Basic War Plan—Rainbow No. 5 will be executed, under the direction of the Chief of Naval Operations, is prescribed below:

a. *THE OPERATING FORCES*, under command of the Chief of Naval Operations.

1. *THE UNITED STATES ATLANTIC FLEET*, under command of the Commander in Chief, U. S. ATLANTIC FLEET.

2. *THE UNITED STATES PACIFIC FLEET*, under command of the Commander in Chief, U. S. PACIFIC FLEET.

3. *THE UNITED STATES SOUTHEAST PACIFIC FORCE*, under command of the Commander, SOUTHEAST PACIFIC FORCE.

4. *THE UNITED STATES ASIATIC FLEET*, under command of the Commander in Chief, U. S. ASIATIC FLEET.

5. *THE UNITED STATES NAVAL FORCES, NORTH EUROPE*, under command of the Commander in Chief, U. S. NAVAL FORCES, NORTH EUROPE.

6. *THE NAVAL COASTAL FRONTIER FORCES*, under the command of the Commanders, NAVAL COASTAL FRONTIERS, consisting of:

(a) *THE NAVAL COASTAL FORCES*;

(b) *THE NAVAL LOCAL DEFENSE FORCES*.

b. *THE SERVICES*, under command of the Chief of Naval Operations.

1. *THE NAVAL TRANSPORTATION SERVICE*.

2. *THE NAVAL COMMUNICATION SERVICE*.

3. *THE NAVAL INTELLIGENCE SERVICE*.

c. *THE SHORE ESTABLISHMENT*, under the direction of the appropriate Chiefs of Bureaus, and Heads of Offices of the Navy Department.

[10] 1102. Major areas of command and instructions concerning responsibility for the strategic direction of military forces therein are set forth in Appendix I, "Section V". In paragraph 3222 of this plan is defined an additional subarea, designated as the "SOUTHEAST PACIFIC SUB-AREA." In Annex I, of Appendix I, are the sub-areas which are included in the Naval Coastal Frontiers.

1103. Command over naval forces in the areas and sub-areas for which the United States has accepted responsibility for the strategic direction of operations will be exercised by the appropriate United States naval commanders listed in paragraph 1101 a. of this plan, subject to the special conditions set forth in Appendix I, "Section V."

2884 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SECRET

[12] CHAPTER II. INFORMATION AND ASSUMPTIONS

1201. Assumptions are as stated in Appendix I, "Section III."

[13] PART II. OUTLINE OF TASKS

CHAPTER I. CONCEPT OF THE WAR

2101. The Concept of the War is as stated in Appendix I, "Section IV."

[14] CHAPTER II. THE GENERAL TASK

2201. The Joint Army and Navy General Task is set forth in paragraph 24 of Appendix I.

2202. The Navy General Task is as follows:

a. The Naval Establishment, in cooperation with the Army and the forces of the other Associated Powers, will:

1. Destroy Axis sea communications in the WESTERN ATLANTIC AREA, in the PACIFIC AREA east of 180°, and through the MALAY BARRIER in the FAR EAST AREA;

2. Raid Axis forces and sea communications in the PACIFIC and FAR EAST AREAS, and in the EASTERN ATLANTIC and the WESTERN MEDITERRANEAN;

3. Protect the sea communications of the Associated Powers in United States Areas, and support the defense of sea communications in the UNITED KINGDOM AND BRITISH HOME WATERS AREA, in the FAR EAST AREA, and to the eastward of AUSTRALIA;

4. Prevent the extension in the Western Hemisphere of European or Asiatic military power, and support the defense of the territory of the Associated Powers in the FAR EAST AREA; and

5. Prepare to capture the AZORES, CAPE VERDE, MARSHALL, and CAROLINE ISLANDS.

[15] PART III. ASSIGNMENT OF TASKS

CHAPTER I. FORCES IN THE WESTERN ATLANTIC AREA

Section 1. THE U. S. ATLANTIC FLEET

3111. The U. S. ATLANTIC FLEET (Chapter II, Appendix II) will initially be organized into task forces as follows:

- a. OCEAN ESCORT;
- b. STRIKING FORCE;
- c. SOUTHERN PATROL FORCE;
- d. SUBMARINE FORCE ONE;
- e. SUBMARINE FORCE TWO;
- f. SUBMARINE FORCE THREE;
- g. NORTHWEST ESCORT FORCE;
- h. U. S. NAVAL OPERATING BASE, BERMUDA;
- i. ADDITIONAL TASK FORCES AS DIRECTED BY THE COMMANDER IN CHIEF, U. S. ATLANTIC FLEET.

3112. The U. S. ATLANTIC FLEET is assigned the following tasks within the WESTERN ATLANTIC AREA:

a. TASK

PROTECT THE SEA COMMUNICATIONS OF THE ASSOCIATED POWERS BY ESCORTING, COVERING, AND PATROLLING, AS REQUIRED BY CIRCUMSTANCES, AND BY DESTROYING ENEMY RAIDING FORCES (see Part III, Chapter V, Section 1);

b. TASK

DESTROY AXIS SEA COMMUNICATIONS BY CAPTURING OR DESTROYING VESSELS TRADING DIRECTLY OR INDIRECTLY WITH THE ENEMY;

[16] c. TASK

PROTECT THE TERRITORY OF THE ASSOCIATED POWERS AND PREVENT THE EXTENSION OF ENEMY MILITARY POWER INTO THE WESTERN HEMISPHERE, BY DESTROYING HOSTILE EXPEDITIONARY FORCES AND BY SUPPORTING LAND AND

AIR FORCES IN DENYING THE ENEMY THE USE OF LAND POSITIONS IN THAT HEMISPHERE;

d. **TASK**

IN COOPERATION WITH BRITISH FORCES AND THE U. S. ARMY, DEFEND BERMUDA IN CATEGORY "C";

e. **TASK**

COVER THE OPERATIONS OF THE U. S. NAVAL COASTAL FRONTIER FORCES;

f. **TASK**

PREPARE TO OCCUPY THE AZORES AND THE CAPE VERDE ISLANDS.

3113. a. So far as practicable, the naval forces in the WESTERN ATLANTIC AREA will be covered and supported against attack by superior enemy surface forces, by the naval forces of the Associated Powers which are operating from bases in the UNITED KINGDOM and the EASTERN ATLANTIC.

b. Forces operating normally in the UNITED KINGDOM AND BRITISH HOME WATERS AREA, the NORTH ATLANTIC AREA, and the SOUTH ATLANTIC AREA, which move temporarily into the WESTERN ATLANTIC AREA in pursuance of their assigned tasks, will remain under the strategic direction of the United Kingdom Chief of Naval Staff. They will be supported by the naval forces in the WESTERN ATLANTIC AREA as necessary and practicable.

3114. a. SUBMARINE FORCE TWO will operate under the strategic direction of the Commander in Chief, U. S. ATLANTIC FLEET, until its arrival in the NORTH ATLANTIC AREA.

[17] b. This force will be assigned the following task by the Commander in Chief, U. S. ATLANTIC FLEET:

1. **TASK**

PROCEED FROM BASES IN THE UNITED STATES TO GIBRALTAR, WHEN SO DIRECTED BY THE CHIEF OF NAVAL OPERATIONS.

c. After arrival of SUBMARINE FORCE TWO in the NORTH ATLANTIC AREA this force will execute the following task:

1. **TASK**

RAID ENEMY SHIPPING IN THE MEDITERRANEAN UNDER THE STRATEGIC DIRECTION OF THE BRITISH COMMANDER IN CHIEF, MEDITERRANEAN, ACTING THROUGH THE BRITISH (OR UNITED STATES) FLAG OFFICER COMMANDING NORTH ATLANTIC.

d. SUBMARINE FORCE TWO will remain a part of the U. S. ATLANTIC FLEET for administrative purposes.

3115. a. *THE NORTHWEST ESCORT FORCE* and *SUBMARINE FORCE THREE* will operate under the strategic direction of the Commander in Chief, U. S. ATLANTIC FLEET, until their arrival in the UNITED KINGDOM AND BRITISH HOME WATERS AREA.

b. These forces will each be assigned the following task by the Commander in Chief, U. S. ATLANTIC FLEET:

1. **TASK**

PROCEED FROM BASES IN THE UNITED STATES TO BASES IN THE UNITED KINGDOM AND BRITISH HOME WATERS AREA, WHEN SO DIRECTED BY THE CHIEF OF NAVAL OPERATIONS.

[18] c. Upon arrival in UNITED KINGDOM AND BRITISH HOME WATERS AREA, the NORTHWEST ESCORT FORCE and SUBMARINE FORCE THREE will be detached from the U. S. ATLANTIC FLEET and be assigned to U. S. NAVAL FORCES, NORTH EUROPE. Their tasks thereafter are to be found in Part III, Chapter IV, Section 1.

3116. a. The Commander in Chief, U. S. ATLANTIC FLEET, will arrange for the logistic support for the U. S. ATLANTIC FLEET (see Part IV, Chapter III, Section 2) operating in the WESTERN ATLANTIC AREA from sources designated by the Shore Establishment in the continental United States and outlying possessions and bases in the WESTERN ATLANTIC AREA, and from United States and foreign (outside the British Isles) commercial sources. For

this purpose he will employ the transportation facilities of the U. S. ATLANTIC FLEET, which will be supplemented, as required, by those of the Naval Transportation Service.

b. Logistic support for SUBMARINE FORCE TWO, and other United States forces operating in the NORTH ATLANTIC AREA, will be arranged as indicated herein. Transportation will be provided by the Naval Transportation Service.

1. Fuel and subsistence stores from United States naval auxiliaries, supplemented as may be practicable from British sources available in the NORTH ATLANTIC AREA.

2. Personnel, technical supplies, and ammunition from United States sources.

3. Repair and upkeep facilities from tender and cargo vessels, and temporary shore facilities erected by the United States, supplemented by use of available British facilities.

4. Replacement of British fuel and subsistence stores from United States sources.

[19] c. In emergency circumstances where the transportation facilities of the Naval Transportation Service are inadequate for the logistic support of SUBMARINE FORCE TWO, or of other U. S. Naval forces operating in the NORTH ATLANTIC AREA, the Senior U. S. Naval Officer of forces based in that area is authorized to charter, on a time charter basis, vessels immediately obtainable by him for the purpose of providing his forces with urgent logistic deficiencies. Vessels of United States registry will be employed, if available.

d. The Commander in Chief, U. S. ATLANTIC FLEET, will establish in the office of the Chief of Naval Operations an officer of the staff of the Commander, TRAIN, U. S. ATLANTIC FLEET, who will have liaison duties with respect to the quantities and the transportation of logistic requirements, including personnel, for the U. S. ATLANTIC FLEET.

e. Logistic support for the NORTHWEST ESCORT FORCE and SUBMARINE FORCE THREE, after transfer to the U. S. NAVAL FORCES, NORTH EUROPE, will be provided as directed in Part III, Chapter IV, Section 1.

3117. a. The Commander in Chief, U. S. ATLANTIC FLEET, will require the preparation of the following plans:

1. *U. S. ATLANTIC FLEET OPERATING PLAN—RAINBOW No. 5* (Navy Plan 0-3, RAINBOW No. 5);

2. *NORTHWEST ESCORT FORCE MOVEMENT PLAN—RAINBOW No. 5* (Navy Plan 0-3-A, RAINBOW No. 5), covering the movement of this force and the first movement of Army troops to ENGLAND, SCOTLAND, and NORTH IRELAND (See paragraph 3511 a. 2. (b));

3. *SUBMARINE FORCE THREE MOVEMENT PLAN—RAINBOW No. 5* (Navy Plan 0-3-B, RAINBOW No. 5) covering the movement of this force to the UNITED KINGDOM AND BRITISH HOME WATERS AREA;

4. Such other subordinate task force operating [20] plans as the Commander in Chief, U. S. ATLANTIC FLEET, may direct, including the movement plan for SUBMARINE FORCE TWO. No operating plan for SUBMARINE FORCE TWO, for operations after arrival in the NORTH ATLANTIC AREA, need be prepared.

b. 1. Plans listed under a. 1, 2, 3, and 4, will be reviewed by the Chief of Naval Operations.

2. Plans may be distributed before review and acceptance.'

[21] *Section 2. THE NAVAL COASTAL FRONTIER FORCES*

3121. a. The organization of NAVAL COASTAL FRONTIER FORCES is prescribed in General Order No. 143.

b. The boundaries of Coastal Frontiers, Naval Coastal Frontiers, Coastal Zones, Sectors, and Subsectors, are defined in "Joint Action of the Army and the Navy, 1935", as modified by Annex I of Appendix I.

3122. The Naval Coastal Frontiers in the WESTERN ATLANTIC AREA are:

a. THE NORTH ATLANTIC NAVAL COASTAL FRONTIER;

b. THE SOUTHERN NAVAL COASTAL FRONTIER;

c. THE CARIBBEAN NAVAL COASTAL FRONTIER;

d. THE PANAMA NAVAL COASTAL FRONTIER.

1. All tasks assigned to the PANAMA NAVAL COASTAL FRONTIER are contained in this Section, including those for the PACIFIC SECTOR.

3123. The NAVAL COASTAL FRONTIER FORCES (Chapter VIII, Appendix II) in the WESTERN ATLANTIC AREA are assigned the following tasks:

a. TASK

DEFEND THE NAVAL COASTAL FRONTIER IN CATEGORIES INDICATED BELOW:

CATEGORY B—THE NORTH ATLANTIC NAVAL COASTAL FRONTIER.

—THE SOUTHERN NAVAL COASTAL FRONTIER.

CATEGORY D—THE CARIBBEAN NAVAL COASTAL FRONTIER.

—THE PANAMA NAVAL COASTAL FRONTIER.

[22] b. TASK

PROTECT AND ROUTE SHIPPING IN ACCORDANCE WITH INSTRUCTIONS CONTAINED IN PART III, CHAPTER VII, SECTION 3;

c. TASK

SUPPORT THE U. S. ATLANTIC FLEET;

d. TASK

SUPPORT ARMY AND ASSOCIATED FORCES WITHIN THE COASTAL FRONTIER.

e. In addition, the NAVAL COASTAL FRONTIER FORCES of the PANAMA NAVAL COASTAL FRONTIER are assigned the following task:

1. TASK

SUPPORT THE U. S. SOUTHEAST PACIFIC FORCE.

3124. a. The following plans will be prepared:

1. Local Joint Plans as prescribed in Appendix I, paragraph 48, of this plan;

2. By the Commanders, NORTH ATLANTIC NAVAL COASTAL FRONTIER, and SOUTHERN NAVAL COASTAL FRONTIER:

(a) *Naval Coastal Frontier Operating Plans*—RAINBOW No. 5, including an annex covering the operating plans of the Naval Coastal Force. (Naval Coastal Frontier Plans 0-4, RAINBOW No. 5);

3. By Commanders, CARIBBEAN NAVAL COASTAL FRONTIER, and PANAMA NAVAL COASTAL FRONTIER, and by Commandants, FIRST, THIRD, FOURTH, FIFTH, SIXTH, SEVENTH, AND EIGHTH NAVAL DISTRICTS:

[23] (a) *Naval Local Defense Force Operating Plans*—RAINBOW No. 5 (Naval District Plans 0-5, RAINBOW No. 5);

(b) *Joint Embarkation Plans* as required in Appendix I, paragraph 48;

4. Additional subordinate task force operating plans as directed by Commanders, Naval Coastal Frontiers, and Commandants of Naval Districts.

b. 1. Joint Coastal Frontier Defense Plans, and other plans prepared by the Commanders, Naval Coastal Frontiers, will be reviewed by the Chief of Naval Operations.

2. Operating Plans prepared by the Commandants of Naval Districts will be reviewed by the respective Commanders, Naval Coastal Frontiers.

3. Subordinate Task Force Operating Plans will be reviewed by the respective Commanders, Naval Coastal Frontiers, or Commandants of Naval Districts.

4. (a) Naval Coastal Frontier Force Operating Plans for the NORTH ATLANTIC and SOUTHERN NAVAL COASTAL FRONTIERS, and Naval Local Defense Force Operating Plans for the CARIBBEAN and PANAMA NAVAL COASTAL FRONTIERS will be forwarded to the Commander in Chief, U. S. ATLANTIC FLEET for comment, prior to their review by the Chief of Naval Operations, with a view to their coordination with the Operating Plans of the U. S. ATLANTIC FLEET.

(b) Such portions of Naval Local Defense Force Operating Plans and Naval District Contributory Plans, as relate to the protection of fleet anchorages and to services to the U. S. ATLANTIC FLEET, will be referred to the Commander in Chief, U. S. ATLANTIC FLEET for comment, if he so requests.

5. Plans may be distributed before review and acceptance.

[25] Section 3. COMMAND RELATIONS

3131. In order to provide for unity of command of task groups of the U. S. ATLANTIC FLEET and the NAVAL COASTAL FRONTIER FORCES, in

the execution of tasks requiring mutual support, the following provisions shall apply:

a. On M-day, or sooner if directed by the Chief of Naval Operations, the Commander, NORTH ATLANTIC NAVAL COASTAL FRONTIER, the SOUTHERN NAVAL COASTAL FRONTIER, the CARIBBEAN NAVAL COASTAL FRONTIER, and the Commander, PANAMA NAVAL COASTAL FRONTIER so far as regards operations in the ATLANTIC SECTOR, are assigned a dual status as follows:

1. As commanders of their respective Naval Coastal Frontier Forces operating under the orders of the Chief of Naval Operations;

2. As officers of the U. S. ATLANTIC FLEET, operating under the orders of the Commander in Chief, U. S. ATLANTIC FLEET, in command of task groups of that fleet, when and as directed by the Commander in Chief thereof.

b. The Commander in Chief, U. S. ATLANTIC FLEET, may thereafter require the Commanders, Naval Coastal Frontiers to place under his command, temporarily and for particular purposes, task groups of their Naval Coastal Frontier Forces. The Commander in Chief, U. S. ATLANTIC FLEET, will, when taking temporary command of such task forces, have due regard to the tasks assigned in this plan to the Commanders, Naval Coastal Frontiers.

1. The Commander in Chief, U. S. ATLANTIC FLEET, will not require task groups of the Naval Coastal Frontier Forces to leave the limits of their respective Coastal Zones, except in emergency, or upon the authority of the Chief of Naval Operations.

[26] c. Conflicting provisions of General Order No. 142 are suspended while the provisions of this paragraph are in effect.

3132. The NAVAL OPERATING BASE, BERMUDA, by this plan is assigned as a unit of the U. S. ATLANTIC FLEET, both for administrative and task purposes.

3133. In addition to having general authority over the operation of the Naval Local Defense Forces, the Commander, NORTH ATLANTIC NAVAL COASTAL FRONTIER and the Commander, SOUTHERN NAVAL COASTAL FRONTIER have authority to coordinate the activities of the Commandants of the Naval Districts within their respective Naval Coastal Frontiers, in matters that concern the Naval Communication Service, the Naval Intelligence Service, and the Naval Transportation Service. Due consideration will be given to the requirements of the tasks assigned to these services by the Chief of Naval Operations.

3134. a. Commanders of Naval Coastal Frontiers may reassign temporarily to the Naval Local Defense Forces under their command, vessels and aircraft assigned by the Chief of Naval Operations to the Naval Coastal Force.

b. Except as provided for in the preceding sub-paragraph, Commanders of Naval Coastal Frontiers will not change the assignment of vessels made by the Chief of Naval Operations to Naval Coastal Forces and Naval Local Defense Forces except in emergency or upon the authority of the Chief of Naval Operations.

3135. Command relations between United States and Canadian Forces will be set forth in the Joint Army and Navy Basic War Plan—Rainbow No. 5, Appendix I, after ABC-22 has been approved.

[27]

CHAPTER II. FORCES IN THE PACIFIC AREA

Section 1. THE U. S. PACIFIC FLEET

3211. The U. S. PACIFIC FLEET (Chapter III, Appendix II) will be organized into task forces as follows:

a. Task forces as directed by the Commander in Chief, U. S. PACIFIC FLEET;

b. NAVAL STATION, SAMOA;

c. NAVAL STATION, GUAM.

3212. The U. S. PACIFIC FLEET is assigned the following tasks within the PACIFIC AREA:

a. TASK

SUPPORT THE FORCES OF THE ASSOCIATED POWERS IN THE FAR EAST BY DIVERTING ENEMY STRENGTH AWAY FROM THE MALAY BARRIER, THROUGH THE DENIAL AND CAPTURE OF POSITIONS IN THE MARSHALLS, AND THROUGH RAIDS ON ENEMY SEA COMMUNICATIONS AND POSITIONS;

b. **TASK**

PREPARE TO CAPTURE AND ESTABLISH CONTROL OVER THE CAROLINE AND MARSHALL ISLAND AREA, AND TO ESTABLISH AN ADVANCED FLEET BASE IN TRUK;

c. **TASK**

DESTROY AXIS SEA COMMUNICATIONS BY CAPTURING OR DESTROYING VESSELS TRADING DIRECTLY OR INDIRECTLY WITH THE ENEMY;

d. **TASK**

SUPPORT BRITISH NAVAL FORCES IN THE AREA SOUTH OF THE EQUATOR AS FAR WEST AS LONGITUDE 155° EAST;

[28] e. **TASK**

DEFEND SAMOA IN CATEGORY "D";

f. **TASK**

DEFEND GUAM IN CATEGORY "F";

g. **TASK**

PROTECT THE SEA COMMUNICATIONS OF THE ASSOCIATED POWERS BY ESCORTING, COVERING, AND PATROLLING AS REQUIRED BY CIRCUMSTANCES, AND BY DESTROYING ENEMY RAIDING FORCES (See Part III, Chapter V, Section 1);

h. **TASK**

PROTECT THE TERRITORY OF THE ASSOCIATED POWERS IN THE PACIFIC AREA AND PREVENT THE EXTENSION OF ENEMY MILITARY POWER INTO THE WESTERN HEMISPHERE BY DESTROYING HOSTILE EXPEDITIONS AND BY SUPPORTING LAND AND AIR FORCES IN DENYING THE ENEMY THE USE OF LAND POSITIONS IN THAT HEMISPHERE;

i. **TASK**

COVER THE OPERATIONS OF THE NAVAL COASTAL FRONTIER FORCES;

j. **TASK**

ESTABLISH FLEET CONTROL ZONES, DEFINING THEIR LIMITS FROM TIME TO TIME AS CIRCUMSTANCES REQUIRE;

k. **TASK**

ROUTE SHIPPING OF ASSOCIATED POWERS WITHIN THE FLEET CONTROL ZONES.

[29] 3213. a. Units assigned to the ATLANTIC REENFORCEMENT in Chapter III, Appendix II, will be transferred from the U. S. PACIFIC FLEET, to the U. S. ATLANTIC FLEET, when directed by the Chief of Naval Operations.

b. The SOUTHEAST PACIFIC FORCE (Chapter IV, Appendix II), will be established under the immediate command of the Chief of Naval Operations, when so directed by that officer.

c. Until detached, the units assigned to the ATLANTIC REENFORCEMENT and the SOUTHEAST PACIFIC FORCE will be under the command of the Commander in Chief, U. S. PACIFIC FLEET, and may be employed as desired by him, so long as they remain in the PACIFIC AREA. They shall not be sent to such distances from PEARL HARBOR as would prevent their arrival in the CANAL ZONE twenty-one days after the Chief of Naval Operations directs their transfer from the PACIFIC AREA.

3214. a. The Commander in Chief, U. S. PACIFIC FLEET, will arrange for the logistic support of the U. S. PACIFIC FLEET from sources in continental United States and in the FOURTEENTH NAVAL DISTRICT designated by the Shore Establishment, and from United States and foreign commercial sources. (See Part IV, Chapter III, Section 2.) For this purpose he will employ the transportation facilities of the U. S. PACIFIC FLEET, which will be supplemented as required by those of the Naval Transportation Service.

b. To the extent practicable, the services of the Naval Transportation Service will be restricted to supplementing the movement of logistic supplies, including personnel, between the continental United States and OAHU.

c. The Commander in Chief, U. S. PACIFIC FLEET, will establish in the Office of the Commander, PACIFIC SOUTHERN NAVAL COASTAL FRONTIER, an officer of the staff of the Commander, BASE FORCE, U. S. PACIFIC FLEET, who will have liaison duties with respect to the quantities and transportation of logistic requirements, including personnel, to be delivered into the Fleet Control Zones. The Commander in Chief, U. S. PACIFIC FLEET, may,

at his discretion, establish similar liaison officers in the offices of the Commanders of other Naval Coastal Frontiers.

[90] 3215. a. The Commander in Chief, U. S. PACIFIC FLEET, will require the following plans to be prepared:

1. *THE U. S. PACIFIC FLEET OPERATING PLAN—RAINBOW No. 5* (Navy Plan O-1, RAINBOW No. 5);

2. A plan for the execution of TASK b. of paragraph 3212, assuming the availability of approximately 30,000 Army troops in addition to forces of the U. S. PACIFIC FLEET, and assuming that the task will be executed on 180M;

3. *NAVAL STATION, SAMOA, NAVAL LOCAL DEFENSE FORCE OPERATING PLAN—RAINBOW No. 5* (Naval Station Samoa Plan O-5, RAINBOW No. 5);

4. Such other subordinate task force operating plans as the Commander in Chief, U. S. PACIFIC FLEET, may direct.

b. 1. Plans listed under a. 1. and 2, will be reviewed by the Chief of Naval Operations.

2. The NAVAL STATION GUAM Naval Local Defense Force Operating Plan—RAINBOW No. 3 will be applicable, and no additional plan need be prepared.

NOTE: The Commandant, Naval Station, GUAM, is not included in the distribution of this Navy Basic War Plan—RAINBOW No. 5.

[31] *Section 2. THE SOUTHEAST PACIFIC FORCE*

3221. The SOUTHEAST PACIFIC FORCE (Chapter IV, Appendix II) will be established under the immediate command of the Chief of Naval Operations upon its arrival in the CANAL ZONE.

3222. This force will base on the Naval Operating Base, BALBOA, or in SOUTH AMERICAN ports as may later be directed, and will operate in the SOUTHEAST PACIFIC SUB-AREA, delimited as that part of the PACIFIC AREA south of the PANAMA NAVAL COASTAL FRONTIER, and between the west coast of South America and approximately Longitude 95° West.

3223. The SOUTHEAST PACIFIC FORCE is assigned the following tasks:

a. *TASK*

DESTROY AXIS SEA COMMUNICATIONS BY CAPTURING OR DESTROYING VESSELS TRADING DIRECTLY OR INDIRECTLY WITH THE ENEMY;

b. *TASK*

PROTECT SEA COMMUNICATIONS OF THE ASSOCIATED POWERS BY ESCORTING, COVERING, OR PATROLLING AS REQUIRED BY CIRCUMSTANCES, AND BY DESTROYING ENEMY RAIDING FORCES;

c. *TASK*

SUPPORT THE OPERATIONS OF THE PANAMA NAVAL COASTAL FRONTIER FORCES IN THE PACIFIC SECTOR;

d. *TASK*

PROMOTE THE INTERESTS OF THE ASSOCIATED POWERS IN THE NATIONS ON THE WEST COAST OF SOUTH AMERICA.

[32] 3224. a. The Commander, SOUTHEAST PACIFIC FORCE, will arrange for the logistic support of the SOUTHEAST PACIFIC FORCE from Shore Establishment sources in the FIFTEENTH NAVAL DISTRICT, and from foreign commercial sources (See Part IV, Chapter III, Section 2). Transportation will be provided by the Naval Transportation Service.

b. In circumstances where transportation facilities provided by the NAVAL TRANSPORTATION SERVICE are inadequate, the Commander, SOUTHEAST PACIFIC FORCE, is authorized to charter on a time charter basis, vessels immediately obtainable by him, for the purpose of providing his forces with urgent logistic deficiencies. Vessels of United States registry will be employed, if available.

3225. a. The Commander, SOUTHEAST PACIFIC FORCE, will require the preparation of the following plans:

1. *U. S. SOUTHEAST PACIFIC FORCE OPERATING PLAN—RAINBOW No. 5* (Navy Plan O-3-C, RAINBOW No. 5);

2892 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

2. Such subordinate task force operating plans as the Commander, SOUTHEAST PACIFIC FORCE, may direct.
 - b. 1. The plan listed under a. 1. will be reviewed by the Chief of Naval Operations.
 2. Plans may be distributed before review and acceptance.
- [33] *Section 3. THE NAVAL COASTAL FRONTIER FORCES*
3231. a. The organization of the NAVAL COASTAL FRONTIER FORCES is prescribed in General Order No. 143.
- b. The boundaries of Coastal Frontiers, Naval Coastal Frontiers, Coastal Zones, Sectors, and Subsectors, are defined in "Joint Action of the Army and the Navy, 1935," as modified by Annex I of Appendix I.
3232. The Naval Coastal Frontiers in the PACIFIC AREA are:
- a. PACIFIC NORTHERN NAVAL COASTAL FRONTIER;
 - b. PACIFIC SOUTHERN NAVAL COASTAL FRONTIER;
 - c. HAWAIIAN NAVAL COASTAL FRONTIER.
3233. The NAVAL COASTAL FRONTIER FORCES (Chapter VIII, Appendix II) in the PACIFIC AREA are assigned the following tasks:
- a. *TASK*
DEFEND THE NAVAL COASTAL FRONTIERS IN CATEGORIES INDICATED BELOW:
CATEGORY B—THE PACIFIC SOUTHERN NAVAL COASTAL FRONTIER.
—THE PACIFIC NORTHERN NAVAL COASTAL FRONTIER, EXCEPT THE ALASKAN SECTOR.
CATEGORY C—THE ALASKAN SECTOR OF THE PACIFIC NORTHERN NAVAL COASTAL FRONTIER, EXCEPT UNALASKA.
CATEGORY D—UNALASKA.—THE HAWAIIAN NAVAL COASTAL FRONTIER;
- [34] b. *TASK*
PROTECT AND ROUTE SHIPPING IN ACCORDANCE WITH INSTRUCTIONS CONTAINED IN PART III, CHAPTER VII, SECTION 3;
- c. *TASK*
SUPPORT THE U. S. PACIFIC FLEET;
 - d. *TASK*
SUPPORT THE ARMY AND ASSOCIATED FORCES WITHIN THE COASTAL FRONTIERS.
3234. a. The following plans will be prepared:
1. Local Joint Plans as prescribed in Appendix I, paragraph 48;
 2. By the Commander, PACIFIC SOUTHERN NAVAL COASTAL FRONTIER:
(a) Naval Coastal Frontier Operating Plan—RAINBOW No. 5, including an annex covering the operating plan of the Naval Coastal Force (Naval Coastal Frontier Plan 0-4, RAINBOW No. 5);
 3. By Commanders, PACIFIC NORTHERN NAVAL COASTAL FRONTIER, HAWAIIAN NAVAL COASTAL FRONTIER, and by the Commandant, ELEVENTH and TWELFTH NAVAL DISTRICTS:
(a) Naval Local Defense Force Operating Plans—RAINBOW No. 5 (Naval District Plans 0-5, RAINBOW No. 5);
(b) Joint Embarkation Plans as required in Appendix I, paragraph 48;
- [35] 4. Additional subordinate task force operating plans as directed by Commanders, Naval Coastal Frontiers, and Commandants of Naval Districts.
- b. 1. Joint Coastal Frontier Defense Plans and other plans prepared by Commanders, Naval Coastal Frontiers, will be reviewed by the Chief of Naval Operations.
 2. Operating plans prepared by Commandants of Naval Districts will be reviewed by the respective Commanders, Naval Coastal Frontiers.

3. (a) Naval Coastal Frontier Operating Plans for the PACIFIC SOUTHERN NAVAL COASTAL FRONTIER, and Naval Local Defense Force Operating Plans for the HAWAIIAN NAVAL COASTAL FRONTIER will be forwarded to the Commander in Chief, U. S. PACIFIC FLEET for comment, prior to their review by the Chief of Naval Operations, with a view to their coordination with the Operating Plans of the U. S. PACIFIC FLEET.

(b) Such portions of Naval Local Defense Force Operating Plans and Naval District Contributory Plans as relate to the protection of fleet anchorages and to services to the U. S. PACIFIC FLEET, will be referred to the Commander in Chief, U. S. PACIFIC FLEET for comment, if he so requests.

4. Plans may be distributed before review and acceptance.

[38] *Section 4. COMMAND RELATIONS*

3241. In order to provide for unity of command of task groups of the U. S. PACIFIC FLEET and of the PACIFIC NORTHERN and PACIFIC SOUTHERN NAVAL COASTAL FRONTIERS, in the execution of tasks requiring mutual support, the following provisions shall apply (see paragraph 3242):

a. On M-day, or sooner if directed by the Chief of Naval Operations, the Commanders, PACIFIC NORTHERN NAVAL COASTAL FRONTIER and PACIFIC SOUTHERN NAVAL COASTAL FRONTIER will be assigned a dual status as follows:

1. As commanders of their respective Naval Coastal Frontier Forces operating under the orders of the Chief of Naval Operations.

2. As officers of the U. S. PACIFIC FLEET operating under the orders of the Commander in Chief, U. S. PACIFIC FLEET, in command of task groups of that fleet when and as directed by the Commander in Chief thereof.

b. The Commander in Chief, U. S. PACIFIC FLEET, may thereafter require the Commanders, Naval Coastal Frontiers to place under his command, temporarily and for particular purposes, task groups of their Naval Coastal Frontier Forces. The Commander in Chief, U. S. PACIFIC FLEET, when taking temporary command of such task forces, will have due regard for the tasks assigned in this plan to the Commanders, Naval Coastal Frontiers by the Chief of Naval Operations.

1. The Commander in Chief, U. S. PACIFIC FLEET, will not require task groups of the Naval Coastal Frontier Forces to leave the limits of their respective Coastal Zones, except in emergency, or upon authority of the Chief of Naval Operations.

c. Conflicting provisions of General Order No. 142 are suspended while the provisions of this paragraph are in effect.

[37] 3242. The provisions of paragraph 3241 above, apply to the command relations of the Commander in Chief, U. S. PACIFIC FLEET, and the Commander, HAWAIIAN NAVAL COASTAL FRONTIER, except that the circumstances under which its provisions are applicable are not restricted to the execution of tasks requiring mutual support, but apply in all circumstances.

3243. The Chief of Naval Operations will direct the Commander, SOUTHEAST PACIFIC FORCE, to operate under the strategic direction of the Commander in Chief, U. S. PACIFIC FLEET, if coordinated action of that force and the U. S. PACIFIC FLEET becomes necessary. The Chief of Naval Operations will be informed by the Commander in Chief, U. S. PACIFIC FLEET, if this situation arises.

3244. In addition to having general authority over the operation of the Naval Local Defense Forces, the Commander, PACIFIC SOUTHERN NAVAL COASTAL FRONTIER, has authority to coordinate the activities of the Commandants of the Naval Districts within his respective Naval Coastal Frontier in matters that concern the Naval Communication Service, the Naval Intelligence Service, and the Naval Transportation Service. Due consideration will be given to the requirements of the tasks assigned to these services by the Chief of Naval Operations.

3245. a. Commanders of Naval Coastal Frontiers may reassign, temporarily, to the Naval Local Defense Forces under their command, vessels and aircraft assigned by the Chief of Naval Operations to the Naval Coastal Force.

b. Except as provided for in the preceding sub-paragraph, Commanders of Naval Coastal Frontiers will not change the assignment of vessels made by the Chief of Naval Operations to Naval Coastal Forces and Naval Local Defense Forces except in emergency or upon the authority of the Chief of Naval Operations.

3246. Command relations between United States and Canadian Forces will be set forth in the Joint Army and Navy Basic War Plan—Rainbow No. 5, Appendix I, after ABC-22 has been approved.

[58]

CHAPTER III. FORCES IN THE FAR EAST AREA

Section 1. THE U. S. ASIATIC FLEET AND THE PHILIPPINE NAVAL COASTAL FRONTIER

3311. The following is quoted from Appendix I, paragraph 16.b.:

"Far East Area

"Coordination in the planning and execution of operations by Military forces of the United States, British Commonwealth, and Netherlands East Indies, in the FAR EAST AREA will, subject to the approval of the Dutch authorities, be effected as follows:

"(1) The commanders of the Military forces of the Associated Powers will collaborate in the formulation of strategic plans for operations in that area.

"(2) The defense of the territories of the Associated Powers will be the responsibility of the respective commanders of the Military forces concerned. These commanders will make such arrangements for mutual support as may be practicable and appropriate.

"(3) The responsibility for the strategic direction of the naval forces of the Associated Powers, except of naval forces engaged in supporting the defense of the PHILIPPINES, will be assumed by the British Naval Commander in Chief, CHINA. The Commander in Chief, UNITED STATES ASIATIC FLEET, will be responsible for the direction of naval forces engaged in supporting the defense of the PHILIPPINES."

3312. a. The Commander in Chief, U. S. ASIATIC FLEET, is the immediate superior in command of the Commandant, SIXTEENTH NAVAL DISTRICT, who is also designated as the Commander, PHILIPPINE NAVAL COASTAL FRONTIER (see Chapter V, Appendix II).

b. The organization of Naval Coastal Frontiers is prescribed in General Order No. 143.

[59] c. The boundaries of the PHILIPPINE COASTAL FRONTIER, and the extent of the PHILIPPINE NAVAL COASTAL FRONTIER, are defined in "Joint Action of the Army and Navy, 1935", as modified by Annex I of Appendix I.

d. The Commander, PHILIPPINE NAVAL COASTAL FRONTIER will employ the Naval Local Defense Force in the execution of tasks assigned by the Commander in Chief, U. S. ASIATIC FLEET, and will arrange for its joint tactical and strategic employment in cooperation with the Army, under the direction of the Commander in Chief, U. S. ASIATIC FLEET.

3313. The Commander in Chief, U. S. ASIATIC FLEET is assigned the following tasks:

a. TASK

RAID JAPANESE SEA COMMUNICATIONS AND DESTROY AXIS FORCES;

b. TASK

SUPPORT THE LAND AND AIR FORCES IN THE DEFENSE OF THE TERRITORIES OF THE ASSOCIATED POWERS. (THE RESPONSIBILITY OF THE COMMANDER IN CHIEF, UNITED STATES ASIATIC FLEET, FOR SUPPORTING THE DEFENSE OF THE PHILIPPINES REMAINS SO LONG AS THAT DEFENSE CONTINUES.);

c. TASK

DESTROY AXIS SEA COMMUNICATIONS BY CAPTURING OR DESTROYING VESSELS TRADING DIRECTLY OR INDIRECTLY WITH THE ENEMY;

d. **TASK**

PROTECT SEA COMMUNICATIONS OF THE ASSOCIATED POWERS BY ESCORTING, COVERING, AND PATROLLING, AS REQUIRED BY CIRCUMSTANCES, AND BY DESTROYING ENEMY RAIDING FORCES;

[40] e. **TASK**

IN COOPERATION WITH THE ARMY DEFEND THE PHILIPPINE COASTAL FRONTIER—CATEGORY OF DEFENSE "E";

f. **TASK**

ROUTE UNITED STATES FLAG SHIPPING IN ACCORDANCE WITH AGREEMENTS REACHED WITH THE OTHER ASSOCIATED POWERS IN THE FAR EAST AREA.

3314. The Commander in Chief, U. S. ASIATIC FLEET, will shift base to BRITISH or DUTCH ports at discretion.

3315. a. The Commander in Chief, U. S. ASIATIC FLEET, will arrange for the logistic support of the U. S. ASIATIC FLEET from sources in the SIXTEENTH NAVAL DISTRICT, and in continental United States; from commercial sources in the PHILIPPINE ISLANDS; and from British and Dutch governmental and commercial sources (See Part IV, Chapter III, Section 2.).

b. Logistic requirements other than personnel, ammunition, and technical materials, will be obtained from sources in the FAR EAST AREA or from sources in the adjacent BRITISH AREAS.

c. Personnel, ammunition, and technical materials will be obtained from sources in the United States.

d. Transportation facilities available to the U. S. ASIATIC FLEET will be employed so far as practicable for the movement of logistic supplies. The Naval Transportation Service will provide transportation for shipments from the United States. The first two of these vessels to arrive in the FAR EAST AREA may be retained by the Commander in Chief, U. S. ASIATIC FLEET, for use in that Area.

[41] e. The Commander in Chief, U. S. ASIATIC FLEET, may acquire through the Commandant, SIXTEENTH NAVAL DISTRICT, and in accordance with the provisions of existing law, any vessels of United States' or Philippine registry by requisition, time charter, or bare boat charter, to supplement the transportation facilities of the U. S. ASIATIC FLEET.

f. In circumstances where the transportation facilities of the U. S. ASIATIC FLEET, supplemented as provided for in paragraphs d. and e., are inadequate, the Commander in Chief, U. S. ASIATIC FLEET, is authorized to charter on a time charter basis, vessels immediately obtainable by him for the purpose of providing his forces with urgent logistic deficiencies. Vessels of United States registry will be employed if available.

3316. a. The Commander in Chief, U. S. ASIATIC FLEET, will require the following plans to be prepared:

1. *THE U. S. ASIATIC FLEET OPERATING PLAN—RAINBOW No. 5* (Navy Plan O-2, RAINBOW No. 5);

2. Local Joint Plans required by Appendix I, Paragraph 48;

3. *SIXTEENTH NAVAL DISTRICT NAVAL LOCAL DEFENSE FORCE OPERATING PLAN—RAINBOW No. 5*. (Sixteenth Naval District Plan O-5, RAINBOW No. 5);

4. Such subordinate task force operating plans as the Commander in Chief, U. S. ASIATIC FLEET, may direct.

b. 1. The plan listed under a. 1, will be reviewed by the Chief of Naval Operations.

2. Plans may be distributed before review and acceptance.

[42] **CHAPTER IV. FORCES IN THE UNITED KINGDOM AND BRITISH HOME WATERS AREA**

Section 1. THE U. S. NAVAL FORCES, NORTH EUROPE

3411. a. The Commander in Chief, U. S. NAVAL FORCES, NORTH EUROPE, is also the naval member of the United States Military Mission in London.

b. The U. S. NAVAL FORCES, NORTH EUROPE, will come under the administrative command of the Commander in Chief, U. S. NAVAL FORCES, NORTH EUROPE, upon the arrival of these forces in the UNITED KINGDOM AND BRITISH HOME WATERS AREA.

3412. a. The U. S. NAVAL FORCES, NORTH EUROPE (Chapter VI, Appendix II) will be organized into task forces as follows:

1. *THE NORTHWEST ESCORT FORCE*;
2. *SUBMARINE FORCE THREE*.

b. These task forces will operate under the command of the Commander in Chief, U. S. ATLANTIC FLEET, until their arrival in the UNITED KINGDOM AND BRITISH HOME WATERS AREA.

3413. After their arrival in the UNITED KINGDOM AND BRITISH HOME WATERS AREA, the task forces of the U. S. NAVAL FORCES, NORTH EUROPE, are assigned the following tasks:

- a. *THE NORTHWEST ESCORT FORCE*

1. *TASK*

ESCORT CONVOYS IN THE NORTHWEST APPROACHES, ACTING UNDER THE STRATEGIC DIRECTION OF THE BRITISH COMMANDER IN CHIEF OF THE WESTERN APPROACHES;

- b. *SUBMARINE FORCE THREE*

1. *TASK*

RAID ENEMY SHIPPING IN AN AREA TO BE DESIGNATED, UNDER THE STRATEGIC DIRECTION OF THE BRITISH VICE ADMIRAL, SUBMARINES.

[43] 3414. Logistic support for the U. S. NAVAL FORCES, NORTH EUROPE, will be arranged as indicated herein (see Part IV, Chapter III, Section 2). Transportation will be provided by the Naval Transportation Service, or from vessels assigned to the task forces.

- a. Fuel from United States and British sources.

b. Personnel, technical supplies, ammunition, and subsistence supplies from United States sources.

c. Repair and upkeep facilities from tender and cargo vessels and shore facilities assigned to this force, supplemented by a limited use of British facilities.

- d. Replacement of fuel to British storage from United States sources.

e. In circumstances where the transportation facilities of the U. S. NAVAL FORCES, NORTH EUROPE, and those provided by the NAVAL TRANSPORTATION SERVICE are inadequate, the Commander in Chief, U. S. NAVAL FORCES, NORTH EUROPE, is authorized to charter on a time charter basis, or a bare boat basis, vessels immediately obtainable by him for the purpose of providing his forces with urgent logistic deficiencies. Vessels of United States registry will be employed, if available.

3415. a. Outline operating plans for the employment of the U. S. NAVAL FORCES, NORTH EUROPE, will be prepared by the prospective Commander of the NORTHWEST ESCORT FORCE, and submitted to the prospective Commander in Chief, U. S. NAVAL FORCES, NORTH EUROPE, for review by the British Commander in Chief, WESTERN APPROACHES. After review and acceptance, copies of this plan will be furnished the Chief of Naval Operations.

[44]

CHAPTER V. THE SERVICES

Section 1. *THE NAVAL TRANSPORTATION SERVICE*

3511. The NAVAL TRANSPORTATION SERVICE (Chapter IX, Appendix II) is assigned the following task:

- a. *TASK*

PROVIDE SEA TRANSPORTATION FOR THE INITIAL MOVEMENT AND THE CONTINUED SUPPORT OF ARMY AND NAVY FORCES OVERSEAS, OTHER THAN THOSE WHICH ARE TO BE TRANSPORTED BY THE OPERATING FORCES. MAN AND OPERATE THE ARMY TRANSPORT SERVICE.

1. Deliveries may be made by commercial transportation or by vessels of the Naval Transportation Service as circumstances require.

2. The initial movements of U. S. Army troops under this task are as indicated in this paragraph. Larger movements may be made eventually, as indicated in Appendix I, paragraph 51, but the Navy will make no plans for these later movements until so directed by the Chief of Naval Operations.

(a) *NEW YORK to ICELAND*, 26,500 troops, 73 aircraft. First contingent—10,500 troops embark on 24M. Second contingent—16,000 troops embark on 57M. These two movements will be made by British transports if arrangements can be effected. If not, this plan contemplates use of United States transports.

(b) *NEW YORK to ENGLAND*, 7,000 troops embark on 10M.

NEW YORK to IRELAND, 8,000 troops embark on 10M.

(1) These two forces will move in one convoy.

(c) *NEW YORK to BERMUDA*, 3,700 troops, 38 aircraft, embark on 18M. Eight aircraft will fly to destination, 30 aircraft will be transported. Part of this force may be moved before M-day. [45]

(d) *GALVESTON to CURACAO-ARUBA*, 6,000 troops, embark on 15M.

(e) *GALVESTON to TRINIDAD*, 12,500 troops embark on 15M.

(f) *GALVESTON to PANAMA*, 6,400 troops, of which 3,300 embark on 20M. The remainder will be transported progressively as ships become available. Part of this force may be moved before M-day.

(g) *GALVESTON to PUERTO RICO*, 12,600 troops, of 4,000 embark 20M. The remainder will be transported progressively as ships become available. Part of this force may be moved before M-day.

(h) *SEATTLE to ALASKA*, 23,000 troops, of which 1,100 embark on 10M. The remainder will be transported progressively as ships become available. Part or all of these troops may be moved before M-day.

(i) *SAN FRANCISCO to HAWAII*, 23,000 troops, of which 15,000 embark on 10M. The remainder will be transported progressively as ships become available. Part of these troops may be moved before M-day.

3. The supply levels for the support of overseas forces which are to be transported by the NAVAL TRANSPORTATION SERVICE, are indicated in Appendix I, paragraph 57.

3512. Shipping will be routed by the Chief of Naval Operations and the Commanders of the Operating Forces in accordance with instructions contained in Part III, Chapter VII, Section 3.

[46] 3513. The Director, Naval Transportation Service, will prepare the Principal Naval Transportation Service Operating Plan—Rainbow No. 5, and will prescribe therein, the Naval Transportation Service Operating Plans—Rainbow No. 5, which are to be prepared by the Naval Districts, Outlying Naval Stations, and Activities or Task Groups not under the command of the Commandants of Naval Districts.

(47) *Section 2. THE NAVAL COMMUNICATION SERVICE*

3521. The NAVAL COMMUNICATION SERVICE is assigned the following tasks:

a. *TASK*

INSURE THE AVAILABILITY OF COMMUNICATION FACILITIES AND A SYSTEM FOR THEIR EMPLOYMENT ADEQUATE TO THE NEEDS OF THE NAVAL ESTABLISHMENT IN THE EXECUTION OF THIS PLAN;

b. *TASK*

IN COOPERATION, WHERE NECESSARY, WITH OTHER GOVERNMENT DEPARTMENTS AND INDEPENDENT OFFICES, AND SUBJECT TO THE PROVISIONS OF PERTINENT LEGISLATION, PROCLAMATIONS, AND EXECUTIVE ORDERS, PROVIDE FOR THE OPERATION OR SUPPRESSION, CONTROL, OR SUPERVISION, AS NECESSARY, OF NON-MILITARY COMMUNICATION STATIONS IN AREAS UNDER UNITED STATES' CONTROL.

2898 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3522. This Service, operating directly under the Chief of Naval Operations (Director of Naval Communications) comprises the following:

- a. Office of the Director, Naval Communications, Navy Department;
- b. The Communication Organization under the command of the Commandants of Naval Districts and Outlying Naval Stations; and under command of commanders of forces afloat, including aircraft.

3523. The Director, Naval Communication Service, will prepare the Principal Naval Communication Service Operating Plan—Rainbow No. 5, and will prescribe therein, the Naval Communication Service Operating Plans—Rainbow No. 5 which are to be prepared by the Naval Districts, Outlying Naval Stations, and Activities or Task Groups not under the command of the Commandants of Naval Districts.

[48] Section 3. THE NAVAL INTELLIGENCE SERVICE

3531. The NAVAL INTELLIGENCE SERVICE is assigned the following tasks:

a. TASK

IN COOPERATION WITH THE ARMY AND ASSOCIATED POWERS, SECURE, AND DISSEMINATE AS ADVISABLE, SUCH INFORMATION, PARTICULARLY CONCERNING THE ENEMY, ENEMY AGENTS AND SYMPATHIZERS, AS WILL ASSIST AND FACILITATE THE EXECUTION OF NAVY BASIC WAR PLAN—RAINBOW No. 5 AND THE PROTECTION OF THE NAVAL ESTABLISHMENT;

b. TASK

IN COOPERATION WITH OTHER GOVERNMENT DEPARTMENTS, PREVENT THE TRANSMISSION OF INFORMATION OF MILITARY OR ECONOMIC VALUE TO THE ENEMY.

3532. This Service, operating directly under the Chief of Naval Operations (Director of Naval Intelligence), comprises the following:

- a. Office of the Director of Naval Intelligence, Navy Department, including naval attaches, naval observers, and other personnel directly under the Director of Naval Intelligence;

- b. The Naval Intelligence organization under the command of the Commandants of Naval Districts, the Navy Yard, Washington, D. C., and Outlying Naval Stations, including the field units of the respective subordinate activities.

3533. The Director, Naval Intelligence Service, will prepare the Principal Naval Intelligence Service Operating Plan—Rainbow No. 5, and will prescribe therein the Naval Intelligence Service Operating Plans—Rainbow No. 5, which are to be prepared by the Naval Districts, Outlying Naval Stations, and Activities or Task Groups not under the command of the Commandants of Naval Districts.

[49]

CHAPTER VI. THE SHORE ESTABLISHMENT

3601. The task of the SHORE ESTABLISHMENT is prescribed in Part IV

[50]

CHAPTER VII. INSTRUCTIONS JOINTLY APPLICABLE TO TASK FORCES

Section 1. FORMING THE TASK FORCES

3711. Naval Coastal Frontier Forces will be formed on M-day or sooner if directed by the Chief of Naval Operations.

- a. Units of the U. S. ATLANTIC FLEET, U. S. PACIFIC FLEET, and U. S. ASIATIC FLEET, designated for assignment to NAVAL COASTAL FRONTIER FORCES, when directed by the respective Commanders in Chief of the Fleets, will report to the Commanders, Naval Coastal Frontier Forces, to which assigned.

- b. Vessels of NAVAL DISTRICT CRAFT (See General Order No. 143), designated for assignment to the Naval Coastal Frontier Forces, when directed by the Commandants of the Naval Districts, will report to the commanders of task organizations to which assigned.

- c. Vessels to be mobilized, upon completion of mobilization, and when directed by the Commandants of Naval Districts in which they mobilize, will report to the commanders of task organizations to which assigned.

3712. The Chief of Naval Operations will issue special instructions to vessels of the Naval Transportation Service and to vessels operating directly under the Chief of Naval Operations as circumstances require.

3713. a. Coast Guard Districts, including vessels, aircraft and shore establishments within the Districts, upon M-day or sooner if directed by the President, will automatically come under the control of Naval Districts in the manner set forth in the "United States Coast Guard District Manual, 1940."

b. The Commandants of Naval Districts will direct the Coast Guard units coming under their command to report to the commanders of the task organizations as indicated in Appendix II of this plan.

[51] *Section 2. MOBILIZATION*

3721. a. Mobilization comprises two steps, viz:

1. Timely assembly at assigned Mobilization Districts of the forces to be mobilized preparatory to 2;

2. Preparation for war service. This is a function of the Shore Establishment assisted to the extent practicable by the forces being mobilized, and is provided for in Part IV of this plan.

b. Under this plan the term "mobilization" is applied only to the Operating Forces and the Services, including their units ashore. The Shore Establishment does not mobilize, but, as stipulated in Part IV, increases its personnel and facilities as required to perform its assigned task.

c. Mobilization is thus not a process confined exclusively to the initial days of the war but continues as long as there are additional forces to be mobilized. During and subsequent to mobilization, vessels and units are supported through the operation of the maintenance provisions of Part IV.

3722. Most of the Naval Forces listed in the current Operating Force Plan have already been mobilized at the time of issue of this plan. Vessels so listed, even if not completely mobilized on M-day, will be considered available for immediate war service within the limits of their capabilities. They will complete their mobilization progressively as opportunity permits, and as directed by their superiors in command. Exceptions may be made by direction of the Chief of Naval Operations.

3723. In view of the provisions of paragraph 3722, mobilization in this plan applies principally to vessels assigned to the Naval Transportation Service, to the Naval Coastal Frontier Forces, and to Naval District Craft which are to be taken over from private sources or other government departments.

[52] 3724. Instructions for the assembly at Mobilization Districts of vessels assigned to the Naval Transportation Service will be issued by the Chief of Naval Operations.

3725. Instructions for the assembly at Mobilization Districts of vessels assigned to the Naval Coastal Frontier Forces are contained in Chapter VIII, Appendix II.

[53] *Section 3. THE ROUTING AND PROTECTION OF SHIPPING*

3731. The following is quoted from Appendix I, "Section V";

a. "20. The British authorities will issue directions for the control and protection of shipping of the Associated Powers within the areas in which British authorities assume responsibility for the strategic direction of Military Forces. United States authorities will issue directions for the control and protection of shipping of the Associated Powers within the areas in which the United States authorities assume responsibility for the strategic direction of Military forces.

"21. United States and British shipping scheduled to pass from an area assigned to one Power into an area assigned to the other Power, will be controlled and protected by agreement between the respective naval authorities. The British Admiralty is the supreme authority in the control of shipping in the North Atlantic bound to and from the United Kingdom.

"22. The British Naval Control Service Organization will continue in the exercise of its present functions and methods in all regions pending establishment of effective United States Agencies in United States areas. The Chief of Naval Operations, immediately on entry of the United States into the war, will arrange for the control and protection of shipping of United States registry or charter within United States areas. Requests from the British Naval Control Service Organization for protection by United States forces within United States areas will be made to the Chief of Naval Operations."

b. The term "control of shipping" as used in Appendix I, "Section V", includes all matters relating to the movement of non-combatant vessels on the high seas, except protection.

Definitions

3732. a. **ROUTING.** The term "routing of shipping" as employed in this plan relates to the sea routes to be followed; [54] the time of departure from port; whether or not ships will move singly or in convoy; the timing at meeting points (rendezvous) and along the sea route; and the delivery of instructions for routing. Instructions in regard to the assembly of vessels for convoys, the scheduling of ports of call or destination, and loading are not considered as a part of routing.

b. **INTRA-DISTRICT SHIPPING.** That shipping of the Associated Powers proceeding from one port to another within the limits of a Naval District.

c. **INTRA-FRONTIER SHIPPING.** That shipping of the Associated Powers proceeding from one Naval District to another within the same Naval Coastal Frontier.

d. **INTER-FRONTIER SHIPPING.** That shipping of the Associated Powers, not overseas shipping, proceeding from a port in one Naval Coastal Frontier to, or through the waters of, another Naval Coastal Frontier.

e. **FLEET CONTROL ZONE SHIPPING.** All shipping of the Associated Powers while within the Fleet Control Zone.

f. **OVERSEAS SHIPPING** is that shipping of the Associated Powers whose route, in whole or in part, lies outside the coastal zone of a Naval Coastal Frontier; except that shipping passing between the CARIBBEAN NAVAL COASTAL FRONTIER and the ATLANTIC COAST ports of the United States or Canada is considered INTER-FRONTIER SHIPPING.

*Instructions for routing shipping***3733. INTRA-DISTRICT INTRA-FRONTIER, and INTER-FRONTIER SHIPPING.**

a. The Chief of Naval Operations will issue general instructions to Naval Coastal Frontier Commanders for the routing of Intra-District, Intra-Frontier, and Inter-Frontier Shipping. Commanders of Naval Coastal Frontiers and Commandants of Naval Districts will keep the Chief of Naval Operations and interested Commanders in Chief informed as to routing instructions issued by them.

[55] b. Commanders of Naval Coastal Frontiers will route Intra-Frontier and Inter-Frontier Shipping.

c. Intra-District shipping will be routed by the Commandant of the Naval District under the general direction of the Commander, Naval Coastal Frontier.

3734. OVERSEAS SHIPPING.

a. Overseas shipping is divided into two categories, referred to hereafter as Class A and Class B Overseas Shipping:

1. **CLASS A.** Overseas shipping between two points in the areas of strategic responsibility of the United States;

2. **CLASS B.** Overseas shipping between one point in the areas of strategic responsibility of the United States, and one point in the areas of strategic responsibility of the United Kingdom.

b. **WESTERN ATLANTIC AREA.**

1. The Chief of Naval Operations, in consultation with the United Kingdom Chief of Naval Staff, will arrange the routing details of Class B Overseas Shipping which passes between the WESTERN ATLANTIC AREA and UNITED KINGDOM AREAS to the east or south.

2. The Chief of Naval Operations will route all Class A and Class B Overseas Shipping while it is within the WESTERN ATLANTIC AREA. In the case of overseas shipping moving in convoy, he will issue the routing instructions to the convoy commanders, via the Commandants of the Districts in which are the ports of assembly of the convoys, with copies to the Commander in Chief, U. S. ATLANTIC FLEET, appropriate Naval Coastal Frontier Commanders, and Commandants of other Naval Districts affected. In the case of overseas shipping moving singly, the [56] Chief of Naval Operations will issue general routing instructions to the Naval Coastal Frontier Commanders, with copies to the Commander in Chief, U. S. ATLANTIC FLEET, and to Commandants of Naval Districts affected. Under the general supervision of the Commanders of Naval Coastal Frontiers, Commandants of Naval Districts will issue routing instructions to commanders of vessels.

c. **PACIFIC AREA.**

1. Under the general direction of the Chief of Naval Operations, the Commander of the PACIFIC SOUTHERN NAVAL COASTAL FRONTIER will perform, in the PACIFIC AREA, all the routing duties performed by the Chief of Naval Operations in the WESTERN ATLANTIC AREA, with the following exceptions:

(a) The Commander in Chief, U. S. PACIFIC FLEET, will route shipping in the PACIFIC FLEET CONTROL ZONES;

(b) The Commander, PANAMA NAVAL COASTAL FRONTIER, will route shipping in the SOUTHEAST PACIFIC SUB-AREA;

(c) Routing details of overseas shipping bound to or from the AUSTRALIAN AND NEW ZEALAND AREA will be arranged directly between the Commander, PACIFIC SOUTHERN NAVAL COASTAL FRONTIER, and the Chief of the Australian Naval Staff. The Chief of Naval Operations will make arrangements with the United Kingdom Chief of Naval Staff in case action is required by that officer.

Instructions for the protection of shipping

3735. a. Tasks providing for the protection of shipping are assigned to the Operating Forces.

[57] b. Protection of shipping may be provided by sea or air escort, by covering operations, by patrol, by dispersal, by shifting of routes, or by a combination of these methods.

c. The shipping of the Associated Powers operating in the areas of strategic responsibility of the United States will be protected by the responsible Commanders in Chief, Commanders of Sub-Areas, and Naval Coastal Frontiers, and by the Commandants of Naval Districts, to the extent required by the existing situation, and as may be practicable by the use of available forces. These officers will keep each other informed, as may be appropriate, as to the strength of naval forces, and the methods being employed, in the protection of shipping.

d. The protection of embarked military personnel and valuable cargoes will be viewed as having an especial importance.

[58] *Section 4. RULES OF WARFARE*

3741. In the conduct of the war the Naval Establishment will be guided by the current "Instructions for the Navy of the United States Governing Maritime Warfare".

3742. Except under extraordinary circumstances (as when no prize crews are available or great distances are involved, and it is impracticable for the capturing ship to leave her station), prizes should be sent promptly to a port within the jurisdiction of the United States, or to an allied port in which a United States prize court is sitting, or to an allied port where arrangements have previously been made by the commander in the Area for prizes captured by the United States to be received into custody of local officials until an opportunity presents itself of sending them to United States prize courts. When the State Department shall have made arrangements with other Associated Powers to permit United States prize courts within their jurisdiction, the forces afloat will be promptly notified.

3743. Do not use poison gas except in retaliation for similar use by the enemy.

3744. The Commander in Chief, U. S. ATLANTIC FLEET, within the WESTERN ATLANTIC AREA, and the Commander in Chief, U. S. PACIFIC FLEET, within the PACIFIC AREA, are authorized to declare such "Strategical Areas" as in their opinion are vital. They must give wide publicity to the exact boundaries of the areas involved and, at the earliest opportunity, notify the Chief of Naval Operations of these actions. A "Strategical Area", as here used, means an area from which it is necessary to exclude merchant ships and merchant aircraft to prevent damage to such ships or aircraft, or to prevent such ships or aircraft from obtaining information, which, if transmitted to the enemy, would be detrimental to our own forces.

[59] 3745. Should the Commander in Chief, U. S. ATLANTIC FLEET, or the Commander in Chief, U. S. PACIFIC FLEET, desire to lay mines outside the territorial waters of the enemy, or of the United States or other Associated Powers, or outside of proclaimed Strategical Areas, they should make recom-

mentations to the Chief of Naval Operations concerning the areas proposed to be mined and the time when the mines are to be laid. The Chief of Naval Operations will take the necessary steps to declare the mined areas and to notify shipping and foreign governments. In an emergency, mines may be so laid, before communicating with the Chief of Naval Operations, but in such cases appropriate local notification should be made by the Commander in Chief concerned, and the Chief of Naval Operations should be informed.

[60] *Section 5. INTELLIGENCE LIAISON BETWEEN COMMANDERS OF ASSOCIATED FORCES IN THE FIELD*

3751. The commanders of the Operating Forces and their subordinate task force commanders will, on their own initiative, exchange liaison officers with task force commanders of the Associated Powers for the purpose of coordinating matters which directly affect their operations. (See Appendix I, paragraph 17. f.).

[61]

PART IV. LOGISTICS

CHAPTER I. THE SHORE ESTABLISHMENT

4101. The SHORE ESTABLISHMENT is assigned the following tasks:

a. TASK

PREPARE FOR WAR SERVICE, MAINTAIN, AND AUGMENT THE OPERATING FORCES AND THE SERVICES;

b. TASK

PROVIDE PERSONNEL AND MATERIAL REQUIRED FOR ESTABLISHING AND MAINTAINING ADVANCED BASES;

c. TASK

PROVIDE SALVAGE SERVICE IN THE ATLANTIC AND PACIFIC OCEANS, THE GULF OF MEXICO, AND THE CARIBBEAN SEA, WITHIN APPROXIMATELY 500 MILES OF CONTINENTAL UNITED STATES, ALASKA, PANAMA CANAL ZONE, AND OF OUTLYING UNITED STATES POSSESSIONS AND LEASED TERRITORY IN THE ATLANTIC OCEAN AND THE CARIBBEAN SEA.

4102. Each Chief of Bureau or Head of an Office of the Navy Department, and each Commandant of a Naval District or an Outlying Naval Station will execute such parts of the tasks assigned to the Shore Establishment as fall under his cognizance by law or regulation, unless otherwise stipulated in Part IV.

[62]

CHAPTER II. GENERAL DIRECTIVES

Section 1. PERSONNEL

4211. The Shore Establishment will supply the trained personnel required for:

a. Preparing for war service, maintaining, and augmenting the Operating Forces and the Services;

b. Augmenting and maintaining the Shore Establishment Activities;

c. Establishing and maintaining Advanced Bases;

d. Augmenting and maintaining Salvage Service.

4212. The following is quoted from Appendix I, paragraph 54.

"The Army and Navy requirements for increased personnel will be met by the operation of the Selective Training and Service Act of 1940".

4213. a. Personnel will be supplied in accordance with the Basic Priorities established in Section 6 (paragraph 4261).

b. Where the requirements for personnel for the Operating Forces and the Services cannot be supplied from other sources, naval personnel assigned to Naval District Craft (see General Order No. 143) will be replaced with civilian personnel for such period of time as found to be necessary.

[63]

Section 2. MATERIAL

4221. The Shore Establishment will supply material required for:

a. Preparing for war service, maintaining, and augmenting the Operating Forces and the Services;

b. Augmenting and maintaining the Shore Establishment Activities;

c. Establishing and maintaining Advanced Bases;

d. Augmenting and maintaining Salvage Service.

4222. The material to support this Plan will come from existing reserves of the Navy and from production sources developed under the approved Industrial Mobilization Plan, and Navy Procurement Plans. The procurement of material will be regulated and controlled by existing laws and regulations, Executive Orders, and in accordance with the instructions contained in the Joint Army and Navy Basic War Plan—RAINBOW No. 5 (Appendix I, paragraphs 56 and 58).

4223. Bureaus having technical cognizance of material being procured for the Navy will take appropriate measures to insure that contractors safeguard such material from exposure to sabotage and from damage by sabotage or other means.

4224. Material will be supplied in accordance with the Basic Priorities established in Section 6 (paragraph 4261).

[64] *Section 3. TRANSPORTATION*

4231. a. Sea transportation will be provided by:

1. THE OPERATING FORCES;

2. THE NAVAL TRANSPORTATION SERVICE.

b. The Naval Transportation Service will arrange for delivery of personnel and material by commercial transportation facilities wherever practicable.

4232. a. Bureaus will provide material at loading ports ready for loading.

b. The Shore Establishment will furnish the Chief of Naval Operations and the District Commandants concerned with the necessary information regarding material and personnel to be loaded at loading ports in order that sea transportation may be provided.

c. The Shore Establishment will load material and embark personnel in vessels designated by the Chief of Naval Operations.

4233. a. The Army will furnish to the Chief of Naval Operations, or the District Commandants, information regarding the numbers of troops and quantities of material to be transported overseas (see Appendix I, paragraphs 51 and 57).

b. The Army will move Army material and troops to ports of embarkation, and load Army material and embark Army troops in vessels designated by the Chief of Naval Operations, subject to supervision by the Navy in matters regarding the safety of vessels.

c. The Navy will furnish subsistence and medical supplies for Army personnel while embarked on transports operated by the Navy (including time-chartered vessels); the Army will provide subsistence and medical supplies for all animals embarked on such transports. Army medical and Army commissary personnel embarked will be available to perform their normal duties in relation to Army personnel.

(65) 4234. The Commander in Chief, U. S. ATLANTIC FLEET, will establish in the Office of the Chief of Naval Operations and the Commander in Chief, U. S. PACIFIC FLEET, will establish in the Office of the Commander, PACIFIC SOUTHERN NAVAL COASTAL FRONTIER, officers having liaison duties in regard to coordinating the transportation of material and personnel by fleet transportation facilities and the Naval Transportation Service.

[66] *Section 4. LEGAL SERVICES*

4241. The Shore Establishment (Office of the Judge Advocate General of the Navy) will provide the legal services, charged to it by law and regulation, necessary for the execution of this plan by the Naval Establishment.

4242. These services will include:

a. The supervision of the administration of law throughout the Naval Establishment;

b. Securing the enactment of such legislation and the promulgation of such Presidential Proclamations and Executive Orders as may be required by the Naval Establishment in the execution of this plan;

c. In conjunction with the War Department, securing the enactment of legislation and the promulgation of such Presidential Proclamations and Executive Orders affecting both the Army and the Navy as are deemed necessary for the execution of the Joint Army and Navy Basic War Plan—RAINBOW No. 5 (Appendix I, paragraph 59).

[67] *Section 5. AUGMENTATION AND MAINTENANCE OF THE SHORE ESTABLISHMENT*

4251. The Shore Establishment will augment and maintain its activities by providing personnel and material necessary for the accomplishment of its assigned tasks.

2904 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4252. Requirements for Naval District Craft (see General Order No. 143) in excess of those provided for in the current Operating Force Plan, will be met locally by the Commandants of Naval Districts. This may be done by taking over suitable craft from private owners, or by contracting with private owners for the operation of such craft in a pool under navy control, to meet both government and private requirements.

[68] Section 6. PRIORITIES

4261. Priority in matters of supply, delivery, and services will be in accordance with the basic priorities stipulated below. All supporting efforts of the SERVICES and the SHORE ESTABLISHMENT will fall respectively under the priorities established by this general formula. For planning purposes, the several items listed under the same basic priority shall be considered of equal importance.

a. PRIORITY ONE

1. The transportation of Army troops and material in the initial movements to the UNITED KINGDOM, BERMUDA, CURACAO-ARUBA, TRINIDAD, PANAMA, PUERTO RICO, ALASKA, and HAWAII.

2. The requirements of the NORTHWEST ESCORT FORCE, U. S. NAVAL FORCES, NORTH EUROPE, and SUBMARINE FORCE THREE, U. S. NAVAL FORCES, NORTH EUROPE.

3. The requirements of the U. S. ASIATIC FLEET.

b. PRIORITY TWO

1. Initial movements to ICELAND.

2. The requirements of the U. S. ATLANTIC FLEET and the U. S. PACIFIC FLEET.

3. The requirements of the NAVAL TRANSPORTATION SERVICE not specified under PRIORITY ONE.

c. PRIORITY THREE

1. The requirements of the NAVAL COASTAL FRONTIER FORCES.

2. The transportation of Army troops and material not specified under PRIORITIES ONE and TWO.

d. PRIORITY FOUR

1. New Construction.

[69]

CHAPTER III. THE OPERATING FORCES AND SERVICES

Section 1. PREPARATION FOR WAR SERVICE

4311. Commencing on M-day, and before if directed, the SHORE ESTABLISHMENT will prepare for war services those vessels and units of the OPERATING FORCES and SERVICES listed in Appendix II, which are not then in condition of readiness for war service, by placing them in material condition and providing personnel to perform their war tasks.

4312. The desired condition of readiness for war service as regards personnel, repairs and alterations, and supplies, is the STANDARD CONDITION prescribed by the Bureaus and Offices of the Navy Department concerned and approved by the Chief of Naval Operations.

4313. *Vessels assigned to the Operating Forces and the Services listed in the current Operating Force Plan.*

a. Vessels assigned to the Operating Forces and the Services appearing in the current Operating Force Plan are not assigned to Mobilization Districts, as most of those vessels have already been mobilized at the time of issue of this plan. Vessels not completely mobilized on M-day will be considered available for immediate war service within the limitations of their capabilities. They will complete their mobilization progressively as opportunity permits, and as directed by their superiors in command. Exceptions may be made by direction of the Chief of Naval Operations.

4314. *Vessels assigned to the Operating Forces and the Services NOT listed in the current Operating Force Plan.*

a. Vessels not appearing in the current Operating Force Plan, assigned in Appendix II to the Operating Forces and the Services, are assigned to Mobilization Districts for preparation for war service (mobilization). Commandants are responsible for preparing for war service all vessels assigned to their districts for mobilization.

b. In cases where Appendix II indicates the day of arrival at the Mobilization District and the day required to be ready for service, the Commandant will employ the intervening period in the preparation of the vessel for war service.

[70] If essential items of conversion can not be completed by the "Day Ready" indicated in Appendix II, the Commandant will inform the Chief of Naval Operations and the Commander of the Operating Force concerned, as far in advance as practicable.

c. In cases where the day of arrival at the Mobilization District and the "Day Ready" are not indicated in Appendix II, the Commandant will complete the mobilization as promptly as possible in accordance with the priorities established and other related instructions.

d. Vessels assigned to the Operating Forces, other than those assigned to the Naval Coastal Frontier Forces, will be degaussed, armed, and manned with navy personnel before being considered ready for war service.

e. Vessels assigned to Naval Coastal Frontier Forces will be placed in STANDARD CONDITION before being considered ready for war service, unless the Commanders, Naval Coastal Frontiers, direct otherwise, in which case placing them in STANDARD CONDITION will be deferred until opportunity permits.

f. Vessels assigned to the Naval Transportation Service will be placed in STANDARD CONDITION before being considered ready for war service, except as follows:

1. Transports to be commissioned in the Navy will be considered ready for war service when degaussed, provided with fresh water, commissary, sanitary, medical, berthing, and other facilities essential for the initial scheduled voyage;

2. Transports to be operated on a time charter basis will be considered ready for war service when provided with fresh water, commissary, sanitary, medical, berthing, and other facilities essential for the initial scheduled voyage, and provided with a liaison group consisting of a communication group and such additional personnel (supply and medical) as may be required;

[71] 3. All other classes commissioned in the Navy scheduled for voyages outside of the WESTERN HEMISPHERE will be considered ready for war service when degaussed and prepared for the particular service for which scheduled;

4. All other classes operated on a time charter basis will be considered ready for war service when degaussed and prepared for the particular service for which scheduled, and provided with a liaison group consisting of a communication group and such additional personnel (supply and medical) as may be required;

5. Vessels of the Naval Transportation Service will not be delayed for the installation of batteries and magazines.

g. Time chartered merchant vessels of the Naval Transportation Service to be taken over and commissioned will be placed in STANDARD CONDITION after their initial voyage, and when opportunity permits.

h. Instructions for the mobilization of vessels assigned to the Naval Coastal Frontier Forces are contained in Chapter VIII, Appendix II.

4315. a. The crews of all combat loaded transports and other vessels scheduled to unload at a destination having no stevedores available, will include competent stevedore personnel. These may be supplied from trained naval personnel, or by contract if suitable naval personnel is not available. This provision applies to vessels commissioned in the Navy and to time chartered vessels.

b. Provision will be made for furnishing prize crews consisting of a suitable number of officers and men as follows:

- | | |
|--|----|
| 1. To the U. S. ATLANTIC FLEET | 6; |
| [72] 2. To the U. S. PACIFIC FLEET | 8; |
| 3. To the SOUTHEAST PACIFIC FORCE | 8; |
| 4. To the U. S. ASIATIC FLEET | 6. |

[73] Section 2. MAINTENANCE

4321. The Shore Establishment will maintain the Operating Forces and the Services in condition of readiness for war by:

- a. Replacement of personnel and material;
- b. Repairs to units made available at Shore Establishment activities;
- c. Hospitalization of personnel;
- d. Provisions of facilities at Shore Establishment activities for recreation and welfare of personnel.

Replacements

4322. a. In order to provide for replacements of personnel and material for the Operating Forces and the Services, the Bureaus and Offices of the Navy Department concerned will establish standard monthly replacement rates based upon estimated expenditures, plus a small excess for building up a reserve. These rates will be used by the Shore Establishment as a basis for procuring personnel and material to meet the replacement requirements of the Operating Forces and the Services. The estimates should be based on probable operations of each type of the Task Organization in each of the Areas and Sub-Areas listed in paragraph 1102 of this plan.

b. These standard monthly replacement rates will be revised from time to time so as to accord with the requirements of the Operating Forces and the Services, as determined by war experience.

c. In procuring personnel and material at the standard monthly replacement rates, no deduction will be made for probable losses in the forces to be supplied. A 10% surplus over the standard monthly replacements will be maintained available for shipment to provide for probable losses during sea transportation to destination.

d. Should the established monthly replacement rates prove to be inadequate to supply the requirements, personnel [74] and material allotted to low priority units will be reassigned to higher priority units, as required, until deficiencies can be replaced under revised replacement rates.

e. The Bureaus and Offices of the Navy Department who provide replacements of personnel and material will designate the activities of the Shore Establishment to which the Operating Forces and the Units of the Naval Transportation Service will submit their requests for replacements.

f. The rate of flow of replacements will be controlled by the timely submission of requests for replacements, stating the desired time and place of delivery.

g. Requests for replacements will be submitted as follows:

1. For the U. S. ATLANTIC FLEET, U. S. PACIFIC FLEET, U. S. ASIATIC FLEET, and SOUTHEAST PACIFIC FORCE, and U. S. NAVAL FORCES, NORTH EUROPE by the commanders thereof, or by officers designated by them;

2. For the NAVAL COASTAL FRONTIER FORCES, by the Commandants of Naval Districts upon which the forces are based;

3. For units of the NAVAL TRANSPORTATION SERVICE by the commanders thereof, through the appropriate local naval authorities where delivery is desired;

4. For units ashore by the commanders thereof, through the Commandants of Naval Districts or Commanders of Outlying Naval Stations in which these units are established.

h. Where Shore Establishment facilities are not readily available, units of the Operating Forces and of the Naval Transportation Service will obtain material replacements from local sources. (See par. 3116, 3214, 3224, 3315, 3414.) Replacements obtained in this manner will not be included in requests for replacements made to Shore Establishment activities.

[75] 4323. Delivery of replacements to the Operating Forces and the Services will be effected, insofar as practicable, at the times and places requested.

Repairs

4324. a. The Shore Establishment will repair such units of the Operating Forces and Services as may be made available therefor at Shore Establishment activities.

b. The assignment of availability of such units to an activity of the Shore Establishment for overhaul and repairs will be governed by the following:

1. The geographic disposition of the various forces;

2. The facilities available at certain activities for accomplishing the work required;

3. The degree of urgency of the work required;

4. The distribution of the work load among the various activities;

5. The needs for repairs by units of the Associated Powers.

4325. The Chief of Naval Operations will designate the shore activity to which a vessel will be assigned for overhaul and repairs and will fix the availability dates.

Hospitalization and evacuation

4326. a. The Operating Forces will provide hospitalization for sick and wounded personnel within the capacity of the hospital facilities available in hospital ships, in Advanced Base Hospitals, and in Mobile Medical Units.

[76] b. The Shore Establishment will provide hospitalization for sick or wounded naval and marine corps personnel which may be evacuated to Shore Establishment activities.

4327. The sick and wounded personnel evacuated to Shore Establishment activities will be transported in evacuation transports, hospital ships, and other available vessels having adequate medical facilities.

4328. a. Army forces overseas will provide their own hospitalization, but will be evacuated to home territory in the same manner as naval personnel.

b. Army forces embarked on naval vessels will be provided hospitalization by the Navy until such time as the sick and wounded can be evacuated to Army hospitals or field medical units.

Recreation and welfare

4329. a. The Shore Establishment will provide and maintain recreation and welfare facilities at Shore Establishment activities for naval and marine corps personnel.

b. Provisions for these activities will include:

1. Augmentation and maintenance of recreational facilities at Shore Establishment activities where units of the Operating Forces and Services are concentrated, and at Training Stations;

2. Augmentation and maintenance of religious and welfare facilities at the above activities, including cooperation with national and local welfare agencies and religious groups, operating for the welfare of naval personnel.

[77] *Section 3. AUGMENTATION*

4331. The Shore Establishment will augment the Operating Forces and the Services by:

a. New construction of vessels and aircraft;

b. Acquisition from the Maritime Commission and from private owners of vessels and aircraft designated by the Chief of Naval Operations (Naval Supply and Transportation Service Section), and by their preparation for war service;

c. Preparation for war service of vessels and aircraft transferred to the Navy from other Government Departments;

d. Acquisition of material.

4332. In preparing plans for the acquisition of small vessels, Commandants of Naval Districts will provide for consultation and cooperation between local representatives of the Army, Navy, and Maritime Commission.

[78]

CHAPTER IV. ADVANCED BASES

4401. The Shore Establishment will provide personnel and material required for establishing and maintaining ADVANCED BASES in accordance with instructions issued in separate directives.

[79]

CHAPTER V. SALVAGE

4501. a. The Shore Establishment will provide salvage units and render salvage service to vessels, both private and public, of all nationalities, in the areas prescribed in paragraph 4101.c.

b. The Operating Forces, assisted by such facilities as can be made available by the Shore Establishment, will render salvage service to vessels of their own forces and to other vessels where practicable, in the waters of the outlying United States possessions in the Pacific Ocean, of the Philippine Islands and of Advanced Bases, and in the open sea outside of the areas mentioned in paragraph 4101.c.

4502. The Shore Establishment will cooperate with and assist the Army or other agencies responsible for clearing harbor channels of stranded vessels within the waters of the United States.

2908 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4503. a. On M-day, or sooner if directed by the President, the Navy will acquire the following vessels to be converted and equipped as salvage vessels:

1. From the *COAST AND GEODETIC SURVEY*

PIONEER,
GUIDE,
DISCOVER;

2. From the *COAST GUARD*

REDWING.

b. These vessels will be manned and operated as directed by the Bureau of Ships, and two will be stationed on the Atlantic Coast of the United States and two on the Pacific Coast of the United States.

[80] CHAPTER VI. PLANS TO BE PREPARED BY THE SHORE ESTABLISHMENT

4601. Contributory Plans, Rainbow No. 5, will be prepared as prescribed in Part V, WPL-8, with particular reference to paragraphs 5126, 5127, and 5128.

4602. The Principal Contributory Plans, Rainbow No. 5, will prescribe the estimates of requirements, if any, to be made by the subordinate planning agencies.

[81] PART V. SPECIAL PROVISIONS

CHAPTER I. EXERTION OF FINANCIAL AND ECONOMIC PRESSURE

5101. The following is quoted from Appendix I, paragraph 60:

"The Administrator of Export Control, jointly with the War and Navy Departments, is to prepare plans and programs for the application of economic pressure such as may be obtained through control of commodities, transportation, communication, financial relationships, and all related means."

5102. The Chief of Naval Operations will cooperate in the preparation of joint plans for the Exertion of Financial and Economic Pressure.

[82] CHAPTER II. JOINT PLANS COVERING INTELLIGENCE SERVICE, CENSORSHIP AND PUBLICITY, AND MOBILIZATION OF RESOURCES

5201. The following is quoted from Appendix I, paragraph 61:

"Cooperation of Other Departments of the Government"

"The War and Navy Departments, jointly with other departments of the Government, shall have prepared plans or programs covering the following subjects:

- a. Intelligence Service;
- b. Censorship and Publicity;
- c. Mobilization of Resources."

5202. a. The Chief of Naval Operations (Director of Naval Intelligence) will act for the Navy Department in the preparation of joint plans or programs for the Intelligence Service.

b. The Secretary of the Navy (Director of the Office of Public Relations) and the Chief of Naval Operations (Director of Naval Intelligence) will jointly act for the Navy Department in the preparation of joint plans or programs for Censorship and Publicity.

c. The Under Secretary of the Navy, acting through the Navy Members of the Joint Army and Navy Munitions Board, will represent the Navy Department in the preparation of joint plans or programs for the Mobilization of Resources.

[1] APPENDIX I. TO WPL-46, THE JOINT ARMY AND NAVY BASIC WAR PLAN—RAINBOW No. 5

[2] SECTION I. DIRECTIVE

1. The directive for Joint Army and Navy Basic War Plan—RAINBOW No. 5, contained in J. P. 325 (Serial 642-1), Section 1, paragraph 3e, approved October 14, 1939, and revised April 10, 1940, is superseded by the directive contained in paragraph 2 of this paper.

2. The Joint Board directs The Joint Planning Committee to submit Joint Army and Navy Basic War Plan—RAINBOW No. 5 based upon the Report of

United States-British Staff Conversations, dated March 27, 1941 (ABC-1), and upon Joint United States-Canada War Plan No. 2 (ABC-22), now in process of drafting.

[3]

SECTION II. DEFINITIONS

3. The term "Associated Powers" means the United States and the British Commonwealth, and, when appropriate, includes the Associates and Allies of either Power.

4. The term "Axis Powers" means Germany and Italy, and, if Japan and other Powers are at war against the Associated Powers, is to be understood as including all such Powers.

5. "Malaysia" includes the Philippines, the Malay States, the Straits Settlements, Borneo, and the Netherlands East Indies. The "Malay Barrier" includes the Malay Peninsula, Sumatra, Java, and the chain of islands extending in an easterly direction from Java to Bathurst Island, Australia.

6. The term "United States naval forces" as used herein will be construed as including United States naval aviation. The term "air forces" will be construed as including only the United States Army Air Corps and the Royal Air Force.

[4]

SECTION III. GENERAL ASSUMPTIONS

7. That the Associated Powers, comprising initially the United States, the British Commonwealth (less Eire), the Netherlands East Indies, Greece, Yugoslavia, the Governments in Exile, China, and the "Free French" are at war against the Axis Powers, comprising either:

a. Germany, Italy, Roumania, Hungary, Bulgaria, or

b. Germany, Italy, Japan, Roumania, Hungary, Bulgaria, and Thailand.

8. That the Associated Powers will conduct the war in accord with ABC-1 and ABC-22.

9. That even if Japan and Thailand are not initially in the war, the possibility of their intervention must be taken into account.

10. That United States forces which might base in the Far East Area will be able to fill logistic requirements, other than personnel, ammunition, and technical materials, from sources in that general region.

11. That Latin American Republics will take measures to control subversive elements, but will remain in a nonbelligerent status unless subjected to direct attack; in general, the territorial waters and land bases of these Republics will be available for use by United States forces for purposes of Hemisphere Defense.

[5]

SECTION IV. CONCEPT OF THE WAR

12. The Concept of the War as set forth in paragraphs 10, 11, 12, and 13 of ABC-1 is quoted below, except that paragraph 13 (h) is quoted as modified by the Chief of Naval Operations' and the Chief of Staff's secret letter Serial 039412 of April 5, 1941.

"10. The broad strategic objectives of the Associated Powers will be the defeat of Germany and her Allies.

"11. The principles of United States and British national strategic defense policies of which the Military forces of the Associated Powers must take account are:

(a) *United States*

The paramount territorial interests of the United States are in the Western Hemisphere. The United States must, in all eventualities, maintain such dispositions as will prevent the extension in the Western Hemisphere of European or Asiatic political or Military power.

(b) *British Commonwealth*

The security of the United Kingdom must be maintained in all circumstances. Similarly, the United Kingdom, the Dominions, and India must maintain dispositions which, in all eventualities, will provide for the ultimate security of the British Commonwealth of Nations. A cardinal feature of British strategic policy is the retention of a position in the Far East such as will ensure the cohesion and security of the British Commonwealth and the maintenance of its war effort.

(c) *Sea Communications*

The security of the sea communications of the Associated Powers is essential to the continuance of their war effort.

[6] "12. The strategic concept includes the following as the principal offensive policies against the Axis Powers:

(a) Application of economic pressure by naval, land, and air forces and all other means, including the control of commodities at their source by diplomatic and financial measures.

(b) A sustained air offensive against German Military power, supplemented by air offensives against other regions under enemy control which contribute to that power.

(c) The early elimination of Italy as an active partner in the Axis.

(d) The employment of the air, land, and naval forces of the Associated Powers, at every opportunity, in raids and minor offensives against Axis Military strength.

(e) The support of neutrals, and of Allies of the United Kingdom, Associates of the United States, and populations in Axis-occupied territory in resistance to the Axis Powers.

(f) The building up of the necessary forces for an eventual offensive against Germany.

(g) The capture of positions from which to launch the eventual offensive.

"13. Plans for the Military operations of the Associated Powers will likewise be governed by the following:

[7] (a) Since Germany is the predominant member of the Axis Powers, the Atlantic and European area is considered to be the decisive theatre. The principal United States Military effort will be exerted in that theatre, and operations of United States forces in other theatres will be conducted in such a manner as to facilitate that effort.

(b) Owing to the threat to the sea communications of the United Kingdom, the principal task of the United States naval forces in the Atlantic will be the protection of shipping of the Associated Powers, the center of gravity of the United States effort being concentrated in the Northwestern approaches to the United Kingdom. Under this conception, the United States naval effort in the Mediterranean will initially be considered of secondary importance.

(c) It will be of great importance to maintain the present British and Allied Military position in and near the Mediterranean basins, and to prevent the spread of Axis control in North Africa.

(d) Even if Japan were not initially to enter the war on the side of the Axis Powers, it would still be necessary for the Associated Powers to deploy their forces in a manner to guard against Japanese intervention. If Japan does enter the war, the Military strategy in the Far East will be defensive. The United States does not intend to add to its present Military strength in the Far East but will employ the United States Pacific Fleet offensively in the manner best calculated to weaken Japanese economic power, and to support the defense of the Malay barrier by diverting Japanese strength away from Malaysia. The United States intends so to augment its forces in the Atlantic and Mediterranean areas that the British Commonwealth will be in a position to release the necessary forces for the Far East.

[8] (e) The details of the deployment of the forces of the Associated Powers at any one time will be decided with regard to the Military situation in all theatres.

(f) The principal defensive roles of the land forces of the Associated Powers will be to hold the British Isles against invasion; to defend the Western Hemisphere; and to protect outlying Military base areas and islands of strategic importance against land, air, or sea-borne attack.

(g) United States land forces will support United States naval and air forces maintaining the security of the Western Hemisphere or operating in the areas bordering on the Atlantic. Subject to the availability of trained and equipped organizations, United States land forces will, as a general rule, provide ground and anti-aircraft defenses of naval and air bases used primarily by United States forces.

(h) Subject to the requirements of the security of the United States, the British Isles and their sea communications, the air policy of the Associated Powers will require that associated effort in the air will be directed toward providing the necessary naval and land air components for the accomplishment of naval tasks, for the support of land operations, and for independent air operations against the sources of Axis military power.

(i) United States Army Air Forces will support the United States land and naval forces maintaining the security of the Western Hemisphere or operating in the areas bordering on the Atlantic. Subject to the availability of trained and equipped organizations, they will undertake the air defense of those general areas in which naval bases used primarily by United States forces are located, and subsequently, [9] of such other areas as may be agreed upon. United States Army air bombardment units will operate offensively in collaboration with the Royal Air Force, primarily against German Military power at its source.

(j) United States forces will, so far as practicable, draw their logistic support (supply and maintenance) from sources outside the British Isles. Subject to this principle, however, the military bases, repair facilities, and supplies of either nation will be at the disposal of the Military forces of the other as required for the successful prosecution of the war."

13. In addition, plans for the Military operations of United States forces will be governed by the following:

(a) Under this War Plan the scale of hostile attack to be expected within the Western Atlantic Area is limited to raids by air forces and naval surface and submarine forces.

(b) The building up of large land and air forces for major offensive operations against the Axis Powers will be the primary immediate effort of the United States Army. The initial tasks of United States land and air forces will be limited to such operations as will not materially delay this effort.

[10] SECTION V. TERMS OF AGREEMENT WITH THE UNITED KINGDOM
RELATING TO WAR OPERATIONS

14. Agreements have been reached between the United States and the United Kingdom relating to war operations.

In this Section certain of these agreements are set forth (See ABC-1 and ABC-22).

15. *Principles of Command of the Forces of the United States and the United Kingdom.* a. As a general rule, the forces of the United States and those of the United Kingdom should operate under their own commanders in the areas of responsibility of their own Power.

b. The assignment of an area to one Power shall not be construed as restricting the forces of the other Power from temporarily extending appropriate operations into that area, as may be required by particular circumstances.

c. The forces of either Power which are employed normally under the strategic direction of an established commander of the other, will, with due regard to their type, be employed as task (organized) forces charged with the execution of specific strategic tasks. These task (organized) forces will operate under their own commanders and will not be distributed into small bodies attached to the forces of the other Power. Only exceptional Military circumstances will justify the temporary suspension of the normal strategic tasks.

d. When units of both Powers cooperate tactically, command will be exercised by that officer of either Power who is the senior in rank, or if of equal rank, of time in grade.

e. United States naval aviation forces employed in British Areas will operate under United States naval command, and will remain an integral part of United States naval task forces. Arrangements will be made for coordination of their operations with those of the appropriate Coastal Command groups.

f. Special command relationships pertaining to particular areas are set forth in paragraph 16.

[11] 16. *Responsibility for the Strategic Direction of Military Forces.* a. *United States Areas.* Upon entering the war, the United States will assume responsibility for the strategic direction of its own and British Military forces in the following areas:

(1) The Atlantic Ocean Area, together with islands and contiguous continental land areas, north of Latitude 25° South and west of Longitude 30° West, except:

(a) The area between Latitude 20° North and Latitude 43° North which lies east of Longitude 40° West.

(b) The waters and territories in which Canada assumes responsibility for the strategic direction of Military forces, as may be defined in United States-Canada Joint Agreements.

2912 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(2) The Pacific Ocean Area, together with islands and contiguous continental land areas, as follows:

- (a) North of Latitude 30° North and west of Longitude 140° East;
- (b) North of the equator and east of Longitude 140° East;
- (c) South of the equator and east of Longitude 180° to the South American coast and Longitude 74° West; except for the waters and territories in which Canada assumes responsibility for the strategic direction of Military forces, as may be defined in United States-Canada Joint Agreements. The United States will afford support to British naval forces in the regions south of the equator, as far west as Longitude 155° East.

[12] *b. The Far East Area* Coordination in the planning and execution of operations by Military forces of the United States, British Commonwealth, and Netherlands East Indies in the Far East Area will, subject to the approval of the Dutch authorities, be effected as follows:

(1) The commanders of the Military forces of the Associated Powers will collaborate in the formulation of strategic plans for operations in that area.

(2) The defense of the territories of the Associated Powers will be the responsibility of the respective commanders of the Military forces concerned. These commanders will make such arrangements for mutual support as may be practicable and appropriate.

(3) The responsibility for the strategic direction of the naval forces of the Associated Powers, except of naval forces engaged in supporting the defense of the Philippines will be assumed by the British naval Commander-in-Chief, China. The Commander-in-Chief, United States Asiatic Fleet, will be responsible for the direction of naval forces engaged in supporting the defense of the Philippines.

(4) For the above purposes, the Far East Area is defined as the area from the coast of China in Latitude 30° North, east to Longitude 140° East, thence south to the equator, thence east to Longitude 141° East, thence south to the boundary of Dutch New Guinea on the south coast, thence westward to Latitude 11° South, Longitude 120° East, thence south to Latitude 13° South, thence west to Longitude 92° East, thence north to Latitude 20° North, thence to the boundary between India and Burma.

[13] *c. Joint Land Offensives.* Responsibility for the strategic direction of the Military forces engaged in joint offensive action on land will be in accordance with joint agreements to be entered upon at the proper time. In these circumstances unity of command in the theatre of operations should be established.

d. British Commonwealth Areas. The British Commonwealth will assume responsibility for the strategic direction of associated Military forces in all other areas not described in sub-paragraphs a, b, and c next above. These areas as initially delimited are:

(1) *The AUSTRALIA AND NEW ZEALAND AREA* comprises the Australian and New Zealand British Naval Stations west of Longitude 180° and south of the equator. The British Naval Commander-in-Chief, China, is responsible for the strategic direction of the naval forces of the Associated Powers operating in the Australian and New Zealand Area.

(2) *The UNITED KINGDOM AND BRITISH HOME WATERS AREA* comprises the waters to the eastward of Longitude 30° West and to the Northward of Latitude 43° North and the land areas bordering on, and the islands in, the above ocean area. Administrative command of all United States land and air forces stationed in the British Isles and Iceland will be exercised by the Commander, United States Army Forces in Great Britain. This officer will have authority to arrange details concerning the organization and location of task forces (organization of units in appropriate formation) and operational control with the War Office and the Air Ministry.

(3) *The NORTH ATLANTIC AREA.*

(a) Northern boundary, Latitude 43° North,

(b) Southern boundary, Latitude 20° North,

[14] (c) Western boundary, Longitude 40° West,

(d) Eastern boundary, the coasts of Spain, Portugal, and Africa, and Longitude 5° West, together with the islands and land areas contiguous thereto.

(e) Strategic direction of a United States naval force basing on Gibraltar will be exercised by the United Kingdom Chief of Naval Staff except when he specifically delegates it for a stated period as follows:

To the British Naval Commander-in-Chief, Mediterranean, for operations in the Western Mediterranean.

To the Commander-in-Chief, United States Atlantic Fleet, for operations in the Central Atlantic.

(f) The Commander of United States naval forces basing in Gibraltar will be responsible for administrative matters to the Commander-in-Chief, United States Atlantic Fleet.

(4) *The SOUTH ATLANTIC AREA* comprises:

(a) The area between Latitudes 20° North and 25° South, bounded on the west by Longitude 30° West and on the east by the African Coast.

(b) The South Atlantic Ocean, south of Latitude 25° South, between Longitudes 74° West and 33° East, together with the islands and land areas contiguous thereto.

(5) *The MEDITERRANEAN AND MIDDLE EAST AREAS* comprise the Mediterranean Sea east of Longitude 5° West, the Suez Canal, and the islands and countries adjoining them, including the present theatres of operations in North and East Africa. The Black Sea, Iraq, and Aden are also included in this area.

[15] (6) *The INDIA AND EAST INDIES AREA* comprises:

(a) India.

(b) Indian Ocean, including the Red Sea and Persian Gulf, bounded on the West by the coasts of Africa and Longitude 33° East, and on the East by the western boundaries of the Far East Area and the Australian Station.

(c) The islands in the above ocean area.

17. *Collaboration in Planning.* a. The High Commands of the United States and United Kingdom will collaborate continuously in the formulation and execution of strategical policies and plans which shall govern the conduct of the war. They and their respective commanders in the field, as may be appropriate, will similarly collaborate in the planning and execution of such operations as may be undertaken jointly by United States and British forces. This arrangement will apply also to such plans and operations as may be undertaken separately, the extent of collaboration required in each particular plan or operation being agreed mutually when the general policy has been decided.

b. To effect the collaboration outlined in the preceding sub-paragraph, and to ensure the coordination of administrative action and command between the United States and British Military Services, the United States and United Kingdom will exchange Military Missions. These Missions will comprise one senior officer of each of the Military Services, with their appropriate staffs. The functions of these Missions will be as follows:

(1) To represent jointly, as a corporate body, their own Chiefs of Staff (the Chief of Naval Operations being considered as such), vis-a-vis the group of Chiefs of Staff of the Power to which they are accredited, for the purpose of collaboration in the [16] formulation of Military policies and plans governing the conduct of the war in areas in which that Power assumes responsibility for strategic direction.

(2) In their individual capacity to represent their own individual Military Services vis-a-vis the appropriate Military Services of the Power to which they are accredited, in matters of mutual concern in the areas in which that Power assumes responsibility for strategic direction.

c. The personnel of either Mission shall not become members of any regularly constituted body of the government of the Power to which they are accredited. Their staffs will, however, work in direct cooperation with the appropriate branches and committees of the staff of the Power to which they are accredited.

d. The United States, as may be necessary, will exchange Liaison officers with Canada, Australia, and New Zealand for effectuating direct cooperation between United States and Dominion forces.

e. To promote adequate collaboration and prompt decision, a military transportation service will be established between England and the United States. Ships and airplanes will be assigned to this service by the United States and the United Kingdom as may be found necessary.

f. Existing Military intelligence organizations of the two powers will operate as independent intelligence agencies, but will maintain close liaison with each other in order to ensure the full and prompt exchange of pertinent information

2914 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

concerning war operations. Intelligence liaison will be established not only through the Military Missions but also between all echelons of command in the field with respect to matters which affect their operations.

[17]

Communications

18. The United States and the United Kingdom will establish in London the "Associated Communication Committee" which is to be constituted as follows:

a. A representative of the United States Army and a representative of the United States Navy, who are members of the staff of the United States Military Mission in London.

b. Representatives of the British Combined Signals Board in the United Kingdom.

19. The Associated Communications Committee will be the supreme controlling body with relation to intercommunications by radio (W/T), wire, visual, and sound affecting the armed services and the merchant marines of the two nations.

Control and Protection of Shipping

20. The British authorities will issue directions for the control and protection of shipping of the Associated Powers within the areas in which British authorities assume responsibility for the strategic direction of Military forces. United States authorities will issue directions for the control and protection of shipping of the Associated Powers within the areas in which the United States authorities assume responsibility for the strategic direction of Military forces.

21. United States and British shipping scheduled to pass from an area assigned to one Power into an area assigned to the other Power, will be controlled and protected by agreement between the respective naval authorities. The British Admiralty is the supreme authority in the control of shipping in the North Atlantic bound to and from the United Kingdom.

22. The British Naval Control Service Organization will continue in the exercise of its present functions and methods in all regions pending establishment of effective United States Agencies in United States areas. The Chief of Naval Operations, immediately on entry of the United States into the war, will arrange for the control and protection of shipping of United States registry or charter within United States Areas. Requests from the British Naval Control Service Organization for protection by United States forces within United States areas will be made to the Chief of Naval Operations.

23. *Special Relationship between Canada and the United States.* Joint Agreements are being drawn up by the Permanent Joint Board on Defense, United States-Canada, regarding the cooperation of the Armed forces of the United States and Canada in the areas in which the United States has strategic direction. When completed, the substance of these agreements, (Short Title ABC-22), will be incorporated in this plan.

[19]

SECTION VI. GENERAL TASKS

24. *Joint General Task.* In cooperation with the other Associated Powers, defeat the Axis Powers, and guard United States national interests, by:

a. Reducing Axis economic power to wage war, by blockade, raids, and a sustained air offensive;

b. Destroying Axis military power by raids and an eventual land, naval, and air offensive;

c. Protecting the sea communications of the Associated Powers;

d. Preventing the extension in the Western Hemisphere of European or Asiatic military power; and by

e. Protecting outlying Military base areas and islands of strategic importance against land, air, or sea-borne attack.

[20]

SECTION VII. TASKS

25. The tasks of the Army and Navy, as set forth in this section, are those listed in, or derived from, the tasks of ABC-1, Annex III.

26. These tasks as stated do not include the assistance which may be furnished by the Armed Forces of Latin-American Republics. Such assistance may reduce the total of forces required but will not change the character of the operations.

The Western Atlantic Area

27. Definition. The Atlantic Ocean Area, together with Islands and contiguous continental land areas north of latitude 25° South, and west of Longitude 30° West except the area between Latitudes 20° North and 43° North which lies east of Longitude 40° West.

28. Army Tasks. *a.* In conjunction with Naval forces, protect the territory of the Associated Powers and prevent the extension of Axis military power into the Western Hemisphere by destroying enemy expeditionary forces and by denying use to the enemy of existing or potential air, land, and Naval bases in that Hemisphere.

b. In conjunction with naval forces, support Latin American Republics against invasion or political domination by the Axis Powers by defeating or expelling enemy forces or forces supporting the enemy in the Western Hemisphere.

c. Support the naval forces in the protection of the sea communications of the Associated Powers and in the destruction of Axis sea communications by offensive action against enemy forces or commerce located within tactical operating radius of occupied air bases.

d. Relieve British forces in Curacao and Aruba.

e. Provide defensive garrisons for Newfoundland, Bermuda, Jamaica, Trinidad, St. Lucia, Antigua, and British Guiana.

[21] *f.* In cooperation with the Navy defend Coastal Frontiers, Defense Command Areas and specified localities in categories of defense prescribed in paragraph 47.

g. Build up forces in the United States for eventual offensive action against Germany.

h. Prepare to relieve Marine Forces in the Azores and Cape Verde Islands if such garrisons have been established.

29. Army Forces. *a.* 1941 Troop basis plus all augmentations, less detachments.

b. Local defense forces.

c. One reinforced Corps of three divisions, including appropriate Air forces maintained in the United States as a reserve for the support of overseas garrisons and Latin American Republics.

Note: For overseas movements see paragraph 51.

30. Navy Tasks. *a.* Protect the sea communications of the Associated Powers by escorting, covering, and patrolling, and by destroying enemy raiding forces.

b. Destroy Axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy.

c. Protect the territory of the Associated Powers and prevent the extension of enemy military power into the Western Hemisphere, by destroying hostile expeditionary forces and by supporting land and air forces in denying the enemy the use of land positions in that hemisphere.

d. In cooperation with the Army defend Coastal Frontiers and specified localities in categories of defense prescribed in paragraph 47.

[22] *e.* Protect and route shipping in the Coastal Zones.

f. Prepare to occupy the Azores and the Cape Verde Islands.

31. Navy Forces. *a.* The Atlantic Fleet, less detachments.

b. Naval Coastal Frontier Forces.

The Pacific Area.

32. Definition. The Pacific Ocean Area, together with islands and contiguous continental land areas, is as follows:

a. North of Latitude 30° North and west of Longitude 140° East.

b. North of the equator and east of Longitude 140° East.

c. South of the equator and east of Longitude 180° to South American coast and Longitude 74° West.

33. Army Tasks. *a.* In conjunction with naval forces, protect the territory of the Associated Powers and prevent the extension of Axis military power into the Western Hemisphere by destroying enemy expeditionary forces and by denying use to the enemy of existing or potential air, land, and naval bases in that Hemisphere.

b. In conjunction with naval forces, support Latin American Republics against invasion or political domination by the Axis Powers by defeating or expelling enemy forces or forces supporting the enemy in the Western Hemisphere.

2916 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[23] c. Support the naval forces in the protection of the sea communications of the Associated Powers and in the destruction of Axis sea communications by offensive action against enemy forces or commerce located within tactical operating radius of occupied air bases.

d. In cooperation with the Navy defend Coastal Frontiers, Defense Command Areas and specified localities in categories of defense prescribed in paragraph 47.

34. *Army Forces.* a. Local defense forces.

b. One reinforced Division, including appropriate air forces maintained in the United States as a reserve for the support of Latin American Republics on the West Coast of South America.

Note: For overseas movements see paragraph 51.

35. *Navy Tasks.* a. Support the forces of the Associated Powers in the Far East by diverting enemy strength away from the Malay Barrier through the denial and capture of positions in the Marshalls, and through raids on enemy sea communications and positions.

b. Destroy Axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy.

c. Protect the sea communications of the Associated Powers within the Pacific Area.

d. Support British naval forces in the area south of the equator, as far west as Longitude 155° East.

e. Protect the territory of the Associated Powers within the Pacific area, and prevent the extension of enemy military power into the Western Hemisphere, by destroying [24] hostile expeditions and by supporting land and air forces in denying the enemy the use of land positions in that Hemisphere.

f. Prepare to capture and establish control over the Caroline and Marshall Island area.

g. Defend Midway, Johnston, Palmyra, Samoa and Guam.

h. In cooperation with the Army defend Coastal Frontiers and specified localities in categories of defense prescribed in paragraph 47.

i. Route shipping in the Pacific Area.

36. *Navy Forces.* a. The Pacific Fleet, less detachments.

b. Naval Coastal Frontier Forces.

The Far East Area

37. *Army Tasks.* In cooperation with the Navy defend the Philippine Coastal Frontier—Category of Defense "E".

38. *Army Forces.* Local Defense Forces, augmented only by such personnel and facilities as are available locally.

39. *Navy Tasks.* a. Raid Japanese sea communications and destroy Axis forces.

b. Support the land and air forces in the defense of the territories of the Associated Powers. (The responsibility of the Commander-in-Chief, United States Asiatic Fleet, for supporting the defense of the Philippines remains so long as that defense continues.)

[25] c. Destroy Axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy.

d. Protect sea communications of the Associated Powers by escorting, covering, and patrolling, and by destroying enemy raiding forces.

e. In cooperation with the Army defend the Philippine Coastal Frontier—Category of Defense "E".

40. *Navy Forces.* a. The Asiatic Fleet.

United Kingdom and British Home Waters

41. *Definition.* a. Waters to the eastward of Longitude 30° West and to the Northward of Latitude 43° North.

b. Land areas bordering on, and islands in the above ocean area.

42. *Army Tasks.* a. In cooperation with the Royal Air Force conduct offensive air operations primarily against objectives in Germany, and against attempted invasion or blockade as demanded by the situation.

b. Provide for the ground defense of occupied bases and air defense of those general areas in the British Isles in which bases used primarily by United States Naval forces are located, and subsequently of such other areas as may be agreed upon.

c. Provide a token force for the defense of the British Isles.

[36] *d.* Relieve, as soon as practicable, the British garrison in Iceland and in cooperation with the Navy defend that island—Category of Defense "D".

43. *Army Forces.* Subject to the availability of trained and equipped forces:

a. British Isles.

3 Heavy Bombardment Groups

2 Medium Bombardment Groups

3 Pursuit Groups

Approximately 10 Anti-aircraft Regiments

Approximately 10 Infantry Battalions (Bases)

One reinforced Regiment (Token Force)

b. Iceland.

One reinforced Division.

Note: For overseas movements see paragraphs 51.

44. *Navy Tasks and Forces. a. Northwest Escort Force.*

Task. Escort Convoys in the Northwest Approaches, acting under the strategic direction of the British Commander-in-Chief of the Western Approaches.

b. Submarine Force Threes.

Task. Raid enemy shipping in an area to be designated later, acting under the strategic direction of the British Vice Admiral, Submarines.

North Atlantic Area

[37] 45. *Definition.* The North Atlantic Area is defined as follows:

a. Northern boundary, Latitude 43° North.

b. Southern boundary, Latitude 20° North.

c. Western boundary, Longitude 40° West.

d. Eastern boundary, the Coasts of Spain, Portugal, and Africa, and Longitude 5° West.

46. *Navy Tasks and Forces. a. Submarine Force Two.*

Task. Raid enemy shipping in the Mediterranean under the strategic direction of the Commander-in-Chief, Mediterranean, acting through the Flag Officer Commanding North Atlantic.

Note: As soon as the situation in the Pacific permits their transfer to the Atlantic, United States naval forces may be assigned the following tasks in this area, unless the strategic situation in the Atlantic at that time dictates a different decision.

b. Protect the sea communications of the Associated Powers by escorting, covering, and patrolling, and by destroying enemy raiding forces.

c. Destroy Axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy.

d. Raid Axis sea communications, territories and forces in the Western Mediterranean.

[38] 47. *Categories of Defense.* The Categories of Defense listed in this paragraph apply to all Defense Command Areas, Coastal Frontiers, Naval Coastal Frontiers and isolated positions.

Northeast Defense Command and North Atlantic Coastal Frontier, except United States Bases in Newfoundland.....	Category B
United States Bases in Newfoundland.....	Category C
Southern Defense Command and Southern Coastal Frontier.....	Category B
Caribbean Defense Command and Panama and Caribbean Coastal Frontiers.....	Category D
Western Defense Command and Pacific Coastal Frontier, except Alaska.....	Category B
Alaska.....	Category C
Alaska, Less Unalaska.....	Category D
Unalaska.....	Category D
Hawaiian Coastal Frontier.....	Category D
Philippine Coastal Frontier.....	Category E
Note: No Army reinforcements will be sent to the Philippine Coastal Frontier.	
Bermuda.....	Category C
Iceland.....	Category D
Midway, Johnston, Palmyra.....	Category D
Guam.....	Category F

2918 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

48. *Joint Plans to be prepared.* The provisions of paragraph 42 *c.* "Joint Action of the Army and the Navy" in conflict with the provisions of this paragraph will be disregarded.

a. Joint Coastal Frontier Defense Plans.

b. Joint Sector Defense Plans, except that the Sector Defense Plans for Newfoundland, Nova Scotia, and the British Columbia Sectors will be made as required by ABC-22.

c. Joint Subsector Defense Plans and Defensive Coastal Area Plans as directed by the Joint Coastal Frontier Defense Plans.

d. Joint Embarkation Plans for the embarkation of the Army units, specified in paragraph 51 *a.*, to be prepared by the Commanding Generals, Army Ports of Embarkation and the Commandants of the Naval Districts in which these ports are located.

[29]

SECTION VIII. OVERSEAS MOVEMENTS

49. *Army Tasks.* Move troops to ports of embarkation as required.

50. *Navy Tasks.* Provide sea transportation for the initial movement and the continued support of Army and Navy forces overseas. Man and operate the Army Transport Service.

51. *Overseas Movements of Army Troops.* The plan in this paragraph 51 is based on the assumption that M-day will occur prior to September 1, 1941. Movements on the dates given in certain sub-paragraphs will not be made unless M-day has occurred before such date.

a. The Navy will assemble material and make specific plans for the troop movements specified in this subparagraph *a.*

(1) *NEW YORK to ICELAND*, 26,500 troops, 73 aircraft.

First contingent—10,500 troops embark on 24-M.

Second contingent—16,000 troops embark on 57-M.

These two movements will be made by British transports if arrangements can be effected. If not, this plan contemplates use of United States transports.

(2) *NEW YORK to ENGLAND*, 7,000 troops, embark on 10-M.

(3) *NEW YORK to IRELAND*, 8,000 troops, embark on 10-M.

These two forces, sub-paragraphs (2) and (3), will move in one convoy. The Northwest Escort Force will move with this convoy.

(4) *NEW YORK to BERMUDA*, 3,700 troops, 41 aircraft, embark on 18-M. Eight aircraft will fly to destination, 33 aircraft will be transported. Part of this force may be moved before M-day.

[50] (5) *NEW YORK to ENGLAND*, 8,000 troops, 73 aircraft, embark September 1, 1941. 16 aircraft will be transported, 57 aircraft will fly to destination.

(6) *NEW YORK to IRELAND*, 7,000 troops, 105 aircraft, embark October 1, 1941. Aircraft will be transported.

(7) *NEW YORK to ENGLAND*, 6,600 troops, 60 aircraft, embark October 1, 1941. 57 aircraft will fly to destination, three aircraft will be transported.

These two forces, sub-paragraphs (6) and (7), will move in one convoy.

(8) *NEW YORK to IRELAND*, 11,600 troops, 200 aircraft embark November 1, 1941. Aircraft will be transported.

(9) *NEW YORK to ENGLAND*, 7,000 troops, 38 aircraft, embark January 1, 1942. 35 aircraft will fly to destination, 3 aircraft will be transported.

(10) *NEW YORK to ENGLAND*, 13,000 troops, 76 aircraft, embark on February 1, 1942. 70 Aircraft will fly to destination, six aircraft will be transported.

(11) *GALVESTON to CURACAO-ARUBA*, 6,000 troops, embark on 15-M.

(12) *GALVESTON to TRINIDAD*, 12,500 troops embark on 15-M.

(13) *GALVESTON to PANAMA*, 6,400 troops, of which 3,300 embark on 20-M. The remainder will be transported progressively as ships become available. Part of this force may be moved before M-day.

(14) *GALVESTON to PUERTO RICO*, 12,600 troops, of which 4,000 embark 20-M. The remainder will be transported progressively as ships become available. Part of this force may be moved before M-day.

[31] (15) *SEATTLE to ALASKA*, 23,000 troops, of which 1,100 embark on 10-M. The remainder will be transported progressively as ships become available. Part or all of these troops may be moved before M-day.

(16) *SAN FRANCISCO to HAWAII*, 23,000 troops, of which 15,000 embark on 10-M. The remainder will be transported progressively as ships become available. Part of these troops may be moved before M-day.

b. The movements of the troops in this sub-paragraph b are contingent upon unpredictable eventualities. The Navy will not prepare material nor make specific plans for these movements in advance of M-day.

(1) *GALVESTON to WEST COAST OF SOUTH AMERICA*, 24,000 troops, 80 aircraft will prepare to embark at Galveston on 45-M. If the Panama Canal is not open, these troops will embark at San Francisco.

(2) *NEW YORK and GALVESTON to EAST COAST of LATIN AMERICA*, 86,000 troops, 56 aircraft, will prepare to embark 90-M. The 56 aircraft may be flown to destination.

(3) *NEW YORK and GALVESTON to TRANSATLANTIC DESTINATIONS*, 83,000 troops will be prepared to embark 20-M; desired minimum rate of movement 60,000 troops per month.

(4) *EXPEDITIONARY FORCE*, One Army, two Corps, ten Divisions, will be prepared to embark at East Coast and Gulf ports beginning 180-M.

SECTION IX. SUPPORTING MEASURES

[32] 52. *Theaters of Operation*. The designation and delimitation of additional land and sea theaters of operations to meet the developments of the situation covered by this Plan will be announced when the Plan is put into effect.

53. *Time of Execution*. M-Day is the time origin for the execution of this Plan. M-Day may precede a declaration of war or the occurrence of hostile acts. As a precautionary measure, the War and Navy Departments may initiate or put into effect certain features of this Plan prior to M-Day.

54. *Personnel*. The Army and Navy requirements for increased personnel will be met by the operation of the Selective Training and Service Act of 1940.

55. *Ports of Embarkation*. The Army will establish, when required, additional ports of embarkation at:

New Orleans, La.
Galveston, Texas
Boston, Mass.
Charleston, S. C.

56. *Material*. The United States will continue to furnish material aid to the United Kingdom, but for the use of itself and its other associates, will retain material in such quantities as to provide for security and best to effectuate United States-British joint plans for defeating Germany and her Allies. Subject to the foregoing, the material to fill the requirements of the Army and Navy under this plan will come from existing reserves of the respective services and from production sources developed under Army and Navy Procurement Plans. In all cases where surveys indicate that reserves and existing production will not meet requirements, the War and Navy Departments will [33] each be responsible for providing the additional production necessary to meet deficiencies of their respective services, except in cases where one Department furnishes the other with the material involved.

57. *Supply Levels*. Supply levels will be maintained for forces operating in the areas or positions as indicated by the tentative figures given in this paragraph. Final figures pertaining to building up initial levels will be established after a detailed joint examination of the problems involved.

2920 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

a. Supplies other than ammunition.

- | | |
|--|---|
| (1) Iceland..... | 30 days, build up to 60 days within six months. |
| (2) British Isles..... | Except pursuit aircraft, 30 days, build up to 60 days within six months. |
| | <i>Pursuit Aircraft</i> |
| | 60 days, build up to 120 days within six months. |
| (3) Panama and Caribbean Coastal Frontiers..... | 30 days, build up to 45 days within six months. |
| (4) Newfoundland and Alaska (Less Unalaska)..... | 30 days, build up to 60 days within six months. |
| (5) Unalaska..... | 60 days, build up to 90 days within six months. |
| (6) Bermuda..... | Maintain at 30 days. |
| (7) Hawaii..... | Maintain at 70 days. |
| [34] (8) Philippines..... | As the situation may permit, the desirable standard being the maintenance of stocks at 90 days' supply. |

b. Ammunition for places listed under 57 a:

- (1) For all troops included in a project; complete the project and then maintain at that level.
- (2) For ground troops not included in a project; establish and then maintain five times the mobilization allowance.
- (3) For Air Corps troops not included in a project (less pursuit aviation in British Isles): Ammunition for 30 days' operation; build up to 60 days within six months.
- (4) Pursuit aviation in the British Isles: Ammunition for 60 days' operations; build up to 120 days within six months.

58. *Industrial Planning.* For Industrial planning purposes, and with due regard to decisions that may be made with respect to supplies to other Associated Powers, the industrial capacity of the nation will be allocated in conformity with the following general policy:

a. The Army and the Navy shall each continue to plan for maximum industrial needs.

b. When the available capacity of the nation to produce does not meet the requirements of the Army, Navy, and Associated Powers, such priorities as necessary to support the strategic situation will be established by The Joint Board and administered by the Army and Navy Munitions Board, in keeping with national policy.

[35] *c.* When plans contemplate that one Service procure for and deliver material to the other Service, the manufacturing facilities needed to produce such material shall be taken into consideration when a division of capacity is made. Under this provision, all ship-building plants will be allocated to the Navy, and the Navy will furnish the Army with such overseas transportation as the Army may require, consistent with national strategic needs as a whole.

59. *Supporting Legislative Program.* The War and Navy Departments jointly shall have prepared by appropriate agencies, such drafts of legislation, Presidential Proclamations, and Executive Orders affecting both the Army and the Navy as are deemed necessary for the execution of this Joint Plan.

60. *Exertion of Financial and Economic Pressure.* The Administrator of Export Control, jointly with the War and Navy Departments is to prepare plans and programs for the application of economic pressure such as may be obtained through control of commodities, transportation, communication, financial relationships and all related means.

61. *Cooperation with Other Departments of the Government.* The War and Navy Departments, jointly with other departments or agencies of the Government, shall have prepared plans or programs covering the following subjects:

- a.* Intelligence Service.
- b.* Censorship and Publicity.
- c.* Mobilization of Resources.

SECTION X. DIPLOMATIC MEASURES

[36] 62. With respect to Latin American Republics, confirmation should be sought that each State will make available to the armed forces of the United

States, immediately as the necessity arises in carrying out operations for Hemisphere Defense, or in behalf of any State, the use of its available sea, air, and land bases.

63. A special agreement should be sought with Brazil to the effect that the defense of the Western Hemisphere and the protection of its sea communications may require use by the United States of Brazilian sea, air and land bases and commercial port facilities for the projection of naval, land or air operations to the African continent. The most important areas in this respect are the coastal zones and territorial waters extending from Belem to Bahia and including the Island of Fernando do Noronha.

64. Diplomatic and economic pressure should be directed towards securing the acquiescence of the powers concerned for the protective occupation when necessary of Eire, the Azores, the Cape Verde Islands, and French North Africa.

65. Diplomatic and economic support should be given to Governments in exile, to China, to neutrals and to populations in occupied territory in order to encourage opposition to the Axis Powers.

66. Acquiescence of the Netherlands Government in London for protective occupation of Curacao and Aruba will be secured by the British Government.

[37]

ANNEX I. COASTAL FRONTIERS

Reference: (a) Joint Action of the Army and the Navy, 1935.

1. For purposes of this Plan, this ANNEX I to Joint Army and Navy Basic War Plan—RAINBOW No. 5 temporarily amends Section IV of reference (a), as indicated herein.

2. Change paragraph 33 of reference (a) to read:

"33. Joint organization and command.

"a. Coastal divisions with geographical coterminous boundaries within which an Army officer and a Naval officer will exercise command over the Army forces and the Navy forces, respectively, assigned for the defense of these divisions, have been established in order to provide a joint organization and to ensure the effective coordination of Army and Navy forces employed in coastal frontier defense. These coastal divisions comprise coastal frontiers, sectors, and subsectors. The system of coastal frontiers includes certain outlying land, island and sea areas, as well as the coasts of continental United States. The joint organization, together with the commanders responsible for the execution of security measures on and after M-day and the necessary peacetime planning therefor, are as stated below.

NOTE: The preceding sub-paragraph, for purposes of this plan, modifies Chapter V, paragraph 26 a, Section I, of reference (a).

"b. A Defense Command is a geographical area within which an Army officer is responsible for the coordination or preparation, and for the execution of all plans for the employment of Army forces and installations lying within the command boundaries; where pertinent, a Defense Command includes one or more coastal frontiers and may include isolated localities. (See map attached showing defense commands in continental United States.)

"c. Normally a naval coastal frontier includes the coastal zone adjacent to the coastal frontier. In certain cases, two naval coastal frontiers may be included in a coastal frontier; in other cases the naval coastal frontier includes waters which extend beyond the limits of the coastal frontier.

[38] "d. The provisions of ABC-22 may prescribe the extension of the North Atlantic coastal frontier and the Pacific coastal frontier to include part of the territory and coastal waters of Canada.

"e. Coordination between Army and Navy forces in coastal frontier operations shall be by the method of mutual cooperation, subject to the provisions of paragraph 9 b."

3. Change paragraph 34 of reference (a) to read as follows:

"34. North Atlantic coastal frontier.

"a. Boundaries.

Northern.—Northern boundary of the United States, but including United States bases in Newfoundland. This may later be modified by ABC-22.

Southern.—Diamond Shoals Lightship, Hatteras Inlet inclusive, southern and western boundary of Dare County (N. C.), Albemarle Sound, Chowan River, Virginia—North Carolina boundary to the west, all inclusive.

2922 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

"b. Commanders.

Army.—The Commanding General, Northeast Defense Command, or an officer, designated by him.

Navy.—The Commandant, Third Naval District, who is designated as the Commander North Atlantic naval coastal frontier. This officer also commands the naval coastal frontier force, composed of the naval coastal force under his immediate command, and the naval local defense forces of the First, Third, Fourth, and Fifth Naval Districts under the command of the commandants of the naval districts concerned. The officers named will arrange for the joint tactical employment in cooperation with the Army, of the naval forces assigned to their respective commands.

[39] "c. Sectors.—The North Atlantic coastal frontier is divided into the following defense sectors:

(1) Newfoundland sector.

(a) Boundaries: These may later be established by ABC-22.

The sector now consists of the United States bases in Newfoundland.

(b) Commanders.

Army.—As designated by the Commanding General, Northeast Defense Command.

Navy.—Commander, Naval Operating Base, Newfoundland.

(2) New England sector.

(a) Boundaries.

Northern.—Northern boundary of the United States.

Southern.—Nantucket Shoals Lightship, exclusive; Block Island, inclusive; Rhode Island-Connecticut boundary.

(b) Commanders.

Army.—As designated by Commanding General, Northeast Defense Command.

Navy.—The Commandant, First Naval District.

(c) This sector is subdivided into the Portland, Boston, and Newport subsectors, with boundaries as follows:

[40] 1. Between the Portland and the Boston subsectors: Northern boundary of Massachusetts.

2. Between the Boston and the Newport subsectors: Pollock Rip Slue Lightship, Monomy Light, Bishop and Clerk's Light, Cotuit Bay, Bourne, Taunton, northern boundary of Rhode Island, all to Boston subsector.

(3) New York sector.

(a) Boundaries.

Northern.—Nantucket Shoals Lightship, inclusive; Block Island, exclusive; Rhode Island-Connecticut boundary.

Southern.—Point Pleasant, Bordentown, both inclusive; Trenton, inclusive.

(b) Commanders.

Army.—As designated by the Commanding General, Northeast Defense Command.

Navy.—Commandant, Third Naval District.

(c) This sector is subdivided into the Long Island and New Jersey subsectors with boundary as follows:

Between subsectors: The Sandy Hook Peninsula and lower New York Bay to the Long Island subsector.

(4) Delaware-Chesapeake sector.

(a) Boundaries.

Northern.—Point Pleasant, Bordentown, both inclusive; Trenton exclusive.

[41] Southern.—Diamond Shoal Lightship, Hatteras Inlet, inclusive; southern and western boundary of Dare County (N. C.), Albemarle Sound, Chowan River; Virginia-North Carolina boundary to the west, all inclusive. This sector will be subdivided into the Delaware and the Chesapeake subsectors, with the boundary as Winter Quarter Shoal Lightship (to Delaware subsector), southern and western boundary of Delaware.

(b) Commanders.

Army.—As designated by the Commanding General, Northeast Defense Command.

Navy.—There is no naval commander of this sector. The Commandant, Fourth Naval District, commands the naval local defense force in the Delaware subsector, and the Commandant, Fifth Naval District, commands the naval local defense force in the Chesapeake subsector. The Commandant, Fifth Naval District, coordinates operations and war planning of the naval local defense forces of the Fourth and Fifth Naval Districts."

4. Change paragraph 35 of reference (a) to read as follows:

"35. Southern coastal frontier.

"a. Boundaries.

Northern.—Diamond Shoal Lightship, Hatteras Inlet, exclusive; southern and western boundary of Dare County (N. C.); Albemarle Sound, Chowan River; Virginia-North Carolina boundary to the west, all exclusive.

[42] Southern.—The Rio Grande. The coastal zone extends south-eastward and southward to the northwestern boundary of the Caribbean naval coastal frontier, so as to include the Gulf of Mexico and such parts of Bahaman waters and the Caribbean Sea as to lie to the northward of that boundary.

"b. Commanders.

Army.—The Commanding General, Southern Defense Command, or an officer designated by him.

Navy.—The Commandant, Sixth Naval District, who is designated as the Commander Southern naval coastal frontier. This officer exercises command over the naval coastal frontier force, composed of the naval coastal force under his immediate command, and the naval local defense forces of the Sixth, Seventh, and Eighth Naval Districts under the immediate command of the commandants of the naval districts concerned. The officers named will arrange for the joint tactical employment, in cooperation with the Army, of the naval forces assigned to their respective commands.

"c. Sectors.—This frontier will be subdivided into defense sectors of Carolina, Florida, and Gulf, corresponding territorially to the Sixth, Seventh and Eighth Naval Districts, respectively."

5. Insert in reference (a) the following new paragraphs:

"35A. Caribbean coastal frontier.

"a. Boundaries.

All United States territories and possessions, and United States military and naval reservations and activities on shore located within an area bounded as follows:

[43] Beginning at latitude 18°05' North, longitude 87°32' West thence by a line bearing 63° true to the 25th parallel of latitude, thence by the 25th parallel of latitude to the 65th meridian of longitude, thence by a line direct to latitude 2° North, longitude 49° West, thence by a line direct to the place beginning. The coastal zone includes all of the waters within these boundaries, as well as the sea lanes and focal points beyond, but near, the eastern boundary.

"b. Commanders.

Army.—The Commanding General, Caribbean Defense Command, or an officer designated by him.

Navy.—The Commandant, Tenth Naval District, who is designated as the Commander, Caribbean naval coastal frontier. This officer also commands the naval local defense force, and will arrange for its joint tactical and strategical employment in cooperation with the Army.

"c. Sectors.—The Caribbean coastal frontier is divided into the following defense sectors:

(1) Guantanamo sector.

(a) Boundaries.—The area within the Caribbean coastal frontier lying westward of a line passing through Cape Isabela and Beata Point, Hispaniola, extended to cut the northern and the southwestern coastal frontier boundaries.

2924 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(b) Commanders.

Army.—As designated by the Commanding General, Caribbean Defense Command.

[44] Navy.—Commander, Naval Operating Base, Guantanamo, Cuba.

(2) Puerto Rico sector.

(a) Boundaries.—The area within the Caribbean coastal frontier lying eastward of the eastern boundary of the Guantanamo sector, and northward of the 15th parallel of north latitude.

(b) Commanders.

Army.—As designated by the Commanding General, Caribbean Defense Command.

Navy.—The Commandant, Tenth Naval District.

(3) Trinidad sector.

(a) Boundaries.—The area within the Caribbean coastal frontier lying eastward of the eastern boundary of the Guantanamo sector, and southward of the 15th parallel of north latitude.

(b) Commanders.

Army.—As designated by the Commanding General, Caribbean Defense Command.

Navy.—The Commander, Naval Operating Base, Trinidad."

6. Insert in reference (a) the following new paragraph:

"35B. Panama coastal frontier.

[45] "a. Boundaries.

All United States territories and possessions, and United States military and naval reservations and activities on shore located within the following area: British Honduras, Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, Panama, Colombia, and Ecuador; all land areas between the southwestern boundary of the Caribbean coastal frontier and the coasts of Central and South America; and all land areas between the coasts of Central and South America and a broken line drawn from the Mexico-Guatemala border to a point in latitude 5° South, longitude 95° West, and thence to Peru-Ecuador border. The coastal zone includes all the waters within these boundaries, as well as the sea lanes beyond, but near, the western and southern boundaries.

"b. Commanders.

Army.—The Commanding General, Caribbean Defense Command, or an officer designated by him.

Navy.—The Commandant, Fifteenth Naval District, who is designated as the Commander, Panama naval coastal frontier. This officer also commands the naval local defense force, and will arrange for its joint tactical and strategical employment in cooperation with the Army.

"c. Sectors.

The Panama coastal frontier is divided into the following defense sectors:

(1) Atlantic sector.

(a) Boundaries.—The area within the Panama coastal frontier lying between the northeastern boundary and the continental divide.

(b) Commanders.

Army.—As designated by Commanding General Caribbean Defense Command.

Navy.—The Commandant, Fifteenth Naval District.

(2) Pacific sector.

(a) Boundaries.—The area within the Panama coastal frontier lying between the continental divide and the western and southern boundaries.

(b) Commanders.

Army.—As designated by the Commanding General, Caribbean Defense Command.

Navy.—The Commandant, Fifteenth Naval District."

7. Insert in reference (a) the following new paragraph:

"35C. The Caribbean defense command includes all the land and water areas lying within the boundaries of the Caribbean coastal frontier and the Panama coastal frontier."

8. Change paragraph 36 of reference (a) to read:

"36. Pacific coastal frontier.

"a. Boundaries.

Northern.—Northern boundary of Washington except that Alaska is part of the Pacific coastal frontier. This frontier may later be changed as required by ABC-22.

[47] Southern.—Southern boundary of the United States. The coastal zone extends southeastward to abreast the southern boundary of Mexico.

(1) Pacific naval coastal frontiers.—The Pacific coastal frontier is divided into two naval coastal frontiers, i. e., the Pacific Southern naval coastal frontier, and the Pacific Northern naval coastal frontier. The boundary between the two naval coastal frontiers is the northern boundary of California.

"b. Commanders.

Army.—The Commanding General, Western Defense Command, or an officer designated by him.

Navy.—

(1) The Commandant, Twelfth Naval District, who is also designated as the Commander, Pacific Southern naval coastal frontier.

(2) The Commander, Pacific Southern naval coastal frontier, also commands the Pacific Southern naval coastal frontier force, composed of the naval coastal force under his immediate command and the naval local defense forces of the Eleventh and Twelfth Naval Districts under the command of the commandants of the naval districts concerned.

(3) The Commander, Pacific Northern naval coastal frontier, is the Commandant, Thirteenth Naval District. This officer also commands the naval local defense force assigned to his district.

(4) The Commander, Pacific Southern naval coastal frontier, and the Commander, Pacific Northern naval coastal frontier, will arrange for the joint tactical employment, in cooperation with the Army, of the naval forces assigned to their respective commands.

[48] "c. Sectors.—This frontier is subdivided into the Southern California, Northern California, Northwestern, and Alaskan sectors, as follows:

(1) Boundary between the Southern California and Northern California sectors, Santa Maria River.

(2) Boundary between the Northern California and the Northwestern sector is the northern boundary of California.

(3) Northern boundary of the Northwestern sector is the northern boundary of Washington.

(4) The boundaries of Alaska define the Alaskan sector.

"d. Sectors of this frontier are further subdivided into subsectors with boundaries as follows:

(1) San Diego subsector: Mexican boundary to San Mateo Point, inclusive.

(2) San Pedro subsector: San Mateo Point, exclusive, to Santa Maria River, exclusive.

(3) Monterey subsectors: Santa Maria River, inclusive, to Pigeon Point, inclusive.

(4) San Francisco subsector: Pigeon Point, exclusive, to northern boundary of California.

(5) Columbia River subsector: Northern boundary of California to Moclips, Wash., inclusive.

(6) Seattle subsector: Moclips, Wash., exclusive, to northern boundary of Washington.

[49] (7) Sitka naval subsector: Alaska east of longitude 141° West.

(8) Kodiak naval subsector: Alaska west of longitude 141° West.

9. Insert in reference (a) the following new paragraphs:

"36A. Hawaiian coastal frontier.

"a. Boundaries.

The Hawaiian coastal frontier consists of Oahu, and all of the land and sea areas required for the defense of Oahu. The coastal zone extends to a distance of 500 miles from all the Hawaiian Islands, including Johnston and Palmyra Islands and Kingman Reef.

"b. Commanders.

Army.—The Commanding General, Hawaiian Department.

Navy.—The Commandant, Fourteenth Naval District, who is designated as the Commander, Hawaiian naval coastal frontier. This officer also commands the assigned naval local defense force, and will arrange for its joint tactical and strategical employment, in cooperation with the Army.

"36B. Philippine coastal frontier.

"a. Boundaries.

The Philippine coastal frontier consists of Luzon, and all of the land and sea areas required for the defense of Luzon. The coastal zone includes all of the sea approaches to the coastal frontier.

[50] **"b. Commanders.**

Army.—The Commanding General, Philippine Department.

Navy.—The Commandant, Sixteenth Naval District, who is designated as the Commander, Philippine naval coastal frontier. This officer also commands the assigned naval local defense force, and will arrange for its joint tactical and strategical employment in cooperation with the Army.

2928 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[1] APPENDIX II TO WPL-46, COMPOSITION OF FORCES

[2] CHAPTER I. INTRODUCTION

2-101. APPENDIX II prescribes the initial composition of the Operating Forces and of the Naval Transportation Service.

2-102. a. Naval vessels and aircraft are listed by organization unit or number.

b. Coast Guard vessels are listed by name.

c. Units not listed in the current Operating Force Plan which are to be taken over by the Navy either temporarily or permanently are, for war planning purposes, designated in this Appendix II as "X" vessels in accordance with the system defined in WPL-10 (XAR 5, XAK 17, XPYc 20, etc.).

2-103. a. When the Coast Guard becomes a part of the Navy, Coast Guard vessels will continue to be designated by their Coast Guard names.

b. When vessels listed in the tables as "X" vessels come under Navy control, the Chief of Naval Operations (Director, Ship Movements Division) will assign to them names, symbols, and numbers in accordance with standard nomenclature (AP 60, AK 90, PY 50, etc.). The names will be recommended by the Chief of the Bureau of Navigation, and the symbols and numbers by the Chief of the Bureau of Ships.

2-104. Units appearing in the current Operating Force Plan are not assigned to Mobilization Districts, as most of these vessels have already been mobilized at the time of issue of this plan.

2-105. In the Tables of Appendix II, where capital letters appear under the heading "Sub-Group", these letters indicate the categories to which vessels and aircraft belong, as follows:

A—Navy vessels and aircraft in commission on M-day;

B—Navy vessels not in commission on M-day, including those under construction;

C—Vessels and aircraft belonging to other Departments of the Government to be commissioned in the Navy;

[3] D—Merchant vessels to be commissioned in the Navy, either Navy-owned or on a bare-boat charter basis;

E—Merchant vessels to be chartered on a time charter basis;

CG—Coast Guard vessels.

[4] CHAPTER II. THE U. S. ATLANTIC FLEET

2-201. Table ATF-1 shows the initial composition of the U. S. ATLANTIC FLEET as of July 1, 1941.

2-202. a. SUBMARINE FORCE ONE will be composed of submarines, submarine tenders and submarine bases, not assigned to SUBMARINE FORCE TWO. Not less than five submarines must remain based on the SUBMARINE BASE, COCO SOLO.

b. SUBMARINE FORCE TWO will be composed of submarines destined for the NORTH ATLANTIC AREA.

2-203. When the units included in the ATLANTIC REENFORCEMENT, U. S. PACIFIC FLEET, arrive in the WESTERN ATLANTIC AREA, the Chief of Naval Operations will assign them to such existing or new task forces as may then be dictated by the existing strategic situation.

2-204. a. On M-day, or sooner if directed by the Chief of Naval Operations, the Commander in Chief, U. S. ATLANTIC FLEET, will assign for task duty, patrol planes, and patrol plane tenders required for their support, to the Task Forces indicated herein:

1. To the NORTH ATLANTIC NAVAL COASTAL FRONTIER FORCE.

18 VPB and necessary tenders;

2. To the CARIBBEAN NAVAL COASTAL FRONTIER FORCE

12 VPB and necessary tenders;

3. To the PANAMA NAVAL COASTAL FRONTIER FORCE

12 VPB and necessary tenders.

b. The aircraft units assigned as prescribed in the preceding sub-paragraph will remain under the administration of the Commander in Chief, U. S. ATLANTIC FLEET. Rotation of units may be made periodically at the discretion of the Commander in Chief.

[5] 2-205. TRANSPORT DIVISION ONE will be assigned temporarily to the Naval Transportation Service, as directed by the Chief of Naval Operations, for the transportation of Army troops.

2-206. Destroyers assigned to experimental work and sound school, and submarines assigned to submarine school and sound school will normally continue in these assignments and will be withdrawn for other duties only under exceptional circumstances.

[8]

CHAPTER VIII. NAVAL COASTAL FRONTIER FORCES

2-801. The tables in this Chapter VIII show the assignments to the NAVAL COASTAL FRONTIER FORCES.

2-802. Units that are not listed in these tables but which have otherwise been assigned by the Chief of Naval Operations to Naval Districts, outlying Naval Stations, or to activities excluded from Naval Districts, will continue in such commands. Commandants of Naval Districts and outlying Naval Stations will assign such units under their commands to Naval Local Defense Forces or to Naval District Craft (see General Order No. 143) in accordance with the following general rules:

a. TO THE NAVAL LOCAL DEFENSE FORCES

1. Units other than auxiliary type (see "Standard Nomenclature, Ships' Data, U. S. Naval Vessels").

2. Units of the Auxiliary Type required for execution of the tasks of Naval Local Defense Forces.

3. District Craft (see "Standard Nomenclature, Ships' Data, U. S. Naval Vessels"), as follows: YN, YNg, YMS, YP; those YT assigned for net and boom services; and other classes at the discretion of the Commandant.

b. TO NAVAL DISTRICT CRAFT

1. Units not assigned to the Naval Local Defense Force.

c. 1. Units of the Naval Local Defense Force and of the Naval District Craft will be placed in the status "in service not in commission", or in the status "in commission" as prescribed by article 636 (1), (2), U. S. Navy Regulations, in accordance with the current Operating Force Plan in effect, or in specific cases as directed by the Chief of Naval Operations.

2. Units taken over from private sources will be placed "in service not in commission", or "in commission", depending upon the status in which units of the same classification appearing in the current Operating Force Plan, are operating.

[9] 2-803. a. Units of the Coast Guard not otherwise assigned in succeeding paragraphs or in the tables of Appendix II, will be employed in the Naval Local Defense Forces of the Naval Districts in which they are based at the time the Coast Guard is transferred to the Navy, in the manner prescribed in the "United States Coast Guard District Manual, 1940." Commandants of Naval Districts will understand that, on assuming command of Coast Guard units, they also assume responsibility for the discharge of essential Coast Guard functions. Prior to M-day, Commandants of Naval Districts, in cooperation with local Coast Guard commanders, will plan the war operations of the Coast Guard.

b. Lighthouse tenders will normally be employed in their peace-time duties, as modified by war requirements of the Army and Navy.

2-804. a. The tables show the assignments to the Naval Coastal Frontier Forces in tabular form.

1. Unit (vessel, aircraft, or organization unit) Column (1).

2. Sub-group..... Column (2).
 3. From (indicating the fleet from which the unit is to be detached, the Naval District in which a private vessel is to be taken over, or that the assignment will be made by the Chief of Naval Operations)..... Column (3).
 4. Mobilization District (indicating the Naval District in which the vessel is to be mobilized)..... Column (4).

b. The symbol XAGs indicates a station ship.

2-805. Units to be taken over will be manned by Navy crews in the Naval Districts indicated in Column (3) of the tables, and moved under the direction of the Commandant of that Naval District to the Mobilization District indicated in Column (4), where mobilization will take place.

[10] 2-806. It is undesirable to take over for use in Naval Coastal Frontier Forces vessels that will remain idle for a long period on account of inability to convert, equip, or man them. Commandants of Naval Districts in which units are taken over (Column (3)) will, therefore, arrange to do so after consideration of the following:

- Personnel available to take over and man the unit for movement to the Mobilization;
- Conversion yards available and readiness to start conversion;
- Equipment available;
- Personnel available to man the unit upon completion of conversion;
- The desirability of placing the unit in immediate service with little or no conversion.

2-807. Commandants charged with taking over and mobilizing Naval Coastal Frontier Forces will give the same priority to units assigned to the Naval Coastal Frontier Forces of other Districts as they give to units assigned to the Naval Coastal Frontier Forces within their own Districts.

[11] CHAPTER IX. NAVAL TRANSPORTATION SERVICE

2-901. The Sections and Tables prescribing the composition of forces of the Naval Transportation Service will be issued as a change to this plan.

EXHIBIT NO. 130

Confidential

PARAPHRASE OF CODE RADIOGRAM RECEIVED AT THE WAR DEPARTMENT AT 22:55,
OCTOBER 27, 1941

MANILA, October 27, 1941.

British sources report 2 Japanese aircraft carriers, one of which is the *Kage*, operating in Mandated islands. Following planes reported there:

Wotje—8 flying boats
 Jaluit—8 flying boats, 12 fighters
 Truk—6 fighters, 6 heavy bombers
 Saipan—8 fighters, 6 heavy bombers
 Palau—8 flying boats

General southward movement of Japanese shipping in Western Pacific reported by British.

BRINK
 IB #2 10/28/41.

Distribution:

Mr. Lauchlin Currie
 Assistant Secretary of War
 Assistant Secretary of War for Air
 Chief of the Army Air Forces
 Chief of the Air Corps
 Assistant Chief of Staff, WPD
 G. H. Q.
 State Department.
 Director of Naval Intelligence
 Situation Section

SECRETARY OF STATE,
Washington.

1868, November 29, 6 p. m.

The Embassy has received Foreign Office note no. 129 American 1 dated November 27 which is translated as follows.

"EXCELLENCY: I have the honor to state that according to a report from the Japanese Naval authorities, an American airplane flew over Garanbi on the southernmost tip of Taiwan Island at 12:30 p. m. November 20, 1941 and after circling at an altitude of 2,000 meters flew away southward at 12:45 p. m. the same day.

"It is believed that the Japanese Government cannot overlook such a violation of Japanese territory by an airplane and it is therefore requested that the matter be brought to the attention of the United States authorities concerned. Also I particularly bespeak Your Excellency's solicitude particularly the recurrence of such incidents at this time when the international situation is tense and the untoward events to which they might give rise are unpredictable. I avail myself of this opportunity to renew to Your Excellency the assurance's of my highest consideration. Shigenori Togo, Minister for Foreign Affairs." Sent to the Department only.

GREW.

NAVY DEPARTMENT,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, December 2, 1941.

The following information has been received from the Commander in Chief Asiatic Fleet.

"At a bearing from Saigon of 070 and a distance of 180 miles three type 1-61 submarines were observed on December 2nd in cruising formation headed south at a speed of 15 knots. Also at Camaranah six planes patrolled overhead while 21 transports anchored.

"In Lat. 13-10N. Long 110-00 at 0230 Greenwich December 2nd a patrol plane observed 9 submarines headed south at a speed of 10 knots, [apparently headed for Camranh Bay.]"

EXHIBIT NO. 131

(This exhibit was originally designed to incorporate the prior testimony of Rear Admiral H. E. Kimmel before (1) the Roberts Commission, (2) the Navy Court of Inquiry and (3) the Army Pearl Harbor Board. Inasmuch as the entire transcript of testimony taken incident to each of these proceedings has been set forth as exhibits to the Joint Committee record, the prior testimony of Admiral Kimmel is not being printed at this point pursuant to direction of the Committee. For reference thereto, see index.)

EXHIBIT NO. 132**REPORT ON CONFERENCE BETWEEN FOREIGN AFFAIRS MINISTER TOGO AND THE
AMERICAN AMBASSADOR 7:30 A. M. DEC 8, 1941**

1. I stated, "After my conference with you last night I succeeded in obtaining an answer from the Emperor to the personal telegram from President Roosevelt to the Emperor which you presented at that conference. Thus, His Imperial Majesty orders me to convey the following message to President Roosevelt through you:

"We have heretofore commanded the Japanese Government to reply to the query of the President of the United States respecting the assembling of Japanese troops in French Indo China. Further, the withdrawal from French Indo China was one of the matters discussed in the Japanese-American negotiations and we have already had the Japanese Government state its opinions on the matter. Therefore, please consult these statements to understand our position. We believe the President must be fully aware of the fact that the object of our wishes is the establishment of peace in the Pacific and throughout the world, and that, in accordance with our desires, the Japanese Government has up to the present time striven to attain that goal."

The Ambassador listened to the Emperor's note with respectful attention and replied that he would transmit it to the President immediately. He then said that he had been instructed to request an audience of the Emperor to present

2944 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the President's telegram personally, and since the relations between our two nations were now facing a grave crisis he requested that I take special pains to arrange for an audience. I answered that if his sole object in requesting an audience was to present the President's telegram, I doubted, considering the nature of the Emperor's note, that an audience was necessary. I pointed out, however, that I had no intention of standing in his way and if he had any further statement to make, in addition to the telegram, I would of course do everything I could to arrange for one. The Ambassador seemed very pleased and expressed his gratitude. (At his request, I have submitted a provisional translation of the English text of his application [for an audience] (as Supplement A)).

2. Next I handed the Ambassador a copy of the note to the United States and said that, as he knew, the Imperial Government had done everything in its power to bring the Japanese-American negotiations to a successful conclusion and that I myself had worked earnestly to that end.

"However,"

I continued,

"we have come to the conclusion that the attitude of the American Government unfortunately precludes any prospect of reaching an agreement even though the negotiations should be further continued, and we have therefore ordered this note to be presented to the Government of the United States on the afternoon of December 7, Washington time. I am very sorry that things have worked out this way."

[2] The Ambassador said that he would return to the Embassy to read the document and would refrain from making any statement at this time, whereupon he withdrew.

3.* The conference lasted about half an hour, but at that time Ambassador Grew stated that President Roosevelt had sent a personal telegram to the Emperor and that he had been instructed to present it to the Emperor himself, and therefore he requested the Foreign Minister's help in arranging for an audience. The Foreign Minister answered that it was now late at night and steps for arranging an audience could not be taken before the next morning. He suggested that the Ambassador's chances for getting an audience would probably depend on the contents of the President's telegram. Ambassador Grew informally handed the Foreign Minister a copy of the telegram which he had with him (Supplement A), again requested that the Foreign Minister do everything possible to arrange for an audience in view of the gravity of the situation, and withdrew after arranging for another interview.

4. The Foreign Minister proceeded to the Premier's official residence with a summary translation of the President's telegram, and there, at an emergency conference with the Premier and the rest of the cabinet, determined in general the line of action to be taken on this matter. [Two lines illegible.]

5. At about 3 A. M. the Foreign Minister returned to his residence. He waited as directed, until 6 o'clock on the morning of the 8th to notify the English and American Ambassadors of the rupture of Anglo-American negotiations. At this time he handed the following statement to Ambassador Grew as the Emperor's answer to President Roosevelt's wire:

[Here follows the text of the Emperor's note as given above.]

GIST OF CONFERENCE BETWEEN FOREIGN AFFAIRS MINISTER TOGO AND THE BRITISH AMBASSADOR 8:00 A. M. DEC. 8, 1941

Following my interview with the American Ambassador, I called the British Ambassador to an interview. I told him directly as I had the American Ambassador that it had become unavoidably necessary to break off Japanese-American negotiations, and handed him a copy of the note addressed to the United States. At the same time I said "Although this is only the copy of a note to the United States, please understand that the Imperial Government, realizing Great Britain's great interest in these negotiations and that the interests of Great Britain and the United States are inseparably connected, has included in the note its opinions on all problems currently pending between Japan and Great Britain." The Ambassador thereupon remarked that he regretted the rupture of negotiations as deeply as I did. He went on to say that there were reports to the effect that Japanese vessels with a large number of troops aboard were proceeding westward

* From this point on this would seem to be a totally different document, referring to what preceded the conference of the morning of the 8th.

through the Gulf of Siam and that it would seem that possibly part of them were headed for Thailand and part for the Malay Peninsula. The invasion of these areas by the Japanese Army would produce a most serious situation. As he had stated a little while ago (here he referred to the interview with me on the 6th), Great Britain had no intention of violating Thai independence and territorial integrity provided that other nations respected them. Therefore he hoped that the Japanese Government would restrain its Military.

I answered that I was by no means certain of the situation since last evening. However, just this morning I had heard a report to the effect that the English had assembled Indian troops on the Thai border. I thought it probable that our vessels were cruising the waters adjacent to that area to be ready for anything that might come up in a situation which was plainly not normal. I had just ordered our ambassador to Thailand to report on the situation, and as soon as that report arrived, would consider this matter in a general study of the situation. Whereupon the British Ambassador advised me to be wary of reports fabricated by elements seeking to disturb the peace, and withdrew.

ON THE DECLARATION OF WAR AGAINST THE UNITED STATES AND GREAT BRITAIN
MEETING OF PRIVY COUNCIL DEC. 8, 1941

Written by Matsumoto—Head of Treaty Bureau

In the 11th item of Article 6 of the Internal Orders decided upon at the time of the Reorganization of the Privy Council in December 1938, was included a section on "The Declaration of War." It was unclear whether this gave the Privy Council the right to advise the decision to engage in war, or just the authority for advising the formal declaration of war. However, when war was declared against the United States and Great Britain, the decision to engage in war had already been made at the previous conference of Dec. 1, 1941, so the Privy Council was only to consider an address to the throne stating "We declare war against the United States and Great Britain." A draft of an Imperial Rescript declaring war was attached to the Address to the Throne for advisement. (The Address to the Throne and the draft of the Imperial Rescript were drawn up by the Cabinet.)

Meeting of Committee of Advisement

Dec. 8—7:40 A. M.

In the Imperial Palace

Tojo Room

Those Present

All members of the Advisory Council [Komonkan]

All Cabinet ministers (Minister of Foreign Affairs, Togo, was absent, because he was holding interviews with the United States and British Ambassadors).

Head of the Legal Bureau—Moriyama

Foreign Affairs Officials:

Yamamoto, Head of the American Bureau

Sakamoto, Head of the Europe-Asia Bureau

Matsumoto, Head of the Treaty Bureau

Army Officials:

Muto, Head of Military Affairs Bureau

Navy Officials:

Muto, Head of Military Affairs Bureau

First, the Navy Minister reported on the military action against American and British Troops which had been in progress since this morning in the Malayan, Hongkong, and Hawaiian areas.

1st President of the Council—I propose that a Committee of Advisement headed by the Vice-President of the Council, and constituted of all the members of the Advisory Council, meet immediately and consider this matter.

Premier Tojo—explained the reasons for declaring war.

Advisor Ishii—At what time will war be declared? It is necessary to make sure that America and Britain don't saddle us with the responsibility.

Primier—We hope for an immediate declaration.

[2] Advisor Kubota—A state of war already exists, but what is the viewpoint of the Imperial Headquarters.

Premier—At the conference of Dec. 1 they determined to commence hostilities against England, America, and the Netherlands.

Advisor Shimizu—What is the attitude of Thailand?

Premier—It is not yet clear, but negotiations are in progress for a policy of Mutual Defense.

Advisor Shimizu—Aren't we going to declare war on Holland?

Premier—We are not declaring war against Holland because of military expediency.

Advisor Minami—What is Germany's attitude?

Premier—German entrance into the war in our support is almost certain, and negotiations to that effect are now in progress.

Advisor Nara—What is the attitude of the Soviet Union?

Premier—The attitude of the Soviet Union is one of circumspection.

Advisors Sugawara and Fukai submitted questions on the expenditure of war funds, matters of material, etc., which were answered by the Minister of Finance and the Premier.

Advisor Satakami—Is it the question of whether or not we should declare war that you want us to consider? I mean, has an Imperial Rescript already been issued on the beginning of the war?

Premier—Yes.

(Foreign Minister Togo enters and takes his place.)

Advisors Futakami and (?Ikeda?) pointed out that the use of the word "America," [BEIKOKU] in the suggested draft of the Imperial Rescript which had been appended for advisement, might be misunderstood to apply to all the Americas, and recommended a revision, but the Premier and the Head of the Treaty Bureau explained that no such misunderstanding was possible.

Last of all, Foreign Affairs Minister Togo reported on the diplomatic situation which had preceded the commencement of war.

[3] The documents under discussion were approved by a unanimous vote.

Full session, 10 A. M. Dec 8, Imperial Palace, Higashidame Room

His Imperial Majesty was present.

The rest of the attendance was the same as at the meeting of the Committee of Advisement.

Committee President Suzuki presented his advisement report which was unanimously approved.

Msg. #881

Part 2^(a)—(conclusion of the message)

Said Admiral is a man who thinks that war between Japan and America would bring about no advantageous results for either country and that it is impossible to solve economic problems by means of arms. He was cordial in his attitude toward me from beginning to end. So I told him how much I regretted that, since my arrival to take up my post, I had not been able to accomplish anything at all, to which he said, "All the people who know your Excellency deeply appreciate your efforts", and pointing out the apprehensions expressed in the Business Conditions Weekly^(b) regarding Far-Eastern problems (the gist of the article is to the effect that, while a showdown^(b) between Japan and America is imminent, war between these two countries is unnecessary and that if Japan is able to change and readjust her policy, America will be mindful of her prosperity), he urged me to read the article and said that he would put forth due efforts in the matter.

I would request that the above information be conveyed to the Navy Minister. (Finis)

Msg No. Circular 2288

With regard to the present stage in the Japanese-American negotiations: (Office Chief's Code)

1. The government, since the formation of the cabinet, has held daily conferences with Imperial Headquarters and has given consideration to the fundamental aim in our national policy so as to meet the present grave crisis. We came to a decision on the matter at the conference held in the Emperor's presence on the 5th inst. together with a determination of fundamental plans relating to diplomatic adjustments between Japan and America.

2. With regard to Japanese-American negotiations we decided to continue negotiating for diplomatic adjustments and Ambassador NOMURA has already begun conversations in compliance with our new policy. However, although we on our part still have the same strong desire to come to an agreement in the negotiations, we are also determined to persist in our demands in so far as they pertain to the existence and authority of our Empire. However, in view of the way in which these negotiations have progressed in the past, there will be a great deal of divergency of opinion between us and them. On the other hand, since the situation indicates imminent tension, the outlook does not permit optimism. In case of a rupture in the negotiations, the situation throughout our Empire may be expected to undergo a sudden change.

3. At present the government will endeavor to save the situation by peaceful means. It expects to expedite the negotiations by urging the American government to reconsider its attitude. So exhausting every possible method to accomplish this, and because we think it appropriate, we have decided with this in view to despatch Ambassador KURUSU to America (he is scheduled to arrive in Washington about the 13th), so that he might himself inform Ambassador NOMURA of our decision, and aiding said ambassador in the final stages of the negotiations, bring about a new turn in the critical situation.

4. In this way our government, while persistently adhering to our position, is trying in every possible way to prevent a break in Japanese-American relations, and by devoting its utmost efforts, is endeavoring to bring about a rapid and new turn in the critical situation. The above is for your information alone.

This message is addressed to GERMANY, BRAZIL, CANADA, AUSTRALIA, ENGLAND and RUSSIA. Will you please relay it to ITALY from GERMANY, and to the ambassadors and ministers in South America and MEXICO from BRAZIL.

Circular 2313

With regard to the present stage in the Japanese-American negotiations: (Office Chief's Code. Urgent).

1. The government, since the formation of the Cabinet, has held daily conferences with Imperial Headquarters and has given consideration to the fundamental aim of our national policy so as to meet the present grave crisis. We came to a decision on this matter on the 5th inst. together with a determination of our fundamental plans relating to diplomatic adjustments between Japan and America.

2. With regard to Japanese-American negotiations we decided to continue negotiations on diplomatic adjustments on an equitable basis. And no sooner had conversations begun on the 7th than considerable divergence of opinion appeared. In view of the way in which the negotiations have moved in the past, it is doubtful whether an agreement will be reached in the negotiations, and while on our part we will try to put forth our utmost efforts to bring about an agreement, the situation is such that we shall not be able to make any further concessions, so that the outlook does not permit any optimism. In case of a rupture in the negotiations it is expected that the situation throughout our Empire will undergo a sudden change.

This message is sent to: Peking, Nanking, Manchuria, Shanghai, Hongkong, Hanoi, Batavia, Thailand, Manila and San Francisco. Will Hongkong please

2948 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

relay it to Singapore and the Dutch East Indies, and will San Francisco relay it to the various Consuls in America, to Chicago, Honolulu and Vancouver.

To: Canada and Brazil
Date: 10 November 1941
Mag No. Circular 2193
(Very Urgent. Office Chief's Code).

The reason for the resignation of the entire Cabinet, as the Information Bureau * has already announced, was that recently no unanimity of opinion within the Cabinet could be found. However, no matter what kind of a Cabinet will henceforth be formed, the intention is to give very careful thought to meeting the present crisis, and to continue the negotiations between Japan and America as well. This is for your information alone.

This wire is addressed to Canada and Central and South American countries. Will Brazil please relay it to Argentina, Chile, Mexico, Panama, Peru, and Colombia.

MINUTES OF AN INTERVIEW HELD ON 19 AUGUST 1941 BETWEEN VICE-MINISTER AMAU AND AMBASSADOR OTT

On the 19th August the German Ambassador Ott called upon the Vice-Minister and, after an exchange of courtesies and after a presentation of the war situation in Europe, advanced the idea (1) that it would be to the advantage of Japan also if at this time she attacked Russia from the east, and (2) stating that intelligence had been received to the effect that America was going to provide oil to Vladivostok by means of transport vessels, that the first of these ships had already sailed, and that after that they would sail in rapid succession, he remarked that this oil would doubtless be used for an attack upon Japan too, and this would have a very important bearing on Japan. Thus, he tried to find out what Japan's attitude was regarding these matters. (3) He also tried to sound out Japan's attitude on the problem of American vessels stopping at Japanese ports (the problem of the President Coolidge). And (4) referring to Japan's attitude toward Thailand, he asked whether Japan was planning merely for the economic development of that country or whether she was thinking of a political or military penetration. He asked various questions in order to obtain intelligence of this kind.

To this the Vice-Minister replied: "For Japan to do a thing like attacking Russia would be a very serious question and would require profound reflection. As for the problem of American oil we are giving the matter very careful attention. And while we do not consider such a matter as American vessels stopping at our ports to be of such importance as to cause the world to get excited, we have not yet had time to investigate the facts in the case. (At this point Ambassador Ott interjected the remark that at the interview with the news reporters held today at the Information Bureau there were many questions and answers relating to the matter). Then with regard to Thailand, Great Britain, in view of the fact that Thailand (? bears such a close relation?) to the defense of the British Empire, attaches very great importance to that country and Japan's attitude will therefore have to be decided by giving consideration also to the attitude of England and America."

In the course of the above interchange of questions and answers Ambassador Ott stated that the Russo-German war was at present making progress in the southern sectors, that southern Russia would soon fall into the hands of Germany, that Moscow would fall perhaps during the first part of September, but in that case whether or not the Stalin regime would fall or not could not be affirmed.

[1] GIST OF A CONSULTATION HELD BETWEEN THE GERMAN AMBASSADOR OTT AND VICE-MINISTER AMAU ON 29TH AUGUST, 1941

At 6 p. m. on 29th August Ambassador Ott called and had the following interview with Vice-Minister Amau:

The AMBASSADOR: "According to a communique issued by the Japanese government this afternoon, Ambassador Nomura handed a message from Premier

* Jōhō Kyoku.

Konoye to President Roosevelt. Is that correct? In fact, I had requested an interview with the Foreign Minister about this problem, but I have now come to you because I consider it my duty to get a detailed explanation on the question as to whether there would be any objection for us to understand that today's message does not depart from the policy which was determined at a conference held in the Imperial presence on 2nd July, at which time confidential information relating to the policy of the Japanese government in regard to the Axis was given to us, as well as on the question as to whether the present Cabinet is contemplating any change with regard to this point."

The VICE-MINISTER: "I regret that the Foreign Minister could not see you because of a previous engagement, but I will reply to your questions to the limit of my knowledge. It is true that Ambassador Nomura conveyed a message from Premier Konoye to President Roosevelt. But that does not mean that there has been a change in Japan's policy, nor that we are contemplating any change in our relations with the Axis. As you know, when Matsuoka was Foreign Minister, negotiations were carried on between Japan and America with regard to various problems, and at that time we sent confidential reports regarding the negotiations to your country. However, because of the Japanese Army's advance into French Indo-China a temporary rupture in these negotiations took place. And meanwhile in China, as well as in Japan and America, various questions arose between Japan and America, causing Japanese-American relations, contrary to our wishes, to become strained, so that in fact communications between Japan and America have at present come to a standstill, and the situation is such that even economic relations have been broken off. It is natural that no country would desire such a situation to persist for any length of time. I seems that America too desires a break in the deadlock, and the same thing is true of Japan. I understand that the reason for sending the message was to clarify the atmosphere in the Pacific."

The AMBASSADOR: "Although I am aware that negotiations had previously been carried on between Japan and America, that these negotiations had been discontinued, and that since then various incidents have come up, do the proposed negotiations between Japan and America involve only matters that have fallen into abeyance, or do they concern entirely new problems?"

[2] The VICE-MINISTER: "As I have just said, the idea back of the message which was sent from Premier Konoye to President Roosevelt was merely an attempt to start conversations between the two parties. It was not concerned with any concrete problem such as to what questions would be talked about. Furthermore we have not yet received any reply to the message from the President."

The AMBASSADOR: "How you received any notification from the American authorities that they are prepared to consent to negotiations?"

The VICE-MINISTER: "We have not received any such particular notification from the American authorities, but as I have just said, we have received the impression that the American authorities are prepared to enter into negotiations in order to break the deadlock."

The AMBASSADOR: "As usual, America will try to gain time by beginning negotiations with Japan, and meanwhile will put forth still greater efforts to carry out her objectives. Therefore, I think that precautions must be taken against America's scheme to prolong these negotiations, so that this might work to her advantage."

The VICE-MINISTER: "We have given those points full consideration. And we have also given the matter careful thought so that the carrying on of negotiations by Japan with America might not have any disadvantageous consequences upon Germany and Italy. As you are aware from the Imperial edict and other proclamations issued by government authorities at the time, the original purpose of the Tripartite Alliance was the quelling of disturbances and the restoration of peace. So even if we begin negotiations between Japan and America, the objective will always be to maintain peace, and therefore this will not conflict with the spirit of Axis diplomacy."

"Moreover, if next I may express my own personal opinions, our aim at the time when Matsuoka was Foreign Minister was to keep America from participating in the war, and for this reason we took a firm attitude toward America. In order to prevent her from joining in the war, we considered it necessary to get her to reflect upon her attitude, and, judging from the situation at the time, it was no mistake at all for us to think that it was quite proper for us to take a firm attitude toward her. Nevertheless the results proved to be just the opposite, and

we can not deny that American public opinion has grown stronger and stronger, speeding up American preparations for war. Meanwhile Germany took a very mild attitude toward America. That is, America in all kinds of ways gave aid to England, instituted a system of convoy, and invaded Iceland, on the other hand freezing German funds in America and even closing German Consulates, while Germany took a very gentle [3] attitude. Even at present Japan's policy of preventing America from participating in the war remains unchanged, and our aim is to keep her from joining in the war. Even now there is no change whatever in that objective. However it will be necessary for us to consider a policy that is adequate for the attainment of said objective, depending upon the time and occasion. In the present situation, America being a country of wide expanse and plentiful raw materials, we might possibly think it preferable, just at this time when the hostile feeling of the people toward the situation is on the point of becoming violent, to appease them and bring about a domestic disintegration, rather than to excite and unify them."

The AMBASSADOR: "Negotiations between Japan and America may prove to be quite troublesome. For instance, when we think of the China problem, since the sending of aid to Chiang Kaishek is one of the fundamental policies of America, she will not readily give this up. And I think that it may be very difficult to come to an agreement with regard to various other problems. At any rate, since the contents of this message is considered to be of tremendously great importance to Germany also, even though I have not received any instructions from my government, would it not be possible for me to receive a secret report of its contents since I will have to send a report about it to the government?"

The VICE-MINISTER: "As I have just said, the message conveys a statement from Premier Konoye to the American President, and we have not received a reply from the President as yet, but I will convey the substance of your desire to the Foreign Minister."

The AMBASSADOR: "If that is the case, then will it be all right for the present for me to send a report to my government to the effect that the content of the message signifies that for the maintenance of peace in the Pacific, negotiations are to be carried on between Japan and America on the basis of the Tripartite Alliance?"

The VICE-MINISTER: "As I have just said, the object of beginning parleys between Japan and America is to clarify the atmosphere in the Pacific. And while there is no objection to the use of the words 'for the maintenance of peace', we think that it would be permissible to suppose that nothing like a concrete problem, such as, for instance, the concluding of a non-aggression pact, is mentioned in the message."

The AMBASSADOR: "If so, do you have any idea of sending a special mission to America to carry on these negotiations?"

[4] The VICE-MINISTER: "As I have just said, it has not yet been settled as to whether or not negotiations will be begun, and preliminary arrangements regarding concrete problems have not yet been completed. So I understand that no decision has yet been reached as to such a problem as sending a mission."

The AMBASSADOR: "Is this problem to be worked out through Ambassador Grew?"

The VICE-MINISTER: (Hesitated to say anything for a moment).

The AMBASSADOR: "Is Ambassador Nomura to do it?"

The VICE-MINISTER: (Nodded assent).

The AMBASSADOR: "Again may I ask you to tell the Foreign Minister that I would like to have a confidential report of the contents of the message. In fact, it has also some bearing upon instructions which I recently received from my home government regarding the Russo-German war. Will you please make arrangements so that I might by all means have an interview with the Foreign Minister tomorrow."

The VICE-MINISTER: "I will tell the Minister."

THE GIST OF AN INTERVIEW HELD BETWEEN FOREIGN MINISTER TOYODA AND AMBASSADOR OTT ON 30TH AUGUST 1941, AT 3:00 P. M. IN THE OFFICIAL RESIDENCE (ADMINISTRATIVE OFFICIAL YOSHIUCHI ACTING AS INTERPRETER)

After Ambassador Ott made a statement relating to the situation in the Russo-German War, the conversation proceeded as follows: (Ambassador Ott is to be designated by "O" and the Minister by "Toyo" in the following account).

"O": "In the notice sent to the German government on the 2nd July, the statement is made that Japan is making preparations for every possible eventuality in her relations with Russia and America, but are the intentions of the Japanese government still the same today? Is there any possibility that Japan may participate in the Russo-German war?"

"Toro": "Japan's preparations are now making headway, and it will take more time for their completion."

"O": "Are the intentions of Japan as given in the notice of 2nd July still the same?"

"Toro": "There is no change in our intentions, which are, to make preparations in order to avail ourselves of any new development that may take place in the situation henceforth."

"O": "I learned of the message which Premier Konoye sent to President Roosevelt for the first time through the newspapers, and later according to Döml (in response to a question from the Minister Ott replied that this Döml dispatch was one that was "carried" by DNB on the evening of the 29th as Döml report). I learned that this message mentions the disposal of the China problem and the establishment of a Greater East Asia Prosperity Sphere as the ultimate aims of Japan's national policy, and refers to the fact that as a result of the Russo-German War Japanese-American relations have become delicate. So far as the problems referred to in the message are concerned, from the viewpoint of the Tripartite Pact Germany has very grave apprehensions, and since a detailed report will have to be sent to my government, in disregard of propriety I must once more make inquiry about this matter. Yesterday Vice-Minister Amau gave me an explanation as to the contents of this message, but if you have anything beyond that to add, will you please state it."

[2] "Toro": "The situation being what it is, all kinds of reports are bound to arise, but what I would like to tell you explicitly is that the report about problems concerning which I have just now heard for the first time, is absolutely false. Vice-Minister Amau gave you the right explanation of the message."

"O": "If so, then the message does not concern any concrete matters?"

"Toro": "It is just as Vice-Minister Amau explained."

"O": "I would like to inquire what your impression is as to how the message was received by them [the Americans]. Even if it does not deal with any concrete matters, I would like to ask whether it was received in a friendly spirit, or whether their attitude was one of disapproval."

"Toro": "I can't tell you, because I have as yet received no report whatsoever about the matter."

"O": "In Foreign Minister Matsuoka's time the Japanese government authorities thought that what America was planning to do was to get Japan to take an attitude in conflict with the Tripartite Pact, that is, to give up taking any positive action in the Pacific area no matter what occasion might arise, and Germany is very grateful that at the time the Japanese government resolutely resisted these American designs, and we hope that it will continue to take that 'line'. I would like to ask what Your Excellency's views are concerning this point."

"Toro": "In a word I may say that the purpose of the Tripartite Pact is to prevent American participation in the war, and that this view is the same as in the past; nor will it change in the future."

BASIC CONDITIONS FOR A PEACE SETTLEMENT BETWEEN JAPAN AND CHINA

(Agenda for a conference with the Army and Navy Military Affairs Bureau Chiefs held at the Foreign Minister's Official Residence at 2:00 p. m. on the 6th September, 1941).

The Chungking regime accepts the basic treaty concluded between Japan and the Nanking government together with the agreements attached thereto, as well as the fact that the joint declaration issued by Japan, Manchoukuo, and China is based upon the following principles, and will join up with the Nanking government.

1. The merging of the Chungking and Nanking regimes.
2. Neighborly friendliness.
3. Respect for sovereignty and territory.
4. Joint defense (the maintenance of public order, the protection of rights and interests, and cooperation in defence of things jeopardizing the same). The

2952 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

stationing of Japanese army units particularly in prescribed areas in Meng-chiang and North China as well as in Amoy and Hainan Island for this purpose.

5. Withdrawal of troops. The Japanese army units which have been sent to China because of the incident are to be withdrawn attendant upon the settlement of the incident in accordance with a Sino-Japanese agreement.

6. Economic coalition. Not: economic activities of third powers in China are not to be restricted so long as they are conducted on an equitable basis.

7. Non-annexation.*

8. No indemnities.

9. Recognition of Manchoukuo.

BASIC CONDITIONS FOR A SINO-JAPANESE PEACE

Decisions reached at a liaison conference held on the 13th September, 1941.

1. Neighborly friendliness.

2. Respect for sovereignty and territory.

3. Sino-Japanese joint defense.

Sino-Japanese cooperation to preserve public order and to check communistic and other movements of a subversive nature which threaten the security of Japan and China.

The stationing of Japanese army units for a necessary period in prescribed areas in Inner Mongolia and North China for the above purpose, as well as the placing of Japanese warships and units for a necessary period in Hainan Island, Amoy, and other localities on the basis of previous agreements and practices.

4. Withdrawal of troops. The Army units which have been sent to China for the prosecution of the China Incident shall, with the exception of those mentioned in the preceding item, be withdrawn attendant upon the settlement of the incident.

5. Economic Coalition.

(a) A Sino-Japanese economic coalition shall be put in operation, the main object of which shall be the development and use of important raw materials for national defense in China.

(b) The economic activities of third powers in China shall not be restricted if conducted on an equitable basis.

6. The merging of the Chiang Kai-shek regime and the Wang government.

7. Non-annexation.

8. No indemnities.

9. Recognition of Manchoukuo.

26 NOVEMBER, 1941.

The last time I gave you the details up to the 18th November, but I will now inform you of developments since then.

Ambassadors Nomura and Kurusu called upon Secretary Hull on the 20th and presented our new proposal, stating that they were making this proposal with a view to bringing about a speedy settlement. But Secretary Hull without saying anything in particular about it, manifested great disapproval of that clause in the proposal which states that "America shall cease any activities that might interfere with the peace efforts between Japan and China", and replied that, unless Japan clarifies the meaning of the Tripartite Pact and positively asserts that she will pursue a peaceful policy, it will be difficult to cut off aid to Chiang Kaishek, and that the statement too to the effect that the President was to act as intermediary in a Sino-Japanese peace would necessarily be conditioned by Japan's adoption of a peaceful policy. But he did promise that after a study of the new proposal, he would have further consultations.

On the next day, the 21st, when Ambassador Kurusu had a private interview with Secretary Hull, the latter stated that he had no objection to Japan and America holding leading positions through peaceful measures in East Asia and in the Western Hemisphere respectively, and that he hoped that both countries could conclude a Pacific agreement in a friendly spirit, the Japanese authorities to

* Doubtless refers to non-annexation of China by Japan.

see to it that the Tripartite Pact did not interfere with the execution of such a treaty.

On the 22nd Secretary Hull, before he had an interview with Ambassadors Nomura and Kurusu, held a conference with the Ambassadors and Ministers of England, Holland and Australia with regard to those parts of the proposal for a Japanese-American understanding which deal with matters in which these countries are concerned, and these Ambassadors and Ministers said that they would send in a request to their home governments and would be able to reply to the American government by Monday (the 24th).

On the same day at the interview held between Ambassadors Nomura and Kurusu and Secretary Hull, the former asked for America's own reply to our proposal, but the Secretary avoided a definite reply to this. However, he said that what England, Holland and Australia desired was that the serious situation in the South Pacific areas might be alleviated at once, that the movement of the Japanese army units stationed in southern French Indo-China to the northern part of the country was not deemed sufficient, and further, that, while gradual progress in the restoration of trade conditions was desirable, when Japan once made clear her peaceful intentions, we could look for a sudden change within a few days. He also made the remark with regard to the cutting off of aid to Chiang Kai-shek by America, that he would like to have us acknowledge the fact that in such a matter America could not be an impartial intermediary.

[2] With regard to the cutting off of American aid to Chiang Kai-shek, we issued orders to Ambassador Nomura on the 22nd to the effect that, since our Empire simultaneously with the conclusion of a treaty, in accord with our new proposal, would like through the good offices of America to get China to express her friendship toward Japan in line with a suggestion made by America on the 12th inst., and to begin direct peace negotiations between Japan and China, he should make a representation to the American authorities to the effect that it would be natural to expect the American authorities to stop any activities that might obstruct these negotiations.

Furthermore, in Tokyo I, the Foreign Minister*, asked the American Ambassador in Tokyo to call on the 23rd, and I made it clear to him that, while it seems that England, Holland and Australia as well as America are not satisfied with merely the movement of the Japanese forces stationed in Southern French Indo-China to the northern part of that country, neither do we consider it sufficient merely to restore conditions as they were previous to the putting into effect of the freezing order, a thing which we with reluctance dared to propose and which we anticipate, and that it will be impossible to reach a settlement so long as no understanding with America is reached also with regard to the cessation of aid to Chiang Kai-shek and with regard to the securing of raw materials from the Dutch East Indies.

* The word here used is Hondaijin, indicating that this message is a report sent out by Tokyo and made up in the main of information received from Washington.

[1] STATEMENT BY MAJOR GENERAL WALTER C. SHORT OF
EVENTS AND CONDITIONS LEADING UP TO THE JAPANESE
ATTACK, DECEMBER 7, 1941

The following radiogram from the Chief of Staff was received October 16, 1941—
Exhibit "A":

Note for commanding general Hawaiian department:

The following is a paraphrase of a dispatch from the Chief of Naval
Operations which I have been directed to pass to you quote:

Japanese cabinet resignation creates a grave situation x if a new
cabinet is formed it probably will be anti-American and strongly na-
tionalistic x if the Konoye cabinet remains it will operate under a new
mandate which will not include rapprochement with the United States
x either way hostilities between Japan and Russia are strongly possible
x since Britain and the US are held responsible by Japan for her present
situation there is also a possibility that Japan may attack these two
powers x view of these possibilities *you will take due precautions including
such preparatory deployments as will not disclose strategic intention nor
constitute provocative actions against Japan x.*

The following radiogram from the Chief of Staff was received 2:22 P. M.,
November 27th—Exhibit "B":

"Hawn Dept, Ft. Shafter, TH:

472 27th negotiations with Japan appear to be terminated to all practical
purposes with only the barest possibilities that the Japanese Government
might come back and offer to continue stop Japanese future action un-
predictable but hostile action possible at any moment stop If hostilities
cannot comma repeat cannot comma be avoided the United States
desires that Japan commit the first overt act stop This policy should not
comma repeat not comma be construed as restricting you to a course
of action that might jeopardize your defense stop Prior to hostile Japanese
action you are directed to undertake such reconnaissance and other measures
as you deem necessary but these measures should be carried out so as not
comma repeat not comma to alarm civil population or disclose intent
stop Report measures taken stop Should hostilities occur you will carry
out the tasks assigned the Rainbow Five so far as they pertain to Japan
Stop Limit dissemination of this highly secret information to minimum
essential officers.

MARSHALL,
116P/27.

[2] Upon receipt of the above radiogram, I gave consideration to the type
of an alert which I should order, and, after talking the matter over with the
Chief of Staff, Alert #1 was ordered by telephone and put into effect at once.

Standing Operation Procedure, Headquarters Hawaiian Department, 5 Novem-
ber 1941.—Exhibit "C":

"SECTION II—ALERTS

13. All defense measures are classified under one of the three (3) Alerts as
indicated below. Operations under any Alert will be initiated by a Department
order, except in case of a surprise hostile attack. See paragraph f (8) below.

14. ALERT NO. 1. a. This alert is a defense against acts of sabotage and up-
risings within the islands, with no threat from without.

b. At DEPARTMENT HEADQUARTERS, all General and Special Staff
Sections will continue with their usual duties at their present stations, pending
further orders.

c. DEPARTMENT TROOPS will carry on their normal training, pending
instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain one (1) infantry battalion with motor transportation sufficient
to transport it, prepared to move on one (1) hour's notice.

2956 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(3) Protect the SCHOFIELD BARRACKS reservation and all vital installations (except those on garrisoned Army and Navy Reservations), in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 14 h (2) below.

Command and Fire Control Cable System.

Railway and Highway Bridges.

Water supply for SCHOFIELD BARRACKS.

Radio Station at PUU MANAWAHUA.

WAIAU Generating Plant.

Telephone Exchanges at WAIPAHU, WAHIAWA, WAIALUA (in HALE-IWA), LAIE and KANEOHE.

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU KAILUA, WAIPIO AND EWA, and electric power lines from WAIPIO, WAHIAWA, SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station BELLOWS FIELD.

[3] Cold Storage Plant in WAHIAWA.

Pumping Stations at MOANALUA and KAPAHULU.

(4) the 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

e. The HAWAIIAN COAST ARTILLERY COMMAND will:

(1) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(2) Protect all vital installations on posts and reservations of the command.

(3) Protect the Radio Beacon on Sand Island.

(4) Provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

f. The HAWAIIAN AIR FORCE will:

(1) Protect all vital installations on posts of OAHU garrisoned by air forces.

(2) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders.

g. The DISTRICT COMMANDERS, assisted by the Air Corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, in addition to his normal duties, assisted by the Division Provost Marshals, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

(3) Establish liaison with the local police force.

i. The STATION COMPLEMENTS OF HICKAM, WHEELER and BELLOWS FIELDS, under command of the Hawaiian Air Force, will assist in the protection of all vital installations on their respective posts.

j. TERRITORIAL HOME GUARD. Upon the formation of the Territorial Home Guard, recently authorized by the TERRITORIAL Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations.

[4] 15. ALERT NO. 2. a. This alert is applicable to a more serious condition than Alert No. 1. Security against attacks from hostile sub-surface, surface, and aircraft, in addition to defense against acts of sabotage and uprisings, is provided.

b. At DEPARTMENT HEADQUARTERS, only the G-2 and G-3 Sections will be required to operate on a 24-hour basis. All other sections of the General and Special Staffs will continue with their normal schedule.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain available all units at fifty percent (50%) of their present strength, except those required under (3), (4) and (5) below.

(3) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(4) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1.

Command and Fire Control Cable System.

Railway and Highway Bridges.

Water supply for SCHOFIELD BARRACKS.

Radio Station at PUU MANAWAHUA.

WAIAU Generating Plant.

Telephone exchanges at WAIPAHU, WAHIAWA, WAIALUA (in HALE-IWA), LAIE and KANEOHE.

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO, WAHIAWA, SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station BELLOW'S FIELD.

Cold Storage Plant in WAHIAWA.

Pumping Stations at MOANALUA and KAPAHULU.

(5) The 25th Infantry Division will assist the Navy in guarding the Pumping Stations at AIEA and HALAWA.

[5] (6) Place 240 mm howitzers in position, establish the necessary guards and, when directed, place ammunition at positions.

(7) Release Field Artillery units manning seacoast armament (155 mm guns) to Hawaiian Coast Artillery Command.

(8) See Territorial Home Guard, paragraph 15 l below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Field Artillery, will:

(1) Occupy initial seacoast and antiaircraft defense positions, except that railway batteries will remain at FORT KAMEHAMEHA or where emplaced.

(2) Release the 53d AA Brigade to the Interceptor Command for operational control.

(3) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(4) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 15 k (1) below.

(5) Support Naval forces within range of seacoast armament.

(6) Prevent approach of and landing from hostile vessels.

(7) Coordinate all seacoast intelligence agencies.

(8) Coordinate seacoast defense with the Inshore Patrol.

(9) Protect the Radio Beacon on Sand Island.

(10) Provide Army personnel required to operate the Harbor Control Post.

f. The Hawaiian Air Force will:

(1) Maintain aircraft and crews in condition of readiness as directed by this headquarters.

(2) Release without delay all pursuit aircraft to the Interceptor Command.

(3) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(4) Disperse bombers with crews.

(5) Disperse pursuit planes with crews to bunkers.

(6) Protect all vital installations on posts on OAHU garrisoned by air forces.

(7) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 15 g below.

(8) In case of surprise hostile attack:

[6] (a) Release to Navy for operational control all bombers in condition of readiness "A". The bomber commander will report to the Commander of Patrol Wing X TWO.

(b) Receive all available shore based Naval and Marine Corps fighter planes in appropriate condition of readiness and release them to the Interceptor Command for operational control.

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, hostile attacks, and maintain order in the civil community.

2958 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

h. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

- (1) Regulate traffic on OAHU.
- (2) Assist the 25th Infantry Division in posting guards on vital installations.
- (3) Establish liaison with the local police force.
- (4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.
- (5) Be prepared to establish facilities for gathering and caring for refugees.
- (6) Protect FORT SHAFTER. See paragraph 15 *k* (1).

i. The DEPARTMENT SIGNAL OFFICER will:

- (1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.
- (2) Insure that joint Army-Navy communications are in readiness for immediate employment.

j. The INTERCEPTOR COMMAND will:

Coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the Aircraft Warning Service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control, to include:

- (1) Arrival and departure of *all* friendly aircraft.
- (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.
- (3) Transmission of appropriate warnings to all interested agencies.

k. STATION COMPLEMENTS:

(1) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(2) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

l. TERRITORIAL HOME GUARD. Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 15 *d* (4) and *g* above.

16. ALERT NO. 3. *a.* This alert requires the occupation of all field positions by all units, prepared for maximum defense of OAHU and the Army installations on outlying islands.

b. At DEPARTMENT HEADQUARTERS:

(1) All sections of the forward echelon will occupy their stations at forward command post, prepared to operate on a 24-hour basis.

(2) All sections of the rear echelon will continue their usual duties at their present stations. Blackout instructions will be complied with.

c. DEPARTMENT TROOPS will remain in condition of mobile readiness at their permanent stations, pending instructions from this headquarters.

d. Each INFANTRY DIVISION will:

- (1) Defend its assigned sector on OAHU.
- (2) Protect all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard.
- (3) Release all available Bands to the Commanding Officer, SCHOFIELD BARRACKS.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) Place 240 mm howitzers in position.

(6) Release Field Artillery units manning seacoast armament (155 mm guns) to Hawaiian Coast Artillery Command. See paragraph 16 *e* below.

(7) See Territorial Home Guard, paragraph 16 *m* below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Detachment Field [8] Artillery, will:

- (1) Occupy initial seacoast and antiaircraft positions.
- (2) Support Naval forces within range of seacoast armament.
- (3) Prevent approach of and landing from hostile vessels.
- (4) Support the Infantry Divisions.
- (5) Coordinate all seacoast intelligence agencies.
- (6) Coordinate seacoast defense with the Inshore Patrol.

(7) Provide the Army personnel required to operate the Harbor Control Post.
(8) Release the 53d AA Brigade to the Interceptor Command for operational control.

(9) Protect all vital installations on post and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 16 l (2) below.

(10) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

f. The HAWAIIAN AIR FORCE will:

(1) Destroy enemy aircraft.

(2) Carry out bombing missions as directed.

(3) Cooperate with Naval air forces.

(4) On OAHU, defend all posts garrisoned by air forces against sabotage, air and ground attacks.

(5) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 16 h below.

(6) Arm all planes, except that normally bombs will not be loaded on ships dispatched to outlying islands.

(7) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(8) Disperse bombers with crews.

(9) Disperse pursuit planes with crews to bunkers.

(10) Perform observation, command and photographic missions.

(11) Release without delay all pursuit aircraft to the Interceptor Command.

g. G-5 will be prepared to establish the following:

(1) Food administration.

(2) A Labor Procurement Service.

h. The DISTRICT COMMANDERS OF HAWAII, MAUI (includes MOLOKAI) and KAUAI Districts, assisted by the air corps detachments present within the districts, will:

Defend the air fields against acts of sabotage, hostile attacks, and maintain order in the civil community.

i. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

(3) Establish liaison with the local police force.

(4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.

(5) Be prepared to establish facilities for gathering and caring for refugees.

(6) Protect FORT SHAFTER. See paragraph 16 l (2) below.

j. The INTERCEPTOR COMMAND will coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the aircraft warning service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control to include:

(1) Arrival and departure of all friendly aircraft.

(2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.

(3) Transmission of appropriate warnings to all interested agencies.

k. The DEPARTMENT SIGNAL OFFICER will:

(1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.

(2) Insure the joint Army-Navy communications are in readiness for immediate employment.

(3) Be prepared to assume control over essential civilian communications.

l. STATION COMPLEMENTS:

(1) The SCHOFIELD BARRACKS Complement will protect all vital installations on the SCHOFIELD Reservation.

(2) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and [10] Tripler General Hospital.

(3) The HICKAM, WHEELER and BELLOWS FIELD Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

m. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 16 *d* (2) and *h* above."

Alert #1 is a defense against acts of sabotage and uprising within the islands with no threat from without. In addition to the duties prescribed in Alert #1, the Aircraft Warning Service was directed to operate all mobile aircraft warning stations from two hours before dawn to one hour after dawn.

My reasons for ordering Alert #1 rather than Alert #2, which is applicable to a condition more serious than Alert #1, security against attacks from hostile sub-surface, surface and aircraft, in addition to defense against acts of sabotage and uprising, were as follows:

1. There was a strong probability of sabotage by the Japanese population in Hawaii.

2. I had no information to indicate the probability of an attack.

3. Alert #2 or Alert #3, which provides for the maximum defense of OAHU and of army installations on outlying islands, interfere very seriously with training.

These three reasons will be discussed in detail:

1. Defense against sabotage can be carried out better where there is not too much dispersion of the command. Where the defense is against sabotage only the planes are grouped on the landing mats and the apron, while in a defense against air attack the pursuit planes would be dispersed in their bunkers and the bombardment planes would be sent to landing fields on outlying islands or placed in the air if time were available. If time were not available, they would remain in their bunkers. From this can be seen that the action for the two different types of defense is quite different. Since sabotage was considered far more probable [11] than air attack, the planes were dispersed to all of the landing fields on the island of OAHU, but were not placed in bunkers. This was especially desirable as man-proof fencing and flood-lights had not as yet been provided for the fields. \$240,000.00 for this purpose was requested on May 15, 1941, and the authorization of \$102,000.00 was made on July 11th and \$91,975.00 on August 12, 1941. Orders for the material had to be placed in the mainland as it was not available in the Hawaiian Islands. Owing to the difficulties of obtaining priorities, both for material and for shipping, the District Engineer has not yet received the material. The Constructing Quartermaster was allotted funds for fencing of other than air fields, and a small amount of the material had been received and installed prior to December 7th.

2. The Hawaiian Department is provided with no means of collecting information as to the location of Japanese or other ships throughout the world and is not responsible for distant reconnaissance. The "Joint Coastal Frontier Defense Plan, Hawaiian Coastal Frontier, Hawaiian Department and Fourteenth Naval District"—Section I, par. 3, 18 and 21, definitely place the responsibility for such reconnaissance upon the Commandant of the Fourteenth Naval District. The following quotation makes this evident:

EXTRACT from "Joint Coastal Frontier Defense Plan"—Exhibit "D":

"3. **METHOD OF COORDINATION.** The Commanding General of the Hawaiian Department and the Commandant of the Fourteenth Naval District have determined that in this joint plan the method of coordination will be by mutual cooperation and that this method will apply to all activities wherein the Army and the Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Action of the Army and Navy, 1935, Chapter 2, paragraph 9 *b*.

* * * * *

18. **NAVY.** The Commandant, FOURTEENTH NAVAL DISTRICT, shall provide for:

* * * * *

i. Distant reconnaissance.

* * * * *

21. This agreement to take effect at once and to remain effective until notice in writing by either party of its renouncement, in part or in whole, or until disapproved in part or in whole by either the War or the Navy Department. This HCF-41 (JCD-42) supercedes HCF-39 (JCD-13) except that the annexes, Nos.

1 to VII of latter remain effective and constitute annexes 1 to VII inclusive, of this plan."

[12] Annex #7 to the "Joint Coastal Frontier Defense Plan" provides as follows—Exhibit "E":

"When the Commanding General of the Hawaiian Department and the Naval Base Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action, each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans:

1. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

2. Defensive Air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation, it is withdrawn by the Naval Base Defense Officer and reverts to Navy control.

3. When Naval forces are insufficient for long distance patrol and search operations, and army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

4. In the special instance in which army pursuit protection is requested for the protection of friendly surface ships, the force assigned for this situation will pass to the tactical control of the Navy until completion of the mission".

These documents make it clearly evident that the Hawaiian Department had no responsibility for distant reconnaissance, and that when army bombardment planes are actually placed under the command of the Navy whenever they operate upon distant reconnaissance missions, they receive their mission and all instructions from the [13] Naval Commander, and report to him upon the completion of their mission. This method of procedure has been followed strictly since March 21, 1941, including the period since December 7th.

3. If upon consideration of the available facts the calling of Alert No. 1 would be sufficient to handle the situation Alert No. 2 or No. 3 should not be called because to do so would seriously interfere with the training of the command. When the troops are in battle positions it is practically impossible to carry on any orderly training. With the number of new men in the command it is highly important to conduct their training regularly. This was particularly true of the Hawaiian Air Force on November 27th due to the fact that they had been given the mission of training combat crews and ferrying B-17 planes from the mainland to the Philippine Islands. September 8th the Hawaiian Air Force sent nine (9) trained combat teams to the Philippine Islands. Previous to November 27th eighteen (18) trained combat teams had been sent to the mainland, and seventeen (17) more combat teams were ready to go to the mainland for ferrying purposes. In addition, twelve (12) combat crews had to be trained for planes that were expected at an early date in this Department. With only six (6) B-17 planes available for training combat teams, it was imperative that the Commanding General of the Hawaiian Air Force make the maximum use of these planes for training, and any order that would take them out of training for any considerable period would prevent him from carrying out the ferrying mission that had been assigned to him.

2962 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

I replied as follows to the radiogram from the Chief of Staff of November 27th—Exhibit "F":

"CHIEF OF STAFF,
War Department,
Washington, D. C.:

Reurad four seven two twenty seventh report department alerted to prevent sabotage period liaison with navy

SHORT".

Upon receipt of my radiogram of November 28th, I received the following reply from The Adjutant General—Exhibit "G":

"Haw Dept., Ft. Shafter, TH:

482 28th critical situation demands that all precautions be taken immediately against subversive activities within field of investigative responsibility of [14] War Department Paren See paragraph three MID SC thirty dash forty five End paren Stop Also desired that you initiate forthwith all additional measures necessary to provide for protection of your establishments comma property comma and equipment against sabotage comma protection of your personnel against subversive propaganda and protection of all activities against espionage Stop This does not repeat not mean that any illegal measures are authorized Stop Protective measures should be confined to those essential to security comma avoiding unnecessary publicity and alarm Stop To insure speed of transmission identical telegrams are being sent to all air stations but this does not repeat not affect your responsibility under existing instructions.

ADAMS".

This par. of MID SC 30-45 referred to in the above mentioned radiogram is attached as Exhibit "H", and this paragraph refers wholly to subversive activities.

Careful consideration of the radiograms of October 16th, November 27th and November 28th discloses that the War Department emphasizes that action taken would not alarm the civil population, would not disclose strategic intention, constitute provocative actions against Japan, and would avoid unnecessary publicity. Alert #2 or #3 would have disclosed tactical positions and given more publicity to preparations and might have alarmed the civil population.

If the War Department at that time had considered it necessary to alert the Hawaiian Department against air and ground attack, it undoubtedly would have so directed instead of sending a long radiogram outlining the various steps that should be taken in connection with sabotage and subversive activities.

In my radiogram of November 29th I replied to the radiogram of the War Department of November 28th, and explained in detail the steps I was taking to prevent sabotage and subversive activities, and of the authority that I had obtained from the Governor of Hawaii and of the Mayor of the City and County of Honolulu to legalize all the steps which I had taken—Exhibit "I":

"The ADJUTANT GENERAL,
War Department,
Washington, D. C.:

Re your secret radio four eight two twenty eighth Comma Full precautions are being taken against subversive activities within the field of investigative responsibility of War Department Paren Paragraph three MID SC thirty dash forty five End paren And military establishments including personnel and equipment Stop As regards protection [15] of vital installations outside of military reservations such as power plants Comma Telephone exchanges and highway bridges Comma This headquarters by confidential letter dated June nineteen nineteen forty one requested the Governor of the Territory to use the broad powers vested in him by section sixty seven of the organic act which provides Comma In effect Comma That the Governor may call upon the commanders of military and naval forces of the United States in the Territory of Hawaii to prevent or suppress lawless violence Comma Invasion Comma Insurrection etc Stop Pursuant to the authority stated the Governor on June twentieth confidentially made a formal written demand of this headquarters to furnish and continue to furnish such adequate protection as may be necessary to prevent sabotage Comma And lawless violence in connection therewith

Comma Being committed against vital installations and structures in the Territory Stop Pursuant to the foregoing request appropriate military protection is now being afforded vital civilian installations Stop In this connection **Comma** At the instigation of this headquarters the city and county of Honolulu on June thirtieth nineteen forty one enacted an ordinance which permits the commanding general Hawaiian Department **Comma** to close **Comma** Or restrict the use of and travel upon **Comma** Any highway within the city and county of Honolulu **Comma** whenever the commanding general deems such action necessary in the interest of national defense Stop The authority thus given has not yet been exercised Stop Relations with FBI and all other Federal and Territorial officials are and have been cordial and mutual cooperation has been given on all pertinent matters.

SHORT"

EVENTS TRANSPIRING FROM NOVEMBER 27TH TO DECEMBER 6TH

From November 27th to December 6th the troops remained on the Alert for sabotage, and carried on routine training with the men not required to be on duty during this Alert. The Aircraft Warning Service operated daily from two hours before daylight until one hour after daylight. It also carried out this usual practice, closing the information center at 7:00 A. M., December 7th. Routine training was also carried out by this Detachment from 7:00 to 11:00 A. M. except on Sunday. Memorandum of the Signal Officer, Hawaiian Department, states as follows—Exhibit "J":

Subject: Detector Operation.
To: Department Signal Officer.

1. On November 27, 1941, after conference with Assistant Chief of Staff G-3, and receiving instructions to operate all mobile detectors from two hours before dawn until one hour after dawn, I, as Acting Department Signal Officer, gave immediate instructions [16] to Captain TETLEY, Commanding Officer of the Aircraft Warning Company, to initiate the above detector operation so long Alert No. 1 was in force.

2. The detectors in question operated daily thereafter during the prescribed period except when having occasional operational trouble. In addition, the six detector stations operated daily except Sundays from 7:00 A. M. to 11:00 A. M. for routine training. Daily except Saturday and Sunday, to hours 12:00 noon until 4:00 P. M. were devoted to training and maintenance work.

(Signed) W. H. Murphy,
W. H. MURPHY,
Lt. Col., Sig. C.

During the period November 27th to December 6th I had conferences with the Commander-in-Chief of the United States Fleet and the Commandant of the Fourteenth Naval District as follows:

November 27th: Conference on the reinforcement of the marine garrisons at Midway and Wake Islands by squadrons of army pursuit planes. I was accompanied on this conference by Major General Frederick L. Martin, Commanding General of the Hawaiian Air Force, and Lt. Colonel James A. Mollison, Chief of Staff of the Hawaiian Air Force.

December 1st: Conference relative to the relief of the marine garrisons on the islands of Midway and Wake, and the taking over of the defense of Canton Island by the army.

December 2nd: Conference with the Commander-in-Chief of the United States Fleet with reference to a letter that he was sending to the Chief of Naval Operations relative to the relief of the marines at Midway and Wake by the army.

December 3rd: Conference with reference to a radiogram I was sending to the War Department relative to the relief of the marines at Midway and Wake by the army.

December 4th: Major Fleming, of my staff, conferred with Col. Pfeiffer, Fleet, Marine Officer on the Staff of the Commander-in-Chief of the United States Fleet relative to the use of marine 5" guns at Canton Island.

At these conferences the Commander-in-Chief of the United States Fleet and the Commandant of the Fourteenth Naval District had ample opportunity to acquaint me with information of the location of Japanese carriers, which would

2964 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

render possible an attack on the island of OAHU. If they believed carriers so located, they unquestionably [17] would have discussed the possible danger to any troops attempting to effect a relief at Midway and Wake. There is at least a strong inference that they had no such knowledge of the location of the Japanese carriers which would have rendered an attack possible. The fact that the Commandant of the Fourteenth Naval District did not request the employment under naval command of army bombardment planes for distant reconnaissance, as provided for by the "Joint Coastal Frontier Defense Plan" indicates that they were satisfied with their information with reference to Japanese carriers, and there was nothing new in the situation to cause me to change from an Alert for sabotage to an Alert for defense against an air attack. The following certificate shows that no request was made by the Commandant of the Fourteenth Naval District to the Hawaiian Air Force for long range aerial reconnaissance—Exhibit "K":

HICKAM FIELD, T. H., 20 December 1941.

I, JAMES A. MOLLISON, certify that during the period of 27 November 1941 to 7 December 1941 the Navy made no requests to the Hawaiian Air Force for in shore or long range aerial reconnaissances.

(Signed) Jas. A. Mollison,
JAS. A. MOLLISON,
Lt. Col., A. C.,
H. A. F. C/S.

To what extent such reconnaissance was made by the Navy planes is not known.

At the conference on November 27th, a staff officer of the Commander-in-Chief of the United States Fleet made a statement about the improbability of a Japanese air attack in the presence of the Commander-in-Chief. This statement is covered by certificate of Lt. Col. James A. Mollison, as follows—Exhibit "L":

"I certify that on November 27, 1941, I accompanied General Short and General Martin to Admiral Kimmel's office for conference relative to sending Army pursuits planes to Midway and Wake. As this would unquestionably weaken the defenses of Oahu, Admiral Kimmel asked a question of Captain McMorris, his War Plans Officer, which was substantially as follows:

Admiral KIMMEL: McMorris, what is your idea of the chances of a surprise raid on Oahu?

Captain McMORRIS: I should say *none* Admiral—.

(Signed) JAMES A. MOLLISON,
Lt. Col., A. C.

[18] December 5th one B-24 plane arrived at Hickam Field from the mainland. This plane had insufficient armament for combat, only one .30 caliber and two .50 caliber guns in the tail, and was without ammunition for the guns that were installed. In spite of the fact that this plane arrived without being in condition to fire, the following radiogram was received from the War Department—Exhibit "M":

"COMMANDING GENERAL, HAWAIIAN DEPARTMENT,
Ft. Shafter, TH.:

Four six five twenty sixth.

pilots best time of day for photographic Truk and Jaluit Stop Upon arrival in Philippines two copies each of any photographs taken will be sent to General MacArthur comma Admiral Hart comma Admiral Kimmel comma the Chief of Naval Operations comma and the War Department Stop *Insure that both B dash twenty four airplanes are fully equipped with gun ammunition upon departure from Honolulu.*

ADAMS.

The combination of the arrival of the plane in this condition and of the instructions for it to be placed in instant readiness for firing during the remainder of the journey plainly indicates that the War Department considered Honolulu not the subject of a probably attack, and that flying from the mainland to Honolulu the hazard of carrying the extra weight of ammunition was greater than the possibility of being attacked by the Japanese.

After the receipt of radiogram 46526, quoted above, the following radiogram was sent—Exhibit "N":

CHIEF OF THE ARMY AIR FORCES,
Washington, D. C.:

Reference secret photographic mission of two B twenty fours Stop One of B twenty fours [19] Lieutenant Faulkner which landed Hickam this date short following equipment considered essential to safety and success of mission colon fifty caliber machine guns comma mounts comma adapters and accessories for upper hemisphere semicolon fifty caliber tunnel gun comma adapter and accessories semicolon fifty caliber guns comma adapters comma mounts and accessories for starboard and port sides semicolon second thirty caliber nose gun comma adapter and accessories Stop Guns can be removed from our equipment and ammunition is available Stop Strongly recommend that second B twenty four bring necessary equipment from mainland for installation on both planes prior their departure from Hickam field Stop Plane being held here until satisfactorily armed Stop Subject plane has no armor plate installation Stop Except for removal of passenger seats plane equipped as for ferry service North Atlantic Signed MARTIN HAF 141.

SHORT

In spite of radiogram quoted above, airplanes continued to be dispatched from the mainland without ammunition and with guns not in condition to fire. Twelve B-17 airplanes, under orders from the War Department, left the mainland in two squadrons at 9:30 P. M., Dec. 6th, Pacific time (12:30 A. M., Dec. 7th, Eastern time) and 10:30 P. M., Dec. 6th, Pacific time (1:30 A. M., Dec. 7th, Eastern time). None of these guns were equipped with ammunition for the defensive armament. Machine guns were still cosmolined and had not been bore-sighted. Ferry crews were skeletonized, consisting of pilot, co-pilot, navigator, engineer and radio operator. Such crews were incapable of manning gun positions, even if the guns had been properly prepared for combat and supplied with ammunition. (Exhibit "O"). The inference is plain that up to 1:30 A. M., December 7th, the War Department felt that the hazard of carrying the extra weight in ammunition was greater than the danger of an attack by the Japanese. These planes actually arrived at Hickam Field in the midst of the first attack. Four of the twelve planes were destroyed by the Japanese without being able to fight. Had the War Department considered an attack by the Japanese probable, these planes would not have been permitted to leave the mainland without ammunition, and without guns in condition to be fired. Up to that moment the War Department had given me no indication of a crisis in the American-Japanese relations.

Later in the morning of December 7th apparently alarming news was received and the Chief of Staff sent the following message to me by *commercial radio*—Exhibit "P":

[20] "Hawn Dept.,
Ft. Shafter, T. H.:

529 7th Japanese are presenting at one PM eastern standard time today what amounts to an ultimatum also they are under orders to destroy their code machine immediately Stop Just what significance the hour set may have we do not know but be on alert accordingly Stop Inform naval authorities of this communication

MARSHALL".

2966 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The message was filed at 12:18 P. M., December 7th, Eastern time (6:48 A. M., December 7th, Honolulu time). It was received by the R. C. A. in Honolulu at 7:33 A. M., December 7th, and delivered to the Signal Office, Fort Shafter, at 11:45 A. M. (Delivery probably delayed by the Japanese attack). The deciphered message was delivered to the Adjutant General, Hawaiian Department, at 2:58 P. M., December 7th. Thus this important message was received seven hours after the attack. If the message had been telephoned by secret telephone direct to me as an urgent message in the clear without loss of time for encoding there would have been time to warm up the planes and put them in the air, thus, in all probability, avoiding a large loss of planes in the initial attack at 8:00 A. M. The fact that the War Department sent this message by radio in code instead of telephoning it in the clear and putting it through in the minimum amount of time indicates that the War Department, even as late as 6:48 A. M., December 7th, Honolulu time, did not consider an attack on Honolulu as very probable.

When the Chief of Staff, War Department, was informed by the Chief of Staff, Hawaiian Department, by secret commercial telephone of the first attack, he inquired if the message with regard to the Japanese ultimatum had been received prior to the attack. He was informed that it had not been received up to the time of that conversation.

On December 9th the following radiogram was received from the War Department—Exhibit "Q":

"Hawn Dept., Ft. Shafter, T. H.:

Five four nine ninth please advise immediately exact time of receipt of our number five two nine repeat five two nine December seven at Honolulu exact time deciphered message transmitted by Signal Corps to staff and by what staff officer received.

COTTON, *Acting*".

The following reply was made by this Headquarters—Exhibit "R".

[21] "Re your five four nine radio five two nine delivered Honolulu via RCA seven thirty three morning seventh Stop Received signal office Fort Shafter eleven forty five morning seventh paren this time approximate but within five minutes paren Stop Deciphered message received by adjutant general HQ Hawn Dept two fifty eight afternoon seventh

SHORT.

Two instances occurred early on the morning of December 7th, which, if interpreted differently at the time, might have had a very great result upon the action that followed.

About 7:15 A. M. a two-man submarine entered Pearl Harbor and was destroyed by ships on duty. Had the Naval authorities foreseen this as a possible forerunner of an air attack and notified the army, time would have been available for the dispersion of the planes. However, the naval authorities did not connect this submarine attack with a possible general attack. The army was not notified until after the attack at 8:00.

After the Air Craft Warning Service Information Center was closed at 7:00 A. M., December 7th, the OPANA station remained in operation for further practice. At 7:20 A. M. a very significant event occurred, as shown by the following affidavits—

Exhibit "8":

"FORT SHAFTER, T. H.
Territory of Hawaii, ss:

Personally appeared before me, the undersigned, authority for administering oaths of this nature, one Grover C. White, Jr. O-396182, 2nd Lieut., Signal Corps. Signal Company, Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

1. At the request of the Control Officer and Naval Liaison Officer the AWS agreed to operate its detectors beyond the daily period of two hours before until one hour after dawn. The first schedule required operation of all stations from 4 A. M. to 6 P. M. This schedule was modified to the hours of 4 A. M. to 4 P. M. A temporary schedule was next devised which required all stations to operate from 4 A. M. to 11 A. M. and to have "staggered" operation, i. e., 3 stations from 11 A. M. to 1 P. M., the remaining 3 stations from 1 P. M. to 4 P. M. On Saturday, December 6, 1941, I contacted the Control Officer to request authority to have all

stations operate from 4 A. M. to 7 A. M. only on Sunday, December 7, 1941; this was agreed to by the Control Officer.

2. Staff Sergeant Stanley J. Wichas, SCAWH, acting RDF Officer, reports that he saw nothing that could be construed as suspicious in the information received [22] by the AWS Information Center from 4 A. M. to Sunday, December 7, 1941. This is verified by Lt. Kermit A. Tyler, Air Corps, who was the only officer in the Information Center from 4 A. M. to 7 A. M.

3. At approximately 7:20 A. M. a report was received from a Detector station at Opana that a large number of planes was approaching Oahu on a course North 3 degrees East at a distance of approximately 192 miles. This information was immediately transmitted by the switchboard operator, Pfc. Joseph McDonald to Lt. Tyler, who talked to Opana about the flight. The statement of Pfc. Joseph McDonald, SCAWH, the switchboard operator is attached.

4. The Navy Liaison Officer's position within the Information Center was not manned when I reached the Information Center at about 8:30 A. M. This position was manned shortly thereafter by Technical Sergeant Merle E. Stouffer, SCAWH, who remained on the position until approximately 4:30 P. M. when the position was taken over by Naval Officers. Further the deponent sayeth not.

"FORT SHAFTER, T. H.,
ss:
Territory of Hawaii,

Personally appeared before me, the undersigned authority for administering oaths of this nature, one Joseph P. McDonald, 13006145, Pvt. 1cl, Signal Company Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

I was on duty as telephone operator at the AWS Information Center on Sunday morning, December 7, 1941. I received a telephone call from Opana at 7:20 A. M. stating that a large number of planes were heading towards Oahu from North 3 points east. I gave the information to Lt. Kermit A. Tyler, Air Corps, 78th Pursuit Squadron, Wheeler Field, T. H., and the Lieutenant talked with private Lockhard at the Opana station. Lt. Tyler said that it wasn't anything of importance. At that time the planes were 132 miles out. I asked if we shouldn't advise Corporal Beatty and have the plotters come back. The Opana Unit stressed the fact that it was a very large number of planes and they seemed excited. Lt. Tyler [23] said that it was not necessary to call the plotters or get in touch with anyone. Further the deponent sayeth not.

(Signed) Joseph P. McDonald,
JOSEPH P. McDONALD,
Sig. Co., Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of December A. D. 1941 at Fort Shafter, T. H.

(Signed) Adam R. Huggins,
ADAM R. HUGGINS,
2nd Lieut., Signal Corps,
Summary Court.

STATEMENT OF LIEUT. KERMIT A. TYLER

20 DECEMBER 1941.

On Wednesday, 3 December 1941, I was first detailed to learn the operation of the plotting board in the Interception Control Center. I reported for duty at 1210, just as the crew on duty was leaving. I spoke with Lt. White, Signal Corps, a few minutes and he showed me the operating positions for Navy, Bombardment, Antiaircraft, Controller's position and Aircraft Warning Service. I remained on duty until 1600. Only a telephone operator was on duty with me.

On Sunday, 7 December 1941, I was on duty from 0400 to 0800 as Pursuit Officer at the Interceptor Control Center. From 0400 until approximately 0610

there were no plots indicated on the interception board. From that time until 0700 a number of plots appeared on the control board at various points surrounding the Island of Oahu. I particularly remember at least one plot South of Kauai and I believe there was one South of Molokai. There were two plots at some distance north of Oahu and which I remember seeing on the historical record. At the time, I questioned the plotter of the historical record who stated that he makes a record of all plots as they come in. There were a number of plots over and around the Island of Oahu. Having seen the plotters work once before with about the same general layout, this did not seem irregular to me. At 0700 all of the men except the telephone operator folded up their equipment and left. At about 0700 the operator at the OPANA RDF Station called me and said that the instrument indicated a large number of planes at 132 miles to the North. Thinking it must be a returning naval patrol, a flight of Hickam bombing planes, or possibly a flight of B-17 planes from the coast, I dismissed it as nothing unusual. (It is common knowledge that when Honolulu radio stations are testing by playing Hawaiian music throughout the night that coincidentally B-17s are apt to come in using the station [24] for radio direction finding. The radio station was testing on the morning of 7 December, 0230-0400). At about 0750 I heard some airplanes outside and looking toward Pearl Harbor saw what I thought to be the navy practicing dive bombing runs. At a little after 0800, Sergeant Eugene Starry, A. C., Wheeler Field, called me to tell me that Wheeler Field had been attacked. I immediately had the telephone operator call all men back to duty. Most of the men had returned to duty by 0820 when Major L. N. Tindal arrived and took charge of the Control Center. I remained on duty assisting Major K. P. Bergquist and Major L. N. Tindal as Pursuit Control Officer until about 1615, 8 December 1941, with the exception of rest periods from 2000 to 2400, 7 December, and 0600 to 1000, 8 December.

(Signed) Kermit A. Tyler,
KERMIT A. TYLER,
1st Lieut., Air Corps.

Had Lieut. Tyler alerted the Hawaiian Air Force instead of deciding that the planes were friendly, there would have been time to disperse the planes but not to get them in the air as they were not warmed up. Dispersion, in all probability, would have decreased the loss in planes, but would not have prevented the attack on Pearl Harbor.

ACTION AT TIME OF ATTACK

At 7:55 A. M., December 7th, the enemy planes attacked Hickam Field, Pearl Harbor and Wheeler Field. At 9:00 a second attack was made, and a third about 11:00 A. M., each lasting approximately fifteen minutes. At 8:03 A. M. the Chief of Staff reported the attack, and by 8:10 order had been given to all units (major echelons) by telephone to put Alert #3 in effect.

Antiaircraft Artillery: All antiaircraft batteries had skeleton crews guarding them. All units had in their possession ammunition for rifles, pistols, automatic rifles and machine guns. 3" ammunition had been placed in positions accessible to all batteries except four batteries of the 64th C. A. C. (AA). The first of these batteries began drawing ammunition at the Aliamanu Crater at 8:15 A. M. At 10:15 all these batteries had drawn the initial unit of fire.

The automatic weapon batteries at Fort Kamehameha, Pearl Harbor and Camp Malakole took the enemy planes under firing during the eight o'clock raid. The first 3" gun fire was opened at 8:30, and all batteries of the south group were in action by 10:00 A. M. East group opened fire between 11:00 A. M. and 12:00 noon. (For detailed firing of batteries, see Exhibit "S").

[25] *Hawaiian Air Force:* During the first attack men started pulling planes out of the fire, and at 8:50 the serviceable pursuit planes took off. At 11:40 A. M. the serviceable bombers took off on a mission under naval control.

Before the attack December 7th status of planes in Hawaiian Department was as follows:

Pursuit planes in commission.....	80
Pursuit planes out of commission.....	69
Reconnaissance planes in commission.....	6
Reconnaissance planes out of commission.....	7
Bombers in commission.....	39
Bombers out of commission.....	33

Damaged in Raid:

Pursuit planes.....		88
Reconnaissance planes.....		6
Bombers.....		34
Status as of December 20th, 1941:		
Pursuit planes.....	<i>In commission</i>	22
Reconnaissance.....	61	2
Bombers ¹	6	13
	50	

¹ Includes 29 bombers from mainland.

Exhibit "T"

A comprehensive study of the losses inflicted on the enemy by the army places the number of enemy planes brought down by aviation and antiaircraft fire at twenty-nine (29).

Exhibit "U"

24th Division: Troops of the 24th Division at Schofield were attacked at 8:10 A. M. Men with automatic rifles returned the enemy's fire. At 8:30 A. M. the Division started moving to its battle positions, and all units were in position by 5:00 P. M. and had one unit of ammunition on the position. The second unit of fire was issued during the night.

25th Division: The 25th Division opened antiaircraft fire at 8:30 A. M. It also started to move to battle positions at 8:30 A. M., and completed movement to position by 4:00 P. M. and had issued one unit of fire. The second unit of fire was issued during the night.

All movement and action of troops was carried out as prescribed in [26] standing operating procedure (See Exhibit "B") without confusion. The value of planning and training with everyone made familiar with the plans was brought out very clearly.

At 9:00 A. M. the first civilian surgical teams began reporting at Tripler General Hospital.

At 12:00 noon the Civilian Relief Committee began the evacuation of Hickam Field, Wheeler Field and Schofield, and continued throughout the afternoon and part of the evening. Most of the women and children were moved to school buildings, although a few from these posts and all of the women and children from Shafter, Tripler, Ordnance Depot and Signal Depot were sheltered in the incomplete underground Interceptor Command Post.

During December 7th the foreign agents previously listed by F. B. I. and G-2 were arrested and confined at the Immigration and Quarantine Stations as follows:

Japanese.....	370
Germans.....	98
Italians.....	14
Total.....	482

The 804th Engineers began clearing the runways at Hickam Field and Wheeler Field as soon as the first attack was over. The fire fighters, while still fighting fire, assisted in moving the debris. During the evening of the 7th the District Engineer began repairing broken water pipes and other utilities at Hickam Field.

Governor Poindexter put the M-Day Bill in effect on December 7th, and on December 8th declared martial law and requested the Department Commander to assume the responsibility as Military Governor.

December 8th the District Engineer took over all building materials, supplies and equipment, called all construction companies into service and started the construction of bunkers and the extension of runways at the air fields. On the 9th he started construction of evacuation camps for army dependents and civilians. December 8th the Department Engineer distributed material to the troops and got field fortifications under way. December 9th he started construction of slit trenches on posts and in the vicinity of school buildings and parks in the city, and started plans for construction of shelters throughout the city.

Martial law was placed in effect on December 8th, and the following action was taken:

1. Courts were closed.
2. All civilian officials were asked to remain in their positions and carry on the work of their offices.

2970 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[27] 3. An Advisory Committee headed by Governor Poindexter was appointed.

4. A Military Commission and Provost Court were appointed.

5. The sale of intoxicating liquors, beer and wine was prohibited.

[28] EFFORTS TO IMPROVE DEFENSES OF HAWAIIAN ISLANDS

My efforts to improve the defenses of the Hawaiian Islands has a bearing upon all work under me since assuming command of the Hawaiian Department, February 7, 1941. The following are some of the most important items taken up and the action taken by the War Department. Each item is supported by exhibits.

1. The need for additional facilities and troops in this Department became evident very soon after arrival. On February 19th a letter was transmitted to the Chief of Staff of the Army outlining some of the deficiencies discovered and recommending action which should be taken to correct them. Among these points were:

- (1) Cooperation with the Navy,
- (2) Dispersion and protection of aircraft and repair, maintenance and servicing of aircraft,
- (3) Improvement of anti-aircraft defense,
- (4) Improvement of the harbor defense artillery,
- (5) Improvement of the situation regarding searchlights,
- (6) Roads and trails,
- (7) Necessary bombproof construction,
- (8) Increase in the number of engineer troops.

A copy of this letter is attached as Exhibit "V".

2. On February 19, 1941, a secret letter was submitted to the War Department, subject: "Dispersion and Protection of Aircraft", file Engr. 452. This letter explains the urgent necessity of providing protective bunkers for bombardment and pursuit aviation in this Department and recommended that funds in the amount of \$1,565,600.00 be allotted for this purpose. This cost included the costs of the necessary taxiways and hard standings to permit the dispersion of planes at Hickam Field. A large part of the ground surrounding the landing mat at Hickam Field is made up of a soft fill and it is not possible to disperse planes onto this ground without the provision of taxiways and hard standings. This correspondence was indorsed back to this Department by the 6th Ind., AG 600.12 (2-19-41) MC-G, September 12, 1941, which stated that the plans for revetments had been approved and that funds in the amount of \$1,358,000.00 [29] would be available about January 1, 1942. At the time of the attack on December 7th, no money had been received for this project and it was impossible to adequately disperse the planes at Hickam Field. Construction of these bunkers was initiated immediately after the attack under the Emergency Authority granted.—Exhibit "W".

3. It was apparent that the facilities of the Hawaiian Air Depot which had been constructed in a very concentrated area at Hickam Field would be extremely vulnerable to an attack. As a result, a letter was submitted to the War Department on September 10, 1941, file Engr. 600.96, subject: "Underground Repair Facilities Hawaiian Air Depot", which strongly recommended the approval of bombproof facilities for the repair of aircraft in this Department, and requested funds in the amount of \$3,480,650.00. This correspondence was indorsed back by 1st Ind., file AG 600.12 (9-10-41) MC-G, Adjutant General's Office, October 27, 1941, stating that due to the cost of providing bombproof facilities that it was the War Department's policy not to provide them, and suggesting that splinterproof installations be provided. During the attack of December 7th, the Air Depot was one of the main targets and suffered tremendous damage. Construction of an underground bombproof facility was started under the Emergency Authority subsequent to the attack. Steps have also been taken to decentralize the Hawaiian Air Depot to several smaller shops around the island.—Exhibit "X".

4. Fortifications and Camouflage Funds.—A letter was submitted to the War Department on July 28th, file AG 121.2, subject: "Reallocation of Special Field Exercise Funds", requesting that these funds be made available for purchase of fortification and camouflage equipment. This letter was answered by confidential radiogram No. 31, August 12, 1941, stating these special field exercise funds could not be made available for this purpose. This radiogram was followed by letter dated August 13, 1941, file AG 353 (7-28-41) MC-D, subject: "Realloca-

tion of Special Field Exercise Funds for Field Fortification and Camouflage Projects", in which it was stated that the interest of the Hawaiian Department in providing field fortifications was appreciated by the War Department, but that funds could not be allotted for this purpose. This letter was returned by 1st Ind. this headquarters, file AG 353 (7-28-41) MC-D, September 14, 1941, again recommending an immediate allotment of \$125,000.00 for field fortification and camouflage purposes. In 2nd Ind. to [30] the same correspondence September 26, 1941, the Adjutant General stated that the allotment could not be made. Also on this same subject, this headquarters submitted to the War Department a clipper letter on October 28, 1941, file Engr. 400.312, subject: "Funds for Field Fortification and Camouflage Material", which recapitulated the previous correspondence on this subject, and requested an allotment of \$1,445,542.00 be made available immediately for the purpose of fortification and camouflage materials. No funds had been received for this purpose at the time of the attack.—Exhibit "Y".

5. Camouflage: The necessity of camouflaging treatment of all airfields in this Department was brought to the War Department's attention in letter File Engr. 000.91, July 15, 1941, subject: "Request for Funds for Camouflage of Wheeler Field". This letter stated, "There is definite need for camouflage treatment on all airfields in the Hawaiian Department. Up to this time no camouflage treatment had been undertaken at any airfield in this Department." This proposal was finally approved in 3rd Ind., file AG 007.5 (7-12-41) MC-G from the Adjutant General's Office to the Chief of Engineers which directed that funds in the amount of \$56,210.00 be included in the next budget estimate for Wheeler Field. At the time of the attack on December 7th, no funds had been received for this purpose. The question of camouflage was also submitted to the War Department by letter this headquarters February 27, 1941, file Engr. 000.91, subjects "Camouflage of Defense Installations". This project was approved by 4th Ind., AG 007.5 (2-27-41) MC-E, Adjutant General's Office June 27, 1941. At the time of the attack, no funds for this purpose had been received, and although considerable work had been done by troop labor to camouflage these installations, its effectiveness was limited by our inability to buy the necessary materials.—Exhibit "Z".

6. The revised Roads and Trails Project was submitted by letter this headquarters, file Engr. 611, February 19, 1941, which recommended that funds in the amount of \$1,370,000.00 be allotted for construction of the military roads, railroads and trails in this Department. At the time of the attack, only \$350,000.00 had been allotted for this purpose.—Exhibit "1A".

7. The need for additional airports was brought to the War Department's attention in letters file Engr. 600.12, according to the following [31] schedule:

(1) Bellows Field.....	April 5, 1941
(2) Barking Sands.....	May 2, 1941
(3) Hilo Airport.....	May 2, 1941
(4) Homestead Field.....	May 2, 1941
(5) Morse Field.....	May 2, 1941
(6) Haleiwa.....	May 22, 1941
(7) Burns Field.....	May 22, 1941
(8) Lanai.....	May 22, 1941
(9) Parker Ranch.....	June 2, 1941
(10) Kipapa.....	May 14, 1941

At the time of the attack no funds had been allotted specifically for construction at these airfields. The War Department disapproved the proposed site at Kipapa and directed construction at Kahuku. This relocation required protracted negotiations with the Fourteenth Naval District which had a bombing range on the Kahuku site. These negotiations were completed only a short time before the attack, but as no funds had been received, no construction had been started. In this connection, several expedients had to be adopted due to the non-availability of funds. Construction work at Molokai, Burns, Morse and Barking Sands was actually done by troop labor using materials provided by the WPA. The need of an additional airdrome on Oahu was recognized as acute. The only possibility for immediate development was in improving the field at Bellows, and the only funds which had been made available for construction work at Bellows Field applied to housing only. The project letter on Bellows Field included a request for funds for improvement of runways, installation of gasoline storage and other facilities to make this a first class operating base. As stated, no funds had been allotted for these improvements. Since the need for these vital facilities was

2972 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

acute, this Department authorized the District Engineer to proceed with their construction, utilizing any funds which might be available to his office. At the time of the attack, provision had been made for gasoline storage at Bellows and a 5000' runway was about half done, and the District Engineer was able to complete this runway by Thursday night following the attack. Bellows Field is now a useable base, but all construction which [32] has been done to make this an operating base has been done without any funds being allotted by the War Department. The improvement of other airdromes on Oahu at either the Kipapa or Kahuku area or at Haleiwa had not been undertaken at the time of the attack because no funds had ever been allotted for this purpose.—Exhibit "1B".

8. Kaneohe Bay Defenses: It was recognized that the preceding arrangement under which the Army disclaimed any responsibility for the defense of the new Naval Air Station at Kaneohe Bay was a mistake. A letter was prepared and transmitted to the War Department on the 18th of February 1941, subject: "Defense of Naval Air Station Kaneohe Bay, Oahu, T. H." file 381. This letter informed the War Department that this Department had assumed responsibility for the defense of this area. This subject was again covered in letter this headquarters, file Engr. 600.96, dated April 14, 1941, subject: "Protection of Seacoast Defense Batteries" to the Adjutant General, and recommendation was made that a 12-inch gun battery similar to Battery Closson be obtained and shipped to this Department for installation in the Kaneohe Bay area. The War Department recognized the need of this protection for Kaneohe Bay, but was unable to supply a 12-inch gun battery for this. The project for the permanent defenses at Kaneohe Bay was submitted by letter of this headquarters 31 July 1941, file AG 381/20 Kaneohe Bay project, subject: "Coast Artillery Armament for Naval Air Station Kaneohe Bay", which recommended both additional personnel and additional armament required. This was answered by 3rd Ind. Adjutant General's Office, file AG 381 (7-31-41) MC-D, October 30, 1941, which approved the temporary utilization of armament now on hand in this Department. This indorsement also stated that the reinforcements of peace or war garrison of the Hawaiian Department for the beach and land defense of this area was not contemplated. The project for the utilization of temporary armament was submitted on the 18th of September 1941, file Engr 662/4 x 662/7 which recommended the provision of funds for the construction of Panama mounts for three 155-mm batteries and a railroad gun emplacement, and requested that funds in the amount of \$215,265.00 be allotted for the construction of these positions. This matter was also followed up in radiogram No. 320 this headquarters, September 18, 1941, which recommended that funds in the amount of \$215,265.00 be made available for the construction at Kaneohe Bay and also that \$117,256.00 be made available for the completion of the project for [33] construction of railroad gun positions. At the time of the attack no funds had been allotted for this construction. Exhibit "1C".

9. The necessity of improvement of the landing strips at Wheeler Field was brought to the War Department's attention by letter this headquarters, file Engr. 686/d, 21 June, 1941. In 2nd Ind. on this correspondence, from the Office of the Chief of the Air Corps, August 25, 1941, question was raised as to the adequacy of the second proposed north-south runway, and the statement was made that no funds were available at that time for the construction and improvements recommended. In 2nd Ind. Chief of the Air Corps, Washington, D. C., September 2, 1941, to this Department, statement was made that \$25,000.00 had been requested for the leveling of the main runway at Wheeler Field. At the time of the attack, however, no funds had been received for the improvement of this landing strip. Some improvements had been made utilizing troop labor of the 804th Engineers; however, due to the lack of funds these improvements were limited and did not adequately solve the problem.—Exhibit "1D".

10. The Aircraft Warning Service is probably the most important single project for the defense of Oahu. At the time of the attack, however, none of the three fixed stations in the original project had been completed due to the impossibility of securing materials under the priorities system. The Kaala station, for example, depended for its construction on construction of the cableway approach. In radiogram 3009 on June 10th, this headquarters reported to the War Department that this cableway material could not be delivered unless a higher priority rating was received, and in War Department radio 904, June 26th, the Adjutant General reported that this priority rating had been advanced to an A-1-c rating. With this rating it was not possible to secure the material to install this installation and the others expeditiously. Revised estimates for engineer construction of the superseding project of six fixed stations and six mobile

stations and preliminary estimates for the cost of the signal communications involved in this revised project, were submitted by letter this headquarters 29 September, 1941, file Sig 676.3. Pending the allotment of these additional funds, this Department authorized the District Engineer to proceed with construction of AWS stations with any funds available to his office. At the time of the attack, however, due to this priority difficulty, none of the three original fixed stations were in operation.—Exhibit "1E".

[34] 11. The entire construction program in this Department has been delayed due to the situation regarding priorities. It was extremely difficult to secure materials for the construction program, not only those which were ordered specifically for a defense project, but particularly those materials which are ordinarily purchased as an "over the counter" transaction. From a study of the the priorities situation, and also of the shipping situation, it became evident in June that the local dealers who ordinarily maintain stocks and materials necessary for defense projects would not be able to secure delivery from the mainland until after a purchase order from a Government agency had been placed. This meant that after the priority was placed, if the item was not available in local stock that there would be a delay of from six weeks to two months even under the most favorable conditions before mainland delivery could be effected. To remedy this situation a letter was sent to the War Department by clipper airmail, file Engr. 523.07, subject: "Priorities and Preference Ratings," July 3, 1941. This letter presented the problem in detail and recommended to the War Department that action be taken to correct this situation. The letter was followed up by radio on the 14th of August, and was answered by 1st and 2nd Inds. from the Priorities Committee dated August 18, 1941, and the Adjutant General dated August 26, 1941. The problem was again presented to the War Department by letter dated October 23, 1941, file Engr. 523.07, which recommended that the Office of Production Management be opened in Honolulu. In 2nd Ind. on this correspondence, the Priorities Committee advised that the Office of Production Management had been requested to establish a field office in Hawaii. This field office had not been established at the time of the attack and due to this difficulty in securing materials, many of our projects were not completed at the time of the attack.—Exhibit "1F".

12. Another effort was made to solve this supply problem by securing funds for the advance procurement of certain essential materials. It was originally requested in clipper airmail letter this headquarters July 28, 1941, file Engr. 600.12, which recommended that a revolving fund of \$1,000,000.00 be set up to permit the advance procurement of essential materials before the specific allotments had been made for individual projects. This letter had not [35] been answered on the 13th of September when a follow-up radiogram was sent to the War Department, and on the same day the matter was brought to the personal attention of the Deputy Chief of Staff in the War Department, who very quickly secured a solution of the problem by the allotment of \$500,000.00 for the advance purchase of essential materials. Before these materials could be secured, however, the \$500,000.00 was diverted by the War Department for the construction of housing at Kaneohe Bay, with the result that on the day of the attack, no reserve supplies of materials other than lumber had been accumulated.—Exhibit "1G".

13. The following letter shows appreciation by the Deputy Chief of Staff for Air of the difficulties in the carrying out of the project for the creation of air fields to permit ferrying of planes to the Philippine Islands, and of the rapidity with which the arrangements were completed.—Exhibit "1H".

NOVEMBER 27, 1941

Lieutenant General WALTER C. SHORT, U. S. A.,

Headquarters Hawaiian Department,

Office of the Department Commander,

Fort Shafter, T. H.

DEAR SHORT: The copy of your report on the additional air routes has been received. The quantity of details requiring coordination, and the distances involved in the projects make the short time consumed in getting rolling almost unbelievably short.

I extend you my personal thanks for the effort you have expended on this job and the results you are getting.

The way things are working out now, it looks as if we will be using trans-Pacific airways almost continuously from now on. Our plans are O. K. for 4-engine

2974 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

bombers, but what are the prospects for medium bombers? Do you think we should even study that phase of trans-Pacific operations?

Best regards.

Sincerely,

/s/ H. H. ARNOLD,
Major General, U. S. A.,
Deputy Chief of Staff for Air.

[36] 14. Increase in Engineer Troops:

February 10, 1941.—TAG sent 3d Ind., file AG 320.2 (11-1-40) M-C saying that 3d Engineer Regiment was to be increased. Regular Army personnel not available to further increase Engineer Regiment. Selectees prohibited from being sent and it was not possible to aid in creating Engineer Battalion here as requested. On 19 Feb. 1941, letter to TAG file Engr. 322.03 requested that War Department send an Eng. Regiment (Aviation) and an Eng. Regiment (General Service) here. 1st Ind., May 15th, A. G. 320.2 (2-19-41) MC-C-M; TAG, stated that 34th Eng. Regiment (C) would be activated and that the personnel would probably arrive in June. This Regiment was to take the place of the Regiment (General Service) requested. On June 18th, letter AG 320.2 (6-5-41) MR-MC, the War Department issued orders expanding 804 Eng. Company to the 804th Eng. Battalion. The troops for the 304th Eng. Battalion arrived in this Department 21 July 1941. Previous instructions concerning the activation of the 34th Eng. Battalion had been rescinded with the result that the unit was not activated until 17 October 1941. It had not been completely trained and lacked many items of equipment at the time of the attack. See Exhibit "1 I".

15. Increase in Coast Artillery Troops:

February 18, 1941.—Letter written to TAG urgently requesting two (2) Regiments CA Mobile; 1 Battalion CA (AA) gun, Mobile (less searchlight battery); one Regiment CA (TD) 155 mm. gun; AA filler replacements (90 officers and 2064 enlisted men); Harbor Defense Artillery reinforcements (150 officers and 2700 enlisted men). TAG replied by first indorsement May 10, 1941, file AG 320.2 (2-18-41) (56) that the Hawaiian Department CA Garrison would be augmented with a total of 276 officers and 5734 enlisted men between June 1941 and March 1942, as follows: (See Exhibit "1 J").

June 1941:

- (1) AA fillers, 60 officers, 1337 enlisted men.
- (2) 98 CA 62 officers, 1329 enlisted men
- (3) Second Battalion, 97 CA less Battery H (Gun) Battery E (SL) (17 officers, 359 enlisted men)

[37] *November 1941:*

- (1) 97 CA less 2 Battalion, 3 Battalion—(48 officers, 885 enlisted men).
- (2) Battery H, 97 CA (4 officers, 134 enlisted men).
- (3) Medical Personnel, 98 CA (7 officers, 49 enlisted men).

March 1941:

- (1) AA fillers (24 officers, 661 enlisted men).
- (2) 3 Battalion, 97 CA (37 mm. gun) less Battery H, 3 Battalion, 98 CA (37 mm. gun) less Battery M (54 officers, 980 enlisted men).

February 25th, 1941.—Letter written to TAG, file AG 320.2/57 (Exhibit requesting increase in enlisted men in 251st C. A. Regiment NG from 1181 to 1450. Disapproved by TAG March 8, 1941 (Exhibit 1J) 1st indorsement, file 320.2/57.

February 25th, 1941.—Letter written to TAG, file 320.2/58 (Exhibit 1J) requesting following reinforcements of Hawaiian Department:

- (1) That CAC requested February 18th (Exhibit 1J) be given priority.
- (2) That 11th F. A. be organized under T/O dated November 1, 1940.
- (3) One Tank Battalion.
- (4) Two (2) M. P. Companies for guarding air fields.
- (5) Reinforcements of Inf. Regiments so as to be organized under T/O November 1, 1940.
- (6) That 11th F. A. Brig. (less 11 F. A.) be reinforced and organized under T/O November 1, 1940.

TAG replied by first indorsement, file 320.2 (2-25-41) (53) (Exhibit 1J) that CAC and Engineering increases would be considered separately; that reinforcements for F. A. and Inf. Regiments were not considered urgent; that Tank Battalion and 2 M. P. Companies for Hawaiian Department were disapproved; and that any reorganization of units was to be accomplished by reducing size

of existing units and by carrying others as inactive. On May 28th, orders for the shipment of CAC increases were rescinded file 320.2/70. On July 15, letter from TAG, file 320.2/82m (Exhibit 1J) activated the following units:

- [38] 97th CA Headquarters and Headquarters Battery, 2 Battalions, and Batteries F and G.
98th CA Regimental Headquarters Battery (less band), Headquarters and Headquarters Battery 1st and 2nd Battalions, and Batteries A, B, C, D, F, G and H.

16. Increase in Air Corps Strength:

April 9th, 1941.—Letter from TAG, file 320.2 (3-5-41) (61) (Exhibit 1K) directing that Air Defense Command be set up. First indorsement, May 3, 1941 (Exhibit 1K) to TAG called attention to the fact that the plan was presented to War Department in letter of April 25th, 1941, Paragraph 7 "Reorganization of Forces in Hawaiian Department" (Exhibit 1K).

April 24th, 1941.—Letter written to TAG from COHAF (thru channels) file 320.2/94 (Exhibit 1K) subject "Air Base Group" requesting:

- (1) Bellows Field as permanent Air Corps Station
- (2) Permanent Station 15 Pursuit Group
- (3) A redistribution of Air Base Groups
- (4) That two Air Base Groups be authorized.

By second indorsement TAG to COHD dated June 26th, 1941, file 320.2 (4-24-41) (94) (Exhibit 1K):

(1) War Department stated that Troop Unit Basis FY 1942 provided for two additional material squadrons for HAF. This is believed to provide sufficient air base units to care for Bellows Field.

(2) Organization of Air Base Unit for 15th Pursuit Group held in obedience pending decision on new station. By third indorsement CGHD to TAG, file 320.2/94 (Exhibit 1K) request was made for two additional material squadrons to be stationed at Bellows Field. On August 7th, 1941, radio, file 320.2/100 (Exhibit 1K) was sent to Chief of Air Corps requesting Headquarters Detachment in absence of Air Base Group. On August 15th Radio No. 380 (Exhibit 1K) was sent to TAG requesting information of status of Air Base Groups for Bellows Field. Administrative situation there very difficult. In answer, Chief of Air Corps sent radio no. 172, file 320.2/108c (Exhibit 1K) stating [39] not favorably considered because it would exceed the 59,000 allotted and also that TAG had been requested to activate Headquarters Detachment. On September 27th, 1941, by letter (exhibit 1K) from TAG, file 320.2/108d, subject "Activation of Air Corps Unit" a Headquarters Detachment was authorized at Bellows Field but personnel had to be furnished by the Department.

On August 30, 1941, Radio No. 779, file 320.2/108 (Exhibit 1K) was received asking:

- (1) What are total AC personnel requirements.
- (2) Total requirements for personnel for arms and services with AC.
- (3) Number AB groups needed and their locations.

On September 9, 1941, Radio No. 272 to TAG, file 320.2/108a (Exhibit 1K) answering Radio No. 779 requesting the following:

- (1) Two AB Groups (one for Bellows, one for Kahuku)
- (2) Air Corps enlisted men now in Department sufficient to organize these groups.

(3) One Squadron (HB) (Exhibit 1K) consisting of 27 officers, 220 enlisted men to replace 14th Bombardment Squadron transferred to Philippine Islands.

(4) Personnel for Bellows. Medical Department (1 officer, 7 enlisted men) Dental Corps (1 officer) Quartermaster (1 officer, 30 men) Ordnance Dept. (1 A. B. Co. of 4 officers and 60 enlisted men).

(5) Personnel for Kahuku Point. Medical Department (3 officers, 12 enlisted men) Dental Corps (1 officer) Quartermaster (1 officer, 30 enlisted men) Signal Corps (10 enlisted men specialists)

(6) Following personnel needed: Air Corps (3871 enlisted men) Medical Corps (6 officers, 36 enlisted men); Dental Corps (1); Quartermaster (4 officers, 70 enlisted men). 3 AB Squadrons one each at Barking Sands, Kauai; Morse Field; Hilo, Hawaii.

(7) Near Future. Two (2) additional AB Squadrons—(1) Lanai (under construction) (2) Parker Ranch (project to be submitted).

On November 8th Radio no. 786 was sent to TAG, file 320.2/126 (exhibit 1K) requesting immediate assignment.

2976 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- (1) Three airdepot Groups to HAF
- (2) Procurement of civilian employees impossible and discharge of enlisted men for employment does not help.

[40] (3) 30% tactical planes grounded due to shortage in depot maintenance. Becoming acute.

(4) Must have personnel and material at once. No personnel available here for activation of units.

On November 15th Radio no. 402, file 320.2/128a, (exhibit 1K) from TAG stating that three Air Depot Groups were under advisement but that groups not available now. If and when available, will it come within strength of war garrison?

On November 19th Radio no. 889, file 320.2/126b (exhibit 1K) to TAG—Increase of three Air Depot Groups will not come within authorized war garrison but should be furnished as soon as possible due to shortage in personnel. War garrison must be increased to accommodate Air Base Groups.

On November 18th the War Department activated Seventh Airways Squadron from existing personnel in Department, file 320.2/127 (exhibit 1K). On November 18th Radio no. 873, file 320.2/128 (exhibit no. 1K) was sent to TAG requesting Station Complements at Hickam, Wheeler, Morse Field and Barking Sands. Urgently requested. On November 25th 1941 Radio no. 455, file 320.2/128a (exhibit 1K) from TAG stated that until war garrison limitation was lifted, no additional personnel could be sent to the Hawaiian Department.

17. Reorganization Hawaiian Division & Increase in War Garrison April 25th, 1941. Letter written to TAG, file 220.3/37, (exhibit 1L) requesting that two triangular divisions be organized from the Hawaiian Division (Square) and the organization of station complements be made at Schofield Barracks and Fort Shafter; also Air Defense Command is to be created. By first indorsement dated July 29, 1941, file 320.3 (4-25-41) (37) (exhibit 1L). TAG returned this letter without action.

May 29th, 1941. TAG sent radio no. 837, file 320.3/37a (exhibit 1L) stating that the initial war garrison would be reduced to 58,000. Reductions would come from troops other than Air Corps, Anti aircraft, and Aircraft Warning Service.

[41] June 5th, 1941.—Letter was written to TAG, file 320.3/37b (Exhibit 1L) subject "War Garrison for Initial War Operations" stating

(1) That Table I, (Exhibit 1L) shows forces recommending totaling 59,425.

(2) Statement that proper defense of Kaneohe Bay, Airfields, beaches and provisions for mobile reserve cannot be successful with only 59,000 troops.

(3) Statement of minimum increase for Kaneohe Bay as follows: 1 Regiment Inf; 1 Regiment Field Artillery, 155 How (T. D.); 1 Battalion C. A. 155 guns plus one additional battery; 1 Regiment C. A. (AA); 1 Battery C. A. 12" Barbette guns.

(4) Urgently requested that strength be increased from 58,000 to approximately 71,500 as follows: 2 Inf. Regiments; 1 Regiment Field Artillery, 155 How 1 Regiment CA (AA) SM; 1 Battalion CA 155 guns; 1 Battery CA 12" Barbette guns . . . total 11,279.

(5) Again recommended that station complements for Schofield Barracks and Fort Shafter be organized. This would give an increase of 731 officers and men for Schofield Barracks and 131 officers and men for Fort Shafter.

(6) Plans are to be submitted in the near future for garrisons each of outlying islands with a force consisting of approximately 1 regiment of Infantry and a composite battalion of Field Artillery, all of which will not be within war garrison strength.

On July 22, 1941, 1st indorsement to exhibit 1L file 320.3/37b (Exhibit 1L) TAG said

(1) War Garrison of 59,425 recommended by CGHD is reduced to 57,429 and augmented by following units: 1 Regiment CA (AA) SM (less 1 gun battalion, band, basics), 1 Battalion CA 155 M guns with 1 additional Battery, 1 Battery CA.

(2) Recommendation of war garrison for 71,500 officers and men is disapproved.

(3) Troops in excess of 59,690 authorized will be sent to Hawaii only in case the situation develops a need and if such troops are available.

18. May 2nd, 1941.—Letter written to TAG, file 320.3/38 (Exhibit 1M) subject "Organization of Anti Aircraft Artillery Brigade" requesting authority to activate the Headquarters and Headquarters Battery 53 CA Brig. and the Intelligence Battery, 53rd CA Brig. about June 1, 1941.

June 12, 1941.—First indorsement from TAG to CGHD, file 320.2 (5/2/41) (38) (exhibit 1M) gives authority to activate.

[42] 19. *November 8, 1941.*—Radio No. 759 to Chief Ordnance, file 320.2/121 (exhibit 1N) stated that 6-37 mm. batteries now in Hawaiian Department. Plans made for six more by March, 1942, but only twenty (20) guns on hand. When and in what quantities will the one hundred (100) 37 mm. guns listed under 1941 funds be sent? Reply not yet received.

20. *STANDING OPERATING PROCEDURE.* Before February 7, 1941, Field Orders No. 1 (Landing Operations) No. 1W (Sabotage) and 1 NS (Naval Security) had been prepared. It was found during Maneuvers, May 1941, that these field orders were too cumbersome. On July 14th, 1941, a tentative Standing Operating Procedure, Hawaiian Department was issued to each officer in the Department with instructions that any suggested changes were to be reported to Department Headquarters by August 15, 1941. During the preparation of the final form of the Standing Operating Procedure, the tentative S. O. P. was in effect. The final form was issued on November 5, 1941. Each unit knew its mission in the event Alert No. 1, 2 or 3 was put into effect. Due to this planning (the S. O. P.) each unit was able to act quickly and promptly when the air raid took place on December 7, 1941.

EFFORTS TO BETTER PREPARE THE CIVILIAN COMMUNITY FOR DEFENSE

[43] Soon after taking command of the Hawaiian Department I made a survey with reference to possible defense measures to enable the civilian population to meet any emergency which might arise. I had been asked to speak to the Chamber of Commerce on Army Day, April 6th, and decided that this day was the best opportunity to obtain publicity, as practically all the important business men of Oahu were present on this occasion. I proposed the following items of prime importance:

1. Production and storage of food.
2. Organization of doctors and nurses for care of injured and wounded.
3. Organization of an auxiliary to the police force to guard utilities and prevent sabotage.
4. Preparation of plans and provision for evacuation of women and children and preparation of shelters for workers in the vicinity of central industries.

(For complete remarks on this occasion, see Exhibit "10".)

Production and storage of food: As a result of my talk and support by the papers and certain men of importance in the community, the storage of food in the pantry of the home was put into effect at once, and the purchases from the retailers increased about 20% during the first month.

For some years a study had been made of food production required and possible in the islands. A committee completed this work, and made definite assignment of acreage and crops to all plantations on the Islands. Plantation managers and the five big companies which act as factors for the various plantations all agreed to this plan. Necessary implements for changing from cane and pine-apples to truck gardening were listed for each plantation. Orders for seed for planting the first crop were placed with firms in the mainland, orders to be filled upon telegraphic advice.—Exhibit "1P".

On December 10th, after completion of the inventory of food on hand, a meeting was held with the Presidents of the five big companies and of the Governor's Food Committee. The District Engineer was directed to purchase the seed and equipment at once, as it was believed the matter could be handled in less time in this manner instead of having each plantation make purchases.

The committee on storage of food determined the articles and tonnage of the essential elements of diet necessary to provide for the civil population for six months. The cost of these items was estimated to be \$2,500,000 for human consumption and \$900,000 for feed for dairy cattle and poultry. This matter was taken up with the War Department.

Governor Poindexter and Delegate Sam King gave the storage of food their full support. However, the item was eliminated by the Bureau of the Budget and no action was gotten through Congress. The purchase of this emergency food reserve by the Department of Agriculture and the allocation of shipping therefor was authorized December 17th. Recent press dispatches indicate that the President has made an allotment for food production.

Organization of Doctors and Nurses for care of injured and wounded: The Medical Society of Honolulu got squarely behind my effort to prepare the doctors and

2978 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

nurses for an emergency. Twenty (20) civilian-aid station groups were organized and have had considerable practice in setting up their stations. They actually functioned efficiently on December 7th. Sixteen (16) surgical teams were organized. They started reporting at 9:00 A. M. December 7th, and by 9:30 all were employed. They are representative of the leading surgeons, anesthetists, etc., in the city. The regular operating staff at Tripler General Hospital was operating at 8:45 A. M.

After several conferences the Red Cross agreed to purchase and store in Honolulu \$200,000.00 worth of medicines and surgical supplies and equipment. Much of the equipment and supplies had been received prior to December 7th.

Buildings suitable for hospitals were surveyed, and many of these have actually been equipped and operated since December 7th.

Organization of auxiliary police force: The organization of an auxiliary police force was effected and placed under the command of Major Douglas King by the Mayor of Honolulu. This force was given some training in taking over leading utilities and the use of firearms. It proved to be a very efficient force immediately after the raid.

Auxiliary fire fighters and fire wardens have been organized. Requests for fire-fighting equipment have been made to the Office of Civilian Defense, and also sent direct by the Governor to the same organization.

[45] *Evacuation and shelters:* Detailed plans were drawn for evacuation camps, for trenches in parks, schools, etc., and for splinter-proof shelters in the vicinity of public utilities. A request for \$2,800,000 for construction of these camps and shelters was made through the War Department and also direct by Governor Poindexter. The funds were not provided until after the attack December 7th. Since that date the President has made funds available to the Governor of the Territory of Hawaii for this purpose.—Exhibit "1Q"

M-DAY BILL

At the request of the Senate of the Territory of Hawaii I appeared before that body and explained the value and the necessity for the passage of the M-Day bill. The passage was effected in the next few days and the measure was signed by the Governor. The bill enabled the Governor to organize emergency committees and carry out many things of great benefit in the medical work, evacuation and police work immediately following the attack on December 7th.

LETTERS FROM CIVILIANS WITH REFERENCE TO MY EFFORTS TO IMPROVE CIVILIAN DEFENSE

The following copies of letters have been received: Exhibit "1R"

HONOLULU, T. H., December 22, 1941.

The PRESIDENT, *The White House, Washington, D. C.*

SIR: We, the undersigned, representing substantial business and social organizations in Hawaii, and having had for many years in many ways a vital interest in the armed forces stationed in Hawaii, do hereby wish to express our sincere appreciation of the services rendered to this Territory and to our Nation by Lieutenant General Walter C. Short.

We have found him at all times to be most cooperative and furthermore he has exercised a vigorous leadership in causing this community to prepare for an emergency such as exists at present. Almost a year ago he laid out a plan for this purpose and has taken all steps practicable toward carrying out such plan.

General Short's thorough foresight and his forceful presentation of his ideas to our "Territorial Legislature, to our local officials, and to our community in general have been very largely responsible for (a) the enactment of a sound "M-Day" Bill; (b) for the provision of a Territorial Guard; (c) for the de- [46] cision to increase stored food and to produce food; and (d) for the prevention of sabotage. He has shown a correct and sympathetic attitude toward the problems of the civil community in assuring cooperation of civilians.

He has maintained a high morale in his Command and has conducted "alerts" from time to time. He has proceeded with preparing the troops and with plans,

now looking for financing from federal funds, for adequate and safe storage of sufficient supplies and equipment of all sorts for their use in a probable emergency.

We are encouraged by the fact that a committee has been appointed to go into various phases of the entire case, believing that the excellent men you have selected will render a just report, fair to all concerned.

Meanwhile, we wish to express to yourself and to all concerned our high esteem and our full confidence in the character and ability of General Walter C. Short as a citizen and as an officer, whatever his assignment may be.

This letter is prepared without the knowledge or consent of General Short or any other officials, merely in our hope that no unwarranted discredit may accrue to the record of such a conscientious and able officer, through adverse publicity or otherwise. This concern is in no way lessened by our vital interest in the adequate defense of Hawaii and our Nation.

With very best respects and wishes, we are

Yours very truly,

Lester Petrie, City of Honolulu, Mayor; C. R. Hemenway, President, Hawaiian Trust Co., Ltd.; A. L. Dean, Vice-President, Alexander & Baldwin, Ltd.; Walter F. Dillingham, President, Oahu Railway & Land Co.; F. D. Lowrey, President, Lewers & Cook, Ltd.; H. H. Warner, Asst. Food Administrator, O. C. D.; J. B. Poindexter, Governor of Hawaii; S. B. Kemp, Chief Justice, Supreme Court; T. G. S. Walker, Director, Civilian Defense for Oahu; John E. Russell, President, Theo H. Davies & Co., Ltd.; George S. Waterhouse, Ex. Vice-President, Bishop National of Hawaii and Honolulu; Cyril F. Damon, Ex. Vice-President, Bishop Trust Co., Ltd.; Briant H. Wells, Executive Vice-President, Hawaiian Sugar Plants Association; H. A. Walker, President, American Factors, Ltd.; S. M. Lowrey, Treasurer, American Factors, Ltd.; P. E. Spalding, President C. Brewer & Co., Ltd.; Frank E. Midkiff, Trustee, Bernice P. Bishop Estate; Edouard R. L. Doty; Terr. Director of Civilian Defense; James Winne, Mgr. Mdse. Dept., Alexander & Baldwin, Ltd. (now acting as Food Administrator and Supply Officer).

C. C. to General Walter C. Short.

[47]

MAJOR DISASTER COUNCIL

CITY AND COUNTY OF HONOLULU

Office of the Director, Island of Oahu

HONOLULU, HAWAII, December 20, 1941.

Lt. General WALTER C. SHORT,
Fort Shafter.

DEAR GENERAL SHORT: Please allow me to express my sincere regret that our contact through Civilian Defense Plans has terminated.

It was greatly due to your help and backing that our Civilian Organizations were so far advanced that they were able to function so splendidly during the attack.

You will always be able to recollect that your determination to have our Civilian Groups Prepared saved many lives of our Sailors and Soldiers through the organized effort of our Civilian Defense Medical committee and the many trucks that we had ready to be turned into ambulances at a minute's notice.

Please be assured that you will carry the sincere thanks and Aloha of your many friends here who realize the distress you saved by urging and helping us to be prepared.

Yours very sincerely,

(s) T. G. S. Walker,
T. G. S. WALKER,
Director, Civilian Defense, Island of Oahu.

[47a]

SEAL OF THE TERRITORY OF HAWAII

TERRITORY OF HAWAII

Executive Chambers

HONOLULU

23 DECEMBER 1941.

Lieutenant General WALTER C. SHORT,

Fort Shafter, T. H.

MY DEAR GENERAL SHORT: Having noted in the public press that an investigation is being made as to the military preparedness of the Army and Navy in Hawaii on December 7, 1941, I believe it appropriate that I make to you a statement as to the state of preparedness of the civil communities of these Islands for war when they were so insidiously and treacherously attacked on December 7, 1941.

The citizens of the Hawaiian Islands have always appreciated that these Islands were important to National Defense from a military standpoint, but it has been only since your arrival in these Islands on February 5, 1941 that it has been brought home to the civil population the importance of the part it would play in the event of a war in the Pacific. On December 7th, the citizens of these Islands met the hour of their test in such a manner as to make me proud to be the Chief Executive of these Islands. Your foresight in urging the population to prepare to meet the possible vicissitudes of war and the joint efforts of the Army and civil population in planning and preparing for this emergency was magnificently rewarded.

It may be of interest to point out in detail some of the plans and preparations which bore fruit on December 7, 1941:

(1) *The enactment of the Hawaiian Defense Act* by a special session of Legislation called for that purpose. This legislation permits a mobilization of the entire civil economy of the Islands in the interest of National Defense or in the event of disaster. By virtue of this act, civilian [47b] defense was planned and many of its phases were brought to such a point of preparation that they were able to go into action immediately and to function effectively on December 7, 1941.

(2) *The production and conservation of food:* Householders were persistently urged to stock their shelves in canned food. It is estimated that this resulted in increasing the available food supply of the Hawaiian Islands by more than twenty percent. Federal appropriation was requested for procurement and storage for food reserve. This appropriation has, since December 7, 1941, been authorized. By agreement with plantation owners, plans were made for the procurement and storage of seed and the planting of certain large areas with quick growing food crops. Agreements were also made for the growing, in normal times, of these crops not usually grown in marketable quantities. In furtherance of this plan, the War Department was induced to permit the purchase of Island grown potatoes for the use of the Army although the price was above that of mainland potatoes. In anticipation of the receipt of reserve supplies of food asked for in the emergency, the Army supported a certificate of necessity for building an adequate warehouse to meet these needs. This warehouse is now available for the storage of food supply when it arrives.

(3) *The medical facilities* for the care of the injured and wounded during any disaster was one of the first things accomplished by the civilians of these Islands for an emergency. This resulted in mobilizing the entire medical profession of the Islands with all its medical facilities. Approximately three thousand persons were given training and instruction in First-Aid as required by the Red Cross. The persons thus trained assisted in carrying out the arduous tasks of evacuation. Twenty First-Aid units were organized, each unit consisting of personnel of about one hundred and twenty. An ambulance corps of one hundred and forty improvised ambulances were organized. The performance of their tasks by these groups was one of the highlights of the civil defense efforts on December 7, 1941.

(4) *Plans for the evacuation of women and children and the [47c] preparation of shelters* for workers in essential industries had reached a high state of perfection on December 7, 1941, and the evacuation of women and children from areas attacked was accomplished in a most admirable manner.

(5) *An auxiliary police force* to guard utilities and to prevent sabotage was organized at an early date in our preparation and it was able to function instantly when called upon to do so on the morning of December 7th. Their work of this force was exceptional and excellent.

(6) *Legislation authorizing a home guard* was enacted at the special session of the Territorial Legislature. It was well planned and so organized that 1400 of such home guardsmen could and were placed on duty thereby relieving members of the Army for other military duty.

(7) *There were many other matters* too numerous to detail here which were planned and accomplished at your instigation. Important among these was the bringing home to the public the urgent necessity for cooperation and public service in times of emergency.

All of the foregoing required tremendous effort on the part of the local authorities, the citizenry and military authorities. All such efforts have been rewarded since December 7, 1941, in that Territorial and City Governments and all phases of the public welfare have overcome all obstacles and have operated smoothly as a direct result of prior planning and training.

It is my belief that the public has confidence in the military and civil authorities. The fact that the Japanese Government has seen fit to inflict a treacherous attack has not in any way diminished the faith of this community in your demonstrated abilities. I wish to state that the magnificent way in which the Territory of Hawaii met its problem in its crucial hour was in a large measure due to your foresight. I am deeply grateful for your efforts on behalf of the Territory.

You are at liberty to use this letter in any way which you see fit. THIS IS A TRUE COPY.

Very sincerely yours,

(S) J. B. POINDEXTER,
Governor of Hawaii.

L. W. TRUMAN,
Captain, Infantry.

[48] I have presented many of my actions, both with reference to the military defense of the islands and the preparations of the civil community for defense, to show that I have taken both a very active and an intelligent part in this work from the time of my arrival in the Hawaiian Department.

I should be very glad if this Committee would see fit to call before it a number of officers of my command, preferably from officers of high enough rank to know what I have accomplished, and from staff officers who are familiar with the work that has been carried out during the past ten months. I would also like very much to have the Governor and some of the leading business men called before the Commission to tell what the civil community thinks of the work that I have done over the past ten months.

CONCLUSIONS

1. The radiogram from the War Department thru CINCUS fleet UCS of October 16th emphasized that measures taken by me during the grave situation of the Japanese negotiations should not disclose strategic intention nor constitute provocative actions against Japan.

The radiogram of November 27th reiterated that action should be carried out so as "not repeat not to disclose intent", not alarm civil population, and avoid unnecessary publicity.

When the War Department was notified that the Hawaiian Department was alerted against sabotage it not only did not indicate that the command should be alerted against a hostile surface, sub-surface, ground or air attack, but replied emphasizing the necessity for protection against sabotage and subversive measures. This, taken in connection with the two previous radiograms mentioned, indicated to me a tacit consent to the alert against sabotage ordered by the Hawaiian Department.

2. The Hawaiian Department is not provided with an agency for locating enemy ships in various parts of the world. Such information as it may acquire on this subject must be obtained from the Fourteenth Naval District or from the War Department.

The "Joint Coastal Frontier Defense Plan, Hawaiian Coastal Frontier" places upon the Commandant of the Fourteenth Naval District the responsibility for distant reconnaissance. Annex # 7 to the "Joint Coastal Frontier Defense Plan" provides that when naval forces are insufficient for long distance patrol and search operations and army aircraft are made available, these will be under the tactical control of the naval command during search operations. That means that the army planes receive their missions and all instructions from the naval commander and carry out the search as he deems necessary in order to carry out his responsibility for distant reconnaissance.

2982 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[49] During the period November 27th to December 6th, the Navy made no request for army planes to participate in distance reconnaissance. To me this meant that they had definite information of the location of enemy carriers or that the number unaccounted for was such that naval planes could make the necessary reconnaissance without the assistance from the army. During this period I was in frequent conferences with the Commander in Chief of the United States Fleet and the commandant of the Fourteenth Naval District, and at no time was anything said to indicate that they feared the possibility of an attack by the Japanese by air. In fact, the sentiment was expressed by a naval staff officer that there was no probability of such an attack. With a large part of the United States Navy in Hawaiian waters and with their sources of information, I was convinced that the Navy would be able either to intercept any carrier attempting to approach Oahu or at least to obtain such information from task forces or by reconnaissance as to make them aware of the presence of carriers in the Hawaiian waters and of the possibility of an air attack.

3. Action of the War Department on December 5th and as late as 1:30 A. M., Eastern standard time, December 7th, in dispatching planes from the mainland to Honolulu without ammunition indicated that the War Department did not believe in the probability of an early Japanese attack upon Honolulu.

I felt that I had a right to expect the War Department to furnish me by the most rapid means possible information should a real crisis arise in Japanese relations. I did not expect that when the crisis arose the desire for secrecy would be considered more important than the element of time. Had the message in regard to the Japanese ultimatum and the burning of their code machines been given me by telephone as an urgent message in the clear without loss of time for encoding and decoding, etc., I, in all probability, would have had approximately two hours in which to make detailed preparations to meet an immediate attack.

4. I feel that my work in the Hawaiian Department should be judged by my activities throughout the complete period from the assumption of command on February 7, until my relief upon December 16th. I believe that any careful examination of my work during that period will prove that I have worked very seriously at the job and have accomplished measures of very considerable importance. I do not see how I could better have carried out what appeared to be the desires of the War Department unless I was supposed to know more than the War Department about the danger of Japanese attack and more than the Navy Department about the location of the Japanese carriers. To have taken more steps in preparation against a Japanese attack than I did would have alarmed the civil population and caused publicity contrary [50] to War Department instructions. I do not believe that I should be found guilty even of an error in judgment because I did not have the vision to foresee that the War Department would not notify me of a crisis in the least possible time and that the Navy with its large fleet in Hawaiian waters would not be able to carry out its mission of intercepting Japanese carriers, or at least detecting their presence in Hawaiian waters and informing me of the fact.

NOTE FOR COMMANDING GENERAL HAWAIIAN DEPARTMENT:

THE FOLLOWING IS A PARAPHRASE OF A DISPATCH FROM THE CHIEF OF NAVAL OPERATIONS WHICH I HAVE BEEN DIRECTED TO PASS TO YOU QUOTE:

Japanese cabinet resignation creates a grave situation x if a new cabinet is formed it probably will be anti-American and strongly nationalistic x if the Konoye cabinet remains it will operate under a new mandate which will not include rapprochement with the United States x either way hostilities between Japan and Russia are strongly possible x since Britain and the US are held responsible by Japan for her present desperate situation there is also a possibility Japan may attack these two powers x view of these possibilities you will take due pre-

cautions including such preparatory deployments as will not disclose strategic intention nor constitute provocative actions against Japan x

SECTION I—GENERAL

1. **PURPOSE.**—The purpose of a "Standing Operating Procedure" is stated in paragraph 159, FM 100-5, Field Service Regulations, Operations, and paragraph 56, FM 101-5, Staff Officers' Field Manual.

2. **UNIT PROCEDURES.**—Conforming to the Department Procedure, subordinate units and staff sections will develop appropriate Standing Operating Procedures.

3. **SHORT TITLE.**—"SOP HD" will signify this Standing Operating Procedure.

4. **DEPARTMENT HEADQUARTERS.**—Department Headquarters may operate either as a whole or in two groups. When divided, the headquarters will consist of a forward and a rear echelon, the composition of which ordinarily will be as follows:

a. **FORWARD ECHELON.**—

Commanding General and Aides
General Staff (less G-1 and G-5)
Secretary to General Staff
Engineer Officer
Signal Officer
Chemical Officer
Ordnance Officer
Surgeon
Headquarters Commandant
Provost Marshal.

b. **REAR ECHELON.**—

G-1
G-5
Special Staff (less those in forward echelon).

5. **TACTICAL PRINCIPLES.**—See FM 31-10, Coast Defense. The chief tactical principles applicable to the problem of the defense of OAHU and the air fields on the outlying islands are as follows:

- a. Complete organization of the ground
- b. Position to be held lightly
- c. Large reserves, held mobile, with motor transportation sufficient to transport them
- d. Automatic counter-attack.

6. **SECURITY.**—Every unit is responsible for its security at all times from hostile ground or air forces. See paragraphs 233 to 273, inclusive, FM 100-5.

7. **LIAISON.**—a. **OFFICERS.**—During all operations and alerts, a liaison officer with motor transportation will be sent from each of the following units to Department Headquarters and will remain thereat except when on a mission to their own headquarters:

24th Infantry Division
25th Infantry Division
[2] Hawaiian Coast Artillery Command
Hawaiian Air Force
86th Observation Squadron
Each Department Reserve Unit.

b. **UNITS.**—Both lateral and vertical liaison are mandatory. The responsibility therefor is from right to left and from front to rear. Combat teams operating in areas where coast artillery group stations are in operation will establish liaison with those stations.

8. **ORDERS.**—a. The Department Commander will issue orders covering the action of the Infantry Divisions, the Hawaiian Air Force, the Hawaiian Coast Artillery Command, Department Reserve units and all attached troops.

b. Orders issued by the Department (except as in c below) will be brief written field orders with an operation map. Circumstances may require the issuance of an oral order, but this will be confirmed later in writing.

¹ Pages referred to are indicated by italic figures enclosed by brackets and represent pages of original exhibit.

c. Fragmentary orders, oral or written, may be issued when appropriate. Copies of the Department Commander's decision or directives, together with a roughly sketched operation map, will be sent by staff officers to lower units as soon as issued in order that plans may be initiated prior to receipt of the field order from the Department.

d. To expedite issue and to conserve time, unit commanders and staff officers will dictate their decisions, directives, plans and orders. All commanders and staff officers will perfect themselves in the dictation of orders. Competent stenographer-clerks and draftsmen will be trained within each headquarters.

9. **MOVEMENT.**—a. In general, all troops will be moved by motor. The maximum space in trucks will be utilized for the troops (standing if necessary) since all movements are necessarily for short distances.

b. Trucks will not close up and every effort will be made to avoid halting in the open. Maximum use will be taken of overhead cover, and vehicles either in bivouac or assembly areas will always be dispersed when in the open, and will be dispersed to the maximum extent practicable when in concealed positions.

c. In tactical movements, vehicles will be maintained at maximum speed authorized by law, consistent with safety. (This may be satisfactorily accomplished by restricting the leading vehicle to 10 miles per hour less than the maximum authorized; the others, not exceeding the maximum authorized speed).

d. All tactical movements in daylight will be by infiltration, FM 25-10, the distance between vehicles being not less than 300 yards. Administrative marches will be made with not less than safe driving distance between vehicles, or any distance greater than safe driving distance which will facilitate the movement (paragraph 31, FM 25-10). When necessary, officers' control points and route markers (paragraph 94, FM 25-10) will be utilized.

e. All movements under Alert No. 1 will be administrative.

f. Motor vehicles operating at night, at the discretion of local commanders, will be (1) in convoy with standard blackout or blue lights with a shielded tail light on all vehicles, or (2) in the case of convoys traveling closed up, with standard blackout or blue lights on leading vehicle and a shielded tail light on the rear vehicle, and no lights on the others, or (3) no lights when operating on *one-way* secondary roads, and cross-country, on military reservations and leased lands. On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic.

[1] g. Trucks attached to a unit for a specific mission will revert to control of the parent unit when the specific mission has been accomplished.

10. **ANTI-AIRCRAFT DEFENSE.**—a. Antiaircraft defense is a responsibility of every unit. See paragraphs 261-273, FM 100-5.

b. All Infantry units not occupying front line positions will have their automatic weapons habitually in readiness for antiaircraft defense, and all other units will be prepared likewise to engage hostile aircraft.

c. On marches, all small arms suitable for use against aircraft will be in readiness for action. When enemy air action is imminent trucks normally will halt, troops will detruck, disperse and fire on enemy planes.

d. All unit commanders will be held responsible for the following:

(1) Maintenance of air guards to give timely warning of the approach of hostile aviation.

(2) Adoption of necessary measures to prevent hostile observation and aerial photography through advantageous use of terrain, utilization of cover, and use of camouflage.

(3) Reduction of vulnerability to air attack and observation by dispersion of personnel and materiel when in bivouac or in position and by increased speed during movement.

11. **INSTALLATIONS AND ALARM SYSTEM.**—All important installations not protected by the Territorial Home Guard will be guarded by troops. An adequate alarm system will be established in connection therewith.

12. **GUIDES.**—a. In case of a relief, guides from the relieved organization will meet the incoming unit and remain with it until ordered back to their organization by the commander of the incoming unit.

b. Whenever units are ordered to another sector for support or attachment, the sector commander will provide the necessary guides to assist the supporting or attached units.

SECTION II—ALERTS

13. All defense measures are classified under one of the three (3) Alerts as indicated below. Operations under any Alert will be initiated by a Department order, except in case of a surprise hostile attack. See paragraph 15 f (8) below.

14. **ALERT NO. 1.**—*a.* This alert is a defense against acts of sabotage and uprisings within the islands, with no threat from without.

b. At DEPARTMENT HEADQUARTERS, all General and Special Staff Sections will continue with their usual duties at their present stations, pending further orders.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

[4] (2) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(3) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 14 h (2) below

Command and Fire Control Cable System, see inclosure No. 1

Railway and Highway Bridges, see inclosure No. 2

Water supply for SCHOFIELD BARRACKS

Radio Station at PUU MANAWAHUA

WAIAU Generating Plant

Telephone Exchanges at WAIPAHU, WAHIAWA, WAIALUA (in HALEIWA), LAIE and KANEOHE

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO-WAHIAWA-SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station—BELLOWS FIELD, see inclosure No. 3.

Cold Storage Plant in WAHIAWA

Pumping Stations at MOANALUA and KAPAHULU.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) See Territorial Home Guard, paragraph 14 j below.

e. The HAWAIIAN COAST ARTILLERY COMMAND will:

(1) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(2) Protect all vital installations on posts and reservations of the command.

(3) Protect the Radio Beacon on Sand Island.

(4) Provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

f. The HAWAIIAN AIR FORCE will:

(1) Protect all vital installations on posts on OAHU garrisoned by air forces

(2) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 14 g below.

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, in addition to his normal duties, assisted by the Division Provost Marshals, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

[5] (3) Establish liaison with the local police force.

i. The STATION COMPLEMENTS of HICKAM, WHEELER and BELLOWS FIELDS, under command of the Hawaiian Air Force, will assist in the protection of all vital installations on their respective posts.

j. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Com-

2988 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

manders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 14 *d* (3) and *g* above. Instructions will be issued.

15. **ALERT NO. 2.**—*a.* This alert is applicable to a condition more serious than Alert No. 1. Security against attacks from hostile sub-surface, surface, and air-craft, in addition to defense against acts of sabotage and uprisings, is provided.

b. At DEPARTMENT HEADQUARTERS, only the G-2 and G-3 Sections will be required to operate on a 24-hour basis. All other sections of the General and Special Staffs will continue with their normal schedule.

c. DEPARTMENT TROOPS will carry on their normal training, pending instructions from this Headquarters.

d. Each INFANTRY DIVISION will:

(1) Suppress all civil disorders, including sabotage, in its assigned sector.

(2) Maintain available all units at fifty percent (50%) of their present strength, except those required under (3), (4) and (5) below.

(3) Maintain one (1) infantry battalion with motor transportation sufficient to transport it, prepared to move on one (1) hour's notice.

(4) Protect the SCHOFIELD BARRACKS Reservation and all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard. The following are among the important ones:

Police District No. 1, see paragraph 15 *h* (2) below

Command and Fire Control Cable System, see inclosure No. 1

Railway and Highway Bridges, see inclosure No. 2

Water supply for SCHOFIELD BARRACKS

Radio Station at PUU MANAWAHUA

WAIACU Generating Plant

Telephone exchanges at WAIPAHU, WAHIAWA, WAIALUA (in HALEIWA), LAIE and KANEOHE

Electric sub-stations at WAHIAWA, WAIALUA, KAHUKU, KAILUA, WAIPIO and EWA, and electric power lines from WAIPIO-WAHIAWA—SCHOFIELD BARRACKS, inclusive, and to FORT BARRETTE, exclusive, from KOOLAU switch station—BELLOWS FIELD, see inclosure No. 3

Cold Storage Plant in WAHIAWA

Pumping Stations at MOANALUA and KAPAHULU.

(5) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(6) Place 240mm howitzers in position, establish the necessary guards and, when directed, place ammunition at positions.

(7) Release Field Artillery units manning seacoast armament (155mm guns) to Hawaiian Coast Artillery Command. See paragraph 15 *e* below.

(8) See Territorial Home Guard, paragraph 15 *i* below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Field Artillery, will:

(1) Occupy initial seacoast and antiaircraft defense positions, except that railway batteries will remain at FORT KAMEHAMEHA or where emplaced.

(2) Release the 53d AA Brigade to the Interceptor Command for operational control.

(3) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

(4) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 15 *k* (1) below.

(5) Support Naval forces within range of seacoast armament.

(6) Prevent approach of and landing from hostile vessels.

(7) Coordinate all seacoast intelligence agencies.

(8) Coordinate seacoast defense with the Inshore Patrol.

(9) Protect the Radio Beacon on Sand Island.

(10) Provide Army personnel required to operate the Harbor Control Post.

f. The HAWAIIAN AIR FORCE will:

(1) Maintain aircraft and crews in condition of readiness as directed by this headquarters. See paragraph 17.

- (2) Release without delay all pursuit aircraft to the Interceptor Command.
- (3) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.
- (4) Disperse bombers with crews.
- (5) Disperse pursuit planes with crews to bunkers.
- (6) Protect all vital installations on posts on OAHU garrisoned by air forces.
- (7) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 15 g below.
- (8) In case of surprise hostile attack:
 - (a) Release to Navy for operational control all bombers in condition of readiness "A". The bomber commander will report to the Commander of Patrol Wing TWO.

[7] (b) Receive all available shore based Naval and Marine Corps fighter planes in appropriate condition of readiness and release them to the Interceptor Command for operational control.

g. The DISTRICT COMMANDERS, assisted by the air corps detachments within the districts, will:

Defend the air fields and vital installations thereat against acts of sabotage, hostile attacks, and maintain order in the civil community.

h. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

- (1) Regulate traffic on OAHU.
- (2) Assist the 25th Infantry Division in posting guards on vital installations.
- (3) Establish liaison with the local police force.
- (4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.
- (5) Be prepared to establish facilities for gathering and caring for refugees.
- (6) Protect FORT SHAFTER. See paragraph 15 k (1).

i. The DEPARTMENT SIGNAL OFFICER will:

- (1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.
- (2) Insure that joint Army-Navy communications are in readiness for immediate employment.

j. The INTERCEPTOR COMMAND will:

Coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and Marine Corps AA Artillery), the Aircraft Warning Service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control, to include:

- (1) Arrival and departure of all friendly aircraft.
- (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.
- (3) Transmission of appropriate warnings to all interested agencies.

k. STATION COMPLEMENTS:

(1) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(2) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

[8] 1. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 15 d (4) and g above. Instructions will be issued.

16. ALERT NO. 3.—a. This alert requires the occupation of all field positions by all units, prepared for maximum defense of OAHU and the Army installations on outlying islands.

b. At DEPARTMENT HEADQUARTERS:

- (1) All sections of the forward echelon (see paragraph 4 a) will occupy their stations at forward command post, prepared to operate on a 24-hour basis.
- (2) All sections of the rear echelon (see paragraph 4 b) will continue their usual duties at their present stations. Blackout instructions will be complied with.

2990 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

c. DEPARTMENT TROOPS will remain in condition of mobile readiness at their permanent stations, pending instructions from this headquarters.

d. Each INFANTRY DIVISION will:

(1) Defend its assigned sector on OAHU.
(2) Protect all vital installations (except those on garrisoned Army and Navy Reservations) in its assigned sector, not protected by the Territorial Home Guard.

(3) Release all available Bands to the Commanding Officer, SCHOFIELD BARRACKS.

(4) The 25th Infantry Division will assist the Navy in guarding the pumping stations at AIEA and HALAWA.

(5) Place 240mm howitzers in position.

(6) Release Field Artillery units manning seacoast armament (155mm guns) to Hawaiian Coast Artillery Command. See paragraph 16 e below.

(7) See Territorial Home Guard, paragraph 16 m below.

e. The HAWAIIAN COAST ARTILLERY COMMAND, and attached Detachment Field Artillery, will:

(1) Occupy initial seacoast and antiaircraft positions.
(2) Support Naval forces within range of seacoast armament.
(3) Prevent approach of and landing from hostile vessels.
(4) Support the Infantry Divisions.
(5) Coordinate all seacoast intelligence agencies.
(6) Coordinate seacoast defense with the Inshore Patrol.
(7) Provide the Army personnel required to operate the Harbor Control Post.
[9] (8) Release the 53d AA Brigade to the Interceptor Command for operational control.

(9) Protect all vital installations on posts and reservations of the command, except FORT SHAFTER. For FORT SHAFTER, see paragraph 16 l (2) below.

(10) Protect all seacoast and antiaircraft armament, searchlights, observation and fire control installations, and other elements of the seacoast and antiaircraft defense.

f. The HAWAIIAN AIR FORCE will:

(1) Destroy enemy aircraft.
(2) Carry out bombing missions as directed.
(3) Cooperate with Naval air forces.
(4) On OAHU, defend all posts garrisoned by air forces against sabotage, air and ground attacks.
(5) Assist in defense of air fields on outlying islands by cooperation of local base detachments with District Commanders. See paragraph 16 h below.
(6) Arm all planes, except that normally bombs will not be loaded on ships dispatched to outlying islands. See paragraph 25 e (8).
(7) Prepare aircraft for dispatch to fields on outlying islands and upon arrival thereat, disperse on fields.

(8) Disperse bombers with crews.

(9) Disperse pursuit planes with crews to bunkers.

(10) Perform observation, command and photographic missions.

(11) Release without delay all pursuit aircraft to the Interceptor Command.

g. G-5 will be prepared to establish the following:

(1) A Food Administration.

(2) A Labor Procurement Service.

h. The DISTRICT COMMANDERS of HAWAII, MAUI (includes MOLOKAI) and KAUAI Districts, assisted by the air corps detachments present within the districts, will:

Defend the air fields against acts of sabotage, hostile attacks, and maintain order in the civil community.

i. The DEPARTMENT PROVOST MARSHAL, assisted by the Division Provost Marshals, in addition to his normal duties, will:

(1) Regulate traffic on OAHU.

(2) Assist the 25th Infantry Division in posting guards on vital installations.

(3) Establish liaison with the local police force.

(4) Be prepared to assist civilian authorities in all Air Raid Precautions including blackout, radio silence and evacuation of civilians from dangerous areas.

(5) Be prepared to establish facilities for gathering and caring for refugees.

[10] (6) Protect FORT SHAFTER. See paragraph 16 l (2) below.

j. The INTERCEPTOR COMMAND will coordinate and control the operations of pursuit aircraft, antiaircraft artillery (including available Naval and

Marine Corps AA Artillery), the aircraft warning service, and attached units, and will provide for the coordination of antiaircraft measures of units not under military control to include:

(1) Arrival and departure of *all* friendly aircraft.
 (2) The coordination of the antiaircraft fire of Naval ships in PEARL and/or HONOLULU HARBORS.

(3) Transmission of appropriate warnings to all interested agencies.

k. The DEPARTMENT SIGNAL OFFICER will:

(1) Insure occupation of all battle stations by the Aircraft Warning Service and then release it to the Interceptor Command.

(2) Insure that joint Army-Navy communications are in readiness for immediate employment.

(3) Be prepared to assume control over essential civilian communications.

l. STATION COMPLEMENTS.—

(1) The SCHOFIELD BARRACKS Complement will protect all vital installations on the Schofield Reservation.

(2) The FORT SHAFTER Complement, under the supervision of the Department Provost Marshal, will protect all vital installations on FORT SHAFTER and, in addition thereto, will provide a guard for the rear echelon of Department Headquarters and Tripler General Hospital.

(3) The HICKAM, WHEELER and BELLOWS FIELDS Complements, under command of the Hawaiian Air Force, will assist in the defense of their respective posts against sabotage, air and ground attacks.

m. TERRITORIAL HOME GUARD.—Upon the formation of the Territorial Home Guard, recently authorized by the Territorial Legislature, it is anticipated that this organization will relieve the Infantry Divisions and the District Commanders of responsibility for the protection of all vital installations, except the Command and Fire Control Cable System and those installations on Army and Navy Reservations. See paragraph 16 d (2) and h above. Instructions will be issued.

SECTION III—CONDITION OF READINESS FOR AIRCRAFT

17. Condition of readiness for aircraft will be prescribed by a combination of a letter and a number as indicated in paragraphs a and b below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of operational readiness prescribed for that part.

a. MATERIAL READINESS.—

A—All assigned operating aircraft available and ready for a task.

[1] B—One-half of all aircraft of each functional type available and ready for a task.

C—Approximately one-quarter of all aircraft of each functional type available and ready for a task.

D—Approximately one-eighth of all aircraft of each functional type available and ready for a task.

E—All aircraft conducting routine operations, none ready for the purposes of this plan.

b. DEGREE OF OPERATIONAL READINESS.—

All times listed in this table are the maximums allowed for the first plane of a unit to be in the air armed and prepared to carry out the assigned task.

1—For pursuit and VF types: Four minutes. Types other than fighters: Fifteen minutes.

2—All types: 30 minutes.

3—All types: One hour.

4—All types: Two hours.

5—All types: Four hours.

SECTION IV—INTELLIGENCE

18. The Intelligence Standing Operating Procedure indicated below will be followed generally where applicable.

19. ESSENTIAL ELEMENTS OF ENEMY INFORMATION.—

a. Will the enemy attempt to destroy or neutralize NAVAL BASES at PEARL HARBOR, at KANEHOE BAY, and air fields on OAHU with the object of denying their use to the UNITED STATES without occupation? If so, will

2992 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

his air attacks be accompanied by Naval bombardment and blockading operations?

b. Will the enemy attempt to capture OAHU by expeditionary forces with the object of utilizing the NAVAL BASES at PEARL HARBOR, at KANEOHE BAY, and air fields thereon? If so, when, where, and with what strength will he make his main attack?

c. Will the enemy attempt to capture any other of the principal islands of the Hawaiian Group with the object of utilizing the air fields and establish bases thereon?

d. Will the enemy military operations be accompanied by acts of sabotage and terrorism on the part of resident sympathizers?

e. Will the enemy utilize local foreign population, local aliens or nationals of foreign origin for sabotage operations, raids to assist landing operations, or other acts of assistance?

20. MEASURES TO OBTAIN INFORMATION.—

a. NAVY.—

(1) Transmit, through the Joint Intelligence Loop, information received from the Offshore and Inshore Patrols, from any escort or attack forces formed, and from any other Naval Ships relative to:

(a) Location, composition, course, and speed of enemy units encountered, with particular reference to location of aircraft carriers and transports.

[12] (b) Indications of landings on any island of the main Hawaiian Group, with particular attention to the number and type of landing boats, and the composition of supporting Naval units.

(c) Indications of attempts to block HONOLULU and/or PEARL HARBORS.

(d) Indications of any hostile aerial activity in strength.

(e) Report damage inflicted on hostile vessels, troops and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately.

(f) Report damage by hostile Naval and air bombardment, incurred or observed. Important damage, including damage to landing fields, and use of chemicals, immediately.

(g) See paragraph 20 c below.

b. ARMY.—

(1) *Hawaiian Air Force.*—

(a) Observe all waters within an area bounded as follows:

By arcs of twenty (20) miles radii with centers at OPANA POINT, MAUI; KAUIKI HEAD LIGHT, MAUI; LAUPAHOEHOE LIGHT, HAWAII; CAPE KUMUKAHI LIGHT, HAWAII; KALAE LIGHT, HAWAII; SOUTH-WEST HEADLAND, KAHOLAWE; LEAHI POINT, NIIHAU; LEHUA ISLAND, NIIHAU; KAILIU POINT, KAUAI; and arc of thirty (30) miles radius with its center at KAHUKU POINT, OAHU, and the tangents connecting these arcs in the order named.

Report location, composition, course and speed of enemy units encountered. Maintain continuous contact with major subdivisions of enemy units. Particular attention to location of aircraft carriers and transports. First contact, material changes of direction, and definite location of aircraft carriers to be reported immediately by Joint Intelligence Loop; thereafter on the hour by department Intelligence Loop.

(b) Report indications of landing on any island, giving location, number, type and formation of landing boats and composition of supporting Naval group. Report, when observed, by Department Intelligence Loop.

(c) Report damage inflicted on hostile vessels, troops, and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately, by Joint Intelligence Loop.

(d) Report damage by hostile naval and air bombardment, incurred or observed by their operations. Important damage, including damage to landing fields, and use of chemicals, immediately, by Joint Intelligence Loop; other damage at 1815 by Department Intelligence Loop.

(e) Report any hostile aerial activity in strength, including number, type, direction and area of attack or observation, by Joint Intelligence Loop.

(2) *86th Observation Squadron.*—

(a) Same as for "HAWAIIAN AIR FORCE"—see 20 b (1) above.

[13] (b) Be prepared to provide, on call, observation for the control of long-range artillery fire.

(3) *Interceptor Command.*—

(a) Report immediately any and all information of hostile air force or surface vessel.

(b) Report, upon completion of action by or with enemy air force, composition of enemy forces, direction of approach, time of action, area attacked, and damage to enemy airplanes.

(4) *Each Infantry Division.*—

(a) Report location, number, type and formation of transports and landing boats and composition of supporting naval group. Report when observed thereafter hourly, on the hour, by Department Intelligence Loop.

(b) Report *enemy front lines* and boundaries between units. Report immediately any significant change. Otherwise report every two hours, on the even hour, by Department Intelligence Loop.

(c) Report location of *own front lines*. Report every two hours, on the even hour, by Department Intelligence Loop.

(d) Report all identifications. Infantry identifications are most important. Report, when observed, by Department Intelligence Loop.

(e) Report indications of landing of artillery, including caliber of same, and tanks. Report, when observed, by Department Intelligence Loop.

(f) Report damage by hostile naval and air bombardment. Important damage immediately; other damage at 1830, by Department Intelligence Loop.

(g) Report time, place, kinds and method of employment of chemicals. Report, when observed, by Department Intelligence Loop.

(h) Report weather and surf conditions on all favorable landing beaches. Report at 0300, 0700, 1200 and 1700 and 2200, by Department Intelligence Loop.

(i) The 25th Division will assign G-2 personnel to assist the Provost Marshal in the examination and questioning of enemy documents and personnel in South Sector.

(5) *Hawaiian Coast Artillery Command.*—

(a) Report immediately, by Department Intelligence Loop, initial contact with enemy units, giving location, composition and course of formation.

(b) Report immediately, by Department Intelligence Loop, when an action is begun by hostile vessels or by the seacoast artillery, giving location of naval vessels, locality being attacked, and units engaged.

(c) Report damage inflicted on hostile vessels, troops, and installations. Damage to aircraft carriers, transports, capital ships, and other important damage immediately, by Joint Intelligence Loop.

(d) Report upon completion of any action, by Department Intelligence Loop, important damage from hostile naval and air [14] bombardment, and report the use of chemicals immediately. Other damage at 1900 by Department Intelligence Loop.

(e) Report, when observed, by Department Intelligence Loop, location, number, type, and formation of landing boats and composition of supporting naval force.

(f) Report, when observed, by Joint Intelligence Loop, indications of attempts to block HONOLULU HARBOR, PEARL HARBOR, or KANEOHE BAY.

(g) Report as soon as practicable important damage to ground installations, including damage to use of chemical agents.

(h) Report visibility at 0400, 0700, 1200, 1700 and 2200, by Department Intelligence Loop.

(i) Any of the above reports may be transmitted by telephone when necessary to avoid delay.

(6) *District Commanders of HAWAII, MAUI and KAUAI Districts.*—Report when observed, by radio to Hawaiian Air Force, thence by Department Intelligence Loop:

(a) Nature of hostile activity, including number, type, direction and area of attack or observation.

(b) Damage by hostile naval and air bombardment.

(c) Location, number, type and formation of landing boats and composition of supporting naval group.

(d) Enemy front lines and boundaries between units.

(e) All identifications. Infantry identifications are most important.

(f) Time, place, kinds and method of employment of chemicals.

(7) *Department Signal Office.*—

Radio intercept and goniometric service. Report when obtained.

c. ALL ELEMENTS OF HAWAIIAN DEPARTMENT.—

(1) Report presence of parachute troops and assemblies of enemy nationals or sympathizers and overt acts of sabotage or terrorism, giving location, time, numbers involved, and probable intentions or damage accomplished.

(2) Report of location of floating or stranded mines, in order that this information may be relayed to the Navy. No other action, i. e., attempts at destruction, than to report location immediately, should be taken.

d. MISCELLANEOUS.—

(1) Transmission of G-2 Information.—

In the absence of specific instructions as to transmission, or in the event of failure or overload of specified channels, G-2 information will be transmitted by direct line, where available, or by the most expeditious routing over the circuits set forth in current Signal Operations Instructions. [15] If wire and radio signal communication are out, important intelligence information will be sent back by any means at hand: Wire circuits of near-by units, motor messenger, commandeered vehicle, any means necessary commensurate with the value of the information.

21. MEASURES FOR HANDLING.—

a. PRISONERS: Examination stations will be located at all Prisoner of War collection points.

b. DOCUMENTS AND CAPTURED MATERIAL.—

(1) Documents will be sent to G-2's of Department or Divisions, with the minimum of delay, by regularly scheduled messenger service.

(2) Reports of captured material will be sent to the same stations by the same means.

(3) Documents and material identifying organizations or indicating the use of chemicals are of major importance. They will be given special priority in shipment to examination stations and will be reported to Department G-2 by the most expeditious means.

(4) Liaison officers from the office of G-2, H. H. D., will be assigned to all Examination Stations, and will assist the Provost Marshal in examining enemy personnel, material and documents, and in determining destination of reports.

c. MAPS.—Maps will be supplied initially by the Department Engineer.

22. REPORTS AND DISTRIBUTION.—

Distribution of reports from Department Headquarters: Summaries of Intelligence at 0800, 1300, 1800 and 2300.

23. THE DEPARTMENT G-2 will:

a. Keep the Commanding General and all interested staff officers informed regarding the enemy situation and of his deductions concerning it.

b. Insure that counterintelligence measures are adequately provided for and adhered to.

c. Establish a counter-espionage service that will not only guard against the subversive activities of the external enemy, but will also enable the Department G-2 to keep the Department Commander constantly advised as to the attitude, trend of thought, and probable course of action of the civil population, particularly that of alien extraction. This service will maintain close liaison with the Department Provost Marshal, with a view to:

(1) Furnishing the Department Provost Marshal with all information gained, through the counter-espionage service of value in the prevention of civil disorders, sabotage and incipient uprisings.

(2) Receiving and evaluating information relative to the internal situation collected by the Department Provost Marshal through his agencies set up for the actual control of the civil population.

d. Collect, evaluate, and disseminate information relative to assemblies of enemy nationals or sympathizers, and overt acts of sabotage and terrorism.

[16] **e.** Prepare propaganda and publicity for the encouragement of the loyalty and support of the civil population, particularly that of alien extraction.

24. G-2 FORMS.—

a. Estimate of the Enemy Situation, see Inclosure No. 4.

b. Periodic Reports, see page 1, Inclosure No. 5. For combat Air Force see page 2, Inclosure No. 5.

SECTION V—ADMINISTRATION

25. SUPPLY (See paragraphs 75-80, FM 100-10).—

a. SUPPLY AREAS.—

(1) Schofield Supply area includes the area of OAHU north and west of a general line extending LAE O KAOIO—PUU KAAUMAKUA—KIPAPA STREAM—KAMEHAMEHA HIGHWAY at (97.9—91.0)—KAMEHAMEHA HIGHWAY—PEARL CITY JUNCTION—PEARL HARBOR ENTRANCE.

(2) The Honolulu Supply area includes the remainder of OAHU and outlying islands.

b. CLASS I SUPPLIES (rations); including QMC class II and IVS.:

Schofield Supply Area—Quartermaster, SCHOFIELD BARRACKS.

Honolulu Supply Area—Hawaiian Quartermaster Depot, HONULULU.

(1) Supplies, for a small unit of an organization, when moved nearby into a different supply area from the parent organization, may be continued thru the parent organization or may be obtained separately from the D. P. for the new supply area as warranted by the situation.

(2) Distribution will be based on consolidated daily strength reports submitted by organizations to the Depot or Quartermaster supplying the area in which the organization is stationed (copy to Dept. QM) by 0800 daily.

(3) Schedules of distribution will be arranged by issuing quartermasters by direct agreement with unit commanders supplied. Distribution schedules will be set up and copies furnished Dept. QM and G-4, H. H. D.

(4) A standard menu ration is established for Alert No. 3.

c. CLASS III SUPPLIES.—

(1) All units leaving their normal posts under any alert will take with them the authorized allowance of gasoline containers filled. Replenishment will be made in the following manner:

(a) Commanding Officer, SCHOFIELD BARRACKS will establish DPs at SCHOFIELD BARRACKS for all units operating in the SCHOFIELD BARRACKS area.

(b) Commanding officers of each post in the Honolulu Supply Area, except MALAKOLE, BELLOWS FIELD and KANEOHE, will establish DPs at their posts for the supply of all units operating in this area. MALAKOLE, BELLOWS FIELD and KANEOHE will establish a DP at their respective posts for the supply [17] of their own units operating in the immediate vicinity of their own post.

(c) In the event units are moved, placing them in another supply area, gasoline will be supplied from the DP nearest the unit, regardless of supply area.

(d) Normally, the supply of gasoline from DPs will be by 5 and 10 gallon drums, rather than filling individual trucks.

(e) Units will furnish personnel for refilling of their containers at the DP. Post Commanders will provide suitable equipment for refilling containers.

(f) 11th Tank Company will draw aviation gasoline from the nearest Air Corps Station.

(g) Replenishment of stocks at posts will be accomplished in the normal manner. Following the period of the maneuvers, necessary monetary adjustments will be made through Department Headquarters.

(h) Class III supplies on outlying islands will be the responsibility of the District Commanders.

d. CLASS II & IV SUPPLIES (except Quartermaster Corps).—

(1) *Medical Supply*:

Schofield Supply Area—Schofield Branch, Hawaiian Medical Depot, SCHOFIELD BARRACKS.

Honolulu Supply Area—Hawaiian Medical Depot, FORT SHAFTER.

(2) *Signal Supply* (except Signal Corps aircraft radio):

Schofield and Honolulu Supply areas—Hawaiian Signal Depot, FORT SHAFTER.

(3) *Signal Supply*—aircraft radio only:

Schofield and Honolulu Supply areas—Hawaiian Air Depot, HICKAM FIELD.

(4) *Chemical Supplies*—all supply areas—Hawaiian Chemical Depot, SCHOFIELD BARRACKS.

(5) *Engineer Supplies*—all supply areas—Hawaiian Engineer Depot, SCHOFIELD BARRACKS, T. H. Distributing points for class IV supplies will include SCHOFIELD BARRACKS, FORT RUGER, FORT KAMEHAMEHA, FORT BARRETTE and North Shore in vicinity of (86.9-04.2). Credits at DP's to major echelon commanders will be announced separately to commanders concerned.

(6) *Water Supply*: Will be secured locally and will be inspected by a medical officer before use except from post and CITY of HONOLULU water systems.

(7) *Air Corps Supply*: All supply areas—Hawaiian Air Depot, HICKAM FIELD and WHEELER FIELD Branch, when so designated, for types of services announced by Commanding General, Hawaiian Air Force.

(8) *Ordnance Supply* (other than ammunition Class V).—

Schofield Supply area—Schofield Branch, Hawaiian Ordnance Depot, SCHOFIELD BARRACKS.

Honolulu Supply area—(General Storage and Shop) Hawaiian Ordnance Depot, HONOLULU.

[18] e. CLASS V SUPPLIES:

(1) Schofield Supply Area—all types—Schofield Branch, Hawaiian Ordnance Depot, SCHOFIELD BARRACKS (See (3) below).

(2) Honolulu Supply Area—all types—Ammunition Storage Area, Hawaiian Ordnance Depot. (See (3) below.)

(3) Aircraft pyrotechnics and bombs, 8-inch railway and 240mm ammunition and chemical ammunition (other than grenades)—Ammunition Storage Area, Hawaiian Ordnance Depot—all supply areas.

(4) Credits of an "initial issue" and of one "unit of fire" are automatically placed at the disposal and under the control of all major echelon commanders whenever an Alert is ordered. Quantities of various types of ammunition included in the "initial issue" and in a "unit of fire" are shown in Inclosures Nos. 6 and 7 herewith. Load of Aircraft Ammunition per airplane is indicated in Inclosure No. 8.

(5) At the time Alert No. 2 or No. 3 is ordered, all units will draw such of their "initial issue" as has not already been drawn, except that for Alert No. 2 the Infantry Divisions will draw initially only 1/5 of the "initial issue" and the balance thereof will be drawn after occupation of positions with their organic and/or sector weapons. Whenever issues cannot be made simultaneously, they will be made according to the following order of priority and according to a schedule to be mutually arranged between the Unit Supply Officer and the Supply Point concerned.

Aircraft bombs and ammunition for aircraft weapons.

Antiaircraft 3", 37mm and Machine Gun ammunition.

Ground machine gun ammunition—all types.

Other small arms ammunition.

All artillery ammunition, less antiaircraft.

(6) At the time Alert No. 1 is ordered, only small arms ammunition included in the "initial issue" will be drawn.

(7) Aircraft bombs will not be issued in "initial issue" but will be held available in bomb storage areas.

(8) Two "units of fire" of bombs and machine gun ammunition will be maintained on outlying islands for each airplane operating therefrom.

f. Dumps and Ammunition Distributing Points will be established as directed by this headquarters.

26. *EVACUATION*.—

a. *PERSONNEL*:

(1) North Sector Division by 24 Medical Bn. to Station Hospital, SCHOFIELD BARRACKS.

(2) South Sector Division by 25 Medical Bn. to Tripler General Hospital except for troops in the area west of the line: PEARL HARBOR CHANNEL—EWA JUNCTION. The latter will be evacuated to Station Hospital, SCHOFIELD BARRACKS.

(3) *Hawaiian Air Force*.—

(a) HICKAM FIELD, by the Surgeon, HICKAM FIELD to Station Hospital, HICKAM FIELD or Tripler General Hospital. [19] Additional ambulances, with drivers and orderlies, will be attached as needed.

(b) WHEELER FIELD and HALEIWA Landing Field, by Surgeon WHEELER FIELD to Station Hospital Schofield. Additional ambulances, with drivers and orderlies will be attached as needed.

(c) BELLOWS FIELD, by Surgeon, BELLOWS FIELD to Tripler General Hospital. Additional ambulances, with drivers and orderlies, as needed.

(d) Air fields on outlying islands, by vehicle to local hospital or by air to Tripler General Hospital or Station Hospital, SCHOFIELD BARRACKS. Collection by respective medical detachment. Details of evacuation to be arranged by the responsible commanders for each field.

(e) HCAC, by the Surgeon, HCAC (collection by respective medical detachments, reinforced if necessary). One ambulance company to be attached to the command prior to combat. Evacuation from the area north and west of the line: PEARL HARBOR Channel—EWA Junction—LA E O KAOIO Point to Station Hospital, SCHOFIELD BARRACKS. Evacuation from the area south and east of this line to Tripler General Hospital.

(f) KAUAI District, MAUI District and HAWAII District to local hospitals as directed by District Commanders under provisions of letter, this headquarters to each District Commander, dated 31 July 1941, subject: "Medical Service."

(g) Elements not included elsewhere: North Sector by 24th Medical Bn., on call; South Sector by 25th Medical Bn., on call.

b. ANIMALS:

(1) North Sector to Veterinary Station Hospital, SCHOFIELD BARRACKS, by provisional Veterinary Detachment attached to Hawaiian Pack Train.

(2) South Sector to Veterinary General Hospital, FORT SHAFTER, by provisional Veterinary Detachment, attached to units having animals.

c. SALVAGE: To supply points designated in paragraph 25 above for services indicated.

d. PRISONERS OF WAR.—

(1) Collecting Points—SCHOFIELD BARRACKS, FORT SHAFTER, FORT RUGER, KANEOHE BAY. To be established and operated by Department Provost Marshal, assisted by Provost Marshals, Infantry Divisions.

(2) Prisoner of War Inclosures—Establishment and operation by Department Provost Marshal, as directed by this headquarters.

27. TRAFFIC.—

The Department Provost Marshal, assisted by the Division Provost Marshals, will regulate traffic on OAHU.

28. MOTOR TRANSPORTATION.—

a. Motor pools will be established by the Infantry Divisions and the Hawaiian Coast Artillery Command. These pools will [20] consist of all available tactical vehicles and administrative vehicles, the latter obtained by reducing to a minimum administrative requirements.

b. The assignment of motor vehicles for one specific purpose will be the exception. All motors will be used to the maximum for all purposes.

c. Current movement and loading tables will be maintained by the Infantry Divisions and the Hawaiian Coast Artillery Command as follows:

(1) Number of vehicles, tactical and administrative in the pool, showing the number of men and amount of impedimenta that can be moved initially into position. See paragraph 9 above.

(2) Number of vehicles, tactical and administrative, subsequent to move into position which are available for movement of reserves, and the number of men which can be moved.

By command of Lieutenant General SHORT:

Walter C. Phillips,
WALTER C. PHILLIPS,
Lt. Col., G. S. C., Chief of Staff.

OFFICIAL:

Wm. E. Donegan,

WM. E. DONEGAN,

Lt. Col., G. S. C., Asst. Chief of Staff. G-3.

Inclosures:

No. 1—Map, Communications Installations.

No. 2—Map, Bridges and Police Districts.

No. 3—Map, Electric Installations.

No. 4—Estimate of Enemy Situation.

No. 5—Periodic Intelligence Report Forms.

No. 6—Allowances of Ammunition.

No. 7—Unit of Fire.

No. 8—Load of Aircraft Ammunition.

Inclosure No. 1

(Inclosure No. 1 is a map of Communications Installations on the Island of Oahu, T. H. as of 7 July 1941. This map is reproduced as Item No. 34 in EXHIBITS-ILLUSTRATIONS to Proceedings of Joint Committee.)

Inclosure No. 2

(Inclosure No. 2 is a map of the Island of Oahu, T. H., showing Police Districts, Railroad Bridges and Highway Bridges. This map is reproduced as Item No. 35 in EXHIBITS-ILLUSTRATIONS to Proceedings of Joint Committee.)

Title
Place
Date and hour

ESTIMATE OF THE ENEMY SITUATION

1. SUMMARY OF THE ENEMY SITUATION.
 - a. Enemy Naval Operations.—Movements (by fleet or groups).
 - b. Enemy land operations.
 - (1) Enemy activities in forward areas and new identifications.
 - (2) Movements, concentrations and establishments in rear areas.
 - (3) Sabotage.
 - (4) Terrain, weather, visibility and surf as they affect the enemy.
2. CONCLUSIONS.
 - a. Enemy capabilities.—An enumeration of lines of action open to the enemy which may affect accomplishment of the mission of the command.
 - (b) (1) A statement of the relative probability of adoption of the foregoing lines of action when such statement can be justified.
 - (2) Reasons justifying any statement made in (1) above.

Chief of section.

PERIODIC REPORTS

No. -----

Maps. (Those needed for an understanding of the report.)

1. ENEMY SITUATION AT END OF PERIOD.
 - a. Enemy front line (or nearest elements).—Location and nature.
 - b. Defensive organization.—Trenches, emplacements, observation posts, command posts, obstacles, etc.
 - c. Units in contact.—Composition of units, with identifications if known; location of their flanks, estimated combat efficiency (strength, training, physical condition, morale, and other pertinent factors).
 - d. Artillery.—Location and calibers.
 - e. Reserves and other forces capable of intervention.—Location, strength, composition, dispositions, estimated combat efficiency, and where and when they probably can be employed.
 - f. Supply and evacuation establishments.—Location and nature.
2. ENEMY OPERATIONS DURING PERIOD.
 - a. General summary—action of enemy forces as a whole.
 - b. Operations of component elements.
 - (1) Enemy Naval Operations.—Movements (by fleet or groups).
 - (2) Enemy Land Operations.
 - (a) Landings. (By areas. Each entry to show, for that area, the front lines and identifications).
 - (b) Operations of Land Components.
 1. Antiaircraft artillery.
 2. Antitank units.
 3. Armored forces.
 4. Artillery.
 5. Aviation, combat.
 6. Aviation, observation.
 7. Parachute Troops.
 8. Cavalry.
 9. Chemical warfare.

3000 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

10. Engineers.
11. Infantry.
12. Tanks.
13. Administrative elements.
- c. Sabotage.
- d. Miscellaneous.—Such enemy activities, movements or changes since last report as are not conveniently included in *b* above.
3. MISCELLANEOUS.
 - a. Estimated enemy casualties, including prisoners.
 - b. Morale.
 - c. Supply and equipment.
 - d. Terrain not under our control.
 - e. Enemy's probable knowledge of our situation—observation, reconnaissance, prisoners and documents lost by us, inhabitants, etc.
 - f. Weather, visibility and surf, by areas.
 - g. Any enemy intelligence not specifically covered by headings of this report.
4. ENEMY CAPABILITIES.—A discussion of each of the lines of action open to the enemy which may affect the accomplishment of our mission, in the order of their possible imminence. For each capability, the effect of time, space, terrain, present known dispositions, and other factors in the situation should be evaluated. The earliest estimated time at which the enemy can put each into effect should be stated. When applicable, the possible result of the adoption by the enemy of any capability should be included.

AC of S, G-2.

HEADQUARTERS HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 10 December 1941

Subject: Coordination of Traffic Control. (Paragraph 9a (TENTATIVE) added to SOP HD.)

To: Distribution: Special, and Chief of Police, Honolulu, T. H.

1. The attention of all commanders is directed to provisions of Paragraphs 27 and 9f, SOP HD, 5 November 1941, repeated below:

"27. Traffic: The Department Provost Marshal, assisted by the Division Provost Marshals, will regulate traffic on OAHU.

"9. f. Motor vehicles operating at night, at the discretion of local commanders, will be (1) in convoy with standard blackout or blue lights with a shielded tail light on all vehicles, or (2) in the case of convoys traveling closed up, with standard blackout or blue lights on leading vehicle and a shielded tail light on the rear vehicle, and no lights on the others. *Standard blackout light or approved modifications are authorized for use at all times and all places during hours of darkness on vehicles carrying military personnel on a military mission.* On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic."

2. The following additional instructions are published for the strict compliance of all troops in this Department:

Paragraph 9a (TENTATIVE), SOP HD.

(1) The civil police (special and regular) and the Military Police will have COMPLETE and EXCLUSIVE control of traffic on the island of OAHU with the following exceptions:

- Guards on entrances to vital installations operating under special instructions.
- In case of accidents or other emergencies.

3004 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(2) Route markers are authorized for tactical or convoy movements.

(3) Except in case of military necessity and except as otherwise hereinafter provided, the present civil regulations relating to traffic shall remain in force.

(4) Only such military and civilian personnel as are actually needed on defense work, public utilities, and conducting emergency work or on a military mission will be authorized to operate motor vehicles on the highways between 1800 and 0600 (6:00 P. M. and 6:00 A. M.), tactical movements excepted. In this connection, contractors' trucks working on 24 hour basis on approved defense projects will not be delayed. All cars authorized to operate between the above hours (6:00 P. M. to 6:00 A. M.) shall have standard blackout, or blue lights using Moss Blackout Blue Paint (quick-drying) or its equivalent.

(5) All modified lights must conform to a standard pattern and be visible for a distance of not to exceed 100 feet.

(6) The Military Police assisted by the civil police, will approve and check modified blackout lights and will not permit modified lights to be used that do not conform to the standard of blackout lighting equipment, as pertains to visibility from the air. Special instructions and detailed specifications will be issued later by the Provost Marshal.

(7) Persons operating vehicles at night without approved blackout lights will be arrested promptly.

(8) Parking is prohibited on the following streets in Honolulu:

School Street
Lusitania Street
Beretania Street
King Street
Wai'alae Street
Dillingham Boulevard
Middle Street

Nuuanu Avenue
Alapai Street between Lusitania and Beretania
Iwilei Road between King and railroad tracks
Queen Street on mauka side between Iwilei Road and Fort Street

(9) During air raids all vehicles are prohibited from operating, except the following:

a. Military vehicles on a military mission.

b. Civilian police cars.

c. Certain civilian vehicles specifically authorized by the Provost Marshal. All other operators will halt their vehicles off the main roads or streets where they will remain until authorized to be moved by the police (civil or military) or until ALL CLEAR is given.

(10) Immediate action will be taken by all commanders to insure that their personnel are informed of the above contents.

(11) The cooperation of all personnel, civil and military, is directed.

By command of Lieutenant General SHORT:

WALTER C. PHILLIPS,
Colonel, General Staff Corps,
Chief of Staff.

OFFICIAL:

WILLIAM E. DONEGAN,
Lieutenant Colonel, G. S. C.,
Asst. Chief of Staff, 7-3.

DISTRIBUTION: Special, plus 100 to Chief of Police, Honolulu, T. H., plus 500 for file w/SOP.

[CORRECTED COPY]

(Please destroy all previous copies)

HEADQUARTERS HAWAIIAN DEPARTMENT,

Forward Echelon,
0500 17 December 1941.

Subject: Coordination of Traffic Control (Corrections to Par 9 f and 9 h (tentative) SOP-HD)

To: Distribution, Special, plus one to each holder of SOP-HD and Chief of Police, Honolulu, T. H.

1. Reference letter, HHD, Corrected copy, subject "Coordination of traffic control", dated 10 December 1941, SOP-HD is further corrected as follows:

a. "9 f. Motor vehicles operating at night at the discretion of local commanders, will be:

"(1) in convoy with Standard Blackout lights or *approved modifications* with tail light shielded or painted all blue, on all vehicles, or,

"(2) in the case of convoys traveling closed up, with standard blackout lights or *approved modifications* on the leading vehicle and a tail light shielded or painted all blue on the rear vehicle, and no lights on the others.

"(3) Standard blackout lights or approved modifications are authorized for use at all times and all places during hours of darkness on vehicles carrying military personnel on a military mission.

"(4) On two-way roads the distance between vehicles and/or serials will be sufficient to permit the unimpeded flow of traffic.

"(5) All motor vehicles not having standard blackout lighting equipment shall have modified lights conforming to the following specifications:

"Headlights to be painted all black with the exception of a two and one-half inch circle, slightly below the center of the headlight lens. This circle will be painted with Moss Blackout Blue paint (quick-drying) or equivalent. Tail lights will be shielded or painted all blue. Sufficient coats of the Blackout Blue paint will be used to insure that the "modified lights" conform to the standard of blackout lighting equipment, as pertains to visibility from the air."

b. *Par 9 h (tentative)*, sup-par 4, changed to read as follows:

"(4) only such military and civilian personnel as are actually needed on defense work, public utilities, and conducting emergency work or on a military mission will be authorized to operate motor vehicles on the highways between 1800 and 0600 (6:00 PM and 6:00 AM), tactical movements except. In this connection, contractors' trucks working on 24 hour basis on approved defense projects will not be delayed. All cars authorized to operate between the above hours (6:00 PM to 6:00 AM) shall have standard blackout lights or "approved modifications" using Moss Blackout Blue paint (quick-drying) or its equivalent and with tail light shielded or painted all blue."

c. *Par 9 h (tentative)* sub-paragraph (5) deleted.

d. *Par 9 h (tentative)* sub-paragraph (6) delete the last sentence which reads as follows: "Special instruction and detailed specifications will be issued later by the Provost Marshal."

2. The above corrections will be made on all copies of the corrected SOP-HD (see corrected copy of letter, same subject, HHD, dated 10 Dec 1941).

By command of Lieutenant General EMMONS:

J. LAWTON COLLINS,
Colonel, General Staff Corps,
Chief of Staff.

OFFICIAL:

Wm. Donegan
WILLIAM E. DONEGAN,
Lieutenant Colonel, G. S. C.,
Asst. Chief of Staff, G-3.

HEADQUARTERS HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 10 December 1941.

Subject: Air Raid Alarm Instructions. (Paragraph 11 b, c, d, e and f (TENTATIVE) added to SOP HD.)

To: Distribution Special, Plus 90 to Navy and 100 to Chief of Police, Honolulu, T. H.

1. Paragraph 11, SOP HD, is repeated below and changed by inserting paragraph a and adding paragraphs b, c, d, e and f.

"11. Installations and Alarm System.—a. All important installations not protected by the Territorial Home Guard will be guarded by troops. An adequate alarm system will be established in connection therewith."

b. (1) A general Air Raid Alarm will be started by sounding a long blast on the siren in the Aloha Tower. Orders for such Air Raid Alarm will be given only by the Air Corps Warning Service Information Center by direct communication with the Navy Detail at the Aloha Tower.

(2) This alarm will immediately be taken up by units, small groups, patrols and individuals who will immediately sound the alarm by a continuous blast on their alarm equipment until it is picked up and relayed by adjacent groups. Usually one (1) minute duration should be sufficient.

3006 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(3) Alarm equipment is listed below and will be used for no other purpose except in connection with Air Raid Alarm and recall therefrom or All Clear Signals.

- (a) Siren on Aloha Tower.
- (b) Stewart type Klaxon Horn.
- (c) Ambulance sirens.
- (d) Fire truck sirens.
- (e) Police sirens.
- (f) All other sirens not covered above.

c. The "Recall from Air Raid Alarm" or "All Clear Signal" will be relayed by the alarm equipment indicated above, starting with the siren on the Aloha Tower, on instructions from the Air Corps Warning Service Information Center. The signal will be "broken short blasts" repeated until relayed by adjacent units.

d. In addition to the above signals, Air Raid Alarms and "All Clear" instructions will be announced over teletype networks, relayed over tactical communication nets, and announced over KGNB and KGU.

e. The above Air Raid Alarm signals will not be given except as indicated above unless units are actually attacked by enemy aircraft.

f. The above Air Raid Alarms and All Clear Signals will be relayed to the District Commanders of the outlying islands by the Department Signal Officer.

By command of Lieutenant General SHORT:

WALTER C. PHILLIPS,
Colonel, General Staff Corps,
Chief of Staff.

Fort Shafter, T. H., 20 March 1941.

JOINT AIR OPERATIONS:—To be included as a part of Annex No. VII, HCF-39, (14-ND-JCD 13) RCT, Joint Security Measures for the protection of the PACIFIC FLEET and PEARL HARBOR BASE, (now in preparation).

When the Commanding General of the Hawaiian Department and the Naval Base Defense Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans:

1. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

2. Defensive air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation, it is withdrawn by the Naval Base Defense Officer and reverts to Navy control.

3. When naval forces are insufficient for long distance patrol and search operations, and Army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

4. In the special instance in which Army pursuit protection is requested for the protection of friendly surface ships, the force assigned for this mission will pass to the tactical control of the Navy until completion of the mission.

Approved: 21 March, 1941

3. DELINEATION OF RESPONSIBILITY. a. (1) By direction of the President, investigation of all espionage, counterespionage, and sabotage matters are controlled and handled by the Federal Bureau of Investigation of the Department of Justice, the Military Intelligence Division of the War Department, and the Office of the Naval Intelligence of the Navy Department. In accordance with this directive, the War Department assumes responsibility for the investigation of officers, enlisted men, and civilians employed on military reservations or under military control. Similar personnel of the naval establishment is covered by Naval Intelligence. The investigation of other civilians suspected of subversive activities, except in certain overseas possessions, is the responsibility of the Federal Bureau of Investigation of the Department of Justice, hereinafter referred to as the F. B. I.

(2) Cooperation with the agencies of Naval Intelligence and the F. B. I. will be effected by appropriate echelons of our CS system, to the end that full protection may be obtained without duplication of effort.

b. Corps Area and Department Commanders are charged with the supervision of countersubversive operations, in accordance commands, including those of exempted stations and tactical units temporarily present, except the activities coordinated by the Military Intelligence Division, War Department General Staff.

Subject: Detector Operation.

To: Department Signal Officer.

1. On November 27, 1941, after conference with Assistant Chief of Staff G-3, and receiving instructions to operate all mobile detectors from two hours before dawn until one hour after dawn, I, as Acting Department Signal Officer, gave immediate instructions to Captain TETLEY, Commanding Officer of the Aircraft Warning Company, to initiate the above detector operation so long as Alert No. 1 was in force.

2. The detectors in question operated daily thereafter during the prescribed period except when having occasional operational trouble. In addition, the six detector stations operated daily except Sundays from 7:00 A. M. until 11:00 A. M. for routine training. Daily except Saturday and Sunday, the hours 12:00 noon until 4:00 P. M. were devoted to training and maintenance work.

CERTIFICATE

I certify that on November 27, 1941, I accompanied General Short and General Martin to Admiral Kimmel's office for conference relative to sending Army pursuit planes to Midway and Wake. As this would unquestionably weaken the defenses of Oahu, Admiral Kimmel asked a question of Captain McMorris, his War Plans Officer, which was substantially as follows:

Admiral Kimmel: McMorris what is your idea of the chances of a surprise raid on Oahu.

Captain McMorris: I should say none Admiral.

20 DECEMBER 1941.

CERTIFICATE

On the morning of 7 December, 1941, the 18th Wing had 6 B-17s in commission, with 6 B-17s out of commission for maintenance. Of the 8 B-17s destroyed during the attack, 4 were from those stationed at Hickam Field, 2 from those in commission and 2 from those out of commission. The other 4 were lost while attempting to land upon arrival from the Mainland. These B-17s arrived at Hickam Field between 8:00 A. M. and 8:20 A. M., 7 December, 1941. These planes took off from Hamilton Field, California in two squadrons, one at 9:30 P. M. December 6, Pacific time (12:30 A. M. December 7, Eastern time) and the other at 10:30 P. M. December 6, Pacific time (1:30 A. M. Eastern time).

Of the 8 B-17s which arrived safely from the mainland, none had sufficient gasoline to permit dispatching them on missions, nor were they equipped with ammunition for these defensive armament. Machine guns were still cosmoline and had not been bore sighted. Ferry crews were skeletonized, consisting of pilot, copilot, navigator, engineer and radio operator. Such crews were incapable of manning all gun positions even if the guns had been properly prepared for combat and supplied with ammunition.

The B-24 which arrived at Hickam Field on 5th December, 1941, previous to the attack, had insufficient armament for combat, only 1 .30 cal. and twin .50 cal. guns in the tail, and was without ammunition for the guns that were installed.

SECRET

FORT SHAFTER, T. H.

Territory of Hawaii, ss:

Personally appeared before me, the undersigned, authority for administering oaths of this nature, one Grover C. White, Jr. O-396182, 2nd Lieut., Signal Corps, Signal Company, Aircraft Warning, Hawaii who after being duly sworn according to law deposes and sayeth:

1. At the request of the Control Officer and Naval Liaison Officer the AWS agreed to operate its detectors beyond the daily period of two hours before until one hour after dawn. The first schedule required operation of all stations from 4 A. M. to 6 P. M. This schedule was modified to the hours of 4 A. M. to 4 P. M. A temporary schedule was next devised which required all stations to operate from 4 A. M. to 11 A. M. and to have "staggered" operation, i. e., 3 stations from 11 A. M. to 1 P. M., the remaining 3 stations from 1 P. M. to 4 P. M. On Saturday, December 6, 1941, I contacted the Control Officer to request authority to have all stations operate from 4 a. m. to 7 a. m. only on Sunday, December 7, 1941; this was agreed to by the Control Officer.

2. Staff Sergeant Stanley J. Wichas, SCAWH, acting RDF Officer, reports that he saw nothing that could be construed as suspicious in the information

3014 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

received by the AWS Information Center from 4 A. M. to 7 A. M. Sunday, December 7, 1941. This is verified by Lt. Kermit A. Tyler, Air Corps, who was the only officer in the Information Center from 4 A. M. to 7 A. M.

3. At approximately 7:20 A. M. a report was received from a Detector station at Opana that a large number of planes was approaching Oahu on a course North 3 degrees East at a distance of approximately 132 miles. This information was immediately transmitted by the switchboard operator, Pfc. Joseph McDonald to Lt. Tyler, who talked to Opana about the flight. The statement of Pfc. Joseph McDonald, SCAWH, the switchboard operator is attached.

4. The Navy Liaison Officer's position within the Information Center was not manned when I reached the Information Center at about 8:20 A. M. This position was manned shortly thereafter by Technical Sergeant Merle E. Stouffer, SCAWH, who remained on the position until approximately 4:30 P. M. when the position was taken over by Naval Officers. Further the deponent sayeth not.

/s/ GROVER C. WHITE, JR.,
2nd Lieut., Signal Corps,
Signal Company, Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of Dec. A. D. 1941 at Fort Shafter, T. H.

FORT SHAFTER, T. H.
Territory of Hawaii, ss:

Personally appeared before me, the undersigned authority for administering oaths of this nature, one Joseph P. McDonald, 13006145, Pvt 1cl, Signal Company, Aircraft Warning, Hawaii, who after being duly sworn according to law deposes and sayeth:

I was on duty as telephone operator at the AWS Information Center on Sunday morning, December 7, 1941. I received a telephone call from Opana at 7:20 A. M. stating that a large number of planes were heading towards Oahu from North 3 points east. I gave the information to Lt. Kermit A. Tyler, Air Corps, 78th Pursuit Squadron, Wheeler Field, T. H. and the Lieutenant talked with private Lockard at the Opana Station. Lt Tyler said that it wasn't anything of importance. At that time the planes were 132 miles out. I asked if we shouldn't advise Corporal Beatty and have the plotters come back. The Opana Unit stressed the fact that it was a very large number of planes and they seemed excited. Lt. Tyler said that it was not necessary to call the plotters or get in touch with anyone.

Further the deponent sayeth not.

JOSEPH P. McDONALD,
Sig. Co., Aircraft Warning, Hawaii.

Subscribed and sworn to before me this 9th day of December A. D. 1941 at Fort Shafter, T. H.

O. M. CUTLER,
Lt. Col., Infantry.

STATEMENT OF LIEUT. KERMIT A. TYLER

20 DECEMBER 1941.

On Wednesday, 3 December 1941, I was first detailed to learn the operation of the plotting board in the Interception Control Center. I reported for duty at 1210, just as the crew on duty was leaving. I spoke with Lt. White, Signal Corps, a few minutes and he showed me the operating positions for Navy, Bombardment, Antiaircraft, Controller's position and Aircraft Warning Service. I remained on duty until 1600. Only a telephone operator was on duty with me.

On Sunday, 7 December 1941, I was on duty from 0400 to 0800 as Pursuit Officer at the Interception Control Center. From 0400 until approximately 0610 there were no plots indicated on the interception board. From that time until 0700 a number of plots appeared on the control board at various points surrounding the Island of Oahu. I particularly remember at least one plot South of Kauai and I believe there was on South of Molokai. There were two plots at some distance North of Oahu and which I remember seeing on the historical record. At the time, I questioned the plotter of the historical record who stated that he makes a record of all plots as they come in. There were a number of plots over and around the Island of Oahu. Having seen the plotters work once before with about the same general layout, this did not seem irregular to me. At 0700 all of the men except the telephone operator folded up their equipment and left. At about 0720 the operator at the Opana RDF Station called me and said that the instrument indicated a large number of planes at 132 miles to the North. Thinking it must be a returning naval patrol, a flight of Hickam Field Bombing planes, or possibly a flight of B-17 planes from the coast, I dismissed it as nothing unusual. (It is common knowledge that when Honolulu radio stations are testing by playing Hawaiian Music throughout the night that coincidentally B-17s are apt to come in using the station for radio-direction finding. The radio station was testing on the morning of 7 December, 0230-0400). At about 0750 I heard some airplanes outside and looking toward Pearl Harbor saw what I thought to be a navy practicing dive bombing runs. At a little after 0800, Sergeant Eugene Starry, A. C. Wheeler Field, called me to tell me that Wheeler Field had been attacked. I immediately had the telephone operator call all men back to duty. Most of the men had returned to duty by 0820 when Major L. N. Tindal arrived and took charge of the Control Center. I remained on duty assisting Major K. P. Bergquist and Major L. N. Tindal as Pursuit Control Officer until about 1615, 8 December 1941, with the exception of rest periods from 2000 to 2400, 7 December, and 0600 to 1000, 8 December.

HEADQUARTERS 53RD COAST ARTILLERY BRIGADE (AA),
OFFICE OF THE BRIGADE COMMANDER,
Fort Shafter, T. H., 20 December 1941.

Subject: Report on action by 53d C. A. Brigade (AA) from 0755 to 2400, 7 December 1941.

To: General Short.

1. At the beginning of the attack on Oahu 7 December 1941, the 53d Coast Artillery Brigade (AA) was operating under the conditions of Alert No. 1, S. O. P., N. C. A. C., 26 November 1941. The 97th C. A. and the AA Detachments of the East Group had anti-sabotage guards at their fixed 3-inch gun Batteries. All anti-aircraft equipment was being guarded.

3016 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

2. a. *Fort Weaver*: Headquarters 2nd Battalion 97th C. A. (AA).

Alerted 0810

Ready to fire 0813

Engaged enemy at 0814

Amm. fired: 407—.30 Cal. ball.

117—.30 Cal. A. P.

53—.30 Cal. Tracer.

12—Pistol.

South Group Command Post detail at stations at 0810. NO repeat NO interruption in communications in South Group during this period. There was rifle and automatic rifle fire on low flying enemy planes by officers and men.

Battery G 97th, were in camp at Fort Weaver. Its battle position is at fixed battery at Fort Weaver.

Alerted at 0810

Ready to fire 0830

Engaged enemy 0830

Fired 30 rds—3" A. A. Shrapnel. Approximately 200 rds of .30 Cal. ball

Amm. One .50 Cal. Machine Gun was in action at approximately 8:40

A. M. During this firing Private YORK gunner was wounded while

engaging the enemy, he stayed at his post although ordered to take cover.

Lieutenant KING states that the battery fire broke up and definitely

turned back one formation of 15 enemy planes. Casualties—One (1)

Officer dead—Killed while proceeding through Hickam Field to his battle

position. Four (4) enlisted men wounded.

(Basic: Ltr., Hq. 53d C. A. Brigade (AA), dated 20 December 1941. Subject: "Report on action by 53d C. A. Brigade (AA) from 0755 to 2400, 7 Dec. 1941".)

Battery F 97th, was camped at Fort Weaver. Its battle position at Fixed Battery Closson, Fort Kamehameha, T. H.

Alerted 0755, and moved to Battery position across Pearl Harbor Entrance.

Ready to fire 0855

Engaged Enemy 0900 to 0920

Amm. fired: 27—3" A. A., H. E., M. K. fuse M3.

Approximately 400 rds .30 Cal. ball.

Approximately 150 rds .30 Cal. A. P.

Battery G 64th, was in barracks at Fort Shafter, battle position at Ahua Point.

Alerted approximately 0815, and moved to battery position at Fort Kamehameha.

Ready to fire 1030

Engaged Enemy with .30 Cal. M. G. at 1030

Amm. Fired: Approximately 50 rds of .30 Cal. ball.

Battery H 64th, was in barracks at Fort Shafter. Its battle position is at Fort Weaver.

Alerted 0830

Ready to fire 1145

Engaged Enemy 2100

Amm. fired: 40 rds—.50 Cal. ball.

40 rds—.50 Cal. A. P.

30 rds—.50 Cal. Tracer

Marine detachment: The Fleet Machine Gun School at Fort Weaver. Operations were in cooperation with South Group although not tactically assigned.

Alerted 0800

Ready to fire 0810

Engaged Enemy 0810

Amm. fired: Approximately 8000 rds of .50 Cal. A. P. ball and tracer.

Approximately 450 rds of 20 mm A. A.

This Detachment shot down 4 enemy planes and saved a 4 engined bomber by causing enemy plane firing on it's tail to pull out and cease it's attack. Much shrapnel and some small arms bullets fell about Fleet M. G. School. There was excellent cooperation from Fort Weaver personnel in the liaison, phone, etc.

b. *98th Coast Artillery, Schofield Barracks.*

Alerted at 0860

The communications section at the Command Post, Wahiawa, shot down one enemy plane flying at less than 100 feet, with their automatic rifles at 0855.

1st Battalion 98th C. A. (AA), was in position and ready for action at the following time:

B—98: 0955
D—98: 1000
C—98: 1030

Battery M 64th, stationed at Fort Shafter, was alerted at 0815, moved to Wheeler Field, and was ready for action at 1155.

2nd Battalion 98th C. A. (AA). This Battalion has two batteries at Kaneohe and one at Waipahu School. They were in position and ready for action at the following times:

F—98: 1315
G—98: 1315
H—98: 1330

c. Camp Malakole 251st C. A. (AA). All units were alerted at 0805 when fired upon by a single enemy plane. All units returned the fire with small arms and the plane was shot down.

1st Battalion 251st C. A. (AA), was in position and ready for action as follows:

B—251: at West Loch, 1145
C—251: Ewa Beach, 1145
D—251: South of Ewa, 1145

2nd Battalion 251st C. A. (AA), was in position as follows:

E—251: Navy Yard
F—251: Navy Recreation Area
G—251: Tank Farm
H—251: Navy Yard

At 1120 and again at 1122, E, 251st fired on enemy planes, shooting down one plane. 100 rds of .50 Cal. were fired on the first plane and 200 rds of .50 Cal. were fired on the second plane.

d. Fort Kamehameha. Battery A, 97th C. A. (AA) fired 1500 rds of .30 Cal. at one enemy plane offshore at 0835.

e. Sand Island. The AA Detachment of Battery F, 55th C. A., present at Sand Island when the attack started was ready for action at 0815. This battery fired 89 rds of 3" AA and shot down two (2) enemy planes at 0815.

f. Fort Shafter.

(1) Three (3) enemy dive bombers were fired on by the Headquarters Battery and the Intelligence Battery of this Brigade and by Battery E, 64th C. A. (AA). Ammunition Expended—3,000 .30 Cal.

(2) Enemy planes were fired on at 0900 and 1000 by Battery A, 64th C. A. (AA). Ammunition Expended—1000 .30 Cal.

(3) All 3" gun batteries and Automatic Weapons batteries of the 64th C. A. (AA) were alerted at 0815 and were in position as follows:

B—64: at Aiea, 1000
C—64: at Aliamanu, 1030
D—64: South of Aliamanu, 1100
F—64: at Pearl City, 1105
G—64: See Par. 2 a, above.
H—64: See Par. 2 a, above.
I—64: at Aliamanu
K—64: at Hickam Field
L—64: at Hickam Field.
M—64: See Par. 2 b, above.

All of these units except M, 64th fired during the second attack from 1000 to 1145. Ammunition expended as follows:

3", 23 rds.
.50 Cal., 2361 rds.
.30 Cal., 2821 rds.

g. Fort Barrette. Battery H, 97 C. A. (AA), was stationed at Fort Weaver. The battery was alerted at 0755, moved out of Fort Weaver at 0830, and arrived at Fort Barrette at 0910. Enemy planes were engaged by small arms fire at Fort Weaver, while enroute, and at Fort Barrette. The detachment on guard at Fort Barrette shot down one enemy plane at 0910 by small arms fire.

3. Three (3) Marine AA Batteries were attached to the Brigade at 2245.

4. *Ammunition*. Status at 0730, 7 December 1941. All units of the Brigade had in their possession, the initial issue of small arms ammunition. This included ammunition for rifles, pistols, automatic rifles and machine guns. In addition,

3018 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the 3-inch ammunition was so positioned that it was readily accessible to all units of the Brigade except four (4) batteries for which ammunition was at Aliamanu Crater. These batteries completed drawing their initial allowance, 1200 rounds per battery, by 1015.

Engr. 660

General GEORGE C. MARSHALL,
Chief of Staff of the Army, War Department, Washington, D. C.

DEAR GENERAL MARSHALL: I was very glad indeed to have your letter of February 7th as it gave us some very definite information on aircraft we did not have.

Since assuming command I have had two conferences with Admiral Kimmel and two with Admiral Bloch. I have found them both most approachable and cooperative in every way. I have told them that from my point of view there will be no hair splitting, but that the one thing that would affect any decision where there is an apparent conflict between the Army and the Navy in the use of facilities would be the question of what could produce the greatest combined effort of the two forces. They have assured me that they will take exactly the same view. From my brief intercourse with them I feel that our relations should be extremely cordial.

As a result of my short study of conditions here I believe that the following are of great importance and I am taking steps to carry out the necessary changes:

- (1) Cooperation with the Navy.
- (2) Dispersion and protection of aircraft and of the repair, maintenance and servicing of aircraft.
- (3) Improvement of the Antiaircraft defense.
- (4) Improvement of the Harbor Defense Artillery.
- (5) Improvement of the situation with reference to searchlights.
- (6) Provision for more rapid movement of supplies and reserves by improvement in roads and trails.
- (7) Bombproofing of vital installations such as Command Posts and communication centers.
- (8) Increase in the number of Engineer troops.

Cooperation with the Navy. A series of joint committees consisting of Army and Navy officers has been appointed with a view to the study of cooperation of the Army and Navy especially with reference to employment of air and Aircraft. These committees have been directed to report on March 1st. Copy of the letter creating these committees is attached hereto as well as copy of [2] instructions to the echelon commanders concerning cooperation with the Navy.

Dispersion and protection of aircraft and of the repair, maintenance and servicing of aircraft. Provision has been made for a number of emergency fields upon the various islands but no provision has been made for dispersion of the planes in the vicinity of fields and other protection by either camouflage or by bunkers. The emergency fields on other islands will be valueless for pursuit aviation except possibly on the Island of Molokai. The pursuit aviation is capable of only approximately one hour's flying with the throttle wide open. This means that the dispersion of pursuit aviation must take place upon the Island of Oahu if it is to be able to meet an attack from any direction. The dispersion and bunkers for the greater part of the pursuit aviation can be made in the immediate vicinity of Wheeler Field by the use of ravines and bunkers. The maintenance and repair facilities can be placed in ravines under ground without an exorbitant cost in time or money. Tanks are now available for the distribution of gas and we are asking for money to install tanks.

The bombers can make use of the landing fields on other islands but it will be necessary to make provisions for their dispersion in the vicinity of those fields and also on the Island of Oahu. Their dispersion is more difficult than that of the pursuit. The repair and maintenance facilities require so much space that it will be necessary, at least temporarily, to place them above ground protected by hills. At present the only repair facilities for the bombers are in buildings on Hickam Field which would undoubtedly be attacked by any surprise raid. Up to the time that we make runways for dispersion of planes on all the fields surprise enemy raids would be extremely serious.

Improvement of the Antiaircraft Defense. The major shortages in Antiaircraft artillery armament are sixteen 3-inch or 90 m.m. antiaircraft guns (six enroute) 135 37-mm antiaircraft guns, 236 .50 caliber machine guns and 30 sound locators. The locators are expected in June. The shortage of personnel, however, is much more serious than the shortage in materiel. Practically all the coast artillery units have dual roles. If they man antiaircraft artillery the Harbor Defense Artillery will not be manned, and vice versa. To man the entire antiaircraft artillery defense project avoiding dual assignments to all but four Harbor Defense batteries requires an increase in the existing antiaircraft personnel as follows:

Two regiments of Coast Artillery Antiaircraft (Mobile) T-O 4-11.

One Battalion Gun Coast Artillery Antiaircraft (Mobile (less searchlight battery) T. O. 4-15.

[3] Approximately 90 officers and 2,000 enlisted replacements to activate three gun batteries and three 37-mm batteries of the 64th Coast Artillery Antiaircraft, now inactive. With the increasing critical international situation at this time it is urgently recommended that all reinforcements of Antiaircraft Artillery personnel, both unit and individual reinforcements mentioned above, together with the shortage in antiaircraft artillery materiel, be furnished to this department with the least practicable delay.

These reinforcements to the antiaircraft artillery garrison, as well as those for the Harbor Defense Artillery listed below, are required to complete the approved defense project. No provision of the defense of the Kaneohe Naval Air Station has been made in the defense project. This problem has been made the subject of a separate letter, copy attached as Inclosure No. 4.

Improvement of the Harbor Defense Artillery. There are no major shortages of equipment for Harbor Defense Artillery. However, about 150 officers and 2,700 enlisted men as individual reinforcements and one regiment, Coast Artillery (T. D.) T. O. 4-31W are required to fully man the Harbor Defense Artillery, not including the three obsolescent seacoast mortar batteries. It is urgently requested that these replacements and reinforcements be furnished at the earliest practicable moment.

As an accessory to the Harbor Defense Artillery, the north shore Railroad connection is extremely important to give access to railway gun positions on the north shore.

Improvement of the situation with reference to searchlights. The only serious shortage is in beach defense searchlights. A 24-inch carbon-arc light is under development; but the receipt of these lights here may be unduly delayed. This shortage can be overcome immediately by supplying power units for 42 Mack 36-inch projectors which are now on hand. The trucks and power units for these lights are unserviceable but the projectors are in fair to good shape.

There is a shortage throughout of spare parts for 60-inch searchlights, which were requisitioned some months ago. These would be required for any prolonged action. Information from the Chief of Engineers indicates that they will probably be furnished in the near future.

Provision for more rapid movements of supplies and reserves by improvement in roads and trails. With the increase in the number of motors available in the department it is most necessary that roads be provided to make the maximum possible use of the motors in the movement of reserves and supplies. The Engineers have made a very careful study of the roads and trails which are necessary or the defense of the island.

[4] There are numerous bottlenecks in the islands where it is not practicable to construct alternate roads. If these roads are damaged by shelling or bombing it is most important that they be repaired in the minimum of time. To provide for this stores of repair material should be placed in close proximity to the vital points. It is believed that the Territorial government will cooperate with the Army in this matter, thus reducing expenses to be charged to National Defense.

Bombproofing of vital installations such as Command Posts and communication centers. Command Posts, communication centers and items of critical supply should be bombproofed. This protection of Command Posts particularly should be done immediately in order that these installations can be trained to function in these locations before hostilities start.

Increase in the number of Engineer Troops. The protection of aircraft and the construction of air fields will keep one regiment of engineers employed constantly. The work on roads and trails would be such as to employ one General Service Regiment constantly. The combat Engineer regiment of the Hawaiian Division should be left available for bombproofing of Headquarters and communication centers and other tactical work.

Previous recommendations for a regiment of Aviation Engineers, less 1 battalion, and an increase in enlisted strength of Third Engineers were based on assumption that some civilian labor would be available. The situation on civilian labor has become acute, and while it has been necessary to import skilled labor, the recent increase in defense work is going to necessitate importing unskilled labor as well. The only alternative would be to curtail activities of the plantations and much of our defense work should not be postponed until that is done.

Communications covering all the above recommendations are being or have been submitted to The Adjutant General. The following are the titles and dates of letters covering these subjects:

Cooperation with the Navy.

Joint letter, HHD 14th Naval District, 14 February 1941, subject: "Army and Navy Aircraft in Hawaiian Area", copy attached, Inclosure No. 1 AG 354.2/JAX-(pencil)

Letter, HHD to major echelon commanders, 17 February 1941, subject: "Maximum Readiness of Aircraft in Hawaiian Area," file 354.2/JAX, copy attached, Inclosure No. 2.

[5] *Dispersion and protection of aircraft.* Letter Engr. 452, 19 February 1941, subject: "Dispersion and Protection of Aircraft," Copy inclosed, Inclosure No. 3.

Improvement of Antiaircraft defense and of Harbor Defense Artillery. Letter, HHD to TAG, 19 February 1941, subject: "Reinforcements for Coast Artillery Garrison, Hawaiian Department," file 320.2/55 copy attached, Inclosure No. 4.

Letter, HHD to TAG, 18 February 1941, subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." file 381, copy attached, Inclosure No. 5.

North Shore Railroad Connection. Letter, HHD Engr. 662.7, 19 February 1941, copy attached, Inclosure No. 6.

Improvement of situation with reference to searchlights. a. Beach defense Lights: Letter, Engr. 470.3/6 x 470.3/10, 29 January 1940 with 11 Indorsements, 11th Indorsement AG 470.3 (1-29-40) M-D, 26 August 1940. 12th Indorsement, HHD dated 18 February 1941, to TAG being transmitted, copy inclosed, Inclosure No. 7.

b. Searchlight Parts. Letter, Engr. 470.3/8, 2 November 1940, to the Chief of Engineers, subject: "Priority Items, Engineer Status Report, Revision 1940." 1st Indorsement, O., C. of E., (381.4) (Hawaii) 101, 28 January 1941, states: "Reference Par 1 c, the requisition for spare parts for searchlights was concurred in by this office. The requisition now is undergoing review by G-4 and action is expected shortly. You will be promptly informed of the action taken." Copy of 1st Indorsement inclosed, Inclosure No. 8.

Provision for more rapid movement of supplies and reserves by improvement in Roads and Trails.

Letter, Engr. 611, 19 February 1941, subject: "Military Roads and Trails Program, Hawaiian Department." Copy inclosed, Inclosure No. 9.

Bombproofing of vital installations. Letters, Engr. 800.96, following subjects and dates. (Copies attached)

1. Bombproof Command Posts, Hawaiian Air Force, 4 February 1941. Inclosure No. 10.
2. Bombproof Protection, Command Posts, Hawaiian Division, 4 February 1941, Inclosure No. 11.
3. Bombproof Construction for Magazines at Fort Barrette and Fort Weaver, 4 February 1941, Inclosure No. 12.
4. Splinterproof Protection for Antiaircraft and Mobile Seacoast Batteries, 4 February 1941, Inclosure No. 13.

[6] 5. Bombproof Command Post, Antiaircraft Groupment, 4 February 1941, Inclosure No. 14.

6. Bombproof Gasoline Storage, Hawaiian Department, 5 February 1941, Inclosure No. 15.

7. Bombproof Protection for Signal Installations, Hawaiian Department, 6 February 1941, Inclosure No. 16.

8. Storage of Defense Reserves, Aviation Gasoline, Hawaiian Air Force, 6 February 1941, Inclosure No. 17.

9. Department Command Post, Aliamanu Crater, last correspondence 660.9 (S), copy attached, Inclosure No. 18.

Increase in number of Engineer Troops.—Letter Engr. 322.03, 19 February 1941, subject "Additional Engineer Troops", copy inclosed, Inclosure No. 19.

Inclosures herewith are made for your ready reference and information.

Sincerely yours,

WALTER C. SHORT,
Lieutenant General, Commanding.

Engineer 452.

SECRET

Subject: Dispersion and Protection of Aircraft.

To: The Adjutant General, War Department, Washington, D. C.

1. With the present set-up of existing facilities in this Department the pursuit ships are forced to operate to a large extent from Wheeler Field and similarly the bombardment ships are forced to operate from Hickam Field. In times of actual operation some of the bombardment ships will be operating from bases on the outlying islands, but to a large extent the pursuit ships will continue to operate from Oahu due to the limited time and radius of operation without refueling.

2. The concentration of these airplanes at Wheeler Field and at Hickam Field presents a very serious problem in their protection against hostile aviation. Wheeler Field is too small for the operation of the number of pursuit ships to be furnished to this Department and it will be necessary to develop another base for at least one group of pursuit aviation. A site in the vicinity of Barbers Point has been tentatively selected and is now being discussed with the Navy Department in connection with that Department's activities on its new air base in the Ewa Plain Area. The new Army air base will be the subject of a subsequent letter.

3. While this new base will provide some opportunity for dispersion of the pursuit ships this dispersion cannot be counted upon to give adequate protection and it will be necessary to provide protection by means of bunkers in the vicinity of existing fields for both pursuit and bombardment aviation. I have asked the District Engineer of Honolulu to study this problem and to submit cost estimates on the most economical satisfactory means of providing this protection. The District Engineer has recommended that the protection be provided by a rolled fill embankment of dirt and has estimated the cost at \$1,200.00 each for pursuit planes, \$8,000.00 each for two engine bombardment planes and \$15,000.00 each for four engine bombardment planes. In arriving at these figures he has given consideration not only to present unit costs, but has included funds to cover increasing cost of both labor and non-labor items in this Department; the figures shown include both direct and indirect costs. This bunkering protection will cost about the same regardless of its location; the unit price includes cost of taxi strips and accessories.

4. This protection should be provided for 142 single engine pursuit ships and 121 double engine pursuit ships and for 25 two engine bombers and 70 four engine bombers. Using the unit costs quoted above the total for pursuit planes is \$315,600.00 and the total for bombing planes is \$1,250,000.00. The total for

3024 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the two types is \$1,565,600.00. It is recommended that funds in this amount be allotted to this Department as soon as possible to initiate the installation of this protection.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

3-N

Office, C. of E., *April 1, 1942.*

To the Adjutant General.

1. Attention is invited to paragraph 3 of basis letter which gives unit prices for rolled fill bunkers for pursuit planes, two-engine and four-engine bombardment planes. It is noted that the unit prices given include funds to cover increasing cost of both labor and non-labor items and direct and indirect costs. It is also noted that the unit prices include the cost of taxi strips and accessories.

2. For the reason that the basic letter gave no basis on which this office could check the estimate of cost, a radiogram was sent to the Commanding General, Hawaiian Department, March 25, 1941, requesting detailed information sufficient for checking. A copy of this radiogram is inclosed. A reply was received thereto by radiogram from the Commanding General, Hawaiian Department, dated March 29, 1941, copy of which is inclosed.

3. It is recommended that approval in principle of the proposed protective arrangements be granted and that an initial allotment of \$1,000,000 be made at this time, authorizing the preparation of complete plans and initiation of construction with a view to providing necessary balances when costs are more fully determined.

For the Chief of Engineers:

WILLIAM F. TOMPKINS,
Lieut Col., Corps of Engineers,
Executive Assistant.

ESA

WAR DEPARTMENT, A. G. O., May 31, 1941.

To Commanding General, Hawaiian Department.

1. Authority is granted for the construction of revetments in the Hawaiian Department for 70 four-engine bombardment, 13 light bombardment and 170 pursuit planes. This is the total number of airplanes which at present are visualized as an obtainable objective in Hawaii within a reasonable time.

2. In locating these revetments, "battle stations" of airplanes should be visualized in view of present and projected airdromes in the Hawaiian Islands. Revetments should be dispersed over the widest practicable area around and adjacent to airdromes.

3. In the designs of revetments for use in the present war in the British Isles, provision is made for a splinter-proof shelter for airplanes crews and maintenance personnel who may be caught in the revetments during an air attack. In the British design, this splinter-proof, shelter is placed in the rear wall or back of the revetment. In the construction of the revetments proposed for the Hawaiian Department, it is believed that this feature should be incorporated.

4. It is desired that you submit revised estimates covering the construction of the revetments approved in paragraph 1 above incorporating splinter-proof shelters for plane crews.

5. Funds, in the amount of \$1,358,000 for the completion of this project as finally approved after receipt of your revised estimates, are being included in estimates for funds now being prepared.

By order of the Secretary of War:

Major General, The Adjutant General.

Incls. w/d

A True Copy:

EDWARD VON GELDERN,
2nd Lieut., F. A.

Engr. 452

5th Ind

HEADQUARTERS, HAWAIIAN DEPARTMENT,
The Adjutant General, Washington, D. C.

Fort Shafter, T. H., 31 July 1941.

1. Provisions in plans have been made for splinter-proof shelters for airplane crews and maintenance personnel.

2. Revised estimates based on obtainable objectives are as follows:

a. Personnel shelters 5' x 9' @ \$635.00 each for 85 pursuit planes,
bunkers having already been built on Wheeler Field by troop
labor..... \$53, 975. 00

3026 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

b. 85 Pursuit Bunkers @ \$1,200.00 and 85 personnel shelters, 5' x 9' @ \$635.00 to be constructed at locations other than Wheeler.....	\$155, 975. 00
13 Lt. Bombardment bunkers @ \$8,000 and 8 personnel shelters 5' x 13' @ \$800.00.....	\$114, 400. 00
.i. 70 four-engine bombardment bunkers @ \$15,000 and 70 per- sonnel shelters 5' x 17' @ \$925.00....	\$1, 050, 000. 00
Total.....	\$1, 374. 350. 00

3. The bunkers for pursuit planes will be built at the new pursuit field and at Bellows Field. These for A-20-A planes will be at Bellows Field and for the 4-engine bombardment planes will be started at Hickam Field. It is not planned at this time to construct any bunker for these 4-engine planes on the outlying airports, but it is possible that when these airports are completed, the installation of some bunkers at these airports with the majority at Hickam may be desirable. This question has been discussed with the District Engineer, Honolulu, who states that the costs at these field will be about the same as his estimate for Hickam.

4. Since the figure of \$1,374,350.00 is so close to the figure of \$1,358,000.00 mentioned in 4th Indorsement, it is recommended that the latter figure included in the estimates be adopted and that funds in this amount be allotted to the District Engineer, Honolulu, for this purpose.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

In reply refer to:

Engr. 600.96 SECRET

Subject: Underground Repair Facilities, Hawaiian Air Depot.

To: The Adjutant General, Washington, D. C.

1. The provision of bombproof facilities for the repair of aircraft by the Hawaiian Air Depot is vital to the continued functioning of the Hawaiian Air Force during an attack on Oahu.

2. At present all shop and repair facilities of the Hawaiian Air Depot are crowded into a small area at Hickham Field. This area is located close to the entrance channel of Pearl Harbor which is a perfect landmark even during black-outs. Concealment or confusion as to the purpose of this installation by camouflage is impracticable by any means known to this headquarters. In any attack or raid on this island, it is not only probable, but almost unavoidable that the Depot would be put out of action.

3. Considerable study has been made of the problem of insuring continued maintenance facilities for the Air Force and the only logical solution is to provide bomb-proof shelter for part of the existing maintenance facilities. Provision of bomb-proofed protection for all of these facilities is manifestly impracticable due to the tremendous cost. It is believed that bombproofed space for one complete B-17 type airplane and for two B-17's without wing and tail assemblies, together with required space for all subassembly overhaul and repair represents the minimum space required. The District Engineer, Honolulu, has prepared a preliminary design of this structure and estimates its cost at \$3,480,650.00. Copies of the design drawings and his estimate are inclosed as Inclosures 1 and 2. Proposed location of this repair depot is shown on print, inclosure No. 3. This location has been selected because it is at a considerable distance from any other probable target, because the terrain is adapted to camouflage and because the soil will offer no construction difficulties. Location adjacent to the present facilities of the Hawaiian Air Depot at Hickam Field is impracticable; rock and ground water are reached only a few feet underground and this location is close to other primary targets of an air attack.

4. It is recommended that one underground repair depot of the type shown on inclosed plans be approved for construction at Wheeler Field and that funds in the amount of \$3,480,650.00 be allotted to the District Engineer, Honolulu, for this construction.

ESA

WAR DEPARTMENT, A. G. O., October 27, 1941.

To Commanding General, Hawaiian Department.

1. The cost of providing bombproof underground repair facilities compared with the advantages to be gained is so great, that it is a policy that such facilities will not be provided.

2. Although the advantages of greater security which could be achieved by the provision of bombproof underground repair facilities must be recognized, the additional cost involved makes it necessary for air base installations exposed to possible bombardment attacks to assume this risk.

3. One hangar being built for our Atlantic base is to provide sidewalls of bomb-splinter proof construction. If you desire installations of this type, due consideration will be given your request, considering funds are available, and the needs of other bases similarly exposed to danger of air attack.

Fort Shafter, T. H., October 28, 1941.

In reply refer to:

Engr. 400.312

Via "Clipper" Air Mail

Subject: Funds for Field Fortification and Camouflage Materials.

To: The Adjutant General, Washington, D. C.

1. Reference is made to the following project letters from this headquarters:

a. Letter to The Adjutant General, Engr. 600.94, 4 February 1941, subject: "Splinterproof Protection for Antiaircraft and Mobile Seacoast Batteries," recommending that \$306,000 be allotted to initiate protective shelters for personnel and propellants at antiaircraft and mobile seacoast batteries. In 4th Indorsement, AG 662.1 (2-4-41) M-WPD, 31 March 1941, this headquarters was advised that the recommendation was not favorably considered, and that "protective installations of this type should be improvised by ordinary field fortification methods."

b. Letter to The Adjutant General, Engr. 000.91, 7 July 1941, subject: "Request for funds for Camouflage of Wheeler Field," recommending that an allotment of \$56,210.00 be made for the purpose of camouflaging bunkers, landing field, hangers and warming apron at Wheeler Field.

c. Letter to the Adjutant General, Engr. 000.91, 27 February 1941, subject: "Camouflage of Defense Installations," recommending that \$29,000 be allotted for camouflage of batteries at Fort DeRussy, Fort Kamehameha, Fort Ruger, and Fort Barrette. 4th Indorsement, AG 007.5 (2-27-41) MC-E, 27 June 1941, approved the project and stated that funds for this purpose would be included in the next estimates and would be made available at the earliest practicable date. Radio from the Chief of Engineer 10 October 1941 advises that \$29,000 for camouflage of coast artillery batteries had been disapproved by the Budget Advisory Committee.

[2] d. Letter of The Adjutant General, Engr. 452, 19 February 1941, subject: "Dispersion and Protection of Aircraft," recommending that an initial allotment of \$1,565,600 be made for the construction of bunkers for the dispersion and protection of aircraft. 4th Indorsement AG 600.12 (2-19-41) MC-E, 31 May 1941, granted authority for the construction of revetments for 70 four-engine bombardment, 13 light bombardment and 170 pursuit planes, and stated that funds in the amount of \$1,358,000 for the completion of the project after receipt of revised estimates would be included in estimates for funds being prepared. 5th Indorsement Engr. 452, 31 July 1941, submitted a revised figure of \$1,374,350, and recommended that it be adopted instead of the \$1,358,000. 6th Indorsement, AG 600.12 (2-19-41) MC-G, 22 September 1941, approved plans for revetments, and advised funds in amount of \$1,358,000 for completion of revetments in department were included in Project C-21, preliminary estimates 1943, funds expected to become available about January 1, 1942.

e. Letter from the Adjutant General, AG 353 (7-28-41) MC-D, 13 August 1941, subject: "Reallocation of Special Field Exercise Funds for Field Fortification and Camouflage Projects," and 1st Indorsement thereon, AG 121.1, 14 September 1941, recommending the immediate allotment of \$125,000 for necessary materials and tools for the construction of field fortifications. This indorsement was followed up by radio 25 September 1941, recommending immediate favorable action on allotment of \$125,000 for execution of field fortifications and camouflage projects. War Department radio, 29 September 1941, advised request was not favorably considered, confirmed by 1st Indorsement War Department 14 September 1941.

f. Letter to the Chief of Engineers, Engr. 121.2, 17 May 1941, subject: "Annual Estimates, Fiscal Years 1942 and 1943," and supporting data under Project 5, which requested \$50,000 each for fiscal year 1942 and 1943 for local purchase of supplies for units of the Hawaiian Garrison other than Engineer troops, these supplies to be used in the construction of fortified works other than command posts for major echelons and camouflage measures, letter, Office, Chief of Engineers, to Department Engineer, 1 July 1941, subject: "Allotment of Engineer Service, Army Funds, Fiscal Year 1942," advised that only \$5,000 was being allotted. It further stated "It is believed the amount of \$50,000 requested for this purpose is greatly excessive. Field fortifications or camouflage to this extent goes beyond the training stage and reaches the status of a construc-

tion project. It is suggested that such requirements for the defenses of Hawaii be obtained from construction funds, which should be estimated and appropriated for this purpose."

[3] 2. The field fortification and camouflage works that will be required to insure the adequate defense of this island are of such magnitude that their accomplishment after the outbreak of hostilities is entirely out of the question. All installations located on Government owned or leased land should be constructed at the present time eliminating those tasks from the work that cannot be done until after complete mobilization when it will be possible to enter on and organize private land.

3. The program for immediate construction contemplates semi-permanent emplacements for all coast artillery weapons in the present defense project. These weapons are sited in their most advantageous positions covering all approaches to the island and fixed Naval installations and their movement is not contemplated under any change of situation. Protection for infantry units is based on lightly held beach positions with a strong and highly mobile reserve in accordance with latest tactical principles. Dispersed and camouflaged Bunker protection must be provided for aircraft and airfield installations must be protected by machine gun emplacements and fencing.

4. The peculiar topographic and geologic conditions and the nature of the vegetation of the Hawaiian Islands require a greater expenditure of materials for field fortification than would normally be anticipated. In their maneuvers and field training, troops have constructed many field fortification works. Salvage and local materials have been used to the utmost and many methods have been improvised to take into consideration the coral and lava rock, sand, and peculiar volcanic soil of the islands. This effort has been largely wasted because of the rapid deterioration of the local materials used. Sand bags and local timbers have a maximum life of about six months in this locality.

5. The War Department has repeatedly directed this Headquarters to construct certain works by Field Fortification methods but neither materials nor funds have been supplied. This letter presents a new computation of all material requirements for field fortification works and camouflage which should be constructed at once. This tabulation does not include those materials which must be used to complete the field fortification works after the outbreak of hostilities. These requirements may be divided into three groups as follows:

a. *The Air Corps requirements.* The airfields in the Hawaiian Islands are limited in number and there are very few places aside from regular airfields where enemy planes might land. Consequently, it is expected that determined efforts would be made to capture existing airfields. To prevent this, protected machine gun positions must be placed to guard the sensitive points on each airfield, and

[4] mobile forces provided for counter-attacks on enemy air-borne or sea-borne troops who are attempting a landing or who have landed. Airplanes on the ground must also be hidden and dispersed, to prevent their loss in surprise air attacks, hence camouflage is needed to conceal them. For this purpose, the local vegetation must be augmented by additional planting. In case an airfield on the outlying islands must be abandoned, its runways and other essential features should be destroyed, hence demolition chambers should be installed in advance. These matters cannot be deferred because of the time required for vegetation to grow and the time required to install protection and demolition works.

b. *Coast Artillery requirements.* The Coast Artillery includes permanent fixed defenses, mobile guns in positions prepared in time of peace, and antiaircraft guns protecting fixed Naval or military installations. The Coast Artillery cannot maneuver; the mobile elements, including antiaircraft, are held in fixed positions to defend fixed installations or to cover intervals in the permanent defenses, and the best positions have been prepared. Since these positions are known to the general public, the enemy also knows them. The operating personnel must have shelters to protect them and their ammunition during air attack, and the positions must be camouflaged to prevent accurate aim by enemy bombers. Coast Artillery troops must be constantly on the alert during active operations, and can then spare no men for fortification work after hostilities have begun.

c. *Infantry requirements.* The Infantry divisions will occupy beach positions very lightly held, and will have highly mobile motorized reserves. The beach positions have additional weapons, beyond table of organization allowances. Emplacements, trench shelters, observation and command posts for the beach positions must be ready when the enemy appears offshore, and field works should

3030 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

be used to develop the maximum efficiency of automatic and heavy weapons and release as many men as possible to the reserve. There will be neither time nor men available to construct beach positions after the enemy arrives; fields of fire must be cleared, barbed wire, road blocks, anti-tank mines, and other obstacles must be installed at that time because these defenses will be placed on private property or will unduly interfere with civilian enterprise if set up in advance.

6. Inclosed are tabulations showing the material requirements of the Air Force, the Coast Artillery Command and the two Infantry divisions.

[5] 7. It is recommended that an allotment of \$1,455,542 be made immediately available for the purchase of fortification and camouflage materials so that the work can be initiated and carried along concurrently with normal training activities.

8. The only alternative for having these positions prepared in advance is to have a large increase in the garrison authorized for the defense of the islands.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., July 15, 1941.

In reply refer to:

Engr. 000.91

Subject: Request for Funds for Camouflage of Wheeler Field.

To: The Adjutant General, Washington, D. C.

1. There is definite need for camouflage treatment of Air Fields in the Hawaiian Department. Up to this time no camouflage treatment has been undertaken at any air field in this department.

2. Attached is a plan for camouflage of Wheeler Field prepared by the 804th Engineer Company Aviation (Separate). The plan includes photographs of the type of camouflage to be applied to the bunkers, together with itemized estimates of costs and recommendations.

3. In reporting on this proposed plan, Major J. F. Ohmer, Jr., Corps of Engineers, Camouflage Officer, has commented as follows:

"The place for camouflage of Wheeler Field as prepared by the 804th Engineer Company Aviation (separate) is a good treatment for the field and the bunkers. The plan generally calls for 'blending' the buildings of Wheeler Field into the Schofield Barracks building area and endeavoring to restore the air field proper to the original condition as shown by the present earth scars, such as the old

Kamehameha Road, the gully through the field and the pineapple fields, roads and irrigation ditches."

"The plan is practicable and can be readily accomplished by the 804th Engineer Company Aviation."

"The Commanding General, Wheeler Field, has approved the plan and urged that the work be expedited."

"While the air photographs of the two planes in the camouflaged bunkers show the wing tips and the harsh straight shadows of the deciding line between the upper and lower nets, this can be blended by additional garnishing and small nets tying the lower nets under the upper terrace. This work is now being completed."

"It is recommended that the camouflage plans for Wheeler Field be approved."

[2] 4. It is recommended that an allotment of funds be made to this office in the amount of \$56,210.00 for the purpose of camouflaging bunkers, landing field, hangars, and warning apron at Wheeler Field, the work to be done by the 804th Engineer Company Aviation (Separate). An itemized estimate is incorporated as a part of the plan substantiating the amount requested.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

6-C

WAR DEPARTMENT,
OFFICE, CHIEF OF ENGINEERS,
Washington, D. C., September 16, 1941.

To: The Chief, Army Air Forces, Washington, D. C.

1. The proposed plan for the camouflage of Wheeler Field, Hawaii, has received careful consideration by The Engineer Board. As camouflage is essentially a local problem long range criticism may be entirely in error. Consequently, the following comments are offered only to supplement and should not invalidate decisions made on the spot by officers with intimate knowledge of local conditions.

2. Specific comments on Part I:

a. *Bunkers.*—The bunkers do not appear in the best arrangement to give maximum protection and to afford natural concealment. Their regular curving alignment throws a great burden on the artificial camouflage measures. The outer berm of the bunkers should be more irregular at the toe of the slope and should not be permitted to appear as a series of parallel lines as seen in photograph (V-112.101). Portions of the light colored pattern which show on the photograph could be continued over the revetment by sand or the native soil and over the net by weaving in appropriately colored garnishing. Extensive planting in native patterns will assist in this blending, and it is suggested that vines could be planted in the bunker tops and trained to grow into the nets to aid in defeating disclosure by means of infra-red photography. If additional dispersal pens are constructed, they should be spaced further apart, be more irregularly arranged, and the outer surface of the earth walls should be more irregular, especially at the toe of the slope.

b. Landing Field.—The division of the field boldly into three sections by natural boundaries as described is excellent, and, if carried out as indicated, should be very successful. The following detail criticisms may aid in the execution, but are not arbitrary. The field roads might be made a little more conspicuous by sprinkling a light colored earth, gravel or lava on the stripped surface as noted by contrast in the field roads in lower left corner of photograph (V-109-916-N-18). The same technique may be useful in the reproduction of the old Kamohameha road. If the fertilizer method does not produce dark enough contrasts it may be necessary to use black emulsified asphalts or a mixture of iron sulphate and tannin. The dark areas of the reproduced gully should not be used for taxiing and warming up any more than absolutely necessary, as this will destroy the desired effect.

[5] *c. Hangar Line.*

(1) The effort to make the buildings of Wheeler Field appear as a more homogeneous portion of Schofield Barracks might be more effective if more roads, dummy or real, were built between the two areas.

(2) The athletic track is a dangerous subterfuge, because of its characteristic outline and east-west orientation, and is not generally recommended as it becomes a reference point when detected.

(3) The painting of buildings on the aprons appears satisfactory; maintenance will be required and should not be neglected.

(4) The hangar painting presents a fine appearance. More disruption might be achieved by a larger and bolder plan of painting. The roads which terminate at hangars might be carried over the building successfully and the buildings painted on the roof tops might be connected with painted walks and service roads to help create the illusion of a reduced scale of construction. The general trace of the shadows of buildings should be studied and wherever possible, there should be painted, or preferably planted, trees and shrubs to break up their characteristic outline. Planting, which may appear relatively ineffective in vertical views, may help materially against the bombers' approach.

(5) Inasmuch as the concrete hangar line apron is of brighter material and more reflective than other roadways in the area, it should be generally toned down with a thin solution of tar or asphalt in kerosene, in addition to the other treatment suggested.

3. Specific comments on Part II.

a. It is suggested an asphalt emulsion for roofs would be cheaper and more suitable. In general, the type of paint should be selected with regard to the material to be coated, instead of the classification by roofs, walls, etc. Under "Concrete" it is assumed that aprons are included. The American Betumuls Company, which maintains a branch in Hawaii, should be able to furnish asphalt emulsion paints and adhesives more advantageously than Rejuvo. The matter of granules to cover surfaces should be investigated carefully to see whether local materials of indigenous colors or of a nature which will absorb bituminous colors, such as lava, are not more easily procurable.

[6] 4. It is recommended that:

a. That the plan of camouflage be approved.

b. That the camouflage office, Hawaiian Department, or the Commanding Officer of the 804th Engineer Battalion (Avn.) (Sep.) be granted permission to communicate directly with the Engineer Board on matters of materials and technical details to expedite the work.

c. That the Engineer Board be furnished a report to be made upon completion of the work, including photographs of intermediate the final stages. It is suggested that oblique photographs be furnished as well as vertical. The oblique photographs should be taken at 10,000 feet and three to four miles from Wheeler Field from four directions.

d. That the amount of \$56,210.00 be allotted to the Department Commander, Hawaiian Department, for the purpose of camouflaging bunkers, landing field, hangars and warming aprons at Wheeler Field, the work to be done by the 804th Engineer Company.

For the Acting Chief of Engineers:

[s] HOMER SAINT-GAUDENS,
Lt. Col., Corps of Engineers,
Acting Chief, Operations and Training Section.

[SECRET]

27 FEB 1941.

Engr. 000.91

Subject: Camouflage of Defense Installations.

To: The Adjutant General, Washington, D. C.

1. Investigations conducted by this headquarters have demonstrated that effective measures can and should be taken to reduce the visibility of exposed defense installations to hostile aerial observation. Admittedly these installations cannot be concealed to such an extent that they will be invisible on aerial photographs; at the same time, however, any camouflage which will render visual observation more difficult and will decrease the effectiveness of enemy bombardment is of the utmost importance.

2. Time has not permitted the submission of a comprehensive program for the camouflage of all defense installations in this department which require some degree of concealment; this matter is undergoing continuous study. Fixed sea-coast batteries have received first attention and plans of procedure and cost estimates have been prepared. The following table shows the various installations on which camouflage work should be undertaken immediately with the tentative costs:

Installation	Armament	Inclosure No.	Cost
Ft. DERUSSY:			
Battery Randolph.....	2-14" (Disappearing).....	Incl. No. 1.....	\$6,000.00
Battery Dudley.....	2-6" (Disappearing).....	Incl. No. 1.....	
Ft. KAMEHAMEHA:			
Battery Closson.....	2-12" (Barbette).....	Incl. No. 2.....	6,000.00
Battery Selfridge.....	2-12" (Disappearing).....	Incl. No. 3.....	5,000.00
Battery Jackson.....	2-6" (Disappearing).....	Incl. No. 3.....	1,500.00
Ft. RUGER:			
Battery Adams.....	2-8" (Barbette).....	Incl. No. 4.....	2,000.00
Ft. BARRETTE:			
Battery Hatch.....	2-16" (Barbette).....	Incl. No. 5.....	8,500.00
Total cost.....			\$29,000.00

The measures contemplated include construction of various types of overhead cover, dummy positions, extension of roads, painting and the transplantation of trees and shrubbery.

3. Experience in the present World War has shown the very considerable success of the Germans in concealing by camouflage, their long range guns on the channel coasts. The several millions of dollars invested in the installations enumerated in paragraph 2 above and their general value in the defense of this island justify expenditure which will render them less vulnerable to enemy

3034 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

attack. It is therefore recommended that the sum of \$29,000.00 be allotted this department as soon as practicable to permit initiation of this camouflage work.

WALTER C. SHORT,
Lieutenant General, Commanding.

OFFICE, C. OF E., May 28, 1941.

To: The Adjutant General, THROUGH THE CHIEF OF COAST ARTILLERY.

1. This paper was held in this office to permit direct inspection of the installations by a representative of this office who visited Hawaii on this and other fortification matters. Reference is made to Hawaii on this and other fortification matters. Reference is made to memorandum of March 22, 1941, to The Adjutant General, in this connection.

2. The importance of protective concealment for existing seacoast batteries is recognized by this office and a directive bulletin is now being prepared for issue to the field showing methods of such concealment for different type batteries.

3. The estimate submitted is considered an absolute minimum that will be required even omitting from consideration at this time Batteries Hatch and Closson which are to be casemated and more funds will probably be required at a later date. It is recommended that the project be approved and funds be made available at the earliest practicable date.

WAR DEPARTMENT, OFFICE, CHIEF OF COAST ARTILLERY,
June 12, 1941.

To: The Adjutant General.

1. The need for camouflaging the seacoast Batteries listed in paragraph 2 of the basic letter is evident from inspection of the inclosures, Nos. 1 to 5, inclusive. The program as outlined in paragraph 2 of the basic letter, is concurred in, subject to the proviso that the protective concealment of Batteries Hatch and Closson will be coordinated, both in time and character, with the casemating of these batteries.

2. No Seacoast Defense funds are available, at this time, for application to camouflage projects and none are included in current estimates.

3. It is recommended that the camouflage project, described in paragraph 2 of the basic letter, be approved for inclusion in the Hawaiian Department Defense Project.

For the Chief of Coast Artillery:

JOE D. MOSS,
Major, C. A. C.,
Acting Executive.

[Exhibit 1A]

[1]

[SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 19 February, 1941.

Engr. 611

Subject: Military Roads and Trails Program, Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, Engr. 611, this headquarters, 8 November 1940, covering the recommendations for the revision of the military Roads and Trails Program. As indicated in paragraphs 5 and 8 of that letter, the revised program was not complete and additional roads and trails were under consideration.

2. A detailed study made by this headquarters indicates that the following additional improvements are necessary:

a. Wiliwilinui road and trail improvement, estimated cost \$33,550.00. Construction covering improvement of the existing 15,000 lineal feet of road at Wiliwilinui Ridge, eliminating sharp curves and providing adequate turnouts. It also covers construction of a 6-foot pack trail extending from the end of the existing road to the main crest of Koolaupoko Ridge area.

b. Improvement of Pupukea-Kahuku trail estimated at \$12,720.00. This project consists of the general widening of the existing trail from 3 to 6 feet along its 13,000-foot alignment. This improvement will provide desirable communication between the northeasterly section of the Island and northern end of Wahiawa-Pupukea trail.

c. Coincidental with the improvement of the Koolau Ridge trail, feeder trails to the ridge should be developed and improved. As a part of its reforestation program, the CCC has constructed several trails from forest reserve boundaries to the main ridge of the Koolau along the lateral ridges. These trails, shown in the following list, should be partially relocated and improved as 6-foot pack trails:

(1) Poamono trail, 22,800 feet, estimated cost	\$35, 100. 00
(2) Kawailoa trail, 24,000 feet	22, 750. 00
(3) Schofield-Waikane, 33,000 feet	45, 750. 00
(4) Waiawa trail, 30,000 feet	28, 650. 00

d. A road to Fua Palailai. This project ———(copy illegible)——— of a 10' class "B" supply road extending from the main government road to Fua Palailai. This road is desired to improve access to a group of fire control stations manned by a detail of from 50 to 100 men. The approximate length of this road is 8,700 feet and estimated cost \$10,000.00.

e. Iunia-Palehua road. This project will connect an existing plantation road with the Palehua spur via the Mauna Kapu and the Honouliuli trails. The need for an alternate route to the Manauahua Defense Area is extremely important, particularly in view of the exposed condition of the Palehua road to hostile observation. This project calls for the construction of 24,000 lineal feet of a 10-foot class "B" road at an estimated cost of \$136,500.00.

f. Radial Ridge roads, Manauahua area. This project calls for the construction of three roads along the ridges, south and west of Fua Nanauahua as shown on the attached map. These roads serve vital defense areas which must be made accessible to truck transportation. The total length of these ten-foot roads is approximately 20,000 feet and the estimated cost of construction is \$84,900.00.

3. These additional roads and trails have been combined with the 19 items listed in paragraph 7 of letter, this headquarters, file Engr. 611, 8 November 1940, and are shown in the table below in order of their relative priority. The location of each item is shown on the map, scale 1/125,000, Inclosure No. 1 hereto.

1. Fort Weaver 155-mm position Road 10' Class B	\$8, 900
2. Fort Roger Roads 10' Class B	4, 000
3. Barbors Point East 3L Pos. Trail 3L Trail	1, 000
4. Mall Marker 3L Position Trail 3L Trail	6, 000
5. Mallilili 3L Position Trail 3L Trail	1, 400
6. Eaena Point 3L Position Trail 3L Trail	1, 000
7. Wailoa Point 3L Position Trail 3L Trail	1, 000
8. Completion of Barbors Point Road Net Class A	133, 000
9. North Shore RR Connection R. R.	250, 000
10. Improvement Waiakua Pupukea Road 10' Class A & B	216, 000

11. Waimoa-Pupukea Road, 10' Class B.	\$35,000
12. Alternate R.R. Schofield-Wahluau Bypass R. R.	70,000
13. Connection-Lelohua Spur to Oahu Sugar Co. tracks (rail only) R. R.	48,600
14. Ordnance Magazine Area, Schofield 25' Class A.	33,000
15. Feeder Roads Wahluau-Pupukea Road, Improvement	111,900
16. Eahuku 155-mm Position Road, 10' Class B.	9,500
17. Eahuku CP Trail, CP Trail.	2,100
18. Kepuhi CP Trail, CP Trail.	8,000
19. Koolau Ridge Trail, 6' Pack Trail.	20,000
20. Williwilinoa Road, Improvement.	17,900
21. Williwilimi Trail, 6' Pack Trail.	15,650
22. Poamoho Trail, 6' Pack Trail.	35,100
23. Pupukea-Mahuhu Trail, 6' Pack Trail.	12,720
24. Hawaiian Trail, 6' Pack Trail.	22,750
25. Schofield-Wahluau Trail, 6' Pack Trail.	45,750
26. Waiwan Trail, 6' Pack Trail.	28,650
27. Pau Palalal CP Road, 10' Class B.	10,000
28. Runia-Palahua Road, 10' Class B.	135,500
29. Ridge Roads, Manamam Area, 10' Class B.	34,900
	1,370,020

4. It is recommended that the roads and trails program shown in the table above be approved in lieu of the present program approved in 4th Indorsement (AG 611 Hawaii (3-31-38 (Misc.) (X) dated 23 May 1939, on War Department letter (AG 611 Hawaii (3-28-38) Misc. WPD) dated 31 March 1938, subject: "Military Priority Highways in the Hawaiian Department". It is further recommended that the sum of \$1,370,020.00 be allotted to this department as soon as possible to permit early completion of this program.

WALTER C. SHORT,
Lieutenant General,
Commanding.

WAR DEPARTMENT, A. G. O.,
February 27, 1941.

To: Chief of Engineers and Chief of Coast Artillery, *IN TURN*.

For remark and recommendation, reference being made to files C. of E. 611 (Haw) 10 and OCGA 611/45 A 7.

By order of the Secretary of War:

Adjutant General.

1 Incl. a/c

C. of E., March 12, 1941.—

To: The Chief of Coast Artillery.

1. Items 1 to 19, inclusive, in this program were approved for inclusion in the Hawaiian Defense Project in 3rd Indorsement dated February 18, 1941, AG 611 Hawaiian Department (11-8-40)M-WPD; OCGA 611/45 A 7; C. of E. 611 (Hawaii) 10. It was further directed that the Commanding General confer with Mr. Moskowitz, the representative of the Commissioner of Public Roads in Hawaii, with a view to securing the maximum aid permissible from the Public Roads Administration for the accomplishment of the construction authorized Federal Highway Act of 1940. It was also directed that a revised estimate be submitted covering Items 9, 12 and 13. The above action was not available to the Commanding General at the time of preparation of basic paper.

2. Items 20 to 29, inclusive, are new items of work. The estimated cost appears reasonable, and their inclusion in the program is recommended.

3. Attention is invited to letter from the Commanding General Hawaiian Department dated February 19, 1941, subject: "Construction of North Shore Railroad Connection" file Engr. 611; AG 112.05 (2-19-41)M; C. of E. 611 (Hawaii) 11 in which it was recommended that funds in the amount of \$230,000

3038 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

be allotted as soon as possible to initiate construction. The item referred to is included in this paper as item 9.

For the Chief of Engineers:

[S] George Mayo,
GEORGE MAYO,
Lt. Col. Corps of Engineers,
Chief, Fortification Section.

ESA

WAR DEPARTMENT, A.G.C.,
April 1, 1941.

To: Commanding General, Hawaiian Department.

1. Attention is invited to the preceding 2d and 3d Indorsements.

2. The program for road, trail and railroad construction contained in paragraph 3, basic communication, is approved for inclusion in the Hawaiian Defense Project in place of the road, trail and railroad program approved by 3d Indorsement, February 18, 1941, to the letter, subject: "Military Road and Trail Program, Hawaiian Department", AG 611 Haw. Dept. (11-8-40) H-WPD.

3. It is desired that you submit a breakdown of the items contained in the road and trail program approved herein to show the expenditures contemplated for augmentation and for maintenance. In this connection, attention is invited to your 1st Indorsement, January 16, 1941, to the letter, subject: "Maintenance and repairs of Fortifications, Estimate of Funds for FY 1943" (Engr. 121.2, Forts), in which you request funds for the maintenance of roads. The breakdown requested is necessary to insure that no duplication will be encountered in the defense of estimates to be submitted for the completion of this program.

By order of the Secretary of War:

Major General, The Adjutant General.

[7] Engr. 611

5th Ind.

HEADQUARTERS, HAWAIIAN DEPARTMENT,
Fort Shafter, T. H., 26 May 1941.

To: The adjutant General, Washington, D. C.

1. Reference is made to the following correspondence:

a. AG 611, Haw. Dept. (11-8-40) M-WPD; Military Road and Trail Program, Hawaiiin Department.

b. AG 660 (4-19-41) M; Expenditure Program, Seacoast Defense Fund, Fiscal Year 1942

c. Eng. 121.2 (Forts); Maintenance and Repair of Fortifications, Estimate of Funds for Fiscal Year 1943, (cited in Paragraph 3, 3rd Indorsement above).

2. a. Road, trail and railroad program submitted in reference a was approved by War Department 3rd Indorsement, February 18, 1941, subject to the following:

(1) That Mr. Moskowitz be contacted to secure a maximum of the unobligated portion of \$446,000.00, previously allotted the PRA for Hawaii, for the construction of the road and trail items in the approved program.

(2) That revised estimates be submitted for the railroad items in the approved program.

b. 4th Indorsement, this headquarters, April 4, 1941, submitted the following:

(1) Recommendation that \$446,000.00 available to the PRA be not diverted from the purpose for which originally allotted, namely, construction of the Wahiamama cut-off and the Kolokolo-Waiamoa Road.

(2) Revised estimates for the railroad items and reduced estimates for the road and trails portions of the program by the \$70,400.00 made available on December 7, 1940.

(3) Cross-referenced the originally approved program, items 1-19 inclusive, with the additional items, 20-29 inclusive, approved herein and submitted revised estimates in the amount of \$951,020.00 for the road and trail items and \$298,000.00 for the railroad items. The total cost, \$1,249,620.00 supersedes estimate of \$1,370,020.00 reported in basic letter herewith.

[8] 3. Reference b informed this headquarters that regular estimates for Seacoast Defense funds, FY 1942 include \$300,000.00 for the construction of the railroad items and \$50,000.00 for road and trail items. Release of these funds will cover the construction of the railroads \$298,600.00) and will reduce the required funds for the completion of the roads and trails to \$901,020.00.

4. a. Reference c submitted estimates in the amount of \$286,000.00 for the upkeep of military roads and trails during FY 1943. These estimates were based upon the maintenance of these roads and trails already constructed in this department, since at the time of submission, the augmentation program did not have War Department approval. The great increase in FY 1943 estimates over those of previous years has been due primarily first, to the necessity of procuring new plant and equipment as replacements for outworn units and second, to the necessity supplanting WPA employees with hired labor as a result of the increasing non-availability of the former.

b. The breakdown of the \$286,000.00 estimate showed the proportional amounts of the total which would be expended on existing roads and trails. In view of the approval by 4th Indorsement of the revised road, railroad, and trail program, which contains funds for the improvement of certain existing roads, the original breakdown of FY 1943 maintenance estimates is no longer applicable. Specifically, maintenance funds for the Wahiana-Purukea Road and Barbers Point Road net can be reduced considerably; at the same time, however, the construction of new roads and trails during FY 1943 and ensuing years. Attached as inclosure No. 1 is a revised tabulation of maintenance funds required during FY 1943 for all existing roads and trails and those to be constructed under the approved program. This breakdown shows specifically the purposes for which these funds will be expended. Revised estimates decrease the funds originally requested by \$34,000.00.

c. 1st Indorsement, January 16, 1941, which forwarded the estimates cited in paragraph 5a, recommended immediate release of \$100,000.00 of the \$286,000.00. This \$100,000.00 is necessary for the purchase of materials and additional plant and the hiring of labor for the maintenance of long neglected existing roads and trails, funds for the improvement of which have not been included in the approved augmentation program.

[9] 5. As explained in the foregoing paragraphs, there is no duplication in the funds still required for the construction of the approved augmentation program, \$1,249,620.00 or \$901,020.00 if the \$350,000.00 in FY 1942 estimates is made available and the funds, totaling \$252,000.00, required for maintenance: the \$1,249,620.00 construction estimate includes no funds for maintenance and the \$252,000.00 maintenance estimate includes no funds for new construction.

6. It is recommended:

a. That in accordance with the revised estimates cited in paragraphs 3b (3) and 4, above, funds in the amount of \$901,020.00 for the completion of the approved road, trail and railroad program be included in FY 1942 estimates to supplement the \$350,000 expected to be released.

(b) That the revised estimates in the amount of \$252,000.00 be substituted for the \$236,000.00 now included in FY 1943 estimates for the maintenance and repair of military roads and trails and that \$100,000.00 of this amount be released to this department during FY 1942.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

Adjutant General. 3.

WAR DEPARTMENT,
Office, Chief of Coast Artillery,
June 12, 1941.

To: Chief of Engineers.

1. The records of this office indicate that the necessary action has been taken with a view to accomplishing the recommendations appearing in paragraph 6 a of 5th Indorsement, assuming that that portion of the recommendation reading "FY 1942" was intended to read "FY 1943"

2. With respect to the recommendation appearing in paragraph 6 b of 5th indorsement, preliminary estimates for FY 1943 do not now include a specific item for maintenance and repair of military roads and trails. The total sum now appearing in the preliminary estimates FY 1943 under Project 11—Alteration, maintenance and repair of fortifications—is \$225,000. FY 1942 estimates for Project 11 total \$173,710. The portion of these funds to be applied to maintenance of roads and to strictly fortification works appears to be discretionary with the Commanding General, Hawaiian Department. However, the basis for estimating these funds for FY 1941 included specifically \$59,000 as applicable to road maintenance.

For the Chief of Coast Artillery:

LEONARD L. DAVIS,
Lt. Col., C. A. C.,
Assistant.

WAR DEPARTMENT, A. G. O., July 18, 1941.

To: Commanding General, Hawaiian Department.

1. Funds in the amount of \$300,000 for railroads and \$50,000 for roads and trails are now available from FY 1942 appropriations for construction contained in the approved Road, Trail, and Railroad Program. These funds will soon be released to the District Engineer. Additional funds in the amount of \$900,000 have been included in tentative estimates, FY 1943 for the completion of the approved Road and Trail Program. This latter amount will be requested at an earlier time in the event that further supplemental FY 1942 estimates are prepared.

2. General maintenance funds to the amount of \$173,710 are now available from FY 1942 appropriations and a substantial amount thereof has been released to the District Engineer, Honolulu. The portion of these funds to be applied to the maintenance of roads is discretionary with you. Additional general maintenance funds to the amount of \$223,000 have been included in preliminary estimates, FY 1943.

3. An additional amount of \$140,000 will be included at the first opportunity in estimates to be submitted to provide further funds for maintenance of roads and trails in your department.

COMMANDER,
Fort Shafter, T. H., 5 April '41

[EXTRACT]

Subject: Construction at Bellows Field, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to 1st Indorsement, The Adjutant General's office, file AG 370.5 (2-15-41) M-D, dated 5 March 1941 which authorized the permanent assignment of the 86th Observation Squadron and the 58th Bombardment Squadron at Bellows Field.

* * * * *

5. The improvement of the runways consist in lengthening the present runway from about 2800' to 3400' and widening from 150' to 300'. The new runway is 5000' long and 300' wide. Cross-connection the existing and the new runway is a paved taxi strip and parking strip 300' wide and 2200' long with a servicing mat 300' x 600' adjacent to the taxi strip. All runways, servicing mats and taxi strips will be asphaltic concrete. Other installations required are an airdrome control tower and an aqua-gasoline system of 600,000 gallon capacity. The necessary

tanks for this gasoline system are on hand. A complete system of airport lighting and sewer, water, and power utilities will be necessary. Miscellaneous installations include man-proof fences around vital installations, improvement of the drainage of the camp area, pistol and 1000" machine gun ranges, and roads and sidewalks.

* * * * *

7. The improvements recommended are all necessary. Funds for improving the runways in particular should be expedited. The District Engineer has informed me that it is possible at this time to secure on the mainland the necessary plant and equipment for this paving but that unless contracted for in the very near future, it will not be much longer available.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER.
Fort Shafter, T. H., 2 May 1941.

Engr. 600.12

Subject: Construction at Barking Sands Field, Kauai, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's Office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The

Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Barking Sands Field on Kauai be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 6 officers and 107 men, and 1 National Guard company to provide local security of 4 officers and 116 men, total 10 officers and 223 men. In addition to this permanent garrison, two heavy bombardment squadrons of 37 officers and 206 men each from Hickam Field will be sent to Barking Sands for training. While these bombardment squadrons will change, two will be temporarily stationed at all times at this field. The total garrison at Barking Sands including temporary and permanent troops will be 84 officers and 635 men.

3. Some buildings have been and are being erected at this field by the WPA. Additional buildings will be necessary and the WPA Administrator has informed me that neither his material funds nor his available labor will be sufficient to complete the required program. There is inclosed as Inclosure No. 1 a tabulation showing the buildings, built and building by the WPA and the additional buildings required which include administration buildings, shops, warehouses, recreation buildings, mess halls, officers' quarters and other structures. Complete utility system should be provided for this camp. All buildings to be mobilization type.

4. Other construction recommended consists in improvement of flying conditions by the grading of two runways 5000' by 500' and the paving of a 200-strip on each runway for a length of 5000', the construction of a servicing mat and the installation of a complete airport lighting system. Storage for 450,000 gallons of gasoline will soon be installed by the District Engineer with funds now available to him; in this storage nine of the eighty [2] 50,000-gallon tanks now on hand will be utilized. These tanks are now designed for the aqua system; at this time, however, the tanks are being installed for storage only and if at a later date the necessity develops, this storage system can be readily converted into the aqua system. Also included in the cost estimates are miscellaneous items such as an airdrome control tower, pistol and 1000' ranges and man-proof fencing around vital installations. Roads within the camp area have also been included in the cost estimates; an improvement to the access road to this military reservation from the nearest point on the Kauai belt road has been the subject of discussion with the local public roads administration under the provision of Section 18 of the Federal Highway Act of 1940. Surveys of this road are now being made by the Territorial Highway Department; these surveys have not been completed. The local Public Roads Administration officials, based on a reconnaissance, estimate that this access road will cost about \$150,000. As it is doubtful whether either territorial or Federal Highway funds will be available for construction on this amount has also been included in the estimates. Telephone costs have been estimated at 2½% of building costs as directed in Chief Signal officer's radio of 11 March 1941. In determining the building costs a constructive evaluation of the work already done by the WPA based upon costs of the new buildings recommended in this letter was used to arrive at the total costs.

5. There are inclosed as Inclosures Nos. 2 and 3, a layout drawing of this field and a tabulation of cost estimates of the buildings and other improvements required. These cost estimates were prepared by the District Engineer, Honolulu, and include not only direct but also the indirect costs of the job. The total required to complete the installation is \$1,772,220.

6. It is recommended that the improvement of Barking Sands be authorized and that funds in amount of \$1,772,220.00 be released to the District Engineer, Honolulu, to initiate this construction.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

In reply refer to:
Via "Clipper" Air Mail
Engr. 600.12

Subject: Construction at Hilo Airport.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Hilo airport be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 4 officers and 50 men, and 2 National Guard companies to provide local security of 4 officers and 116 men each, total 12 officers and 382 men. In addition to this permanent garrison, one heavy bombardment squadron of 37 officers and 206 men from Hickam Field will be sent to this field for training. While this squadron will change, at least one will be temporarily stationed at this field a large part of the time. The total garrison at Hilo therefore will be 49 officers and 588 men.

3. Some buildings are now being erected at this field by the WPA. Additional buildings are needed and the WPA Administrator has informed me that neither his material funds nor his available labor will be sufficient to complete the required program. The buildings now being built and the additional ones required are tabulated in the cost estimates. A complete utility system is recommended. Buildings will be mobilization type.

4. The runways at the Hilo airport will be improved through a CAA contract under supervision of the District Engineer, Honolulu. Additional improvements needed are the installation of storage for 450,000 gallons of gasoline; for this 9 of the 80 50,000-gallon tanks now on hand will be utilized. These tanks were designed for the aqua system, but simple storage only is recommended at this time. If the need later develops, this storage can readily be converted to the aqua system as all fittings will be available on the tanks.

[2] 5. There are inclosed as Inclosure No. 1 a tabulation of cost estimates, and as Inclosure No. 2 a layout map of the field. In addition to the items already mentioned, these estimates include miscellaneous items such as roads, airdrome control tower, pistol and 1000 inch ranges and telephone installations. These telephone costs have been estimated at 2½ per cent of the building costs as directed in Chief Signal Officer's radio of 11 March 1941. In determining the total building costs a constructive evaluation of the work now being done by the WPA was combined with the estimated costs of construction recommended in this letter. The estimates in the tabulation were prepared by the District Engineer, Honolulu, and include indirect as well as direct costs of the job.

3046 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

6. It is recommended that this construction on the present military reservation at the Hilo airport be authorized and that funds in the amount of \$670,140 be allotted to the District Engineer, Honolulu, to complete the installation.

2nd Lt. F. A.

[2] 5. There is inclosed a tabulation of cost estimates. In addition to the items already mentioned, these estimates include miscellaneous items such as roads, airdrome control tower, pistol and 1000 inch ranges and telephone installations. These telephone costs have been estimated at 2½ per cent of the building costs as directed in Chief Signal Officer's radio of 11 March 1941. In determining the total building costs a constructive evaluation of the work now being done by the WPA was combined with the estimated costs of construction recommended in this letter. The estimates in the tabulation were prepared by the District Engineer, Honolulu, and include indirect as well as direct costs of the job.

6. It is recommended that this construction on the present military reservation at Homestead Field be authorized and that funds in the amount of \$407,600.00 be allotted to the District Engineer, Honolulu, to complete the installation.

1 Incl: Cost Estimates.

OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., May 2, 1941.

Engr. 600.12

Via "Clipper" Air Mail

Subject: Construction at Morse Field, Hawaii

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating condition. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Morse Field on Hawaii be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 6 officers and 107 men, and 1 National Guard company to provide local security of 4 officers and 116 men, total 10 officers and 223 men. In addition to this permanent garrison, two heavy bombardment squadrons of 37 officers and 206 men each from Hickam Field will be sent to Morse Field for training. While these bombardment squadrons will change, two will be temporarily stationed a large part of the time at this field. The total garrison at Morse Field including temporary and permanent troops will be 84 officers and 635 men.

3. Some buildings have been built at this station by troop labor. Other buildings have been and are being built by the WPA. Additional buildings and improvements are necessary; I believe that the requirements of training preclude any extensive use of troop labor and the WPA Administrator has informed me that neither his material money nor his available labor will be sufficient to complete the required program. These additional buildings will all be of mobilization type construction for use as operations buildings, shops, administrative and supply buildings, barracks, mess halls, magazines, etc. A complete system of utilities should be provided.

4. Other construction recommended consists in improvement of flying facilities by the paving of a main runway 3400 feet long and 300 feet wide, and its extension by grading, leveling and light paving to a length of 4150 feet and width of 400 feet. Because of prevailing wind conditions, only one paved runway is considered necessary by the Commanding General, [2] Hawaiian Air Force. Necessary taxi mats, service mats and warming up aprons will be graded and paved. A complete airport lighting system will be installed. Gasoline storage for 450,000 gallons utilizing nine of the eighty 50,000-gallon tanks now on hand will be installed; because of the shortage of water at this field, this will be plain storage and not the aqua system. There is inclosed as Inclosure No. 1, a layout map of this field. It will be noted that considerable areas in the vicinity of the runway are shown for light paving. This is necessary; the soil at this field is very fine and with the prevailing high velocity wind there is a serious dust problem as this dust affects the engines of the planes. The shortage of water makes stabilization by sodding or vegetation impracticable, and the most practical way that this problem can be solved is to stabilize by light paving.

5. There is inclosed as Inclosure No. 2 a tabulation of cost estimates of the buildings and other improvements required. In addition to the items already mentioned, miscellaneous items such as roads, pistol and 1,000 inch ranges, an Airdrome Control tower, and telephone installations have been included. These telephone costs have been estimated at 2½ percent of building costs as directed in Chief Signal Officer's radio of 11 March 1941. In determining the building costs a constructive evaluation of the work already done by troop labor and the WPA based upon costs of the new buildings recommended in this letter was used to arrive at the total costs. The estimates in the tabulation were prepared by the District Engineer, Honolulu, and include the indirect as well as the direct costs of the job.

6. It is recommended that the improvement of Morse Field be authorized and that funds in the amount of \$1,687,530 be allotted to the District Engineer, Honolulu, to complete the installation.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Ft. Shafter, T. H.

Engr. 600.12

Subject: Improvement of Airfield at Haleiwa, Oahu, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. At present the Hawaiian Air Force has under lease an unimproved landing field located at Haleiwa, on the north shore of Oahu, about ten miles airline distance from Wheeler Field. There are no paved runways, and no installations other than boundary marking lights. No permanent detachment is quartered there. The field is used for practice landings, etc. by the pursuit aviation at Wheeler Field.

3. It is proposed that this field be improved by the grading and paving of one runway 4000' by 300' and by the installation of other facilities for flying operations. These will include an operations building and airdrome control tower and storage for 100,000 gallons of gasoline using two of the eighty 50,000 gallon tanks now on hand. This storage will utilize the aqua system. A small galvanized warehouse for oil storage will be provided.

4. The only garrison at this field will consist of a small permanent detachment to refuel and handle planes on the ground and to operate radio and control installations. For this detachment a combined barracks and mess hall will be provided.

5. It is recommended that the improvement of Haleiwa Airport be authorized

as outlined above and that funds in the amount of \$450,000 be allotted to the District Engineer, Honolulu for this construction.

In reply refer to:

Via "Clipper" Air Mail

Engr. 600.12

Subject: Construction at Burns Field, Kauai, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. It is recommended that Burns Field be developed into an outlying field with a rotating garrison as follows: 1 air base detachment of 4 officers and 50 men, 1 National Guard company to provide local security of 4 officers and 116 men, total 8 officers and 166 enlisted men. In addition to this garrison, one heavy reconnaissance squadron of 43 officers and 233 men will be sent to this field for training. Either this squadron or a heavy bombardment squadron will be stationed at this field a large part of the time. The total garrison at the field will therefore consist of 51 officers and 399 men.

3. Some buildings have been erected at this field by soldier labor. Other buildings are necessary and soldier labor is not available for their construction. These buildings have been tabulated in the cost estimates, Inclosure No. 1. All buildings will be of mobilization type construction. The installation of a complete system of utilities is recommended.

4. The runways at Burns Field are authorized for improvement by a CAA project. Additional improvements needed are the installation of storage for 200,000 gallons of gasoline; for this four of the eighty 50,000-gallon tanks now on hand will be utilized. These tanks were designed for the aqua system, but simple storage only is recommended at this time. If the need later develops, this storage can be readily converted to the aqua system as all fittings will be available on the tanks.

[2] 5. There is inclosed as Inclosure No. 1 a tabulation of cost estimates. In addition to the items already mentioned, these estimates include miscellaneous items such as roads, airdrome control tower, pistol and 1000-inch range and telephone installations. These telephone costs have been estimated at 2½% of the building costs as directed by the Chief Signal Officer's radio of 11 March 1941. The estimates include direct as well as indirect costs of the job.

6. It is recommended that this construction be authorized on the present military reservation at Burns Field and that funds in the amount of \$636,163.00 be allotted to the District Engineer, Honolulu, to complete the installation.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H.

Via "Clipper" Air Mail

Engr. 600.12

Subject: Proposed Airfield on the Island of Lanai.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, the Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. Included in the plan for dispersion of facilities is a proposed airport on the Island of Lanai. A location has been selected and preliminary negotiations for leasing have been made. The land is owned by the Hawaiian Pineapple Company which is willing to lease it to the government on a twenty-five (25) year lease in return for one dollar a year rental and the use of the flying field. The location of the field, barracks area, and a proposed bombing range are shown on map, scale 1/62,500 inclosed as Inclosure No. 1. Project letter for the bombing range has already been submitted by letter to The Adjutant General, subject: "Construction of Night Bombing Range, Island of Lanai" file Engr. 686 dated 16 May 1941.

3. It is proposed to improve this field by the grading and paving of two 5,000' runways 300' wide and by the installation of facilities for flying operations. These will include the necessary operations buildings and shops, airdrome control tower and storage for 200,000 gallons of gasoline using four of the eighty 50,000 gallon tanks now on hand. Although these tanks were designed for the aqua system, only simple storage is proposed, although all the necessary fittings for later conversion to the aqua system will be installed.

4. The rotating garrison at this field will consist of an air base detachment of 4 officers and 50 men and a National Guard company for local security of 4 officers and 116 men, total 8 officers and 166 men. In addition to this garrison, a pur-

3052 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

suit squadron of 33 officers and 157 men will be temporarily stationed at this field for training. While this squadron will change at least one will be temporarily stationed at this field a large part of the time. The total garrison, therefore, will be 41 officers and 323 men.

5. There is attached as Inclosure No. 2 a tabulation showing in detail the buildings and other construction proposed with estimated costs. These costs include not only direct but also indirect costs of the job. The total cost shown on this tabulation is \$1,990,000.00.

6. The following is recommended:

a. That this headquarters be authorized to proceed with negotiations for the lease of this site.

b. That construction and improvements outlined in Inclosure No. 2 be authorized.

c. That funds in the amount of \$1,990,000.00 be allotted to the District Engineer, Honolulu, to complete this installation.

OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 2 May 1941.

Via "Clipper" Air Mail
Engr. 600.12

Subject: Construction at Proposed Airport, Parker Ranch Area, Hawaii, T. H.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, The Adjutant General's office, file AG 580 (3-7-41) M-C-M, 14 March 1941, subject: "Army's Second Aviation Objective." At the present time the existing units of the Hawaiian Air Force are overcrowded with the facilities available on Oahu. Additional first-class airports are urgently needed for present units and those immediately contemplated for reasons of training and operations in time of peace; in addition to this peacetime need more fields are required for purposes of dispersion under operating conditions. The Second Aviation Objective outlined in the letter cited will increase this existing need.

2. There has been for some time a realization that an additional field was necessary on the Island of Hawaii, and extensive studies have been made on its location. The best location found was about four miles from the town of Waimea on land owned by the Territory of Hawaii, and at present under lease to private cattle interests. The site consists of about 1,360 acres, and it is believed that the land can be transferred to the Federal government under Section 91 of the Organic Act. Preliminary negotiations to this end have been opened with the Territory. The location of the field is shown on map, scale 1/62,500, inclosed as Inclosure No. 1.

3. It is proposed that this field be improved by the grading and paving of three 5000-foot runways and by the installation of facilities for flying operations.

3054 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

These will include the necessary operations buildings, and shops, airdrome control tower, and storage for 300,000 gallons of gasoline, using 6 of the eighty 50,000-gallon tanks now on hand. Although these tanks were designed for the aqua system, only simple storage is proposed, as the shortage of water will preclude use of the aqua system. There is inclosed as Inclosure No. 2 a print of Department Engineer Map No. 11-1-25D41 which shows the boundary of the land and the location of the three 5000-foot runways.

4. The rotating garrison at this field will consist of an air base detachment of 4 officers and 50 men and a National Guard company for local security of 4 officers and 116 men, total 8 officers and 166 men. In addition to this permanent garrison, a heavy bombardment squadron of 37 officers and [2] 206 men will be temporarily stationed at this field for training. While these squadrons will change at least one will be temporarily stationed at this field a large part of the time. The total garrison therefore will be 45 officers and 372 men.

5. There is attached as Inclosure No. 3 a tabulation showing in detail the buildings and other construction proposed with estimated costs. These costs include not only direct but also indirect costs of the job. The total cost shown on this tabulation is \$1,992,600.00.

6. The following is recommended:

a. That this headquarters be authorized to proceed with negotiations for the acquisition of this site.

b. That construction and improvements outlined in Inclosure No. 3 be authorized.

c. That funds in amount of \$1,992,600.00 be allotted to the District Engineer, Honolulu, to complete this installation.

Fort Shafter, T. H., April 14, 1941.

In reply refer to:

Via "Clipper" Air Mail

Engr. 600.12

Subject: Additional Airdrome, Hawaiian Department

To: The Adjutant General, Washington, D. C.

1. The recent and anticipated increases in the Pursuit Wing of the Hawaiian Air Force have emphasized the need of an airdrome to supplement the existing facilities at Wheeler Field. The latter field is now badly overcrowded with the planes stationed there.

2. A very thorough study has been made of the location of this additional air field by the Commanding General, Hawaiian Air Force, Department Engineer and the District Engineer. At least five separate locations were given serious consideration; one of these in the Barbers Point area was discarded first because of its proximity to the beach and second, because of objections by the Navy to interference with the new carrier aviation base in the Ewa plane area. Another location at Kahuku was discarded because of its proximity to the beach. A third on the flat ground about three miles north of Wahiawa was discarded by the Hawaiian Air Force because of bad flying conditions from turbulent air conditions. A fourth location in the general area to the east of the crossing over Kipapa Gulch by the Kamehameha Highway was discarded for similar flying reasons. The area finally selected between the Kipapa and Waikakalua Gulches and west of the Kamehameha Highway is believed to be the best possible location of this airdrome on the island of Oahu. There is inclosed a map on the scale of 1/20,000 showing the location of this field.

3. The garrison to be stationed at this field will consist of the 15th Pursuit Group of 84 officers and 729 enlisted men, an air base group (single) 28 officers and 490 men, and miscellaneous detachments of 5 officers and 75 men. Total strength 117 officers and 1,294 men. Complete construction with mobilization type facilities must be provided for the housing of this garrison. The present construction authorized for Hickam, Wheeler and Bellows Fields is insufficient or the needs of those three stations and it will be impossible to transfer any of the existing authorization to this new field.

4. It is estimated that at least 75% or 88 of the officers will be married and of this number 10% or 9 will be senior officers. Since there are no locations in this vicinity where these officers can be placed upon commutation and live in private quarters and also because of the tremendous housing shortage on Oahu, it is believed that Government quarters should be provided for these married officers. Recognizing that this [2] field must be constructed under emergency appropriations, it is proposed that these quarters not be as elaborate as usually constructed on Army Posts. With the unit costs estimated, houses similar in construction to the average in Honolulu can be provided. In addition it is also estimated that there will be 135 married noncommissioned officers in this garrison. Adequate quarters will also be provided for these married enlisted men and it is recommended that the War Department secure from the Federal Building Administration authorization for the construction of 135 low cost housing units at this field.

5. The improvement for flying operations consists of the installation of three runways each 5,000 feet long with a graded width of 400 feet and a paved width of 200 feet; the paving of taxi strip 200' x 5,000' and a servicing apron 300' x 600'. A complete installation of airport lighting is proposed. Bunkers for the protection of airplanes against hostile bombardment will be installed as part of the airport and the cost of these bunkers and necessary approaches are included in the cost estimates. It is also proposed to install storage for 900,000 gallons of gasoline with the aqua system. In this storage 18 of the 80 50,000 gallon tanks now on hand will be utilized.

6. The housing proposed will be mobilization type construction. It will include barracks, mess halls, and recreation facilities for the men, buildings for flying operations such as an airdrome control tower, Air Corps technical schools, supply rooms, and housing for maintenance facilities. In addition mobilization type construction is proposed for the necessary post overhead, buildings such as a fire station, a guard house and an infirmary and warehouses for commissaries, etc. A complete system of utilities is covered in the estimates. In designing the water supply and sewage disposal systems provision has been made for the eventual expansion of the garrison to 4,000 men. This increase in capacity is proposed to take care of the possibility of assigning an antiaircraft regiment as part of this garrison. Shown on the map accompanying this letter are two areas shaded in blue. The area near the runway will be used for the construction of the service buildings incidental to flying operations. The 40 acre tract shown to the north of the runways will be utilized for construction of housing facilities for both officers, married noncoms, and enlisted men. The land where the runways and the adjacent blue area are located is now cultivated cane land. The area of the 40 acre tract is cultivated pineapple land; the cane land involved is about 250 acres minimum. If these sites are secured by lease it is estimated that the cane land will cost \$30.00 per acre per year and the pineapple land \$25.00 per acre per year, or a total annual rental of \$8,500. If this land is purchased the cane land will cost about \$1,000 and the pineapple land about \$500.00 per acre; a total cost of about \$270,000.

7. There is inclosed a tabulation showing the buildings which should be constructed with cost figures and cost estimates on runways and other flying facilities and on utility systems. These estimates show a total estimated cost of \$4,668,950 not including cost of land. As stated shows if the land is leased there will be a yearly rental of \$8,500. If the land is purchased the total cost is estimated at \$4,938,950.

3056 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3] 8. It is recommended that the proposed location of this new field be approved and that funds in the amount of \$4,668,950 be allotted for construction if the War Department decides that securing the land on a lease basis is satisfactory. It is further recommended that if the War Department decides that this land should be purchased, additional funds in the amount of \$270,000 be made available.

Fort Shafter, T. H., April 14, 1941.

In reply refer to: Engr. 600.96
Subject: Protection of Seacoast Defense Batteries.
To: The Adjutant General, Washington, D. C.

1. Reference is made to your secret radiogram No. 708, 4 April 1941, which was on the subject of protection for the seacoast defense batteries in this department and which suggested a conference with Mr. J. C. Letts of the Office of the Chief of Engineers during his recent visit in this department.

2. This radiogram stated that a letter covering this construction was being forwarded by mail. This letter has not as yet been received in this department. In order to save time, however, we're submitting recommendations without waiting for the arrival of this letter as its subject matter was explained in general by Mr. Letts.

3. There are three batteries involved in this protection; these are the two 16-inch gun batteries, Battery Hatch at Fort Barrette and Battery Williston at Fort Weaver and a 12-inch barbette gun battery, Battery Closson at Fort Kamehameha. A study of this problem has been made jointly by the Commanding General, Hawaiian Separate Coast Artillery Brigade, the District Engineer and Mr. Letts. They recommend the casemating of Battery Hatch and Battery Closson and provision of a tunnel type shield for Battery Williston. There is inclosed a chart showing the fields of fire of these batteries after the protection is installed. From this chart it will be seen that Battery Hatch has a field of fire from azimuth 295 to azimuth 80; and Battery Williston, a 360° field of fire. The red shading on this chart indicates the area in which the fire of four 16-inch guns can be placed. The yellow shading shows the additional area which can be covered by the fire of two 16-inch guns at Fort Weaver. The existing range circle of Battery Hatch is shown by the red line and Battery Williston by the black line. The chart indicates that there is an area about 5,000 yards in range west of Oahu which is now covered by the fire of Battery Hatch and which is not covered by the fire of Battery Williston. On the east side of the island the area now covered by fire from Battery Hatch, which is sacrificed by the casemating is well in the field covered by Battery Williston. The only loss in coverage is in the 5,000 yards to

the west of the island and in the fact that the general area is now covered by the fire of only two 16-inch guns while under present arrangement this area is in part covered by the fire of four 16-inch guns.

[2] 4. I do not believe that this loss in coverage is at all important when compared to the necessity of providing protection for Battery Hatch in particular, and therefore concur in the recommendations of the Commanding General, Hawaiian Separate Coast Artillery Brigade.

5. Your radio also referred to our letter, subject: "Bombproof Construction for Magazines at Fort Barrette and Fort Weaver," dated 4 February 1941. The recommendations contained in this letter are reiterated. Since the recommendation is made that Battery Williston should have tunnel type shield protection which does not provide any protection for ammunition, a bombproof magazine for at least one-half of the propelling charges should be provided at that battery. Also due to the exposed position of Battery Hatch and the impossibility of camouflaging the existing magazines, it is believed that a bombproof magazine for one-half of the propelling charges should be provided at that battery in addition to the bombproof storage for 50 complete rounds in each casemate.

6. Reference is now made to letter, this headquarters, subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." dated 18 February 1941, file 381, in which the War Department was advised that this department was assuming responsibility for the defense of the Kaneohe Bay Area. It is believed that the growing military and naval importance of Kaneohe Bay area makes it essential that a major calibre seacoast battery be installed for its protection. The need for this battery is urgent and its installation should not wait upon the manufacture of the armament. It is understood that there are some 12-inch long range gun batteries similar to Battery Closson on the mainland where the need for them no longer exists and it is recommended that the armament of one of these batteries be shipped to this department and funds provided for its emplacement in the Kaneohe Bay area.

7. The following is therefore recommended:

a. That protection be provided for Battery Hatch by the construction of casemates and overhead cover, at Battery Closson by the construction of overhead cover, and at Battery Williston by the installation of tunnel type shields.

b. That a bombproof magazine for one-half of the propelling charges be authorized for Battery Williston and a similar magazine be authorized for Battery Hatch in addition to the storage of 50 rounds in each of the casemates.

c. That the armament of a 12-inch gun battery similar to Battery [3] Closson to be obtained from a location on the mainland where it is no longer needed and shipped to this department and installed to cover the Kaneohe Bay area.

(s) Walter C. Short

Kaneohe Bay Project.

Secret

Subject: Coast Artillery Armament for Naval Air Station, Kaneohe Bay.

To: The Adjutant General, Washington, D. C.

1. References:—

A Secret letter HHD to TAG, 14 April 1941, subject: "Protection of Seacoast Defense Batteries" file AG 662.1 (4-14-41)MC-E, HD Engr 600. 96, with 4 indorsements.

B Secret letter TAG to HHD, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." file AG 381 (3-13-41) M-WPD, with 1st Indorsement HHD to TAG dated 16 June 1941.

2. The attached study was prepared by the Commanding General, Hawaiian Separate Coast Artillery Brigade in accordance with the directive contained in the 4th indorsement to reference A. In considering this study, reference should be made to a similar study which was submitted as an enclosure to 1st indorsement, reference B.

3. The recommendations contained in paragraph 6 of the attached study of the seacoast and antiaircraft defenses required for the protection of the Kaneohe Bay Naval Base (Incl. #1) are approved with the following exceptions:

a. It is believed a large proportion of the 15 AA searchlights recommended in paragraph 6a. should be equipped with SCR 268 sets instead of the M2 sound locators. The severe limitations imposed by the terrain and normal atmospheric conditions present in this area make mandatory the early detection of hostile aerial targets.

b. In order that personnel may be available to establish a headquarters for the Harbor Defenses of Kaneohe Bay, it is believed that instead of augmenting the seacoast personnel, as recommended in paragraph 6d. (2) by one battalion (TD) and three separate batteries (HD), that the increase should consist of one Coast Artillery regiment (HD), type B, (T/O 4-71, Nov 1/40), less band and one battalion. This organization will provide the necessary command and staff and attached medical personnel to permit the proper tactical organization of the defenses. The 155mm battalion can take the place of the second battalion of the Harbor Defense Regiment.

[2] 4. It is recommended;

a. That the eventual project for defense of the Kaneohe Bay Naval Air Station and Bellows Field, based on the installation of fixed armament, be as follows:

(1) *Armament:*

(a) *Seacoast:*

- 2 155 mm Gun Batteries (latest type).
- 2 6" Fixed Gun Batteries (2 guns each).
- 1 16" Long Range Casemated Gun Battery of 2 guns on Barbette Carriages.

(b) *Antiaircraft:*

- 3 90 mm AA Gun Batteries.
- 3 37 mm AA Gun Batteries to consist of 10 guns each.
- 48 Caliber .50 AA Machine Guns.
- 15 AA searchlights together with a minimum of 6 SCR 268 sets and 9 M2 sound locators.

(2) *Personnel:*

(a) *Seacoast Artillery:*

- 1 Battalion Coast Artillery (TD), 155 mm guns, (T/O 4-35, Nov 1/40).
- 1 Regiment Coast Artillery (HD), type B, less band and one battalion, (T/O 4-71, Nov 1/40).

(b) *Antiaircraft Artillery:*

- 1 Regiment Coast Artillery (AA), semi-mobile, less one gun battalion, (T/O 4-111, Nov 1/40).

b. That initially based on armament now available in the Hawaiian Department, the defense be constituted as shown below. The seacoast armament and personnel to be used in this defense must be moved from previously assigned positions in other parts of the island, thereby weakening the defense in other areas.

(1) Considering only personnel now present and available:

- 1 155 mm Gun Battery.
- 1 155 mm Gun Battery with additional assignment of five antiaircraft searchlights.
- 1 8" Railway Gun Battery.
- 2 3" Antiaircraft Gun Batteries.
- 1 Seacoast Searchlight Battery.

(2) Assuming that personnel under paragraph 4 a (2) (a) above will be made available at an early date and using armament now available in War Reserve, the defense can be organized as shown below. Under this plan no movement of armament from present assigned positions is required:

- 2 155 mm Gun Batteries
- 1 155 mm Gun Battery with additional assignment of five antiaircraft searchlights.
- 1 8" Railway Gun Battery.
- 2 3" Antiaircraft Gun Batteries.
- 1 Seacoast Searchlight Battery.

[3] *c.* That the increase in personnel and in major items of armament recommended in paragraphs 6 *a* and *b*, reference B, insofar as they relate to the Coast Artillery be amended to conform to paragraph 4 *a.* above.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

1-Incl: Revised Study on Seacoast and Antiaircraft Artillery Defense of the Kaneohe Naval Air Station (Secret) in trip.

A True Copy:

Edward Von Geldern.
EDWARD VON GELDERN,

[SECRET]

[1]
Subject: Coast Artillery Armament for Naval Air Station, Kaneohe Bay, Hawaiian Department.

AG 381 (7-31-41) MC-E 3rd Ind.

WAR DEPARTMENT, A. G. O., October 30, 1941.

To: Commanding General, Hawaiian Department.

1. Reference is made to:

a. Letter, this office, April 8, 1941, AG 381 (3-13-41) N-WPD, subject: Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H.

b. Radio No. 320, your headquarters, September 13, 1941.

c. Letter, your headquarters, September 18, 1941, Engr. 662/4 x 662/7, subject: Provision of three (3) Panama mount 155-mm Battery Positions and one (1) 8-inch Railway Gun Battery Position for the defense of Kaneohe Bay, Oahu, T. H.

2. The following temporary measures for the defense of the Kaneohe Bay area are approved:

a. Movement of one battery of 8" railway guns now in storage at Fort Kamehameha to Mokapu Peninsula and temporary installation at site designated by you in reference *c* subject to local coordination of site with the Navy.

b. Installation of two batteries 155-mm guns on Panama mounts at sites to be selected by you.

3. Immediate personnel and armament requirements will be set:

a. By the transfer to the Hawaiian Department of the following units at their allotted strengths:

(1) One battalion, 57th Coast Artillery, TD, with battalion section, supply platoon (T/O 4-32) and battalion section, Medical detachment (T/O 4-31), attached, less guns and fire control equipment.

(2) 95th Coast Artillery (AA), Semimobile (less one gun battalion), with armament and equipment on hand. Authority is granted for the reorganization of the 37-mm gun battalion of this regiment into three [2] 37 mm gun batteries (8 guns each) and one (1) Caliber .50 MO battery (AA) (12 guns).

b. By the local activation of one 8" railway battery (R/O 4-47) from personnel available in the Hawaiian Department.

4. Guns and fire control equipment for the battalion of 155 mm guns and the 8" railway battery will be furnished from defense reserves on hand in the Hawaiian Department. Shortages will be filled in accordance with approved War Department priorities.

5. Personnel and equipment mentioned in Paragraph 3 *a.* above will be dispatched to the Hawaiian Department by first available shipping. It is estimated that troops will begin to arrive in your department about December 1, 1941. The shipment of the major items of organizational equipment and armament for reinforcing units is dependent upon the availability of bottoms of which no accurate forecast can be made at this time.

6. Theater of operations type housing is authorized for the personnel listed in paragraph 3 above. It is desired that estimates covering housing for this increased garrison be made the subject of separate correspondence.

7. Ultimate approval of one 8" seacoast battery (fixed) in lieu of the 16" battery recommended by you, and of two 6" seacoast batteries (fixed) to replace the two batteries of 155 mm guns authorized for temporary defense is probable.

3060 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

The 8" seacoast guns will not be available before July, 1942, and the 6" seacoast guns not before December, 1942.

8. In view of the expected approval of fixed armament for the Kaneohe Bay Area the plan submitted by reference c for the installation of the 8" railway battery on Mokapu Peninsula and for the construction of 155 mm gun positions is considered too elaborate. Plans should be revised to provide for temporary installation of the 8" railway battery, and for construction of Panama mounts for two 155 mm gun batteries. Provision should be made for splinterproofing magazines and plotting room only and should be confined to that which can be constructed by field fortification methods and materials.

9. A revised project, to include detailed estimates of cost, is desired for the defense of Kaneohe Bay based on two batteries of two 6" BC guns, and one battery of two 8" BC guns, all shielded type.

[3] 10. No change in the eventual project for the antiaircraft defense of Kaneohe Bay over that prescribed for the temporary defense Paragraph 3 a (2) above, is contemplated.

11. Reinforcement of either the peace or war garrisons of the Hawaiian Department by additional troops for the beach and land defense of Kaneohe Bay is not contemplated at this time.

By order of the Secretary of War:

(s) E. S. ADAMS,
Major General,
The Adjutant General.

Via "Clipper" Air Mail

Subject: Provision of three (3) Panama Mount 155-mm Battery Positions and one (1) 8-inch Railway Gun Battery Position for the Defense of Kaneohe Bay, Oahu, T. H.

To: The Adjutant General, Washington, D. C.

1. References:

a. Secret letter TAG to HHD, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H." file AG 381 (3-13-41) M-WPD, with 1st Indorsement HHD to TAG dated 18 June 1941.

b. Secret letter HHD to TAG, 5 June 1941, Subject: "War Garrison for Initial War Operation", file AG 320.3/37b, with 1st Indorsement TAG to HHD, dated 22 July 1941.

c. Secret letter HHD to TAG 31 July 1941, Subject: "Coast Artillery Armament for Naval Air Station, Kaneohe Bay", file AG 381/20.

2. Reference a. directs that the Army assumes the responsibility for the defense of the Kaneohe Bay area. A study by this headquarters of the armament requirements for the defense of Kaneohe Bay and submitted by my 1st Indorsement to reference a. requested the inclusion of the following items of Seacoast Defense Armament in the Hawaiian Defense Project for this purpose:

3 Batteries of 155-mm guns.

1 Battery of two 12-inch barbette guns with related equipment

3. A restudy of the project for the defense of the Kaneohe Bay area submitted by reference b. recommended that the following armament be provided:

Two 155-mm gun batteries

Two 6-inch fixed gun batteries of two guns each

One 16-inch long range casemated gun battery of two guns on barbette carriages.

[2] 4. A realization of the fact that it will be at least two years before these items of fixed armament, namely, the two 6-inch batteries and the one 16-inch battery, can be installed, makes it necessary that some provision be made immediately for the employment of mobile artillery to defend this area. The 1st Indorsement from The Adjutant General's Office to reference b. authorized the following additional units for the defense of Kaneohe Bay:

One battalion of Coast Artillery, 155-mm guns with one additional gun battery.

One Harbor Defense Battery.

Pending the installation of the fixed batteries, it is recommended that the Seacoast Defenses of the Kaneohe area consist of the following items of mobile artillery:

Three 155-mm gun batteries.

One 8-inch railway gun battery.

The proposed locations and fields of fire of these batteries are shown on map, Inclosure No. 1.

5. Since there is no railroad running from Honolulu to Kaneohe Bay, it will be necessary to move this railway battery to Kaneohe Bay by truck trailer, and it is proposed to install this battery on fixed mounts similar to those of Battery Granger Adams on Black Point.

6. Each of the 155-mm battery positions should include the following:

(1) 4 Panama mounts.

(2) 4 splinterproof ammunition shelters for 25 rounds at each gun position.

(3) 4 gun bunkers.

(4) 4 splinterproof personnel shelters.

(5) 2 splinterproof propellant shelters for 150 charges each.

(6) 2 splinterproof projectile shelters for 150 projectiles each.

(7) 1 splinterproof plotting room.

(8) The roads and ramps necessary for the occupation of the position.

(9) Camouflage treatment of all the above listed installations.

Considering the urgent need for combat training and the large amount of labor required to complete field works now being constructed by the troops of this command, it is believed advisable to construct these positions by contract.

3062 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[3] 7. The cost of installation of the three batteries of 155-mm guns including the acquisition of land has been estimated at \$93,630.00. The cost of the transportation and installation of the 8-inch railway battery in an emplacement similar to that of Battery Granger Adams has been estimated at \$121,635. These estimated costs include both direct costs and indirect costs. Inclosure No. 2 is a tabular breakdown of these cost figures.

8. It is recommended that the installation of these three batteries of 155-mm guns with the necessary field fortifications and the construction of one 8-inch gun battery position be approved, and that funds in the amount of \$215,265.00 be allotted to the U. S. District Engineer, Honolulu, for construction.

WALTER C. SHORT,
Lieutenant General, U. S. Army,

WAR DEPARTMENT,
OFFICE, CHIEF OF THE AIR CORPS,
Washington, D. C., August 25, 1941.

To The Adjutant General THRU Chief of Engineers.

1. Attached hereto is a copy of the radiogram transmitted to the Commanding General, Hawaiian Department, Fort Shafter, T. H. on July 15, 1941.

2. In explanation thereof, you are advised that this office concurs with the opinion that the uneven areas in the runways, referred to in the basic communication, should be eliminated in the interests of safe operation.

3. This office considers runways of 4,500 feet in length to be an absolute minimum for military airports at sea level, with an additional 500 feet of length for

each 1,000 feet of elevation or fraction thereof. This minimum likewise meets the requirements for the future installation of an instrument landing facility, if there is provided that the same time forty to one clear angles of approach at both ends of the runway in question.

4. If such clearances are not available at the north end of the present N-8 runway, or of the proposed new N-8 runway, because of quarters built at that end of the field, then the runway lengths should be extended on the southerly ends sufficiently to insure that a 4,500 foot length of runway will exist south of a point where a forty to one clearance angle may be realized.

5. There is no objection to the runway crossing the railroad spur, if necessary, providing the runway pavement is kept flush with the top of the rails and there is; no break in the runway grade, and providing, of course, rail traffic is controlled. If a difference in grade exists, the rail grade should be brought to that of the runway, or the spur relocated.

6. It is requested that the District Engineer be advised of these considerations, and that his new estimates be made accordingly.

7. No funds are available at this time for the construction and improvements recommended in the basic communications. The recommendation, however, will be placed in our "Suspense File" for further consideration upon receipt of a revised estimate, and when funds therefore become available.

For the Chief of the Air Corps:

29 SEPTEMBER 1941.

SIG 676.3

Subject: Aircraft Warning Service Installation Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, file AG 660.2 A. A. (7-5-41) MC-E, 8 July 1941, subject: "Aircraft Warning Service Philippine and Hawaiian Departments." A report of a Board of Officers convened at this headquarters to restudy the AWs project is being transmitted to the War Department by Clipper mail under separate cover. This board has considered the employment of the six fixed and six mobile stations allocated to this Department by the War Department. The increased number of stations now available has necessitated some adjustments in both type and location of the stations in the previously approved project of three fixed and five mobile units, as well as new locations. The results of this restudy are covered fully in the report being submitted, and are summarized in the following paragraphs.

Locations a. Kauai. There have been no changes in the fixed station now approved at Kokee. In the former project the mobile station on Kauai was planned for operation on the Waimea Kokee road. This mobile station is now recommended for operation on the coast north of Kilauea Village at latitude 22°13'50", longitude 159°23'54". There is no change in the base camp at Kauai which is now under construction at Kokee for the personnel of both the fixed and mobile stations.

b. Maui. No change has been made in the previously approved fixed station which is now under construction at Red Hill on Haleakala. Formerly approved project contained a mobile station to operate along the road up Haleakala. The project now being submitted makes no change in this mobile unit.

c. Hawaii. The former project contained a mobile station for the Island of Hawaii, which was to be operated from the upper terminus of the Mauna Loa truck trail, with a base camp for personnel at the Kilauea Military Camp. This station has been eliminated in the restudy and has been replaced by a fixed station in the vicinity of Pahoa at latitude 19°26'50" and longitude 154°57'5", and by a mobile station to operate from an initial position near Kahuku Ranch at latitude 19°30'30", longitude 155°41'40". A base camp similar to that on Kauai will be constructed near the fixed station for the personnel of both that station and the mobile unit.

3066 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

d. Oahu (1) There is no change in the previously approved fixed station for Mt. Kaala.

(2) The formerly approved mobile station at Manawahua is to be replaced by a fixed station.

(3) Opana. Under the former project, there were not sufficient [2] stations to emplace one on the north shore of Oahu. With the increase in the number of stations allowed, this is now possible and it is recommended that a fixed station be installed at the Opana Triangulation station at coordinates (98.655-19.182).

(4) The increase in the number of stations has also made advisable the consideration of other locations for mobile units on Oahu. This reconsideration indicated that a location at Makapuu Point had many advantages over the former approved Pali location, and it is accordingly recommended that the Makapuu Point Station be considered as an initial operating position in lieu of the former Pali location.

(5) The increase in the number of stations allowed has also made possible the provision of units in reserve against the possibility of failure of one of the primary stations. Since Oahu is the central point in the islands for which protection must be secured, it has been decided to concentrate the reserve units on this island. For this purpose two mobile units are recommended as a mobile reserve and for general operations on Oahu and on other islands if necessary. These stations will be utilized as needed to either replace the other Oahu stations or reinforce the coverage in certain sectors. Locations on Oahu which have been considered for their employment are the Pali location discussed above, on the high ground along Tantalus Road, at Fort Shafter, and at various points along the coast.

(6) Information center. There has been no change in the previous location for the Information Center which is now under construction at Fort Shafter. In compliance with other directives, this installation has been combined with various command posts into an air defense command post.

(7) No base camps are being provided for the stations on Oahu as the personnel will be housed in construction already approved for the Signal Area, Fort Shafter. The same construction, however, will be built at the Manawahua and Opana fixed stations as is now approved for Kaala.

2. Reference is made to 2d Ind, Hq Haw Dept, OSigO, 31 May 1941, to the letter Sig. 676.3 (AWS) dated 17 October 40 in which Signal funds totalling \$75,281.84 were requested for the installation of radio and wire facilities for the original three fixed and five mobile stations. Due to the abandonment of the mobile station at the Nuuanu Pali on Oahu and the Moana Loa Station on Hawaii, this sum can be reduced by \$2,296.00 to \$72,985.84. The allocation of additional stations has necessitated increased demands for Signal communications. These additional communication facilities are summarized as follows:

a. Radio facilities for the control from the Information Center of pursuit task forces. This includes a station at the control airdrome with four satellite stations at the principal pursuit fields on Oahu.

Total cost \$55, 000

b. Emergency power for pursuit radio control transmitters. This power is to allow the operation of pursuit control during commercial power failure.

Total cost \$12, 000

c. Commercial power extensions to include provision of adequate commercial power for the base camps and the principal alert stations at locations where this is economically feasible.

Total cost \$39, 000

[3] d. AWS radio communication facilities to include additional transmitters and receivers at the new fixed stations, receivers at the Information Center and allied antenna and control equipment as established by standard practice.

Total cost \$18, 000

e. AWS wire and cable facilities to include additional cable extensions for the added stations on Oahu, together with additional telephone and teletype equipment. This item also includes a cable installation from the Hawaii base camp to the detector unit at Pahoehoe.

Total cost \$10, 900

f. Commercial wire facilities to include leased lines from all base camps to the nearest commercial exchange, leased lines from the principal alert stations to the nearest exchanges, together with the yearly rental charge.

Total cost \$10,463.67
Total Sig funds 145,400.00

3. Estimates for the internal wire facilities of the Information Center and the allied Air Defense wire facilities are being held in abeyance pending more reliable information upon which to estimate the necessary funds. It is believed, however, that estimates for the Information Center should be included in the next available appropriation bill. Information Center layouts and schematic diagrams of the Information Center Wire Net have been forwarded to the Chief Signal Officer for review. This data is being transmitted as an inclosure to the aforementioned board proceedings.

4. Funds in the amount of \$890,804 have been made available to the Dist. Engr. Honolulu, to complete the previously approved project of three fixed and five mobile stations. Some of these funds were for stations which are being superseded by other stations in the revised program. The tabulation below shows cost estimates on the new stations, less the amounts available from the superseded stations, and the total of engineer funds supplementing those now on hand required to complete the revised projects.

Item No.	Description	Oahu Manawahua	Opana	Makapuu	Kauai Kilauea	Hawaii Pahoehoe	Kahuku
1	Cost of Site	\$2,000	\$2,000		\$2,000	\$7,500	\$500
2	Clearing	300	200			300	
3	Grading	2,700	800	\$500	500	700	200
4	Right of Way-Access Road	500	500		500	1,800	200
5	Road Constr.	58,470	28,000	5,700	24,800	9,000	3,000
6	Bldg. Constr.	26,280	29,250	11,965	12,300	74,720	12,070
7	Fuel Storage	1,900	1,900			2,700	
8	Water Supply	2,970	4,400	200	2,000	9,000	1,000
[4] 9	Sewage Disposal	900	1,000	1,000	500	2,970	500
10	Man Proof Fence	2,000	2,000			3,000	
		98,000	70,050	19,365	42,600	111,690	17,470
					Oahu	Kauai	Hawaii
Subtotals by Islands					\$187,415	\$42,600	\$129,160
Funds now available from superseded sites					76,735	12,600	36,217
Supplemental funds required					110,680	30,000	98,943

Total \$233,623
Mobilization of Personnel and Plant at 3% \$7,010
Total direct costs 240,633
Contingencies, Contractors Fee, Social Security, Workmen's Compensation and Insurance at 15% 36,100
Engineering, Surveys, Inspection and Auditing at 18% 19,250
General Office Overhead at 8% 19,250
Grand Total Engineer funds 315,233

5. Secret radiogram No 321, this hq, 13 September 41, submitted for advance consideration the above cost estimates with the exception of those which had been previously submitted as stated in par 2 above. Since no information has been received concerning the previous recommendation, those estimates are being added to the figures submitted by the radiogram cited.

6. I strongly recommend that funds in the amount of \$315,233 for engineer construction, and \$218,400 for signal communications and one year's rent of leased wire facilities, total \$533,633, to be included in pending appropriation bills, and made available as soon as possible for the completion of the revised project.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

Engr. 523.07

Subject: Priorities and Preference Ratings.

To: The Adjutant General, Washington, D. C.

1. On 4 June 1941 I wrote a letter, file Engr. 523.07, subject: "Priority in Shipping Space for the Hawaiian Electric Company", in which the question of securing shipping space priorities for this company was discussed. A copy of this letter is inclosed for ready reference. At that time the main problem was the securing of shipping space; since then it has developed that difficulties are also arising concerning the procurement of materials. I have directed that an investigation be made of this priority question, and the results of this investigation indicate that some clarification and coordination is highly desirable.

2. At the present time priorities and preference ratings for Army activities are assigned by the various procurement agencies and contracting officers. There is now no coordination in the Department between these various agencies, each of which is dealing direct on priorities questions with its Chief in the War Department. This is satisfactory as long as only one procurement agency or contracting officer is involved. There are cases, however, in which more than one agency is involved, and the number of these will undoubtedly increase in the future; I believe it is advisable to have a coordinating agency in the Department to not only coordinate these cases locally, but also to bring to the attention of the War Department the advisability of similar coordination between the Chiefs of the respective agencies. Also there are many procurement problems on which the establishment of priorities and preference ratings is necessary which no agency is now handling. The 14th Naval District has already established a central priority office in the local bureau of supplies and accounts where priorities information is kept available, and where preference ratings on all Navy orders are issued.

3. The following outlines in greater detail some of the problems on which difficulty has already been encountered:

a. We have some projects in which more than one supply or construction branch is interested. While there is no complaint with the present system by which each agency handles priority matters with its Chief in the War Department there is a probability that desirable action by one agency may be overlooked with the result that the second agency might be held up in its work even though it had taken all action necessary.

[2] b. Hawaii presents a special problem in procurement as do the other overseas departments, due to the shipping situation. The present priorities instructions are concerned with procurement; in this Department, however, priorities on shipping space are important. There are large quantities of essential materials transported on commercial shipping. These shipments involve not only government shipments but also shipments by private concerns of materials which are to be incorporated in defense installations.

c. Practically all construction materials must be imported into the island. The various constructing agencies are, of course, anticipating their needs and are having materials procured on the mainland and shipped to the department. It is impossible to anticipate every item needed, and in the past the various supply houses in the department, such as the Honolulu Iron Works, the Hawaiian Electric Company, and others, have maintained local stocks from which small items could be procured as they were needed. These local stocks are now becoming a matter of concern. For example, the mainland agents of the Hawaiian Electric Company have advised the company that it can not expect to obtain replacements for its ordinary warehouse and operations stocks unless a preference rating is placed on this procurement. Practically all of our defense contracts demand electric power and unless the company's local stocks are maintained it will be impossible to install power connections without waiting for the arrival of necessary materials for each connection from the mainland. A specific example of this occurred recently where a sub-contractor on the Hickam Field low-cost housing had to import by Clipper air express at an expense of \$1,000.00, some plumbing items which under normal conditions could have been obtained from local stocks.

d. As stated above shipping priorities are also important. To our knowledge there is now no coordinated shipping priorities, although the Matson Navigation Company, which handles the bulk of the shipments, is granting unofficial priority to items on which a procurement priority has been obtained. As far as government bought and shipped materials are concerned there has been no great difficulty although considerable detail work has been involved in radioing about specific shipments. There are large quantities of materials, however, which are being ordered by private firms either for direct supply to government agencies or for incorporation in defense works directly or indirectly, and these private concerns are encountering great difficulties in securing shipping space for this material.

4. To meet this increasing problem I propose to set up an office in this department to be responsible for coordinating all priorities matters, and I have selected the Department Engineer's office as the section in which this control can best be established. Additional officers, not necessarily engineers, will be placed on duty in that office to furnish needed assistance. [3] The following is a preliminary outline of the duties of this section:

a. To establish an information bureau where request for information on priorities can be promptly filled.

b. To keep me informed of the priorities and preference ratings assigned by regular supply branches to their own procurement in order to insure that these are coordinated. In this work with the regular supply branches and construction agencies it is not intended that the coordinating office will assume any control over these agencies; it is intended, however, that the coordinating office keep informed of what action these agencies are taking in priority matters.

c. We assign preference ratings covering procurements which are essential to defense work and which are not now covered by existing instructions.

5. In the directive of the Priorities Committee of the Army and Navy Munitions Board, 27 November 1940, it is noted that all Panama Canal defense projects are placed in priority classification A-1-b. There is no similar blanket coverage for devents projects in this department; and the rating which can be assigned to any project in this department depends upon its classification as a general project under the other entries in this directive. The aircraft Warning Service project is the most important single project in the department, and under the general classification in this directive the highest priority which could be assigned to it would be A 1-f. It is believed that the conditions facing this department are similar to those in Panama and that a similar blanket priority classification for our defense projects should be authorized, and that this rating should be high. If this is done it would not be necessary to assign this high a rating to all projects, and this department could reserve the high rating for the exceptional projects which were considered absolutely essential.

6. As stated above, the maintenance of adequate local stocks by local supply firms is essential. Existing instructions on the issuance of preference ratings are predicated on the fact that the firm to whom the rating is issued is a government contractor. The local supply firms who must obtain preference ratings to maintain stocks are not actually government contractors at the time they place their mainland orders. These firms become contractors, however, when a government agency orders materials from their stocks. The question involved here is one of time; and obviously we should not wait until the specific need for a stock item arises to issue a preference rating then delay the job while the item is being procured and shipped. It is believed that some authority should exist for us to give preference ratings for the procurement of any items which we, through experience and knowledge of future projects, select as essential.

[4] 7. The following is therefore recommended:

a. The establishment of a blanket priority for Hawaiian defense projects as has been done for Panama Canal defense projects, and authorization to this headquarters to apply this high rating to cases of exceptional importance.

b. Waiving of the requirement that preference ratings can be issued only to government contractors and authorization to this Headquarters to issue these ratings for the procurement of those items which we anticipate will be essential to the defense program.

c. Consideration of the establishment of a liaison with shipping agencies on the West Coast to insure that defense materials ordered by private firms receive proper priorities in shipping space.

3070 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

It is further recommended that prompt consideration be given to subparagraphs *a* and *b* above and this headquarters advised by radio of the War Department's attitude.

PRIORITIES COMMITTEE,
ARMY & NAVY MUNITIONS BOARD,
WAR DEPARTMENT BUILDING,
Washington, D. C., August 18, 1941.

To Commanding General, Headquarters Hawaiian Department, Office of the Department Engineer, Fort Shafter, T. H. (THRU: The Adjutant General, Washington, D. C.)

1. The following information is submitted in answer to the recommendations on page 4 of letter from Lieutenant General Walter C. Short:

2. The establishment of a blanket priority specifically to Hawaiian Defense Projects is not considered necessary inasmuch as the Directive, Priorities Committee, Army and Navy Munitions Board, established the preference rating A-1-c for "Construction, equipment, defense and development of outlying bases, not included in the Continental United States". This Directive is the cumulative result of an exhaustive study of the military importance of the various items required by the military and naval forces of the United States, and has received the approval of the Secretary of War and Secretary of the Navy.

3. Attention is invited to a copy of communication of July 31, 1941, from the Army and Navy Munitions Board to "Supply Arms and Services of the Army and Bureaus and Offices of the Navy", which explains the procedure covering the issuance of project rating orders to Army and Navy construction projects outside of the Continental United States. It will be noted that the project rating orders issued in accordance with these instructions will not be confined to items on the Critical List, but will include all items necessary to complete the construction of a particular project. These ratings may be extended in the usual way, and it is believed should cover the recommendation as made in paragraph 7 b.

4. Attention is invited to the "Defense Supply Rating Plan" recently inaugurated by the Office of Production Management. This is a plan developed whereby the manufacturers who supply so-called "Off the shelf" items to defense industries are permitted to get material with which to manufacture additional stock so as to make a supply available to defense customers. This plan may be of value to some of the concerns in the Hawaiian District and is mentioned for your consideration.

5. The establishment of a liaison with shipping agencies of the West Coast has been referred to the Division of Emergency Shipping, Maritime Commission. That Commission has a record of the situation as it exists and as it has been for some time. They are further checking into the situation, but definite decision to establish a liaison agency has not been made.

In reply refer to:

Engr. 523.07

Subject: Office of Production Management Field Service.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter dated 13 August 1941 from the Army and Navy Munitions Board, a copy of which is inclosed. Reference is also made to letter from his headquarters, file Engr. 523.07, subject "Priorities and Preference Ratings," and 1st Indorsement from Priorities Committee, Army and Navy Munitions Board, 18 August 1941, file 114.14-18-C-32-RGC-amw (8-18-41).

2. The conditions as to securing priorities for materials needed in the Hawaiian Islands are growing worse steadily, and a large part of the difficulties encountered can be traced to lack of information and to failure of field offices, whose region includes this Territory, to make themselves known to local Federal officials and business men. The long distances involved in travel, the difference in time, and the high cost of telephonic communication, all make contact with any regional office difficult.

3072 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. Governor Poindexter has already submitted a request to Washington for the establishment of a local office of the Priorities Division, OPM, and at his request I concurred in his suggested action. A copy of my letter of September 13, 1941 to the Governor is inclosed for your information.

4. It is therefore requested that the War Department propose the establishment in Honolulu of a field office of the Office of Production Management, to include the Priorities Division, initially, with provision for adding representatives of other divisions later, if required.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., July 28, 1941.

VIA "CLIPPER" AIR MAIL

Engr. 600.12 (Gen.)

Subject: Revolving Fund for Purchase of Materials.

To: The Adjutant General, Washington, D. C.

1. The delay in securing necessary materials for our construction program has become a matter of serious concern. Experience indicates that from three to four months are necessary to procure construction materials from the United States after funds for projects are allotted, and increasing transportation difficulties may lengthen this time.

2. The following is the situation of the two constructing agencies:

a. The District Engineer has no revolving fund for advance procurement of materials. Among the first Engineer projects approved, however, were two large projects; one the additional ammunition storage facilities, and the other the Air Corps mobilization housing. As soon as these allotments were received, the District Engineer immediately ordered all or a large part of the necessary materials to complete the entire project. With his construction crews now well organized, the rate of using these materials has greatly accelerated and the stock is being depleted because the rate of use is greater than the rate of arrival from the mainland.

b. The Constructing Quartermaster is in somewhat the same situation. While the Quartermaster General has authorized the establishment of a stock pile of lumber, no funds have been advanced for the procurement of other materials. These other materials are not available for local purchase in any appreciable quantities, and as a result, there will undoubtedly be delays.

3. I understand that the Division Engineer, San Francisco, has recommended to the Chief of Engineers that a revolving working fund of \$1,000,000.00 be allotted to the District Engineer, Honolulu, to permit that officer to procure materials in advance. This fund would be a revolving fund. All expenditures from it for materials would be reimbursed from other projects funds as these projects were approved and utilize the materials.

4. I think that this materials situation may become critical. As stated in previous communications, a large part of our construction forces have been imported from the mainland on contracts which require either their continued employment or return to the mainland at Government expense. It is obvious that if there is any lack of materials not only will the jobs be delayed, but also the cost to the Government will be increased. I therefore strongly recommend that the suggestion of the Division Engineer, San Francisco, be adopted, that the District Engineer, Honolulu, be allotted a revolving fund of \$1,000,000.00, and that similar arrangements be made for the Constructing Quartermaster to permit him to stock materials in addition to lumber.

OFFICE, C. OF E.,
August 7, 1941.

To The Adjutant General (Through The Quartermaster General.)

It is recommended that a revolving fund of \$1,000,000.00 be authorized for the purposes indicated in the basic letter. If the necessary funds are not available to the War Department from any other source, it is believed that this amount could be advanced from the Fifth Supplemental, 1941, Deferred Storage Program, (Air Corps), Items *a & b*, Parking Storage Areas, Reserve Airplanes. As a final resort, the sum of \$1,000,000.00 now reserved for construction at the Mobile Air Depot, (Brooklev Field) could be advanced for this purpose. In either case, reimbursement should be effected upon the appropriation of funds for construction in Hawaii under the 1943 Construction Program.

In reply refer to: Engr. 600.12 (Gen.)

Major General R. C. MOORE

Deputy Chief of Staff, War Department,
Washington, D. C.

DEAR DICK:

The situation surrounding the obtaining of materials for defense contracts is becoming more and more critical. On many items a delay of between three and four months occurs between the time an allotment of funds for a project is received and the materials necessary are obtained from the mainland. We have recently received word on some electrical equipment which indicates that delivery cannot be made for six months.

In a conference with Colonel Hannum, Division Engineer in San Francisco, when he was here sometime ago, he mentioned that he had recommended to The Chief of Engineers that a revolving fund of \$1,000,000.00 be set up to permit the District Engineer to make advance purchases of materials and plant. I followed up Hannum's recommendation to the Chief of Engineers with a strong letter to the War Department urging that this revolving fund be set up for the District

3076 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Engineer and that similar arrangements be made for the Constructing Quartermaster. The District Engineer informed me today that he had received an allotment of \$1,100,000.00 from the Chief of Engineers which could be utilized for the advance purchase of materials. The Constructing Quartermaster, however, has not yet received similar information, and while he is authorized to stock lumber locally, he has no revolving fund for which to make advance purchases of materials other than lumber.

I am following up my previous recommendation by radio to The Adjutant General today. I think that the matter is sufficiently important to bring it to your attention, and I will appreciate it if you would have someone look into this matter. A copy of my letter of July 28th and of the radio follow up of September 13 are inclosed for ready reference.

Very sincerely.

WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, September 29, 1941.

Lieutenant General WALTER C. SHORT,
Headquarters, Hawaiian Department, Honolulu, T. H.

DEAR WALTER:

I have your letter of the thirteenth relative to the establishment of revolving funds in connection with construction in Hawaii.

Owing to legal restrictions we cannot approve your request for revolving funds. However, it appears that the wording of the appropriation from which the Quartermaster General maintains the lumber pile you mention is such that those funds may be used to make advance purchases of other materials required for construction.

The Quartermaster General will take immediate measures to establish a stock pile of construction materials other than lumber, sufficient to meet requirements for both Engineer and Quartermaster construction. The conditions under which these stock piles will be reimbursed will be covered in the reply of the War Department to your official request of July 28, 1941.

The Chief of Engineers advises that the allotment of \$1,100,000 made to your District Engineer, to which you refer, is from funds now available for approved projects. This allotment should not be construed as making these funds available to you as a revolving fund, nor for advance purchase of materials, except for the projects to which the funds apply.

I believe that when these stock piles have become established the situation you outline will be greatly relieved.

Sincerely yours.

[S] R. C. Moore,
R. C. MOORE,
Major General, Deputy Chief of Staff.

Air Mail via Clipper

Lieutenant General WALTER C. SHORT, U. S. A.,

Headquarters Hawaiian Department,

Office of the Department Commander, Fort Shafter, T. H.

DEAR SHORT: The copy of your report on the additional air routes has been received. The quantity of details requiring coordination, and the distances involved in the projects make the short time consumed in getting rolling almost unbelievably short.

I extend you my personal thanks for the effort you have expended on this job and the results you are getting.

The way things are working out now, it looks as if we will be using trans-Pacific airways almost continuously from now on. Our plans are O. K. for 4-engine bombers, but what are the prospects for medium bombers? Do you think we should even study that phase of trans-Pacific operations?

Best regards.

Sincerely,

[S] H. H. ARNOLD,
Major General, U. S. A.,
Deputy Chief of Staff for Air.

ESA

WAR DEPARTMENT. A. G. O., February 10, 1941.

To Commanding General, Hawaiian Department.

1. Action is being taken to increase the allotment of Regular Army enlisted men for the Corps of Engineers, Hawaiian Department by 107. This allotment will permit the organization of the 3rd Engineers in accordance with Table of Organization 5-11, November 1, 1940. Regular Army personnel are not available to increase further the strength of this regiment.

2. Since War Department policy forbids sending trainees to the Overseas Departments it will not be practicable to aid you in creating an Engineer Battalion (Separate) as recommended in your radio of January 23, 1941.

3. As previously advised, plans provide for the activation of a separate Engineer Company (Avn) for your Department.

By order of the Secretary of War:

In reply refer to:

Engr. 322.03

Subject: Additional Engineer Troops.

To: The Adjutant General, Washington, D. C.

1. Reference is made to letter, this headquarters, Engr. 322.03, 23 August 1940, which recommended the assignment to the Department of an Engineer regiment

3078 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(Aviation) less one battalion, and to letter, Engr. 210 x220.03, 1 November 1940, which recommended an increase in the strength of the Third Engineers, and to letter, Engr. 322.03, 5 February 1941, recommending a redesignation in the Third Engineers from a combat regiment, Division, to a combat regiment, Corps.

2. These previous recommendations for an increase in the Engineer component in the Department were based upon the assumption that some civilian labor would be available. It has been necessary with the various agencies involved in defense construction to import skilled labor from the mainland. A recent increase in the defense contracts of the Navy will now necessitate the importation of unskilled labor as well. This development now makes it impossible to assume that any appreciable local labor will be available and requires that previous estimates of the minimum force of Engineers necessary be revised upwards.

3. I consider it essential that a regiment of Engineers (Aviation) be furnished this Department as an integral part of the Hawaiian Air Force and that a regiment of Engineers, General Service, be furnished this department as Department Engineer troops. There is sufficient work immediately on hand in connection with Air Corps activities on the outlying islands and on Oahu to keep a regiment of Engineers continuously occupied. There is also sufficient work in connection with military roads and trails in department units to keep a regiment of General Service Engineers continuously occupied. There is also sufficient work in connection with the Hawaiian Division such as bombproofing of Division command posts and communication centers, road blocks and other tactical employment to keep the Third Engineers continuously occupied.

4. It is therefore recommended that one regiment of Engineers (Aviation) (T. O. 5-411) and one regiment of Engineers, General Service, (T. O. 5-21) be authorized for this Department and that these units complete with personnel and equipment be furnished as soon as possible..

WALTER C. SHORT,

WAR DEPARTMENT, A. G. O.,
May 15, 1941.

To the Commanding General, Hawaiian Department.

1. a. The 34th Engineers (Combat), will be activated in your department with an allotted strength of 1127 enlisted men under T/O 5-171, November 1, 1940, less band and basic privates, on June 1, 1941 (AG 320.2 (4-8-41) M-C, radio April 9, 1941).

b. The regiment will be organized with cadres to be furnished by units now in your department, as directed by you, and with selectees to be dispatched from the Continental United States.

c. Every effort will be made to send individuals who have completed their basic training; however, in order to make maximum use of the available shipping, some curtailment in their basic training may be required. If this is done, you will be informed so that they can complete their training in Hawaii. Under the present tentative schedule, it is proposed to dispatch the full quota except thirty-six attached medical, in June. The Medical Department personnel will be dispatched in November.

d. The actual date of activation of the regiment will conform to the arrival of personnel in your department.

2. While your recent request for additional medical enlisted men was disapproved because of non-availability of personnel, the 34th Engineers (and the 97th and 98th Coast Artillery Regiments whose activation is covered in separate correspondence) is allotted a full quota of attached medical personnel, less basics. You are authorized to make a redistribution of this attached medical personnel, reporting such readjustment to this office.

3. It is desired that you submit a report on the following:
 - a. The actual date of activation of the 34th Engineers.
 - b. Changes in the distribution of three-year men in engineer units in connection with the organization of the 34th Engineers.
4. Attention is invited to letter, this office, April 21, 1941, AG 381.4 (1-27-41) M-D-M, subject: Reports of change in status reports—Defense Reserves, Overseas Departments.
5. Your request for aviation engineers is being considered separately.
6. The allotment of commissioned personnel and the grades and ratings of enlisted personnel will be made separately.

By order of the Secretary of War:

AG 320.2 (4-21-41) MC-C

1st Ind.

ESA

WAR DEPARTMENT, A. G. O.,

May 21, 1941.

To: Commanding General, Hawaiian Department.

1. Radio No. 721, this office, April 9, 1941, requested your views on the practicability of securing additional selectees locally, and it was not intended that an appeal be made to the Governor of the Territory of Hawaii to secure 1,127 additional selectees in excess of the existing quota.

2. In connection with your remarks on labor shortage in Hawaii, a resolution recently passed by the Board of Supervisors of the City and County of Honolulu, copies of which were sent to the Secretary of War and other governmental heads, protested the organization of a port company in Hawaii on the grounds that the supply of labor was ample and that needs of National Defense projects could be met without importation of additional personnel from the United States. This matter is brought to your attention for information only. No further action appears necessary or desirable at this time.

3. Personnel for the 34th Engineers will be provided from the Continental United States in two increments. Details have been communicated to you in separate correspondence.

By order of the Secretary of War:

[sgd] E. S. ADAMS,
*Major General,
The Adjutant General.*

12-22-41

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 21 April 1941.

In reply refer to:

AG 381

Subject: Additional Selective Service Trainees for the Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. War Department radio No. 721, of 9 April 1941, proposes activation in this Department of the 34th Engineer Regiment (C) in June with a strength of 1127, including 36 attached medical personnel. It further proposes that the 3d Engineers (C) will furnish the cadre; the balance to be local selectees.

2. As the existing Territorial quota of 1400 Selectees has already been exceeded by approximately 500, and those now inducted assigned to organizations, an appeal was made to the Governor of the Territory of Hawaii to secure the additional personnel required to activate this new unit. The Governor's reply, attached, states that he is without authority to call additional quotas of trainees, and even if such authority existed, he is opposed to providing additional manpower at the expense of National Defense projects and local industry which have already absorbed all available labor.

3. The labor shortage in Hawaii is acute. Skilled labor for work on National Defense projects is now being imported and it is quite likely that the importation of unskilled labor will become necessary to maintain defense work schedules.

4. In view of these circumstances it is urged that the War Department provide personnel from the Mainland U. S. for the activation of new or expansion of existing units in the Hawaiian Department.

[sgd] Walter C. Short,
WALTER C. SHORT,
*Lieutenant General, U. S. Army,
Commanding.*

3082 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[Exhibit 1J]

[1]

[SECRET]

18 FEBRUARY 1941.

AG 320.2/55

Subject: Reinforcements for Coast Artillery Garrison, Hawaiian Department.
To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Letter the Secretary of the Navy to the Secretary of War, dated 24 January 1941, with reference to the defense of the Pearl Harbor Naval Base against a surprise attack, copy forwarded to this headquarters as inclosure to letter TAG to HHD, 7 February 1941, subject: "Air Defense of Pearl Harbor, Hawaii," file AG 381 (1-24-41) M.

B. Letter HHD to TAG, 5 September 1940, subject: "Additional Antiaircraft Troops for the Hawaiian Department", file 320.2/49.

C. Letter TAG to HHD, 27 September 1940, subject: War Reinforcements, Hawaiian Department", file 320.2 (9/27/40) M-WPD, with 1st and 2nd Indorsements thereon.

2. The increasingly critical international situation, together with the vital need, as expressed in Reference A, for adequate provision for the best defense which can be provided for the security of the Pearl Harbor Naval Base and the Fleet against surprise attacks makes it essential that the antiaircraft artillery garrison of Oahu be placed upon a war footing without delay. While not specifically mentioned in Reference A, there is a similar requirement for a sound defense of the Fleet and its base against raids by surface ships. This would have special importance if the fleet should be withdrawn from Pearl Harbor. An adequate defense, ready for prompt action, can not be provided with the present garrison because of the necessity for dual assignments of Coast Artillery batteries to anti-aircraft and harbor defense missions. The reinforcements required for the anti-aircraft artillery and harbor defense garrisons to provide the degree of defense considered essential are discussed below.

3. Antiaircraft Artillery.

a. The approved defense project provides for twenty-five (25) gun batteries, five (5) searchlight batteries, and sixteen (16) automatic weapons batteries manning a total of seventy-two (72) mobile and twenty-six (26) fixed AA guns, seventy-five (75) searchlights, one hundred and twenty (120) 37 mm AA guns, and two hundred (200) cal. .50 AA machine guns. (NOTE: Three hundred and

[2] forty five (345) cal. .50 AA machine guns are provided in the defense project, of which two hundred (200) are manned by antiaircraft artillery and the remainder by other troops.) With the present garrison, including the assignment of all but two (2) harbor defense artillery batteries to antiaircraft assignments, only nineteen (19) gun batteries, three (3) searchlight batteries, no 37mm batteries and six (6) machine gun batteries can be manned because of the shortage of both personnel and equipment. The major shortages in antiaircraft artillery armament are sixteen (16) three inch AA guns and associated equipment (of which six (6) guns are understood to be enroute to this Department), all one hundred and thirty-five (135) 37 mm AA guns, two hundred and thirty-six (236) cal. .50 machine guns, and thirty (30) sound locators.

b. To man the entire antiaircraft artillery defense project, avoiding dual assignments to all but four harbor defense batteries, requires an increase in the existing garrison of the following antiaircraft artillery personnel:

2 Regiments Coast Artillery AA (Mobile) T/O 4-11.

1 Battalion Gun Coast Artillery AA (Mobile) (less searchlight battery) T/O 4-15.

Approximately ninety (90) officers and two thousand (2000) enlisted men as individual filler replacements to activate three (3) gun batteries and three (3) 37 mm batteries of the 64th CA (AA), now in active, and to bring to war strength the active elements of this regiment.

c. In paragraph 10 a of 2nd Indorsement of Reference C, the War Department provided for only one half of the reinforcements of the peacetime garrison of antiaircraft artillery which, at that time, were considered essential to provide a reasonably effective antiaircraft defense prior to the date unit reinforcements from the mainland could affect the situation. With the increasingly critical international situation at this time, it is urgently recommended that all war

reinforcements of antiaircraft artillery personnel, both unit and filler reinforcements described above, together with the existing shortages in antiaircraft artillery material be sent from the mainland with the least practicable delay.

4. Harbor Defense Artillery.

The status of the defense which can be established with existing personnel of the peace garrison of harbor defense artillery is described in detail in par 6f, of the basic document, Hawaiian Defense Project, Revision of 1940. Briefly, only one 16-inch battery and the seacoast searchlights of the Ulupau Group can be manned by batteries with harbor defense as their only mission. By employing the undesirable expedient of dual assignments to harbor defense and antiaircraft missions, and of harbor defense and Field Artillery missions, both 16-inch gun batteries, the one 14-inch battery, one of the two 12-inch gun batteries, none of the three mortar batteries, three of the five 8-inch batteries (fixed and railway), six of the twelve 155 mm batteries (two manned by Field Artillery personnel) and none of the two 6-inch and two 3-inch [3] batteries can be manned upon initial deployment. As shown in Table I, par. 7 to HDP-40, an increase of approximately 165 officers and 3400 enlisted men as individual filler reinforcements and One Regiment Coast Artillery (TD, T/O 4-31W) is required to fully man the harbor defense artillery. By not manning the three fixed seacoast mortar batteries, which are not essential to a defense against raids, the total number of individual filler reinforcements may be reduced to approximately 150 officers and 2700 enlisted men. This increase in the garrison will be sufficient to provide only one relief as manning details for harbor defense guns, but will be adequate so that key observation stations, air guards and similar details can be maintained continuously.

5. Summarizing, it is urgently recommended that:

(a) The Coast Artillery garrison of this Department be brought to substantially war strength by the dispatch from the mainland of the following reinforcements:

- (1) Two Regiments CA (AA) Mobile, T/O 4-11.
- (2) One Battalion CA (AA) gun, Mobile (less searchlight battery), T/O 4-15.
- (3) One Regiment CA (TD), 155mm gun, T/O 4-31W.
- (4) Individual antiaircraft artillery filler reinforcements to include 91 officers and 2064 enlisted men.
- (5) Individual harbor defense artillery reinforcements to include approximately 150 officers and 2700 enlisted men.

b. Existing major shortages in the armament of the approved antiaircraft artillery projects, as set forth in par. 3 above, be filled as soon as practicable.

WALTER C SHORT,
Lieutenant General,
Commanding.

[1]

[SECRET]

Subject: Reinforcements for Coast Artillery Garrison, Hawaiian Department.
AG 320.2 (2-18-41) MC-C-M 1st Ind. ESA

WAR DEPARTMENT, A. G. O.,
May 10, 1941.

To the Commanding General, Hawaiian Department.

1. The Coast Artillery garrison, Hawaiian Department, will be augmented by approximately 276 officers and 5,734 enlisted men between June, 1941, and March, 1942, in three increments paralleling the estimated delivery of material, as follows:

a. June, 1941:

- (1) AA filler replacements, 60 officers and 1,337 enlisted men.
- (2) 62 officers and 1,329 enlisted men required to activate the following units in the Department:

98th Coast Artillery (AA) (Semi-mobile), less band, 3d Battalion (37-mm Gun), Battery E (Searchlight), basic privates and attached medical, under T/O 4-111, November 1, 1940, and component tables.

(3) 17 officers and 359 enlisted men to activate the 2d Battalion, 97th Coast Artillery (AA) (Semi-mobile), less Battery H (Gun), Battery E (Searchlight) and basic privates, under T/O 4-115, November 1, 1940 and component tables.

b. November, 1941:

(1) 48 officers and 885 enlisted men to activate the 97th Coast Artillery (AA) (Semi-mobile), less band, 2d Battalion (Gun), 3d Battalion (37-mm gun), and basic privates, under T/O 4-111, November 1, 1940, and component tables.

(2) 4 officers and 134 enlisted men to activate Battery H (Gun), 97th Coast Artillery, less basic privates, under T/O 4-17, November 1, 1940.

(3) Attached Medical personnel, 98th Coast Artillery, 7 officers and 49 enlisted men.

[2] c. March, 1942:

(1) AA filler replacements, 24 officers and 661 enlisted men.

(2) 54 officers and 980 enlisted men to activate the 3d Battalion (37-mm Gun), 97th Coast Artillery and 3d Battalion (37-mm gun), 98th Coast Artillery, each less Battery M (Gun) and basic privates, under T/O 4-125, November 1, 1940 and component tables.

2. Cadres for the new units will be furnished from existing units in the Hawaiian Department; their source, strength and composition will be determined by you.

3. Every effort will be made to send individuals who have completed their basic training; however, in order to make maximum use of available shipping, some curtailment in their basic training may be required. If this is done, you will be informed so the individuals can complete their basic training in Hawaii.

4. The actual activation of the various units will conform to the arrival of personnel in the Department.

5. While your recent request for additional medical enlisted men was disapproved because of non-availability of personnel, the 97th and 98th Coast Artillery Regiments (and the 34th Engineers whose activation is covered in separate correspondence) are allotted full quotas of attached medical personnel, less basics. You are authorized to make a redistribution of this personnel, reporting such readjustment to this office.

6. It is desired that you submit a report on the following:

a. The actual dates on which various units are activated.

b. Changes in the distribution of three-year men in Coast Artillery units in connection with activation of new units.

c. List of all Coast Artillery units and installations in the Department including allotted strengths and tables of organization under which organized; this report to be submitted upon completion of the activation of all new units and distribution of the last increment of AA filler replacements.

[9] 7. Attention is invited to letter, this office, April 21, 1941, AG 381.4 (1-27-41) M-D-M, subject: Reports of Change in Status Reports—Defense Reserves, Overseas Departments.

8. The allotments of commissioned personnel and the grades and ratings for enlisted personnel will be made separately.

9. Recommendation for augmentation of harbor defense artillery is not favorably considered at this time because the additional personnel is not available. The antiaircraft reinforcements will strengthen the seacoast defenses by the relief of all but four harbor defense batteries from dual antiaircraft missions.

By order of the Secretary of War:

(sgd) F. S. ADAMS,
Major General,
The Adjutant General.

To: The Adjutant General.

1. On January 9, 1941, the then Department Commander, Lieutenant General Herron, radioed for authority to increase the enlisted strength of the 251st Coast Artillery (AA), National Guard, from present allotted strength to a peace strength of 1450 by assignment of selectees from Ninth Corps Area. On January 17, 1941, the War Department replied by radiogram to the effect that the recommendation made in January 9, 1941 radiogram was not favorably considered and that the policy of the War Department is that selective service personnel in overseas garrisons will be limited to those procured within the overseas department itself and that no additional selective service personnel will in time of peace be sent from the continental United States to overseas departments.

2. I am again submitting this request as I am of the firm opinion that the situation here is different than in the United States, and that this is a special case which deserves further consideration. The facts are:

The 251st National Guard is the only National Guard organization on duty outside of the continental limits of the United States;

This regiment is composed of white officers and enlisted men;

The selective service trainees now in being in this Department are composed of 469 Japanese out of the quota 700. The next draft quota of 700 which is to be inducted in March will undoubtedly be composed of approximately the same ratio of Japanese; namely, about 67%;

The selective service trainees are of varied mixture, such as Japanese, Hawaiian, Part Hawaiian, Filipinos, Chinese, Korean, and other mixtures;

Any assignment of the selective service trainees to the 251st Coast Artillery (AA) would result in a mixture of races, largely Japanese, being assigned to a white organization, which is contrary to War Department policy, as stated in War Department Letter AG 291.21 (10/9/40) M-A-M, October 16, 1940, Subject: "War Department Policy in regard to Negroes", paragraph g;

The Colonel, Commanding the 251st Coast Artillery (AA), states that because of the feeling in California against orientals, any assignment of selective service trainees from this Department to his command would cause dissension, and lessen the efficiency of his command fully 50 percent.

[2] All replacements now coming from the mainland are required for the Regular Army troops here.

All the selective service trainees in this Department will be needed to fill the Hawaii National Guard units which are composed of races of the same type as in the selective service draft.

3086 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. In view of the above, the only justifiable solution of this problem is to assign selective service trainees from the mainland, and preferably from the 9th Corps Area, to the 251st Coast Artillery (AA), National Guard. It is my opinion that it will be contrary to the best interests of all concerned to assign selective service trainees in this Department to the 251st Coast Artillery (AA) to increase its strength.

4. Since this is a special situation incident to this Department. I do not believe the present War Department policy, as stated in WD Radiogram, January 17, 1941; i. e., of not sending any additional selective service personnel from the continental United States to overseas departments, should apply to this Department.

5. I therefore again request that the 251st Coast Artillery (AA), National Guard, be increased from present allotted strength to a peace strength of 1450 by assignment of selective service trainees from the 9th Corps Area.

(sgd) Walter C. Short,
WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

ESA

WAR DEPARTMENT, A. G. O.,
March 8, 1941.

To the Commanding General, Hawaiian Department.

1. Your recommendation that the 251st Coast Artillery (AA) be increased from its present allotted strength of 1181 to a strength of 1450 by assignment of selectees from the Ninth Corps Area is not favorably considered.

2. As stated in radiogram from this office, January 17, 1941, all selective service personnel to be procured in the current fiscal year have already been allotted to units and activities. Additional personnel could be allotted to the 251st Coast Artillery (AA) only at the expense of other units or activities.

3. If trainees were sent to the 251st Coast Artillery (AA) at the present time, it is not considered that they could be of great value to the regiment or to the defense of the Hawaiian Islands due to the short period of time they would be available after completing their basic training. Selectees inducted now would probably reach the Hawaiian Department some time in April 1941. Their basic training would require approximately three months making them fully available about July 1941. As the 251st Coast Artillery (AA) is scheduled to be returned to the United States for return to an inactive status of September 16, 1941, it appears that any selective service personnel sent at this late date would be available to the regiment for a maximum of two months.

By order of the Secretary of War:

(sgd) E. S. ADAMS,
Major General,
The Adjutant General.

AG 320.2/58

25 FEBRUARY 1941.

Subject: Reinforcements for Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Letter, TAG to HHD, 4 February 1941, subject: "Tables of Organization, Overseas Departments", file AG 320.2 (1-17-41) P(C):

B. Letter, TAG to HHD, 27 December 1940, Subject: "Equipment for Field Artillery Units", file AG 320.2 (12/20/40) P.

C. Letter, HHD to TAG, 18 February 1941, subject: "Reinforcements for Coast Artillery Garrison, Hawaiian Department", file AG 320.2/55.

D. Letter, HHD to TAG, 19 February 1941, subject: "Additional Engineer Troops", file Engr. 322.03.

2. The requests for troop reinforcements as stated in Reference C and D, hold priority over the requests given herein. The following reinforcements are requested for this Department at the earliest possible date and in the priority in which they are listed.

a. In accordance with Reference A, authority is requested to organize the 11th Field Artillery under WD T/O 6-41, dated November 1, 1940. The 11th Field Artillery (less 3d Battalion) is now organized under Standard War Department, Tables of Organization with units organized and maintained at war strength, as follows:

(1) 11th Field Artillery (less 3d Bn), T/O 6-41, January 3, 1939.

(2) Hq & Hq Btry, 11th Field Artillery, T/O 6-42, January 3, 1939.

(3) 1st and 2d Bn, 11th Field Artillery, T/O 6-45, December 7, 1938.

(4) Hq & Hq Btry, 1st and 2d Bn, 11th Field Artillery, T/O 6-46. January 7, 1938.

(5) Four (4) batteries, 11th Field Artillery, T/O 6-47, December 7, 1938.

b. That one Infantry Battalion, Light Tanks, be authorized for and the necessary personnel and material to organize same, be furnished this Department. The number of possible localities for hostile beach landings make the availability of a mobile reserve having the characteristics of light tanks of [2] great tactical importance for counterattacks. The 11th Tank Company (Light Tanks) organized under Standard WD, T/O 7-8, dated March 17, 1938, is the only tank unit in this Department and could be the nucleus for the Infantry Battalion of Light Tanks, requested herein.

c. That the organization of two (2) Military Police Companies, under WD, T/O 7-55, dated November 1, 1940, (Military Police Battalion) be authorized and that the necessary personnel be furnished from the Mainland for organization of the two (2) companies in this Department. The technical duties required of Air Corps enlisted personnel are retarded due to the required training for and actual performance of interior guard duty at both Hickam and Wheeler Fields. It is believed that an organized Military Police Company stationed at each of these fields would release Air Corps personnel for necessary air activities and also render more efficient interior guard and military police duty. The Military Police personnel could be efficiently trained in anti-sabotage work and also in close-in defense without disrupting scheduled training. It is the intention to use the Military Police personnel to perform similar work at outlying air fields under the control of the Commanding Officers of Hickam and Wheeler Fields and also to accompany Air Corps Units to those outlying fields when either Wing is operating under its Dispersion Plan.

d. That the necessary reinforcements be furnished so that the Infantry Regiments of the Hawaiian Division, be organized under WD, T/O No. 7, dated November 1, 1940: Infantry Division (Square). These regiments are now organized under Standard WD, T/O 7-11, dated December 6, 1938, as modified to fall within the "Allotment of Grades and Ratings for Enlisted Men, and authorized Recruiting Strength" as published in mimeograph letter, TAG, August 7, 1940, file AG 221 (8-7-40) E. Approval of this request would permit compliance with Reference A, above, and also make available the necessary personnel and material authorized by current standard War Department Tables of Organization.

e. That the 11th Field Artillery Brigade (less 11th Field Artillery) be organized under WD, T/Os dated November 1, 1940 and that the necessary reinforcements be furnished this Department. That War Department, Tables of Basic Allowances for Field Artillery, No. 6-1, dated November 1, 1940, be made applicable to the 11th Field Artillery Brigade (less 11th Field Artillery).

3. A Study is now being made of all Special Tables of Organization at present in use by units in this Department, with a view of submitting recommendations for changes that will permit organization and functioning under current Standard WD, Tables of Organization.

WVC

WAR DEPARTMENT, A. G. O.,

April 11, 1941.

To: Commanding General, Hawaiian Department.

1. The augmentation of Coast Artillery and Engineer components of the Hawaiian Department is being considered separately, and you will be advised in the near future of the action taken thereon.

2. The augmentation of the Field Artillery and Infantry components of the Hawaiian Division, and the addition of a Tank Battalion and two Military Police Companies to the peace garrison are not considered urgent, nor is it practicable to provide the personnel at this time. It is believed the necessary guard duties can and should be performed by troops in the Department without organizing Military Police Companies for this purpose.

3. The reorganization of Infantry and Field Artillery elements of the Hawaiian Division under latest War Department tables of organization is approved. This can be accomplished without additional personnel. The majority of the units in other foreign garrisons and in the Continental United States are below table of organization strengths yet conform to standard tables. As stated in letter, February 4, 1941, AG 320.2 (1-17-41) P (C), subject: "Tables of Organization, Overseas Departments", this can be accomplished by reducing the size of component elements of a unit or by carrying certain elements inactive.

By order of the Secretary of War:

(sgd) W. V. Carter,
W. V. CARTER,

Fort Shafter, T. H., 24 April 1941.

In reply refer to: 320.2

Subject: Air Base Group.

To: The Adjutant General, Washington, D. C., (thru: Commanding General, Hawaiian Department, Fort Shafter, T. H.).

1. The Commanding General, Hawaiian Air Force, recently requested the War Department to designate Bellows Field, T. H., a permanent Air Corps station under the jurisdiction of Headquarters Hawaiian Department.

2. A further request is being prepared by the Commanding General, Hawaiian Department, to have the War Department authorized the creation of a separate Air Corps station for the 15th Pursuit Group on Oahu, T. H.

3. Subject to the approval of the above mentioned recommendations, a redistribution of Air Base Group units will be necessary and the following is recommended:

a. The 18th Air base Group (R) (tentative T/O 1-411) Wheeler Field, T. H., be redesignated an "Air Base Group, Air Base" (Single).

b. An "Air Base Group, Air Base" (Single) (tentative T/O 1-411) be authorized for Bellows Field, T. H.

c. An "Air Base Group, Air Base" (Single) (tentative T/O 1-411) be authorized for the new station of the 15th Pursuit Group.

Subject: Activation and Redesignation of Air Corps Units.

To: Commanding Generals,

Caribbean Defense Command, Panama Canal,

Hawaiian and Philippine Departments,

Newfoundland Base Command and

U. S. Forces in Far East

Chief of Army Air Forces.

1. The following units are constituted and will be activated at the earliest practicable date by the Department commanders concerned:

Unit	Source of Personnel	Station of Activation	Permanent Station
5th Air Corps Squadron, Communications, (Regional Control).	Existing Units in Phil. Dept.	Phil. Dept....	Sq. Hq. Nichols Field, P. I., Airways detachments as directed by Dept. Commander.
5th Airways Squadron.....	Existing Units in Phil. Dept.	Phil. Dept....	Sq. Hq. Nichols Field, P. I., Airways detachments as directed by Dept. Commander.
6th Airways Squadron.....	Existing Units in Caribbean Defense Command.	P. C. Dept....	Sq. Hq. Albrook Field, Panama, Airways detachments as directed by Dept. Commander.
7th Airways Squadron.....	Existing Units in Haw. Dept.	Haw. Dept....	Sq. Hq. Hickam Field, Haw., Airways detachments as directed by Dept. Commander.

2. The initial strength of the 5th and 7th Airways Squadrons will be 19 officers and 110 men. Grades and ratings will be issued in a separate communication.

3. The 5th and 7th Airways Squadrons will furnish the servicing detachments for Airways stations in the Pacific Area. Weather and Communications personnel for the Airways stations will be furnished by the Chief of the Army Air Forces upon receipt of a requisition from the appropriate Department commander.

4. These units will be activated from personnel now available to the respective Department commanders.

5. Further replacements for the 5th Airways Squadron and 5th Air Corps Squadron, Communications, will be furnished by the Chief of the Army Air Forces upon receipt of a requisition from the Commanding General, U. S. Forces in Far East.

6. Attached is a Manning table for an Airways station.

7. The following units are redesignated as indicated:

OLD DESIGNATION	NEW DESIGNATION
Air Corps Detachment, Weather, Philippine Islands.	5th Air Corps Squadron, Weather (Regional control).
Air Corps Squadron, Communications, Caribbean.	6th Air Corps Squadron, Communications (Regional Control).
Air Corps Detachment, Weather, Panama.	6th Air Corps Squadron, Weather (Regional control).
Air Corps Detachment, Communications, Hawaii.	7th Air Corps Squadron, Communications (Regional Control).
Air Corps Detachment, Weather, Hawaii.	7th Air Corps Squadron, Weather (Regional control).
Air Corps Detachment, Communications, Newfoundland Base Command.	8th Air Corps Squadron, Communications (regional control).
Air Corps Detachment, Weather, Newfoundland Base Command.	8th Air Corps Squadron, Weather (Regional Control).

8. Assignment of units:

Caribbean Air Forces:

6th Air Corps Squadron, Communications (Regional control) with squadron headquarters at Albrook Field.

All Communications detachments in the Caribbean Area including Puerto Rico and the Communications detachments at all Airways stations in the Caribbean Area.

6th Air Corps Squadron, Weather (Regional control) with squadron headquarters at Albrook Field.

All Weather detachments in the Caribbean Area including Puerto Rico and the Weather detachments at all Airways stations in the Caribbean Area.

Far East Air Force:

5th Air Corps Squadron, Communications (Regional control) with squadron headquarters at Nichols Field.

All Communications detachments in the Far East Area. 5th Air Corps squadron, Weather (Regional Control) with squadron headquarters at Nichols Field.

All Weather detachments in the Far East Area.

Hawaiian Department Air Force:

7th Air Corps Squadron, Communications (Regional control) with squadron headquarters in the Hawaiian Department Area.

7th Air Corps Squadron, Weather (Regional control) with squadron headquarters in the Hawaiian Department Area.

Newfoundland Base Command:

8th Air Corps Squadron, Communications (Regional control) with squadron headquarters at Newfoundland Airport.

All communications detachments at the British Bases in the Northeast, and Bermuda.

8th Air Corps Squadron, Weather (Regional control) with squadron headquarters at Newfoundland Airport.

All Weather detachments at the British Bases in the Northeast, and Bermuda.

9. Weather Sections and Communications Sections now assigned as a part of Airways detachments are removed from assignment thereto and reassigned as a Weather or Communications detachment to the appropriate Weather or Communications squadron of that area. The detachments will remain at their Airways stations.

10. Weather and Communications personnel for the Airways stations will be furnished by the Chief of the Army Air Forces on receipt of a requisition from the Department commander concerned.

By order of the Secretary of War:

[S] OTTO JOHNSON,

CHIEF OF ARMY AIR FORCES,

Washington, D. C.

Request that authority be obtained to activate station complements of a strength in grades and ratings equal to those at present organized on the mainland at the following Air Corps Fields within this department colon Hickam Field Wheeler Field Morse Field Barking Sands Stop No provision has been made for personnel for Base and Post functions with the result that the wings at Hickam Field and Wheeler Field are forced to provide administrative personnel for the posts in addition personnel from the Eighteenth Wing Hickam Field and from the Air Base Group Hickam Field are required to man Barking Sands and Morse Field comma both major outlying fields. Personnel for post administration must be obtained somewhere and it is now being obtained at the expense of our tactical organizations Stop If the tactical organizations should be moved into the field post administration would collapse Stop It is urgently recommended that the authority requested above be obtained immediately signed Martin

[SECRET]

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 25 April 1941.

In reply refer to:
AG 230.3/37

Subject: Reorganization of the Forces of the Hawaiian Department.

To: The Adjutant General, Washington, D. C.

1. Reference is invited to:

A. Secret letter, HHD to TAG, 25 February 1941, subject: "Reinforcements for Hawaiian Department", file AG 320.2/58.

B. Secret radio, TAG to HHD, 19 April 1941, 744-18th and reply thereto, HHD to TAG, 22 April 1941. AG 325/18-18a.

C. Secret letter, HHD to TAG, number 2645-18, dated 18 April 1941, in connection with Medical Department Enlisted Reinforcements. On file in Department Surgeon Office.

2. It is recommended that authority be given this headquarters to organize the present Hawaiian (Square) Division into two (2) separate and independent Triangular Divisions. Under War Department, tables of Organization, No. 70, dated November 1, 1940, current shortages exist in both personnel and material but it is believed that a desirable reorganization can be accomplished without increases in present strength other than the expansion of certain units as requested in my References A, C, and D, and requested reinforcements to organize a Reconnaissance Troop in each of the proposed Triangular Divisions. In paragraph d, Reference A, I requested the necessary reinforcements to organize the Infantry Regiments of the Hawaiian (Square) Division under current War Department, Tables of Organizations, No. 7, dates November 1940, and assuming favorable action on the recommendation, the reinforcements requested herein for the expansion of existing units are in accordance with Reference A. A summary of the proposed reorganization with tables showing personnel shortages hereto as Inclosure No. 1.

3. Primary reasons for this request are as follows:

a. For tactical purposes the Defense of Oahu is conducted in two sectors, they are, the North Sector and the South Sector. Two (2) Triangular Divisions are considered more flexible to accomplish defensive operations in the two separate sectors.

b. The proposed reorganizations presents no serious problems as to organization, command, staff and tactical unity.

c. The Hawaiian (Square) Division, as now organized and employed, constitutes a separate channel of command. Due to present organization it is less flexible than the proposed two (2) Triangular Divisions and also retards the prompt execution of missions requiring the employment of one or more units of the Division in coordination with units of the other echelons under the control of the Department Commander.

d. As now constituted the land defense is assigned to the Division Commander as the Beach and Land Defense Officer, with the result that it permits the Department Commander to play no part in the defensive action, if and when, the air and coast defenses are knocked out.

4. National Guard and Selectee Units.

a. It is proposed to assign one of the two National Guard Infantry regiments now in Federal Service to each of the Triangular Divisions.

b. If the two National Guard Infantry regiments now in Federal Service are demobilized upon completion of one year's training and the Department's full yearly quota of three thousand (3,000) selectees are authorized, then it is planned to form two Infantry regiments from the selectees and assign one selectee Infantry regiment to each of the Triangular Divisions. See Reference B.

c. Should the two (2) National Guard regiments now in Federal Service and two (2) tentatively planned selectee regiments be in Federal Service at the same time then, it is planned to assign one selectee Infantry regiment to each of the Triangular Divisions and one or both of the National Guard regiments to defense missions on the Outlying Islands or retain one National Guard regiment as a Department reserve unit on Oahu.

d. By employing one National Guard regiment with each of the Triangular Divisions it will forstall an expected request for a Brigade organization of the two Hawaiian National Guard Regiments.

5. Station Compliments.

a. Schofield Barracks,

(1) It is recommended that a Brigadier General be assigned to Schofield Barracks for duty as an administrative Post Commander and that he be provided with a staff and commissioned assistants, warrant officer, nurses, enlisted men and civilian employees as shown in Inclosure No. 2, attached hereto, which lists the net minimum requirements desired in addition to permanent personnel now on duty at Schofield Barracks and not assigned to units of the present Hawaiian (Square) Division.

b. Fort Shafter.

(1) It is recommended that a Lieutenant Colonel be assigned to Fort Shafter as the Administrative Post Commander and that he be provided with the officer and enlisted Station Complement personnel as shown in Inclosure No. 3, attached hereto. The necessity for a station complement for the post of Fort Shafter is predicted upon operational missions of its garrison, the 64th Coast Artillery (Antiaircraft) regiment. When thus employed the regiment is absent from its station and because of post and administrative requirements is deprived of its maximum fighting strength. It is believed this serious handicap could be eliminated by employment of a Station Complement at Fort Shafter.

c. Station Complements are not requested for stations under control of the Hawaiian Air Force and the Hawaiian Separate Coast Artillery Brigade for the following reasons:

(1) Hawaiian Air Force: The duties of units of the 18th Bombardment Wing (Hickam Field) and the 14th Pursuit Wing (Wheeler Field) necessitate maximum operation, maintenance and control from Air Fields under the control of the Wing Commanders and from which the Post Administrative Staff and enlisted assistants will not be moved. With full consideration of the anticipated complement of three hundred (300) airplanes, no need for Station Complements exists.

(2) Hawaiian Separate Coast Artillery Brigade: Practically all of the field operational functions will be performed in the vicinity of the permanent station and no necessity for Station complements is considered except for Fort Shafter, as noted above.

6. After preparation of this letter, your 1st. Indorsement to our reference A was received. This request is being forwarded with a view of having it available for reference in the War Department, under the following conditions:

a. That this communication with its request for reinforcements as listed in Inclosure #1, be given reconsideration at the earliest date it is practicable to provide the reinforcements requested.

b. That authority be granted me to reorganize the present Hawaiian (Square) Division into two (2) Triangular Divisions by using the present available personnel and material. This can be accomplished in accordance with the last of your paragraph 3, 1st Indorsement, dated April 11, 1941, to my Reference A.

7. Organization of Air Defense Command.

a. In order that maximum coordination in all activities pertaining to the Air Defense of Oahu may be accomplished, I propose to create an Air Defense Com-

3098 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

mand to be commanded by the Commanding General, Hawaiian Air Force, who will continue control of the 18th Bombardment Wing. I propose to constitute the Air Defense Command as follows:

- (1) Commanding General, Hawaiian Air Force.
- (a) Headquarters and Staff, Hawaiian Air Force.
- (b) 18th Bombardment Wing.
- (c) Air Defense Command.
 1. Aircraft Warning Service.
 2. 14th Pursuit Wing.
 3. Antiaircraft Artillery Brigade.

b. In the organization of an Air Defense Command no interference with normal antiaircraft training is contemplated. Only while actually performing operational missions is it planned to place the antiaircraft Artillery under the control of the Air Defense Commander. Furthermore, no increase in the numbers of the Staff of the Hawaiian Air Force is believed necessary in order to create an air defense Command for this Department. It is planned to have the Commanding General, Hawaiian Air Force, and his staff also perform the duties of the Commander and the Staff of the Air Defense Command. In order to avoid divided responsibilities due to the dual missions now required of some beach defense batteries, no action will be taken to form an Air Defense Command until the first increment of the antiaircraft artillery reinforcements, described in secret radiograms War Department, 25 and 26 April, 1941, have been received.

c. An Air Defense Command for the Hawaiian Department is believed peculiarly adaptable to this theater and will best meet the needs for defense against attacks from the air.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

A True Copy:

L. W. TRUMAN,
Capt. Inf.
12-22-41

AG 320.37/37B

5 June 1941.

Subject: War Garrison for Initial War Operations.

To: The Adjutant General, Washington, D. C.

1. Reference is invited to:
 - A. Secret Radio, TAG to HHD, 29 May 1941, 837-29th.
 - B. Secret letter HHD to TAG, 25 April, 1941, subject: "Reorganization of the Forces of the Hawaiian Department", file AG 320.37/37.
2. In compliance with instructions contained in Reference A, the composition of the war garrison for initial war operations has been studied. Table I herewith, shows the forces recommended, totaling 59,425 officers, warrant officers, nurses, and enlisted men, but not including the civilian employees now shown in Table I, par. 7, HDP-40.
3. The proposed war garrison consists of the following major units:
 - a. Two Triangular Divisions, less reconnaissance troops, with the Infantry and Signal Corps personnel at reduced strength.
 - b. Corps troops consisting of a light tank battalion, the existing 11th Ordnance Company, Division Pack Train, and Co. A, 1st Separate Chemical Battalion, and the recently authorized 34th Engineers, Combat, and the 804th Engineer Battalion (Avn.).
 - c. The Hawaiian Air Force with service elements at present strenths.
 - d. Harbor Defense Coast Artillery as now provided in the approved defense project reduced by the personnel required to man three fixed seacoast mortar batteries and three 155-mm GPF batteries.
 - e. Antiaircraft Artillery with no reduction from the approved defense project.
 - f. Service, elements, with reductions in the mobilization strengths as shown in par. 7 HDP-40, and with many units entirely eliminated.
4. (a) The necessity for the defense of existing military air fields on the outlying islands of the Hawaiian group, together with the recently assumed responsibility for the defense of the Naval Air Station at Kaneohe, Oahu, directed by secret letter WD to HHd, 8 April 1941, Subject: "Defense of Naval Air Station, Kaneohe Bay, Oahu, T. H.", file AG 381 (3-13-41) M-NPD, and provision of a suitable mobile reserve for the beach and land defense of Oahu are three vital missions which can not be performed with any degree of success with an initial war garrison of approximately 59,000 troops.
- b. The 299th Infantry recently has been transferred from Oahu to the islands of Hawaii, Kauai, Molokai, and Maui for the defense of air fields, thus leaving the proposed North Sector division short one Infantry Regiment.

3100 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

c. Plans for the defense of the Naval Air Station at Kaneohe, now in preparation in this headquarters, indicate the minimum increase in the war garrison for this mission will include the following:

- 1 Regiment Infantry.
- 1 Regiment Field Artillery, 155mm How., truck drawn.
- 1 Battalion C. A., 155mm guns plus one additional battery.
- 1 Regiment C. A., (AA), (semi-mobile) (less one gun battalion).
- 1 Battery C. A., 12-inch barbette guns.

d. Assuming that two Infantry regiments will be furnished, one to replace the 299th Infantry and one for the defense of Kaneohe Bay, it is believed that the mobile reserve for the beach and land defense should be comprised of the light tank battalion now included in Table I herewith, and Infantry units detached from one or both of the triangular divisions recommended in Table I herewith.

e. It is therefore urgently recommended that the strength of the war garrison for this department be increased from approximately 58,000 to approximately 70,600 men so as to provide the following unit reinforcements from the mainland not now shown in Table I herewith:

2 Infantry Regiments, T/O 7-11 Nov. 1, 1940-----	6, 898
1 Regiment F. A. 155mm How T/O 6-41 Nov. 1, 1940-----	1, 733
1 Regiment C. A. (AA) Semi-mobile (less 1 gun bn) T/O 4-111 Nov. 1, 1940-----	1, 797
1 Bn C. A. 155mm guns, w/1 additional gun btry, T/O 4-35 Nov. 1, 1940-----	694
1 Btry C. A. 12-inch barbette guns, T/O 4-67 Nov. 1, 1940-----	157
Total-----	11, 279

5. Reference is invited to par. 5 and inclosures 1 and 2 of reference B in which it was recommended that station complements be provided for Schofield Barracks and Fort Shafter. Table I herewith includes provisions for the Quartermaster Corps, Finance Dept., Medical Corps, Signal Corps, and Ordnance personnel required for these station complements. It is highly desirable that the war garrison be increased sufficiently to provide the complete station complements for these two stations, an increase of 731 officers and men for Schofield Barracks and 131 officers and men for Fort Shafter.

6. Summarizing, in Table I herewith the war garrison for this Department has been reduced to a strength of 59,425. To provide a mobile reserve for the beach and land defense of Oahu, and to defend the Naval Air Station at Kaneohe and military air fields on outlying islands, an increase to approximately 70,600 officers and men is essential. A further increase of about 860 officers and men is highly desirable to furnish station complements for Schofield Barracks and Fort Shafter. I therefore recommend that the war strength of this command for initial war operations be fixed at approximately 71,500 officers and men.

7. Recent operations in Europe, particularly the failure of the British to hold the island of Crete, indicate the vital importance to the defense of Oahu of the nearby air fields on the other islands of the Hawaiian group. Hostile use of any of these air fields, considering modern methods of air warfare, would be extremely hazardous to the defense of Oahu. While not yet included in the war garrison recommended for this Department, it is probable that in the near future, plans will be submitted for the garrisoning of each of the outlying islands by a force consisting of approximately one regiment of Infantry and a composite battalion of Field Artillery.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

1-Incl.—Table I.

Capt. Inf.
12-22-41

Subject: War Garrison for Initial War Operations, Hawaiian Department.
AG 320.2 (8-5-41) MC-E 1st Ind.

ESA

WAR DEPARTMENT, A. G. O., July 22, 1941.

To: Commanding General, Hawaiian Department.

1. The war garrison recommended in paragraph 2 of the basic communication, totalling 59,425 officers, warrant officers, nurses and enlisted men, reduced to

57,249 as shown in inclosure 2, and augmented by the following units for the defense of Kaneohe Bay:

1 Regt CA (AA), semi-mobile (less one gun Bn, band and basies).....	T/O 4-111	11-1-40	1,590
1 Bn CA 155 MM Guns with 1 addit. gun btry.....	T/O 4-35	11-1-40	694
1 Btry CA.....	T/O 4-67	11-1-40	157
Total.....			2,441

is approved. Paragraph 7, HDP-40 will be amended accordingly.

2. The recommendation contained in paragraph 6 of the basic communication to establish a war garrison of 71,500 officers and men for initial war operations in your department is not favorable considered. Troops in excess of the 59,690 authorized in paragraph 1, above, will be sent to Hawaii only in case the situation develops a need therefor and provided such additional troops can be made available in connection with other requirements.

By order of the Secretary of War:

(Signed) E. S. ADAMS,
Major General,
The Adjutant General.

2 MAY 1941

AG 320.3/38

Subject: Organization of Antiaircraft Artillery Brigade.

To: The Adjutant General, Washington D. C.

1. References:

A. War Dept. Secret Radio No. 739, 24 April 1941.

B. War Dept. Secret Radio No. 760, 26 April 1941.

C. Letter CO, RECAB to CG, Reun. Dept, dated 16 April 1941, subject: "Constitution and Activation of Antiaircraft Intelligence Battery," forwarded to the War Department by 1st. Indorsement dated 21 April 1941, file RECAB 320.3, IHD 320.3/36.

D. Letter FED to TMG, subject "Reorganization of the Forces of the Hawaiian Department", dated 25 April 1941, file 320.3/37.

E. Letter VD to FED dated 2 April 1941, subject: "Coast Artillery units for Hawaiian Department", file AG 3GC.2 3G26-41 M (Ret) M-C. WD 320.2 straight Misc.

2. Upon the arrival of the first increment (Ref. A) of the war reinforcements of the Antiaircraft Artillery Garrison of this Department in June 1941, the organization of the Antiaircraft Artillery Brigade will be required. This brigade will be composed of all Antiaircraft Artillery Units in the Department except the one or two batteries of harbor defense artillery regiments which still have dual assignments to harbor defense and Antiaircraft Artillery missions. The organization of this brigade is mandatory not only because of the strength of the units involved but also because of the organization of the Air Defense Command (Reference D) this brigade will be required to function independently of the Hawaiian Separate Coast Artillery Brigade for tactical operations and in training therefore.

3106 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. It is proposed that the Antiaircraft Artillery Brigade, Hawaiian Department, will be organized as follows:

53rd C. A. Brigade (AA) (RRF.N.).

Hq. and Hq. Btry, 53rd CA Brigade (RefH.).

Intel. Btry, 53d CA Brigade (T/O 4-08 (a) HAD) (Ref. C & R).

64th C. A. (AA)

251st. C. A. (AA)

"Tch" CA (AA) easi-mobile (less 3d Ea) (Ref. A)

"Eth" Rs, AA gun, semi mobile (less searchlight battery and one gun Battery) (Ref. A); to be expanded into the "8th" Regt. upon arrival of the remainder of the reinforcements (Ref. B)

4. Accordingly it is recommended that:

a. Authority be granted to activate the Hq. and Hq. Btry, 53d CA Brigade (T/O 4-10-1, 1. Nov. 40) and the Intel. Btry. 53d. CA Brigade (T/O 4-06 (c) New), on or about 1 June 1941.

b. A brigadier General be assigned to this Department to command the 53d CA Brigade.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

WAR DEPARTMENT, A. G. O., June 12, 1941.

To: Commanding General, Hawaiian Department.

1. You are authorized to activate the Headquarters and Headquarters Battery and Intelligence Battery, 53rd. Coast Artillery Brigade, within the recently authorized organization of Coast Artillery garrison, Hawaiian Department, by 1998 filler replacements. No additional personnel can be made available at this time.

2. It is desired that the date of activation of these units and report showing the reallocation to units of grades and ratings of your present allotment, Coast Artillery Corps, to include these units be furnished this office.

3. Separate action will be taken on the allotment of additional grades and ratings and on the recommendation to assign a brigadier general to the Department.

4. Table of Organization 4-06 (S) (HAD) is approved as submitted, and is being reproduced and distributed.

By order of Secretary of War:

Major General,
The Adjutant General.

TALK GIVEN BY GENERAL SHORT TO CHAMBER OF COMMERCE ON ARMY DAY

GENTLEMEN:

I am especially pleased to be able to come before this representative gathering of Honolulu business men on the occasion of the celebration of Army Day. Today our military establishment is being brought closer to the view of the general public throughout the entire United States by exhibits and various demonstrations, in order that the people may become better acquainted with some of our equipment, methods and procedures, and now I am afforded the opportunity of discussing some of our plans which will demand close and active cooperation on the part of the civil community and by various departments of your civil government.

You are all aware of the tremendous effort being expended by industry, labor and all departments of the government toward the accomplishment of a gigantic program of national defense. While there are many evidences of this activity here in Hawaii, through defense projects being carried on both by the Army and by the Navy, the tempo of action has not reached as deeply into the private life of the average citizen as has been the case in many cities on the Mainland. Conditions are changing overnight and procedures and practices of today may be changed by the plans and activities of tomorrow. None of these matters are being handled, or even considered, in the light of actual warlike moves nor with any feeling of hysteria, but simply as carefully considered plans which are to be effected for the future security of each and every individual, including the youngest child and the oldest adult, of our nation.

I have been asked many times what the community can do to assist National Defense. The following items are of prime importance:

- (a) Production and storage of food.
- (b) Organization of doctors and nurses for care of injured and wounded.
- (c) Organization of an auxiliary to the police force to guard utilities and prevent sabotage.
- (d) Preparation of plans and making of provisions for evacuation of women and children and preparation of shelters for workers in vicinity of essential industries.

These islands are in no way self sustaining in the matter of food. This is due not to lack of fertility of your soil but to your specialized agriculture.

All of you are vitally interested in the food supply of these islands. In any emergency, which might include the possibility of a disruption of communications with the Mainland, a most important safety measure would be to begin at once the planting of basic food crops which are known by actual practice to be the most easily grown in this soil and climate. Such produce might include sweet potatoes, string beans, lima beans, Chinese cabbage, peanuts and some other local varieties of vegetables. The plantations have done important development work and are prepared to produce these articles in quantity should the necessity arise. An immediate increase in the stocks of such items as rice, flour, canned milk, fats and oils would be a great safety factor and with rising prices is sound economy. Shortage of storage for the food shipped in is now a problem. This condition can be materially alleviated if housewives will well stock their cupboards with non-perishable items. This action would operate to clear needed space on retail and wholesale merchant's shelves for further storage of additional foods. This plan is good present day economy because of steadily rising food prices. There is at present a plan on foot for the construction of large warehouse storage by government subsidy and I believe that this plan should have the support of us all as a defense measure. In the pursuit of this project speed is all important.

Along this same thought I read with much interest in the local press of March 19, 1941, an item which referred to the possible repeal of the personal property tax which so greatly affects the merchant or importer who desires to cooperate

in holding large stocks of food available in his warehouse or store. I would like to voice my approval to such an Act, or other similar legislation which would freeze the tax for any corporation or individual at an amount not to exceed that paid in the past year. This would make it possible for more adequate and plentiful stores of food stuff to be maintained without imposing a hardship on any individual or organization.

It is further important that the local fishing fleet be kept in operation, as it supplies a very large proportion of our daily subsistence. Increased cold storage for meats should be provided. Existing dairy herds on Oahu should be conserved and feed stored.

In the general defense measures for these islands there is no civilian effort of higher importance than preparedness now for an adequate food supply for all the people in time of emergency.

The preparation of your emergency medical service in the case of an extreme emergency such as an air attack or actual assault upon the city is of vital importance. The functions of the military forces under such conditions or control, would be to take measures to insure that civilian agencies, expanded as required, continued to function and not to displace them by a military operating agency. It is therefore definitely necessary that prompt action be taken to organize your medical service into the maximum possible number of teams with mobile equipment capable of being rapidly moved from place to place and set up in existing buildings. Staffs of doctors, nurses, technicians, and others required for the stations should be selected and trained and be ready at any time for immediate duty.

Adequate initial medical supplies for these stations should be obtained, classified, packed, and stored in a manner making them readily available. Necessary vehicles must be on hand by loan or otherwise. Suitable trucks, of the delivery type, for rapid conversion to use as ambulances should be listed and obtainable at once. Necessary personnel for the immediate expansion of hospitals properly located to the extent at least of the porches, dayrooms, etc., should be listed by each. All of these preparations should be accompanied by the preparation of shelters, from air attack, of the best types available. Suitable buildings should be selected to replace hospitals in the zones of probable bombardment. Preparations of this nature should be made in cooperation with the Red Cross.

The organization of a force of ex-service men to supplement the police force in guarding utilities and preventing sabotage I understand is under way. This move will release troops for defense purposes. Consideration should be given to the employment of the R. O. T. C. of the University of Hawaii for the same purpose.

Here in Hawaii we all live in a citadel or gigantically fortified island. Many residents have their homes well within the limits of actual military fortifications, docks, arsenals or many other types of legitimate military targets. Should we ever be faced with a military operation by any enemy against this island (which we fervently hope may never come true), the residents in these areas must be cared for and protected. Plans for such care and protection quite properly come under the jurisdiction of your civil governmental agencies, and I believe these should now receive careful, detailed and mature consideration. I repeat that these matters are not to be viewed with alarm or hysteria, but simply as defense projects and exactly in the same classification as any of the present housing activities which you see around you every day. If you, as civilian organizations, are making plans for adequate warehouse and pier space for the handling of defense materials should you not give some degree of the same effort toward the security and protection of your families from any possible contingency? I believe that you already have a Defense Committee, under the leadership of the Governor of the Territory and the Mayor of Honolulu which has given, or is about to give, some consideration to these matters, and I advance, for the consideration of this committee, some of my ideas on this subject.

There has been considerable information in the New York newspapers as to the plans which are being formulated and discussed by the Mayor of that city for the protection of its inhabitants from any possible air raids. Elaborate measures have been suggested for shelters, fire protection, and other phases of which you are well aware. It is my suggestion that some such plans be initiated for the city of Honolulu. My belief is that any such proposals should be considered not only from a possible wartime condition but also with a view of fitting into the plans for the expansion, betterment and improvement in the civil facilities. In other words, why should we not make plans which will not only form the nucleus for protective measures and which will, at the same time, furnish additional recrea-

tion centers for our civil and military population. My plans envision a recreational center for each precinct, or perhaps smaller section of the city, which would be located somewhere in the highlands away from military targets. There might properly be selected by the Forestry Service, the City Planning Commission or other appropriate body. These camps would be located where a source of fresh water is available, some degree of natural shelter and with a view of accessibility. Here would be installed, in the following order of importance, water, sanitary facilities, outdoor grills and other cooking installations, and mess halls. The Forestry Service, National Parks Administration, and the CCC have already had considerable experience in the construction and laying out of such installations as many such recreational camps already exist on the Mainland. You yourselves have seen some of the results of these activities in your National Park on Hawaii.

Thousands of you people spend your hours of leisure and recreation at the beaches. Why would it not be feasible as well as healthful to divert a portion of such time to comfortable and attractive camps in the hills? Forming the habit of such excursions to adequate and well planned camps would accomplish a dual purpose in establishing not only additional recreation features but at once establishing the basis for evacuation camps should they ever be required in the future.

In case of actual hostilities, which involved this community, all able-bodied males would be utilized by industry or by the military services in one manner or another. Normal business routine would be continued to the greatest extent possible. Any evacuation camps would thus be dedicated to the use of women, children, and male citizens who would not be qualified for other duties. The Army has definite plans to go ahead immediately on the construction of similar camps for the use of the families of Army personnel should such an occasion ever demand that drastic action. In the meantime the camps will be utilized as recreation centers by all of our personnel.

I take this opportunity of laying before you the foregoing plan as deserving your consideration. I believe the evacuation of the women and children from the area of probable bombardment the most essential and difficult problem confronting the community. Without advance planning the greatest confusion and loss of life might result.

I again repeat that the foregoing suggested plans are to be considered as important defense measures with the same priority as given other defense plans. They are not to be thought of as indications of any immediate pending threat, but rather as carefully considered measures to safeguard our homes and families in case of any future dangers. The bill now before the Legislature creating a major Disaster Relief Department, if enacted, will put you in a position to complete these plans and preparations. The Army is ready to do all within its power to help you and you must feel free to call upon us for advice at any time.

My thoughts have been expressed to you quite frankly, as I believe we must understand each other on all questions and work out our common plans together. Army Day was inaugurated with such an ideal as its basis and I am pleased to have had this opportunity of bringing before you some ideas and suggestions which may have material work to you now and in the uncertain days of the future.

I thank you.

[Exhibit 1P]

[1]

CHRONOLOGICAL NARRATIVE OF ACTIONS TAKEN BY LIEUTENANT GENERAL WALTER C. SHORT IN CONNECTION WITH PREPAREDNESS OF THE CIVIL POPULATION TO MEET A FOOD EMERGENCY IN HAWAII.

- Item No. 1 Letter from General Short to Governor Poindexter, re storage facilities for Food Supply. General Short states that after a conference with a civilian committee on food supply and facilities for storage, he is in hearty accord with action taken to date. He feels strongly that the problem is of vital interest to both the civil population and the military. The civil authorities should take the initiative for their own supplies, and their actions will receive his utmost support. (See Inclosure No. 1).
- 21 Mar 41
- Item No. 2 Letter from General Short to War Dept. asking authority to issue invitations for purchase of Irish potatoes grown in Hawaii, stating serious problem of food supply under emergency conditions, and stating his objective is to stimulate continuous Irish potato production in Hawaii. (See Inclosure No. 2).
- 4 Apr 41

3110 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Item No. 3 Radio from Gen. Short to War Dept. referring to his letter of 4
12 May 41 April 41, and asking priority radio advice as soon as decision has
been reached. (See Inclosure No. 3).

Item No. 4 1st Indorsement to Gen. Short's letter of 4 April 41, from War
2 May 41 Dept., granting authority to contract for Hawaiian-grown pota-
toes, providing price does not exceed 2½¢ per pound. (See In-
closure No. 4).

[2]
Item No. 6 Memo to Board of Directors, Honolulu Chamber of Commerce from
5 May 41 the Executive Secretary, John A. Hamilton:

1. Prior to April 7, 1941, there was very little buying of food supplies for emergency use. However, on April 7, Lt. General Walter C. Short, Commanding Officer of the Hawaiian Department, United States Army, suggested the desirability of purchasing additional food supplies for use during a possible emergency.

2. Beginning with April 7, the consumer began to purchase additional food supplies in quantities ranging from an extra can of milk to as much as \$800.00 per family as reported by one retailer. Retail merchants report that 20 to 30 per cent of their customers have purchased additional food supplies in the last 30 days. This means that the retailers' stocks on hand would be depleted rapidly.

3. It would be expected that the retailer, when food stocks are moved rapidly from the shelves as a result of heavy consumer purchases, would reorder quickly from the wholesaler or the manufacturer. This has been done. In fact it would appear that retailers have increased their purchases by 20 to 25 per cent above normal.

4. Wholesalers generally support the report of the retailers with regard to the increase of consumer buying as reflected in the increase in the buying done by the retailer from the wholesalers.

5. Of the three wholesale firms visited, two reported large stocks of foodstuffs on hand as a result of additional warehousing space secured to care for the additional demand and the prospective needs in the event of an emergency. Also these firms report a satisfactory replenishment of stocks although additional time is required to get merchandise from the manufacturers to the docks in Honolulu.

Note. The direct result of Gen. Short's public address of 7 April 1941 was to increase the supply of food in storage in Hawaii from 20 to 35%.

[3]
Item No. 7 In a published statement prior to a general meeting of agriculturists
16 June 41 thru-out the islands at the University of Hawaii, Gen. Short
said, "All efforts to increase local food production are steps to-
ward increased security for Hawaii".

Item No. 8 At an address to the University Assembly on Aug. 13th Gen. Short
stated:

13 Aug 41 "Among defense projects which I have publicly emphasized has
been that of the home production of food to sustain the civilian
population during an emergency. I regard this project of local
food production as of primary importance to the defense of Hawaii."

"So far as food supply is concerned, the military organization here is self-sufficient as to its reserves of essential items. It will look after itself in time of war, and it is now projecting food production on military reservations to supply its needs—so far as is practicable.

"I have also supported shipping priorities for all foods—cattle, dairy and poultry feeds, as well as food for human consumption. This support includes farm machinery which is important for large-scale crop production."—(From the Honolulu Advertiser, 14 Aug 41)

Item No. 9 Copy of radiogram from Delegate King to Gov. Poindexter stating
16 Sept 41 the War, Navy and State Departments and the Budget Bureau
were lukewarm in their interest in procuring food reserve stocks
for Hawaii. (See Inclosure No. 5 attached).

For reply to Delegate King, stating Gen. Short's continued support, see Inclosure No. 6.

[4]

Item No. 10
23 Oct 41

The Food Production Plan for Hawaii was formally presented in complete form to the Directors of the Hawaiian Sugar Planter's Association and accepted by them as the basic operating plan for local production of food crops, cattle and dairy products. This plan covers production not only of Oahu but of all the out-islands as well, setting up acreage and crops allocations to plantations, both sugar and pineapple, which were accepted by them as defense requirements. Small farmers were included in the plan as well. Seed requirements were set up; as well as insecticide, fertilizer and machinery requirements for producing crops sufficient to sustain the entire population for six months.

This plan was based on the Army plan and was supported and urged thru-out by Gen. Short. It is now in operation in its initial phases as planned. Gen. Short arranged for the procurement of all seed, insecticides, fertilizer and machinery for harvesting this crop, as well as arrangements for procuring the necessary priority allocations of shipping space required. (See Incl. No. 7.)

Item No. 11
3 Dec 41

Letter from Gen. Short to War Dept., stating that the project of the Emergency Food Reserve for Hawaii which failed of approval by the Bureau of the Budget should be brought up for reconsideration, and asking the support of the War Dept. when it comes up. (See Inclosure No. 8.)

Item No. 12
3 Dec 41

Letter from Gen. Short to Gov. Poindexter, stating that he has always regarded a reserve food supply as of primary importance in defense plans, giving supporting data, and asking the Governor to obtain an inventory of food on hand in the Territory, in order to support his request for an emergency reserve food supply. (See Inclosure No. 9.)

Item No. 13
14 Dec 41

Radiogram from General Short to War Dept. stating in detail the immediate requirements of food, seed, livestock feed, farm machinery, insecticides and fertilizers, including shipping space required, for current civilian needs. (See Inclosure No. 10.)

[5]

Item No. 14
17 Dec 41

WD Radio #685, 17 Dec. 41 "Shipment of Food for Civilian Population".

In reply to Haw'n Dept. radio #1182, the War Dept. states food will be procured and delivered to civil authorities in Hawaii, first shipment to leave within one week, second shipment following week; every effort to be made to provide critical items indicated by the radios of Gen. Short and of the Governor. (See Inclosure No. 11.)

As a direct result of Gen. Short's letter to the War Department of December 3, 1941, the attached radiogram (Inclosure No. 11) from the War Department, dated December 17, 1941, was received, indicating the immediate shipment of the Food Reserve Supply to Hawaii.

While Gen. Short was not asked for letters of support for certificates of necessity for the construction of storage for the Emergency Food Supply because this was not needed, he has consistently supported such construction, both by the Hawaiian Pineapple Co. for the dry storage, and by the Oahu Ice and Cold Storage Co. for the refrigerated storage.

When the Emergency Food Reserve was turned down by the Bureau of the Budget Gen. Short stated publicly that storage completed, or under construction for the Emergency Food Supply would be specifically reserved for the purpose for which the certificate of necessity was granted by the War Dept.

At present the warehouse space of the Hawaiian Pineapple Co. is ready, and that of the Oahu Ice and Cold Storage Co. will be ready in the very near future.

The Civilian Food Administration, as planned by Gen. Short, is now in full operation under Governor Poindexter's Council of Civilian Defense, which in turn is affiliated with the National Office of Civilian Defense.

3112 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Civilian authorities of the Food Administration freely acknowledge the impetus of Gen. Short's consistent urging of plans to implement the Food Administration for an emergency, so that it has been able to get into operation without delay on the basis of plans set up by the Army.

Enclosure No. 1.

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., March 21, 1941.

Honorable JOSEPH B. POINDEXTER,
Governor, Territory of Hawaii, Honolulu, T. H.

MY DEAR GOVERNOR POINDEXTER: Mr. H. H. Warner and Mr. Richard Kimball, acting as your committee on emergency food storage, conferred with me March 19th relative to storage facilities and food supply, and the adequacy in general of the supply of food stuffs during any emergency in which incoming shipments might be curtailed. The conference included the action taken to date to obtain storage facilities, including their meeting with local importers and bankers, the action taken by Delegate King, and your radiogram of March 18th to Delegate King. I assure you that I am in hearty accord with the action taken to date and am in full concurrence therewith.

I strongly feel that the problem of assuring the civil population an adequate supply of food stuff during any emergency in which incoming shipments might be curtailed or cut off is of vital interest both to the civilian community and the military. I believe that the civilian community should take the initiative as this problem is primarily and initially the concern of the civil authorities. However, the military cannot be divorced of its concern in this problem as it is relatively of equal vital interest to the military. Any action which you may take to insure such an adequate supply of food for the civil population will be concurred in by me and have my utmost support.

With kindest personal regards,
Sincerely,

WALTER C. SHORT,
*Lieutenant General, U. S. Army,
Commanding.*

Enclosure No. 2

[1] HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., 4 April 1941.

Subject: Authority to Issue Invitations for Purchase of Irish Potatoes Grown in Hawaii.

To: The Adjutant General, U. S. Army, Washington, D. C.

1. In view of the present military situation it is of high importance to increase the local production of food within these islands so that they may become self-supporting.

Hawaii at present imports 85% of its food supplies from the mainland. In the event of an interruption of communications the sustenance of the civil population would become a serious problem. Under certain conditions the solution of this problem becomes a mission of this Department.

In view of these conditions it is believed that the subsidizing of local food production by governmental agencies is entirely justified as an emergency defense measure provided that the increase in cost to the government is not unreasonable.

In this connection attention is invited to Radiograms (381) this Headquarters, to the Quartermaster General, 22 and 23 August 1940, and to his reply thereto of 26 August 1940, authorizing this Department to contract for Irish potatoes under conditions as set forth in 1st Indorsement, W.D. -OQMG, July 5, 1938; and to related correspondence over the past four years.

2. Under the authority above quoted 1,929,000 pounds of Hawaiian-grown Irish potatoes have been contracted for delivery during February, March and April of this year at an average cost of \$.025 per pound. Mainland-grown potatoes were delivered to the Navy during this period at an average of \$.018 per pound. Therefore, the project of Irish-potato growing in Hawaii for the purpose of increasing local food production as an emergency defense measure

was carried out in this case at an increased cost to the Army of \$.007 per pound, or approximately \$13,500 for the total project in terms of money. It is believed that this differential would hold good as an average throughout any year until growers have established a year-around crop when the spread would become less. Actually, the wastage on Island-grown potatoes is nil for shrinkage, loss of weight or spoilage such as occurs with mainland potatoes in their shipment to Hawaii. This fact materially reduces the differential cost to the government as above indicated. The increase in cost is considered justified as a safety defense measure to assure the future expansion of the local crop. This can be accomplished [2] only by this assurance to the grower of the return of his cost of production. Sugar planters—who provide the bulk of the production, are entirely willing to go along on this project and break even.

3. The efforts of this Department during the past year have directly resulted in the increase in production of 1,242,086 lbs of locally grown Irish potatoes over 1940.

4. It is believed that for a part of the first year Island production will not be able to meet the requirements of the Army for Irish potatoes, but the project is still considered well worth the added cost to the government during the period that the requirements can be met. Local producers feel that they can quickly build up the industry to a point where Hawaii can meet the demand throughout the entire year.

5. It is now proposed to stimulate continuous Irish potato production in Hawaii. For this purpose authority is requested to contract for Hawaii-grown Irish potatoes for the fiscal year 1942, for monthly or quarterly periods, or for periods of six-months, or for one year as seem most likely to accomplish the purpose at the time of the offering.

(Sgd) Walter C. Short,
WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

Enclosure No. 3.

R. S. BAMBERGER,
Colonel, A.G.D., Adjutant General,
12 May 1941.

The ADJUTANT GENERAL,
Washington D. C.

Remylet four April subject authority to issue invitations for purchase of Irish potatoes grown in Hawaii Stop As soon as decision has been reached relative to request contained in paragraph five thereof request priority radio advice

Subject: Emergency Reserve Food Supply for the Civilian Population of Hawaii.
To: The Adjutant General, War Department, Washington, D.C.

1. The present military situation in this area has engendered a strong feeling among the civil authorities that the project of the Emergency Food Reserve for Hawaii which has lately failed of approval by the Bureau of the Budget, should be brought up again at this time for reconsideration based on new data to be presented.

2. It is my feeling that this project should be progressed as a sure way to meet any food shortage with which the Territory may be confronted in emergency, and for this reason I have written a letter to the Governor of Hawaii in support of this project. A copy of this communication is enclosed.

3. In view of the necessity of a reserve food supply as indicated above, and in the enclosure herewith, I request the support of the War Department for this project when it comes up for reconsideration by the Bureau of the Budget.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

1 Incl—
Let. Gov. of Hawaii re
food storage dated
12-3-41.

Enclosure No. 9

DECEMBER 3, 1941.

AG-430

Honorable JOSEPH B. POINDEXTER,
Governor of Hawaii, Honolulu, T. H.

MY DEAR GOVERNOR: The present military situation in the Pacific indicates the necessity of advancing certain plans for the care and protection of the civil population of Hawaii in the event of an interruption of normal shipping between the Islands and the mainland.

I have always regarded the accumulation of a reserve food supply for Hawaii as of primary importance in our defense plans, and I have publicly announced this view on appropriate occasions.

I feel strongly that the project for the reserve food storage which has lately been refused approval by the Bureau of the Budget, might well be again advanced at this time.

In support of this view I should like to quote from the annual report of the Diversified Crops Committee of the Hawaiian Sugar Planters' Association transmitting the final Food Production Plan for Hawaii to the Trustees of that organization:

"We think that our year of work on these plans has given us a sufficiently clear understanding of the various phases of the problems of emergency food supply to enable us to express an opinion. And that opinion is, that no stone should be left unturned in the effort to have adequate supplies of essential basic foods stored here against an emergency."

Additionally I should like to quote in part from a radiogram from Delegate King of October 24, 1941, addressed to yourself and to Mr. H. H. Warner of your Emergency Food Commission, on the subject of the refusal of the Bureau of the Budget to approve the Food Storage Plan. This communication was submitted at the time as information to the members of the commission, including the Army representative present.

"Perhaps appeal by Governor addressed to President through Interior Department supported by inventory of specified food commodities and length of time such supplies could meet local needs would help bring about further consideration this program.

"Direct appeal from local administration based on factual data would bring quicker action."

It is apparent from the above that the surety of a food supply during the initial phases of a war situation and prior to any supplementary local food production, can be safely predicated only upon the presence of a reserve of food stored here, and that the chance of getting the approval of the Bureau of the Budget for this project rests largely upon the ability of local authority to submit factual data as to amounts of food currently in Hawaii.

This requirement cannot be met with any degree of accuracy except by data obtained through a physical inventory of food on hand.

It is my feeling that as a matter of safeguarding the public welfare against the coming emergency, the project of a defense reserve of food for Hawaii should be again advanced at this time, and that it should be supported in this case by a factual statement of the amount of food currently on hand in the Islands.

For this purpose it is believed that the local importers and others concerned would voluntarily take an inventory to supply the required data in response to a request from you. It would seem that an appropriate date for this inventory might well be the end of this calendar year to tie in with other legal inventory requirements of the territory, or even sooner in view of the time element involved in assembling the figures.

May I take this opportunity to assure you of my continued wish to be of any assistance in the present emergency.

Very sincerely yours,

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., July 11, 1941.

In reply refer to:
Via "Clipper" Air Mail
Engr. 383

Subject: Protection of the Civilian Population against Air and Other Attack.
To: The Adjutant General, Washington, D. C.

1. Reference is made to radiogram from Delegate Sam King to me, a copy of which is inclosed for ready reference. This radiogram raised questions concerning funds to be allotted to Hawaii under the Lanham Act for the protection of the civilian population against air and other forms of attack. These questions are answered in this letter which is submitted to the War Department in accordance with request in the radiogram. A copy of this letter and all inclosures is being forwarded direct to Dr. C. E. Fronk, in care of Division of Territories and Island Possessions, Department of the Interior. Dr. Fronk is now in Washington as the Governor's representative in this matter.

2. Evacuation camps will be built in units designed to care for 240 people. This size is determined by the capacity of the standard mess hall (Fig. 74, FM 5-35) which will serve 120 people at one sitting. The ideal unit would be built in a quadrangle 100 yards wide by 120 yards long. This arrangement will facilitate guarding against prowlers, contribute to privacy, and shorten average distances between shelters and latrines, mess hall, baths, and wash rooms. See typical layout plan inclosed herewith (Incl. No. 1).

a. This typical layout will be modified as necessary to adapt it to ground forms, streets, etc.; but the general principle of using shelters to form a partially inclosed communal area will be observed.

b. The design has been made extremely simple to permit erection by unskilled labor, and the use of any type of building material. Materials available in local stocks will be used to the utmost to conserve shipping space. Windows and doors are omitted. Occupants will devise curtains to secure such privacy as they wish. It is proposed to construct all units except bath houses and water served latrines without floors initially. If lumber is available, wooden floors will eventually be laid on wooden sleepers. If lumber is not available, floors will be finished with volcanic cinders, crushed rock, or sand stabilized with portland cement if available. If floors cannot be provided, occupants will have to provide themselves with something to stand on.

[2] c. Canec, a locally available product, will be used to the fullest extent practicable. Studding, rafters, flooring, and probably sleepers supporting flooring will have to be imported if not in stock. Roofs will be made from galvanized iron, if obtainable.

d. All structures have been designed to utilize standard sheets of canec, plywood, and standard lengths of lumber.

e. The mess hall is an adaptation of the standard mess hall shown in Fig. 74, FM 5-35. Construction is greatly simplified by omitting doors and windows which permits spacing all studs uniformly 24" on centers (See Incl. No. 6).

f. All other buildings are simple shed construction. See inclosed sketches of shelters, latrines, bath houses, and wash houses. (Incls. 2 to 5).

(1) 960 lineal feet of living room shelters will be provided for each camp. They will be built in lengths which are multiples of 8'. Standard double bunks (Fig. 71, FM-5-35) will be placed 8' apart. (Incl. No. 2). Partitions will be of canec so nailed that they may be easily removed. Occupants will remove and shift canec partitions to give any length room desired.

(2) The same type construction will be used for latrines, bath houses, and wash rooms as in living quarters. Details of interior arrangements are indicated on inclosed sketches. Latrines will be equipped with water closets when a sewer system is available and the necessary plumbing supplies can be secured. Otherwise pit latrines will be used. Running water will be available at all camps. Plumbing will be installed in mess halls, bath houses, and wash houses in the order named as far as available materials will permit.

g. Protection against bombardment will be provided by slit trenches as indicated in the typical layout sheet (Incl. No. 1) when camps are on flat ground. Camps in gulches will be provided with conveniently located alcoves dug into deep slopes.

h. Dispensary buildings and administration buildings will not normally be built. In the general instance sufficient space in permanent residences or other buildings will be available for those purposes.

i. Protection of funds and valuables may be made a function of a central administration service. No provision will be made for that in construction plans.

[3] 1. Evacuees will be encouraged to bring small articles of furniture such as mirrors, chairs, hammocks, mattresses, curtains, etc. They will also be encouraged to bring simple hand tools. It is presumed that subsequent to evacuation a systematic collection will be made of abandoned articles required for camp comfort.

3. a. Camp locations have been selected with a view to the following. For locations see Incl. 7.

(1) Utilizing existing roads, utilities installations, and community service units such as stores, post offices, churches, etc.

(2) Avoiding ground at present under cultivation.

3118 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(3) Placing a large percentage of evacuees near areas suitable for growing vegetables.

(4) Securing dispersion.

b. The equivalent of 42 units (240 persons each) with a capacity for 10,080 people will be constructed as extensions of existing permanent plantation villages. In addition to this extension many villages will be increased by one mess hall, latrine, bath house, and wash house to permit increasing the number of occupants in the permanent buildings which will be utilized solely as dormitories. Plantation villages in the higher altitudes are usually built on the edges of gulches. The camp extensions will, in the general instance, be sited in these gulches and will vary greatly in size and layout, depending on terrain conditions. These camps will be spread throughout the central valley in areas least subject to probable enemy activity. Distances from Honolulu will vary from 8 to 26 miles. The estimated average distance is about 20 miles. Locations are shown on Incl. 7. These camps will have running water, but will not have sewer connections. The following advantages are characteristic of these units:

(1) Provide a high degree of dispersion.

(2) Sited in excellent locations for protection.

(3) Well located for utilization of occupants in food production.

(4) Adaptable to race segregation which will be desirable to prevent communal discord.

(5) Can readily be amalgamated with existing village administrations which will facilitate government.

(6) Utilize existing installations.

[4] c. 42 units (240 persons each) with a capacity for 10,080 people will be located at Wahiawa, north of the Schofield Barracks East Range boundary and south of the North Fork of Wahiawa Reservoir. The distance from Honolulu is about 21 miles by Kamehameha Highway. This location offers the following advantages:

(1) Will be an extension of an existing city in areas fairly well supplied with roads.

(2) Can readily be supplied with sewer facilities if materials are available.

(3) Will be included in anti-aircraft defense of Schofield Barracks and Wheeler Field.

(4) Is in an area of rich soil adaptable to utilization of evacuees in food production.

d. 21 units (240 persons each) with capacity for 5,040 people will be located in four valleys leading into the Koolau Range from the evacuated areas. For location see Incl. 7. They will be between 2 and 3 miles of the evacuated area.

e. 21 units (240 persons each) with a capacity for 5,040 people will be located in gulches west of Aiea. For location see Incl. 7. They will be an average of about 13 miles from Honolulu.

4. The projected air-raid shelters are intended to protect 6,000 persons other than military personnel whose continued presence in the danger area is essential to the defense of Oahu. The number is based upon reports submitted by essential governmental agencies, public utilities, and commercial firms.

b. The proposed locations of shelters is shown on the inclosed map of Honolulu (Incl. No. 8). These locations have been determined from reports of probable distribution of personnel submitted by the organization affected.

c. It is proposed to construct the shelters of reinforced concrete and to limit the normal capacity of each shelter to from 10 to 15 persons which can shelter from 16 to 25 people for short periods. However, other materials will be substituted for reinforced concrete if cement and steel are not available in sufficient quantities. When practicable existing structures will be utilized by increasing protective characteristics. Tunneling will be practicable in some locations. Inclosures 9 to 12 show details of the various types to be used, depending on conditions.

[5] d. The cost of reinforced concrete shelters has been estimated at \$100.00 per person to be sheltered. That is each shelter will cost from \$1,000 to \$1,500. No estimate of unit cost can be made for shelters built of substitute materials. Should shortage of materials limit the number of concrete shelters built, the available funds will be applied to building as many shelters of substitute materials as possible.

e. It is presumed that the shelters provided for personnel essential to defense will be supplemented by private individual shelters and by shelters erected by commercial interests not essential to defense. The costs of these shelters should be borne by the individual.

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

3120 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[Exhibit 1R]

DECEMBER 22, 1941.

MY DEAR GENERAL SHORT: I have the honor to present an entirely unsolicited expression of interest from many leading men of Honolulu.

There are a hundred more who I am sure would have felt honored to sign this, if time had been available. I wished to place a copy of this letter in your hands without further delay.

Yours very truly,

FRANK E. MIDKIFF.

A true copy:

Robert J. Fleming, Jr.,
ROBERT J. FLEMING, JR.,
Major, G. S. C.,
Asst. to G-4.

HONOLULU, T. H., December 22, 1941.

The PRESIDENT,

The White House, Washington, D. C.

SIR: We, the undersigned, representing substantial business and social organizations in Hawaii, and having had for many years in many ways a vital interest in the armed forces stationed in Hawaii, do hereby wish to express our sincere appreciation of the services rendered to this Territory and to our Nation by Lieutenant General Walter C. Short.

We have found him at all times to be most cooperative and furthermore he has exercised a vigorous leadership in causing this community to prepare for an emergency such as exists at present. Almost a year ago he laid out a plan for this purpose and has taken all steps practicable toward carrying out such plan.

General Short's thorough foresight and his forceful presentation of his ideas to our Territorial Legislature, to our local officials, and to our community in general have been very largely responsible for (a) the enactment of a sound "M-Day" Bill; (b) for the provision of a Territorial Guard; (c) for the decision to increase stored food and to produce food; and (d) for the prevention of sabotage. He has shown a correct and a sympathetic attitude toward the problems of the civil community in assuring cooperation of civilians.

He has maintained a high morale in his Command and has conducted "alerts" from time to time. He has proceeded with preparing the troops and with plans, now looking for financing from federal funds, for adequate and safe storage of sufficient supplies and equipment of all sorts for their use in a probable emergency.

We are encouraged by the fact that a committee has been appointed to go into various phases of the entire case, believing that the excellent men you have selected will render a just report, fair to all concerned.

Meanwhile, we wish to express to yourself and to all concerned our high esteem and our full confidence in the character and ability of General Walter C. Short as a citizen and as an officer, whatever his assignment may be. This letter is prepared without the knowledge or consent of General Short or any other officials, merely in our hope that no unwarranted discredit may accrue to the record of such a conscientious and able officer, through adverse publicity or other wise. This concern is in no way lessened by our vital interest in the adequate defense of Hawaii and our Nation.

With very best respects and wishes, we are

Yours very truly,

Lester Petrie, City of Honolulu, Mayor; C. R. Hemenway, President, Hawaiian Trust Co., Ltd.; A. L. Dean, Vice-President, Alexander & Baldwin, Ltd.; Walter F. MAJOR DISASTER COUNCIL
CITY AND COUNTY OF HONOLULU.
OFFICE OF THE DIRECTOR, ISLAND OF OAHU,
Honolulu, Hawaii, December 20, 1941.

Lt. General WALTER C. SHORT,
Fort Shafter

DEAR GENERAL SHORT.

Please allow me express my sincere regret that our contact through Civilian Defense Plans has terminated.

It was greatly due to your help and backing that our Civilian Organizations were so far advanced that they were able to function so splendidly during the attack.

You will always be able to recollect that your determination to have our Civilian Groups Prepared saved many lives of our Sailors and soldiers through the organized effort of our Civilian Defense Medical Committee and the many trucks that we had ready to be turned into ambulances at a minutes notice.

Please be assured that you will carry the sincere thanks and Aloha of your many friends here who realizes the distress you saved by urging and helping us to be Prepared.

Yours very sincerely,

(s) T. G. S. Walker

[1] [SEAL OF THE TERRITORY OF HAWAII]

TERRITORY OF HAWAII,
Executive Chambers,
Honolulu, 23 December 1941.

Lieutenant General WALTER C. SHORT,
Fort Shafter, T. H.

MY DEAR GENERAL SHORT: Having noted in the public press that an investigation is being made as to the military preparedness of the Army and Navy in Hawaii on December 7, 1941, I believe it appropriate that I make to you a statement as to the state of preparedness of the civil communities of these Islands for war when they were so insidiously and treacherously attacked on December 7, 1941.

The citizens of the Hawaiian Islands have always appreciated that these Islands were important to National Defense from a military standpoint, but it has been only since your arrival in these Islands on February 5, 1941 that it has been brought home to the civil population the importance of the part it would play in the event of a war in the Pacific. On December 7th, the citizens of these Islands met the hour of their test in such a manner as to make me proud to be the Chief Executive of these Islands. Your foresight in urging the population to prepare to meet the possible vicissitudes of war and the joint efforts of the Army and civil population in planning and preparing for this emergency was magnificently rewarded.

3122 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

It may be of interest to point out in detail some of the plans and preparations which bore fruit on December 7, 1941:

(1) *The enactment of the Hawaiian Defense Act* by a special session of Legislation called for that purpose. This legislation permits a mobilization of the entire civil economy of the Islands in the interest of National Defense or in the event of disaster. By virtue of this act, civilian defense was planned and many of its phases were brought to such a point of preparation that they were able to go into action immediately and to function effectively on December 7, 1941.

(2) *The production and conservation of food:* Householders were persistently urged to stock their shelves in canned food. It is estimated that this resulted in increasing the available food supply of the Hawaiian Islands by more than twenty percent. Federal appropriation was requested for procurement and storage for food reserve. This appropriation has, since [2] December 7, 1941, been authorized. By agreement with plantation owners, plans were made for the procurement and storage of seed and the planting of certain large areas with quick growing food crops. Agreements were also made for the growing, in normal times, of those crops not usually grown in marketable quantities. In furtherance of this plan, the War Department was induced to permit the purchase of Island grown potatoes for the use of the Army although the price was above that of mainland potatoes. In anticipation of the receipt of reserve supplies of food asked for in the emergency, the Army supported a certificate of necessity for building an adequate warehouse to meet these needs. This warehouse is now available for the storage of food supply when it arrives.

(3) *The medical facilities* for the care of the injured and wounded during any disaster was one of the first things accomplished by the civilians of these Islands for an emergency. This resulted in mobilizing the entire medical profession of the Islands with all its medical facilities. Approximately three thousand persons were given training and instruction in First-Aid as required by the Red Cross. The persons thus trained assisted in carrying out the arduous tasks of evacuation. Twenty First-Aid units were organized, each unit consisting of personnel of about one hundred and twenty. An ambulance corps of one hundred and forty improvised ambulances were organized. The performance of their tasks by these groups was one of the highlights of the civil defense efforts on December 7, 1941.

(4) *Plans for the evacuation of women and children and the preparation of shelters* for workers in essential industries had reached a high state of perfection on December 7, 1941, and the evacuation of women and children from areas attacked was accomplished in a most admirable manner.

(5) *An auxiliary police force* to guard utilities and to prevent sabotage was organized at an early date in our preparation and it was able to function instantly when called upon to do so on the morning of December 7th. Their work of this force was exceptional and excellent.

(6) *Legislation authorizing a home guard* was enacted at the special session of the Territorial Legislature. It was well planned and so organized that 1400 of such home guardsmen could and were placed on duty thereby relieving members of the Army for other military duty.

(7) *There were many other matters* too numerous to detail here which were planned and accomplished at your instigation. Important among these was the bringing home to the public the urgent necessity for cooperation and public service in times of emergency.

All of the foregoing required tremendous effort on the part of the local authorities, the citizenry and military authorities. All such efforts have been rewarded since December 7, 1941, in that Territorial and City Governments and all phases of the public welfare have overcome all obstacles and have operated smoothly as a direct result of prior planning and training.

It is my belief that the public has confidence in the military and civil authorities. The fact that the Japanese Government has seen fit to inflict a treacherous attack has not in any way diminished the faith of this community in your demonstrated abilities. I wish to state that the magnificent way in which the Territory of

Hawaii met its problem in its crucial hour was in a large measure due to your foresight. I am deeply grateful for your efforts on behalf of the Territory.

You are at liberty to use this letter in any way which you see fit.

Very sincerely yours,

(S) J. W. POINDEXTER,
Governor of Hawaii.

CHARACTERISTICS OF THE POPULATION

INTRODUCTION

This second Population bulletin for the Territory of Hawaii presents data on the characteristics of the population, including sex, age, race, nativity, place of birth, citizenship, marital status, school attendance, highest grade of school completed, employment status, class of worker, occupation, industry, wage or salary income, and months worked in 1939. In the first Population bulletin, entitled "Number of Inhabitants," the total population of the Territory on April 1, 1940, was given for all of its political subdivisions, including counties, judicial districts, representative districts, census tracts, cities, towns, and villages. There remain to be presented for the Territory and for Honolulu city statistics on age by marital status, relationship to head of household, and education, data on occupation by age, wage or salary income, and class of worker, and on industry by race.

Arrangement of tables.—The tables in the present bulletin are arranged on the basis of the areas for which figures are presented. Tables 1 to 17 present statistics for the Territory as a whole and for Honolulu city. Tables 18 to 20 contain the figures for counties. Table 21 gives data by judicial districts and census tracts. Figures for cities of 5,000 to 100,000 are shown in tables 22 and 23. The amount of detail presented in this bulletin is generally greater for the larger places than for the smaller ones, and data from earlier censuses are presented for the larger areas only.

Availability of unpublished data.—The statistics in this bulletin presented for the Territory as a whole and for Honolulu city represent practically all of the data tabulated in this phase of the 1940 program. Although similar statistics have been tabulated for Hilo and Wailuku cities, and almost as much detail has been tabulated for counties and for Honolulu census tracts, it is not possible, because of space limitations, to publish the data in full detail.

These unpublished statistics, however, can be made available upon request, for the cost of transcribing or reproducing them. Requests for such statistics, addressed to the Director of the Census, Washington, D. C., will receive a prompt reply which will include an estimate of the cost of preparing the data.

EXPLANATIONS AND DEFINITIONS OF TERMS

Sex and race.—Because of the importance of the classification of the population by sex, practically all of the data in this bulletin are presented separately for males and females. Moreover, as far as feasible, the data are also presented by race. Seven major race classifications are distinguished in the tabulations; namely, Hawaiian, part Hawaiian, Caucasian, Chinese, Filipino, Japanese, and "other races" the latter comprising mainly Koreans and Puerto Ricans. In the 1940 census, several revisions were made in the race classification. Portuguese, Spanish, and "other Caucasian" were combined into one group, "Caucasian"; persons from Puerto Rico were classified as a separate group because of special interest in their number; and all persons of mixed Hawaiian and other blood were classified as part Hawaiian. All statistics in this bulletin classifying the population by race are in accordance with the 1940 definition. The complete classification by race, sex, and nativity is shown in the following table:

POPULATION OF THE TERRITORY BY RACE, NATIVITY, AND SEX: 1940

RACE	ALL CLASSES			NATIVE		FOREIGN BORN	
	Total	Male	Female	Male	Female	Male	Female
All races	455,390	245,155	178,194	216,645	114,075	23,690	22,395
Hawaiian	14,375	7,418	6,957	7,418	6,957	—	—
Part Hawaiian	40,925	24,630	25,295	24,630	25,272	14	23
Caucasian	103,791	54,473	30,318	80,834	34,886	4,639	2,513
Chinese	28,774	16,121	12,653	12,738	11,192	3,383	1,461
Filipino	32,389	19,791	11,774	19,791	11,774	—	—
Japanese	137,505	63,820	74,084	61,910	54,642	20,910	19,443
Korean	4,861	2,955	2,896	2,287	2,759	1,699	990
Negro	254	173	81	163	62	7	—
Puerto Rican	8,296	4,407	2,889	4,407	2,889	—	—
All others	579	313	266	264	254	20	12

Nativity.—In the classification by nativity, a person born in continental United States or in any of its territories or possessions is counted as native. Likewise included as native are the small number of persons who, although born in a foreign country or at sea, are American citizens by birth because their parents were American citizens.

Place of birth.—The native population is classified, with respect to place of birth, into five groups: Those born in the Territory of Hawaii, those born in the Philippine Islands, those born in Puerto Rico, those born in other United States territories or possessions (including American citizens born abroad or at sea), and those born in continental United States.

The foreign-born population is classified according to country of birth. All classifications of the 1940 population according to country of birth are based on the political boundaries of January 1, 1937, which were practically the same as in 1930.

Age.—The age classification is based on the age of the person at his last birthday before the date of the census, that is, the age of the person in completed years.

Age data for the Territory, Honolulu city, and counties are presented by 5-year periods up to 34 years and by 10-year periods to 74 years. For cities of 5,000 to 100,000 figures are presented by 5-year periods up to 34 years and 10-year periods from 35 to 74 years. Data are also available in various tables for additional age groups having some special significance, i. e., 21 years and over and the various groups shown in connection with school attendance and employment status.

Citizenship.—The classification of the foreign born by citizenship comprises two main groups, naturalized and alien; the second group is further subdivided into those having first papers (that is, those who have made formal declaration of intention to become citizens of the United States) and those having no papers. In addition, there is a third group made up of foreign-born persons for whom no report on citizenship was obtained. Since it is likely that most of these persons are aliens, they are often included with the aliens in summary figures for citizens and noncitizens.

Marital status.—In the classification by marital status four major groups are shown: Single, married, widowed, and divorced. In all censuses there were a few persons for whom the enumerators failed to report marital status. All these persons are here classified as single.

School attendance.—The school attendance tabulation for 1940 is based on the replies to the enumerator's inquiry as to whether the person had attended, or been enrolled in, any regular school or college between March 1 and April 1, 1940. Night schools or vocational schools were not included unless they were a part of the regular school system; and no correspondence schools were included. The school attendance question in the Census of 1930 applied to a somewhat longer period, namely, the seven months between September 1, 1929, and April 1, 1930. Furthermore, in the earlier censuses the question was not restricted as to type of school.

Highest grade of school completed.—In 1940 the census, for the first time, included a question on the formal educational attainment of each person. The question on the schedule asked for the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses and provides data on educational status, a characteristic which is significant for every population group, especially in combination with other characteristics.

The tabulations on last year of school completed which are presented in this bulletin, are restricted to persons 25 years old and over, practically all of whom have completed their formal education. All tables presenting data on education include the median year of school completed. The median year of school completed may be defined as that year which divides the population group into equal parts, one-half having completed more schooling, and one-half having completed less schooling than the median. These medians are expressed in terms of a continuous series of numbers representing years of school completed. For example, the completion of the first year of high school is indicated by 9 and of the last year of college by 16.

Employment status.—In the classification by employment status in the 1940 Census of Population, all persons 14 years old and over are classified on the basis of their activity during the week of March 24 to 30, 1940, into two principal groups: (1) Persons in the labor force, including those employed for pay or profit or at unpaid family work, those on public emergency work, and those seeking work; and (2) persons not in the labor force. The latter group includes persons reported as engaged in their own home housework; those in school; those unable to work; all inmates of penal and mental institutions and homes for the aged, infirm, and needy, regardless of their activity during the census week; others not employed, not on public emergency work, and not seeking work; and persons for whom employment status was not reported.

The various categories of persons in the labor force are defined below:

Employed (except on public emergency work).—The group classified as employed includes: (a) Persons who worked for pay or profit at any time during the week of March 24 to 30, 1940, in private work or nonemergency Federal, Territorial, or local government work, or assisted without pay on a family farm or in a family business; and (b) persons not actually at work and not seeking work during the week of March 24 to 30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The group "Employed (except on public emergency work)" includes not only employees but also proprietors, farmers, other self-employed persons, and unpaid family workers.

On public emergency work.—This category includes persons who, during the week of March 24 to 30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), or the Civilian Conservation Corps (CCC).

In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification of considerable numbers of public emergency workers. The

number of persons reported in the census as on public emergency work in Hawaii was 2,326, whereas the number recorded on the pay rolls of the Federal emergency work agencies at the time of the census was 3,568.

Seeking work.—This category represents persons without work of any sort in the week of March 24 to 30, 1940, who were actively seeking work during that week. The group seeking work was subdivided into experienced workers and new workers, the latter being persons who had not previously worked full time for 1 month or more. Persons seeking work for whom a report on work experience was lacking were classified as experienced workers.

Persons with a job but not at work were classified as employed because the strict definition of this group and the fact that these persons were reported as not seeking work, tended to eliminate all except those who would shortly return to the employment from which they were temporarily absent.

Number of unemployed.—The total number of unemployed, as usually defined, includes (1) persons seeking work and without any form of public or private employment and (2) those on public emergency work programs established to provide jobs for the unemployed. Because of the misclassification of public emergency workers, the census total of these two groups understates the amount of unemployment. More satisfactory figures can be obtained by adding to the census figures for persons seeking work, the number of persons on pay rolls of the Federal emergency work agencies at the time of the census. This procedure yields a total of 8,678 unemployed persons.

Comparison of 1940 data for the labor force with previous data for gainful workers.—The 1940 data for the labor force are not directly comparable with the census statistics for gainful workers in 1930 and earlier years because of differences in definition. "Gainful workers" were persons reported as having a gainful occupation, that is, an occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. The labor force is defined in the 1940 census on the basis of activity during the week of March 24 to 30, and includes only persons who were employed, seeking work, or on public emergency work in that week. Thus seasonal workers who were neither working nor seeking work during the census week were excluded from the labor force in 1940; such persons were classified for the most part as gainful workers in 1930. In addition certain classes of persons, such as retired workers, some inmates of institutions, and recently incapacitated workers were frequently included among gainful workers in 1930, but in general, such persons are not in the 1940 labor force. On the other hand, the 1940 labor force includes persons seeking work without previous work experience, that is, new workers, and persons reported as in the labor force for whom neither occupation nor industry was entered on the schedule. Most of the relatively few new workers at the time of the 1930 and earlier censuses were probably not counted as gainful workers. Likewise, some persons who were actually gainful workers, but for whom neither occupation nor industry was reported, were not included in the gainful worker figures for 1930 and earlier years.

The 1940 labor force figures are restricted to persons 14 years old and over, whereas the number of gainful workers shown in earlier censuses included persons 10 years old and over. The number of workers 10 to 13 years old has become relatively small and no longer justifies the additional burden of enumeration and tabulation necessary to retain the 10-year age limit. In making comparisons between the 1940 labor force data and the gainful worker statistics in earlier census reports, the slight difference in age limits should be taken into consideration. The gainful worker statistics shown in this bulletin for earlier censuses exclude those 10 to 13 years old.

Class of worker.—Class-of-worker statistics for employed workers (excluding persons on public emergency work) are given

CHARACTERISTICS OF THE POPULATION

8

in table 12, which shows the numbers of wage or salary workers, employers and own-account workers, unpaid family workers, and workers who failed to report class of worker. The composition of the various categories is described below:

Wage or salary workers.—This class consists of persons who worked as employees for wages or salary (in cash or kind). It includes not only factory operatives, laborers, clerks, etc., who worked for wages, but also persons working for tips or for room and board, salesmen and other employees working for commissions, and salaried business managers, corporation executives, and government officials.

Employers and own-account workers.—This group consists of persons who operated their own business enterprises. It includes not only the owner-operators of large stores and manufacturing establishments, but also small merchants, independent craftsmen, farmers, professional men, peddlers, and other persons conducting enterprises of their own. It does not include managers paid to operate businesses owned by other persons or by corporations; such workers are classified as wage or salary workers.

Unpaid family workers.—This class is composed of persons who assisted without pay on farms or in stores or other enterprises operated by other members of their families. The great majority of unpaid family workers are farm laborers.

Occupation and industry statistics.—In the 1940 Population Census of Hawaii, inquiries relating to occupation and industry were made for all experienced persons 14 years old and over in the labor force during the census week (March 24 to 30, 1940). The occupation and industry data presented in this bulletin, however, are limited to employed persons (except those on public emergency work), and relate to their jobs during the census week.

Occupation classification.—The detailed occupation classification used in the 1940 Population Census for Hawaii contains 378 titles.¹ In this bulletin, the detailed occupation classification is used only for the presentation of occupation statistics for employed workers (except those on public emergency work), by sex, for the Territory and for Honolulu city (table 18). In other tables, occupation data are shown in terms of 12 major occupation groups, representing major groupings of the detailed classification.

Industry classification.—The industry classification, used in the 1940 Census for Hawaii contains 131 titles.² The detailed industry classification is used here only for the presentation of industry statistics for employed workers (except those on public emergency work), by sex, for the Territory and for Honolulu city (table 18). In other tables, a condensed list of 44 industries is used. This abbreviated list represents selections and combinations of the titles in the complete classification.

Coverage of industry classifications "Government" and "Domestic service."—The industry classification "Government (not elsewhere classified)" does not include all persons employed by governmental agencies. Persons are included in this classification only if they were engaged in activities that are peculiarly governmental functions. Government employees who were engaged in activities that are commonly performed by employees of private enterprises are included in the industry classification in which their activities fell. For example, a tax collector is included in the industry classification "Government," but a carpenter employed on a Federal building project is classified in the category "Construction." The total number of persons employed by governmental agencies, therefore, cannot be obtained from the industry classification.

¹ With some exceptions, this classification is convertible to the 227-item Convertibility List of Occupations, which was prepared by the Joint Committee on Occupational Classification (sponsored by the Central Statistical Board and the American Statistical Association) to increase comparability among occupational statistics compiled by various governmental and private sources.

² This classification is a condensation of the Standard Industrial Classification of 1940 titles, which was prepared for use in classifying industry returns from workers or members of their families, by the Joint Committee on Occupational Classification, in cooperation with the Committee on Occupational Classification sponsored by the Central Statistical Board.

The industry group "Domestic service" is somewhat more inclusive than the major occupation group "Domestic service workers," which is limited to "Housekeepers, private family," "Laundresses, private family," and "Servants, private family." The industry classification "Domestic service" includes not only these workers but also persons in occupations such as practical nurse, chauffeur, and gardener, if they were employed by private families.

Comparison of occupation and industry statistics for 1940 with data from earlier censuses.—No comparisons of the 1940 census data on occupation and industry with similar data from previous censuses are included in this bulletin. Such comparisons are complicated by three important considerations.

First, gainful workers, the group for which occupation and industry statistics were presented in previous censuses, are not strictly comparable with the 1940 labor force.

Second, the occupation and industry data shown here do not cover the entire labor force, being limited to employed persons.

Third, the 1940 classifications of occupation and industry differ from those used in earlier censuses, with respect to arrangement and content of titles. For example, in 1930, most of the occupation titles were grouped under a few major industrial headings ("Agriculture," "Forestry and fishing," "Extraction of minerals," etc.), based upon the industry in which the occupation was most commonly followed. In 1940, however, the occupation titles are grouped into 12 major occupation groups ("Professional and semiprofessional workers," "Craftsmen, foremen, and kindred workers," "Operatives and kindred workers," etc.), regardless of industrial attachment.

Wage or salary income and receipts of other income.—In the 1940 census, all persons 14 years old and over (except inmates of specified institutions) were asked to report the amount of money wage or salary income received in 1939. (Those who received over \$5,000 were required only to report that they had received more than that amount.) Persons 14 years old and over were also asked to report whether they had received \$50 or more from sources other than money wages or salaries in 1939. This comparatively small amount was chosen in order to identify those persons whose incomes, for all practical purposes, were limited to receipts from wages or salaries. A question regarding the exact amount of nonwage income was not included because of the very considerable additional burden of enumeration that such a question would have entailed.

Wage or salary income, as defined for the purposes of the 1940 census, includes all money received by persons as compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, etc., as well as receipts commonly referred to as wages or salaries. Enumerators were instructed not to consider as wage or salary income receipts from business profits, fees, travel reimbursements, sale of crops, unemployment compensation, etc., nor compensation in forms other than money, such as meals, lodging, clothing, fuel, etc.

"Other income" includes all income other than money wages or salaries, such as income from roomers or boarders, business profits, professional fees, income in kind, receipts from the sale of farm products, rents, interest, dividends, unemployment compensation, direct relief, old-age assistance, pension, annuities, royalties, and regular contributions from persons other than members of the immediate family. Other income does not include receipts in the form of lump-sum insurance settlements, occasional gifts of goods or money, inheritance, receipts or profits from the sale of properties (unless the person earned his living by buying and selling such properties) or reimbursements for travel expenses.

In this bulletin, the group of persons for whom the receipt or nonreceipt of other income was not reported is combined with the

HAWAII

group without other income of \$50 or more, since the majority of the persons failing to report probably had no other income.

Data on wage or salary income and other income in 1939 are presented in table 16 for the experienced lat or force, which comprises employed persons, those on public emergency work, and persons other than new workers seeking work, during the week of March 24 to 30, 1940. In this table statistics are presented separately for wage or salary workers and for other experienced workers (that is, for the combination of employers, own-account workers, unpaid family workers, and persons for whom class of worker was not reported). The group of wage or salary workers is subdivided into (a) private and nonemergency government workers, and (b) public emergency workers. The category "public emergency workers" includes both persons who were on public emergency work during the census week and persons seeking work during that week who had last worked on public emergency projects. This category is therefore somewhat larger than the employment status group "on public emergency work."

The statistics on wage or salary income and receipt of other income refer to the calendar year 1939, while the classifications by employment status and class of worker refer to the week of March 24 to 30, 1940. Because of the rapid turn-over of emergency project employment, the difference in time reference is probably most important in connection with the wage or salary income distribution of public emergency workers. A considerable proportion of the wage or salary income reported by public emergency workers was derived from private employment. Likewise, some persons who were employers, own-account workers, and unpaid family workers at the time of the census had been employed as wage or salary workers during a part or all of the year 1939, and reported themselves as having received various amounts of wage or salary income.

Two important factors may have made for inaccurate reporting of wage or salary income. First, persons who received their compensation in many installments of irregular amounts may not have been able to determine accurately the total amount received. Second, some informants who replied to the census inquiries for the whole family undoubtedly did not know the precise amount of wage or salary income received by each mem-

ber. Nevertheless, the statistics present a reasonably accurate picture of the amount and distribution of wage or salary income received in 1939.

Months worked in 1939.—In order to show the relationship between income and amount of employment during the year, statistics on wage or salary income and receipt of other income are presented for wage or salary workers classified according to number of months worked in 1939. The classification by number of months worked was obtained from a question regarding the number of weeks worked for pay or profit, including public emergency work, or at unpaid family work, which was asked for all persons 14 years old and over except inmates of certain institutions. For persons with periods of part-time work, the report was to be made in terms of equivalent full-time weeks, a full-time week being defined as the number of hours locally regarded as full time for the given occupation and industry. Paid vacations or other absences with pay were included in the number of weeks worked.

The returns for weeks worked in 1939 have been converted into months in the tables in this bulletin, because a large proportion of the reports were only approximate, and did not represent valid statements of the precise number of weeks of work. The groupings of months worked that are used in this bulletin are listed below, with their equivalents in terms of the original reports of weeks worked.

Number of months worked	Number of weeks worked
Less than 6 months, or not reported.	0 to 23 weeks, or not reported.
6 to 8 months.....	24 to 35 weeks.
9 to 11 months.....	36 to 49 weeks.
12 months.....	50 to 52 weeks.

Data on months worked in 1939 were not tabulated for employers, own-account workers, and unpaid family workers. For such workers, the data on months worked are less significant and less reliable than for wage or salary workers. Moreover, for workers in these groups, the amount of employment in 1939 has little relation to the amount of wage or salary income received.

EXHIBIT NO. 135

SUMMARY OF EVIDENCE CONCERNING TIME OF 27 AND 28 NOV 41 WAR DEPARTMENT
WARNING MESSAGES TO HAWAII AND REPLIES THERETO

1. *27 Nov Marshall warning message* (Exhibit 32, p. 7)
 - received in War Dept code room—6:00 P. M. Washington time; 12:30 P. M. Hawaii time
 - filed in War Dept signal center—6:11 P. M. Washington time; 12:41 P. M. Hawaii time
 - received in Hawaii signal center—6:46 P. M. Washington time; 1:16 P. M. Hawaii time
 - decoded in Hawaii—7:52 P. M. Washington time; 2:22 P. M. Hawaii time

Received in Hawaii 1:16 P. M. 27 Nov—Short (APHB Tr. 420); Phillips (Roberts Tr. 220)

Phillips took to Short about 2:30 P. M. 27 Nov—Dunlop (Clausen Rep. 65)

Short immediately talked it over with Phillips and made alert decision—Short (APHB Tr. 282)

Decided on alert in "a very few minutes"—Short (APHB Tr. 520)

Put Alert No. 1 into effect within 30 minutes—Short (Navy Court Tr. 241)
2. *27 Nov G-2 warning message* (Exhibit 32, p. 10)
 - received in War Dept code room—6:06 P. M. Washington time; 12:36 P. M. Hawaii time
 - received in Hawaii signal center—7:14 P. M. Washington time; 1:44 Hawaii time
 - decoded in Hawaii—9:30 P. M. Washington time; 4:00 P. M. Hawaii time

Fielder doesn't recall whether he showed G-2 message to Phillips and Short before or after Alert No. 1 was ordered—Fielder (Roberts Tr. 311)

Fielder had already taken action under Alert No. 1 before 4:00 P. M. staff conference; G-2 message was decoded at 4:00 P. M., was not presented to staff conference but only to Phillips and Short—Fielder (Roberts Tr. 312-12)

Alert decision based on Marshall message, without G-2 message—Phillips (APHB Tr. 1116, 1131)

"Subsequent" message from G-2 seemed to confirm action—Phillips (APHB Tr. 1128)

"Subsequent" G-2 message taken by Short as tacit approval of alert against sabotage—Phillips (APHB Tr. 1131, 1142)
3. *27 Nov Short reply to Marshall warning* (Exhibit 32, p. 12)
 - encoded in Hawaii—11:10 P. M. 27 Nov. Washington time; 5:40 P. M. 27 Nov Hawaii time
 - filed in Hawaii signal center—11:35 P. M. 27 Nov Washington time; 6:05 P. M. 27 Nov Hawaii time
 - received in War Dept code room—5:57 A. M. 28 Nov Washington time; 12:27 A. M. 28 Nov Hawaii time

Short answered within 30 minutes—Short (APHB Tr. 395, 420)
4. *28 Nov Adjutant General sabotage warning* (Exhibit 32, p. 13)
 - filed in War Dept signal center—8:42 P. M. 28 Nov Washington time; 8:12 P. M. 28 Nov Hawaii time
 - decoded in Hawaii—4:25 A. M. 29 Nov Washington time; 10:55 P. M. 28 Nov Hawaii time*

Short considered as reply to his report of 27 Nov, felt it indicated tacit consent to alert against sabotage—Short (APHB Tr. 111, 345, 422; Roberts Tr. 48, 50)

No doubt that War Dept was fully cognizant of Short's 27 Nov report when Adj Gen message was sent—Short (APHB Tr. 206)

War Dept came back only with more sabotage, so Short thought they approved what he was doing—Short (APHB Tr. 421; Navy Court Tr. 244-46)

Sabotage messages caused Short to feel War Dept agreed with his own judgment that greatest danger was internal—Short (APHB Tr. 430)

Alert ordered prior to receipt of Adj Gen sabotage message—Phillips (Roberts Tr. 220-21)

*Not shown on available document; data taken from testimony of Hain (APHB Tr. 2310-11).

3172 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

5. *28 Nov Arnold sabotage warning* (Exhibit 32, p. 14)
received in War Dept code room—8:15 P. M. Washington time; 2:45 P. M. Hawaii time
Short saw before Martin did—Martin (Roberts Tr. 346-47)
6. *29 Nov Short reply to Adjutant General sabotage warning* (Exhibit 32, p. 17)
encoded in Hawaii—8:15 P. M. 29 Nov Washington time; 2:45 P. M. 29 Nov Hawaii time
filed in Hawaii signal center—8:47 P. M. 29 Nov Washington time; 3:17 P. M. 29 Nov Hawaii time
received in War Dept code room—12:57 A. M. 30 Nov Washington time; 7:27 P. M. 29 Nov Hawaii time
7. *4 Dec Martin-Short reply to Arnold sabotage warning* (Exhibit 32, p. 19)
filed in Hawaii signal center—6:21 P. M. 4 Dec Washington time; 12:51 P. M. 4 Dec Hawaii time
received in War Dept code room—1:24 P. M. 10 Dec Washington time; 7:54 A. M. 10 Dec Hawaii time

WAR DEPARTMENT,
OFFICE OF THE CHIEF SIGNAL OFFICER,
Washington, November 19, 1941.

Memorandum to Mr. Harvey H. Bundy, Special Assistant to the Secretary of War
Subject: Performance of SCR-270

1. There is attached a copy of a memorandum from the Department Signal Officer, Hawaiian Department, relative to the operation of Radio Set SCR-270 in the Hawaiian Islands, which is forwarded for your information.

/S/ Eugene V. Elder
EUGENE V. ELDER,
Lt. Col. Signal Corps.

NOVEMBER 14, 1941.

Memorandum for Colonel Colton, Chief, Matériel Branch.

In recent exercises held in the Hawaiian Department, the operation of the radio set SCR-270 was found to be very satisfactory. This exercise was started approximately 4:30 in the morning and with three radio sets in operation. We noted when the planes took off from the airplane carrier in the oscilloscope. We determined this distance to be approximately 80 miles, due to the fact that the planes would circle around waiting the assemblage of the remainder from the carrier.

As soon as the planes were assembled, they proceeded towards Hawaii. This was very easily determined and within six minutes, the pursuit aircraft were notified and they took off and intercepted the incoming bombers at approximately 90 miles from Pearl Harbor.

It was a very interesting exercise. All the general officers present were highly pleased with the proceedings of the radio direction finding sets and the personnel associated with the information centers.

We have had very little trouble with the operations of these sets. When the fixed stations are installed in the higher mountains surrounding Hawaii, we expect to have as good an air warning system available for use as is now operating for the British on their tight little island, as their situation is approximately the same as ours is on Hawaii.

C. A. POWELL,
Lt. Col. Signal Corps,
Department Signal Officer, Hawaiian Department.

Congressional Pearl Harbor Committee desires all orders and memoranda pertaining to time schedule for operation of and training at radar stations in Hawaiian Department during the period 27 November 41 to 7 December 41. Some evidence here indicates that schedule was initiated by verbal order on 27 November 41. In that case confirmatory written order or memorandum is requested.

SUBJECT: Operating Time Schedule for Radar Stations on Oahu from
27 November 1941 to 7 December 1941.

TO : The Chief of Staff, United States Army, Washington 25, D. C.
ATTENTION: AC of S, Operations Division.

References: (a) Radio, Nr: WCL-22214, DTG: 201834Z Nov 45, from the
Secretary of War to the Commanding General, U. S. Army
Forces, Middle Pacific.

(b) Radio, Nr: RJ-73381, DTG: 212004Z Nov 45, from the
Commanding General, U. S. Army Forces, Middle Pacific,
to the War Department, Operations Division.

1. Inclosures are forwarded to furnish information requested by reference (a) and referred to in reference (b), both above.

2. An exhaustive search through the files designated under Headquarters Hawaiian Department has not disclosed the publication of Official Orders of any kind in connection with the time schedule of training at, or the operation of radar stations on Oahu during the period prior to 7 December 1941.

3. The inclosures consistently show that the time schedule, effective 27 November 1941, placed the aircraft warning radar stations on Oahu in tactical operation from 4:00 A. M. to 7:00 A. M. each day. Except for Sunday, operation was continued for training from 7:00 A. M. to 11:00 A. M., while the afternoon period, from 12:00 noon to 4:00 P. M., was set aside for routine maintenance duties.

Fort Shafter, T. H.) personally appeared before me, the undersigned, as authority for administering oaths of this nature, one Territory of Hawaii) Grover C. White, Jr. O-396182, 2nd Lieut., Signal Corps, Signal Company, Aircraft Warning, Hawaii who after being duly sworn according to law deposes and says:

1. At the request of the Control Officer and Naval Liaison Officer the AWS agreed to operate its detectors beyond the daily period of two hours before until one hour after dawn. The first schedule required operation of all stations from 4 A.M. to 6 P.M. This schedule was modified to the hours of 4 A.M. to 4 P.M. A temporary schedule was next devised which required all stations to operate from 4 A.M. to 11 A.M. and to have "staggered" operation, i.e., 3 stations from 11 A.M. to 1 P.M., the remaining 3 stations from 1 P.M. to 4 P.M. On Saturday, December 6, 1941, I contacted the Control Officer to request authority to have all stations operate from 4 A.M. to 7 A.M. only on Sunday, December 7, 1941; this was agreed to by the Control Officer.

2. Staff Sergeant Stanley J. Wichas, SCATH, acting RDF Officer, reports that he saw nothing that could be construed as suspicious in the information received by the AWS Information Center from 4 A.M. to 7 A.M. Sunday, December 7, 1941. This is verified by Lt. Kermit A. Tyler, Air Corps, who was the only officer in the Information Center from 4 A.M. to 7 A.M.

3. At approximately 7:20 A.M. a report was received from a Detector station at Opans that a large number of planes was approaching Oahu on a course North 3 degrees East at a distance of approximately 132 miles. This information was immediately transmitted by the switchboard operator, Pfc. Joseph McDonald to Lt. Tyler, who talked to Opans about the flight. The statement of Pfc. Joseph McDonald, SCATH, the switchboard operator is attached.

4. The Navy Liaison Officer's position within the Information Center was not manned when I reached the Information Center at about 8:20 A.M. This position was manned shortly thereafter by Technical Sergeant Earle E. Stouffer, SCATH, who remained on the position until approximately 4:30 P.M. when the position was taken over by Naval Officers.

Further the deponent says: not.

G-2 ESTIMATE OF INTERNATIONAL (JAPANESE) SITUATION

1. Summary of Situation

a. With the fall of the Third Kenryo Cabinet, the 16th instant, tension in the Pacific reached a new high. The fall of said cabinet is apparently primarily due to a breakdown of the rapprochement negotiations between America and Japan, and also due to extreme pressure from the rightist elements in Japan as a result of German success against Russia, and also for fear of complete encirclement of Japan by the ABCD group.

b. The situation is generally admitted as being extremely critical, and is still necessarily uncertain, due to the fact that the formation of the new cabinet has not been completed and, consequently, little or no definite information is available as to the attitude of individual members, and nothing as to what the attitude of the cabinet as a whole will be.

c. Based upon contemporary opinions from various sources, however, it is fairly certain that Japan's basic policy, as heretofore frequently stated, will remain unchanged; and it is expected that Japan will shortly announce her decision to challenge militarily any nation or combination of nations which might oppose the execution of said policies - irrespective of what means she may choose to adopt or course she may decide to take in their achievement.

2. Conclusions

According to present indications, it is highly probable that Japan will, in the near future, take military action in new areas of the Far East. The primary reasons for such a move or moves are believed to be as follows:

A- Capabilities

1. Desperate economic conditions internally - making it perhaps preferable to risk a major foreign war rather than internal revolution.

2. Violent opposition by the "rightist" elements who are opposed to any appeasement of the democracies and desire more active cooperation with the Axis - for the time being.

3. That major successes of the Axis in Europe and the potential collapse of Russian resistance, afford an unparalleled opportunity for expansion with chances of minimum resistance - that is, when the strength of the Axis is at its maximum, and the strength of the democracies not yet fully mobilized.

CONFIDENTIAL

CONFIDENTIAL

4. A desire to break the so-called encirclement of the ABCD block.

b. Probable Moves. The most likely moves which Japan may make in the near future, and the sequence thereof, are as follows:

1. Attack Russia from the east.

2. Pressure French Ind.-China and Thailand for concessions in the way of military, naval, and air bases, and guarantees of economic cooperation.

3. Attack British possessions in the Far East.

4. Defend against an American attack in support of the British.

5. Attack simultaneously the ABCD block at which over points might promise her greatest tactical, strategic, and economic advantages.

c. Reasons Justifying These Moves. The basis for each of the above possible moves are considered to be as follows:

1. Attack on Russia.

(a) Japan's desire to extend her first line of defense as far to the west as possible as a primary defense against potential aerial attacks on the heart of Japan proper by a continental power.

(b) To set up a buffer state between herself and Germany (assuming that Germany will eventually attempt to extend her influence and control eastward to the Pacific.)

(c) To secure immense quantities of much-needed raw materials known to be in Siberia.

(d) To secure effective control over, or perhaps stamp out, communism in the Far East by striking at the root or source of the doctrine.

(e) A possibility that an attack on Russia at this time can be undertaken with a reasonable chance of non-military intervention by the United States; and that even the British might not resort to active military action in support of Russia in the Pacific, due to the fact that both the Americans and British are preoccupied in Europe, and that neither power has any genuine desire to ever see the state of the USSR emerge sufficiently strong to again plague the democratic states with the sinister ideals of communism.

CONFIDENTIAL

CONFIDENTIAL

(f) To open communications with Germany for the purpose of closer coordination and supply, in case it becomes necessary to continue the war against other Pacific powers.

(g) To achieve a spectacular victory which is now greatly needed to revive the morale of the people and prepare them for future efforts toward the south.

2. Pressure French Indo-China and Thailand.

Pressure on French Indo-China and Thailand for concessions of military, naval, or air bases, and guarantees of economic cooperation, is entirely to be expected, and this may either precede or follow, or occur simultaneously with an attack on Russia, in order to insure security in the south while her primary objective in the north is being achieved; and to afford her more and better strategic bases from which she can operate against Chungking's lines of communication, and/or American and British lines of communications in case it becomes necessary to defend herself against either or both of these powers. Also, to secure additional raw materials, food, etc.

3. Attack on British Possessions in the Far East.

Following the principle of defeating one opponent at a time - famous with her Axis partner, Hitler - it is believed that Japan, if faced with certain British military resistance to her plans, will unhesitatingly attack the British; and do so without a simultaneous attack on American possessions, because of no known binding agreement between the British and Americans for joint military action against Japan, and that the American public is not yet fully prepared to support such action. However, it must be evident to the Japanese that in case of such an attack on the British, they would most certainly have to fight the United States within a relatively short time.

4. Simultaneous Attack on the ABCD Powers

While a simultaneous attack on the ABCD powers would violate the principle mentioned above, it cannot be ruled out as a possibility for the reason that if Japan considers war with the United States to be inevitable as a result of her actions against Russia, it is reasonable to believe that she may decide to strike before our naval program is completed.

An attack on the United States could not be undertaken without almost certain involvement of the entire ABCD block, hence there remains the possibility that Japan may strike at the most opportune time, and at whatever points might gain for her the most strategic, tactical, or economical advantages over her opponents.

CONFIDENTIAL

CONFIDENTIAL

8. In conclusion, having unforeseen and untoward incidents, which might set off a conflict in any quarter and invite measures and counter-measures never contemplated, it is believed that the above represents the most logical major move that Japan may take and the probable sequence thereof. This is assuming that the new cabinet will be, as generally predicted, "strongly military" and will support the present demands of the "rightists" elements which were largely responsible for the fall of the Third Kameya cabinet.

G-2 ESTIMATE OF INTERNATIONAL (JAPANESE) SITUATION

1. Summary of Situation. Reference paragraph 1, G-2 Estimate of the International (JAPANESE) Situation, 1200 Oct. 17, 1941, there have been no fundamental changes in the international situation, centering on Japan, since the time mentioned; and the estimate is still in almost complete accord with contemporary opinions of most high officials and reputable observers who are known to be in close touch with the various phases of the present fast moving situation. However, the following generally summary is considered appropriate at this time:

a. A crisis of the first magnitude was created in the Pacific by the fall of the Third Konoze Cabinet on the 16th instant. The fall of said cabinet was allegedly precipitated by unsatisfactory progress of the rapprochement negotiations between America and Japan, and by extreme pressure from "rightist" elements who have been clamoring for stronger ties with the Axis and more forceful opposition to the ABCD block, including Russia.

b. An apparently imminent collapse of the Russian forces in the west, together with the loudly proclaimed German successes everywhere, tended to accentuate the cry for action on the side of the Axis to such a degree that the Konoze cabinet could no longer resist, hence resigned en bloc, and was almost immediately replaced by a new cabinet headed by ex-War Minister, General Tojo.

c. Ministers of the new cabinet, as well as Premier Tojo, have openly declared their intentions of stronger ties with the Axis - which automatically underscores Japan's policies with "intensified aggression"; definitely places Japan in a camp hostile to the United States and other democracies; makes all protestations of peaceful intentions a sham or objective of suspicion; and forces America into a state of constant vigilance - but at least clarifies the situation to such an extent that we do know where we stand, what to expect, and what should be done.

2. Conclusions. No change in paragraph 2 of G-2 Estimate of 17 Oct. 1941.

However, several important incidents have transpired, or are scheduled to take place, which are certain to have a profound bearing on the probable course of events in question in the near future. These are:

a. The formation of a new Japanese "War Cabinet", headed by ex-War Minister, General Tojo.

b. The decision of Premier Tojo to continue his predecessor's order to permit three Japanese vessels to visit American ports for the purpose of transporting stranded Americans and Japanese nationals to their respective homelands.

c. Premier Tojo's expressed desire to continue rapprochement negotiations with the United States.

d. The order by the navy department to American vessels to avoid Asiatic ports in the north Pacific, including Shanghai.

e. The announced decision of the American government to abandon Vladivostok as a port of entry for war supplies to Russia, and to adopt the port of Archangel as the sole point of entry for such shipments.

CONFIDENTIAL

f. Announcement of Ambassador Nomura's return to Japan for consultation with the new cabinet.

3. Justifications for conclusions. The following is a brief analysis and evaluation of the above, based on limited reports, and is not to be regarded as conclusive, but rather to assist in making accurate conclusions on the general situation as subsequent events and special situations are presented:

a. New Cabinet. Paragraph 1 g above in the general answer. The only other noteworthy viewpoint received, and considered to be worth mentioning, is that General Tojo was selected to head the new cabinet because he was the only man considered capable of controlling the "extremist" army elements, and thus stave off any precipitate action until such time as the situation in Europe has become definitely clear, and until at least a decisive stage has been reached in rapprochement negotiations with the United States.

b. Japanese vessels to America. The Japanese government's decision to permit three ships to visit America for the purpose of repatriating stranded nationals of both countries, may be regarded either as a peaceful gesture or as a measure to "clear the decks" in the Pacific with a view to future naval and military moves. It will be recalled that the Japanese were careful to remove Japanese nationals from the interior of south China before spreading military operations to that section. It is considered impracticable to remove all Japanese nationals from America and American territories.

c. Rapprochement Negotiations. Inasmuch as the new Japanese cabinet has openly declared its intentions of stronger ties with the Axis - definitely our enemy - we can only expect Japan to make a similar use of peace negotiations as her partner, Hitler, i.e., as a means to delude and disarm her potential enemies. From a military point of view such peaceful overtures should be preceded by concrete evidence of sincerity before they can be seriously considered.

d. Navy Order to Clear American Ships from North Pacific. This action on the part of the navy seems to have been largely "precautionary", which also appears fully justified - realizing that we are now definitely dealing with an exponent and ally of Hitler.

e. Abandonment of Vladivostok as a Port of Entry for Russian Supplies. Two issues are here involved:

(1) Military. The crucial point as to whether we will be able to continue to face Hitler across the English Channel, across the Atlantic, or on American shores, centers in the British Isles. Convoys must cross the Atlantic in order to hold the British Isles at all cost, irrespective of what happens in the Pacific. Convoys to Archangel, for the greater part of the distance, could be carried on incidental to convoys going to the British Isles. Requirements of armed escorts for the remaining distance to Archangel, would probably be less than what would be required over any Pacific route. In fact, with a hostile Japanese fleet in the Pacific, any practicable route across the Pacific to Russia may have been entirely ruled out. Assuming this to be the case, the most logical step would be not to undertake a thing that would certainly have to be abandoned later.

(2) Diplomatic. Inasmuch as the shipping of supplies to Russia via Vladivostok has been one of the major issues between America and Japan recently, the abandonment of said route may serve to keep the door of diplomacy open for a longer period; and, in case of an unforeseen major reverse for the Axis in Europe, might provide an open door for successful negotiations at a time when Japan desired to change her mind, seeing that further ties with the Axis are useless, and that a compromise with the democracies has become inevitable.

CONFIDENTIAL

f. Komura's report to New Cabinet. This is considered a very unusual procedure with the Japanese government. Mr. Komura will be expected to give a review of his efforts in Washington and perhaps the last word on the American attitude. If his previous work is still in harmony with Japan's new policy, he may return to Washington. If not, it seems a fair assumption that he may not even be replaced. In case the abnormal procedure is followed, of dispatching a subordinate to Tokyo, it may be taken as an attempt to conceal the real gravity of the situation. This is not, however, a prediction.

* * * * *

REMARKS. Everyone is interested in the answer to the question, When will Japan move? - a question which no one dares predict with certainty. However, the following points are considered to be worthy of mentioning:

a. Things which tend to indicate that a major move will not take place for approximately another month are:

(1) The dispatch of Japanese vessels to the United States for return of stranded nationals of both countries to their respective homelands.

(2) Ambassador Komura's return to Japan for purpose of reporting to the new cabinet.

(3) Repeated declarations by Japanese officials that Japan desires to continue rapprochement negotiations.

(4) Extreme cold over Eastern Siberia makes military operations against Russia very risky before spring.

(5) A protracted Russo-German war seems much more likely now than it did immediately prior to the assumption of office by the new cabinet, and that the "rightists" who were crying for action against a "collapsing" Russia, may again hesitate to take the final plunge on the side of Hitler. If the intense cold plus a tired Russian army is able to stop the invincible legions of Hitler before Moscow (?), wisdom may dictate not to risk the matchless legions of Nippon against a rested Russian army under temperatures still lower than around Moscow.

(6) Announcement that Cabinet leaders have requested Emperor Hirohito to convene a special five-day session of the Imperial Diet, beginning Nov. 15, at which time, it is predicted, the government will be asked to clarify its stand on international policies, particularly with reference to former Premier Kono's message to President Roosevelt and the progress of the Washington negotiations.

b. In other words, it seems logical to believe that no major move will be made before the latter part of November - in any direction - with a chance that the great break, if it comes, will not occur before spring.

WAR DEPARTMENT
OFFICE OF THE SECRETARY
MEMORANDUM

To the J.A.G.

Would you kindly give me
your opinion on a further
question — in addition to those
embodied in this opinion — viz

If Genl. Short's proposed
application for voluntary re-
tirement were accepted, with
the announced understanding
that such action would
not preclude a future
Court martial for the alleged
offenses in the Pearl Harbor,
would that be valid — could
a subsequent Court martial
be validly brought, should
it be found advisable?

WAR DEPART. .ENT
OFFICE CHIEF OF STAFF
WASHINGTON

To Secretary of War.

Judge-Advocate General's
recommendations reference
Major General Walter C. Short.

G.P.M.)

CONFIDENTIAL

WAR DEPARTMENT
OFFICE OF THE JUDGE ADVOCATE GENERAL
WASHINGTON

January 27, 1942.

MEMORANDUM for the Chief of Staff.

Subject: Course of action with respect to General Walter Campbell Short.

1. Pursuant to your instructions I submit the following comments with respect to possible courses of action against the above-named officer on account of the derelictions disclosed in the report of the President's Commission to investigate the Japanese attack on Hawaii on December 7, 1941. These comments are based solely upon the text of the report of the Commission. I have not seen or examined the 1887 typewritten pages of testimony taken by the Commission nor the 3000 printed pages of records and documents examined by it.

2. General Short may be tried by a general court-martial or he may be summarily discharged from the Army by the President pursuant to the provisions of Article of War 118.

3. With reference to trial by general court-martial, it is assumed that the evidence taken by the Commission sustains its findings of fact and conclusions and would warrant such procedure should it be deemed advisable. However, it is impossible to predict with certainty the result of any trial or the sentence which the court might impose. In this case should a court acquit or impose a sentence less than dismissal I can see no advantage resulting from such a trial. It will be noted that the offenses charged against General Short are offenses of omission or nonfeasance which require a much stronger showing to justify a trial than those involving misfeasance or malfeasance. General Short's nonfeasance or omissions were based on an estimate of the situation which, although proved faulty by subsequent events, was, in so far as I am able to ascertain from the report of the Commission, made or concurred in by all those officers in Hawaii best qualified to form a sound military opinion. That estimate was that an attack by air was in the highest degree improbable.

4. There are, in my opinion, serious questions of policy which should be considered in connection with a possible trial of this officer by general court-martial.

CONFIDENTIAL

CONFIDENTIAL

a. If a court should find him guilty and sentence him to anything less than dismissal, the Army would be accused of whitewashing General Short. This accusation would be much more strongly made should the trial result in his acquittal.

b. Such trial would have to be in open court, otherwise the War Department would be subject to criticism of whitewashing General Short if acquitted, or of persecuting him if convicted.

c. The ramifications of this case are such that in a trial by court-martial it would be necessary to introduce in evidence numerous secret plans, orders and other papers which do not appear in the Commission's report. Both the prosecution and the defense would need these documents in order properly to present their cases. It certainly would be against the public interest to disclose some, at least, of these various war plans and documents. Such being the case, it would be impossible to prevent the publication of these plans and documents except by closing the court during those sessions in which these secret papers were read and discussed. The result of a trial by a court partly in open session and partly in secret session might be that the War Department would be subject to the same charges of whitewashing or persecution as referred to in subparagraph b above.

d. A general court-martial would require the time and energy for a considerable period of a large number of generals and other officers of high rank as members of the court-martial, and for personnel of the prosecution and defense. It would consume much time and effort of the numerous officers of the Army and Navy whose services would be required in order properly to present the case for trial, or whose attendance would be required as witnesses. The ramifications of such a trial would be so great and it would require the time of so many officers from the lowest to the highest rank that it would interfere seriously in the main job now before the War Department, namely the prosecution of the war.

e. The career of General Short as an active Army officer is finished and closed. Because of the lack of confidence which the public now has in him, which lack of confidence would no doubt be shared by his future subordinates, it is unthinkable that any command should again be entrusted to him. General Short knows this. That in itself is a very severe punishment. Furthermore, General Short has been relieved of his command which reduces him from a lieutenant general to a major general. The addition to that punishment of any punishment other than dismissal, such as a reprimand, loss of files, forfeiture of pay or suspension from

CONFIDENTIAL

CONFIDENTIAL

a command, would be inappropriate.

5. For the President to discharge General Short summarily under the provisions of Article of War 118 would tend even more strongly than a dismissal by a sentence of a general court-martial to enable him afterward to claim persecution. Revised Statutes, section 1344, provides that when an officer is 62 years old he may be retired from active service at the discretion of the President. General Short will be 62 years old on March 30, 1943. However, it is unnecessary to discuss this course of action for the reason that you have informed me that General Short has offered to apply for retirement at any time you may desire to accept it. He may lawfully be retired upon such application.

6. General Short entered the Army as a second lieutenant of Infantry on February 2, 1901, and had, up to December 7, 1941, nearly 41 years of honorable and most creditable service. He reached the next to the highest rank that an Army officer can reach, namely that of a lieutenant general.

7. I realize that the question of what ought to be done in this matter has been the subject of heated discussion in the press and elsewhere and whatever may be done will probably subject the War Department to criticism. However, in view of all the considerations hereinabove discussed, I respectfully suggest the advisability and the desirability of accepting the application of General Short for retirement. However, in this connection I would further suggest that it would be both politic and just to coordinate the action taken by the War Department with that taken by the Navy Department in the case of Admiral Kimmel.

MEMORANDUM for the Secretary of War.

Subject: Course of action with respect to Major General Walter Campbell Short.

1. After considering my memorandum for the Chief of Staff of January 27, 1942, on the above subject, you have asked me a further question, as follows:

"If General Short's proposed application for voluntary retirement were accepted, with the announced understanding that such action would not preclude a future court martial for the alleged offenses in re Pearl Harbor, would that be valid - Could a subsequent court martial be validly brought, should it be found advisable?"

2. A retired officer is as a matter of law still an officer of the Army and still subject to court-martial as much as though he were still on the active list (A.W. 2a; Nat'l Defense Act, sec. 2; 10 U.S.C. 4). Neither does his retirement amount to a break in the continuity of his service which would prevent his trial after retirement for an offense committed before retirement (Dig. Op. JAG 1912, p. 992, par I G 2b). The real question involved is whether the retirement of an officer on his own application constitutes a condonation of his offense, barring trial for it.

3. There are opinions of this office to the effect that under certain circumstances release from arrest or confinement or promotion may constitute such a condonation. I find no precedent holding either way with respect to retirement. Retirement after thirty years' service upon the officer's own application under section 1243, Revised Statutes (10 U.S.C. 943; Mil. Laws, sec. 326), is "in the discretion of the President". The foregoing is one of the two statutes under which General Short may be retired at once on his own application. If he be retired under that statute, there may be some plausibility in a contention that the President's exercise of discretion in terminating the officer's active service on his own application constitutes a bargain between him and the officer to the effect that he will not further be prosecuted for known offenses occurring prior to retirement. There is no statutory or judicial authority for such a view, and I regard it as unsound as a strict matter of law. Therefore I

APR 8

10

RECEIVED
F. S. SEC. 1

CONFIDENTIAL

CONFIDENTIAL

answer your inquiry by saying that as a matter of law the retirement of General Short under the above statute upon his own application in the discretion of the President does not involve the passing of judgment by the President upon the officer's past services or a condonation by him of prior offenses which would prevent subsequent trial by court-martial.

4. Nevertheless, as a matter of fairness rather than law, there is force in the supposed contention above stated. General Short has volunteered to submit an application for retirement. He may reasonably suppose that a request to him from an official source, in answer to his voluntary suggestion, to submit his application for retirement, involves a tacit agreement that the issue of his official conduct of the defense of Hawaii prior to and on December 7 will be closed by his retirement, and that no charges will be preferred against him growing out of such conduct.

5. Another statute under which General Short might be retired immediately upon his own application, is the second proviso of section 3 of the act of June 13, 1940 (54 Stat. 380), reading:

"Provided further, That any officer on the active list of the Regular Army of Philippine Scouts who served in any capacity as a member of the military or naval forces of the United States prior to November 12, 1918, shall upon his own application be retired with annual pay equal to 75 per centum of his active-duty annual pay at the time of his retirement unless entitled to retired pay of a higher grade as hereinafter provided, except that officers with less than twenty years' service and officers who are under investigation or who are awaiting trial by courts martial or the result of such trial, or whose cases are pending before courts of inquiry shall be retired only when the application for retirement in each case has been approved by the Secretary of War: * * *

It is manifest that War Department approval of an application of General Short for retirement under the above statute, would amount in effect to a finding that he is not under investigation or awaiting trial by court-martial, and would thus tend even more strongly to support a contention that any offenses chargeable against him were condoned by the actign.

6. If General Short should be retired on his own application under the above circumstances and if afterward he should be brought

CONFIDENTIAL

CONFIDENTIAL

to trial for his conduct of the defense of Hawaii, it may be anticipated that charges of bad faith would be made against the War Department by him or by others in his behalf. I think it most desirable that no opportunity be afforded for such accusations. I assume that General Short's offer of retirement as made was not subject to any conditions. Therefore, I suggest that before his offer be accepted he be given to understand, preferably in writing for the purpose of the record, that such retirement will not constitute a condonation of his offense, if any, on the part of the War Department, or be considered a bar to any future trial by general court-martial in case such trial should be deemed advisable.

7. Should General Short refuse to submit his application for voluntary retirement with such a condition attached, the President may, without any application by General Short, retire him upon his reaching the age of 62 years on March 30, 1942, pursuant to the provisions of Revised Statutes, section 1244 (10 U.S.C. 944; Mil. Laws, sec. 323), and may make announcement to that effect at the present time.

Myron C. Cramer.

Myron C. Cramer,
Major General,
The Judge Advocate General.

CHARGE—VIOLATION OF 96TH ARTICLE OF WAR

- Specification 1: Failure to provide an adequate inshore aerial patrol.
Specification 2: Failure to provide adequate anti-aircraft defenses.
Specification 3: Failure to set up an Interceptor Command.
Specification 4: Failure to provide a proper aircraft warning service.
Specification 5: Failure to provide for the transmission of appropriate warnings to interested agencies.
Specification 6: Failure to establish a proper system of defense by cooperation and coordination with the Navy.
Specification 7: Failure to issue adequate orders to his subordinates as to their duties in case of sudden attack.
Specification 8: Failure to take adequate measures to protect the Fleet and Naval Base at Pearl Harbor.
Specification 9: Failure to have his airplanes dispersed in anticipation of a hostile attack, after having been warned of the danger thereof.
Specification 10: Failure to have his airplanes in a state of readiness for an attack.
Specification 11: Failure to provide for the protection of military personnel, their families, etc., and of civilian employees on various reservations.

[1]

WAR DEPARTMENT,
SERVICES OF SUPPLY,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
Washington, April 20, 1942.

Memorandum for The Judge Advocate General.

Subject: Preparation of charges against Major General Walter C. Short, United States Army, Retired.

1. Pursuant to the oral direction of The Adjutant General to report to you for duty in connection with the preparation of charges against the above-named officer, in addition to my regular duties in his office, and having so reported and been directed to prepare tentative charges as aforesaid, the following comments are submitted with the tentative charges prepared.

2. *Possible Lines of Procedure.* An examination of the record of the board which investigated the attack by the Japanese on the Island of Oahu, on December 7, 1941, (hereinafter referred to as the Roberts Board), led to the conclusion that, at the present time, there were only three courses open:

(a) To prepare charges and specifications against General Short, not based entirely on the evidence adduced before the Roberts Board, but on that evidence and on evidence which it was believed may be further adduced, either (1) by recalling witnesses already examined for further questioning, or (2) by calling new witnesses from whom pertinent testimony may be expected.

(b) To prepare charges and specifications at this present time but based only on such evidence as was adduced before the Roberts Board which appears legally sufficient to support such charges and specifications.

(c) To refrain from drawing charges and specifications at this time, and to await a period when additional evidence may be adduced before a second board, and then to draw such charges and specifications as the accumulated evidence appears to warrant.

We have followed the first course, (a), because it not only appears to be in conformity with the direction that charges be now prepared, but because it is certain that the formal investigation of the charges which must precede arraignment will bring out additional evidence. For example, we believe that knowledge of the Navy Department radio of November 27, 1941, ("This is a war warning"), can be brought home to General Short, but from the Roberts record there would be difficulty in establishing that as a fact. General Short states categorically, "I didn't see it". Record, page 143. Only almost immediately to admit that he "did not know whether I saw it or not. I am not sure". Record, page 144. The Roberts record does not establish the fact, one way or another, for Admiral Kimmel's subordinates admit they did not carry out the Admiral's explicit direction that the radiogram was "for personal delivery to General Short", but, so far as they are concerned, it only reached G-3. (Record, page 662). Whether G-3 ever got the message to General Short was not brought out.

[2]

Again, Admiral Kimmel testified that the Navy Department informed him on December 3, 1941, that based upon information from reliable sources that Japanese diplomatic and consular officers in Washington, London, Hong Kong, Singapore and Batavia were directed to destroy most of their codes and ciphers and to burn secret documents. (Record, page 583). But, while General Short testifies to conferences with Admiral Kimmel from November 27, 1941, to December 6, 1941, and, in fact, to a conference on that very date, December 3, 1941, there is nothing in the record to indicate whether or not this information was given him by Admiral Kimmel.

Further, we have noted newspaper statements by possible witnesses who did not appear before the Roberts Board on points covered by our charges. Thus, Mrs. Mary Kogan, wife of First Lieutenant Milton M. Kogan, D. C., a reserve officer, is quoted in the press as stating that they had never received any instructions at Schofield Barracks as to what to do in case of an air raid, and further that a Hawaiian newspaper had predicted an attack by the Japanese "that week end". (See clipping in Brief and Resume submitted herewith.) Also, Mr. Raymond Coll, a Hawaiian newspaper editor is quoted by a Washington newspaper, shortly after the submission of the report of the Roberts Board, as stating, in substance, that General Short and Admiral Kimmel had made clear by their utterances before December 7, 1941, the possibility and imminence of a Japanese attack at an early date. (We have not been able to examine the Hawaiian newspapers at the Library of Congress because we were informed that they are now at the bindery, but this is another "lead" which should be followed in preparing the case.) Staff Sergeant Joseph Lockard, the enlisted man who was operating the Opana radar on the northern tip of the Island of Oahu, and who gave warning of the approach of the Japanese airplanes on this morning of December 7, 1941, was not questioned.

It is not necessary to multiply other instances. The Roberts Board, of necessity, could not go into many matters which would properly concern a court-martial.

3. Theory upon which Charge and Specifications were framed. The theory on which we have prepared the charge and specifications is that of nonfeasance. We have endeavored in each specification to show a duty and then to allege a neglect or failure to perform that duty. The line which General Short's defense will take is obvious from his statements before and to the Roberts Board. He will contend that there was no neglect of duty, but simply errors of judgment; that he had reported the measures he had taken to the War Department, and if he was in error in not going beyond "Alert No. 1" (protection against sabotage only), the War Department was equally in error in not inviting his attention to the supposed neglect; that from the nature of his instructions many of the neglects or failures with which we may charge him concerned defensive measures which he could not take without "causing unnecessary publicity and alarm", contrary to the instructions in the Chief of Staff's radiogram of November 27, 1941; [3] that it was the duty of the War Department to warn him more specifically if it had thought hostilities imminent, and that it did not do so until the radiogram of December 7, 1941, which he did not receive until after the attack. The obvious answer to this line of defense is that he had been warned, not once but repeatedly, both by the War Department and Navy Department messages, of the imminent dangers, well before December 7, 1941; that he had been placed in a position that every school-boy knows was one of exposure to sudden attack; that his own battle plans referred to it as "frontier"; that what the War Department may or may not have thought of the possibility of a sudden attack could not relieve him of his responsibility; that his failure to take effective and vigorous measures of defense against outside attack can not be condoned as mere errors of judgment. In short, the case will come down to this—Has the Government shown clearly and unequivocally neglect of duty or has it merely pointed out errors of judgment, excusable under the circumstances. We think that we can show such neglect, and that General Short will not be able to escape its consequences by any "Tu quoque" argument.

4. The Proposed Charge and Specifications. It will be noted that there is only one Charge, viz., violation of the 95th. Article of War. There are several reasons why it is not recommended that any other article be invoked. In the first place, no precedent has been found for employing the 95th. Article of War in a case of this nature—in fact, the case appears to be unique—and if it be conceded that the 95th. Article of War could be used, there would immediately be an outcry

that the War Department was practically informing the court-martial that it desired the officer dismissed the service. Then, to use the 96th Article of War avoids anything in the nature of a personal attack on General Short. A court-martial, whose members of necessity must, in most instances, know him personally, would hesitate to find him guilty of conduct unbecoming an officer and a gentleman unless it was very firmly convinced that he had deliberately falsified.

However, while General Short did not, in my opinion, deliberately falsify in his testimony before the Roberts Board, he certainly made statements without a sufficient background on which to base them, and actually the statements were contrary to the facts. A statement made "with disregard of a knowledge of the facts" may be a false official statement equally with one made with full knowledge of its falsity. (See, for example, specifications 119 and 141, Appendix 4, Manual for Courts-Martial, 1928.) Examples of such statements are, in substance, as follows:

(a) That the Interceptor Command was fully working from November 27, 1941, to December 6, 1941. (Record, page 51.) But General Davidson, who was supposed to be in charge of it, states that the Interceptor Command was not set up or functioning on or before December 7, 1941, and, in fact, that it was not activated until December 17, 1941. (Record, pages 170, 179, 198. See also Lt. Col. Powell, S. C., Department Signal Officer, Record, page 353.)

[4] (b) There were Navy liaison officers at the Interceptor Command Station—General Short thinks that three naval officers may have been detailed there to relay information to the Navy, but none were there on the morning of December 7, 1941. (Record, pages 68-70.) But no Navy liaison officers had as yet been detailed for this duty or had made their appearance at the Station. (Lt. Comdr. Taylor, Record, page 1230; Major Bergquist, Record, page 381; Admiral Kimmel, Record, page 632.)

(c) "The inshore reconnaissance was a daily thing. We had planes all around the Island constantly." (Record, page 107.) But General Davidson states, in answer to a question whether there were less planes in the air early Sunday morning, December 7, 1941, than usual, "Well, we don't generally have any planes in the air on Sundays." (Record, page 181.) And General Martin, Commanding the Hawaiian Air Force, states that up to December 7, 1941, there were no inshore aerial patrols for a possible enemy. (Record, page 1648.)

(d) First Lieutenant Tyler, Air Corps, was the control officer for the Interceptor Command (on December 7, 1941). (Record, page 66.) But Lieutenant Tyler was simply an observer who had only seen the "board" once before and had never operated it. He had no instructions whatever beyond observing for training purposes, and was at the Station after all the others but one had departed at 7:00 o'clock a. m. on December 7, 1941, only because he had been told to stay there until 8:00 o'clock a. m. (Record, page 368.) Major Bergquist had taken upon himself to have officers like Lieutenant Tyler assigned so that he could train them in the system. There was no assignment of this officer, Lieutenant Tyler, by order from General Short's headquarters or the headquarters of General Martin, commanding the Air Forces. (Record, page 379.)

If higher authority should reside specifications based on statements of General Short, such as are above mentioned, it would be easy to prepare them. But it is submitted that all such inconsistencies can best be developed by testimony relating to alleged acts of negligence, rather than by specifications charging false official statements. Thus, the proposed specification (number 3) as to the lack of an Interceptor Command, in effect contradicts flatly the allegation made by General Short that there was such a command functioning on December 7, 1941. The court-martial can determine whether he made the statement truthfully, deliberately, falsely, or with disregard of its truth or falsity. It should be kept in mind that a sentence of dismissal can be adjudged under A. W. 96 as well as under A. W. 95.

The specifications, all laid under the 96th Article of War and alleging a neglect or omission which was continuous down to and including December 7, 1941, are eleven in number, and, in substance, cover the following alleged offenses:

- [5] (1) Failure to provide an adequate inshore aerial patrol.
- (2) Failure to provide adequate anti-aircraft defenses.
- (3) Failure to set up an Interceptor Command.
- (4) Failure to provide a proper aircraft warning service.
- (5) Failure to provide for the transmission of appropriate warnings to all interested agencies.

3214 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(6) Failure to establish a proper system of defense by cooperation and coordination with the Navy.

(7) Failure to issue adequate orders to his subordinates as to their respective duties in case of sudden attack.

(8) Failure to take adequate measures to protect the Fleet and Naval Base at Pearl Harbor.

(9) Failure to have his airplanes dispersed in anticipation of a hostile attack, after having been warned of the danger thereof.

(10) Failure to have his airplanes in a state of readiness for an attack.

(11) Failure to provide for protection of military personnel, their families, et cetera, on various reservations.

Some, if not, all, of these specifications may be expanded into several specifications. Thus, the failure to provide adequate anti-aircraft defense (specification 2) may be subdivided as follows, to-wit:

(a) Failure to have the available anti-aircraft guns in readiness.

(b) Failure to have the available ground machine guns in readiness.

(c) Failure to have adequate ammunition at hand for the anti-aircraft and the ground machine guns.

But it is believed that it will be much wiser to limit the specifications to a comparatively small number of distinct heads. When one begins to divide and subdivide he almost invariably ends by pleading evidence and unnecessarily hampering the prosecution by too great particularity. All three of the subdivisions set forth above are comprehended in failure to provide adequate anti-aircraft defense. If, of a large number of specifications, the accused is found guilty but of a few, there is always an attempt to show persecution. Thus, in the well known case of Oberlin M. Carter, the accused was tried on 37 specifications and found guilty of but four, and his defenders have constantly referred to that fact (overlooking that these four specifications were the most serious of the entire thirty-seven). Specifications of large and general import focus attention on the larger issues, and, in a case of this nature, that is highly desirable. General Short is not to be tried for some obscure military offense, but for neglect of duty in matters of the greatest moment to the whole country.

[6] Nor can General Short plead ignorance of the nature of the accusations against him on the ground that the specifications lack particularity, because in these specifications we have used language taken from battle plans and agreements to which either he was a subscribing party or of which he cannot deny knowledge without admitting gross ignorance. Certainly General Short cannot ask us to be more specific in our charges than he was in the written plans and agreements to which he was a party. If he knew what the plans and agreements meant, he cannot be deceived or misled by the same language in the charges.

It will be noted also that these specifications cover the specific matters in which General Short was found negligent by the Roberts Board. (See Report of Board under "Conclusions", pages 9, 10, 12, 13, 16 and 17.)

5. *Statute of Limitations.* From the nature of the offenses charged, it seems clear that it is proper to treat them as continuing down to and including the date of the attack, December 7, 1941. The failure to take adequate measures is not a single failure on a specific date but a failure on every day it continues. Hence, the statute of limitations, set forth in the 39th Article of War, for the offenses charged is two years and arraignment before a duly constituted court-martial must be had on or before December 6, 1943, if these charges are to be brought to trial. In order to give the investigating officer and the trial judge advocate ample time to perform their respective duties, it would seem that formal charges would have to be served not much later than January 1, 1943, for months would be required to secure depositions of absent witnesses and documentary evidence, not to speak of the difficulty of assembling a court of general officers. It is not unlikely, also, that the investigating officer or the trial judge advocate, or both, might find it necessary to visit the situs of the alleged derelictions.

6. *Liaison with the Navy Department.* As divers allegations of negligence are based on failure to cooperate with the Navy or to act on information received through the Navy, it will no doubt be necessary to call on the Secretary of the Navy for permission to examine the Navy officers who testified before the Roberts Board. The statute of limitations for any naval court-martial also appears to be two years. (See Section 1624, Revised Statutes, Art. 61.)

7. *Verification of Charges.* If desired, the charges can be verified, as on information and belief, by Major Steuart or myself, since from our examination of the Roberts record we believe that there is legal justification for trial.

[7] 8. *Assistance rendered by Major Dell King Steuart, J. A. G. D.* In the review of the voluminous record made by the Roberts Board, the examination of divers maps and other documents submitted, and in the analysis of and searching out of the evidence on which to base these charges and the initial ground-work in the preparation of the charges, I cannot speak too highly of the work done by my assistant, Major Dell King Steuart, J. A. G. D. Major Steuart was unknown to me when, with your approval, I selected him for this task, and, in my opinion, he has done a thorough piece of work in a highly efficient manner which has not only materially lightened my own review of the record, but which will be of the greatest assistance to anyone who is assigned to try this case. I desire to take this opportunity to express my appreciation of his loyal cooperation.

F. Granville Munson

Data as to witnesses, etc.:
 (Give names, addresses, and note if for accused. List documentary evidence and note where each item thereof may be found)

As the question of the witnesses who may be called depends on the direction of higher authority as to the manner in which the case shall be tried (viz., on the testimony of only those witnesses who appeared before the Roberts Board, on the testimony of those witnesses plus that of additional witnesses, etc.) these data are left for future action. A list of the witnesses before the Roberts Board may be found in "Brief and Resume of Record of Roberts Commission" or "Notes Taken from Transcript of Roberts Commission to Investigate Attack on Pearl Harbor".

Data as to restraint of accused:
 (Give date, place, and initial date of any restraint of accused)

CHARGE: Violation of the 96th Article of War.

Specification 1: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for, and the execution of, defensive air operations over and in the immediate vicinity of the Island of Oahu, in his command, and of the establishment of an inshore aerial patrol of the waters of Oahu defensive coastal area, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility, by failing to establish and provide for an adequate inshore aerial patrol of said area commensurate with the critical relations between the United States and Japan which he then knew to exist, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 2: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for, and the execution of, defensive air operations over and in the immediate vicinity of the Island of Oahu, in his command, and of providing for the beach and land, sea-coast, and anti-aircraft defense of said Island of Oahu, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to provide adequate anti-aircraft defenses for such area commensurate with the critical relations between the United States and Japan which he then knew to exist, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 3: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for, and the execution of, defensive air operations over and in the immediate vicinity of the Island of Oahu, in his command, and of providing for an interceptor command to coordinate and control the operations of pursuit aircraft, anti-aircraft artillery (including Naval and Marine Corps anti-aircraft artillery), the aircraft warning service, and attached units, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to establish and provide for such interceptor command, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 4: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for, and the execution of, defensive air operations over and in the immediate vicinity of the Island of Oahu, in his command, and of providing an aircraft warning service for the Hawaiian Islands, in his command, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to establish and provide for an adequate aircraft warning service commensurate with the critical relations between the United States and Japan which he then knew to exist, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 5: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for, and the execution of, defensive air operations over and in the immediate vicinity of the Island of Oahu, in his command, and of establishing an aircraft warning service for the Hawaiian Islands, with provision for the transmission of appropriate warnings to all interested agencies, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to provide for the transmission of appropriate warnings to all interested agencies of the approach or movement of possible hostile aircraft received through any aircraft warning service for said Hawaiian Islands, or otherwise, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 6: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of

acting jointly and in coordination with the United States Naval Forces in holding the Island of Oahu, in his command, as a main outlying naval base, and of coordinating joint defensive measures of the military and naval forces for the security of the United States Fleet in and near Pearl Harbor, and the Pearl Harbor Naval Base, Island of Oahu, from hostile raids and air attacks delivered prior to a declaration of war and before a general mobilization for war, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing adequately to collaborate and cooperate with the said United States Naval Forces in their aforesaid joint defensive measures in a manner commensurate with the critical relations between the United States which he then knew to exist, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 7: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of holding the Island of Oahu, in his command, against attacks by land, sea and air forces, and in providing for the beach and land, sea coast, and anti-aircraft defense of said Island of Oahu, with particular attention to Pearl Harbor Naval Base on said Island of Oahu and the naval forces there present, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to issue to his subordinates adequate orders and instructions commensurate with the critical relations between the United States and Japan which he then knew to exist, as to their various duties in the event of sudden hostile attack against said Island of Oahu, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 8: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of coordinating the joint defensive measures of the military and naval forces for the security of the United States Fleet in Pearl Harbor and for the Pearl Harbor Naval Base, Island of Oahu, in his command, and for the defense against hostile raids or air attacks delivered prior to a declaration of war, and of providing for the beach and land, sea coast, and anti-aircraft defense of said Island of Oahu, with particular attention to Pearl Harbor Naval Base and the naval forces there present, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to take and provide for adequate and proper defense measures, commensurate with the critical relations between the United States and Japan which he then knew to exist, for the security of the said Pearl Harbor Naval Base and the naval forces there present, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 9: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of holding the Island of Oahu, in his command, against attacks by land, sea and air forces, and of providing for the beach and land, sea coast, and anti-aircraft defense of said Island of Oahu, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to make proper ground disposition, commensurate with the critical relations which he then knew to exist between the United States and Japan, of aircraft under his command, in that the said aircraft were not properly dispersed in anticipation of hostile air attacks which might be delivered prior to a declaration of war, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 10: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of holding the Island of Oahu, in his command, against attacks by land, sea and air forces, and of providing for, and the execution of, all defensive air operations over and in the immediate vicinity of said Island of Oahu, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to have the aircraft under his command in a

proper state of readiness, commensurate with the critical relations between the United States and Japan which he then knew to exist, for the defense of the Island of Oahu, as aforesaid, same being neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

Specification 11: In that Major General Walter C. Short, United States Army, Retired, then Lieutenant General, United States Army, commanding Hawaiian Department, being then and there charged with the duty and responsibility of providing for the defense of the Island of Oahu, in his command, against attacks by land, sea and air forces, did, on the 7th day of December, 1941, and at all times prior thereto, utterly neglect and fail in his said duty and responsibility by failing to provide adequate measures and means, commensurate with the critical relations between the United States and Japan which he then knew to exist, for the protection of military personnel and their families, and of civilian employees of the Army, at and in the immediate vicinity of the various military reservations on said Island of Oahu from air raid attacks, same being a neglect to the prejudice of military discipline, and conduct of a nature to bring discredit upon the military service.

AFFIDAVIT

Before me, the undersigned, authorized by law to administer oaths in cases of this character, personally appeared the above-named accuser this day of, 19....., and made oath that he is a person subject to military law and that he personally signed the foregoing charges and specifications, and further that he * has personal knowledge of the matters set forth in specifications

.....; and * has investigated the matters set forth in specifications and that the same are true in fact, to the best of his knowledge and belief

(Signature)

(Grade and organization)

(Official character, as summary court, notary public, etc.)

Notes.—At (*) strike out words not applicable.

If the accuser has personal knowledge of the facts stated in one or more specifications or parts thereof, and his knowledge as to other specifications or parts thereof is derived from investigation of the facts, the form of the oath will be varied accordingly. In no case will he be permitted to state alternatively, as to any particular charge or specification, that he either has personal knowledge or has investigated.

If the oath is administered by a civil officer having a seal, his official seal should be affixed.

4. Witnesses examined by the Roberts Board and their functions.
5. Basic Documents and pertinent data.
- 5a. Newspaper Clippings.
6. Documentary Evidence.
21. Specification 1: Failure to provide an adequate inshore aerial patrol.
23. Specification 2: Failure to provide adequate anti-aircraft defenses.
27. Specification 3: Failure to set up an Interceptor Command.
29. Specification 4: Failure to provide a proper aircraft warning service.
31. Specification 5: Failure to provide for the transmission of appropriate warnings to interested agencies.
32. Specification 6: Failure to establish a proper system of defense by cooperation and coordination with the Navy.
36. Specification 7: Failure to issue adequate orders to his subordinates as to their duties in case of sudden attack.
39. Specification 8: Failure to take adequate measures to protect the Fleet and Naval Base at Pearl Harbor.
43. Specification 9: Failure to have his airplanes dispersed in anticipation of a hostile attack, after having been warned of the danger thereof.
44. Specification 10: Failure to have his airplanes in a state of readiness for an attack.
46. Specification 11: Failure to provide for the protection of military personnel, their families, etc., on various reservations.

[2] In re Major General Walter C. Short, United States Army, Retired

NOTE: The specifications on the charge sheet number 1 to 11, inclusive. The evidence relied upon to sustain each specification will be found in this Brief and Resume under the headings of Documentary Evidence and "Possible Specifications", each bearing a number that corresponds to that of the specification as drawn. In addition to the evidence shown under each particular specification, evidence set out under other specifications may also be relevant. Hence, it is advisable to first read all the Documentary Evidence, then the evidence contained in said Brief and Resume under all the specifications with this fact in mind.

DELL KING STEUART,

Major, J. A. G. D.

[3]

EXPLANATORY NOTE

This concise resume of pertinent evidence with suggestions of possible specifications that might be based thereon, is a concentration and evaluation of over 4,900 typewritten pages of testimony and exhibits.

From this vast fund of material it was found that certain evidence therein tended in a degree to establish certain specifications herein enumerated under the heading of "Possible Specifications", and each item of such evidence has herein been listed, together with page in the record where it may be found, under the appropriate "Possible Specification".

It will be found that certain evidence is lacking, in whole or in part necessary to sustain some specifications, but it is thought that from all of the other pertinent evidence that such deficiency might readily be supplied by a further search and the securing of such additional evidence as may be necessary to sustain the specification to which it pertains. In some instances, it will be found that from the evidence in the record it appears that any deficiencies might be supplied by an examination in greater detail of the same or other witness.

The "Possible Specifications" are but tentative suggestions, and may be divided, sub-divided or combined in various ways when put in final form.

It has been the purpose of this resume to set forth each scintilla of evidence that either proves or tends to prove a certain possible specification, as set out in the record that has been examined, and, as stated above, in any instance where the evidence is either lacking, insufficient or unsatisfactory to sustain such specification, it will have to be supplied by further investigation or other appropriate measures.

There are sixteen volumes of the Roberts Record and thirty-six exhibits. The method used herein for reference thereto is that R6-780 means volume number 6, page 780. Ex. 15, means exhibit number 15.

3224 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

BASIC DOCUMENTS AND PERTINENT DATA

Date	Description	Known to Genl.	Remarks
1935	Joint Army & Navy Def. Plan.-Rainbow 5	Yes.	This was the basic plan.
Jan. 24, '41	Letter Secy. of Navy to Secy. of War	Yes.	Sets forth in detail expected attack on Fleet in P.H.
Feb. 1, 1941	Adm. Kimmel takes com.		
Feb. 7, 1941	Secy of War answers Secy of Navy letter	Yes.	Secy War states both sent to Gen. S. and in his statement admits letter 2/7/41 received from W.D., 2/19/41.
Feb. 7, 1941	Gen. Short takes com.		
Feb. 15, '41	Pac. Ft. Con. Letter 2CL-41 (Security Measures)	Yes.	This corresponds to Army SOP, and based on this CG and Adm. Bloch drew "Joint Air Operations Agreement".
Mar. 21, '41	Joint Air Operations Agreement.	Yes.	When part of Army or Navy Air Forces will come under command of other.
Mar. 31, '41	Addendum I to 2CL-41 and Annex	Signed by CG, Hawn Air Force & Adm. Bellinger.	This is a joint estimate of the air action each would take in case attacked. (Summarizes situation in detail).
Apr. 11, '41	Joint Coastal Hawaiian Frontier Defense Plan	Yes.	Signed Gen. Short & Adm. Bloch. (See pgs. 1 & 2 in Brief and Resume for details.)
Apr. 11, '41	Addendum II to 2CL-41	?	This is naval instruction as to degrees of readiness of plans based on Addend. I.
June, 1941	See letter Secy. War to Navy dated Feb. 7, 1941		Radar equipment supposed to be delivered to CG in Oahu.
June 19, '41	Letter Gen. Short to Adm. Kimmel	Yes.	Stating AWS "will be in operation in the near future".
Aug. 5, 1941	Letter Gen. Short to Adm. Kimmel	Yes.	Stating AWS is "rapidly nearing completion."
Aug. 20, '41	Ex. 35-Plan Gen. Martin for Aviation Defense	Yes.	Sent thru Gen. Short to WD. Covers in detail exactly what happened in attack.
None given in effect	Joint Action of Army and Navy. R5-553.	It appears so	Plan of Joint Board stating specific functions of Army in re AWS and transmission of info to Navy. Page 8 of Brief.
Oct. 15, 1941	2CL-41 (Revised)	?	No particular import this matter.
Oct. 16, 1941	CNO despatch to Cincpf	Yes. R2-40	"Japan may attack US and Britain."
Nov. 5, 1941	Standing Operating Procedure, Hawn Dept.	Yes.	Ex. 32. Duties AWS and Interceptor Command.
Nov. 24, 1941	CNO to Cincpf. Directed to inform Army	Thinks may have. R2-39.	"Suprise aggressive move of Japs in any direction a possibility."
Nov. 27, 1941	CNO to Cinc directed to inform Army	Adm. Kimmel says yes. ?	"This is a war warning."
Nov. 27, 1941	C of S to CG, Hawn Dept.	Yes.	"Hostile action possible at any moment. Negotiations terminated."
Nov. 27, '41	G-2 to G-2, Hawn Dept.	Yes.	"Possible that hostilities may begin."
None given	Hawn Dept., Field Order No. 1.	Yes.	Lawton says this created Interceptor Command.
Nov. 28, '41	G-2 to C. Areas & Overseas Depts.	Must have. ?	"Critical situation demands" watch for subversive activities.
Nov. 28, '41	CG to WD	Yes.	"Alerted to prevent sabotage. Liaison with Navy."
Dec. 1, 2, 3, 1941	Gen. Short says in conference with Navy.		Doesn't remember anything they discussed.
Dec. 3, '41	CNO to Cincpf	?	This is message Japs to destroy ciphers, codes, burn papers.
Dec. 6, '41	Japs burning papers	Yes ?	Reported to C of S Powell night before. He reported at Staff meeting this date.
Dec. 7, '41	WD warning to CG	Not at time.	This was message that came too late.
Note: All plans and messages are set out fully in Ex. 36 by Gen. Gerow.			

my 2nd, April 12, 1942.
 THE ATTACK ON EARL HARBOR AS SEEN BY THE JAPANESE

This photograph, showing the enemy blasting our ships on the morning of Dec. 7, was taken by a Japanese aerial cameraman, sent from Kure to Moscow, whence it was radioed to New York. The four vessels on the near side of Ford Island (center) are described (left to right) as two United States cruisers, one of which is affre; the U. S. S. Utah, lying on her side, and an auxiliary craft that also has been hit. Beyond the island a column of water rises near a line of United States warships while a bomber flies away (to right of column). According to the Japanese caption, American planes were lined in rows on foreground of island. Associated Press Radio photo, passed yesterday by United States and Russian censors.

berland-av, Somerset, Md.

May Urges Death for Kimmel & Short

A
A
W

By United Press

PIKEVILLE, Ky., April 7.—Rep. May (D., Ky.) chairman of the House Military Affairs Committee, recommends a "shooting match" court martial of Lieut. Gen. Walter C. Short and Admiral Husband E. Kimmel, commanders of Army and Navy installations at Pearl Harbor during the Japanese assault.

May made the recommendation at an Army Day celebration in this little county seat in the Cumberland Mountains.

Tom Holland, editor of The Pikeville County News, defined "shooting match" as "Kentucky language for a lawful execution."

May placed complete blame for the success of the Japanese attack on the two commanders. He said they were given sufficient warning of attack.

"It was probably the morning after Saturday night," May said. "You know Honolulu is noted for its night clubs."

Mrs. Kimmel, 40, of 1000 14th street N.W., which she left immediately after her marriage last April.

All across the continent she found the same listlessness. In the Middle West particular, she noticed there were no signs that a war was in progress.

She left Hawaii February 28, flew by clipper to San Francisco and completed the trip by train. In California she saw the first lights at night she had seen in three months, and here at home she experienced one of the greatest letdowns of her life.

"The city is just like it was when I left it, although America is facing the greatest war in her history," she said yesterday. "No one here is at all perturbed, while life in Hawaii is like living in a fortress. I feel like saying, 'Wake up, people, and do something.' Unfortunately, it may take a bombing to make them do this, but there will be no laxity after that. I can never forget the feeling you have during an air raid—you want only one thing, and that is your life."

Saw Rising Sun Insignia.

Mrs. Kogan and her husband were awakened at their home at Schofield Barracks at 7:30 a.m. December 7 by loud noises in the sky. They threw on wraps and walked out into the yard, thinking it was something different in the way of maneuvers. They commented to each other that if war was like this it must be terrible. Smoke was rising in all directions. The gigantic explosion of bombs, the heavy roar of coast artillery fire and the rattle of machine guns seemed to be shaking the entire island.

Out of the dogfight overhead a plane peeled off and came toward them, flying low. They watched it until they saw the rising sun insignia on its side, saw its machine guns spouting, saw bullets kicking up soil at their feet. It was then they knew the thing was real and that the warning of a Hawaiian

Pearl Harbor Pilot Wins Navy Cross

JACKSONVILLE, Fla., April 4 (U.P.).—A 31-year-old naval flyer who took his unarmored Sikorsky amphibian aloft as Japanese war planes were attacking Pearl Harbor on December 7 in order to obtain "information of the enemy," today received the Navy Cross for bravery.

The flyer, Lieut. Gordon E. Bolser, of Los Angeles, was carrying only two Springfield rifles in his plane when two Japanese planes attacked him at an altitude of about 1,500 feet. Unable to fight back, he broke away from the Jap fighters by slipping into a cloud bank and gaining altitude.

Bolser who was transferred to the Jacksonville Naval Air Station last week as an instructor in observation and scout training, was reticent to discuss his exploit but lauded the conduct of his comrades at Pearl Harbor under fire.

"Talk about suicide squadrons," he said, "we really had them. Men from disabled ships were eager to get at the enemy and begged for a chance to go up, even in unarmored training planes.

Ten of them crowded around when I started my takeoff. Our crew included two strangers—one from a battleship and one from a patrol squadron. We had no arms until two sentries handed over their Springfield.

A native of Boston, Bolser is the son of Mrs. Charles C. Allen of Los Angeles.

He was decorated today by Capt. Charles P. Mason, commandant of the Naval Air Station, on behalf strong in her memory that of President Roosevelt.

MRS. MILTON KOGAN
—Star Staff

newspapers a week earlier Japan could be expected that week end had come to Mrs. Kogan remembers her husband's reaction to the escape.

Nightmare for 24 hours. "I think I'll go shave," said him.

And then she asserted he it as a bride. "I think y she said. "This is war," the Naval Air Station, on behalf strong in her memory that of President Roosevelt.

Things were a nightmare for the next 24 hours. She helped make surgical dressings all morning and then she was huddled in a quadrangle to await evacuation. It was well after dark when she and other women were taken away by bus. They passed by the burning ruins of Pearl Harbor, through a blackness broken frequently by tracer bullets. Along the roadside, they could hear the excited talk of many people, all going toward Honolulu.

Eventually the bus drew up at a school building in Kalihi Valley. There the evacuees lay down on the floor on a thin layer of blankets and tried to sleep.

"Before December 7," she recalled, "we hadn't even been told what to do in case of an air raid."

"Hawaii has had her bombing experience and Hawaii is prepared," she said. "But I'm afraid for Washington."

[6]

DOCUMENTARY EVIDENCE

PLANS

1. Joint Army and Navy Defense Plan of 1935. See Ex. 36 and R1-5.

Based on above War Plans Division prepared Army Strategical Plan which consists of Operations Plan—Rainbow 5, and Concentration Plan—Rainbow 5. Mission assigned Hawaiian Coastal Frontier under Army Strategical Plan are:

a. *Joint*.—Hold Oahu as main outlying naval base and control and protect shipping in coastal zone.

b. *Army*.—Hold Oahu against attacks by land, sea and air forces and against hostile sympathizers. Support naval forces in protection of the sea communications of the Associated Powers, * * *.

c. *Navy*.—Patrol the coastal zone; control and protect shipping therein; support the Army.

Based on above plan General Short and Admiral Bloch appeared and signed on April 11, 1941 the—

2. Joint Hawaiian Coastal Frontier Defense Plan, Ex. #36, states in part—

"I. *General*:

1. In order to coordinate joint defensive measures for the security of the fleet and for Pearl Harbor Naval Base for defense against hostile raids or air attacks delivered prior to a declaration of war and before a general mobilization for war, the following agreements, * * *, are adopted.

"II. *Joint Air Operations*:

2. * * *.

a. Joint air attacks upon hostile surface vessels * * *.

b. Defensive air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. * * *."

In addition to foregoing, Major Lawton states (R1-5) that [7] this plan says—

"The Commanding General, Hawaiian Department, shall provide for the beach and land, sea-coast, and anti-aircraft defense of Oahu, with particular attention to Pearl Harbor Naval Base and naval forces present, etc., etc."

*"The Army to provide for anti-aircraft and gas defense, intelligence and warning services, protection of landing fields and naval installations and outlying islands consistent with available forces, defense of installations on Oahu vital to the Army and Navy and to the civilian community for light, water, power, and for interior guard and sabotage * * * within Hawaiian Island * * *, establishment of an inshore aerial patrol of the waters of Oahu defensive coastal area in cooperation with the naval inshore patrol, * * *, and an aircraft warning service for the Hawaiian Islands, * * *."*

Under this Plan the Navy was to be responsible for "distant reconnaissance".

Based upon above there was issued Field Order #1 which was a secret operations order for Hawaiian Department (R1-17). Major Lawton states that this document creates the interceptor command and the aircraft warning service.

Then to further amplify Field Order #1 which was secret, the Standing Operating Procedure (SOP) of 5 November 1941 was issued (Ex. 32).

Section II, paragraph 15j provides:

"The Interceptor Command will:

Coordinate and control the operations of pursuit aircraft, anti-aircraft artillery (including available Naval and Marine Corps AA artillery), the aircraft warning service, and attached units, and will provide for the coordination of anti-aircraft measures of units not under military control, to include:

- (1) Arrival and departure of all friendly aircraft.
- [8] (2) The coordination of the anti-aircraft fire of Naval ships in Pearl and/or Honolulu Harbors.
- (3) *Transmission of appropriate warnings to all interested agencies."*

R1-34 states where these three documents were examined and briefly their contents.

Based upon the Joint Army and Navy Plan-Rainbow 5, Admiral Kimmel on February 15, 1941, issued his security measures in a letter known as "Letter 2CL-41", which was later revised on October 15, 1941, and known as Pacific Fleet Confidential Letter No. 2CL-41 (Revised). R5-following page 549. Paragraph (G) of this letter provided that Commandant 14th. ND would be the Naval Base Defense Officer, known as N. B. D. O., and as such should cooperate with the Army for "defense against air attack".

In furtherance of this proposed cooperation Admiral Bloch and General Short on March 20, 1941, drew up an agreement which was signed and approved by them March 21, 1941 (R5-554-556). This was known as their Joint Air Operations Agreement. This provided in brief that Defensive air operations over and in the immediate vicinity of Oahu will be executed under tactical command of the Army, and that under certain situations Army planes would go to the Navy to assist them with their "distance patrol" and other times Navy planes on shore would operate under Army control.

April 9, 1941, the N. B. D. O. issued an Annex for the Naval Forces to this Joint Air Operations agreement based upon this agreement, Letter 2CL-41, 15 February 1941, and Addendum I to the Plan.

[9] Addendum I is a joint estimate of the air action necessary, dated 31 March 1941, signed by Commanding General, Hawaiian Air Force (General Martin) and Admiral Bellinger (R5-556C). This states, in pertinent part, as follows:

I. Summary of the Situation:

- (a) Relations between US and Orange are strained, uncertain and varying.
- (b) In the past Orange has never preceded hostile action by a declaration of war.
- (c) A successful, sudden raid, against our ships and Naval installations on Oahu might prevent effective offensive action by our forces in the western Pacific for a long period.
- (d) It appears possible that Orange submarines and/or fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence service.

II. Survey of Opposing Strengths:

(a) Orange might send into this area one or more submarines and/or one or more *fast raiding forces composed of carriers* supported by fast cruisers. For such action she is known to have eight carriers. * * *

III. Possible Enemy Action:

(a) A declaration of war might be preceded by:

1. A surprise submarine attack on ships in the operating area.
2. A surprise attack on Oahu including ships and installations at Pearl Harbor.

3. A combination of these two:

(b) *It appears that the most likely and dangerous form of attack on Oahu would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside of 300 miles.*

(c) A single attack might indicate or not indicate the presence of more submarines or more planes awaiting to attack * * *.

(d) * * *.

(e) In a dawn air attack there is a high probability that it could be delivered as a complete surprise in spite of any patrols we might be using * * *. (Here discusses dawn and dusk carrier borne plane air attacks in detail.) (See this document as it completely covers and provides for just what happened.)

IV. Action Open to United States:

* * * * *

[10] (4) None of the above actions can be initiated by our forces *until an attack is known to be imminent or has occurred*. On the other hand, when an attack develops time will probably be vital and our actions must start with a minimum of delay. *It therefore appears that task forces should be organized now, missions assigned, conditions of readiness defined and detailed plans prepared so that coordinated immediate action can be taken promptly by all elements when one of the visualized emergencies arises.* * * *

V. Decisions:

* * * * *

2. Air Combat Group. (To) Intercept and destroy hostile aircraft. Identify and report types of attacking aircraft. *Trail attacking carrier type planes to carrier and report location to commander search and attack group.* * * *

(c) *Provide a means for quickly starting all required action under this plan when:*

(a) An air attack occurs on Oahu.

(b) Information is received from any source that indicates an attack is probable.

* * * * *

Addendum II to this Plan follows on R5-556K, see also R5-556M, N, and this briefly describes the various states of readiness of the planes necessary to perform their duties under this plan. The two lowest degrees or states of readiness are:

Material Readiness, E—All aircraft conducting routine operations, none ready for the purposes of this plan; and under Operational Readiness #5. All types—four hours.

On January 24, 1941, Secretary of the Navy Knox wrote to the Secretary of War Stimson, which letter reads in pertinent part, as follows (R16-1823-1827):

MY DEAR MR. SECRETARY: The security of the U. S. Pacific Fleet while in Pearl Harbor and of the Pearl Harbor Naval Base itself, has been under renewed study by the Navy Department and forces afloat for the past several weeks. This re-examination has been, in part, prompted by the increased gravity of the situation with respect [11] to Japan, and by reports

from abroad of successful bombing and torpedo plane attacks on ships while in bases. If war eventuates with Japan, it is believed easily possible that hostilities would be initiated by a surprise attack upon the Fleet or the Naval Base at Pearl Harbor.

In my opinion, the inherent possibilities of a major disaster to the fleet or naval base warrant taking every step, as rapidly as can be done, that will increase the joint readiness of the Army and Navy to withstand a raid of the character mentioned above.

The dangers envisaged in their order of importance and probability are considered to be:

- (1) Air bombing attack.
- (2) Air torpedo plane attack.
- (3) Sabotage.
- (4) Submarine attack.
- (5) Mining.
- (6) Bombardment by gun fire.

Defense for all but the first two appears to have been provided for satisfactorily. The following paragraphs are devoted principally to a discussion of the problems encompassed in (1) and (2) above, the solution of which I consider to be of primary importance.

Both types of air attack are possible. They may be carried out successively, simultaneously, or in combination with other operations enumerated.
* * * Attacks would be launched from a striking force of carriers and their supporting vessels.

The counter measures to be considered are:

- (a) Location and engagement of enemy carriers and supporting vessels before air attack can be launched;
- (b) Location and engagement of enemy aircraft before they can reach their objectives;
- (c) Repulse of enemy aircraft by anti-aircraft fire;

* * * * *

To meet the needs of the situation, I offer the following proposals:

(1) That the Army assign the highest priority to the increase of pursuit aircraft and anti-aircraft artillery, *and the establishment of an air warning net in Hawaii.*

(2) * * *

(3) That local joint plans be drawn for the effective coordination of naval and military aircraft operations, and ship and shore anti-aircraft gun fire, against surprise aircraft raids.

(4) That the Army and Navy forces in Oahu agree on appropriate degrees of joint readiness for immediate action [12] in defense against surprise aircraft raids against Pearl Harbor.

(5) That joint exercises, designed to prepare Army and Navy forces in Oahu for defense against surprise aircraft raids, be held at least once weekly so long as the present uncertainty exists.

* * * * *

Sincerely yours,

FRANK KNOX.

On the 7th day of February, 1941, the Secretary of War answered this letter, in brief, as follows:

Subject: Air Defense of Pearl Harbor, Hawaii.

1. In replying to your letter of January 24, 1941, regarding the possibility of surprise attacks upon the Fleet or Naval Base at Pearl Harbor, I wish to express complete concurrence as to the importance of this matter and the urgency of our making every possible preparation to meet such a hostile effort.

2. (Here the Secretary outlines the Hawaiian Project for defense. Says all material for aircraft warning service will be there not later than June, 1941, etc.)

* * * * *

6. With reference to your other proposals for joint defense, I am forwarding a copy of your letter and this reply to the Commanding General.

Hawaiian Department, and am directing him to cooperate with the local naval authorities in making those measures effective.

HENRY STIMSON.

This last letter from War to Navy is Ex. 22, and reported on page R16-1827 of transcribed testimony. In General Short's statement he admits receipt on February 19, 1941, "of your letter of February 7, 1941", and refers to much information on aircraft he didn't have. (It is inferred that this is the letter to which he refers, but it should be checked.)

On the 20th day of August, 1941, the Commanding General, Hawaiian Air Force (General Martin), submitted to the War Department, [13] through the Commanding General, Hawaiian Department (General Short), a plan for the Air Defense of Oahu (Ex. 35). It states, in pertinent part, as follows:

I. General:

1. The key to this plan is found in the provision for first, a complete and thorough search of the Hawaiian area daily during daylight; secondly, an attack force available on call to hit a known objective located as a result of the search, and, thirdly, if the objective is a carrier, to hit it the day before it could steam to a position offshore of Oahu where it could launch its planes for attack.

III. Facts Bearing on the Case:

1. Facts:

a. The Army mission is: "To defend the naval base of Oahu. * * *"
d. To perform its missions, the Fleet must have freedom of action without responsibility for the defense of its base.

2. Assumptions:

c. The Hawaiian Air Force is primarily concerned with the destruction of hostile carriers in this vicinity before they approach within range of Oahu where they can launch their bombardment aircraft for a raid or attack on Oahu.

e. Our most likely enemy, Orange, can probably employ a maximum of six carriers against Oahu.

IV. Discussion:

Part 1. The Search:

1. The only manner in which the Hawaiian area can be thoroughly searched for enemy surface craft, *particularly aircraft carriers*, in the event of a situation requiring such action, is to provide a sufficient number of aircraft to conduct a daily search of a desired area during daylight hours with 100% coverage through 360 degrees. * * *

Part 2.

1. Section 1:

a. An enemy should be primarily interested in obtaining the maximum cover of darkness for his carrier approach. This section illustrates four possible uses of darkness by an enemy to cover his approach. * * *

c. * * * The early morning attack is, therefore, the best plan of action open to the enemy.

V. Conclusion:

1. * * *

2a. The most favorable plan of action open to the enemy, and the *action upon which we should base our plans* of operation [14] is the early morning attack in which the enemy must make good the following time schedule:

(1) Cross circle 881 nautical miles from Oahu at dawn of the day before attack.

(2) * * *

(3) Launch his planes 233 nautical miles from Oahu at dawn the day of the attack.

VI. Recommendations:

3232 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4. * * * The sole purpose of the existence of the military establishment on Oahu, ground and air, is for the defense of Oahu as an outlying naval base. * * *

It has been said, and it is a popular belief, that Hawaii is the strongest outlying naval base in the world and could, therefore, withstand indefinitely attacks and attempted invasions. Plans based on such convictions are inherently weak and tend to create a false sense of security with the consequent unpreparedness for offensive action.

Just prior to December 7, 1941, there were several communications that are mentioned throughout the testimony and should be borne in mind, as follows:

1. General Short on R2-40 admits receiving the following from the Navy 16 Oct. 41:

The following is a paraphrase of a despatch from the CNO which I have been directed to pass to you. Quote: "Japanese cabinet resignation creates a grave situation. If a new cabinet is formed it will probably be anti-American and extremely nationalistic. If the Konoye cabinet remains it will operate under a new mandate which will not include rapprochement with the United States. Either way hostilities between Japan and Russia are strongly possible. Since Britain and United States are held responsible by Japan for her present situation there is also a possibility that Japan may attack those two powers. View of these possibilities you will take due precautions including such preparatory deployments as will not disclose strategic intention nor constitute provocative action against Japan."

2. R9-1094: On November 24, 1941 CNO to Cincpf—General Short thinks (R2-39) he probably saw it:

There are very doubtful chances of a favorable outcome of [15] negotiations with Japan. This situation, coupled with statements of Nippon Government and movements of their naval and military forces indicate in our opinion that *a surprise aggressive movement in any direction* including an attack on the Philippines or Guam is a possibility. The Chief of Staff has seen this dispatch and concurs and requests action addressed (* * *) inform senior Army officers their respective areas. Utmost secrecy is necessary in order not to complicate an already tense situation or precipitate Jap action. * * *. (These communications are all found Ex. 36)

3. War Department to Commanding General, Hawaiian Department, November 26, 1941, in re two planes to photograph islands to locate Jap guns, ships, etc.

4. CNO to Cincpf dated November 27, 1941 (there is considerable discussion about whether this was delivered to General Short or not, but Admiral Kimmel tells just how it was delivered by a Lieutenant Burr to G-3, either Donegan or Lawton, on November 27, 1941, in R6-622,3, it reads in part (See R9-1095):

This is a paraphrase of a classified dispatch.

* * * * *

"Consider this dispatch a war warning. The negotiations with Japan in an effort to stabilize conditions in the Pacific have ended. Japan is expected to make an aggressive move within the next few days. An amphibious expedition against either the Philippines, Thai or Kra Peninsula or possibly Borneo is indicated by the number and equipment of Japanese troops and the organization of their naval task forces. You will execute a defensive deployment in preparation for carrying out the tasks assigned in WPL 46 only. Guam Samoa and Continental Districts have been directed to take appropriate measures against sabotage. A similar warning is being sent by the War Department. Inform naval district and army authorities. British to be informed by Spenavo." * * *

5. Chief of Staff to Commanding General, Hawaiian Department, 27 November 1941:

Negotiations with Japan appear to be terminated to all [16] practical purposes with only the barest possibilities that the Japanese Government might come back and offer to continue. Japanese future action unpredictable but hostile action possible at any moment. If hostilities cannot, repeat cannot, be avoided, the US desires that Japan commit the first overt act. This policy should not, repeat not, be construed as restricting you to a course of action that might jeopardize your defense. Prior to hostile Japa-

nese action, you are directed to undertake such reconnaissance and other measures as you deem necessary but these measures should be carried out so as not, repeat not, to alarm the civil population or disclose intent. Report measures taken. Should hostilities occur, you will carry out tasks assigned in Rainbow 5 as far as they pertain to Japan. Limit dissemination of this highly secret information to minimum essential officers.

6. G-2, War Department, to G-2, Hawaiian Department, dated November 27, 1941:

Advise only the CG and the C of S that it appears that the conference with the Japanese has ended in an apparent deadlock. Acts of sabotage and espionage probable. *Also possible that hostilities may begin.*

7. G-2, War Department, to all Corps Areas and Overseas Departments, dated November 28, 1941:

Critical situation demands that all precautions be taken immediately against subversive activities within the field of investigative responsibility of the War Department * * * (then discusses sabotage. See Ex. 36).

8. Commanding General to Chief of Staff, November 28, 1941:

Report department alerted to prevent sabotage. Liaison with Navy.

9. Chief of Staff to Commanding General, Hawaiian Department, December 7, 1941 (this message never delivered prior to attack):

Japanese are presenting at 1:00 P. M., EST, today what amounts to an ultimatum also they are under orders to destroy their code machine immediately. Just what significance the hour set may have we do not know but be on alert accordingly. Inform naval authorities of this communication.

[17] On R5-553, Admiral Kimmel testifies in regard to a publication known as "Joint Action of the Army and Navy." He says, "This publication was prepared by the Joint Board and promulgated to the two services by a joint order signed by the Secretaries of War and Navy. Under a heading "The Specific Functions of the Army in Coastal Frontier Defense"—(*the Army will provide* (I have added the italicized words for clarity—DKS)):

A communication and intelligence system to include an aircraft warning service, among the elements of the land defense, with provision for the prompt exchange of information or instructions with the Navy.

On R5-554 Admiral Kimmel reads a statement from this "Joint Action of the Army and Navy", page 32 thereof, which states:

An aircraft warning service is a communication and intelligence service which forms part of the communication and intelligence service of the frontier defense. The purpose is to warn centers of population, industrial plants, public utilities, and military and naval establishments of the approach of hostile aircraft, and to alert Air Corps units and antiaircraft artillery units. It consists essentially of observers, of information centers for plotting the courses and distributing information of approaching hostile planes, and of the necessary communications.

(NOTE: This above document is discussed but no date thereof given, although Adm. Kimmel says it was in force December 7, 1941, and prior thereto. Check it.)

Ex. 7: On page 11, General Short in his statement cites an extract from the Joint Coastal Frontier Plan which is also his Ex. D attached thereto, and it reads:

"Method of Coordination. The CG, Hawn Dept, and the Commandant 14th Naval Dist. have determined that in this joint plan the method of coordination will be by mutual cooperation [18] and that this method will apply to all activities wherein the Army and Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Army and Navy Defense Plan, 1935, Chap. 2, par. 9b."

On R5-583, Admiral Kimmel reads a Naval Dispatch dated December 3, 1941, which states:

"OpNav informs ClnC Asiatic, ClnC Pac, Combat 14-15 that highly reliable information has been received that instructions were sent Japanese diplomatic and consular posts at Hong Kong, Singapore, Batavia, Washington,

3234 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

and London to destroy most of their codes and ciphers at once and to burn secret documents."

Ex. 16: This is account of action and orders taken since December 7th at Wheeler Field. This document is extremely illuminating in that it indirectly shows what was necessary and not done prior to the attack—such as information for conduct of families during air raids; blackouts, what to do in gas attacks, orders for gas masks. (No provision for these things prior thereto.) It includes:

Special Orders for chemical air attack dated December 9, 1941.

Air raid instructions, dated December 7, 1941.

Statement that they distributed Stewart Klaxons for air raid warning system after attack. (Consequently, must have had them prior thereto.)

December 9, 1941, sets up a practice air raid for Honolulu. This signed by General Short.

December 9, 1941, had them exchange their old gas masks for new ones as old ones were unserviceable.

Submitted Col. Wm. Flood, Commanding Wheeler.

Ex. 17: From General Rudolph at Hickam Field. Gives his new arrangements and instructions since December 7, 1941. Blackout instructions, issued gas masks, and sirens for air raid alarms. Cooperation with Navy on patrols.

Ex. 18: From General Tinker, Air Force Commander, Hickam [19] Field. About same as above.

Ex. 20: This is a communication from General Martin to Commanding General dated September 20, 1941, arranging for Joint Army and Navy practice drill for 17-22 November, 1941. (This was a plan for the drill.) States they want to test "ability of carrier aviation to attack defenses of Oahu"—"efficiency of Interceptor Command". " * * * defense of Oahu will be directed by the Interceptor Commander using recently installed equipment and controlling operations from his control board."

Ex. 31: SOP, CAC—53rd CA Brigade (AA) November 26, 1941. CO—Harbor Defense—Pearl Harbor, Honolulu, Kaneohe Bay.

"Sec. 1, para. 6—Every unit is responsible for its security at all times from hostile ground or air forces."

See pars. 233-273, Incl., FM 10-5 (particularly applicable to "close in" defense by all sea coast artillery and AA units.) "Sec. 1, para. 10-a. AA defense is a responsibility of every unit. See Paras. 261-273, FM 100-5."

"All units will have their automatic weapons habitually in readiness for AA defense.

d. All unit commanders will be held responsible for the following:

(1) Maintenance of air guards to give timely warning of the approach of hostile aviation; * * *

(3) Reduction of vulnerability to air attacks and observation by dispersion of personnel and material when in bivouac or in position, * * *

Sec. 1, para. 11 * * * an adequate alarm system will be provided. (Alarms for air attacks, close-in defense and blackouts indicated.)"

Ex. 32: SOP, Hawaiian Department, 5 November 1941. This is practically same content as preceding Ex. 31 in re all things mentioned above.

Ex. 27: This is telephone conversation on December 3, 1941, [20] between a Japanese in Honolulu by name of Mori and a Military or Naval officer in Tokio, translated and available to Military Intelligence, Hawaiian Department, December 5, 1941. (This does not seem to show very much of importance except that Tokio inquired about the number of air planes flying about daily and if Mori knew "anything about United States Fleet".)

Ex. 28: SOP, 25th Division—See Section I, para. 10, "Alarm system" and Sec. I, para. 6 a, b (1) (2)—relative to having AA guns and ammunition.

Ex. 29: SOP, 24th Division. See in re AA defense and Sec. 1, para. 13—"alarm system".

[21]

POSSIBLE SPECIFICATIONS

1. FAILURE TO PROVIDE AN ADEQUATE INSHORE AERIAL PATROL

R1-5: Joint Coastal Frontier Defense Plan—provides amongst other things for Army the " * * * establishment of an inshore aerial patrol of the waters of Oahu defensive coastal area."

R1-14: Major Lawton states that Army fliers were to patrol inshore area off Oahu (about 20 miles) and Navy to operate a surface patrol in same area.

R2-127: Gen. Short states there were no planes in the air this Sunday morning of attack, and that it was "Most unusual". Would have to ask Davidson why not. But had they been in the air "they would have had no ammunition. They were only training."

R2-107: Gen. Short states, "Inshore reconnaissance was a daily thing. We had planes around the Island just constantly."

R2-162: Pursuit planes not armed at time of the attack, Gen. Short admits. Says, "They were not on a war footing." (There was no "inshore" patrol established. He means that training planes were just flying around for the training. They had no ammunition while in the air.)

R2-172: Gen. Davidson had charge of the pursuit planes on the Island and says that none of his planes ever flew before 7:30 A. M. and then just for training and never flew on Sundays.

R2-181: General Davidson says there were no planes in the air this Sunday morning just the same as any other Sunday morning. They were resting.

R6-738: Adm. Bloch says that he and Gen. Short signed the Joint Coastal Hawaiian Frontier Defense Plan, April 11, 1941. By this Navy undertook the distant reconnaissance and the Army to provide an "inshore aerial patrol" to run out 25 to 50 miles at sea. Prior to December 7th he don't think Army ever did this.

R14-1648: Gen. Martin was Commanding General, Hawaiian Air Force, and admits that prior to December 7, 1941, there was no inshore patrol.

[22] R2-200: Gen. Rudolph, Commanding General, bombers, says that he was only training crews to bring over the bombers from the mainland. That when his ships were up they would have no ammunition unless they were doing some target practice in connection with their training. None of his planes were in the air at time of attack December 7, 1941, at 7:55 A. M. and that none got in the air until after the attack.

R2-127: General Short, after stating that "planes were in the air constantly", was asked, "Well, they were the planes of your inshore patrol?" He replied, "Well, they were planes that were in training, but they would see just as much as—yes, they would have only been inshore patrol; they wouldn't have gone over 15 miles; they wouldn't have seen anything that those training planes wouldn't have seen constantly".

R2-107: General Short states, "My reconnaissance under the plan with the Navy is limited to just the immediate offshore of the island, ordinarily limited to 15 miles. * * *" (See statement of Admiral Bloch, R6-738, supra.)

[23] 2. FAILURE TO PROVIDE ADEQUATE ANTI-AIRCRAFT DEFENSES

R1-5: Joint Coastal Frontier Plan makes Army responsible for aircraft defenses.

R2-80: General Short admits that all anti-aircraft batteries didn't have ammunition. Admits four batteries had to go some distance to get it, and some had to go to the crater after it, and those who had it had to unbox it.

R2-88: 25th Division had to draw ammunition for their artillery and was not in battle position until 4 P. M.

R2-128: Alert #1 didn't provide for air attack at all, but only for uprisings. " * * * where there was no threat from without."

R2-189-90: General Davidson says the biggest difficulty was that plane guns were not loaded and the ammunition was in a hangar that was afire.

R2-190: General Davidson states that had he been in position with his ships he could have shot down Jap planes before they reached their objective.

R3-257: General Wilson says that by the time he got to the field the men themselves had gotten the machine guns out and "had gotten busy".

R3-234: Colonel Phillips states that AA guns had no ammunition. Thinks they should have under FM 100-5. (This he speaks of would be mobile units.)

R3-252: General Wilson, 24th Division says his troops had to draw ammunition.

R3-262: General Murray, 25th Division, says that he had violated regulations and had previously drawn ammunition. He says he knew the area for drawing ammunition (small) at Schofield and as it was congested he knew that it would be a regular slaughter if Japs attacked with bombs. He thought there might be a surprise raid, so he did this. Says it took about six hours to draw ammunition owing to the congestion in the area.

R3-274: General Burgin says some of his AA guns were in position "in 15 or 20 minutes and others had to go to the other side of the Island and were not in position until afternoon. A great many did get into position." (This latter remark implying that they all did not. Negative.)

R3-275: General Burgin says that all of his guns did not have ammunition. Men had to go to the crater for it, and even that that was near guns was still in boxes and had to be unboxed before could be used.

R3-280: There were 60 mobile and 26 fixed AA guns.

R3-270: General Burgin says that when he got Alert #1 he expected Alert #2 right away. Alert #2 "is where we take ammunition."

R3-345: General Martin said that had Alerts 2 or 3 been in effect their planes would have had fuel and ammunition.

R4X434: Sergeant Mobley Hall tells of having to get machine guns [24] for anti-aircraft shooting out of the supply room at Wheeler Field and set them up and then go for "supplies". (Presumably ammunition.)

R4-437, 8: Captain Ebey, CAC, says his CA guns were not in position at Barbers Point at time of attack. Had to get 4 guns down there under fire. Got some machine guns out of supply room and set them up in a tennis court and fired, then set them on a barge and fired back at attacking Japs. They had no machine guns or ammunition at time of attack.

R4-458, 9: Lieutenant Stephen Saltzman, 98th CA, had no guns and their machine guns were in storeroom.

R4-459: Lieutenant Saltzman says they had ammunition pits and gun pits, but had to dig in ground for barracks for the men (?). They had no automatic weapons except .30 Calibre Brownings with infantry adapter mounts for anti-aircraft fire. Had no AA guns and the machine guns they had were in the storerooms.

R4-473: Lieutenant Cooper—came to Hickman Field—men were getting machine guns out, trying to put them together—they lacked water cans.

R4-469: Lieutenant Colonel Jack Howard, QMC, has charge of depot—many supplies—and on R4-471, says depot an easy target and had no machine guns for anti-aircraft at time of attack.

R4-473: Lieutenant Cooper, above, states that men were desperately and bravely bringing machine guns out and trying to shoot them.

R4-497: Captain West, CAC, had some machine guns (ground) at Camp Malakole, but had to get AA guns out of storage and set them up.

R4-498: West says no equipment in place and ready to fire. Says not ready at Pearl Harbor for 1 or 2 hours after attack.

R4-500: Lieutenant Lyman, CA, his was a machine gun battalion—had no AA guns and their machine guns were in storage about 50 yards away.

R10-1166: Lieutenant Colonel Larkin, USMC, CO of Ewa Field, had planes for Army use December 7, 1941, but Army never called nor was he called that entire day (Army controlled these land planes by the plans in effect.) Says for their anti-aircraft they had only some .30 calibre machine guns that they took out of some destroyed planes.

R10-1191: Captain Shoemaker, Commanding Officer Ford Island, (1193-1197). Army were supposed to install AA guns and ammunition and supposed to man them. This is an Army battery. They had been there before on some tests, but December 7th they never showed up at all all day long. They got out some machine guns but the ammunition was in storage.

R10-1210: Commander Martin, Kaneohe Bay, had no anti-aircraft except ground machine guns and rifles. All planes here were put out of commission.

[25] R10-1217: Lieutenant Colonel Weddington, Commanding Officer, Bel-lows Field, had planes but no ammunition. No anti-aircraft whatever. Got out their machine guns but had to go to the crater for ammunition. Post wasn't authorized any ammunition he says.

R13-1500: Colonel Pickett, USMC, was at Navy Yard Barracks—they were not supposed to handle the anti-aircraft defenses but no one called them so they of their own accord got machine guns out of the shed and ammunition and set them up. They were not set up or ready in any way and they had to do this under fire. Took them about 20 minutes.

R14-1648: General Martin says they did not set up machine guns at fields for the protection of planes.

R16-1890: Lieutenant Colonel Whaling saw one of our AA's shoot at our own plane.

R5-553: Admiral Kimmel testifies in regard to a publication known as the "Joint Action of the Army and Navy." He states, "This publication was prepared

by the Joint Board and promulgated to the two services by a joint order signed by the Secretaries of War and Navy." He says Army was to provide—

"A communication and intelligence system to include an aircraft warning service, among the elements of the land defense with provision for the prompt exchange of information or instructions with the Navy."

R5-554: Admiral Kimmel purports to read from page 32 of this document wherein it defines the functions of an aircraft warning service. (This is fully set out on page 17 this Brief and Resume under Documentary Evidence.) No date of this is given but the Admiral says it was in force and effect December 7, 1941, and prior thereto.

Ex. 9: Statement of Captain Edward Kent that he was ground defense officer at Bellows Field. They had some ground machine guns but no ammunition. Had asked for some ammunition about December 1, but it hadn't arrived.

Ex. 13: Captain Edward Kent makes another statement that at Bellows Field they had no rifles or ammunition issued, so they issued some rifles to use for their anti-aircraft. Their machine guns were not set up until after the attack. Had only rifles and a few machine guns from the grounded planes to ward off the attack.

Ex. 28: SOP 25th Division.

Ex. 29: SOP 24th Division (These sop's all provide for each unit responsible for its own air attack defense.)

Ex. 31: SOP, CAC—"Section 1, par. 6—Every unit is responsible for its security at all times from hostile ground and air forces." See paragraphs 233-273, FM 100-5. (Particularly applicable [26] to "close-in" defense by all sea coast artillery and antiaircraft units.)

Ex. 32: SOP, Hawaiian Department, November 5, 1941.

R4-427: Lieutenant Welsh says that pits were dug for installing AA guns in some places but the guns were not ready.

R4-471: Colonel J. Howard, QMC, had many supplies in his QM depot which was an easy target but had no machine or other guns for anti-aircraft defense.

Ex. 7: Statement by General Short—page 24: "All anti-aircraft batteries had skeleton crews guarding them. *All units had in their possession ammunition for rifles, pistols, automatic rifles and machine guns.*"

Ex. 7, p. 23: Here appears a written statement by Lieutenant Kermit A. Tyler wherein he says at time of attack he was "Pursuit Officer at the Interceptor Control Center." (But see statements of his superior officer, Major Bergquist, (R3-379), Tyler merely sent there to watch it and familiarize himself with its operation.)

Ex. 7, p. 22: Appears an affidavit of Private Joseph P. McDonald who was the telephone operator at the AWS information center at time of attack. (Merely verifies that Lockard called in, Private McDonald wanted Lieutenant Tyler to call back the men at the Board, but Lieutenant Tyler said it was not necessary.)

R2-80: General Short here, and also in his statement (Ex. 7, p. 24), said that all anti-aircraft batteries had .30 caliber, .50 caliber, and small arms ammunition, "in their immediate possession." Then he says, "All but four batteries had their ammunition for the 3-inch guns immediately accessible. For instance, down at DeRussy the ammunition was in the casemate. They had to carry it probably 75 yards, but their men were right there, and the guns were all set up and in position, *but the ammunition was not right along side of the guns.* There were four batteries that had to go further for their ammunition. * * *. (B. C. D, and F, 64th Infantry). The first one of those batteries started drawing its ammunition at the * * * Crater, *where we had our ammunition in caves*, at 8:15, * * *. And by 10:15 they had all drawn what we call a day of fire, which for that particular battery is 300 rounds per gun. * * *. *They moved out, and they had about a thousand yards to go*, and by 8:15 were actually drawing ammunition, * * *."

Q: "And the batteries you say all had the ammunition at the——"

A: Immediately accessible. They were not right along side of the gun. I say they had to step into the casemate and probably carry the ammunition 75 yards. Down at Fort Kamehameha they probably didn't have to carry it that far, and they were in action very quickly as a result of that. The casemate was closer to the position."

R2-81: General Short says under Alert #2 the ammunition would have been along side of the guns.

3238 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[27]

3. FAILURE TO SET UP AN INTERCEPTOR COMMAND

R1-5: Joint Coastal Frontier Plan—Army to provide against air attack.

R1-16: F. O. #1, dated November 28, 1941, sets up duties and responsibilities of Interceptor Command.

R1-18: SOP, Hawaiian Department states in pertinent part: "The interceptor command will coordinate and control the operations of pursuit aircraft, anti-aircraft artillery, including available Naval and Marine Corps anti-aircraft artillery, aircraft warning service and attached units, and will provide for the coordination of anti-aircraft measures of units not under military control, to include (1) arrival and departure of all friendly aircraft, (2) the coordination of the anti-aircraft fire from naval ships in Pearl and Honolulu Harbors, (3) transmission of appropriate warnings to all interested agencies.

R2-51: General Short here explains the workings of the Interceptor Command, just as though it was all set up and definitely states that General Davidson was in command thereof December 7th.

R2-68, 9: General Short states that ordinarily a Naval Officer was at the Board in the information center to relay any information on to the Navy in compliance with (3) above—and that he thinks three Naval Officers were detailed there. Says they were not there December 7th.

R2-178: General Davidson states definitely that on December 7th this command was not set up, that it was not activated.

R2-170: General Davidson states that he was not in charge of interceptor command December 7th because there was no interceptor command on that date. (Gen. Davidson had been in US from about Oct. 15, 1941 until Dec. 3, 1941, and after the 3rd he took the 4th and 5th in writing up his findings from the mainland where he had been studying the workings of interceptor commands, so he knew very little that was going on.)

R2-179: Davidson says interceptor command was not activated until "a few days ago" (Dec. 24, 1941.)

R2-196: Interceptor Command activated December 17, 1941.

R3-232: Colonel Phillips, Chief of Staff, admits interceptor command activated December 17, 1941.

R3-274: General Burgin, Command General CA, (sea coast and anti-aircraft artillery), when they are ready to fire turns his anti-aircraft over to the interceptor command, as had been doing in drills, and did this December 7th., and says "they were just shooting at everything * * * I don't think they had much control."

R3-339: General Martin in speaking of AWS was asked, "Who had it if you didn't?" Answer "It was under the Signal Officer who [28] was in charge of the installation of the equipment."

R3-353: Lieutenant Colonel Powell, Department Signal Officer, had been setting up this command and that it had not been organized on December 7th. That he had been in U. S. with General Davidson. Interceptor Command had not been organized in accordance with SOP.

R3-356: Colonel Powell says that on morning of December 7th he was at his home in Honolulu at time of attack. Was not at AWS. (This is where interceptor commander would be.)

[29]

4. FAILURE TO PROVIDE A PROPER AIRCRAFT WARNING SERVICE

R1-5: Joint Coastal Plan—Army to provide for aircraft warning service.

R1-16: F. O. #1 provides army's responsibility for AWS.

R1-18: SOP, Hawaiian Department, Army to supply and "provide for transmission of information to all interested agencies". (Navy?)

R2-178: Although General Short had stated that this under General Davidson, General Davidson here states that it was not under his command as the Signal Corps were just setting it up and they were operating it a little.

R3-232: Colonel Phillips states that the "radars are still not installed", (apparently meaning the fixed ones).

R3-233: Had only three mobile units in use, and two of these not operating at time of attack. (They were only ordered to operate between 4 and 7 a. m., after that they could use them to train if they wanted to, but not required, and as no training on Sunday, they all quit at 7 a. m., December 7th, except the one boy, Lockard.) (Navy did not know that this was only time they were operating. Were not told.)

R3-253: When Colonel Powell, Signal Officer, got back from U. S., G-3 told him to operate it from 4 to 7 a. m., and this he did, but it was not set up yet in accordance with SOP for Interceptor Command.

R3-329: General Martin, Commanding General, Air Force, says December 7th the AWS was under the Signal Officer (Col. Powell) who was installing the equipment, never under Martin's command. (Which it would have had to be to be under Gen. Davidson.)

R3-337: General Martin says that AWS was never under his command.

R3-339: General Martin in speaking of AWS was asked, "Who had it if you didn't", answer, "It was under the Signal Officer who was in charge of the installation of the equipment."

R3-353: Colonel Powell, Signal Officer, says that on December 7th the detector instruments were under his direction, and it was planned that when he got the AWS working satisfactorily that he would turn it over to the Interceptor Command.

R3-354, 5: Colonel Powell says that at time of attack he had seven listening posts (AW stations) set up and could have enough men to operate them 24 hours, but there were not enough stations as they wear out under strain.

R3-368: Lieutenant Tyler, AC, was told by Major Bergquist to go over to the information center this morning from 4 to 8 a. m.—didn't know what to do—had no instructions—had only seen "board" once before and had never operated it. Says at 7 a. m. all those who had been there sitting [30] around the board with earphones on, took them off and all went home, except the switch-board operator, who is always there, and himself because he had been told to stay there until 8:00 o'clock. This officer had no instructions whatever as to his duties there. At about 7:20 a. m. the radar station at Opana (northern tip of Island) called in all excited and said a large number of planes were coming in from about 132 miles north. This was Lockard and he told this to Lt. Tyler, who told him not to worry about it. In about ten minutes Lockard called in again, very excited, the operator asked the Lt. if he shouldn't call the men back to the board. Lt. Tyler said not to. Very soon the attack came.

R3-377: Major Bergquist had been helping voluntarily to set up the information center and he states that it was not finished. He had voluntarily and without instructions, had officers under him go over to the board to act as watch officers, just to see it operate and learn what it was about, and this is why he had Lt. Tyler go over there this morning from 4:00 to 8:00 o'clock. The Board only operated until 7:00 a. m. but he had told Tyler until 8:00 and that is why he was there.

R3-380: He states that he knew that Lt. Tyler knew nothing about the Board and didn't expect him to as it was not necessary to have any air officer there at that time at all.

R3-383: Major Bergquist states that the Aircraft Warning Service Company, operating under the Signal Corps, were the ones ordered to operate the AWS from 4:00 to 7:00 a. m. The Air Force merely cooperated on its own initiative. Major Tindall, Commander Taylor and himself were all Controllers and could have operated it.

R3-382: Major Bergquist says that they could have operated the mobile units 24 hours a day at the time and that the sets could have stood it. The difficulty was with the gas engines operating the sets rather than the sets themselves, but even then could have operated them.

R3-390: Major Tindall says that altho not detailed or instructed to go over to the Information Center, he knew that it would probably be undermanned at the time of the attack on December 7, 1941, so he voluntarily went over there to help out if he could. Major Bergquist, Comdr. Taylor and himself were the only three who might be qualified to act as control officers and none of them were detailed there at that time as it had not been finished and was not ready, and even then it was only ordered to operate between 4:00 and 7:00 a. m. There was no naval officers there as there never had been any assigned. So there were none there this morning "the same as any other morning".

R10-1229: Lt. Comdr. Taylor says the AWS was "not ready by any means", and there was no naval liaison officers detailed there.

R3-356: Colonel Powell, Signal Officer, under whose direction the AWS was at the time of the attack, states that at that time he was at his home in Honolulu, not at the AWS center.

R5-553: Admiral Kimmel testifies in regard to a publication known as the "Joint Action of the Army and the Navy", saying, "This publication was prepared by

3240 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the joint board and promulgated to the two services by a joint order of the Secretaries of War and Navy. "He says that it provides under a heading "The specific functions of the Army in Coastal Frontier Defense" that the Army shall provide—"A communication and intelligence system to include an aircraft warning service, among the elements of the land defense, with provision for the prompt exchange of information or instructions with the Navy."

R5-554: Adm. Kimmel reads from this document on page 32 thereof where it defines functions of AWS. (This will be found in Documentary Evidence.)

[30a] Ex. 7, p. 23: Here appears a written statement by Lieutenant Kermit A. Tyler wherein he says at time of attack he was "Pursuit Officer at the Interceptor Control Center." (But see statements of his superior officer, Major Bergquist (R3-379), Tyler merely sent there to watch it and familiarize himself with its operation.)

Ex. 7, p. 22: Appears an affidavit of Private Joseph P. McDonald who was the telephone operator at the AWS information center at time of attack. (Merely verifies that Lockard called in, Private McDonald wanted Lieutenant Tyler to call back the men at the Board, but Lieutenant Tyler said it was not necessary.)

[31] 5. FAILURE TO PROVIDE FOR THE TRANSMISSION OF APPROPRIATE WARNINGS TO ALL INTERESTED AGENCIES

Exhibit 32: Standing Operating Procedure—Nov. 5, 1941: Section II, paragraph 15j provides: "The Interceptor Command will: Coordinate and control the operations of pursuit aircraft, anti-aircraft artillery (* * *), the aircraft warning service, and attached units, and will provide for the coordination of anti-aircraft measures of units not under military control, to include:

(1) Arrival and departure of all friendly aircraft.

(2) * * *

(3) *Transmission of appropriate warnings to all interested agencies.*"

R5-553: Admiral Kimmel testifies in regard to a publication known as "Joint Action of the Army and the Navy", saying "This publication was prepared by the Joint Board and promulgated to the two services by a joint order signed by the Secretaries of War and Navy." Under a heading therein "The specific functions of the Army in Coastal Frontier Defense" it says the Army will provide:

"A communications and intelligence system to include an aircraft warning service, among the elements of the land defense, *with provision for the prompt exchange of information or instructions with the Navy.*"

(Altho in the record it does not appear that the date of this document was, Admiral Kimmel says it was in effect Dec. 7, 1941.)

R5-554: Admiral Kimmel reads from page 32 of above stated document, viz: "An aircraft warning service is a communication and intelligence service which forms part of the communication and intelligence service of the frontier defense. *The purpose is to warn centers of population, industrial plants, public utilities, and military and naval establishments of the approach of hostile aircraft, and to alert Air Corps units and anti-aircraft artillery units. It consists essentially of observers, of information centers for plotting the courses and distributing information of approaching hostile planes, and of the necessary communications.*"

R2-68-70: General Short testifies that there were Naval Officers at the Information Center at all times to get this information and relay it to the Navy. That they were liaison officers detailed there for that purpose—and he thinks that three naval officers had been so detailed to act in "transmitting" any warnings to the Navy. But, altho they had always been there on previous mornings, there were none there this morning of the attack.

R3-380: Major Bergquist says that Lt. Tyler at the Board this morning would not know that the planes heard were not Navy planes because the Navy liaison position at the Board had not been filled yet.

R3-381: Major Bergquist says that there had never been any navy liaison officers at the Board prior to December 7, 1941, and that Comdr. Taylor had contacted the navy in regard to sending some such officers over for that purpose, but none had as yet been sent.

R3-389: Major Bergquist also states that there was no bomber liaison at the Center until in afternoon, December 7, 1941.

R5-632: Admiral Kimmel states that no naval officer had ever been detailed to the AWS center to keep navy advised.

[32]

6. FAILURE TO ESTABLISH A PROPER SYSTEM OF DEFENSE BY
COOPERATION AND COORDINATION WITH THE NAVY

R1-5: Major Lawton sets out the Joint Hawaiian Coastal Frontier Plan. Therein the Navy is to provide for a "distant reconnaissance".

R1-14: Under this Plan the Army was to conduct an inshore aerial patrol and the Navy a surface patrol of the same area. Major Lawton thought this distance would be about 20 miles out.

R6-738: Admiral Bloch says that he and General Short signed this Plan and under that the Army were to conduct an inshore aerial patrol to a distance of 25 to 50 miles.

Exhibit 7, page 11: In his exhibit D General Short sets out the following extract from the Joint Hawaiian Coastal Frontier Defense Plan:

"Method of Coordination. The Commanding General, Hawaiian Dept., and the Commandant, 14th. Naval District, have determined that in their joint plan the method of coordination will be by *mutual cooperation* and that this method will apply to all activities wherein the Army and Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Action of Army and Navy, 1935, Chapter 2."

R1-18: Standing Operating Procedure, 5 Nov., 1941, states that the Interceptor Command shall control the AWS and "provide for transmission of appropriate warnings to all interested agencies."

R2-42: After War Dept. radiogram of Nov. 27, 1941, Gen. Short states that he only ordered Alert #1, and operation of AWS 4:00 to 7:00 A. M., but it doesn't appear that he notified the Navy of these steps.

R2-108: Gen. Short states that he didn't ask Navy about the "distant reconnaissance".

R2-127: Gen. Short doesn't know why the planes were not in the air this Sunday morning of the attack. Says there were planes all around the Island constantly. "Most unusual" that they were not up this morning. However, it would have made no difference as if they had been up they had no ammunition as they were only training up to that time.

R2-164: Gen. Short says that he did not discuss with the Navy whether they considered Alert #1 sufficient; says they, "Never talked it over."

R2-167: The General says that with all his guns and materiel he couldn't have guaranteed that the Fleet would be safe. (But never talked it over.)

R2-53: Gen. Short tells of the many meetings with Admirals Kimmel and Bloch just prior to the time of attack, but nothing to show that the Navy were ever informed that interceptor command had not been activated; that AWS was only working from 4:00 to 7:00 A. M.; that there was no inshore aerial patrol, or that only Alert #1 as to sabotage was in effect.

R2-68, 9: Gen. Short states that ordinarily a naval officer was at the Board at the Information Center—that he thinks that three officers were detailed there from the Navy. (This was not true so it shows they were not *mutually cooperating*.)

R2-108: Gen. Short says he never asked the Navy what distance reconnaissance they were making as, *"It was their full responsibility. I didn't know just where they went, and I don't know just what they did when they were out. That was a naval responsibility. * * *, and I did not feel that it was my business to try to tell Adm. Kimmel how he would conduct his reconnaissance"*.

R2-119: Gen. Short says that Alert #1 doesn't call for the operation of the AWS at all, but were doing it anyhow.

[33] R2-128: Gen. Short states that Alert #1 didn't cover air attack at all. *And that no particular precautions were taken whether the Fleet was in or out of the Harbor.*

R2-186: Gen. Davidson states that a Navy Officer (Comdr. Taylor) had been around helping them set up the AWS, but not there every morning and that he was not detailed there as a liaison officer.

R2-222: Col. Phillips, Chief of Staff, Hawaiian Dept., was the senior Army member of the Local Joint Planning Committee (Army and Navy security measures), but that they had never met since he became Chief of Staff and was a member, November 6, 1941. Also, that they never met even after the communications of Nov. 27, 1941.

R3-223: Col. Phillips never consulted with the Navy Fleet or Dept. heads at any time between Nov. 27, 1941, and Dec. 7, 1941.

3242 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

R3-227: Col. Phillips says that after the War Dept. radio of Nov. 27, 1941, he and Gen. Short talked it over and decided on Alert #1. *He thought that the Navy would make "reconnaissance," but never asked them or consulted them in any way.*

R3-227, 8: Col. Phillips never did know when the fleet were in or out of the Harbor, and he says knowing this fact would have made a difference in their plans of defense. *"* * * but as Chief of Staff, I never knew."*

R3-229: Col. Phillips states that he was never present at any conferences between Commanding General and the Navy Commanders. That the General always took his aide along with him to these conferences. Says that the General was personally handling the protection and/or cooperation with the Navy. "Short was handling all that himself."

R3-235, 6: Col. Phillips says that "they" depended on the Navy to warn them. (I presume that he means by the distant reconnaissance.)

R3-245: Col. Phillips states again that there were no meetings of the Joint Planning Committee.

R3-270: General Burgin says that Gen. Short expressed himself "very forcefully" along the line that with the Navy scouting, etc., no ships could get close enough to land a plane. He got the impression that Gen. Short got this from the Navy.

R3-273: Gen Burgin, Commanding General sea coast artillery and anti-aircraft artillery, says he never knew when the Fleet was coming in, altho it would have helped him with his defenses had he known this.

R3-283: Gen. Burgin says that the Navy never gave any information as to when they were coming in except when they were practicing.

R3-293: Lt. Col. Fielder, G-2, Hawaiian Dept., states that at the Staff meeting on the morning of Dec. 6, 1941, he reported that the Japs were burning papers at the Consulate. That he knew of this a short time before this. That the FBI had reported it to one of his men and he in turn told meeting of the Staff. (Gen. Short says that he did not know of this, and Col Fielder does not state specifically whether Gen. Short was at this Staff meeting.) Says nobody paid any attention to this burning of papers.

R3-381: Major Berquist says that there had never been any Naval liaison officers at the Information Center, prior to Dec. 7, 1941.

R5-538: Admiral Kimmel says that he inspected the Pearl Harbor defenses and was astounded at their weakness.

R5-554: Adm. Kimmel says that my Army and Navy Joint Agreement signed March 20, 1941, "defensive air operations over and in the immediate vicinity of the Island of Oahu" would be under the tactical control of the Army. Signed by Adm. Bloch and Gen. (This is true. See under Documentary Evidence.)

[34] R5-556C: Here Admiral Kimmel sets out the Joint Agreement and the Joint Estimate of the Situation (Addendum I). (These are set forth in the preceding pages under Documentary Evidence.)

R5-560: Adm. Kimmel says that the Navy were not informed until about Dec. 9, 1941, that the radar operated by Sgt. Lockard at Opana had picked up the approaching Jap planes the morning of the attack. Had they been they might have trailed them back to carriers.

R5-581, 2: Adm. Theobald states that the "war warning message" of Nov. 27, 1941, from CNO to the Navy "was given by a Naval Officer to an Army Officer."

R5-583: On December 3, 1941, the CNO sent Adm. Kimmel a message that they had reliable information that the Jap consulates at Hong Kong, Singapore, Batavia, London and Washington were to destroy most of their codes and ciphers and burn secret papers at once. (Gen. Short admits he was in conference with Adm. Kimmel this day, but it is not brought out whether he was informed of this message.)

R5-608, 9: Adm. Kimmel states that there were no Navy morning or evening patrols except over the route to Honolulu(?), and to the south where a task force was out—nothing to the north. He says no evening patrols anywhere at anytime.

R12-1481: Adm. Kimmel says that the Army was furnished with a schedule that did show what ships were in or out of the Harbor at a given time and this had been so for months.

R5-630-7: Adm. Kimmel states that he thought the AWS was working, and that radar sets were in good shape, had never been informed otherwise. He knows that no naval officer was detailed at the Information Center as a liaison officer. He had the SOP, 5 Nov., 1941, Hawaiian Dept., and from that thought the Interceptor Command and the AWS was working as provided therein. Just learned at time of hearing that the permanent radar sets were not even then installed.

R6-662, 3: Here Adm. Kimmel states just how he understands the "war warning" message was given to Gen. Short. Says Comdr. Layton gave it to Lt. Burr (Navy liaison at Army Hq.) who gave it to G-3 (Col. Donegan or Major Lawton) on Nov. 27, 1941.

R6-667: Gen. Short wrote Adm. Kimmel June 19, 1941, saying that the AWS "will be in operation in the near future." Aug. 5, 1941, Gen. Short wrote him again that AWS (aircraft warning service) is "rapidly nearing completion."

R6-669, 670: Tentative SOP (Standing Operating Procedure) of Interceptor Command was never given Adm. Kimmel he states.

R6-676: Adm. Kimmel knew there was no distant patrol of Dec. 7, 1941.

R6-730, 1: Admiral says that Gen. Short never told him at any time what he proposed to do after the messages of Nov. 27, 1941.

R6-733-738: Adm. Bloch didn't know the radars were not working all the time, didn't know anything about the inshore aerial patrol.

R7-771: Adm. Bloch states that the conversations between Adm. Kimmel and Gen. Short were very general.

R7-804, 5: Adm. Bloch says that he and Gen. Short talked many times after Nov. 27, 1941, and that Gen. Short never told him at any time prior to Dec. 7, 1941, that he was only alerted to prevent sabotage. After attack he went to the General's office and said, "Weren't you on alert?" and the Gen. replied, "Only against sabotage." Navy Condition 1 is their highest form of Alert while Army Alert #1 is their lowest. He thought the Army was on a "high" alert. Didn't know about the various types of alerts.

R7-806: Adm. Block thought Gen. Short was given the "war warning" despatch because he was given one by Adm. Kimmel.

[35] R7-831: Capt. DeLany, USN, knew that the AWS was very unsatisfactory, and "couldn't get information out of it."

R7-859: Admiral Pye says that he would depend for warning upon scouting by aircraft, "and it would seem reasonable to suppose that with all of the Army observation posts it would be impractical for enemy aircraft to arrive in this position in such a fashion that we could not fully man our guns." He assumed that Army's AWS was in full operation—" * * * because on these drills they had given adequate warning."

R7-865: Adm. Pye says that Navy had its guns manned and ammunition at them at all times after Nov. 27, 1941.

R9-1094: Here Lt. Comdr. Layton introduces several Naval despatches right up until December 3, 1941, showing the imminence of war. (However, these are not brought home to Gen. Short in the record, but this might be checked. If they were cooperating they should have been made known to him.)

R9-119: Rochefort knew that Jan Consulate was burning papers the Wednesday before Dec. 7, 1941.

R14-1624: Gen. Short here says that the SOP, Nov. 5, 1941, was issued as an accomplished procedure. This sets out the functions of the Interceptor Command and provides that the Army will transmit warnings to "interested agencies". (Ten copies of this were given the Navy.)

R14-1626: Gen. Short upon being recalled admits that at time of attack the Interceptor Command had not a "definite organization". "We were working it informally". Doesn't know for sure whether the Navy knew this or not. (He didn't say this before.)

R14-1655: Gen. Martin, Com. Gen. Haw. Air Force, did not know the Navy had no daily off-shore reconnaissance.

R14-1648: Gen. Martin admits that prior to Dec. 7, 1941, there was no inshore aerial patrol by the Army Air Force.

R16-1823-1827: Here are set out the two letters. One from Secretary of Navy, Jan. 24, 1941, setting out the matter of protection of the Fleet at Pearl Harbor, and the answer thereto by Secretary of War, Feb. 7, 1941, which were sent to General Short and received by him. He admits receipt thereof in his statement as of Feb. 19, 1941. (See Documentary Evidence this Brief and Resume.)

R2-164: General Short was asked, "You didn't actually coordinate with the Navy as to whether they considered Alert #1 sufficient?" He replied, "I didn't go down and ask the Navy, no, sir, whether they considered it sufficient. I am sure from all of our talk that everybody understood just what was being done."

Question to General Short, " * * *. Was it intended that the same alert would be ordered by the Navy or by the Army in each case?" He replied, "I hadn't—yes."

R2-38: General Short was asked if he got the "war warning" message to Navy. He replied, "I don't remember. I perhaps saw it in that I was in conference

with Admiral Kimmel and Admiral Bloch on the 27th for 2 or 3 hours. I was in conference with him on December 1—Admiral Kimmel on December 1, and with both of them on December 3; so in all probability I did see the one to which you refer. I am not sure whether it was sent to me officially."

[35a] R2-39: General Short states the same answer would apply to the Naval Communication of November 24, 1941. (See documentary Evidence in this Brief and Resume.)

R2-46: General Short says, "Now, to take up the question of having no information to indicate an attack, as I say, I was in constant communication with the 14th Naval District. *I had nothing in the way of alarming news.* In our Coastal Frontier Defense Plan *we coordinate the work of the Army and Navy by mutual cooperation.* * * *

R2-46: General Short here discusses the Joint Air Operations Agreement of March 21, 1941, and says what they each agreed to do, and then, after stating the Navy was responsible for distant reconnaissance, says "*The question of just how the total reconnaissance was carried out was never known to me.* * * * I assumed that the Navy planes were searching all the other critical areas, and they probably were. *I say that was a matter that was not under my control.*"

R2-107: General Short states, "My reconnaissance under the plan with the Navy is limited to just the immediate offshore of the Island, ordinarily limited to 15 miles. * * *" (See statement of Admiral Bloch, R6-738, supra.)

R2-70: General Short in speaking of the operation of the Interceptor Command station said there would under battle conditions "be a total group of about 30 officers there. * * * Including the naval officer. I think three naval officers is the normal quota that they have there."

[36] 7. FAILURE TO ISSUE ADEQUATE ORDERS TO HIS SUBORDINATES AS TO THEIR RESPECTIVE DUTIES IN CASE OF SUDDEN ATTACK

R2-66: Gen. Short here tells about Lt. Tyler being at the Board on this morning of the attack and getting the call regarding the approaching planes from Lockard. (But he had no instructions whatsoever regarding any duties there or what he was to do in case anything happened.)

R2-162: Gen. Short says that no planes had any ammunition. Were only training.

R2-163: Gen. states that no troops under his command were on a war footing.

R2-177: Gen. Davidson here sets out two telegrams whereby he is instructed not to disperse the planes.

R2-178: Gen. Davidson was never instructed to operate the AWS—it was just being set up, by Signal Corps.

R2-172: Gen. Davidson had charge of the pursuit planes but had never been instructed to have any in the air prior to 7:30 A. M. when they started the day's training—never told to operate an aerial inshore patrol—never told or instructed to have his planes in the air on Sunday mornings.

R2-186: Gen. Davidson states that he was never informed as to the serious international situation between U. S. and Japan. Hence, his subordinates, including Lt. Tyler, did not.

R2-200: Gen. Rudolph, Commanding General 18th. Bombardment Wing, has charge of the bombers, states he positively had no information of critical relations between U. S. and Japan.

R2-201, 2: Gen. Rudolph states that as an instructor that had he ever seen a radiogram stating "this is a war warning" he would never have had his planes concentrated, and especially on a Sunday morning.

R2-203: Major Allen, AC, says at attack he rushed out—got into a plane—it wouldn't start—he didn't know what to do—asked instructions—finally got into the air at Hickam Field about 11:30 A. M.

R2-205: Major Allen never heard a discussion, even informally, that there might be an attack by Japan.

R2-206: Major Allen, AC, didn't know that there was a flight of 12 of our own bombers coming in from the mainland at the time of the attack—saw some of our own men fire on these pilots as they were trying to land.

R3-226: There were no restrictions on social functions. All liberties and leaves of the men were normal.

R3-353: Col. Powell, Signal Corps, who had been getting the AWS together had been in the U. S. with Gen. Davidson from about Oct. 15, 1941, to Dec. 3, 1941, and when he got back G-3 had already told Col. Murphy, whom he had left

in charge, to operate the AWS between 4:00 and 7:00 A. M. He was told nothing else to do than just this. *Says there was no way of getting any information to the Navy.*

R3-237: Col. Phillips, C of S, states that no one ever reported to him that any ammunition was insecure in a hangar at Hickam Field. He says that no one ever reported to him that Lockard had picked up the planes that morning until a few days later when the Signal Officer just mentioned it informally.

R3-245: Col. Phillips didn't know whether Navy had been given SOP, Nov. 5, 1941, or not, or whether they would know what Alert #1 meant or not, or whether they had a similar procedure. (Navy were given 10 copies.)

[37] R3-249, 250: Brig. Gen. Durwold Wilson, CG 24th. Division, was verbally told by Col. Haynes, G-2 25th. Division, on Nov. 27th. that he had seen a telegram that Jap Negotiations were off, but no mention was made that hostilities might ensue. Never called into conference or consulted.

R3-251: Gen. Wilson says that he felt safe from attack on account of the patrol system (?), altho he says he knew nothing about it except by hearsay. He thought the Navy had an inshore and off-shore patrol.

R3-254: Gen. Wilson was at the "Ann Etzler's Cabaret" the preceding Saturday night at Schofield Barracks.

Col. Phillips was there -R2-216.

Gen Short was there.

Gen. Murray was there -R3-264.

Gen. Burgin at "a little party at Ft. Ruger."

Major and Mrs. Dupree had rather "large party at Schofield"-R3-226.

Gen. Martin was at Dinner Party at Hickam Field -R3-332.

R3-299: Col. Fielder, G-2, says that he and Gen. Short discussed the possibility of an attack in a "purely academic way."

R3-260, 1: Gen. Murray, CG 25th. Div., "planned to take a horseback ride that morning. Was perplexed * * *".

R3-264: On Nov. 27th. when Gen. Murray got Alert #1 he was not informed in any way as to the seriousness of the situation. No intimation—nothing.

R3-265: On Nov. 27th when Gen. Murray got Alert #1

R3-265: He says that he talked with Gen. Short several times between Nov. 27, 1941, and Dec. 7, 1941, but the Gen. had never intimated any serious or critical situation. He had only mentioned that he couldn't get all the funds he wanted for various things. Nothing in re international situation.

R3-273: Gen. Burgin thought the Interceptor Command was working and thought that Gen. Davidson was in charge of it.

R3-274: Gen. Burgin states how on this morning of the attack he got his anti-aircraft ready and turned it over to the Interceptor Command as he had done on the drills, and says, "They didn't have good control". (There wasn't any Interceptor Command and this Gen. didn't know it, altho he turned over his guns to it. It was just then being run by Majors Tindall and Bergquist who voluntarily went over there thinking that it would be undermanned.)

R3-316: Lt. Col. Bicknell, Ass't G-2, got the information that the Japs were burning papers on December 5, 1941, and informed Staff meeting next morning. Says that it meant that war was imminent to him.

R3-337: Gen. Martin says that Gen. Davidson was the Interceptor Commander, then on page 338 he didn't even seem to know that it was not activated until Dec. 17, 1941.

R3-368: Lt. Kermit Tyler was told by Major Bergquist to go over to the Information Center of the AWS this morning but didn't know why. He had no instructions only to be there between 4:00 and 8:00 A. M. He had never operated a Board and had only seen one once before.

R3-377: Major Bergquist had been helping the Signal Corps set up the AWS, and knew it was operating between 4:00 and 7:00 A. M. so he thought it would be a good idea to acquaint the officers under him with it by having them take turns going over there and watching the Board. So without being told to do so he sent over Lt. Tyler. Says that no Air Corps officer was required to be there as it was not under the Air Corps as yet. Page 380—he states that he knew that Lt. Tyler knew very little about it, didn't expect him to. Says there were no naval officers ever there as they had been assigned there as yet.

R3-383: Major Bergquist says that the Air Corps were merely cooperating on their own hook. Page 384—he states that there was no bomber liaison [38] there at the Center until afternoon of that day.

3246 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

R3-386: Major Bergquist states that he came there about 10:00 A. M. as he was not detailed or assigned there, but merely came to help out.

R3-390: Major Tindal says that he was not detailed or assigned to the Information Center of the AWS, but knew it would probably be undermanned so he went over there to help out. *He was the first officer there and the men were trying to man it themselves.*

R4-415: Lts. Taylor and Welsh rushed to Maleiwa Field—no one told them to go up or to do anything—no squadron commander present. (He was hunting deer on another Island.) So on their own initiative they both took to the air after loading ammunition. They brought down several planes.

R4-427: Lt. Welsh says the guards there had no instructions as to what to do if enemy planes came over.

R4-447: Col. McCarthy says that on Dec. 7, 1941, he never did receive instructions to put in Alert #3 so he just did it himself and did what he could.

R4-448: Col. McCarthy says that from about Nov. 22, 1941, until Dec. 2nd or 3rd, that Alert #2 had been in effect. Says that Post Commander called in several Battalion Commanders and verbally gave them orders to put Alert #2 in effect.

R4-476: Lt. Cooper says that they had been on Alert #3 for about two weeks. (I don't understand these two officers and it should be checked.)

R4-454: Pvt. Shortt, ambulance driver, rushed to the hospital—three or four doctor officers there—had no instructions or orders—knew that men were injured so without any instructions he went out and picked up wounded by himself—no litter service or assistance at all.

R4-461: Lt. Saltzman stated that he couldn't conceive of this attack "in my wildest dreams". Says that this is what the Junior Officers thought:—"Knowing that the Signal Corps, the AWS has outposts all over the Islands and that they are manned almost continually and that Navy patrols these waters, I never felt that we would be completely surprised the way we were." (This last word is "did" in record.)

R4-491: Pvt. McBriarty at Bellows Field says that about 8:30 A. M. a plane flew over shooting its machine guns, but as no one was hit they thought nothing of it and he went on to Church.

R14-1654: Gen. Martin says that no search was made for carriers on this morning.

R14-1659: Gen. Davidson says that the Interceptor Command did not direct that a search for planes from carriers be made this morning. (How could it?)

Exhibit 16: This document gives in detail the things they have done since the attack such as practice air raids, drills for gas attacks, practice air raid on Honolulu, distributed the Klaxons for air warning system. This at Wheeler Field. (See contents of this Exhibit more fully set out under specification 11.) (While this is all negative evidence, nevertheless it does show what was *not* done prior to the attack and what could have been done to alleviate the severity of said attack and the loss sustained.)

Exhibit 17: This sets forth what was done by Gen. Rudolph subsequently at Hickam Field. (See this under specification 11.)

Exhibit 15: Blackout instructions for Hickam Field, issuance of gas masks; air raid drills; plans for evacuation of women and children, etc.. Klaxons for air warning service had not been issued.

[39] 8. FAILURE TO TAKE ADEQUATE MEASURES TO PROTECT THE FLEET AND NAVAL BASE AT PEARL HARBOR

R1-5: Joint Hawaiian Coastal Frontier Plan (See Documentary Evidence in this Brief and Resume)—"Army to provide for land, sea coast and anti-aircraft defense of the Island of Oahu, with particular attention to Pearl Harbor and the naval forces there present. See also Exhibit 25, Plan for Air Defense of Oahu, * * *

"III. Facts Bearing on the Case.

1. Facts:

a. The Army mission is: 'To defend the naval base of Oahu'. * * *

d. To perform its missions, the Fleet must have freedom of action without responsibility for the defense of its base."

Also, Joint Army and Navy Defense Plan, 1935, Rainbow 5:

a. Joint—Hold Oahu as main outlying naval base and control and protect shipping in coastal zone.

R1-14: By above Plans Army was to conduct an inshore aerial patrol. (The distance of this is in debate.)

R2-42: After warning of November 27, the only measures General Short took were to order Alert #1 (sabotage and uprisings) and radar operation 4-7 a. m.

R2-80: General Short states that all anti-aircraft batteries, and these included PH, did not have ammunition. Says that by 10:15 a. m., they were already, though.

R2-51: General Short states what measures he took after November 27—See page 42 above.

R2-53: General Short states that he met with Kimmel and Bloch several times just prior to December 7, but nothing to show that they were informed that interceptor command was not organized; AWS was not working only 4-7 a. m.; that there was no inshore patrol or that only Alert #1 was in effect. (There is much to show otherwise, however.)

R2-108: General Short says he never asked the Navy what distance reconnaissance they were making as "It was their full responsibility". "I didn't know just where they went, and I don't know just what they did when they were out. That was a naval responsibility. * * * and I did not feel that it was my business to try to tell Admiral Kimmel how he would conduct his reconnaissance."

R2-119: General Short states that Alert #1 is not for air attack and under this it was not necessary to operate AWS at all.

R2-127: General Short states no planes in air at time of attack this Sunday morning, he didn't know why, says it was "most unusual".

R2-157: *General says that no special precautions are taken whether Fleet is in or out of the harbor.*

R2-162: General admits his planes were not on a war footing at time of attack and had no ammunition.

R2-178: General Davidson says the AWS not under his command at this time—that Signal Corps were just setting it up. (Materials had been there since June, according to Secretary of War's letter of February 7, 1941.)

R2-186: General Davidson says a naval officer was helping set up the AWS but none were detailed to serve there for liaison. (Hence, there was no provision for transmitting information to interested agencies.)

[40] R2-172: General Davidson states no planes of his (pursuit) were ever in the air prior to 7:30 a. m., and never any on Sundays.

R2-190: General Davidson had 80 planes in commission and 69 not, this morning.

R2-189, 190: General Davidson states that the biggest difficulty was that the plane guns were not loaded and the ammunition was in the hangar that was on fire.

R3-222, 3: Colonel Phillips, Chief of Staff, was senior army member of Local Joint Planning Committee, but it never met since he was a member. Never consulted with Navy Fleet or District heads from November 27 to December 7.

R3-227, 8: Colonel Phillips says he never consulted Navy. He never knew when Fleet was in or out of the Harbor and this would affect the plan for defense. Never present at any conference of Commanding General with Navy. *"General Short was handling all that himself."*

R3-234: Colonel Phillips states that anti-aircraft guns, mobile units, had no ammunition. Thinks that under FM 100-5 they should have had some.

R3-245: As Chief of Staff he never knew what forces the Navy had. Depended on Navy to warn them. (?)

R3-273: General Burgin says although he had the sea coast artillery and the anti-aircraft artillery he never knew when fleet was coming in although it would have helped him a lot to know this.

R3-293: Lieutenant Colonel Fielder reported at Staff meeting morning of December 6, that Japs were burning papers.

R3-316: Lieutenant Colonel Bicknell, Assistant Chief of Staff, got information that Japs were burning papers at 5 p. m., Friday, gave to Staff next morning. Also brought the Mori message to Commanding General the night before, but they could make nothing of it. (Ex. 27.)

R3-325: General Martin states that Japs seemed to know everything about them. "Unfortunately we were in Alert #1, that was the most unfortunate thing of all."

R3-368: Lieutenant Tyler detailed to Board with no experience, no instruction, wasn't even supposed to be there. Opana called and reported planes but

Tyler not told what to do, didn't know so he did nothing, and planes, although they had been detected, came on and surprised them all.

R3-380, 1: Major Bergquist says AWS not organized or set up; no interceptor command activated; no naval liaison or other means for getting information to Navy. On his own responsibility sent Tyler up there to get acquainted with it. Says had sufficient personnel to operate 24 hours. Bergquist was not detailed there, but did voluntarily go there and help take charge of it when the attack came.

R3-390: Major Tindall voluntarily went over there during attack as he knew it was not set up and would be undermanned.

R4-437, 8: Captain Ebey says his truck drawn coast artillery was not in position at Barbers Point. They were machine gunned on the way. They had to get machine guns out, set them up and fire back.

R4-468: Sergeant Klatt: C. A., says the switchboard and telephones for his battle post were in the barracks supply room—not installed.

[41] R4-497, 8: Captain West says that at Malakole they had some machine guns but the anti-aircraft had to be gotten from the storage and set up. No equipment in place and ready for fire.

R5-538: Admiral Kimmel says he inspected defenses at Pearl Harbor and was astounded at their weakness.

R5-549: (See two letters (2CL-41) of Navy's—SOP, Hawn. Dept. in Documentary Evidence. Also Ex. 35 "Air Defense of Oahu".)

R5-556C: On March 31, 1941, Bloch and Martin signed joint estimate of situation covering joint Army and Navy Air Action in event of hostile surprise attack. (See this in Documentary Evidence it covers the exact thing that happened.)

R5-581, 2: Admiral Theobald says that November 27, "war Warning" message given by "a naval officer to an army officer".

R6-730, 1: Admiral Kimmel says that Short at no time ever told him what measures he was going to take as a result of the messages of November 27.

R7-804: Bloch didn't know Army not on a "high" alert—never knew different kinds of alerts.

R10-1191: Captain Shoemaker, Commanding Officer, Ford Island, says Army was to set up an anti-aircraft defense of the island and man it, but that on this day they didn't even show up so they got out some machine guns but had to get ammunition from storage.

R14-1624: Short says hat SOP, 5 November 1941, was issued as "accomplished procedure". (This was given the Navy.)

R14-1622: General Short says, "Frankly, * * * I was more serious about the training rather than expecting anything to happen at that time".

R14-1624, 5: General Short admits reconnaissance and radar working haphazardly up until December 7, because "I didn't think the situation demanded it."

R14-1641, 2: General Short states that if he had had all the material he needed it wouldn't have made any difference in his plans.

R3-383: The AWS Company, operating under the Signal Corps were the ones ordered to operate the AWS from 4 to 7 a. m. The Air Force merely cooperated on its own hook. Operating on a war footing there would be a controller and a pursuit officer present at the Information Center. Major Tindall, Commander Taylor and himself (Major Bergquist) were all controllers and could have operated it.

R3-339: General Martin in speaking of AWS was asked, "Who had it if you didn't?" Answer, "It was under the Signal Officer who was in charge of the installation of the equipment."

R3-337: General Martin says that AWS was never under his command.

R3-353: Colonel Carroll Powell says that at time of attack the Interceptor Command had not been organized in accordance with SOP. On this day AWS was under his direction.

[42] R3-356: At attack he was at his home in Honolulu. Was not at the AWS station.

R3-389: Major Bergquist says there was no bomber liaison at Information Center until in afternoon, December 7.

Ex. 20: Joint drill to test efficiency of interceptor command. (See).

R12-1481: Admiral Kimmel says Army was furnished with schedule showing when ships in and out and had been getting this several months.

R5-553: Admiral Kimmel testifies in regard to a publication known as the "Joint Action of the Army and the Navy." He states, "This publication was prepared by the Joint Board and promulgated the two services by the Secretaries of

War and Navy by a joint order signed by them respectively". It states what the Army shall provide for under a heading "The specific functions of the Army in Coastal Frontier Defense"—

"A communication system and an intelligence system to include an aircraft warning service, among the elements of the land defense, with provision for the prompt exchange of information or instructions with the Navy."

R5-554: Admiral Kimmel then reads from page 32 of this Joint Action plan and it defines and describes the duties of an aircraft warning service. (This is copied verbatim on page 8, Documentary Evidence, in this brief and Resume.) Admiral Kimmel says this was in effect December 7, 1941, and prior thereto.

R2-168: General Short was asked:

Q: "Well, your basic plans state specifically that that is the responsibility of the forces (Army) here, to protect that base."

A: "That is correct."

Q: "All right. Now, if you had those ideas have you discussed them with Admiral Kimmel and Admiral Bloch along those lines? Have you ever discussed with them the situation, or rather, whether or not they should bring their fleet in, or how many? Has that ever been discussed?"

A: I don't think that I have discussed that particular point as to how many ships they would bring in."

[43] 9. FAILURE TO HAVE HIS AIRPLANES DISPERSED IN ANTICIPATION OF A HOSTILE ATTACK, AFTER HAVING BEEN WARNED OF THE DANGER THEREOF

Ex. 36: See communications of both the Army and Navy dated October 16, 1941; November 24, 1941; November 27, 1941 (one to Army direct from War Department, and the "war warning" dispatch to Cincpf), and November 28, 1941, and the Navy dispatch of December 3, 1941 (although it is not shown that General Short saw this latter, he says he was in conference with both Admiral Kimmel and Bloch on December 3, 1941), all bearing upon the warnings of danger given to General Short. These various documents also appear in this Brief and Resume under Documentary Evidence.

R2-84: General Short admits purposely grouping the planes as they were then easier to guard against sabotage.

R2-177: General Davidson set out two telegrams from Hawaiian Air Force not to disperse planes.

"Nov. 27, 1941. * * * HAF Four two C place Alert number one in effect immediately. Anti-sabotage only. This is an actual repeat actual alert not a drill."

Followed by:

"Under alert #1 aircraft will not be dispersed. All units continue training under condition easy five."

Easy five meant E5 which was ready in four hours. So just continued to train normally under condition E5. Nothing ready.

R2-200: General Rudolph states alert #1 "did not include airplane raids; it included sabotage. Therefore, we bunched the planes because we could have much better protection against sabotage."

Ex. 6: This map shows the bunched arrangement of planes at Hickam Field.

[44] 10. FAILURE TO HAVE HIS AIRPLANES IN A STATE OF READINESS FOR AN ATTACK

R2-162: General Short admits that pursuit planes were not on a war footing at time of attack and were not supplied with ammunition.

R2-127: General admits no planes in the air this fateful Sunday morning.

R2-128: General states that Alert #1 doesn't cover air attack at all.

R3-345: General Martin states that had Alerts 2 or 3 been in effect the planes would have had fuel and ammunition, would have been better.

R3-331: Martin states that he had 140 pursuit planes at time and about one-half of them out of commission.

R2-190: Davidson says that he had 80 ships (pursuit) in commission at time and 69 out of commission.

R2-189, 90: General Davidson state that the biggest difficulty at the time was that the planes guns were not loaded and the ammunition was in a hangar that was on fire.

R2-177: General Davidson shows two telegrams from Commanding General, Hawn Air Force, not to disperse planes under Alert #1.—

"Nov. 27, 1941. * * * HAF Four two C place Alert number one in effect immediately. Anti-sabotage only. This is an actual repeat actual alert not a drill."

"Under alert #1 aircraft will not be dispersed. All units continue training under condition easy five."

R5-556K, M, N: Addenda I and II to the plan of Army and Navy made in accordance with the Joint Air Operations Agreement of March 21, 1941 (R5-556A) provide conditions of aircraft readiness, in pertinent part, as follows:

"Material Readiness, E—All aircraft conducting routine operations, none ready for the purposes of this plan; and under Operational Readiness #5. All types—four hours."

R3-383: Major Bergquist says that if there had been Alert #2 the planes would have been dispersed; a pilot there at all times and a man sitting in the cockpit at all times to warm it up, and could be up in 1 to 3 minutes.

R3-389: Bergquist says there was no bomber liaison at information center December 7th until in the afternoon.

R4-415-423: Lieutenant Taylor and Welsh rushed to Maltewa Field and the men were just loading ammunition (30 cal.) into the planes—there was no Squadron Commander there (he was bear hunting on Molokai Island)—had no instructions at all so just jumped in to the planes and brought down six Japs and were cited for this by the Government.

R8-893: Amdiral Bellinger says that all Navy planes were armed with machine guns and had ammunition. (Also, somewhere in there that Navy planes were all dispersed.)

[45] R14-1658: General Martin states that he did not set up machine guns at Fields for protection of planes. (What about the SOP's and FM 100-5—Every unit will be responsible for its own defense from air attack.)

Ex. 25: In statement by Assistant Chief of Staff, G-3, states that there were no airplanes ready for immediate use at time of attack.

R2-200: General Rudolph, Commanding General bombers, says that he was only training crews to bring over the bombers from the mainland. That when his ships were up they would have no ammunition unless they were doing some target practice in connection with their training. None of his planes were in the air at time of attack December 7, 1941, at 7:55 a. m., and that none got in the air until after the attack.

R2-201, 2: General Rudolph, Commanding General bombers, says that if he had had any intimation of pending trouble he would never have had his planes bunched or concentrated, but would have had them ready for the air, "Especially on a Sunday morning."

R5-561: Here General McNarney reads a statement submitted by General Short in re condition of Reconnaissance and Bomber planes on December 7, 1941:

Reconnaissance planes in commission—6.

Reconnaissance planes out of commission—7.

Bomber planes in commission—39.

Bomber plane out of commission—33.

R2-128: General Short after saying it was "most unusual" for planes not to be in the air this Sunday morning, was asked how he would explain that. He replied, "I wouldn't be able to explain it without asking General Davidson why; *but if they had been up and training they wouldn't have had ammunition, for normally in training they did not carry ammunition.*"

R2-128: General Short says further "* * *. There is no question, if we had had pursuit in the air fully armed and expected this attack at 8 o'clock, why, we probably would have—we might have been able to stop it to a considerable extent, at any rate."

R2-162: General Short was asked, "Were the pursuit planes armed and supplied with ammunition at all?" He replied, "They were not."

R2-163: General Short was asked, "Were the bombers in the same state of unpreparedness as the fighting planes?" He replied, "Yes, sir."

[46] 11. FAILURE TO PROVIDE FOR PROTECTION OF MILITARY PERSONNEL, THEIR FAMILIES ET CETERA, ON VARIOUS RERERVATIONS

R3-232: Colonel Phillips states that the Hawaiian Home Guard was not in existence December 7th—"It was just being organized." Says there was no aerial warning service "with sirens in tower downtown" at that time. Have been established since.

R3-233: Colonel Phillips states again that there was no system of air raid warnings.

R1-5: Under the Joint Coastal Plan the Army mission was to provide against air and gas attack.

R4-412, 13: Colonel Phillips again states there were no sirens or warnings at various fields of any kind prior to attack. No warning devices of any kind. Also, again no air raid warning for "tower" prior to December 7th.

R4-514: Civilian Chas. Utterbach states that civilian comment was, "They caught them asleep, by God."

Ex. 15: This contains a group of orders and instructions issued subsequent to attack at Hickam Field. (While this evidence is of subsequent measures it does show what security measures were lacking prior to the attack.) It shows: gas masks issued; a gas alarm system established; blackout regulations promulgated; one communication dated December 20, 1941, states, "*The Hawaiian Air Depot is dependent upon the inverted sections of gasoline tanks for shelter and protection of our personnel in the event of an air raid. * * * It is requested that we be permitted the use of these sections until such time as adequate air raid shelters are built for our personnel, * * **" (Permission was granted by 1st Indorsement.); and a system of air raid wardens established.

Ex. 16: By order General Short gives orders for a practice air raid alarm on December 10 for Honolulu. Issued December 9, 1941. Also states that Members of the Military Police, Honolulu City Police, Home Guard and Honolulu Fire Dept. have been issued a supply of Stewart Hand Klaxon sirens for distribution throughout the City of Honolulu.

December 9, 1941—Standing orders first issued for defense against gas attack.

December 7, 1941—Bulletin "Information for Conduct of Families in Air Raids."

Ex. 17: This contains subsequent instructions by General Rudolph, Commanding General 18th Bombardment Wing. This states gas masks issued to all personnel. Sirens issued for use in giving air raid alarms. Construction for additional facilities underneath barracks floor initiated, to protect men occupying barracks. Continuous daily patrols have been flown in cooperation with the Navy. Evacuation plans [47] for women and children initiated. Complete blackout instructions put into effect.

(These exhibits are all negative evidence, but show (1) that these obvious safety measures they call for were not done prior to the attack, and (2) that the facilities were there and all of these things could have been done prior to the attack had anyone even suspected there might be trouble.)

(An article appears in the Washington Star for week of March 23, 1942, of an interview of Mrs. Mary Kogan, 1340 Taylor Street, N. W., wife of Lieutenant Milton Kogan, wherein she states that she and her husband were at Schofield Barracks at time of attack. She states therein, in pertinent part, "It was then they knew the thing (*the attack*) was real and that the warning of a Hawaiian Newspaper a week earlier that Japan could be expected to attack that week end had come true. * * * Before December 7, we hadn't even been told what to do in case of an air raid".) [*Underscoring supplied.*]

(As showing that General Short must have known of imminence of attack, a Mr. Raymond Coll, a Hawaiian newspaper editor is quoted by a Washington Newspaper, shortly after the submission of the report of the Roberts Board, January 24, 1942, as stating, in substance, that General Short and Admiral Kimmel had made clear by their utterances before December 7, 1941, the probability and immence of a Japanese attack at an early date.) (We have not been able to examine these Hawaiian papers at the Congressional Library as the papers were at the blindery at the time of this report.)

3252 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SECRET

June 12, 1942.

MEMORANDUM for the Files.

I today saw General Hildring and Colonel Donald Wilson, the officer who is to succeed him on July 1, about the general court-martial charges we have drawn up in the matter of General Short. General Hildring explained the background of the situation to Colonel Wilson. General Hildring advised me that there was nothing to do at the present time but hold the papers but suggested that I should at some time tell the Secretary of War and the Chief of Staff that we had prepared a draft of specifications and were awaiting any further instructions.

M.C.C.
M.C.C.

July 21, 1943.

Took up this matter with Gen. Marshall. He told me that it would have to wait until Sicily Stimpson's return. That it was a matter for his decision.
M.C.C.

SECRET

27 NOVEMBER 1944.

Memorandum for Mr. Bundy:**Subject: Secretary's Press Release of 28 February 1942 Re General Short.**

1. Attached hereto are two copies of the Secretary's press release of 28 February 1942.

2. Pursuant to his direction the Judge Advocate General's Office on 4 March undertook preparation of charges against General Short, utilizing all available data including the Roberts Report and transcript. This work was completed 20 April 1942 and resulted in preparation of charges alleging violation of the 96th Article of War, with eleven specifications as follows:

Specification 1: Failure to provide an adequate inshore aerial patrol.

Specification 2: Failure to provide adequate anti-aircraft defense.

Specification 3: Failure to set up an Interceptor Command.

Specification 4: Failure to provide a proper aircraft warning service.

Specification 5: Failure to provide for the transmission of appropriate warnings to interested agencies.

Specification 6: Failure to establish a proper system of defense by cooperation and coordination with the Navy.

Specification 7: Failure to issue adequate orders to his subordinates as to their duties in case of sudden attack.

Specification 8: Failure to take adequate measures to protect the Fleet and Naval Base at Pearl Harbor.

Specification 9: Failure to have his airplanes dispersed in anticipation of a hostile attack, after having been warned of the danger thereof.

Specification 10: Failure to have his airplanes in a state of readiness for an attack.

Specification 11: Failure to provide for the protection of military personnel, their families, etc., and of civilian employees on various reservations.

3. The above charges were merely tentative and possible charges and were never approved by The Judge Advocate General or transmitted to the Secretary of War. Of course, they were never made public.

WILLIAM J. HUGHES, Jr.,
Colonel, JAGD.

1 Incl. Cy Press Release (dup)

EXHIBIT NO. 141

Notes, Correspondence, and Reports Relating to Pearl Harbor and Events Leading up to it.

16 October 1940. Received report from Japanese sources in Mexico of intentions to bomb four (4) Battleships on 17 October 1940. This report conveyed in person by me to CINCUS (Admiral Richardson) then at San Pedro, Calif., with three (3) Battleships and one (1) Heavy Cruiser. Official report made to C.N.O. (D.N.I.) by Comd 11th. Naval District, San Diego. (See O.N.I. files for copy.)

13 November 1940. Assisted in Investigation and recommendations regarding Intelligence facilities in Hawaii. This being conducted by Capt. W.K. Kilpatrick U.S.N. on orders of CINCUS (Adm. Richardson).

14 November 1940. Discussed with Admiral Block the vulnerability of Fleet at Pearl Harbor and recommended certain measures for security. Obtained his permission to have sent to Honolulu certain key men to build up the Intelligence organization.

9 February 1941. Letter to Admiral H.R. Stark USN regarding my conversations with Admiral NOMURA at San Francisco on 8 Feb. (Copy attached).

11 February 1941. Letter to Admiral H.E. Kimmel USN regarding NOMURA conversations and the existing situation. (Copy attached).

17 February 1941. Reply of Adm. Stark to my letter of 9 February. (Copy Attached).

March 1941. Conversation with Admiral Kimmel (CINCPAC) and his Chief of Staff (Capt. Wm. Smith USN) regarding NOMURA interview, and SURPRISE ATTACK on our Fleet by Japanese in case hostilities eventuate. Details of this conversation are covered in a Personal and Confidential Memo to Chief of Staff to Cincpac, Rear-Admiral Milo Draemel, USN, for presentation to CINCPAC (Admiral Nimitz) and dated March 17, 1942. (Copy Attached).

16 September 1941. Letter to Admiral Stark urging caution, and other matters. (Copy attached).

October 1941. Japanese discussion of chances of success of air attack on Pearl Harbor, Copy of this presented to Capt. C.H. McMorris USN (Planning Officer on staff Cincus) a translation of "When Japan Fights", by Nozaku Hiraeta. (Copy attached).

20-25 October 1941. Extensive conversations with an Investigator from Washington, Mr. Curtis B. Munson, (believed to be from high levels) carrying a letter from Admiral Stark (CNO) to "open everything to him". He was given an accurate picture of the situation existing and how it would develop. He was told to "forget about uprisings and sabotage" about which he was most concerned because the Japanese would start the war "With an air attack on our Fleet for the purpose of disabling four Battleships. Some details are included in my memo to Adm. Draemel, mentioned above and copy attached. (See Munson authentication attached.)

13 November 1941. Conversation with Lieut. C.H. Coggins, (MC) USN, (Attached to Intelligence organization), regarding existing Officer Morale and lack of readiness for war. Details included in report to Fleet Intelligence Officer, same date. (Copy attached).

20-25 November 1941. Conversations with Lieut. Coggins regarding existing low army morale. Details in Confidential memo to District Intelligence Officer, 14th Naval District, Honolulu dated 5 December 1941. (Copy attached).

Nov. 1941 Conversations regarding failure to apprehend Seven (7) Japanese agents found photographing Kaneohe Naval Air station on all sides, on 4 November 1941. (This one of first spots hit by attacking aircraft). Details available in O.N.I. Files, including Teletype report to F.B.I. Office in Honolulu. For whole Intelligence situation, this known only to Officer in Charge of Investigations, Lt-Comdr. W.B. Stevenson, USNR, now at Honolulu. (See letters from Director Joint Intelligence dated 17 Nov 1940 - attached to final report.)

27 November 1941. Detailed discussions with Mr. Lorrin E. Thurston, Head of Radio Station KGU, Honolulu and Editor of Honolulu Advertiser regarding present serious situation and preparation of his radio station for necessary broadcasts at time of air attack.

28 November 1941 Sailed with Task Force 8 (Adm. Halsey) for Wake Island.

2 December 1941 News report of arrival in Washington of Japanese Ambassador to Peru. This was indicated by me as one of the conditions which would bring a "break" one way or another, in my conversations with Munson and others.

5 December 1941 Report from CINCUS that unidentified submarine had been reported in the operating areas on night on 4 December.

This was the condition on which I had advised all in my conversations, including Admiralimmel, that the Japanese would be ready to strike. From 1800 to 2400 endeavored to intercept Japanese conversation on Radio short wave. There was nothing that would have justified any report to my Task Force Commander or CINCUS.

7 December 1941 (0800) When Communication Officer reported the attack on Oahu, switched on Radio and KGU Honolulu was sending out the words we had discussed on the evening of 27 November.

At night we joined the USS Detroit and Destroyers and Scouted to the Southward for the Enemy. Nothing sighted. Entered Pearl Harbor at daylight, 8 December.

Additional Items which Indicate Contributions to PEARL HARBOR.

Facilities for espionage provided by the newspapers in Hawaii, particularly those in Japanese language.

Details are emphasized and summarized in a report to CINCPAC immediately after Pearl Harbor and dated 7 January 1942. (copy attached)

Lack of Security Indoctrination of Naval Officers and inadequate Security facilities. Details are summarized in a letter to CMC via CINCPAC dated 27 January 1942. (copy attached)

Inadequate selection of officers for Intelligence duty. Details summarized in letter to CMC via CINCPAC dated 27 January 1942. (copy attached)

Inadequacy of Intelligence functions before Pearl Harbor as indicated by Memo to CINCUS dated 2 January 1942, as requested by a member of his staff.

Letters from D.N.I. (Adm. Admiral) W.S. Anderson indicating need for clarification of agreements with F.B.I.

November 19, 1940

Dear Zacharias:

Thanks for your letter of November 5th. You are quite right that clarification is highly desirable. Enclosed is a copy of an official letter stating that such action is now under way.

The fact that some clarification was desirable has been apparent to me ever since the F.B.I. letter was written. However, that F.B.I. letter was not a directive insofar as the Army and Navy were concerned, and I awaited an auspicious moment in which to obtain the clarification. I had made some statement of 6 September was really intended to inform the law enforcement officials to whom they should report certain information, but, unfortunately, named only F.B.I., whereas it should also have stated that subjects of a certain character of direct interest to the Army or Navy should also be reported to the proper officials of those departments. Anyway, there soon will be something in the hands of the members of all three intelligence services which will clear up this particular matter.

With best wishes,

Sincerely yours,

CONFIDENTIAL

U. S. S. SALT LAKE CITY

Marine Island, California,
February 9, 1941.

My Dear Admiral:

I think that you will be interested in a conversation which I had with Admiral Nomura yesterday. It lasted for more than an hour and we were alone the entire time in his room at the hotel. Having known him intimately and favorably over a long period we were in a position to speak frankly. I decided to arrange for such a conversation in order to determine if possible the purpose for which he was sent over here and to explore, if possible, the latitude which might be in his hands. As a result of the conversation I have formed the following impressions:

(1) That Japan regrets her partnership in the Asia and is greatly concerned over the China venture, therefore Admiral Nomura was sent here to determine the best bargain to be obtained. (A previous thought that he might be coming to "Rock us to sleep" while Japan proceeded to the northward, has been eliminated definitely).

(2) He will try to prevent an embargo on oil and other essentials now being obtained here, and will request reconsideration on those now under embargo.

(3) Japan definitely has decided that they cannot "conquer" China or exert sufficient control while Chiang Kai-shek maintains his present position and strength. They realize that their best way out is a peace. This will be attempted first by trying to dissuade him from further aid to China, thereby allowing the Wang Chin-wei group to gain control under Japanese direction. If this is impossible he will then explore the other possible means of bringing about peace in China.

(4) That hostilities between Japan and the U.S. can be avoided if he is given sufficient basis for an approach to the leaders in Japan. (I indicated to him that an immediate definite indication of sincerity by Japan would have to be forthcoming if our Government opened such an approach. When he asked "What for example" I replied "If I were asked, I would say 'Immediate cessation of all Japanese activities in China and French Indo-China'". He made no comment on this.

In the course of the conversation he made the following positive statements:

(1) That his mission was to prevent a resort to force between Japan and the U.S. in settling present disagreements.

(2) That Japan has completely changed her views with regard to China, and that peace is essential to both countries.

U. S. V. HALF LAXITY

(3) That if the U.S. is patient until Europe is settled then the Far Eastern situation will take care of itself. (This statement I took to be a feeler, therefore I resisted an impulse to ask him if impatience meant probability of force by us in the Far East). My reply was optimism over British prospects which prompted the question from him "Do you think it will be a long war?". My answer was negative and reason given was the effect upon the German people when they finally hear of U.S. aid to Britain.

(4) That the signing of the Axis pact was done only after a sharp division of opinion and with only a slight balance of influence in its favor. Now, the mistake is realized but as it is a "fait accompli" nothing can be done towards cancelling it. It must die a natural death. (The previous day a leading Japanese business representative in San Francisco referred to the signing of the pact by Japan as a grave mistake. When asked what could have brought this about he stated without hesitation and authoritatively that it was accomplished by bribery of officials with tremendous sums of money from Germany.

Details of Conversation

After the usual exchange of pleasantries I opened the conversation by indicating to the Admiral that I thought he had been given a most difficult task and asked him how he expected to handle it. He said "My hope is to prevent a resort to force in settling the difficulties existing between our two countries. I replied, "Of course you know that at least 65% of the American people are reconciled to any action as far as the Far East is concerned, and you yourself have often said that such a conflict would be a disastrous for Japan and entail great loss for the U.S. We have no desire to see Japan defeated and destroyed. He saved her in 1904, you will agree?" He answered in the affirmative, and I continued, "Well, we would like to save her again because the very same reasons exist today. The American people have long since learned that a strong Russia or a strong China means the end of Japan, in which case problems for us will come from other sources. I have always told the Japanese that we would go to war if our Commerce was blocked off, because that has been the cause of every war in which we have engaged. Now see what has happened to all foreign trade in Manchuria. What would happen in the rest of Asia?" At this he apologized for their extremists and I reminded him that they are the ones who bring on wars. I then said, "Admiral, one thing which the American people can't reconcile is why Japan, a country which has called continually for 'Equal Opportunity' could sign a pact with Germany which has done away with all opportunity and has the utmost contempt for all other nations?" He replied that there was a sharp division of opinion in

U. S. S. SAN FRANCISCO

During this conversation I made two references to my watch and the fact that he must have very affairs, in order to give him the opportunity to indicate a desire to break off, but each time he stressed that he had no engagements and wanted to continue talking.

Other parts of the conversation were devoted to the general state of ill feeling between the two countries which I indicated has been due mainly to the violation of the U.S. by the controlled press of Japan. Starting with the unfriendly feeling over the Portsmouth Treaty after the U.S. had forced Japan from defeat, it continued with every incident. Typical was that after the Immigration Bill, a purely economic expedient occasioned by the failure of immigrants far more to adhere to the existing standards thereby endangering the California farmers. Japan does not admit farmers.

I indicated that the public in New York were aware of the vast difference between the "pure" doctrine and the realistic doctrine. Also that the public does understand Japanese needs and the difficult situation with which she has been confronted in the East, however they do not understand and will not tolerate either in Europe or Asia any impositions on our commerce which restricts their freedom to go there and when they will.

In conclusion I told the Admiral that he had been quoted in the Press as having accepted this situation on the condition that while he was here the Japanese Government would not take any steps in the Far East which might embarrass him. He neither confirmed nor denied this. I then said that I hoped that it was true because if he put him in a very favorable light with the American public and they would wish him every success as I do.

Admiral Nomura is accompanied by Mr. Takasugi, an advisor. Takasugi was formerly Consul-General at San Francisco, and was not looked upon as a good advisor. Having had some occasion to observe him in 1931 I was not impressed with his ability. For a diplomat he was usually unapproachable, which gave the impression of assumed reticence to hide inferior qualities. It is believed that this will be only a general guide for Admiral Nomura, whose activities or conclusions will not be influenced by Mr. Takasugi.

Admiral Nomura was very appreciative of the attention which he received from Admiral Richardson while in Honolulu, and I am sure there will have a profound effect in Japan, in raising his prestige.

U. S. S. BALT LARK CITY

Admiral Richardson, who knew of my proposed conversation with Admiral Halsey, had expressed a desire to have any details I could give him on it. I am therefore sending a copy of this letter to Admiral Halsey.

With kindest regards and best wishes, I am

Sincerely,

H. M. ECHAMAS.

Admiral E. H. Stark, U. S. N.
Navy Department
Washington, D. C.

16 September, 1941.

My dear Admiral:

It is gratifying to see that there is possibility of resolving the Japanese situation, but we must not relax until we have given concrete demonstrations of sincerity.

I am writing particularly to invite attention to a matter which I consider most urgent and opportune in view of our present relations with the British. I am writing to you because I do not want Captain Kirk to feel that an "old timer" was trying to impose his views on a new arrival, and in this case I would want him to be most receptive.

I have tried unsuccessfully for years to get from the British mutually beneficial ideas, such as picture files of Japanese Naval officers, and, also, personal ideas on the British counter-espionage systems. With the new and present relationship all of this should be available to us. I am certain that no one has gone after the things I consider most important. I know that our Attache's and assistants do not have the ground work necessary to pursue these items. Counter-espionage is a profession in itself requiring schooling and voluminous reading, none of which our people have undertaken. I know of only a few officers qualified to undertake this work. The FBI sent two men to London for several weeks, but I dare say they spent most of their time at Scotland Yard on methods of investigation. Investigation and counter-espionage are as far apart as the poles; therefore, FBI, while excellent in their own field of investigation, will never be able to do our work for us, because counter-espionage and counter-fifth column activities are basic military operational functions.

I have in mind a man who is now working for the Commander-in-Chief, and has pleased him with results. This man I had ordered to Honolulu to help build up the organization in this most vital spot. When I arrived in Honolulu last November to take command of the SALT LANE CITY, I was asked to assist in a survey of the Intelligence Organization, and this resulted in radical changes in and additions to personnel, space, and equipment. With the training now instituted here, I am beginning to feel some of the security which we had in the 11th District. As soon as the necessary work now underway is well along, both ashore and afloat, this man should be available to make a trip to London. He is Lieutenant C. E. Congius (MC), and being a doctor his analytical abilities and

12

infinite energy will also bring his own broad knowledge of information on combat medicine and surgery. He is well known in O.N.I., having recently completely edited their Investigation Manual. Ross McIntyre, some time ago, advised us we could use him wherever necessary.

Of course I look forward to the day when I will be in the position to continue to work out the many ideas which I know to be vital to our Intelligence Organization. As you know, the Commander-in-Chief has expressed himself as to the lack of a sufficient and thoroughly effective Intelligence Organization. In the past it has been a difficult "selling" job, but I hope eventually to make our people, particularly the higher ranks, realize the important elements. Last June, while in Washington, Admiral Anderson asked me one day if I would be willing to sacrifice my career for intelligence. I replied, "Admiral, the time has come when if we don't think about sacrificing our careers, there won't be any to sacrifice". Of course, I am delighted with my ship and will soon have in half of my two years in grade, but if and when the situation demands my statement above still stands.

With kindest regards and best wishes, I am,

Sincerely yours,

ELLIS M. ZACHARIAS.

3270 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

November 13, 1941

1. "That is exactly right. If the officers of this fleet are going to withdraw from their present fog of indecision, it is going to be because someone in authority has put his foot down and forbidden wholesale experimentation at this critical time, and has said in effect 'A good plan well executed is better than the best plan poorly executed'. I am reminded of the eve of the battle, I think it was Trafalgar, when Nelson told his captains 'No man can be very wrong if he closes with an enemy ship and fights her bravely.'"
2. "Well, I am very glad to hear your opinion. I believe that you are probably correct. I am hoping that our present period of experimentation will soon be over and we will be substituting drills for experiment."

END.

MEMORANDUM FOR THE DISTRICT
District Intelligence Officer
Sixth Floor, 1001 Bishop
Honolulu, Hawaii

CONFIDENTIAL

CHC/be

December 5, 1941

MEMORANDUM FOR: The District Intelligence Officer.

Subject: Army M.O.A., Morale of.

1. Unsolicited information regarding the morale of local Army troops has come to the attention of the writer several times in the past two weeks. The nature of this information is such that it is difficult to determine to what authority it should be submitted. From the disclosures of these informants it is nevertheless self-evident that steps should be taken to correct the conditions now existing.

2. To begin with, our own informants who frequent places visited by Army and Navy enlisted men report that the experienced soldier of the regular Army is disgusted and baffled by the uniform coddling attitude which is shown the enlisted men of the new Army. This soft handling has resulted in greatly reduced discipline both for the regular, the volunteer, and the selectee. The newer additions to our Army have become aware of their immunity against disciplinary action and have taken full advantage of this immunity to an extent which enrages and disgusts all regular non-coms who have seen service prior to the present emergency. An example of this attitude is shown by often-repeated incidents in which a newly-enlisted private will push a sergeant out of the mess line in order to obtain his food out of turn. This is a far from rare act and is usually accompanied by some sarcastic remark as "Excuse me, Sergeant, this is the new Army." The non-commissioned officers have all learned to their chagrin that it is useless to place the enlisted man on report for infractions of the regulations because the officers, with few exceptions, support the offender, reprimand the petty officer and give a lecture upon the tenderness with which the enlisted man is to be handled. The few officers who are known to have made an attempt to inculcate proper discipline and to enforce this discipline by assigning punishments in accordance with the regulations and the traditions of the Army have been promptly removed from their positions by higher authority. Personnel of the Regular Army are confused and their morale is seriously injured by this lenient policy and they do not know what to expect in the future for such a policy.

3. The morale of the Army Air Force appears to be particularly poor. It is not known whether present conditions are due to the necessity for rapid expansion which is faced by the Air Force or whether insufficient care is used in the selection of new personnel. The situation is such, however, that many experienced Air Force non-commissioned officers and enlisted men attribute a large percentage

MEMORANDUM FOR: The Commander-in-Chief, U.S. Pacific Fleet
(continued):

- (3) Take appropriate action immediately on any intransigent or continually skeptical key officer who is unwilling to assume responsibility for positive action or recommendations.
- (4) Continue and speed up training in all the above specialists' jobs. (This war is going to require many replacements and we have too few already).
- (5) Give Commanding Officers afloat digest of pertinent intelligence activities with which they might be confronted or which might add to general plan (this should have been a comprehensive peace-time activity but it is not too late to correct).

7 January 1942.

Memorandum for the Commander-in-Chief, Pacific Fleet.

Subject: Interview with the Military Governor (General
Hammes) regarding reestablishment of Japanese
Language Newspapers in Hawaii.

In accordance with the directions of the Commander-in-Chief, Captain E. M. Zacharias, U.S.N., accompanied by Captain I. E. Mayfield, U.S.N., OIC 14th Naval District, called upon General Hammes to present the views of Captain Zacharias on the Japanese Language newspapers, with a view to establishing reasons sufficient to prevent resumption of the publication of these papers in Hawaii. After delivering the Commander-in-Chief's message, the General was advised of my background of twenty years connection with Naval Intelligence and status as a Japanese Language Officer, and the following statement was then made: "There is concrete evidence that Hawaiian newspapers in the past have been used for espionage purposes. There is concrete evidence that enemy agents are still at large in the Islands. There is concrete evidence that enemy transmissions of information have not been stopped. It is therefore firmly believed that unless the writing, editing, and printing of these Japanese papers is done by Caucasians, they can and will be used for transmission of information to the enemy".

The General then asked how such information is transmitted, which I explained as coded conversation, chosen words, advertisements, etc. He then said that this would be checked

carefully by his people to see that there were no derelictions. I explained that there were no translators whom he could obtain who would be sufficiently grounded in espionage technique to be able to pick up any such insertions. He then admitted that the work on the paper would be done by second generation Japanese. I then explained the influences and pressures that had been exerted on these people for many years and that with all the time that I have worked on them I am still to receive a single bit of information which we knew them to have and which any real American citizen would turn over to his government. (I forgot to tell him that this pressure extends to liquidation and is an effective method of the narcotic and gambling ring whom we know work with enemy agents and are used to keep people in line). I then asked the reasons for republication, which he explained was for morale purposes, stating that because of the large number of Japanese who cannot read English he thought that it would be a big morale factor for the population if they could get news in their native tongue. In addition he would be able to get to them refutation of claims that are made on the Tokyo broadcasts. I explained that this could be done just as well in the English newspapers and was certain that the second generation would keep their parents informed of everything appearing therein. Why should we be so solicitous about the alien Japanese? These are the ones who are our most dangerous suspects. We know that for years these people have had their assigned details.

At some point in the conversation the General made the

statement, "What is the use of stopping the newspapers when there are so many other sources of information open to them". (This supine acceptance of an intolerable condition is most amazing). I replied, "We should stop all of these sources and if we don't start somewhere we are not going to make any headway". He said, "We have no censorship of mail between the Islands and that is an easy method for the agents". I then said that if this is necessary, it should be done also. He then remarked that the mail was piling up tremendously now, which I advised was a good form of censorship in lieu of the other, provided it is held long enough.

The General then questioned the availability of Japanese agents and I had to say that he would find that there are at least six hundred and probably more key men still at large. The conversation then turned to the methods of picking them up which I assured him could and should be done. Upon asking how, I told him by a general round-up of all first generation (alien Japanese), all second generation who have been in Japan from early childhood, because they (the very dangerous group known as KIBEI) have been in touch with the younger elements in Japan who are the ultra chauvinists upon whom the Nazis have worked and it is they who have brought about the present situation; and finally all the second generation who have been continually in contact with visiting Japanese Dignitaries, Naval Officers, etc., all of whom should have been listed in the files. At this he expressed general inability to do such a job for several reasons; first, "We need these Japanese for labor, it is a different situation from the coast v

where there is a labor market. Then there is the problem of housing and feeding all of this large group if taken in, and we can't spare the lumber and materials and time to do this extensive work, if we are going to prepare for another attack. Our first job is to get all these ships out of the harbor before another attack comes". I then emphasized that the one way to bring the Japanese back for another attack was let their agents have freedom of movement to get information out, because they will have sufficient exact data necessary to operate as they did before. We should create the impression of being fully prepared and of welcoming a return. The General, perturbed replied, "Oh no, we wouldn't welcome a return".

The General then said that he was not worried about information getting out but was more concerned with the sabotage that might take place at the time that an attack is to be made. I then explained that the sabotage threat did not exist in Hawaii because they did not have any access to industrial activities, utilities, etc., as they did on the West Coast, except the one power plant here which was not vital, and the dock facilities. I then outlined the vulnerability of the West Coast and the steps I had taken in July, 1940 in Washington to put into effect concrete plans utilizing all existing governmental agencies for a general round-up before their efforts could be successful. He then insisted that his communications here were vulnerable although strategic points were under guard.

He reaffirmed again the necessity for the Army preparing to repel attack, to which I replied that the first step in such a move is to deny information to the enemy and if we hope to keep them from coming back we had better take in all of their agents. He expressed belief that FBI and MID were doing all they could and I had to say it is obvious that what had been done is not enough. Incidentally, I was the one who tried over a period of two years to have M.I.D. implemented by giving Colonel Oldfield (G2-9th Corps Area) ammunition for letters to Washington. Nothing would be done until M day. I was the one who gave F.B.I. its start from the Eleventh Naval District. I know exactly what both agencies have and their capabilities. He then asked what more could be done. I replied it is absolutely necessary to round up every Japanese of any generation to whom any suspicion attaches. Those few already in custody are only the ones on whom concrete evidence is in the files. The other can be apprehended and must be.

We then made moves to break off the conversation at which time the General made the statement, "I am not going to stop the newspapers unless it can be proved to me that they are being used for espionage purposes. I have the dual responsibility here of preparing the defenses and of keeping up the morale of the people. I replied, "The morale will be of little consideration if we allow them to originate a belief that we are displaying signs of weakness, and from my knowledge of them I can say definitely that republication of these newspapers will be so viewed. And if we

let them know that we have any fears, or are relaxing in our vigilance and do not take the proper steps to curb the activities of their agents, we are encouraging them to come back.

He reiterated his decision to let the papers go to press, until it can be proved further that they are being used for espionage purposes.

I stated that we would make that attempt. This, he indicated he would be glad to have us do. It is therefore assumed that our Intelligence service is authorized to obtain from the Army all data regarding the methods of handling those publications and to cover all individuals connected therewith.

Conclusions

It is my considered opinion that the sole consideration of the Army is devotion to the effort of building their defenses so that they will be able to defend Oahu from an attack in force by the enemy Fleet with enemy air support from one of the other islands upon which the enemy will be able to establish a base.

It is further considered that in formulating their plans, there has been no consideration whatever of the psychological factors and characteristics of the Japanese.

There is no consideration is being given to the possibility of preventing such an attack by denying information to the enemy, which fact allowed them to work with such complete accuracy in the previous attack.

That the above situation is an extremely dangerous one for the Navy and that immediate action should be taken to remove every element of such danger. It can be done and must be done.

There is definitely a lack of any thought of the Fleet and its protection. They are thinking only in terms of combat defense.

Recommendations.

It is recommended that the Commander-in-Chief as Senior Officer Present prevail to prohibit the publication of these Japanese newspapers, and that he take necessary steps to obtain coordinated and cooperative effort on the part of all governmental agencies in the area, in order to remove the menaces noted above.

Respectfully,

E. M. ZACHARIAS
Captain, U.S. Navy.

CONFIDENTIAL

Facts concerning the reopening of the Japanese Language Newspapers.

If it is proposed to resume the publications mentioned, Nippu Ji Ji, and Hawaii Hochi, it is most important to know who will write, edit and supervise the material which will appear therein. If it is planned to use the editorial staffs which managed the papers previously, the whole proposal may be regarded simply as a very dangerous experiment. Both of these papers have always been strongly pro-Japanese, and frequently anti-American. The sentiments of the staffs cannot be expected to change overnight, or by request. Having for many years been absorbed in the furthering of Japanese ambitions, we may expect these people to seize every opportunity to turn the new publications to the advantage of Japan. This can best be done by using the newspaper as a secret means of informing local fifth columnists of intended plans. Announcements of this sort are now impossible, except by telephone. The resumption of newspaper publishing will give the enemy a means of widespread signaling. This will be almost impossible to detect --- the whole story may be told in a misplaced comma or a misspelled word.

Any person who scoffs at the above idea as fantastic, obviously knows nothing whatever about either German or Japanese espionage practices. The idea is being used at the present moment in every city in Europe; it is years old and is standard practice in every Intelligence organization.

Let us consider for a moment who are the persons now in charge of the two newspapers under consideration -- who have not been placed in detention: On the Nippu Ji Ji, we have the son of the owner. The owner himself, Yasutaro Soga, is under detention because of both espionage and propaganda activities. The elder Soga was a member of the advisory council of five which met with the Japanese Consul in affairs of the Japanese State. His newspaper has for many years been violently pro-Japanese and frequently openly anti-American.

The son, Shigeo Soga, was born in Hawaii, educated on the mainland, "traveled" in Japan. He has been completely in his father's confidence in matters concerning Japan, and has represented his father's newspaper in important matters for several years. To our undercover informants, he has revealed his real pro-Japanese feelings on many occasions. To entrust this man with the resumption of publication would be extremely dangerous. However, much the same situation exists with regard to the rest of the staff. None of them can be trusted, in the light of past experience.

In the case of the Hawaii Hochi, the editor is an Eurasian named Makino. He is the son of an Englishman named Higginbottom and a Yokohama girl named Makino. He took his mother's name, and is now known as Fred Makino. More than ten years ago this man led the Japanese people in a court action instituted against a bill introduced in the Territorial Legislature for the control of foreign language schools. Makino is known as a violent and previously outspoken pro-Japanese, formerly a leader in Territorial labor movements.

57

CONFIDENTIAL

He and his agents have identified and shadowed our own counter-espionage agents on some occasions. It is hoped that neither he nor any member of his staff is seriously considered as proper supervisors of a Japanese paper in war-time.

It is freely admitted that it is desirable to print information for dissemination among the local Japanese which will counteract the Japanese propaganda -- but such a project cannot be safely carried out unless the publication from top to bottom is staffed by dependable persons, who must be Caucasians.

There is no reason whatever why the refutation of such propaganda from Japan cannot be effected in the English newspapers and broadcasts all of which are used by the second generation, who are the ones we are trying to reach. The alien Japanese should not be a consideration.

Another consideration must be recognized. That is the feeling of the local Filipinos. If the Japanese newspapers are printed and distributed, they, being unable to read and judge for themselves the contents, are bound to be very seriously disturbed about it. We know very definitely that they are already very much agitated and it can be said without hesitation that we cannot, for the sake of local peace and harmony, afford to further disturb their confidence in the Government. Race riots are a definite possibility from this source and this warning should be recorded.

Mr. Ryan

Danger in Resuming of Publication
for Hockei and Nippu

We presume that these two Japanese newspapers will resume publication under the strict censorship of the Military Government, but we must consider of some dangers will be caused by the publication in the Japanese language.

1. It will give a greater encouragement to the older Japanese aliens who are now very optimistic over the war situation in Manila.
2. It will help to build the morale for Japanese victory upon the minds of the younger Japanese (or American citizens) who are under absolute control of their parents.
3. It will give a greater chance to the enemy (Japanese) agents in using these papers for conveying their ideas of secret activities in the plain language (using slang, proverbs and poems).

27 January, 1942.

From: Captain Ellis M. Zacharias, U.S. Navy.
To : The Chief of Naval Operations.
Via : The Commander-in-Chief, U.S. Pacific Fleet.
Subject: Security indoctrination, necessity for.
Enclosure: (A) Intelligence Bibliography for Naval Officers.

1. One of the principal difficulties encountered in establishing a really effective security program in the Navy arises from a basic lack of appreciation by many naval officers of the vital necessity therefor. Even in the higher ranks, despite accumulated experience of years, there have been instances of surprising obtuseness and regrettable lack of appreciation of the scope and importance of Intelligence work. In some instances officers have gone so far as actively to oppose necessary security measures apparently feeling that such measures reflect both upon the integrity of their men and constitute unwarranted restrictions upon their own freedom of movement and expression. In others the simplest and most elementary efforts to safeguard the establishment against penetration by foreign agents and subversive elements have been largely nullified by the apathetic or skeptical attitude of responsible officers.

2. The foregoing is especially true of shore establishments and yet, in general, these stations offer greater opportunity for espionage and sabotage with less chance of detection than any other portion of the naval establishment. The technical excellence of our material, our progressive design policy and our acknowledged world leadership in Naval Aviation, all offer rich rewards to the foreign espionage agent. Many of our shore establishments by reason of construction and grouping of buildings and other equipment offer rich prizes to the saboteur.

3. Having been a nation more or less insulated in the past from the intrigue and espionage of Europe and the Orient, we appear to have developed a rather widespread belief that the spy and the saboteur are creatures confined largely to those areas and are existent in this country chiefly on the silver screen or in the sensational magazine. That this blissful state of affairs does not, in fact, exist is becoming increasingly apparent as is also the fact that the Navy as a whole and its officers in particular must be indoctrinated with a sound appreciation of the

U. S. S.

File No.
0423/AS

Subject: Security Indoctrination, necessity for.

vital importance of Intelligence and an intelligent grasp of its scope and methods. In view of the unfortunate lack of any such program of indoctrination at the Naval Academy, the Postgraduate School, or in the service, such indoctrination and training must, in a large measure, come through aroused interest, reading and study by the individual officers themselves.

4. That this situation exists cannot be doubted by anyone who has taken part in the informal group discussions held in the wardroom after or the officers' clubs ashore. Logically it must follow that, as the result of this widespread feeling, the Navy offers an easy field of activity for the enemy agent. It is known that this is the reputation which we enjoy abroad. It is so easy to obtain information here that to do so can hardly be regarded as a noteworthy feat.

5. The need for proper indoctrination of personnel is considered acute. It is well realized that they must acquire this indoctrination under their own power. To attempt to drive or force them to security efforts will only succeed in alienating them and thus placing the security program further than ever from accomplishment. Therefore, they must be lead and instructed in such a manner that they will not be aware of forces tending to direct and change their opinions.

6. It is believed that the best way to accomplish this end is to direct their thoughts into the proper channels by means of reading matter placed at their disposal. If the majority of officers can be induced to read of espionage matters, they would indoctrinate themselves and their former ill-founded convictions would disappear.

7. As a means of arousing interest in this vital subject on the part of the average officer, the appended list of books relating thereto has been prepared. These are entirely of the non-fiction variety and include the best in the field. They are arranged generally in the order of recommended priority. Reviews of the more important ones are included.

8. It is believed that this list provides the basis for a concrete and logical course of reading and study in this important field. It is therefore urgently recommended that it be

printed or mimeographed and given wide distribution ashore and
afloat and that, insofar as possible, the books listed be supplied
to the appropriate activities. If necessary to obtain reprints of
those now out of print, this should be done at the earliest
opportunity and in sufficient quantity to provide several copies
for each ship and shore station. If necessary, to reduce
expense and save time, these books should be reproduced in paper
cover form by any one of the many publishing houses who do such
reprint work.

9. The enclosure was prepared by an officer of the Navy
who has worked continually and in conjunction with the writer, but
for certain reasons his name is withheld at this time, but it is
largely through his efforts that this excellent compilation has
been made. Proper recognition has and will be made for his work.

From: Captain Ellis M. Zacharias, U.S. Navy.
To: The Chief of Naval Operations.
Via: The Commander-in-Chief, U.S. Pacific Fleet.
Subject: Selection of Officers for Intelligence Duty.

1. The following letter, prepared more than a year ago was withheld awaiting more favorable circumstances which would ensure attention. Under the present circumstances it is felt that it should be forwarded immediately:-

The greatest single weakness of our Naval Intelligence today lies in the fact that our officers are selected for reasons other than special fitness for this kind of work. For many years officers throughout the Navy have been assigned to Intelligence work for trivial or irrelevant reasons and with little regard for the aptitude or personal qualifications of the officer concerned. They have been given Intelligence work as collateral duty because they have had little else to do. Until quite recently they have been inducted as Naval Attaches largely because they were socially inclined. Some have been recruited because they were of foreign extraction or could speak, sometimes haltingly, in a foreign tongue. Some owe their assignment to fortuitous circumstances or their own curiosity and interest.

In consequence of this policy, Naval Intelligence, already inferior in numbers and financial support, when compared with similar organizations abroad, has become inferior in quality as well.

A brief consideration of other Intelligence services reveals the marked contrast which exists at the present time, and goes far to explain the causes underlying our inferiority.

The Intelligence services in other countries is regarded generally as a career which demands the highest individual qualifications, and whose members deserve and receive the most careful and intensive training. The foreign conception of the Intelligence branch is that it serves as the eyes, ears and memory of the fighting forces, and that, for this important duty, the best men are none too good.

In selecting agents, foreign governments comb their entire services for candidates who can meet the highest standards of

File No.

Subject: Selection of Officers for Intelligence Duty.

character and aptitude and who give promise of profiting from a program of strenuous training. In at least six foreign countries the chosen agent is sent to school for periods of two to four years and the successful graduates are returned to these schools at intervals throughout their careers. As a student he is trained to observe, to remember, to classify and to evaluate. He studies the arms, equipment, uniforms, organization, history, geography, language, plans and policy of the countries with which he is to match wits. And he, in turn, is studied by older Intelligence officers to determine his special qualifications and how they may best be utilized. After finishing his courses in general Intelligence the officer begins to specialize, and, in two of the world's first class powers today, this specialization has been carried to the point where he may be assigned to espionage or counter-espionage against one potential enemy only. The officer remains in this section for a long period of years or for his entire career, constantly perfecting his knowledge of the enemy.

It is easy to realize, when we compare our own haphazard and casual selection of intelligence officers with the realistic and efficient methods employed abroad, that, in this endless battle of wits which we are fighting in peace and in war, we find ourselves practically helpless against the overwhelming odds imposed by the superior numbers and training of our opponents. When the American Intelligence officer, selected almost at random, and without training worthy of the name, pits himself against the elite of other services he is badly outmatched, and the resulting struggle must be called, in many instances "no contest."

What is to blame for the present situation? Probably many contributing factors are involved. This country, enjoying geographical isolation from other great powers and relatively long periods of peace, has been lulled by our wealth and growing power into a false sense of security no longer justified in the light of world events. This "Pool's Paradise" is shared by large proportions of our ranking officers, few, if any, of whom have ever received intelligence training in their long, peaceful careers. Yet now, when world tension increases and espionage is carried on wholesale, we must depend upon these officers to initiate a policy of realism for which their experience so inadequately prepares them. Ranking officers belittle the thought of spies or the suggestion of dangerous sabotage from within, they

File No.
CA25 AS

(10-rae)

Subject: Selection of Officers for Intelligence Duty.

laugh at the possibility of subversive threats to our morale, they have spoken disparagingly of the Intelligence service, regard Intelligence officers as mere embellishments of the service, and resent and even combat efforts aimed at effecting security. Meanwhile foreign agents throng to our shores, the Spy's Happy Hunting Ground, and steal and buy military and naval secrets out from under the noses of these same officers. Two of our latest cruisers had spies working aboard during construction and during trial runs without being apprehended. They were even allowed to take blueprints home with them at night. Not a single spy has been caught in this country in the last fifteen years as a result of forthright and efficient counter-espionage work. The few who have been apprehended fell victim to purely accidental and unfortunate circumstances and blunders.

Therefore, the writer regards our first great need as proper indoctrination of all officers, particularly those in command.

The second great need is for training of Intelligence officers. This should be begun by a general course given in the line P.G. school. It should comprise no less than one hundred hours of instruction. This course would achieve two worthwhile purposes. First, it would indoctrinate all officers in a subject scarcely less important than any other technical subject, and second, it would serve as a basis course from which to select young officers who are qualified for advanced study and careers in which assignment as Intelligence officers would play an important part.

The present futile gestures in the direction of training for Intelligence must be converted into a real effort. A long list of courses of instruction exists at present merely on paper, and serves only to mislead those concerned with our efficiency in this branch. The "building" of an efficient Intelligence officer requires more time than the construction of a battleship and, as a common sense precaution, cannot be delayed until flashes of gunfire are seen on the horizon.

Subject: Selection of Officers for Intelligence Duty.

The Standards of a Good Intelligence Officer

*Intelligence
Curriculum*

The officer selected for Intelligence duty must have special personal and temperamental qualifications to be successful in that duty. He must possess a mental alertness which will enable him to cope with agile and clever opposition, fortified by ample financial resources. He must be imaginative enough to visualize the possible plans of enemy agents and at the same time be sufficiently analytical to properly evaluate the information which comes to him. There must be in his natural or acquired make-up a certain amount of suspicion and disbelief. He must be mentally aggressive and possess the initiative required to plan effective operations. He should be discreet and not garrulous, and should understand human nature, its strength and its weaknesses. Additionally, he should be willing to hazard his own personal standards of conduct in the accomplishment of an important objective contributing to the national welfare in time of war.

He must be realistic. He must have the ability to see things as they are, and to have the courage to bring them to the notice of his superior.

The orthodox and conservative type of naval officer is designed by training and indoctrination not to be an Intelligence officer. For this reason the selection of personnel from the Navy for this type of duty should be made early in the officer's career so that he may be trained in the stratagems of this important branch of the service.

2. It is recommended that this letter be given wide distribution among the officers of the Fleet as coming from the Commander-in-Chief, in order to promote a general interest in this subject and encourage reading and study of books related thereto. A selected list of such books has been forwarded this date to the Chief of Naval Operations.

E. M. ZACHARIAS.

PERSONAL AND CONFIDENTIAL

March 17, 1942.

Memorandum for Admiral Dannel

In accordance with your request after our conversation this morning, the following memo is submitted:-

My conversation with you is impelled from a sense of duty because of what I consider a serious situation existing in Hawaii. Once before, in such a situation, I gave concrete opinions and advice which apparently could not break through preconceived ideas. History was about to repeat itself and no one would believe it. I have no personal ambitions or desires regarding the subject matter other than assuring that we have a safe and well protected base for our Fleet, which is the sole reason for the existence of Hawaii. It has been my attitude that it makes no difference who does a job as long as it is done efficiently and thoroughly.

Any criticism direct or implied is offered solely from a constructive viewpoint and is for the purpose of preventing in the future a recurrence of a disaster such as that of 7 December.

Only a few people know that I had cautioned Admiral Kimmel and Captain Smith, during the course of an hour and a half conversation with them, of the exact events to take place on 7 December, not only as to what would happen, but also how and when. My only error was that the Japanese were after four battleships and they got five. I also gave them the reasons for my conclusions and advised them of the steps necessary to prevent such an attack. From time to time, in contact with the Staff, I would voice possibilities and only two months before the attack amazed at unrealistic attitudes I said, "When are we going to stop these surprise inspections and prepare for surprise attack". About that same time Mr. Munson, a representative from Washington, (believed to be a Presidential agent) carrying a letter from Opnav to "open everything to him", sought me for an expression of views on probabilities and my opinion as to what action should be taken with the Japanese here and on the West Coast. After outlining to him my firm conviction that if Japan decided to go to war with us it would open by an air attack on Pearl Harbor, on a weekend and probably Sunday morning, with all the reasons therefor, and I then stated, "You now have two envoys in Washington. When the third one arrives you can look for it to break immediately, one way or the other". This envoy arrived in Washington about 2 December 1941

PERSONAL AND CONFIDENTIAL

On the night of 27 November, after dinner with Lorrin Thurston, Head of the Honolulu Advertiser and KGU, I related the impending possibilities as above and he said, "Here I am a C-2 Officer and I haven't even been advised what to send out over the radio in case of an attack". I advised him precisely to say, "We are having a sporadic air attack, everyone should keep calm and remain indoors. Do not go on the streets as it will prevent the military from getting to their stations. There is nothing to worry about". On 28 November I sailed with Task Force 8 for Wake Island. Upon receipt of CincPac's despatch on 7 December, "The Islands are being attacked this is no drill", I turned on my radio and KGU was sending out my exact words. At least someone believed it. This was probably made certain by the press announcement about 3 December that the Ambassador to Peru had arrived in Washington as a third envoy. Seeing this, Mrs Thurston reminded her husband and they were alerted.

On Friday, 5 December, having received a report of a submarine off Oahu - one of the things I gave Admiral Kimmel as a positive indication of intention to attack - I listened all evening on short wave for Japanese conversation. All was garbled conversation but the intensity of the acknowledgments (typically Japanese) indicated to me that something was imminent. I tried to obtain a single word which would justify me in requesting ComTaskFor 8 to advise CincPac, but nothing could be made out. I knew what the reaction would be to a recommendation from this air and I assumed that proper warnings would be coming from Washington.

I have made it a point when afloat to give my advice to Intelligence activities both ashore and afloat and when necessary even to the point of "butting in". I had tried for years to have detailed a Fleet Intelligence Officer who was not tied up as Flag Secretary or on other jobs. Finally two years ago Commander Dyer advised me that Cincus was going to have a Fleet Intelligence Officer. I recommended Lt-Commander Layton, who has consistently done a splendid job in an office where there should have been twenty officers instead of two. Early in November I was about to see Captain Smith and advise that he get some help for Layton and Hudson as they were both worn down and appeared ready to crack up. But I hesitated, wondering why should I have to advise Cincus on the adequacy of his force. It should have been obvious to any Commander that Intelligence at such a time was his most vital issue. I decided not to approach Smith, because I found that Intelligence was not receiving its proper recognition.

PERSONAL AND CONFIDENTIAL

One of the contributing factors to 7 December was the reluctance of Admiral Kimmel to assume his prerogatives and tell the Commandant to carry out directives or some one else would be obtained to do the job. The possibilities of an unpleasant situation should have been readily apparent to the Department when a former Commander-in-Chief is put under a younger man. Petty jealousies are bound to be present and these grow into opposition. A typical indication was one incident which I observed closely. When I arrived in Honolulu in November, 1940 to take command of the Salt Lake City I was asked to assist in a survey of the District Intelligence Office which was initiated by the Commander-in-Chief. It was learned then that recommendations had been blocked and that the office was of little value.

This survey included immediate and extensive recommendations, including trained personnel to be taken from my old 11th District to build up the 14th as quickly as possible.

The next day, after telling Admiral Bloch the security we enjoyed in the 11th and indicating the complete lack here he approved all steps to remedy the situation. Accordingly, the personnel arrived and expansion, planning and training were rapid. During the course of a subsequent survey to outline faults in the District, the report or digest was brought to the attention of Admiral Bloch. This survey was made by an officer who was working for the Commander-in-Chief and also helping the District. At the sight of this critical survey coming from the Commander-in-Chief, Admiral Bloch gave vent to his wrath and Intelligence activities suffered for quite a time.

The skepticism of the Commandant regarding necessity for security was also typical from a remark once made during security efforts, "Bring me a Japanese spy. I've never seen one and would like to see one". His yard was full of them.

On 16 September, 1941, in a letter to Admiral Stark, I stated, "It is gratifying to see that there is a possibility of resolving the Japanese situation, but we must not relax until they have given concrete demonstrations of sincerity".

All of the foregoing is simply to indicate the possibility of qualified personnel accurately estimating the situation, and the distressing fact that nothing was done about it.

I am now concerned because of another situation which is growing in seriousness and proportions. Rumors are increasing and I find not only the morale of civilians falling lower and lower but also that of Naval Officers. This is a typical

PERSONAL AND CONFIDENTIAL

fifth column technique and it must be stopped. It not only softens up our own people but it is throwing the second generation Japanese into the laps of enemy agents, many of whom are still not in custody. I used to be most optimistic about the Japanese never returning here for another raid, but the persistence of the present situation, which they will learn about soon enough, will be an invitation to them to return. This situation can be corrected somewhat by strong "offensive" pronouncements but not by "defensive" ones, and by punitive action against rumor mongers. I found one woman frantically engaging passage because an Army man told her how terrible the gas attack would be when it came. Someone is spreading a rumor that there is to be a Japanese Fleet attack on April 14th. I am now trying to trace the source of some rumors. Rumors are sometimes started to enhance the position of an individual or organization.

Apparently, on the West Coast they are undecided how to handle the Japanese situation. Here, where it is much more difficult, I find that little or nothing is being done. Make no mistake about it, the proper handling of this situation requires two qualifications: first, highly professional intelligence activities, and second, a thorough knowledge of the Japanese people. The Army in Hawaii has no one qualified to handle either. I know what they have and what they are capable of doing. It makes no difference who does the job as long as it is done efficiently and thoroughly. But I venture to make the flat statement that little or no results have been received on cases turned over to them by the 14th Naval District. I find that the numerous Japanese amateur operators have only been admonished by letter only not to operate. Adequate searches have not been made. Known suspects have not been taken into custody. Strategic locations are still endangered by the presence of enemy aliens. The problem can be solved in forty-five days by qualified personnel and intelligent action.

In my long interview with General Simons, I was impressed with his incompetence. He appeared to have no thoughts of his own. He gave as the reason for continuing the Japanese newspapers that they were necessary for the morale of the enemy aliens. At the same time, the Army has assembled all the second generation Japanese into one battalion of the Territorial Guard and have disbanded it. The selectees have been disarmed and put into labor battalions. This action will have the effect of sending these

PERSONAL AND CONFIDENTIAL

boys slinking home and into the laps of enemy agents. It is most serious. There are sensible solutions to all these problems which certain of us have worked out, but it is inadvisable to let incompetent hands take on pre-prejudiced solutions.

After my interview with General Bevens, I searched for the reasons for what seemed like an undue influence upon him. Yesterday I think I discovered the answer. I was told that one of his principal advisors on Island and Japanese matters is General Wells, a highly paid official, of one of the large local industries whose objectives are still "maintenance of the status quo".

At the present time the Army is endeavoring to take over control of the Intelligence Organization in Hawaii. Under those conditions the Commander-in-Chief would be bring his own hands voluntarily. Their past and present training and performances in no way qualifies them for the work. I know their capabilities and what they have because it was I who for many years, tried to have them implemented on the West Coast, but the War Department invariably replied, "No action will be taken until W day". As a result they "had not a single trained Intelligence man with which to start an organization". The quotations are from General Miles, the head of G-2.

The Naval Intelligence Organization of the 14th District has been built up and trained through the intensive effort of two excellent officers with years of experience behind them. Through their knowledge, excellent personnel have been enrolled and trained and I am safe in saying that in spite of obstructions which should have been help, this organization is so far superior to the Army and N.B.I. for Intelligence work that there is no comparison.

Conclusion

Hawaii, as a defense outpost of the United States, is of value solely as a safe base for the Fleet. The protection of it provides the only excuse for the existence of the Army. An offensive attitude is a requisite to that defense. This offensive attitude does not exist. Under the present state of administration, the influences at work, and the degenerating morale, I cannot escape the feeling that unless firm action is taken we are approaching a situation which might result in something worse than that of 7 December. (It has always been my considered opinion for a long time that because of the racial situation the Hawaiian Islands will eventually require a military government. Its purposes dictate that it should be a Naval military government, therefore now is the time to start it.)

PERSONAL AND CONFIDENTIALRecommendation

That the Commander-in-Chief, as Military Commander, exercise his function as Military Governor and take command of all activities that the administration of martial law be delegated to a Deputy, as at present, if such administration has been satisfactory, and that the Intelligence Organization be centered under the Commander-in-Chief, in order to insure the security of the Fleet and the Fleet Base.

That power of arrest be extended to special agents of the Naval Intelligence Organization. (The most vitally interested agency but the only government agency not having the power.)

That the security of the Naval District and the Navy Yard be incorporated under a competent head (The present security officer, Victor Houston, was recently removed from the Police Commission and it is inconceivable that he should be in a position to hamper Naval security.

E. M. LICHARIAS.

46

"The American Commander-in-Chief has been occupied by various secret plans but the three points which he is the most concerned are:

- (1) Will a Japanese fast STRIKING FORCE made up of cruisers and aircraft carriers come on a scouting or striking mission?
- (2) Will Japanese submarines hover near the Islands to attack or harass the Fleet?
- (3) Will a Japanese Expeditionary force be sent overseas?

The first of these is the most fearsome. Suppose Japan were to form a fast striking force composed of such speedy battleships (whose speed America cannot match) as the HARUNA, KONGO and KIRISHIMA, the aircraft carriers AKAGI and KATUJO, and the WACHI class of heavy cruisers? This would be a fast-stepping force that would be truly matchless and invincible!! Were they opposed to even the large guns of American battleships, they could utilize their superior speeds, thus leaving their slow adversaries behind. If opposed to a cruiser force they could close in and with telling blows crush the opposition. Truly, this would be a peerless force; able to close to battle, or open out, if out gunned! If this Fast Striking Force should meet misfortune, losing one or two fast battleships or aircraft carriers, they would surely be a severe blow to Japan and we would have to grit our teeth, smothering our rage until the day of a decisive Main Engagement to obtain our revenge!

Maybe such a bold venture would be too great a risk, who can say? On the other hand, warfare is a risk and he who hesitates, or fears the risks of bold venture, cannot wage war! Moreover, an attack off Hawaii would be the first battle of the Pacific War and if in the very first engagement one can wrest the courage away from the enemy by ones own daring, it would put him in a funk or give him the jitters." ---

Excerpt from "WHEN JAPAN FIGHTS" by Mr. Naomaku Hirata.

Washington, D. C.
July 10, 1942

I have read the Personal and Confidential report of Captain E. A. Zacharias, U.S.N., as a memorandum for Admiral Doolittle, dated March 17, 1942, and desire to state that the remarks relating to me and the outline given to me as indicated therein is exact and correct in detail.

In addition he suggested that the attack would conform to their historical procedure, that of hitting before war was declared.

Arthur B. Kunson

Pertinent extracts from above report:

"About that same time Mr. Kunson, a representative from Washington, (believed to be a Presidential agent) carrying a letter from Opnav to 'open everything to him', sought me for an expression of views on probabilities and my opinion as to what action should be taken with the Japanese here and on the West Coast. After outlining to him my firm conviction that if Japan decided to go to war with us it would open by an air attack on Pearl Harbor, on a weekend and probably Sunday morning, with all the reasons therefor, and I then stated, 'you now have two envoys in Washington. When the third one arrives you can look for it to break immediately, one way or the other'. This envoy arrived in Washington about 2 December 1941."

1 (a)

Regarding the broadcast of a special message in an emergency.

In case of emergency (danger of cutting off our diplomatic relations), and the cutting off of international communications, the following warning will be added in the middle of the daily Japanese language short wave news broadcast.

- (1) In case of a Japan-U. S. relations in danger: HIGASHI NO KAZEAME.¹
- (2) Japan-U. S. S. R. relations: KITANOKAZE KUMORI²
- (3) Japan-British relations: NISHI NO KAZE HARE.³

¹ East wind rain.

² North wind cloudy.

³ West wind clear.

This signal will be given in the middle and at the end as a weather forecast and each sentence will be repeated twice. When this is heard please destroy all code papers, etc. This is as yet to be a completely secret arrangement.

Forward as urgent intelligence.

UNITED STATES OF AMERICA,
FEDERAL COMMUNICATIONS COMMISSION,
Washington, D. C., August 18, 1944.

I hereby certify that the attached are true copies of documents described as follows:

Document No. 1 is a true copy of the weather messages which Major Wesley T. Guest (now Colonel), U. S. Army Signal Corps, requested the Commission's monitors to be on the lookout for in Tokyo broadcasts and to advise Colonel Bratton, Army Military Intelligence, if any such message was intercepted. This request was made on November 28, 1941 at approximately 2140 GMT.

Document No. 2 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at approximately 2200 GMT, December 4, 1941, which at 9:05 p. m. EST, December 4, 1941, having been unable to contact Colonel Bratton's office, was telephoned to Lieutenant Brotherhood, 20-G, Watch Officer, Navy Department, who stated that he was authorized to accept messages of interest to Colonel Bratton's office.

Document No. 3 is a true copy of a weather message from Tokyo station JYW3, intercepted by Commission monitors at 2130 GMT, December 5, 1941, which was telephoned to Colonel Bratton at his residence at 7:50 p. m. EST, December 5, 1941.

Document No. 4 is a true copy of two weather messages intercepted by Commission monitors from Tokyo stations JLG 4 and JZJ between 0002 and 0035 GMT, December 8, 1941, and telephoned to Lt. Colonel C. C. Dusenbury, U. S. Army Service Corps, at the request of Colonel Bratton's office at approximately 8 p. m. EST, December 7, 1941. Document No. 4 also contains the Romaji version of these messages.

on file in this Commission, and that I am the proper custodian of the same.

In witness whereof, I have hereunto set my hand, and caused the seal of the Federal Communications Commission to be affixed, this twenty-first day of August, 1944.

DEPARTMENT OF STATE,
Washington, December 6, 1945.

DEAR MR. MITCHELL: In compliance with your request of December 3, 1945, I enclose a paraphrase of our cable of November 6, 1945 to London, the Hague and Canberra inquiring about the "winds" message.

My letter of yesterday advised you of the answers we have received from London and the Hague.

Sincerely yours,

/s/ Herbert S. Marks,
/t/ HERBERT S. MARKS,
Assistant to the Under Secretary.

Enclosure:

Paraphrased cable.

The Honorable WILLIAM D. MITCHELL, General Counsel,
Joint Committee on the Investigation
of the Pearl Harbor Attack,
Congress of the United States.

30 OCTOBER 1945.

GSB 168

From: War Department

To: Commander-in-Chief, Advance Hq. US Army Forces, Pacific, Tokyo

On 19 Nov 1941 Japanese Foreign Office advised its representatives abroad that in case diplomatic relations with United States, Great Britain or Russia were about to be severed a certain signal in form of false weather report would be broadcast in news message and that all code papers were then to be destroyed. Signal was to be "Higashi No Kaze Ame" (east wind rain) in case of break between Japan and United States, "Kitano Kaze Kumori" (north wind cloudy) in case of break between Japan and Russia and "Nishi No Kaze Hare" (west wind clear) in case of break between Japan and Great Britain. Congressional committee investigating Pearl Harbor attack has requested that Japanese records and authorities be examined to ascertain whether any signal implementing this or any similar code was in fact transmitted on or prior to 7 Dec and if so exact time and manner or transmittal. Inconclusive evidence available here suggests such signal may have been transmitted on or about 4 Dec. Request that all reasonable steps be taken to obtain such information and that this request and resulting information receive no publicity.

3 NOVEMBER 1945.

BSG 187

From: Commander-in-Chief, Advance Hq. US Army Forces, Pacific, Tokyo

To: War Department

GSB 168 dated 31 Oct investigation has been initiated and results thereof will be communicated at the earliest practicable date. Progress in work of this kind is of necessity somewhat slow. However, every effort will be made to expedite it. Necessary steps have been taken to avoid publicity.

GSB 180

6 NOVEMBER 1941.

From: War Department.

To: Commander-in-Chief, Advance Hq. US Army Forces, Pacific, Tokyo.

Supplementing GSB 168 there follows full Japanese text of two circulars from Tokyo Foreign Office dated 19 Nov 1941:

Both messages sent in -----¹ Believe broadcasts mentioned for signalling in circular 2353 were voice broadcasts and those in 2354 were Morse code.

¹ Code designation omitted.

BSG 196 13 NOVEMBER 1945.
From: Commander-in-Chief, Advance Hq. US Army Forces Pacific, Tokyo.
To: War Department.

Reference message 1 November requiring search of Jap records and interrogation of authorities to ascertain whether an implementing signal to circulars 2353 and 2354 (see GSB 180) Tokyo Foreign Office 19 November 1941 was ever transmitted. Investigation discloses that all pertinent records were burned prior to emperor's rescript of 14 August 1945. Interrogation of authorities so far has resulted in absolute denial of transmission of such an implementing message and existence of any prearranged instructions which would permit transmission of such an implementing signal. It would help the investigation if pertinent authorities could be confronted with circulars 2353 and 2354. This has not been done before in order to avoid disclosing to the Japanese the fact that we had this info. Investigation will be continued but without much prospect of success unless appropriate authorities can be confronted with circulars mentioned.

GSB 186 13 NOVEMBER 1945.
From: War Department.
To: Commander-in-Chief, Advance Hq. US Army Forces Pacific, Tokyo.

Reference BSG 196 you are authorized to confront Japanese officials with copies of circulars 2353 and 2354 but without disclosing when or by what means they were obtained.

BSG 210 21 NOVEMBER 1945.
From: Commander-in-Chief, Advance Hq. US Army Forces Pacific, Tokyo.
To: War Department

In reply to radiogram 31 October 1945, GSB-168, the results of interrogation of number of employees have indicated that signal implementing circular 2353 and 2354, was probably not transmitted prior to 8 December, Tokyo time, but was transmitted by radio voice broadcast at some hour after 0230, 8 December, Tokyo time. Exact hour unknown. No evidence can be obtained that implementing signal was transmitted by radio telegraph. 1 employee, now in Tokyo, states that he received radio voice broadcast signal in Rangoon at 0630, 8 December, Tokyo time (0630 Rangoon time). No info has been obtained that any signal implementing similar code was transmitted.

As stated in my message number BSG-196, the burning of pertinent records prior to Emperor's rescript of 14 August 1945 precluded obtaining info on this subject from that source.

Furthermore, individuals who were in authority at time under consideration admitted nothing until they were confronted with circulars 2353 and 2354 of Tokyo Foreign Office, 19 November 1941, pursuant to authority contained in your GSB-186.

These employees did not learn when or by what means these circulars were obtained.

Further investigation here appears unprofitable. Request authority to discontinue it.

24 NOVEMBER 1945.

GSB 196

From: War Department

To: Commander-in-Chief, Advance Hq. US Army Forces Pacific, Tokyo

Reference BSG 210. Only use of Winds code (either voice or radio telegraph) shown here by available contemporaneous records is voice broadcast from Tokyo between 0902 and 0935 on 8 December Tokyo time using code words referring to British-Japanese relations. In order to assist in evaluating information given in your BSG 210, Joint Congressional Pearl Harbor Committee desires to know first whether persons who conducted interrogation or those who were interrogated had any knowledge that prior to the interrogation of the United States had information establishing use of Winds code on 8 December Tokyo time, and, secondly, if such persons did have such knowledge, whether they knew that the United States had no definite information establishing use of Winds code at any time prior to 8 December Tokyo time. Prompt reply will be appreciated.

27 NOVEMBER 1945.

BSG 214

From: Commander-in-Chief Advance Hq. US Army Forces Pacific, Tokyo

To: War Department

Reur GSB-196 persons who conducted interrogation had no knowledge that prior to interrogation United States had info establishing use of Winds code on 8 Dec Tokyo time. Persons who were interrogated were not asked whether they knew that United States had info establishing use of Winds code on 8 Dec Tokyo time. Also, interrogated persons were not asked whether they knew that United States had no info establishing use of the Winds code at any time prior to 8 Dec Tokyo time. They will be questioned on these points at once and answers provided. Employee referred to in my BSG-210 who stated that he received voice broadcast signaling Rangoon at 0930, 8 Dec Tokyo time (0630 Rangoon time) may have meant that he received code words referring to British-Jap relations. He will be questioned again. This partial reply is made now and full reply will be forwarded as promptly as employees can again be found for questioning.

27 NOVEMBER 1945.

GSB 197

From: War Department

To: Commander-in-Chief, Advance Hq. US Army Forces, Pacific, Tokyo.

Information supplied in BSG 214 is believed sufficient answer to Committee's question, which was directed towards prior knowledge of interrogators and whether anything had developed in the interrogation which would indicate such prior knowledge on the part of Japanese. It seems clear from your BSG 214 that there was no such indication. Please confirm this.

It is requested that no further interrogation on this point be conducted unless Congressional Committee indicates desire to press inquiry further, in which event you will be advised.

Further interrogation of employee referred to in BSG 210 to ascertain whether broadcast heard in Rangoon used code words referring only to British-Japanese relations would be helpful. Other wise you may consider interrogation completed.

30 NOVEMBER 1945.

BSG 219

From: Commander-in-Chief, Advance Hq. US Army Forces, Pacific, Tokyo

To: War Department

Reur GSB 197 nothing developed during interrogation which indicated on part of Japanese prior knowledge of character stated in your GSB 197.

Employee who heard Rangoon broadcast states he does not recall code words heard but believes they referred to severance of British-Jap relations. This resulted from further questioning of this employee and without prompting as to character of answer given.

U. S. NAVAL TECHNICAL MISSION TO JAPAN

Interrogation No. 11.

Place: FLTLOSCAP

Date: 30 November 1945

Subject: Radio Tokyo Broadcast December 8.

Personnel Interrogated: Mr. Shinroku Tanomogi, Head of Overseas Department of Japan Radio Broadcasting Corporation in December 1941; presently member of the Diet and secretary to the Minister of Transportation.

Interrogator: Captain Peyton Harrison, USNR.

Interpreter: Lt. (jg) Stanley E. Sprague, USNR.

Summary:

Mr. Tanomogi, as head of the Overseas Department, was in charge of programs, including news programs, beamed to foreign countries. All news releases were controlled or "censored" by the Information Bureau of the Cabinet, the Communications Bureau of the Communications Ministry, and the General Staff.

Mr. Tanomogi was usually on duty at Radio Tokyo every other night. He was on duty the night of December 7 (Tokyo Time) and stated that the regular schedule of programs was broadcast. At about 0400 on December 8, he received a telephone call from the Information Bureau informing him that Japan was at war and that scheduled programs would have to be rearranged and preparations made for broadcasting important government communiques. An official of the Information Bureau arrived at Radio Tokyo early on the morning of December 8 to work out details with Tanomogi's staff. Tanomogi remained at Radio Tokyo until about 1800 of December 8. He stated that they broadcast only what was given them by Domei News or by the Information Bureau. "All news was official government news".

Mr. Tanomogi was asked if he remembered the "east wind rain" weather report broadcast about 1500 on December 8. He replied that he was not listening to the broadcasts at that particular hour, but that he had a vague recollection of some such announcement being broadcast among the releases abruptly ordered for transmission that day by the Information Bureau.

Mr. Tanomogi was handed a copy of Drew Pearson's article in the Honolulu Star-Bulletin of November 9, 1945. He stated that he would have known of it if a message such as that described as being broadcast December 4 had been transmitted and that he had no recollection at all of any "east wind rain" report or any similar phrase being broadcast prior to December 8.

PARAPHRASE OF INCOMING TELEGRAM

To: London, the Hague and Canberra, November 6, 1945.

From: Secretary Byrnes

The Congressional Joint Committee on the Investigation of the Pearl Harbor attack has sent to the Department a communication of which the essential portion is quoted below:

"Under date of November 19, 1941, Japan advised its representatives abroad that if danger arose of a breach of diplomatic relations with the United States, or Russia or the British, and the cutting off of other means of international communications, an emergency system for warning Japanese diplomatic representatives of impending break in diplomatic relations would be used, by adding in the middle of the daily Japanese language short wave news broadcast the following:

"(1) In case Japan-United States relations were in danger, the words Higashi No Kazeame (East Wind Rain).

"(2) In case of Japan-Russian relations in danger, the words Kitanokaze Kumori (North Wind Cloudy).

"(3) In case Japan-British relations in danger, the words Nishi No Kaze Hare (West Wind Clear).

this signal to be given in the middle and at the end of the broadcast as a weather forecast, 'each sentence to be repeated twice'. This arrangement also said, 'When this is heard, please destroy all code papers, etc.'

"At the same time, on November 19, 1941, the Japanese sent further notice to its representatives that when their diplomatic relations with the United States, Russia or the British were in danger, there would be added at the beginning and at the end of Japanese general intelligence broadcasts words as follows:

"(1) If it were Japan-United States relations, the word 'Higashi'.

"(2) If it were Japan-Russia relations, the word 'Kita'.

"(3) If it were Japan-British relations (including Thai, Malaya, and Nel), the word 'Nishi'.

these words to be repeated five times at the beginning and end of the broadcast.

"The Joint Congressional Committee Investigating the Attack on Pearl Harbor of December 7, 1941 are trying to ascertain whether any broadcast under this system were monitored and overheard, either by the United States or by Australia, the Dutch East Indies or the British, and, if so, on what day and at what time such a broadcast was overheard, and if so the text of the broadcast, and whether either of the three nations mentioned, having overheard the broadcast, advised the United States of the fact. We are particularly interested in the period from November 27th to December 7th inclusive, and suggest that the inquiry first cover that period and then, if time permits, work back to November 19, 1941."

You are requested urgently to inquire of the government to which you are accredited concerning the above and at the earliest possible moment to telegraph a report of the results.

4 (d)

DEPARTMENT OF STATE,
Washington, November 29, 1945.

MY DEAR MR. MITCHELL: I am enclosing as requested by your office a paraphrase of the cable from Canberra which was referred to in my letter of November 26.

Sincerely yours,

(S) Herbert S. Marks

(T) HERBERT S. MARKS,

Assistant to the Under Secretary.

Enclosure: Paraphrase of cable from Canberra.

The Honorable WILLIAM D. MITCHELL, *General Counsel,*
Joint Committee on the Investigation
of the Pearl Harbor Attack,
Congress of the United States.

Paraphrased copy

CANBERRA, November 16, 1945.

SECRETARY OF STATE, Washington,
168, November 16, 3 p. m.

Nothing has been revealed by an exhaustive search of the records of the monitoring service according to the Department of External Affairs. It is stated however that they may have missed certain messages in code as at that time trends only were followed and Japanese broadcasts were not taken down verbatim by the monitoring service.

MINTER.

4 (e)

DEPARTMENT OF STATE,
Washington, December 5, 1945.

MY DEAR MR. MITCHELL: I enclose a paraphrased cable dated December 4, 1945, just received from London in reply to our inquiry of November 6 as to whether the British had monitored and overheard any Japanese broadcasts using the so-called "winds" code between November 19 and December 7, 1941.

3312 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

As to the Netherlands, the Counselor of the American Embassy at The Hague advised us by telephone this morning that the Dutch Foreign Office has now stated in reply to our inquiry of November 6, that the most careful search has had negative results.

Sincerely yours,

(S) Herbert S. Marks
(T) HERBERT S. MARKS,
Assistant to the Under Secretary.

Enclosure: Paraphrased cable.

The Honorable WILLIAM D. MITCHELL, *General Counsel,*
Joint Committee on the Investigation
of the Pearl Harbor Attack,
Congress of the United States.

PARAPHRASING OF INCOMING TELEGRAM

To: Secretary of State, December 4, 1945
From: American Ambassador, London

The Foreign Office has just informed us that while their inquiries are not yet finished, up to the present no evidence has been found that any "wind" message was received before the morning of December 8, 1941, the day following the attack on Pearl Harbor. The Foreign Office says that there was relayed to Singapore from Hongkong a broadcast by the Japanese which contained messages in code and which was received in Singapore six hours following the attack on Pearl Harbor. The text of the Japanese code is not available yet but if desired we will ask the Foreign Office for more particulars.

The following messages appearing on the indicated pages of Committee Exhibit 1 deal with instructions sent in code via ordinary commercial channels of communication, to Japanese representatives to destroy their codes:

	<i>Committee Exhibit 1</i>
Circular 2436 of Dec. 1, 1941	p. 208
Circular 2443 of Dec. 1, 1941	p. 209
Circular 2444 of Dec. 1, 1941	p. 209
Circular 2445 of Dec. 1, 1941	p. 215
Tokyo to Washington, No. 867, of Dec. 2, 1941	p. 215
Circular 2447 of Dec. 2, 1941	p. 216
Tokyo to Washington, No. 881, of Dec. 4, 1941	p. 231
Washington to Tokyo, No. 1268 of Dec. 5, 1941	p. 236
Panama to Tokyo, No. 367, of Dec. 5, 1941	p. 237
Tokyo to Washington, No. 897 of Dec. 6, 1941	p. 237
Bangkok to Tokyo, No. 919, of Dec. 6, 1941	p. 247
Tokyo to Washington, No. 910, of Dec. 7, 1941	p. 249

Enclosure (A)

6 (A)

Top Secret—Ultra

8 NOVEMBER 1945.

Subj: JD-1: 7001, special studies concerning

1. In an effort to locate JD-1: 7001 the following sources have been exhaustively studied:

- a. numerical file of JD-1 #'s.
- b. chronological file of Japanese Diplomatic translations.
- c. the "Japanese diplomatic traffic log" for 1941.
- d. old GZ card index of Japanese diplomatic traffic, under Tokyo circulars and Tokyo-Washington circuit.

2. A special study of Jd-1 #'s was made to determine the relationship between the date of the message, the date of translation of the message, and the JD-1 #. The results of this study are attached to this memo.

3. From this study it would appear that JD-1: 7001, if such number was assigned to a translation, was for a message dated 28 November 1941, translated on either 12-2-41 or 12-3-41 by the Army. As all of the JD-1 #'s on both sides of JD-1: 7001 were translated on either 2 December 1941 it seems reasonably certain that the message was dated on or prior to 3 December 1941.

4. Throughout the JD-1 numerical file there are incidents of cancelled numbers. The reasons for some of these cancellations are not given; others are given as follows: "duplicate of message previously numbered", "additional part of message already assigned a number", and "number skipped by mistake".

5. In October 1944 and on 14 May 1945 Lieut. Comdr. G. E. Boone called Col. Rowlett at Arlington Hall and secured from him the following information concerning the Army numbering system in 1941: Occasionally numbers were cancelled, but there was no indication given of the reason for the cancellation, by whom it was made, nor by whom it was authorized. He stated that there were other cases of numbers cancelled in the 1941 file.

/s/ Sally T. Lightle,
/t/ SALLY T. LIGHTLE,
Lieut., USNR.

To be handled in Government Code.
 Departmental secret.

The activities of KOO CHOO SUI, backed up by the CHI GOO KAI and the KOO HOO (an intelligence society and a publication), is working hard in our behalf to stamp out anti-Japanism. Several incidents have occurred lately and his opponents are rather belligerent. Consequently, Governmental surveillance over KOO is rather close. From April to September of this year we afforded KOO a subsidy for the KOO HOO and a fund for collecting intelligence, amounting to from 2,000 to 3,000 guilders. KOO is so familiar with the Chinese and natives here that in case of emergency he can do much to help us. That is why I have employed him so far. He is ready at our direction to start the distribution of pamphlets designed to win over as many of his consanguinaries and the natives as possible. I think that we should continue to avail ourselves of his services. He has a family of eight. Therefore, I think we should let him have 3,000 guilders for operating expenses; 15,000 guilders for living expenses, and 12,000 guilders as a subsidy for the KOO HOO as of from October 1st to the end of the year. Will you please, therefore, arrange to appropriate and remit that amount, namely 30,000 guilders.

#782 (corrected to #882).

Re your #751.^a

1. We have been communicating with the German representatives here, giving them much of the Manchukuoan opinions and, as a result of a talk between OTAKI and WCHLTHAT, the final draft for a new German-Manchukuoan pact is proposed by Germany as follows:

(a) The title of the pact is "A provisional agreement for extending German-Manchukuoan economic Relations."

(b) This pact is effective until the last day of March next year.

(c) The balance of 85,000 tons of soy beans shall be delivered before the end of March at the old price although the agreement expires the end of January.

(d) 4,500 tons of soy bean oil, including the undelivered balance on the contract for jimson, shall also be delivered by the end of March.

(e) Exchange permits shall be given for the unused balance of German contingent goods specified in the pact of May 31, 1941. (Minister WAGNER must have a list of about one million marks' worth of goods in Japan, Manchukuo, Shanghai and other Far Eastern points.)

(f) Export permits shall be given for German goods which are now held or may in the future be held in Manchukuo at the convenience of the holders. If a state of emergency should arise, this goods shall not be confiscated nor seized. The above should be administered on a rational basis.

[2] (g) The application of this contract will be acted on by specified conferences of local tradesmen.

(h) The term for repayment of the "W" account shall be extended to May 31, 1942. However, this understanding shall be made directly with the bank at the same time the pact is set up; it will not be mentioned in the pact.

(i) 1,000,000 marks shall be appropriated at the end of November and December respectively and 1,500,000 marks at the end of January and February respectively from the "B" account for repayment of the "X" account. (Although their representatives have already expressed their wishes to WAGNER, when I talked with WAGNER on the 21st I did not mention this. As he believes it should be handled from special funds, I think it is best for Manchukuo to negotiate for necessary funds on short term credit under this measure).

(j) Germany will offer credit to a maximum of 10,000,000 marks, because of the reduction in amount of shipments of Manchukuoan products (soy beans and soy bean oil). For this credit a new account, "V," will be set up. Thus, the

¹ In Libya.

"X" account should be liquidated during the term of the new pact through the 5,000,000 marks from account "B" and soy bean payments, and account "W" should be reduced by at least 1,000,000 marks from soy bean payments.

(k) The balance of account "B" shall be used for payments to Germany. Manchukuo is at liberty to make payments under heading (c) from any account whatsoever.

[3] (1) The second section and the second paragraph of the third section of the pact of May 31, 1941 (means for conversion of obligations not yet settled at the expiration of the pact) shall be left unchanged.

2. Although Manchukuo will probably want to pay Germany through regular channels, because of the obstacles to transportation I think it would be better to deduct German payments from (a) together with a suitable rate of interest. Moreover, believing that the terms of this pact are reasonable since Manchukuo's credit responsibilities are greatly increased, as soon as they get Manchukuo's approval Germany will send it to Berlin. As they wish to have it returned to Tokyo with the signatures of WCHLTHAT, SPINDLER and the Manchukuoan representatives not later than Christmas, they demand speedy consideration by Manchukuo.

Please press the Manchukuo government for prompt adoption of the above pact and please wire a reply. Since Japan and Germany are virtually in agreement on the Chinese text, please urge them again to let us know at once their opinion of the German-Manchukuoan understanding mentioned in our secret message #474^a dated September 27th (German edition: German text).

This telegram has been discussed with military authorities and Vice Minister MIURA.

According to reports received from the Vatican through CICOGNANI, the Papal representative in Washington, many indications are evident that Japan forms a great obstacle to the United States' early termination of the present anti-Axis war. Public opinion in the United States is that America would be able to achieve victory for Great Britain simply by large-scale production of military supplies if it were not for this obstacle. In the event of a Japanese-American clash, assistance to England and the Soviet would decrease, making necessary American military intervention by means of forces on the European continent. Moreover, there are a great many who believe that during American-Japanese negotiations Japan put forth stipulations encroaching upon American interests and honor and so causing conditions to become extremely delicate.

3318 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

There were also reports to the effect that the difficulties of Japanese-American negotiations constrained the Interventionist faction headed by the President and strengthened the position of the Isolationists.

Local military intelligences are as follows. For your information.

1. At the military review in celebration of the anniversary of the revolution, 47 airplanes of an unrecognizable type flew over the city of Kuibyshev. They were definitely of American design and construction. It seems that large numbers have recently been arriving.

(The above is a report of the Japanese Military Attaché in the Soviet.)

2. Large bodies of anti-Communist mobile forces are fighting in the vicinity of Mininsk (Russe) and Barugujin^a (south of Krusnoyarsk), destroying lines of communication and attacking the Kolhoz and Sofhoz. (The above is a spy report.)

3. The 39th Sharpshooters Division (in the neighborhood of Kogaiko^a) has executed before the firing squad 20 unsuccessful deserters who tried to get into Manchukuo between May and November. To date, 46 Soviet troops have deserted. The Soviet, in order to prevent desertion, has moved certain detachments away from the border or have strung charged barbed wire fences along the border. Another means which they are utilizing is making the regiment responsible for detachments from which there have been deserters. (The above is intelligence of primary importance.)

[2] 4. Recently to the Ude Front, the surveillance troops of the outer Mongolian area have within the last few days deliberately trespassed on Mongolian territory several times, even to the extent of 10 to 20 kilos. They are taking a strong, hostile attitude toward Japanese surveillance troops. (The above is intelligence of primary importance.)

I have transmitted this to Peking, Shanghai, and Nandal.

MR. STERLING: At 7:45 p. m. Mr. Carter called in from Portland with the following information:

JVW3 2130G

TODAY NORTH WIND MORNING CLOUDY AFTERNOON CLEAR BEGIN CLOUDY EVENING. TOMORROW NORTH WIND AND LATER FROM SOUTH. (the above was repeated three times)

JVW3 sent a time signal at 2200G and then:

I WILL NOW GIVE YOU THE WEATHER REPORT (nothing further, carrier on but no modulation—evidently cutoff in Tokyo).

Remarks by Carter: They are getting a more complete picture of the operations now and it is evident that at 2130G the Tokyo weather is transmitted and at 2200G the Tokyo weather and weather for other prefectures. Reception is getting better and estimate efficiency on this assignment has increased approximately twenty-five percent.

Foned Col. Bratton and gave him the message at 7:50 p. m.

Remarks by Col. Bratton: Results still negative but am pleased to receive the negative results as it means that we have that much more time. The information desired will occur in the middle of a program and possibly will be repeated at frequent intervals. (Asked Col. Bratton if I should communicate the information to Portland—concerning the fact that the desired data will be in the middle of a program.) No. I will have a conference with Lt. Col. Dusenberg in the morning and will contact Mr. Sterling in that regard.

Nov. 24, 1941

1. At 6:55 PM the Supervisor of the Coast Guard Radio Station at Alexandria, Va. telephoned to report that W9WGI was causing serious interference to their circuit on 4050 kcs. Requested Supervisor to inform this office immediately if the interference was again heard. (No further reports from CG up to midnight)

Nov. 25, 1941

At 9:10 the Supervisor of SA-P telephoned in from Jackson, Miss., requesting information relative to the resignation of Henry Gantt, an operator at SA-10. (Memo. re: conversation placed on Mr. Sterling's desk.)

Nov. 26, 1941

Handled routine correspondence and traffic.

Nov. 27, 1941

At 6:20 pm Monitoring Officer Cave of NA-9 called in regard to Wash. Case 4001 and 4002. Mr. McIntosh gave Cave the information requested.

Nov. 28, 1941

At 7:55, the Major Guest telephoned in requesting Mr. Sterling's home phone number. Gave him the requested information. At 8:00 pm long distance operator called on Na. 2925 stating that Portland, Oregon was calling and desired to contact Mr. Sterling. Informed operator that Mr. Sterling was not here, but that he could be reached at his home Evergreen 278. At 10:20 Mr. Sterling called giving instructions he wished passed on to Mr. Norman, Mr. North and Miss Perry.

Nov. 29, 1941

Handled routine correspondence and traffic.

Dec. 1

1. 5:05 P. M. Monitoring Officer CA-8 (Bairley) telephone to report that Ferguson (Wash. 3423) original informant, has moved out of neighborhood where original key clicks had been heard and requested further instructions. Told Bairley to contact Officer House of Auburn Police for further information. Also contact Ferguson at his new address for detailed description of signals he had heard previously.

2. At 5:45 P. M. telephoned Col. Bratton. Gave him a message per Mr. Sterling's instructions.

3. 9:05 P. M. telephoned Mr. Sterling re verification of frequencies for Portland.

4. 9:30 P. M. Monitoring Officer Duncan SA-5 telephoned from Tallahassee, Fla. stating he had heard unlicensed station JUMP (Wash. 3930) and probably could have complete evidence of unlicensed operation within two days. He stated that the subject was undoubtedly using a phonograph oscillator. Duncan requested information as to whether he should remain in Tallahassee or return to St. Augustine and work on some in-active alleged subversive cases. Informed Duncan to remain in Tallahassee two more days and endeavor to complete his evidence on Wash. 3930.

5. 9:45 P. M. sent TWX to Portland confirming frequencies.

Dec. 2

1. 7:35 P. M. long distance operator called on Na 2995 asking for Mr. Sterling. Operator stated that Portland, Ore. was calling. Informed her that Mr. Sterling was not here but that he could be contacted at his home in Baltimore, Evergreen 278.

Dec. 3

1. 6:15 P. M. received TWX from GS-P relative to NDA cases.
2. 6:25 P. M. telephoned Mr. Peterson for information concerning NDA cases.
3. 6:43 TWX to GS-P containing instructions relative to NDA cases.
4. 7:15 P. M. long distance operator of Portland, Ore. called on NA 2995 for Mr. Sterling. Informed her that Mr. Sterling was not in office at present but that I would try to contact him.
5. 7:20 called Lafayette Bowling Alley and had them page Mr. Sterling. They reported that Mr. Sterling had already departed.
6. 7:45 P. M. Mr. Sterling called this office and directed me to take message from Mr. Carter at Portland, Ore.
7. 7:52 P. M. contacted Mr. Carter at Portland, Ore. and obtained message for Mr. Sterling.
8. 7:55 P. M. telephoned Col. Bratton at his home and delivered a message in accordance with Mr. Sterling's instructions.
9. 8:37 P. M. Mr. Sterling called this office and contents of message from Portland, Ore. was read to him.

Dec. 4

1. 6:55 P. M. called Mr. Norman at his home in reference to message from GS-P concerning Mr. McKinney. Mr. Norman advised that no further action was necessary.
2. 8:12 P. M. received a message from Mr. Carter at Portland, Ore.
3. 8:25 P. M. unable to contact Lt. Col. Dusenburg either at the War Dept. or at his home.
4. 8:40 P. M. telephoned Mr. Sterling requesting instructions relative to a message from Mr. Carter.
5. 8:45 P. M. called ONI watch officer at Navy Dept. to ascertain if he was permitted to accept messages of interest to Col. Bratton's office. The officer in charge stated that he was not certain but that he would inquire and call me back.
6. 9:05 P. M. Lt. Brotherhood 20-G Watch Officer Navy Dept. telephoned to state that he was authorized to accept message in question. Gave Lt. Brotherhood the message from Mr. Carter.
7. 9:32 P. M. Lt. Brotherhood called to inquire if any other reference to weather was made previously in program intercepted by Portland. Informed him that no other reference was made.

Dec. 5

1. 7:45 P. M. Mr. Carter called in from Portland, Ore. with a message.
2. 7:50 P. M. telephoned Col. Bratton at his residence and repeated the message from Mr. Carter.
3. 11:05 P. M. Monitoring Officer Dunphy of CA-6 telephoned in requesting information on Wash. Case 3259. Informed Dunphy would try to get the information for him in the morning.

Dec. 6

1. Handled routine correspondence and traffic.

Dec. 8

1. 6:15 A. M. Mr. Dunphy called in, no results. Told him take six hours off, then assume duties for six hours, then eight hours off, alternating with Baltimore Unit.
2. 8:00 A. M. Mr. Meriwether called in, no results. Told him to remain on job until noon when CA-6 unit would take over. Informed him to take over watch again at 6:00 P. M.

3. 8:50 A. M. NA-3 called re Washington case 3722, off air. Mac gave him some important bearing and/or intercept assignment.

4. 12:00 Noon. Mr. Meriwether and Mr. Blum at office. One will take 6:00 P. M. to Mid., the other 6:00 A. M. to Noon, sandwiched with Falls Church.

5. 12:10 P. M. Mr. Berle of State Department called—Wanted Mr. Fly, finally got Mr. Fly.

EXHIBIT NO. 142C

DEPARTMENT OF STATE,
Washington, February 4, 1946.

The Honorable SETH W. RICHARDSON, *General Counsel*
Joint Committee on the Investigation of the Pearl Harbor Attack
Congress of the United States.

DEAR MR. RICHARDSON: Enclosed are paraphrases of three telegrams received regarding the "winds" message, supplementing previous correspondence on this subject.

Sincerely yours,

HERBERT S. MARKS,
Assistant to the Under Secretary.

Enclosures:

1. Telegram from London, December 15, 1945;
2. Telegram from The Hague, January 28, 1946;
3. Telegram from London, January 31, 1946.

TELEGRAM RECEIVED FROM THE AMERICAN EMBASSY AT LONDON, DATED DECEMBER 15, 1945 (PARAPHRASE)

This morning we had a conversation regarding the "winds" messages with a Foreign Office Japanese expert who was in the Foreign Office immediately preceding and at the time of the attack on Pearl Harbor. He declares that, so far as he knows, prior to December 8, 1941 no such messages were received. Investigation is still being carried on but the Foreign Office has as yet no information which would change the statement contained in the Embassy's telegram of December 4, 1945 on this subject.

TELEGRAM RECEIVED FROM THE AMERICAN EMBASSY AT THE HAGUE, DATED JANUARY 28, 1946 (PARAPHRASE)

We have been informed by the Foreign Office in a note dated January 24 that all reports of monitored Japanese broadcasts were destroyed before the invasion of the Netherlands East Indies by the Japanese. The same is true of the archives of the Netherlands Indies Government. For this reason the Foreign Office regrets that it is unable to supply the information which has been requested by the Congressional Committee investigating the Pearl Harbor attack.

TELEGRAM RECEIVED FROM THE AMERICAN EMBASSY AT LONDON, DATED JANUARY 31, 1946 (PARAPHRASE)

The Foreign Office states that the investigation requested in the Department's telegram 9745 of November 6, 1945 has drawn a complete blank and that it does not seem worthwhile to make any further investigation.

Address reply to:
609 Stangenwald Building
Honolulu 1, T. H.

PERSONAL AND
CONFIDENTIAL

VIA CLIPPER AIRMAIL

Mr. George E. Sterling
Chief, Radio Intelligence Division
Federal Communications Commission
Washington 25, D. C.

Dear Mr. Sterling:

I have read with interest the extracts from the Army and Navy Pearl Harbor boards. I agree with you that the Army's statement to the effect that, "On December 7 a number of illegal radio stations interfered with the radio operations of the Army" is the result of ignorance and lack of understanding on the part of Army personnel concerned. I should like to know the exact basis for the statement. I assume that something more than the general allegation was made."

There have been numerous references in the newspapers lately to the coded Japanese weather message which was to reveal their plans. In reading through the translations of Japanese news broadcasts recorded at RA-P and translated by the O.N.I., Honolulu, I came across the following with which you are probably familiar. However, since it differs considerably from the current news stories and may be in addition to the "Weather Message" referred to, I am repeating it for your information. This translation was made from recordings of the JZI Japanese language broadcast on 9515 kc. for December 2, 1941, Japan time. The translation included a report of the Japanese attacks for the day (December 8, Japan time, being December 7, Honolulu time) and, therefore, the "Weather Forecast" followed rather than preceded the Pearl Harbor attack. The O.N.I. translator inserted the following in parentheses between news items: "Here a weather forecast was made--as far as I can recollect, no such weather forecast has ever been made before. His exact words were: "Allow me to especially make a weather forecast at this time-- 'West wind, clear!'". Since these broadcasts are also heard by the Japanese Navy (it may be a sort of code). It will be noted that the O.N.I. translator was apparently unaware of any previous search for such a forecast. The same weather forecast was repeated later in the December 8 broadcast.

The translations made by the O.N.I. were furnished this office and the F.B.I. by messenger. We did not receive the translations for December 8 until December 15, 1941. As a matter of fact, I believe that the translations for December 1, 1941, and December 2 were all received from the O.N.I. on December 15. This was not unusual, since translations had generally been received from a week to two weeks after the date of the broadcast.

Present indications are, according to the newspapers, that the Senate House Committee which is investigating the Pearl Harbor attack will not visit Hawaii for sometime.

Sincerely yours,
/s/ Lee E. Dawson

Our Imperial Army is repulsing the British troops which have invaded Thailand. In regard to this, our embassy in Bangkok made the following announcement at 4 am today: For a long time, we have been expressing the British troops to invade the southern part of Thailand and, as expected, they began to cross the Malay border early this morning. To preserve the peace of the Southern Pacific and protect the independence of Thailand, our government immediately started a negotiation with Thailand and, at the same time, started an attack against the British troops, which are being presently wiped out. Thus was the statement announced by our embassy in Thailand.

The next is a Dorei despatch from Shanghai. Since dawn today, Shanghai has been in a state of war and to maintain the peace and order within the International Concession, our army and navy detachments made a special penetration. At the same time, the following announcement was made in the names of the high commanders of our army and navy in Shanghai: The Japanese troops have been reinforced within the international concession, but what the aim of the Japanese troops is to maintain the peace and order, and prosperity of the international settlement. The Japanese troops have no hostile feeling against the residents carrying on rightful occupations within the concession.

Our Imperial Army has disarmed the American marines stationed in North China. In regard to this, a Dorei despatch from Peking reported that our Imperial Army this morning issued an ultimatum to disarm the 200 American marines stationed in Tientsin, taking the Tien tai (?) and since each accepted this ultimatum, the disarming of the marines was carried out at 1 pm today.

Today, His Majesty, the Emperor, released an Imperial decree to our Imperial Army and Navy, as follows: "Since the outbreak of the China incident, my army and navy have stoically fought for over four years to punish the bad and in spite of their great achievements, the war has not been quelled yet. After considering the past and seeing the England and America's claims are scandalous, I attempted to make my government settle the situation peacefully. In spite of this, not only did England and America show no sincerity to consider peace, but instead strengthened their military and economic coercion in an attempt to make our country yield. Hence, to protect our country's existence and self-defense and establish lasting peace in East Asia, I have decided to declare war against England and America. Moving forth in your loyalty and bravery, I look forward to the accomplishment of our ultimate aim and the upholding of our national glory".

In reply to this Imperial decree, the Minister Tojo and Navy Minister Shimada respectfully made the following reply: Your subjects, Hirokuni and Chigotaro, respectfully reply. WE cannot help but be deeply impressed on receiving such a glorious (?) decree and as, subjects, promise to cooperate solidly and exert our utmost effort and thus expect

to respond to your will. On behalf of the government and the Army and Navy, we, Hideki and Shigetaro, your subjects, respectfully make this reply. December 8, 1941.

(Signed) Hideki Tojo, Minister of War.
Shigetaro Shinada, Minister of Navy.

Since our Army and Navy has started a war against England and America in the Western Pacific at dawn today, our Government at 7 am today held an emergency session of the cabinet at the premier's residence. Outside of Foreign Minister Togo, all the cabinet ministers were present. Firstly, Minister of Navy Shinada reported the developments of war against England and America and based on this report, the course to be taken by the government was decided, whereupon Premier Tojo called on the Emperor and reported the decision.

According to a Domei dispatch from Washington, Foreign Minister Togo reported by order Envoys Kuruu and Nomura to call on Secretary of State Hull at 1:00 P.M. on the 7th, 3:30 A.M. of the 8th Japan time, and present our government's official reply to the American note of the 26th. At the same time, Foreign Minister Togo invited American Ambassador to Japan, Grew, to his official residence at 7:30 A.M. today and handed him an official note similar to the one handed to Secretary of State Hull. Immediately afterwards at 7:45 A.M., he invited British Ambassador to Japan, Craigie and explained to him the text of this reply.

Immediately after our loyal Army and Navy had entered a state of war with England and America at dawn today, it was decided to break off diplomatic relations with both countries and enter a state of war. Consequently, our government at 11:45 A.M. today declared war against England and America. At the same time, an order for the convocation of a two days special session of the Diet on the 15th was issued. At the emergency session urgent bills of appropriations and other nature will be presented and, at the same time, the government's policy to cope with the unprecedented emergency is expected to be explained by Premier Tojo and other ministers.

(Here a weather forecast was made as far as I can recollect, no such weather forecast had ever been made before. His exact words were "Allow me to especially make a weather forecast at this time, 'best wind, clear'." Since these broadcasts are also heard by the Japanese Navy, it may be some sort of code.)

At 8:30 A.M. today, our government made the Foreign Ministry announce the results of the Japanese-American negotiation and the Japanese-American notes. The announcement made clear the real facts of the effort exerted by our government till the very last minute to preserve the peace of the Pacific. Japan's note to America was an official reply to America's note of the 26th and notified the fact no settlement can be expected even if the negotiation were to be continued. It actually was a final notice

to America, and within it, our country made public to the world the reason for declaring the war. It is as follows: That America's principles adhered to in the Japanese-American negotiation are idealistic and her proposal, for example, is absolute and ignores the realities of East Asia. That England and America's economic oppression is more mean than armed resistance. That the imperialistic exploitation of England and America has been the root of disorder in East Asia. That the continuation of aid to Chungking absolutely cannot be ignored by our country. That England and America, scheming with the other hostile nations, are intensifying their action to make Japan and China fight each other, but our country is..... Taking these five points up, our country's fairness was made clear to the world.

Now, let me give you the text of the Foreign Ministry's announcement. From the standpoint of settling the Pacific problems peacefully; thus contributing toward world peace, our government has carried on negotiations with America ever since the middle of last April. At first, a proposal was made by America, but, just at that time, the joint defense of French Indo-China was concluded. Then, England and America, cooperating with each other, took action to strengthen their economic oppression. Hence, Premier Konoye sent a message to President Roosevelt in August urging America to reconsider her action. However, America, adhering to claims for the abrogation of the Japanese-German-Italian Alliance, the withdrawal of Japanese troops stationed in China and the matter of international trade without discrimination, totally rejected our claim. Of course, these demands cannot be accepted by our country. As a result, our country hurriedly dispatched Envoy Kurosu to America and bearing patience upon patience, our country continued the negotiation with a conciliatory attitude. However, America, adhering to her principles, who are counter to the realities of East Asia, assumed an attitude to ignore our claim and effort. At the same time, England, Chungking, Dutch East Indies and Australia renewed their effort to strengthen their anti-Japanese preparation. Hence, the Japanese-American negotiation finally reached a critical state. Besides, the situation surrounding our country became such as to leave no room for optimism. Since it became clear that America absolutely has no intention to continue the negotiation, our government sent a memorandum as of the 7th to the American Government made her attitude clear. The developments of the Japanese-American negotiation announced by the Foreign Ministry were as follows: Our country desires to establish the East Asia mutual prosperity sphere and contribute toward world peace has been trampled by the world war fever and the challenging threats of England and America. America, mobilizing 10,000,000 soldiers and setting up a two-ocean navy of 3,500,000 men, has intensified her unjust scheme to make the world her own. Even in the recent Japanese-American negotiation, they attempted to oppress our country with an arrogant attitude of being not even afraid of God, and as an attitude of the leader of East Asia, it was too much to ignore. In spite of this, our country, hoping for America's consideration to the very end together with our people, continued to remain calm. However, today, the war of the

[illegible]

The next is a demand which is the subject of the second paragraph of the statement according to which the demand is for the withdrawal of the official source indicating that the demand is for the withdrawal of the official source in the case of the demand.

At this time, I am again in a position to state that I am not a member of the "Black Panther Party", (BPP) (BPP is a Black Party).

[illegible]

director of the 2nd section of the information bureau entitled "To the Japanese residents abroad on receiving the Emperor's decree of war". Japanese residents abroad, an Imperial decree declaring war against England and America was issued at 11:45 am, December 8, Japan time. It was just previously broadcast to you. Then, too, I believe that you have heard the electrical transcription of Premier Tojo's broadcast. Again, since I believe that you all know the details of the Japanese-American negotiations as well as our country's claim, I will refrain from mentioning them. Today, our Imperial Army and Navy of matchless loyalty has already started in attack in the Western Pacific and over a wide range, too, are achieving brilliant results. To accomplish this great war, we, 100,000,000 people of Japan, should concretely put into practice the spirit of service and unite solidly to rest the mind of our majesty, the Emperor, for there is nothing to fear. As you already know, the Japanese-American negotiation went through all sorts of complications and difficulties during the past eight months, and America made the following demands upon our country. They were (1) complete and unconditional evacuation of Japanese troops from China, (2) the abolition of the Hankow Convention, (3) immediate liberation of the tripartite alliance and (4) her so-called idealistic four principles, indicating her definite refusal to recognize the realities of East Asia. Consequently, not only has she attempted to hamper the natural demand for the strengthening of the mutual prosperity relations between Japan and the southern nations, but has also strengthened her ABCD encirclement and intensified her coercion toward Japan, both economically and militarily. At the same time, she, utilizing Chungking as her tool, is planning her own defense at the expense of China and is endeavoring to achieve her ambition of dominating East Asia as well as the world. Although ours was enduring the unendurable and exerting her utmost effort to readjust the Japanese-American relations with a conciliatory spirit for the sake of world peace and humanity, it became definitely clear that America will never reconsider. I shall repeat: The reason that our country remained patient and exerted her utmost effort in the Japanese-American negotiation till today, or clearly explained in the Imperial decree, was based on our noble spirit to maintain the peace of East Asia and thus contribute toward world peace and not that we were afraid of England and America's economic and military strength. Nevertheless, America, underestimating our military and national strength and attempting to make our country yield before her oppression, assumed attitude throughout the negotiation. In view of this fact, who can criticize the righteousness of Japan, who has been compelled to take up arms because of the extreme hostile acts of England and America? Japan, as well as her people has repressed her tears and has borne the unbearable to the limits of her power and has performed every measure that should be performed. Hence, there is no other course but war to take today. In other words, Japan has resolutely taken up her arms to protect her rights and existence and to establish a new world peace. This, in other words, is the duty of righteous Japan and the manifestation of the deeply-rooted conviction of the nation. However, we are not bearing any grudge against the people of America and England, who have been misled by their leaders. As a result, we have no hostile feeling against

1. The first of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

2. The second of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

3. The third of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

4. The fourth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

5. The fifth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

6. The sixth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

7. The seventh of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

8. The eighth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

9. The ninth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

10. The tenth of these is the fact that the Committee has not yet received a report from the Secretary of the Navy regarding the results of the investigation conducted by the Bureau of Naval Affairs into the alleged activities of the "Black Legion" in the United States. This is a matter of great importance, and the Committee believes that it should be given the highest priority.

EXHIBIT NO. 143

(This exhibit is the proceedings of the Roberts Commission appointed December 18, 1941 by the President and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 144

(This exhibit is the proceedings of the inquiry conducted by Admiral Thomas C. Hart, U. S. Navy, Retired, pursuant to precept dated February 12, 1944 of the Secretary of the Navy and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 145

(This exhibit is the proceedings before the Army Pearl Harbor Board, convened by the Secretary of War pursuant to the provisions of Public Law 339, 78th Congress, approved June 13, 1944, and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 146

(This exhibit is the proceedings of the Naval Court of Inquiry convened by the Secretary of the Navy pursuant to the provisions of Public Law 339, 78th Congress, approved June 13, 1944, and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 147

(This exhibit is the proceedings of the investigation conducted by Colonel Carter W. Clarke, September 14, 15, and 16, 1944, and continued from July 13 to August 4, 1945, and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 148

(This exhibit is the report of investigation during the period November 23, 1944, to September 12, 1945, conducted by Lt. Col. Henry C. Clausen, AUS, for the Secretary of War, and supplementary to the proceedings of the Army Pearl Harbor Board, and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 149

(This exhibit is the proceedings of the inquiry conducted by Admiral Henry Kent Hewitt, U. S. N., pursuant to precept dated May 2, 1945, of the Secretary of the Navy, and supplementary to the proceedings of the Navy Court of Inquiry, and will be found printed separately in the Joint Committee record. See Index of Exhibits.)

EXHIBIT NO. 150

280 Bronxville Road
Bronxville, New York
18 March 1944

Admiral William F Halsey, U.S.Navy
Commander South Pacific Fleet
c/o Fleet Post Office
San Francisco, California

Dear Bill,

You have on your staff Commander A.D.K. Ramer, U.S.N., who was on duty in the Communications Office in the Navy Department at the time of the attack on Pearl Harbor and for some time prior to that date. I believe he has knowledge of facts and incidents which occurred in the Navy Department which are of interest and value to me. Will you please obtain from him an affidavit and ask him if he will supply me with a copy. I will assure him that I will make no use of the affidavit without his permission so long as he is alive. If he does not wish to supply me with a copy of the affidavit, I would appreciate it very much if he will make the affidavit, put it in a secure place and inform me when I can obtain it.

There was a message received in the Navy Department on December 4th or 5th, 1941, which came to be called the "Winds Message". I should like to know:

What station first received the Winds Message ?

What date was it received in Washington ?

When was it deciphered, translated, decoded and delivered to responsible officials in Washington ?

What officials in Washington saw the translation of the Winds message and when ?

What was the substance of the information contained in the Winds Message ?

What action towards notification of Field Commanders of contents of message and implications thereof was taken ?

There was a note delivered by the Japanese Ambassador to Mr. Hull on 7 December 1941.

When were the first 13 parts of this message received, decoded, and delivered to responsible officials in Washington ?

What officials in Washington received translations of the first 13 parts of this message and when did each receive them ?

3334 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Admiral William F. Halsey, USNAVY

18 March 1944

When was the 14th part of the message received, decoded and delivered ?

What officials in Washington received translations of the 14th part of this message and when did each received it ?

What action was recommended by you or anyone else of which you have knowledge ?

There was a message directing the Japanese Ambassador to deliver a note to Secretary Hull in person at 1:00 P.M. Eastern Standard Time on 7 December 1941.

When was this message received in the Navy Department ?

What agency decoded the message and when was decoding completed ?

What agency translated the message and when was the translation delivered to the Navy Department.?

What officials in Washington received translations of this message and when did each received it ?

What action was taken as a result of this message ?

When Commander Kramer delivered this message to Mr. Knox a memorandum pointing out that 1:00 P.M. Eastern Standard Time was sunrise in Honolulu and midnight in Manila and that the whole thing meant sunrise air raid in Pearl Harbor within a few minutes after the delivery of the Japanese note.

Will you please have Commander Kramer answer all of the fore-going questions of which he has knowledge and put them in the form of an affidavit and also request him to include in his affidavit any other matters of which he may have first-hand knowledge. I shall be very grateful to him for this matter will be of considerable interest and value to me.

My kindest regards to you always Bill.

Most Sincerely yours,

/s/ H.K. Kimmel

- (g) CINCPAC "Weekly Intelligence" Vol. 1, No. 22, 8 Dec. 1944-P. O. W. Account of Raid on Pearl Harbor.
- (h) Op-16-F2 Weekly Memorandum dated 1 Dec. 1941.
- (i) Jane's Fighting Ships-1941 edition.

Encl:

- (A) Op-20-3 GL Memo dated 14 May 1945.
- (B) "Japanese Naval Vessels" (ONI-December 1942).

1. Reference (a) advised that *Com 16 intercepts* were considered most reliable and requested Com 16 to evaluate reports on Japanese naval movements and send despatch to Opnav, info Cincpac. Com 16's estimates were more reliable than Com 14's, not only because of better radio interception, but because Com 16 was currently reading messages in the Japanese Fleet Cryptographic System ("5-number code" or "JN25") and was exchanging technical information and translations with the British C. I. Unit at Singapore. McCollum knew this and gave it due consideration when he drafted reference (a).

2. Reference (b) summarized Japanese naval activities for the current month and advised that some large scale movement involving most if not all of the Japanese Navy was about to take place. The message itself was summarized in its last sentence, as follows:

Evaluate above to indicate strong force may be preparing to operate in Southeastern Asia while component parts may operate from Palao and Marshalls.

This information was reliable, timely, and accurate on the whole. It must be realized, moreover, that this estimate was based entirely on "radio intelligence," the Com 14 C. I. Unit being unable to read anything except the Weather Ciphers and other minor systems of the Japanese Navy at that particular time. This fact was known in the Navy Department, and the Director of Naval Communications and the Director of Naval Intelligence were so informed by me.

[2] 3. The major project of the 14th District C. I. Unit in November 1941 was attack on the Japanese Flag Officers Cryptographic System (Transposition Cipher superposed on a "4-character code"—think we called it "AD")—in which they were being backed up by similar attack in the Navy Department. This system (its earlier editions) had been our main source of information on the Japanese Navy from 1926 or 1927 up until about November 1940. It was the most difficult as well as most important system the Japanese Navy was using and our most skilled and most experienced officers and men were attempting its solution. If we could have solved the Flag Officers System, Admiral Kimmel

would probably have known of the Japanese plans and the Pacific Fleet would not have been surprised on December 7, 1941. Unfortunately, neither the U. S. Navy nor the British cryptanalysts ever succeeded in cracking this system. The "5-numeral" system yielded no information which would arouse even a suspicion of the Pearl Harbor Raid, either before the attack or afterwards. The Japanese abandoned the "AD (?) " system in 1942 or 1943, apparently because of excessive delays and unreadable messages. As regards the "JN25" or "5-numeral" system, the current code (JN25B) had been in effect since 1 December 1940, remained in effect until 27-31 May, 1942, and was partially readable in November 1941. A new system of keys was introduced on 4 December 1941 and reported by Com 16-041502, but the carry over of the old code made their solution quite simple, and we were reading messages again by Christmas, Corregidor getting the "initial break" on 8 December 1941. The Hawaiian C. I. Unit did not commence work on the Japanese Navy's "5-number" system until 10 December 1941, at which date it discontinued attack on the "Flag Officers System." (The Navy Department continued its attack on the "Flag Officers System" as long as it remained in use.)

4. Reference (c) contained Com 16's evaluation of reference (b) plus extensive observations and comments of his own, and in general agreed with Com 14's estimate. Com 16 had the benefit of his own translations plus "tips" from Singapore. Com 16 also had much better direction finder service as distances were much less, differences of longitude much less, and the bearings lines generally cut at more favorable angles for reliable plotting. This advantage was lost with the capture of Guam a few days after the Pearl Harbor Raid.

5. The discrepancies between references (b) and (c) are mostly artificial, the only important difference being in the following sentences, which are quoted below:

Ref. (b), Com 14-260110:

There is believed to be strong concentration of submarines and air group in the Marshalls which comprise airron twenty four at least one carrier division unit plus probably one third of the submarine fleet.

[3] Ref. (c), Com 16-261331:

"Second section (expected to operate in mandates) crudiv five X Cardiv three Ryujo and one Maru-----"

"Cannot confirm supposition that carriers and submarines in force are in mandates X. Our best indications are that all known first and second fleet carriers still in Sasebo-Kure area X-----"

It is apparent that everyone has jumped to the conclusion that "carrier division unit" meant "carrier division," but such was not the case. Commander Williams used the term "unit" rather loosely: in this instance it was later identified, on November 30, 1941, as "a unit of plane guard destroyers" (i. e. two or more destroyers attached to CarDiv 5). Another source of confusion was in the loose use of the term "Mandates." To Com 14 it meant Jaluit, Marshalls, and Eastern Japanese Mandated Islands, but to Com 16 it meant Palao or Halmahera. The Japanese Mandated Islands stretched over an East-West belt 2,100 miles long, so the distinction is important.

6. A study of reference (d) reveals the following:

(a) Call "SI TI 4" (previously identified as Cardiv 4) was located at Jaluit on November 19, but on November 21 was identified as a Submarine Squadron.

(b) The November 25th statement, "One or more of the Carrier Divisions are present in the Mandates," was retracted on November 27 by the statements:

"No further information of Carrier Division Five in Mandates."

"Carriers are still located in home waters."

(NOTE: According to reference (j) the Pearl Harbor Attack Force sailed from the Kurile Islands on 27 November 1941.)

(c) On November 30, the above discrepancies were reconciled by the statement:

"The presence of a unit of plane guard destroyers indicates the presence of at least one carrier in the Mandates, although this has not been confirmed."

(d) Another interesting bit of information appeared on November 30:

"The only tactical circuit heard today was one with Akagi and several Marus."

[4] (e) The December 2nd Summary comes clean:

"Almost a complete blank of information on carriers today. Lack of identification has somewhat prompted this lack of information."

(f) The last specific mention of carriers was on December 3rd:

"No information on submarines or carriers."

(g) The record as to carriers is closed with the December 5th entry:

"No traffic from the Commander Carriers or Submarine Force has been seen either."

(h) The earlier estimate of submarine concentration in the Marshalls is reaffirmed on November 30 as follows:

"This unit cannot agree with Com 16 that there is not a submarine concentration in that area (the Marshalls). Every evidence points to a concentration of not only the small (RO-class) Fourth Fleet submarines there but also a good portion of the Fleet submarines of the Submarine Force."

(Note: See enclosure (A) and reference (g).)

7. In view of the foregoing, and after consideration of all other information available to me at this time, I evaluate Com 16's statement "All known First and Second Fleet carriers still in Sasebo-Kure Area," to refer specifically to the following carriers:

<i>CarDiv 1</i>	<i>CarDiv 2</i>	<i>CarDiv 5</i>
Kaga (F)	Soryu (F)	Shokaku
Akagi	Hiryu	Zuikaku

These carriers were in the vicinity of the Japanese main islands on that date, and participated in the Pearl Harbor Raid on 7 December 1941.

CarDiv 3, Ryujo and (Kasuga) Maru, were stated by reference (c) as earmarked for operations under CinC Second Fleet in the forthcoming offensive in Southeastern Asia and were not specifically located, although it was implied that they were at Palao. They did not represent an offensive threat against U. S. possessions other than Guam and the Philippines. Reference (h) and enclosure (A) list the Kasuga (Maru); reference (i) and enclosure (B) do not; she might have been the Shoho.

CarDiv 4 (Hosho and Zuho), second line and escort carriers used for training pilots in flight deck operations, may have been assigned to the Fifth Fleet, or to the First Fleet (see enclosure (A)), or directly under the CinC Combined Fleet. These ships did not represent an offensive threat against U. S. possessions at that time.

[5] The Koryu was listed in reference (h) as being in the Sasebo-Kure Area. Reference (i) describes the Koryu as a sister ship of the Soryu and Hiryu. Enclosure (B) and later information indicate the Koryu was nonexistent. She was undoubtedly confused with one of the four auxiliary carriers.

8 Reference (e), prepared by the Chief Radioman in Charge of Radio Heeia, supports and amplifies reference (d), but introduces one element of confusion. Extracts are quoted below.

1 December 1941

(Nothing of particular interest.)

2 December 1941

"CinC Second Fleet has shifted to Sasebo and is probably going to South China to direct operations of units sent to this area from the Empire."

"No signs of movement of the Third Fleet or Carriers were given in today's traffic. It is believed that they remain in the vicinity of Kyushu. CarDiv 4 is believed to still be at Sasebo. CarDiv 3 has not shown any activity during the last few days, and it is possible that this unit has gone South."

3338 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3 December 1941

"It is believed that the Carriers are still based at or near Sasebo."

4 December 1941

"Very little activity was observed in the Sasebo or Kure areas. The Carriers are believed to have remained in the vicinity of Kyushu."

"The large number of high precedence messages and general distribution might indicate that the entire Navy is being instructed to be prepared for drastic action."

5 December 1941

"No indication as to locations of the Carriers was noted in today's traffic, although it is believed they remain in the vicinity of Kyushu."

[6]

6 December 1941

"At ~~0430~~, Tokyo was heard using 32 kcs, dual with 12330 kcs for UTU broadcast of traffic. This broadcast was discontinued at ~~1800~~, but 7285 kcs (M) was immediately brought up and used until ~~1900~~, when it was secured. This broadcast was in addition to Tokyo's regular UTU. Tokyo also broadcasted traffic on ~~6065~~ kcs (A) during the evening."

"Saipan, Takao and Ominato were also heard broadcasting traffic to units in their vicinities. The use of this method of delivering messages tends to keep unknown the positions of vessels afloat, and is probably one of the first steps toward placing the operation of the Navy on a wartime basis."

9. Reference (f) states on page 9:

"The Naval Intelligence Service in Hawaii, due to lack of information indicating that the bulk of Japanese carriers were at sea, concluded they were in home ports."

The Pacific Fleet Intelligence Officer (Lt Comdr. E. T. Layton U S N) and the Hawaiian Communication Intelligence Officer (Comdr. J. J. Rochefort, U.S.N.) deny ever making such a statement to the Roberts Commission. This information must have come from the District Intelligency Officer (Capt. I. H. Mayfield, U.S.N.) or one of the members of Admiral Kimmel's staff, who were completely outside of the picture as regards Communication Intelligence or locations and movements of Japanese Naval Forces. The statement can find some support in reference (e) but none in reference (d), which was the last word in this matter.

10. Reference (d) was examined by a member of the Roberts Commission—but was not submitted as evidence. Reference (d) was not available to Admiral Hart because it was not submitted to him at Pearl Harbor and could not be located at the Navy Department. Reference (e) was not located until the day before I gave my "on-the-record" testimony to Admiral Hart. It did not quite fit the description of Com 14's Daily C. I. Summaries that Rochefort had told me about in the spring of 1943, but I figured my memory or his had been at fault. So reference (e) was submitted to the "Hart Investigation" to substantiate my testimony as well as refresh my memory. It is apparent that reference (e) has been the source of confusion and misleading evidence in the two earliest investigations of the Pearl Harbor Disaster.

L. F. SAFFORD,
Captain, U.S. Navy.

[7] Secret

19 MAY 1945.

Memorandum for Lieut. Commander John F. Sonnett, U. S. N. R.

Sub: Evaluation of "UTU" Broadcasts.

Ref:

- (a) Com 14—Routine #52200 (Dec. 1941).
- (b) Com 14 Communication Intelligence Bulletins (1 Nov.-6 Dec. 1941).
- (c) Station "H" Chronology (1 Dec.-6 Dec. 1941).
- (d) CinCAF—Priority #20345 (Dec. 1941).
- (e) CinCAF—Priority #20730 (Dec. 1941).
- (f) CinCAF—Routine #21636 (Dec. 1941).
- (g) CinCAF—Priority #61255 (Dec. 1941).

Encl: (A) Copies of references (d), (e), (f) and (g).

1. Reference (a) reported to Com. 16 and to Chief of Naval Operations;

"UTU's are being sent by HA FU 6 (Tokyo Radio) on 32 kilocycles instead of 39 kcs as before."

This message was sent with *ROUTINE* precedence was handled by the Navy Department Code Room, and was delivered to Op-20-G at 1943 GCT on 6 December 1941 according to notation on the message.

2. Reference (a) is, to a large extent, evaluated by references (b) and (c), relevant portions of which are quoted below:

2 December 1941 (Ref. (b))

"The most prominent factor in today's traffic is the apparent confusion in the routing of traffic for certain major parts of the Japanese Fleet. There were instances where the same dispatch was repeated several times after it appeared on the Tokyo broadcast, and also where Takao Radio received the same dispatch that it previously sent. ComSixteen reported Second and Third Fleets in Takao area and that Takao was broadcasting traffic to those fleets. This broadcast was not uncovered here and contrary to location reports, there was one indication that these two fleets were not close to Takao. In several instances, Takao Radio forwarded traffic to Tokyo for these fleets. Summing up all reports and indications, it is believed that the large fleet made up of Second, Third and First Fleet units has left Empire waters but is either not close enough to Takao for good communication or is proceeding on a course not close to Takao."

[8]

3 December 1941 (Ref. (b))

"Traffic volume normal with receiving conditions good."

"It is the impression that both Second and Third Fleets are underway but are not verified by Radio Intelligence means."

3 December 1941 (Ref. (c))

"Takao, using call *NUKU*, was heard broadcasting traffic on 7155A kcs (night) and 14310A kcs (day). This broadcast was similar to the Tokyo UTU broadcast. Traffic was broadcast to CinC's combined, Second and Third Fleets, Comdr. Combined Air Force, Comdr. Indo-China Force and several unidentified afloat calls."

4 December 1941 (Ref. (b))

"Traffic volume normal with fair receiving conditions. Takao Radio (in Formosa) today instituted a fleet broadcast system using the prefix UTU in heading so that there are now two fleet broadcasts in operation."

"It is now believed that CinC Second Fleet is in the vicinity of Takao and that apparently conflicting evidence is due to traffic destined for the Tokyo UTU broadcast which CinC Second Fleet is still copying."

3340 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4 December 1941 (Ref. (c))

"Takao continued to broadcast traffic on 7155A kcs (night) and 14310A kcs (day) to ships in that vicinity. A regular series of UTU numbers are being used by Takao and the broadcast is similar to Tokyo's. Takao uses the call *NUKU*, and calls *RIKU* (All ships in my vicinity?)."

5 December 1941 (Ref. (b))

"Traffic volume heavy. All circuits overloaded with Tokyo broadcast going over full 24 hours. Tokyo-Mandates circuit is duplex operation. There were several new intercept schedules heard. Ominat Radio working Sama and Bako sending fleet traffic. *The Takao broadcast handling traffic to Second and Third Fleets while the Tokyo broadcast is still handling traffic for these units also.* It is noted that some traffic being broadcast several days old WHICH INDICATES THE UNCERTAINTY OF DELIVERY EXISTING IN THE RADIO ORGANIZATION."

[9] "Neither the *Second or Third Fleet Commanders* have originated any traffic today. They are still frequently addressed but are receiving their traffic over broadcast. *They are undoubtedly in Takao area or farther South since the Takao broadcast handles nearly all their traffic.*"

5 December 1941 (Ref. (c))

"Takao continues the use of the UTU broadcast on 7155 kcs to units in that area. From all indications, ClnC's Second and Third Fleets are in the Takao area or have moved even farther South from Takao."

"Saipan, Ominato and Takao were heard broadcasting traffic to vessels in their vicinity. Tokyo broadcasted traffic on 12330 kcs in addition to his regular UTU broadcast. At 0430/6th Tokyo was observed using 32 kcs for an UTU broadcast. This frequency was used dual with 12330 kcs. Signals were very strong during the day. The use of this low frequency indicates traffic sent on this broadcast is for ships at a great distance from Tokyo."

6 December 1941 (Ref. (b))

"Traffic volume very heavy with a great deal of old traffic being transmitted. Messages as far back as 1 December were seen in the traffic. *This is not believed an attempt to maintain a high traffic level, but is the result of confusion in traffic routing with uncertainty of delivery.* The stations now holding broadcasts are: Tokyo (with 3 distinct and separate broadcasts), Saipan, Ominato, and Takao."

"Still no traffic from the Second and Third Fleet Commanders. These units are sending their traffic via the Takao and Tokyo broadcasts."

"Fifth Fleet appears dispersed about the Japan Sea with Ominato broadcasting traffic for this unit."

6 December 1941 (Ref. (c))

"Takao continues to broadcast traffic for ships in that vicinity on 7155 kcs (A) (night) and on 14310 kcs (A) (day)."

"At 0430, Tokyo was heard using 32 kcs, dual with 12330 kcs, for UTU broadcast of traffic. This broadcast was discontinued at 1800, but 7285 kcs (M) was immediately brought up and used until 1900, when it was secured. This broadcast was used in addition to Tokyo's regular UTU. Tokyo also broadcast traffic on 6665 kcs (A) during the evening."

[10] 3. It was a matter of official record in Op-20-G, and common knowledge among our intercept operators, that the Naval Radio Station Tokyo had, on several occasions during the period 1936-1941, keyed other transmitters for test or during Grand Maneuvers of the Combined Fleet. The transmitters that are specifically remembered are:

Haranomachi (250 miles north of Tokyo)			
(Commercial)-----	19.6	kcs	400 kw (reported)
Fukuoka (near Sasebo) (Commercial) 32	kcs		100 kw (estimated)
Kure (Navy)-----	57	kcs	50 kw (estimated)
Yokosuka (Navy)-----	63	kcs	50 kw (estimated)

By way of comparison, corresponding characteristics are listed for the transmitter used for regular Tokyo UTU broadcasts:

Tokyo (Navy) 39 kcs 100 kw (estimated)

It was also a matter of general knowledge and official record that Tokyo Radio normally operated at reduced power but did not hesitate to go to full power when anything important occurred. Broadcasts on 19.6 kcs from Haranomachi (JAA), the most powerful station in Japan, would have implied submerged reception by submarines or transmission to a far-distant surface force.

4. References (d), (e), (f) and (g) report actual sighting of the Japanese Naval Forces referred to in paragraph 2 above. Reference (g), reporting the Japanese Amphibious Force which landed at Kota Bharu a day or two later, was deciphered in the Navy Department Code Room at 1557 GCT on 6 December 1941. This was approximately two hours before reference (a) was received by Op-20-G. In view of the actual sighting of the Japanese Invasion Force heading for the Kra Peninsula, reference (a) came as an anticlimax.

L. F. SAFFORD,
Captain, U. S. Navy.

[15] Secret 21 MAY 1945.
Memorandum for Lieut. Commander John F. Sonnett U. S. N. R.
Subj: Information concerning the Japanese passenger ship TATUTA MARU
and American passenger ship PRESIDENT MADISON.

Ref:

- (a) CinCAF 910300 (Dec. 1941).
- (b) OpNav 971722 (Dec. 1941).
- (c) "Where Away" (1944) by Perry & Leighton.
- (d) AmCon Batavia #263 dated Dec. 31, 1941.
- (e) AmCon Singapore #391 dated Dec. 29, 1941.
- (f) Minister Vichy #1191 dated Aug. 14, 1942.

1. Reference (a) requested authority for CinCAF to use the PRESIDENT MADISON for evacuation of American Marines plus about 615 American Nationals in North China area, and advised that the MADISON could arrive at Chingwangtao (seaport for Peiping) on 10 December 1941.

2. Reference (b) advised CinCAF six days later that the State Department was informing the Japanese Government of the MADISON'S movements and requesting that she be allowed to proceed "freely and without hindrance" in return for similar arrangements "made for TATUTA MARU now enroute Los Angeles to evacuate Japanese Citizens." It is apparent from the tone of reference (b) that war in Eastern Asia is anticipated but that this war does not include the United States. Reference (b) was prepared by the Central Division of Naval Operations (Op-13) and the records of that Division may contain additional information on this subject.

3. Reference (c) states on pages 39-48 that the USS MARBLEHEAD joined the PRESIDENT MADISON on 9 December 1941 in Balikpapan (Borneo) and escorted her to Surabaya (Java). It mentions the "frightened passengers" on the MADISON. References (d) and (e) report the departure of the MADISON (with evacuees) for Colombo on 29 December 1941.

4. Reference (f) is the State Department's only readily available reference to the TATUTA MARU. It reports that the TATUTA MARU will be used as an "exchange ship" for civilian internees. However, it is believed that additional information could be located in the files of the State Department, of Op-13, and of Op-20-G.

5. An interesting story appeared in reference (c) on page 28, as follows:

"Back in the States it was still December 6th. A minute or two after three that morning a plain-language message came over the radio. * * * By 3:15 the general alarm began hammering the MARBLEHEAD's people into wakefulness. * * * Over the loudspeaker system were coming the

relentless words: 'Man your battle stations.' When all stations had been manned, an announcement was made over the public address system: 'We have just received an official plain-language message which says. "The Japanese have commenced hostilities. Act accordingly."'

L. F. SAFFORD,
Captain, U. S. Navy.

NOTE: The Memorandum bear the following handwritten notes:

"The authors were a bit ambiguous at this point."

"Dick Lern, Navigator of the MARBLEHEAD says this was just after the attack on Pearl Harbor, Monday Dec. 8th, Tarapan Time. A check with the book shows that 'still Dec. 8th referred to the quiet evening' the day before 0300/8th (Tarapan Time)=2100/7th GCT=1030/7th (Pearl Harbor Time)"

"This could have been based on CincPac 071542 or NSS 071930 ([illegible] 142).

[17] Secret

[Handwritten note:] Note: Not given to Adm. Hewitt or Lt. Cdr. Sonnett. Memorandum of conversation with Mr. Walter Foote at the State Department on Wednesday, 30 May 1945.

1. Mr. Walter Foote was the American Consul General at Batavia, Java, from 1927 until the capture of Java by the Japanese in 1942, except for a short tour of duty in Australia. At the present time he is attached to the State Department and is standing-by to return to Java as diplomatic representative of the United States Government. Mr. Foote knew all the NEI officials intimately and was taken into their confidence in all official matters in their relations with Japan. Mr. Foote may be reached on Branch 420 at the State Department, in care of Miss Jane Wilson.

2. Mr. Foote got his information about the Winds "Set-Up" message from "Tony" Lovink, Advisor to the Governor General for East Asiatic Affairs. Mr. Lovink is now Netherlands Ambassador at Chungking, being one of the few high Dutch officials to escape from Java. Mr. Lovink was head of the NEI Intelligence Service and was well informed as to Japanese plans and intentions. As early as July, 1941, Mr. Lovink informed the Governor General that Japan was planning the conquest of East Asia and the only thing in doubt was just when the Japanese would commence their advance. Mr. Lovink said the Winds "Set-Up" was the first tangible thing that he had to show his Government to prove his predictions. As he expressed it, "It was the first thing I could sink my teeth into." Mr. Lovink kept warning the NEI Government as to the Japanese plans and preparations for war, and was regarded as an alarmist. Subsequent events proved him 100% correct throughout.

3. Mr. Lovink informed Mr. Foote of the Winds "Set-Up", and Mr. Foote sent Batavia confidential message #220, dated 4 December 1941, addressed to the State Department, after thinking the matter over for about two hours. This message was largely at Mr. Lovink's behest. Lieut. Colonel Thorpe, USA, and Lieut. Commander Slawson, USNR, got their translations of the Winds "Set-Up" directly from the NEI War Department at Bandoeng. (Lt. Comdr. Slawson was killed in action off the coast of New Guinea.) (Lt. Col. Thorpe is believed to be still alive.)

4. The Dutch listened for the Winds "Execute" message but did not hear it. Mr. Foote is positive that he would have been notified if any Winds "Execute" had been heard in Java. The Dutch were convinced that Japan was going to make war on them on December 6, 1941, when the big convoy of 35 transports (Mr. Foote's recollection), guarded by about six cruisers and several destroyers, was sighted heading straight for Kota Bharu (Malaya). The Dutch did not think that Japan was going to attack the United States and Pearl Harbor came as a complete surprise to them.

5. Vice Admiral Helfrich, NEI Commander in Chief, ordered his subs to sea on December 6, possibly earlier, and stationed them to defend the Netherlands East Indies. Submarines had orders not to commence hostilities [18] without positive orders. When the news of the Jap attack on Pearl Harbor reached Java, the Governor immediately broadcast the following message to all NEI armed forces:

"We are now at war with Japan which has just attacked Pearl Harbor,"

or words to that effect. The Dutch Navy commenced hostilities immediately after this broadcast but took no hostile action before. (Vice Admiral Hel-

3344 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

frich attended the San Francisco Conference in 1945 as one of the Dutch delegates.) The story that NEI Fleet put to sea on December 8, 1941, with orders to sink anything flying the Japanese flag seems to be a somewhat garbled version of what actually happened.

6. The NEI Intelligence were very alert. They had all the leading Japanese under constant surveillance throughout November and December, 1941, and had most of them under arrest within fifteen minutes of the time the news of the attack on Pearl Harbor was broadcast by the Governor General. Mr. Foote personally saw one whole block of Japanese run down the street in their underclothes in the custody of NEI policemen.

7. Mr. Foote lived next door to the Japanese Consul General and saw his arrest a few minutes after the previously-mentioned incident. Mr. Foote saw the Japanese Consul General burn his codes and secret papers in his back yard a day or so before Pearl Harbor. He could see servants bringing papers from the consulate and could see the smoke flame up each time a new batch was thrown on. (Mr. Foote was burning his own secret papers at the same time in his own back yard.)

8. When Mr. Foote came to Washington about a year ago, prior to going to duty at Curacao, NWI, he looked up all his telegrams and reports on file in the State Department to refresh his memory. Mr. Foote recalled the #220 as soon as he saw it. He stated that there was no record in the State Department of any further reference to the Winds Message or anything in the nature of a war warning, and that he did not recall ever having sent one. He is thoroughly convinced that the Dutch did not hear the Winds "Execute" message but that they would have believed it if they had heard it. Mr. Foote was one of the very last white men to leave Java. He escaped on a small steamer from a small port down the coast with nothing but the clothes on his back. He received the warning to get out from Captain J. M. Creighton, U. S. Navy, who escaped through some other route, believed by plane.

9. "Tony" Lovink was thoroughly convinced that the Winds "Execute" message would contain the Japanese Government's decision as to peace or war with Russia, the United States, and England (including NEI), respectively, and impressed this fact on Mr. Foote.

10. The above memorandum is prepared from notes made at the time and is a reasonably accurate summary of Mr. Foote's statements.

22 JUNE 1945.

[19] Secret

Memorandum for Admiral Hewitt.

Subj: Pearl Harbor Investigation.

Ref: (a) My testimony given this date.

1. I now recall that Lieut. Commander Brotherhood told me that he did not receive a written copy of the "False" Winds Message from the F. C. C., but merely received the information by telephone. The only written version of the "False" Winds Message we ever had prior to 1944 was a memorandum of the phone call in Brotherhood's handwriting. Only one significant word (North) appeared and it was in English. It was this memorandum that Kramer threw in the "burn bag" after telling Brotherhood that this was not what we were looking for.

2. The Winds "Execute" Message which passed through my hands on the morning of 4 December 1941 was a teletype copy (typed on yellow teletype paper) of the entire Japanese broadcast about 200 or 300 words long. Three significant words (Kita, Higashi, and Nishi) appeared and they were in Japanese. Kramer's translation appeared in pencil, or colored crayon, at the bottom of the sheet. There was very little chance of confusion.

3. I would like to make one correction in the testimony I gave today:

"Mr. Phillip Cate, Japanese translator, employed by the Navy Department is still alive. It was his brother, employed as a Japanese translator by the War Department, who died a few weeks after the attack on Pearl Harbor."

Respectfully,

L. F. SAFFORD,
Captain, U. S. Navy.

[20] Confidential

14 JULY 1945.

MEMORANDUM OF CONVERSATIONS IN CONNECTION WITH ADMIRAL HEWITT'S
INVESTIGATION OF THE PEARL HARBOR DISASTER.

1. This memorandum is prepared, while events are still fresh in my mind, for possible use in connection with future Investigations of the Pearl Harbor Disaster or Court-martials in connection with Pearl Harbor. It includes certain acts which strike me as *irregular or unusual and probably illegal*.

2. On or about Friday, 11 May 1945, I was called to an unofficial conference (or meeting) conducted by Lieut. Comdr. John Sonnett, USNR, in Room 1083A, Navy Building. He was in civilian clothes, as he has been on every occasion on which I have seen him. Sonnett told me that he had been assigned as a legal assistant to Admiral Hewitt in an investigation of the responsibility for the Pearl Harbor Disaster, that he was also a special representative for Secretary Forrester in this investigation, and that he was authorized to handle Top-Secret and Secret information and documents. He showed me papers signed by Secretary Forrester and Fleet Admiral King verifying these statements. At my request, he let me read the Precept which directed Admiral Hewitt to conduct the investigation. It was my understanding that Admiral Hewitt had not yet returned to Washington and that Sonnett was getting things lined up to expedite matters after the Admiral's arrival.

3. I answered many questions pertaining to my testimony before previous investigations and discussed discrepancies between my testimony and the testimony of other witnesses. Sonnett requested that I give him, by the end of the next week, written memoranda to be used as a basis of study and examination (under oath) on the subjects listed below. This was done, and the memoranda submitted as follows:

Subject	Date submitted	Remarks
"Winds Message" (6 pages).....	15 May 1945	Withdrawn on 18 May 1945 at the suggestion of Lt. Cdr. Sonnett. Original retained for possible future use.
Evaluation of Messages of 26 November 1941 (6 pages).	17 May 1945	Also lists the 6 carriers described by Com 16 as "all known First and Second Fleet Carriers."
Evaluation of "UTU" Broadcasts (8 pages).	19 May 1945	No action was taken because Jap invasion fleet had been sighted by RAF planes off Kota Bharu.
Tatuta Maru and the President Madison (1 page).	21 May 1945	Indicates that on 7 Dec. 1941 the CNO refused to believe that the U. S. would be involved in the war that was imminent in East Asia.

[21] On Sonnett's request, I prepared and furnished him copies of certain U. S. Naval messages, the Station "H" Chronology for 1-6 Dec. 1941, and Com 14 Daily CI Summaries for 1 Nov.-6 Dec. 1941.

4. It was apparent to me on my very first meeting with Lieut. Comdr. Sonnett that he was acting as a "counsel for the defense" for the late Secretary Knox and Admiral Stark rather than as the legal assistant to the investigating officer. His purpose seemed to be to refute testimony (before earlier investigations) that was unfavorable to anyone in Washington, to beguile "hostile" witnesses into changing their stories, and to introduce an element of doubt where he could not effect a reversal of testimony. Above all, he attempted to make me reverse my testimony regarding the "Winds Execute" Message and to make me believe I was suffering from hallucinations.

5. I talked to Sonnett the second time on 18 May 1945, and the third time a day or two later. On these latter occasions, like the first, Sonnett tried to persuade me that there had been no "Winds Execute" Message, that my memory had been playing me tricks, that I had confused the "False Winds Message" with what I had been expecting, and that I ought to change my testimony to permit reconciling all previous discrepancies and thereby wind up the affair. In some cases the idea was stated outright, in some cases it was implied, and in other cases it was unexpressed but obviously the end in view.

6. I distinctly recall Lieut. Comdr. John Sonnett, USNR, making the following statements to me during the course of the above-mentioned conferences:

"You are the only one who seems to have ever seen the 'Winds Execute' Message."

"How could the 'Winds Execute' be heard on the East Coast of the U. S. and not at any of the places nearer Japan?"

"It is very doubtful that there ever was a 'Winds Execute' Message."

"It is no reflection on your veracity to change your testimony."

"It is no reflection on your mentality to have your memory play you tricks—after such a long period."

"Numerous witnesses that you have named have denied all knowledge of a 'Winds Execute' Message."

"You do not have to carry the torch for Admiral Kimmel."

[22] 7. I testified before Admiral Hewitt the first time on or about 24 May 1945, before he went to Pearl Harbor. I testified before Admiral Hewitt a second time on 22 June 1945, after his return from examining witnesses at Pearl Harbor. Upon completion of my testimony (in which the "Winds Execute" Message had figured), I asked him, "off-the-record," if there was still any doubts in his mind as to the "Winds Message" having been sent by Japan and disseminated in the War and Navy Departments. The Admiral looked startled, and before he could reply Sonnett said:

"Of course, I am not conducting the case and I do not know what Admiral Hewitt has decided, but to me it is very doubtful that the so-called 'Winds Execute' Message was ever sent."

Admiral Hewitt thought a minute or two more and then said:

"You are not entitled to my opinion, but I will answer your question. There is no evidence of a 'Winds Execute' Message beyond your unsupported testimony. I do not doubt your sincerity, but I believe that you have confused one of the other messages containing the name of a wind with the message you were expecting to receive."

8. For my part, I do not doubt Admiral Hewitt's integrity, but I do believe that Sonnett has succeeded in pulling the wool over his eyes.

9. I also believe that Sonnett employed similar tactics on other witnesses whose testimony had favored Admiral Kimmel, particularly Rochefort and Kramer.

10. Copies of the memoranda described in paragraph 3 are appended hereto. Also appended is a memorandum to Admiral Hewitt, dated 22 June 1945, clarifying my testimony regarding the "Winds Execute" Message and indicating that Sonnett had attempted to trick me into stating the opposite of what I intended to say.

/s/ L. F. Safford,

/t/ L. F. SAFFORD,

Captain, U. S. N.

[23] [Following Memorandum bears this handwritten note:]

18 May 1945.

Delivered to Lt. Cdr. Sonnett by Lt. Cdr. Linn about 1000 on 15 May 1945.

Withdrawn on May 18, 1945 at the suggestion of Lt. Cdr. Sonnett.

Retained for possible use at the Next (?) investigation of Pearl Harbor.

L. F. SAFFORD.

Secret

14 MAY 1945.

Memorandum for Lieut. Commander John F. Sonnett? U. S. N. R.

Subj: Winds Message.

1. To the best of my knowledge and belief the following officers knew, in December 1941, that the Winds "Execute" message had been broadcast from Tokyo on (or about) 4 December 1941 (and prior to 7 December 1941), although some of them did not learn about it until after the attack on Pearl Harbor:

ARMY

Name	Present rank	Station and duty on 7 December 1941
George C. Marshall	General of the Army	Chief of Staff, U. S. Army.
Leonard T. Gerow	Lt. Gen. U. S. A.	Director, War Plans Division.
Dawson Olmstead	Maj. Gen. U. S. A. (Ret.)	Chief Signal Officer.
Sherman Miles	Maj. Gen. U. S. A.	Director of Military Intelligence, War Plans Division (Handwritten note) Military Intelligence Division (WDGS) ¹ (Corrected after return. LFS).
Clayton Bissell	Maj. Gen. U. S. A.	Army Communications, Office of Chief Signal Officer.
Otis K. Sadtler	Col. U. S. A.	In charge, Far Eastern Section, Military Intelligence.
Rufus S. Bratton	Brig. Gen., U. S. A.	Chief of Signal Intelligence Service, Office of Chief Signal Officer.
Rex W. Minckler	Col., U. S. A.	In charge, Japanese Section, SIS, Office of Chief Signal Officer.
Harold Doud	Col., U. S. A.	
[24]		
Robert E. Schukraft	Col., U. S. A.	In charge, Intercept Section, SIS, Office of Chief Signal Officer.
Frank B. Rowlett	Lt. Col. (Signal Corps Reserve), U. S. Army.	Principal Cryptanalyst, Japanese Section, SIS, Office of Chief Signal Officer.

NAVY

H. R. Stark	Admiral, U. S. Navy	Chief of Naval Operations.
R. E. Ingersoll	Admiral, U. S. Navy	Asst., Chief of Naval Operations.
R. K. Turner	Vice Adm., U. S. N.	Director, War Plans Division.
T. S. Wilkinson	Vice Adm., U. S. N.	Director of Naval Intelligence.
Leigh Noyes	Rear Adm., U. S. N.	Director of Naval Communications.
J. R. Beardsall	Rear Adm., U. S. N.	Naval Aide to the President.
J. R. Redman	Rear Adm., U. S. N.	Asst. Director of Naval Communications.
F. E. Beatty	Rear Adm., U. S. N.	Aide to the Secretary of the Navy.
L. F. Safford	Capt., U. S. N.	Op-20-G. In charge, Security Section, Naval Communications.
A. H. McCollum	Capt., U. S. N.	Op-16-F2. In charge, Far Eastern Sect., Naval Intelligence.
G. W. Welker	Capt., U. S. N.	Op-20-GX. In charge, Intercept and Direction Finding Section.
[25]		
A. D. Kramer	Capt., U. S. N.	Op-20-GZ. In charge, Translation and Dissemination section. (Actually attached to Far Eastern Section of Naval Intelligence.)
L. W. Parke	Comdr., U. S. N.	Op-20-GY. In charge Cryptanalytical Section.
A. A. Murray	Lt. Comdr., U. S. N. R.	Watch Officer in Op-20-GY.
H. L. Bryant	Chief Ship's Clerk, U. S. N.	Confidential Yeoman in Op-20-GZ.

¹ [Handwritten note:] Corrected after return. LFS,

[26] 2. An element of confusion was caused by the Tokyo Weather Forecast or "False" Winds Message intercepted by the F. C. C. at 2200 GCT, 4 December 1941, and phoned to Lt. Comdr. Brotherhood during the evening of 4 December 1941. It is believed that certain officers attached to Op-20-G in December 1941 had in mind the "False" Winds Message when they informed me that they knew of the "Winds Message." Their names are as follows:

Lt. Comdr. G. W. Linn, U. S. N. R.
 Lt. Comdr. F. M. Brotherhood, U. S. N. R.
 Lt. Comdr. A. V. Pering, U. S. N. R.
 Lieut. F. L. Freeman, U. S. N.
 Ensign Wilmer Fox, U. S. N.

The F. C. C. interception of another Winds Execute Message between 0002 and 0035 (GCT), 8 December 1941, proves that the Japanese Government *did* use this system for broadcasting war warnings.

3348 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

3. There never has been any doubt in my mind that the Winds "Execute" Message was broadcast from Tokyo two or three days prior to the attack on Pearl Harbor and forwarded to the Navy Department. The points in doubt, which I sought to clarify by sighting the incoming Japanese message (or its translation), were:

- (a) Exact date [i. e. December 4 (Thursday) or December 5 (Friday) 1941].
- (b) Exact wording of the original Japanese broadcast.
- (c) Station call, time and frequency of the Japanese Radio Station which broadcast it. (This would reconcile "skip" phenomena.)
- (d) Whether received in voice or Morse code.
- (e) Station which intercepted the message.

4. After receiving the Winds "Execute" Message I discussed with Lt. Comdr. Welker (Op-20-GX) the advisability of discontinuing the special intercept watches being maintained to pick up the Winds "Execute." However, only two days previously we had translated Tokyo Circular #2409 (JD #6885) dated 27 November 1941—setting up a system for sending out "Hidden Word Messages" (INGO DENPO) in event of strained relations. Although we expected these would come over regular commercial circuits (as proved the case on the morning of 7 December 1941), we could not be sure, and it seemed advisable to continue the existing set-up which covered all possibilities (even though it meant the operators continuing their doubled-up watches), and required no further orders and no possibility of misunderstanding and confusion. It is my impression that Welker discussed the matter with Capt. Schukraft, and the Army made a similar decision. I have not discussed this with Welker since September 1942 and I have no idea how well he remembers this incident.

[27] 5. Somebody must have notified the War Department about the Winds "Execute" Message because Colonel Bratton telephoned to Admiral Noyes and requested a copy of the original Japanese broadcast so that he could verify the translation. (This was customary in highly important intercepts.) Admiral Noyes got quite indignant and told Colonel Bratton that the Navy's translation was correct and that the War Department would not be furnished a copy of the original message. The foregoing incident, if verified by Colonel Bratton will prove that the Winds "Execute" got as far as Rear Admiral Noyes and G-2.

6. There is one possible source of information on the Winds Message which has not been checked, namely—the Australian C. I. Organization. The Australians had a small C. I. Organization and in December 1941 they were intercepting Japanese Diplomatic radio traffic and reading messages in the J-19 system. (The Dutch in Java were also reading J-19, as well as the British in Singapore and London and the U. S. Army and Navy in Corregidor and Washington.) The Australian C. I. Unit had liaison with the Singapore C. I. Unit, including exchange of translations and keys, except for the Purple and Red machines. The Winds "Set-up" message (Tokyo Circulars #2353 (JD #6875) and #2354 (JD #6850), dated 19 November 1941) were in J-19. Singapore sent translations to Corregidor (CinCAF 281430 (COPEK) to OpNav) and undoubtedly sent these same translations to Australia. The Australians may have intercepted the Winds "Execute" Message on 4 December 1941. If so, this was the basis of Senator Ferguson's "Australian War Warning" which received much publicity in December 1943. This hypothesis could be easily proved or disproved. The following secret message to the Fleet Radio Unit, Melbourne, is suggested:

Secret

"From: SECNAV.

"To: FRUMEL.

"Referring CINCAF twentyeight fourteen thirty November nineteen fortyone and Tokyo circulars twentythree fiftythree and twentythree fiftyfour dated nineteen November same year in jig nineteen did Australians intercept or know of such a warning broadcast from Tokyo on or about four December nineteen fortyone X If affirmative forward by airmail certified. Transcript of broadcast as received with notation as to date X time X frequency X voice or Morse X call letters of transmitting station X location of intercepting station and other relevant data."

[Handwritten note: Australia knew of the Winds "execute" but did not intercept this message locally.

[Note: This message was never sent. LFS.]

[28] 7. Lieut. Colonel Rowlett heard of the Winds "Execute" by office gossip a day or two before the Japanese attack on Pearl Harbor. A few days after the attack Colonel Sadtler came to him and said, "I would like to see the Winds Message," or words to that effect. Rowlett referred him to Major Doud, in charge of the section, who in turn referred him to Colonel Minckler, the Chief of S. I. S. The rest of the story belongs to the Army Investigation rather than the Navy Investigation except for the fact that it furnishes further proof of the authenticity of the Winds "Execute" Message and that some written record of it did exist in the War Department in December 1941.

8. A complete exposition of Radio Wave Propagation would be very lengthy and out of place. It is sufficient to say that the radio frequencies used between Japan and the United States were quite erratic in performance, and that long distance radio communications in an East-West direction are more difficult and less reliable than those in a North-South direction. A few pertinent examples can be given, namely:

(a) The long fourteen (14) part Tokyo Serial #902 (JD-1 #7143) was intercepted solid at Bainbridge Island, Washington. Part Two (of Tokyo Serial #902) and Tokyo Serial #904 (JD-1 #7144) were also copied at Cheltenham, Maryland, and forwarded to the Navy Department and used for the actual decryption. (This is verified in the GY Log for 6 December 1941.) The rest of Tokyo Serial #902 was "uncopyable" at Cheltenham.

(b) Part Two of the very important three-part Tokyo to Berlin #985 (JD-1 #6943) was missed but the first and third parts were copied solid.

(c) We finally had to call on Corregidor to cover the Berlin-Tokyo circuits as the combined efforts of Intercept Stations in the East Coast, West Coast, Hawaii and England could not provide better than fifty (50) percent coverage. During the period 1 December-7 December 1941, the Navy Department received seventy (70) Japanese Diplomatic Intercepts from Corregidor as compared with Seventy-three (73) from Bainbridge Island, Twenty (20) for all other U. S. Navy Stations, and ninety-three (93) for all U. S. Army Stations. The Japanese were trying to reach Rio and Buenos Aires as well as San Francisco, Mexico City, and Washington. (See distribution of Tokyo Serial #2354.) It is not at all surprising that the frequency used to reach Washington, Rio, and Buenos Aires skipped over the West Coast and Hawaii. There is a possibility that this frequency was heard in Australia even though it skipped over Manila, Singapore, and Java.

9. There is one final place where written confirmation of the Winds "Execute" Message may exist—the Record of Proceedings of the Roberts Commission. I cannot believe that they could cover up so completely that some mention of the Winds "Execute" did not slip into the record. First they said I didn't know what was going on around me; now they claim I am suffering from hallucinations. Under the circumstances it is only fair that I be permitted to search through the record for such evidence in order to prove my sanity, as well as my intelligence and my veracity.

[Handwritten note:] See testimony of Col. Fielder and Col. Bicknell—Dec. 24, 1941.

[29] 10. In conclusion the following quotation from my secret memorandum to Colonel West, dated 2 October 1944, is submitted for consideration:

"The reason for my stressing the 'Winds Message' so much in my testimony (in all three cases) is because we could afford to talk about it, even print it in the newspaper, without detriment to the war effort. Even the Dutch know of the Code and the FCC listened for the message. We had the same information—at the same time—from more secret but less dramatic sources. Also the 'Winds Set-up' was the nearest thing to a warning CINCPAC ever got. If the 'Winds Execute' had been heard at Pearl Harbor, the fleet would not have been surprised. And because CINCPAC was given no information that the 'Winds Execute' had been sent, everybody at Pearl Harbor believed it had not been sent and that the Japs were still making up their minds as to the next step."

EXHIBIT NO. 152

BOARD OF WATER SUPPLY, HONOLULU, HAWAII

GENERAL OBSERVATIONS ON DAMAGE BY PROJECTILES IN THE CITY OF HONOLULU ON
DECEMBER 7, 1941

Immediately following the Pearl Harbor attack on December 7, 1941, and after several water main breaks and interruptions of water service had been reported, the writer was delegated by Mr. Frederick Ohrt, Manager and Chief Engineer, Board of Water Supply, to visit the various points in the city where damage had been done and to take notes on the damage and get photographs where practical. This was desired in order that the water department, as a vital agency, would be better qualified in the event of renewed attacks to operate effectively in protecting water mains and other installations and repairing any that were damaged.

3352 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Accordingly, on December 8, and several days following, some forty to fifty places were visited and available information collected. The chief points are listed below:

A Partial List of Points in Honolulu Reported as Struck by Projectiles on December 7, 1941.

(Not all these points were visited; some are probably duplicates due to confusion in reporting.)

Washington Place	2113 Bingham Street
South and Queen Streets	Iolani School & Judd Street
2840 Kalihi Street	Henry Street, upper end
2683 Pacific Heights Road	1888 Puowaina Street
625 Ala Moana	56 Wylie Street
758 Kaaloa Street	Lewers and Kuhlo Streets
1807 Liliha Street	Kamehameha Heights
2653 Rooke Street	44 Dowsett Avenue
Alewa Heights	May Damon residence, Moanalua
Fort and School Streets	2522 Kalihi Road
Kuhio and Kalakau Streets	Moanalua Garden
610 E Street, Damon Tract	Police Shooting Range, water front
North School Street	2640 Kamanaki Road
2160 Numana Road	Waipa Lane
Iolani Palace	1443 Nuuanu Avenue
Judd and Liliha Streets	956 Spencer Street
Nisei Club, 44 South School	1630 Leilehua Street
Lewers and Cooke Company	Robello Lane
Hauoli and McCully Streets	Hawaiian Gas Products, Kuwili St.
Kalihi Pump Station	467 Judd Street
Fort Armstrong	Judd and Iholena Streets
Nuuanu and Kukui Streets	Dowsett Ave. and Alika Drive
734 McCully	Kamamalu Park
3122 Duval Street	Kukui Street

Principal sources of information were the daily papers, the Territorial and City-County offices of Public Works the City-County Road and Garbage Departments, the Board of Water Supply Maintenance and other divisions, the Honolulu Police Department daily log, and finally persons at the various sites of damage. The writer is not an expert in the field of ballistics, or high explosive projectiles, and to avoid error has recorded only what was actually seen, as to damage and explosion effects, without attempting to say what sort of projectile was responsible.

Many observers have testified to the immediate commencement of fire after the striking of projectiles at Lunallilo School and at McCully and King Streets, suggesting that these projectiles may have been of the incendiary type. At many other points the projectiles landed either inside or near houses and then exploded to produce two marked effects, (1) blast damage, and (2) splinter damage. The combination of these two was sufficient to totally wreck a small two- or three-room house when landing in it, or one side and a room or two of a larger house. In such case the damage as the far side of the house or two or three partitions away was not great.

The blast damage was very severe on an adjacent wall, floor, or windows, or on furniture in the room struck, blowing them out, and generally wrecking furniture. In some cases wood splinters or fragments of bric-a-brac were driven through plaster board in the manner of tornado damage. However, it was noticeable that blast damage fell off very rapidly and unbroken windows would be found in the second or third wall removed from the focus of explosion.

Splinter damage was similar in its falling off characteristics. Prentiss says splinter velocities may be 5,000 to 7,000 ft./sec., or 3 to 4 times that of a rifle bullet, but that because of small size and irregular shape, the velocity falls off very rapidly. Observations in Honolulu confirm this strongly. Splinters often went through wooden partitions or the first web of concrete hollow tile but commonly did not go through a second 1" board, and in no case seen by the writer did they go through both sides of an 8" hollow tile wall. In the near vicinity of the focus there was much tearing and rending of wood due chiefly to blast, or to displacement of the structure. In cases where the projectile landed in the street a few feet from buildings, the outer walls were well splattered by splinters, many of which did not pass through even the wooden wall.

A few passed through one or two wooden walls, or broke off corners of wood or masonry. Many windows were broken. It is the writer's impression that except for large glass windows, by far the most damage was blast damage. (This applies to the particular projectiles involved chiefly on December 7, 1941, but is no prediction.)

Some projectiles landing in gardens and out of doors apparently did not explode at all, but merely made a one- or two-foot hole in wet ground and passed several feet downward. General advice to persons in air raids is well borne out by observations. At any point seen by the writer, a person lying in a two-foot trench or behind a two-foot embankment 20 feet away would have been safe. Of course some persons not over 20 feet away were unharmed without protection but that was good luck. Injury and death were due to being tossed about by blast effect, to being struck by objects actuated by blast, and to splinters or fragments of pavement or pavement thrown by explosion.

Damage in one store was exceedingly slight by direct hit, blast or explosion, but came chiefly by water from the breaking of one sprinkler head. The corner of one small garage annex was struck by a projectile which knocked off one or two cubic feet of the concrete foundation and splintered the corner of the woodwork but did not explode and did no injury to two people eight or ten feet away. All the observations of the writer indicate that on hearing a raid alarm it is imperative to get under the best cover that is nearby, and that side cover is most important, and roof cover next. If roof cover is not available, an open trench or the corner of a walled garage even if open to one side offer a large proportional safety.

EXHIBIT NO. 153

STATEMENT TO THE JOINT CONGRESSIONAL COMMITTEE TO INVESTIGATE THE PEARL HARBOR ATTACK

A RECORD OF CIVILIAN AND INDUSTRIAL PREPAREDNESS IN THE TERRITORY OF HAWAII
PRIOR TO DECEMBER 7, 1941

Introduced by the Hawaiian Sugar Planters' Association, Territory of Hawaii

[1] *To the Joint Congressional Committee to Investigate the Pearl Harbor attack*

I. Purpose of this statement

It is the understanding of the Hawaiian Sugar Planters' Association that your Honorable Congressional Committee has as its objective an exhaustive investigation intended to present to the public a full report on all activities leading up to the Pearl Harbor attack on December 7, 1941, and that in carrying out this investigation all persons have been invited to present to the Committee any material, documents or other relevant information pertaining thereto.

It is the further understanding of the Hawaiian Sugar Planters' Association that your Committee, in addition to its primary objective of bringing before the public any relevant information having any bearing or significance relative to a final determination of responsibility for that disaster, is also interested in correcting any deficiencies, omissions, misimpressions or incorrect conclusions or

inferences resulting from the reports of previous investigating committees or boards.

The Hawaiian Sugar Planters' Association, on behalf of its member plantations, plantation agents, and the officials and individuals associated with these organizations, and on behalf of the Territory of Hawaii generally has therefore prepared this statement for the consideration of your Committee, with the request that it be entered into, and made a part of, the record of the Committee's investigation for three primary reasons:

First, it is believed that the information presented herewith, duly supported by records and documents or true copies thereof has direct bearing upon the activities of the armed forces in this area prior to December 7, 1941; and

Second, it is conclusive proof of an outstanding record of cooperation with the armed forces in the fulfillment of their mission prior to the beginning of the war in the Pacific, as well as subsequent thereto, on the part of the Hawaiian Sugar Planters' Association, its member plantations, their agents, and individuals associated therewith and the Territory of Hawaii generally; and

Third, it is believed that the information presented herewith duly supported by records and documents or true copies thereof, is conclusive proof of the error contained in certain testimony given before the Army Pearl Harbor Board, appointed by the Secretary of War, pursuant to the provisions of Public Law 339, 78th Congress, approved 13 June 1944, to Ascertain and Report the Facts Relating to the Attack made by the Japanese Armed Forces upon the Territory of Hawaii on December 7, 1941, and is also conclusive proof of the falsity of the inferences and conclusions which could be drawn from the reading of the Report of said Board as released to the public on August 29, 1945, in that said Report incorporated excerpts of the testimony herewith objected to in a manner indicating that the statements contained in said testimony were accepted by the Army Pearl Harbor Board, [2] which thereby were capable of false and misleading impressions, and which in fact did result in false and misleading impressions in the public mind in that said testimony and the presentation in said Report intimated a lack of cooperation with the Army and the Army Commanders in Hawaii, which conclusion is erroneous, is entirely lacking in foundation, and has resulted in a grave injustice to the Hawaiian Sugar Planters' Association, its member plantations, their plantation agents, officials and individuals associated therewith and the people of Hawaii generally.

The testimony specifically objected to as presented before the Army Board to Investigate Pearl Harbor are those portions of the testimony of Major General Henry T. Burgin, U. S. A., Commanding General of Artillery, Hawaiian Department, said excerpts of testimony being set forth on pages 174-177, inclusive of the report of said Board as released on Wednesday, 29 August 1945, by the Secretary to the President of the United States. The statements in said testimony were that (1) one of the great handicaps to development of field artillery positions was resistance from land owners to letting the artillery go on the land or lease it for the placing of battery positions; (2) that if General Short had gone to Alert #3 there would have been great opposition from important and influential civilians on the island and particularly those who compose what is known as the Big Five; (3) that among those influential citizens whom he thought might have voiced their objection were, among others, Mr. Walker, a sugar man, General Wells, and the Hawaiian Sugar Planters' Association, and those having the land and crop interests in sugar and other crops. The testimony to which objection is taken is set forth verbatim as Exhibit "A", appended herewith.

It is contended that the statements in this testimony before the Army Board to Investigate Pearl Harbor are in error, that the statements are entirely lacking in foundation, and that the inferences of lack of civilian cooperation in Hawaii with the Army and Army Commanders which inferences resulted from the inclusion of said testimony in the Report of the Army Board are likewise in error and lacking in foundation, and that the weight of the evidence supported by the records prove conclusively an outstanding record of cooperation in Hawaii on the part of the people generally, and in particular on the part of the Hawaiian Sugar Planters' Association, its member plantations, their plantation agents, officials and individuals associated therewith.

Summary

The following statement presents to your Committee a record of cooperation with the armed forces prior to December 7, 1941, and thereafter on the part of

the Hawaiian Sugar Planters' Association, its member plantations, their agents, and officials and individuals connected or associated therewith, and on the part of the Territory of Hawaii, which, it is submitted, is an outstanding record of cooperation and assistance.

On the part of the Hawaiian Sugar Planters' Association and its member plantations, this record of cooperation is one of established policy extending over a period of many years, built upon close relationship with the armed forces, and mutual recognition of the needs and requirements of the military and the contributions that could and have been made by the plantations in the defense plans of Hawaii. This policy of cooperation was further engendered and developed through the close liaison always maintained between the sugar industry and the military authorities by Major General Briant H. Wells (Ret.) a former Deputy Chief of Staff, United States Army, who in 1934 was made Vice-President and Executive Secretary of the Hawaiian [3] Sugar Planters' Association following his retirement from the Army on completion of his tour of duty as Commanding General, Hawaiian Department. This established policy of cooperation is proven by the fact that sugar plantation lands were made available for Army use prior to Pearl Harbor on each and every occasion that the Army requested the use of such lands. It is demonstrated by the establishment as early as 1940 of an extensive plantation provisional police organization with the purpose of providing police organization for the primary purpose of providing aid and assistance in the defense of Hawaii and the fulfillment of the mission of the armed forces in Hawaii. It is demonstrated by the comprehensive emergency food subsistence program for Hawaii developed by the Hawaiian Sugar Planters' Association long prior to the war, and the organization prior to the war of comprehensive civilian defense committees engaging in extensive preparedness activities under plantation auspices in close coordination with civilian and military authorities. All of these instances of close cooperation and coordination are further emphasized by the war record of the sugar plantations of Hawaii and of the Hawaiian Sugar Planters' Association in the aid and assistance given the armed forces on December 7, 1941 and thereafter, making available all plantation facilities, machinery, equipment, and manpower, in a period of critical emergency.

On the part of the people of the Territory of Hawaii it is submitted that the record of civilian preparedness activities prior to the war is outstanding for its appreciation of the emergency conditions existing in the Pacific long prior to Pearl Harbor. The readiness of the people of Hawaii to do whatever the military and naval commands might advise or desire and in many instances to undertake these preparedness activities on their own initiative, at considerable expense, with the firm conviction long prior to December seventh of the necessity for developing extensive defense preparations reflects to the lasting credit of the people of Hawaii.

This record of cooperation is presented hereafter in full. The preparedness activities of the civilian community of Hawaii is presented in the statements of persons in the community participating in the organization of these activities. It is submitted that these statements provide a complete refutation of the testimony referred to in the report of the Army Board to Investigate Pearl Harbor and any inferences therefrom resulting from the inclusion of said testimony in the report of said Board. This record of cooperation with the military by the Hawaiian Sugar Planters' Association, its member plantations, their plantation agents, and the officials and individuals connected therewith, and the record of civilian preparedness activities on the part of the people of Hawaii generally is submitted to your Committee with the request that it be made a part of the record of your Honorable Committee.

[4]

II.—Certain Inferences of Lack of Civilian Cooperation in Hawaii as Contained in, and Resulting from, the Report of the Army Board to Investigate Pearl Harbor are in Fact Conclusively Refuted Elsewhere in the Same Report.

Certain inferences contained in said testimony are refuted elsewhere in the same report of said Army Board, although not specifically referred to in that portion of the report incorporating this testimony. For example, at page 59 of said report it is stated (italics added) :

"General Herron, who preceded General Short, had been directed on June 17, 1940, by Washington, to institute an alert. (R. 213) This alert lasted six weeks. (R. 214-215). After it was suspended at the end of six weeks it was reinstated for a period. The alert was an all-out alert, with complete dispersion of forces into combat positions and with full equipment and ammunition.

"General Herron testified that there was no disturbance of the civilian population by the use of this all-out alert which was instituted under conditions similar to those which later prevailed for General Short's alert."

"When asked as to the Alerts 1, 2, and 3 of Short, he disposed of these alerts with the following language:

"General HERRON. That was a refinement that the training men put over on General Short when he came out there. I told him I would not do any such thing. There was only one kind of alert, and that was a total alert, and then I would do it in accordance with the situation. But the training men liked refinements, and they recommended three kinds because the Navy had three kinds. But they did not get to the real point of the thing. The Navy has three kinds, but the all-out alert is number one, always. Now they ease up into two and three; but these young men did not know that, and when Short came out they put over the three and got them reversed, so that Short went into the Number 1, which was sabotage. It did not seem to him a very important change, I don't suppose, and it turned out to be vital. It was too much of a refinement,' (R. 228-227)"

And at page 78 (italics added):

"As the entire attack upon Pearl Harbor did not extend beyond approximately three hours, it is obvious that the selection of the correct alert was vital. Historically, and by way of precedent, Short had before him the action of General Herron in the preceding year of an all-out alert under Field Order No. 1 of Herron by which complete dispersal of planes and troops and guns was affected, with ammunition at the guns. *The record shows (Colonel Capron and other witnesses—R. 1398, 2025, 2720, 2728, 2772-2773, 3096-3097) that there was no disturbance of the civilian population as a result of the action by Herron.* This is significant, in view of the fact, as will later appear, that General Short gives that explanation as one of his primary reasons for the selection [5] of Alert Number 1, because he might alarm the population. (R. 427-428, 532-533).

"It should be kept in mind that the civilian population was accustomed to the continued movements of the Army and Navy in their frequent maneuvers and practice operations. Much of the civilian population in this instance was living practically in the midst of one of the greatest military and naval installations anywhere, so that their state of mind would be far different, from that of people on the mainland unaccustomed to such sights. *Then, too, the newspapers oft-times contained much more exciting news, threats and disturbing events, than anything that an alert could stir up, either by the Army or Navy or both. The explanation therefore lacks both substance and credibility.*"

And further on page 79 (italics added):

"At this point the question of sabotage which led to the selection and implementation of Alert No. 1 should be examined. *No single instance of sabotage occurred while Short was in command up to December 7.* It was true that there were 35,000 aliens of Japanese origin and there was a total of 160,000 or about 37% of the population of Japanese origin or affiliations (R. 289), but *in no case was there any instance of misbehavior, despite a very exhaustive investigation being made constantly by the F. B. I. and by G-2, as well as by Naval Intelligence.*

"We have investigated the state of mind and the information as to the actions of the Japanese population in an endeavor to understand why it was that General Short adopted his anti-sabotage alert on November 27 in the face of the increasing international tension, and of his own estimate and that of the Navy that an air attack was the most dangerous form of attack likely to be encountered. We therefore resorted to the testimony of a great variety of witnesses in all walks of life in Honolulu, resident there during 1941, and inquired of their feelings and views and the whole situation as to the Japanese population.

"We could find no substantial evidence of any fear by these witnesses, including some of the best-informed leaders in the civil life of the Islands, that the Japanese would commit acts of sabotage. Their knowledge was based upon long residence in the Islands and experience with the Japanese. Governor Poindexter, newspaper editors like Raymond S. Coll, of the *Honolulu Advertiser*, United States District Attorney Angus Taylor, Shivers, head of the F. B. I., General Wells, executive vice-president of the Hawaiian Sugar Planters' Association, and

Walter Francis Dillingham, president of the Oahu Railway and Land Company and owner or director of many other enterprises in the Islands, concurred with many other witnesses such as ranch owners, government officials, leaders in business, that the risk of sabotage, so long as the Army and Navy were in a predominant position, before an actual landing and show of success by the Japanese, was a relatively minor matter. However, the Army was sabotage-minded. There appeared to be no substantial basis for this fear other than [6] speculation as to what a large body of citizens and aliens of Japanese ancestry might do in case of stress."

On pages 130-131 it is further stated (underlining added) :

"The third portion of the message (from the Chief of Staff's Message dated November 27, 1941, to the Commanding General, Hawaiian Department) is this: 'Prior to hostile Japanese action you are directed to undertake such reconnaissance and other measures as you deem necessary, but these measures should be carried out so as not comma repeat not comma alarm the civilian population or disclose intent. Report measures taken.'

"Comment: This was an order. Short could take such measures, including reconnaissance, as he deemed necessary. What was available to Short for reconnaissance and defensive action and the measures taken by him are fully discussed elsewhere.

"Here again we find the limitation that he must act cautiously. However, the weight of evidence indicated that a higher form of alert than that taken would not have alarmed the public."

These statements indicate that that portion of the testimony pertaining to objection on the part of influential citizens to an Alert #3, is itself refuted by the record and conclusions of the Army Board. The factual record supports this conclusion that the sugar plantations, and the Territory of Hawaii generally have at all times supported, assisted, and cooperated fully in all maneuvers, alerts, and other activities, training or otherwise, of the military authorities in Hawaii.

III.—The Hawaiian Sugar Planters' Association, its Member Plantations, the Plantation Agents and Officials and Individuals Associated Therewith Have as a Matter of Established Policy Cooperated in Every Way with the Army and Army Authorities

As to that portion of this testimony which was placed in the record, and thereafter the report of the Army Board, the statements to the effect that there was opposition from land owners to letting the artillery go on the land or lease it for the placing of battery positions, the record of cooperation with the military on the part of the Hawaiian Sugar Planters' Association, its member plantations and their plantation agents is to the exact contrary, said record of cooperation being an outstanding one over a period of many years, reflecting in the written record thereof, cooperation which has presented no opposition to the military at any time in matters pertaining to requests connected with any defense preparation, plans and training, or other measures taken by the military. This record of cooperation is one commonly recognized, appreciated and accepted by former and present Army Commanders in this area.

To refute such statements and to acquaint your Committee with the record of cooperation of the sugar industry of the Territory of Hawaii with the Army and with Army authorities as a matter of policy, the files of all plantations and of the [7] Hawaiian Sugar Planters' Association have been reviewed thoroughly. Endeavor has been made in the material presented hereafter to present a factual, complete picture of this record of cooperation, resulting from the established policy of the plantations to assist the armed forces in their needs and requirements. Supporting documents and records are included as exhibits. Brief statements of other community preparedness activities have been included to the extent that a true and accurate presentation can be made with brevity covering very extensive activities, where supporting documents would be voluminous.

Should the Committee desire additional material, records or other documents, the Hawaiian Sugar Planters' Association is prepared to present such additional material at the convenience of the Committee.

IV.—Sugar Plantation Lands Were Made Available for Army Use Prior to Pearl Harbor Whenever The Army Requested The Use of Such Lands

The record of the sugar plantations in making lands available to the uses and requirements of the Army is an exceptional record extending over a period of many years. Since the major military activities in Hawaii prior to Pearl Harbor centered on Oahu, the location of Pearl Harbor, a study has been made of the requests made by the Army to Oahu sugar plantations during the period commencing in 1939 and extending up to December 7, 1941. This study involved a careful comprehensive review of all plantation records during this period. Review of all records of plantations and the records of the plantation agents discloses not a single instance in which *any* plantation denied entry to the Army. On the contrary every request, regardless of its nature, whether mere permission to use lands for a certain period or purpose without formal documents, or lease or license to enter, or entry prior to condemnation, was granted with promptness and complete cooperation, reflecting a mutual appreciation of the problems facing the military authorities which is illustrative of a high degree of coordination between civilian interests and the military which, it is contended, would not have been duplicated in any other part of the country.

The requests received by the plantations from the Army during the period mentioned totalled one hundred seventy-nine (179). Approval was given in every case. These requests were of various natures. For example, permission to carry out maneuvers on plantation roads and lands, to establish gun positions, either temporary or permanent, to install cable, radio and telephone communications lines, construct extension spurs to railroads, enter upon plantation lands for surveys for airfields and other installations, and a variety of other related military uses such as camouflage tests in cane lands.

These requests as granted by the seven plantations located on the Island of Oahu are graphically presented on the map attached herewith as Exhibit "B", made a part hereof.

The plantation boundary lines are approximate only, and encompass lands owned or under the control of the sugar plantations. Each black circle represents one request granted. All sugar plantations at one time or another granted blanket permission to the Army for maneuvers of infantry units, Artillery units, or the entire Hawaiian Department. Blanket permission so granted is reflected in shading the various plantations.

[8] Grouping of the circles in the vicinity of Pearl Harbor and Haleiwa reflect the greater concern of the military authorities with these areas. The fewer circles shown on the more remote plantations are indicative of lesser utilization by the military authorities of the lands of those plantations. It should be remembered that verbal authorizations granted, of which there were many, are not shown. Only requests supported by documents have been counted.

This visual presentation reflects the full cooperation at all times of all sugar plantations, regardless of the nature of the requests received by the plantations for the use of their lands. Without discussing each and every request, illustrative examples of the requests received, together with the authorization granted to the Army indicate how closely integrated the Army activities and plantation activities have been on Oahu and conclusively prove the high degree of cooperation. Without burdening down this statement with an exhaustive presentation, a few examples have been selected at random and are supported herewith by true copies of the substantiating documents.

Requests for permission to enter upon plantation lands were in many cases so common that blanket permission for the use of all plantation lands was often granted. In a letter dated November 8, 1940, Mr. James N. Orrick, the Manager of Kahuku Plantation Company, located on the North shore of Oahu, volunteered to Lieutenant General Herron, Commanding General, Hawaiian Department, to grant a blanket authorization covering the use of all the roads and lands under the control of the plantation for maneuver purposes, and including the use of plantation water and any other facilities deemed necessary to carry out maneuvers. In replying to this letter on November 13, 1940, Lieutenant General Herron stated:

"I am in receipt of your exceedingly gratifying letter of November 8th in regard to the use of plantation lands by the troops of this command. What you say in regard to the good conduct of troops on your lands and your most generous offer of a blanket permission give me the greatest pleasure. Please accept my sincere thanks for any my appreciation of your very helpful offer."

Copies of this exchange of correspondence are set forth herewith in full in Exhibit "C".

Similarly by indorsement on February 17, 1941, blanket permission was granted by Oahu Sugar Company to the 64th Coast Artillery (Anti-Aircraft) to occupy positions from time to time on the property owned and controlled by the plantation. Copies of the exchange of correspondence between the Army Colonel Commanding the 64th Coast Artillery (AA) and the plantation manager are included in Exhibit "C". A similar authorization had previously been given on November 21, 1939, on an unlimited time basis by Honolulu Plantation Company to the same Coast Artillery unit. This correspondence is also included in Exhibit "C."

Similar blanket permissions were also granted by other plantations, and are recorded on the attached map.

Contrary to any of the statements concerning opposition from land owners relative to leases of land for gun positions, the records of the sugar plantations indicate that prompt and comprehensive authorization was at all times given whenever request was made by the Army authorities. Immediate entry was granted as a matter of established policy without requiring execution of the formal documents.

[9] For example, in June, 1941, the Real Estate Officer, Headquarters Hawaiian Department, was in the process of leasing three sites of approximately three acres each from Ewa plantation Company, two of which were required for anti-aircraft gun sites, the remaining one for a Sub-Sector Command Post. In a letter dated June 4, 1941, Mr. A. S. Davis, Vice-President of Ewa Plantation Company, pointed out that the plantation was prepared to discuss the terms and conditions of the lease and further added:

"If, however, the importance of this matter to the National Defense Program is such as to require immediate occupancy by the War Department of the areas proposed to be taken, Ewa will be agreeable to such a plan, upon the understanding that, at a later date, maps delineating the specific areas will be furnished by you, together with a formal document."

Copy of this letter is set forth in full in Exhibit "D".

A similar letter dated May 29, 1941, was sent by Mr. John H. Midkiff, Manager of Waialua Agricultural Company, Limited to the same Real Estate Officer, Headquarters, Hawaiian Department, authorizing entry on plantation lands to permit immediate construction of eight gun emplacements, two mortar positions, and permanent trenches and fortifications, it being understood that maps delineating the specific areas would be furnished with a formal instrument covering same at a later date. This authority was granted less than one week from the date of receipt of the request. Copy of this letter is included in Exhibit "D"

Similarly, when on April 25, 1941, Lieutenant General Short, Commanding General, Hawaiian Department, addressed a letter to Mr. H. A. Walker as President of Waianae Company, requesting that the Army be permitted to initiate construction of certain railway spurs across the plantation lands, pending final acceptance by the War Department of the license already granted to the Army to enter and use the plantation lands involved, the plantation through its agents, American Factors, Limited, of which Mr. Walker was President, authorized immediate entry. This authority for immediate entry was transmitted within three days of the time that General Short made his letter request. Exchange of this correspondence is set forth in Exhibit "D".

Other examples can be selected at random. It should be pointed out, moreover, that many of these requests involving troop maneuvers meant many hundreds or even a few thousand men and many vehicles using plantation roads and lands during maneuvers of individual units, as part of division maneuvers, or the entire Hawaiian Department, such maneuvers being scheduled in many instances as surprise alerts. There are attached herewith copies of three letters to Waialua Agricultural Company, Ltd. and to Ewa Plantation Company with reply indorsement thereon authorizing use of lands for planned maneuvers during 1941, and reflecting the constant use of plantation lands by Army units. (Exhibit "E".)

A variety of other requests have been made in the past to the plantations by the Army and promptly granted in a spirit of complete cooperation. For example, in January 1941, the Commanding General of troops at Schofield Barracks desired to perform experiments with the possibilities of camouflaging gun positions in

canefields. This assistance was immediately given by Waialua Agricultural Company, Limited. Exchange of correspondence is attached hereto in Exhibit "F".

At another time a request was addressed to Oahu Sugar Company requesting that new plantings of cane be started about five yards from the fence line at the Waipio Sub-Station (electric power station) in order that defense of the Sub-Station [10] against sabotage might be facilitated and at the same time be made more effective. This request was immediately recognized as set forth in the correspondence included in Exhibit "F".

Further evidence of the willingness of the plantations to cooperate in all matters pertaining to the defense potential of plantation facilities is reflected in a letter of Waialua Agricultural Company, Limited dated July 21, 1939, furnished to various Army authorities including the Department Service Command at Fort Shafter which supplied the authorities with information relative to total employees, the racial groups, engineer and motor equipment available, railroad equipment, etc. Copy of this letter, included in Exhibit "F", is illustrative of the information which has been furnished by all plantations in response to Army requests.

Commanding officers have always been appreciative of this established policy of cooperation as evidenced by this active assistance promptly granted.

When Lieutenant General Herron relinquished his command of the Hawaiian Department to Major General Short in February, 1941, he addressed letters of appreciation to the Hawaiian Sugar Planters' Association expressing appreciation for the continued and substantial contributions of the Association to National Defense. This letter concluded:

"Please believe that the liberal and helpful attitude of the Association is not lost upon the Army and that we are grateful. For my successor, General Short, I bespeak your good offices and a continuance of the generous assistance you have always given to the Army in Hawaii."

Copy of this letter is set forth in full as Exhibit "G".

Letters of appreciation were addressed by General Herron to the various plantations recognizing the cooperation given. Similarly, letters have been received from other commanding officers reflecting their appreciation for consistent cooperation. On June 3, 1940, the Commanding General, Schofield Barracks and Hawaiian Division, Major General Wm. H. Wilson, U. S. A., addressed letters to the plantations expressing appreciation for the cooperation given during the maneuvers in May 1940. Illustrative of these letters is that addressed to Oahu Sugar Company, Limited, included in Exhibit "G". This letter states:

"The success of the maneuvers, completed May 25, 1940, has in a great measure been facilitated by the cooperation of private land owners in allowing Hawaiian Division to use land during this period."

Other phases of this continuous cooperation have been recognized, as for example in a letter from Lieutenant General Short, dated November 29, 1941, thanking Mr. Hans L'Orange, Manager of Oahu Sugar Company, for the assistance rendered in surveys, layouts and location of the airport in the vicinity of Kipapa, although the original plans to locate an additional airport at that location was changed in favor of construction at Kahuku Point. This letter is set forth verbatim in Exhibit "G".

With such evidence of cooperation it is believed that the record of the plantations in making their lands available whenever requested by the Army and to whatever extent required is a record of complete cooperation. It is difficult therefore to understand for what purpose or on what basis the testimony protested herein, amounting as it did to a grave injustice to the Territory generally, could have been introduced in the record without factual support or to understand how the Army Board could therefore proceed to indicate [11] acceptance of this testimony without ascertaining the true factual record of cooperation.

V.—Organization of Sugar Plantation Provisional Police Guard in July, 1940

An outstanding example of a record of cooperation between the Hawaiian Sugar Planters' Association and its member plantations with the Army is demonstrated in the early organization of the Plantation Provisional Police throughout the plantations on Oahu, commencing at the early date of July 30, 1940. Undertaking this program of organization of groups of employees trained in police work under leadership and guidance of trained police of the police

force of the City and County of Honolulu, the Hawaiian Sugar Planters' Association and the plantations through the Oahu Sugar Managers' Association proceeded to develop an effective police organization whose objective was complete training to meet any emergency which might arise.

At a special meeting of the Oahu Plantation Managers' Association held at Waipahu on July 19, 1940, in conjunction with the Army and City and County Police authorities, Mr. T. G. S. Walker was appointed Coordinator of Plans for any emergency which might arise. In a confidential memorandum dated July 30, 1940, to all Sugar Plantation Managers on Oahu, the newly appointed Coordinator outlined the various alerts which the organization of the Provisional Police was intended to meet. Plan No. 1 envisioned an alert. Plan No. 2 envisioned "sudden and unpredicted overt acts by disloyal inhabitants, whether accompanied or not by hostile 'Blitzkrieg' from air or sea." This confidential memorandum is set forth in full as Exhibit "H".

No publicity was given to these initial plans nor to their purposes. Nor was any publicity given to the fact that the sugar plantations were undertaking this program in cooperation with Army authorities. In the confidential memorandum dated July 30, 1940, issued by the Coordinator, it was requested that this work be kept as confidential as possible and the police be mentioned as the instigators rather than the Army. This was at the request of the Army authorities.

This organization contemplated, in addition to the actual organization and training of police, the procurement of any information bearing upon any phase of internal security. This is reflected by the transmission of Memorandums to the Coordinator and to the Chief of Police as early as July 31, 1940, setting forth lists of local Japanese on the plantations as well as pointing out incidents of rumors and their source, and the names and locations of any questionable characters.

At a meeting held at the Hawaiian Sugar Planters' Association Board room on Tuesday, August 6, 1940, at which Major Melvin L. Craig, Department Provost Marshal, Major W. O. Poindexter, Provost Marshal's Office and the Chief of Police, Mr. W. A. Gabrielson, and the Managers of all Oahu plantations were present, the Chief of Police presided requesting details as to number of personnel, trucks and living quarters to be supplied by each organization. Districts and each beat boundaries were explained. A program of lectures at each of the plantations was outlined covering the next two weeks. A Memorandum of the Coordinator states relative to this meeting that

"Major Craig expressed General Charles D. Herron's thanks for the splendid cooperation being shown by the Plantation Managers." (See Exhibit "I".)

Although it was never publicly expressed, the salary of the Coordinator, who was employed on a fulltime basis for the organization of these provisional police, was paid entirely by the seven Oahu plantations, through the Oahu Plantation Managers' Association, on a pro rata basis.

The close coordination which was maintained by this voluntary organization with the Army forces of the Hawaiian Department and with the Police Forces, City and County of Honolulu, is shown by the provisional police plan for emergency guard divisions prepared by the Office of the Chief of Police on August 12, 1940, and issued over the signature of the Chief of Police, Mr. W. A. Gabrielson. This plan issued as a confidential memorandum states that "the provisional police plan is to provide the personnel and other means necessary to protect from overt acts all agencies and establishments, both civil and military, which are essential to the defense of the Island of Oahu, the defense of which is not charged to combat elements nor located on military reservations. In the performance of this mission the City and County of Honolulu Police Department will take over when directed by the Department Commander." This plan is set forth in full as Exhibit "J". The plan divided the Island of Oahu into four police districts, Police District No. 1 embracing the City of Honolulu and the remaining three districts comprising the rural districts.

Dividing the rural districts into beats corresponding to the plantations and one beat comprising the three pineapple plantations, the plan then contemplated the selection of guards after careful scrutiny of their records, estimating that a grand total of 836 guards would be required for this plan. Prior to the date that the plan was to become effective, it was stated that the Army would furnish the Police Department a detailed map of installations to be guarded. Sugar plantation managers agreed to provide messing and housing facilities for the personnel furnished from their respective plantations. Until proper arrangements were made otherwise, the sugar plantations agreed to furnish the necessary

trucks, including one riot truck equipped with armor plates or sand bags and armed with machine guns and sufficient personnel, located at every police district headquarters. Tour of duty on each installation would be based upon the decision of the Commanding General of the Hawaiian Department prior to the effective date of the plan. The plan also contemplated that arms, ammunition and equipment sufficient for the proper discharge of these duties would be furnished by the Army. This organizational plan was distributed to the Commanding General, Hawaiian Division, the Commanding General, Hawaiian Separate Coast Artillery Brigade, the Chief of Police, the Provost Marshal, Hawaiian Department and the Provost Marshal, Hawaiian Division.

On the basis of this provisional plan, and proceeding in cooperation with the plantation managers, the Coordinator proceeded to organize the necessary guards on each plantation. It should be pointed out that this organization was entirely separate from the units of regular plantation police.

Actual organization embraced much more than that of police guard. A memorandum of the Coordinator indicated that interest was being worked up in local food production, storage of food, establishing a fire alarm system and also emergency facilities and hospitals. Reports relative to Nazi or Japanese activity and rumors pertaining thereto were checked carefully at all times. Commencing in December, 1940, arrangements were made to give men from each plantation instruction in shooting on the police range.

The complete coordination between the Coordinator of Provisional Police plans, the plantation managers and the provisional police on the plantations and the Army authorities is reflected in a letter to the plantation managers from the Coordinator dated December 17, 1940, pointing out that the [13] Coordinator had been requested by the Army authorities to sit in on the Headquarters Staff exercises covering war conditions. The coordinator stated:

"During these exercises Col. Craig took me around and introduced me to the various Headquarters Staffs who would be especially cooperating with the plantation managers and civic authorities.

"Col. Hayes, the Chief of Staff, tentatively suggested that the plantation managers and some of their executive staffs might care to have a similar exercise worked out for them with regard to the possible conditions which might face them in time of emergency. It was suggested that Col. Poindexter might work out such a plan with the Chief and me, and at some mutually agreed on date suitable to all plantations, the plantation managers and their executive staffs might go through an exercise with Poindexter, the Chief, and possibly myself acting as neutral judges."

This letter is set forth in full as Exhibit "K".

In December, 1940, it was arranged that General Herron visit Governor Poindexter to explain the urgency of finding some means, if possible, under the home guard defense laws by which funds could be drawn to uniform, equip, and give armed training to the provisional police guard. Apparently no action developed from this since the plantations continued to finance the arrangements whereby the continuation of this training was possible.

In February, 1941, during one of the frequent Army alerts, a meeting was held between Army authorities, the Chief of Police, and executives of the civilian personnel of District #1. Each was asked to give a short summary of their actions regarding their anti-sabotage precautions, etc. On the basis of this alert and this coordination with the civilian personnel comprising the police guard of District #1, the Coordinator made arrangements whereby the other districts were trained for immediate response to any alert. Although the meeting with the civilian defense group during the Army alert was called at one hour's notice by the Army authorities, every company notified was represented by its chief executive.

On March 8, 1941, the Coordinator, Provisional Police Plan furnished to all plantation managers and to the pineapple plantation representative, Wahiawa, the complete mobilization plan for the provisional police. At this time the sketches showing the "vital points" in the various districts which the Army wished the provisional police force to guard were not furnished but were withheld to be forwarded as soon as released by the Department Provost Marshal.

In May, 1941, the Army planned and carried through Hawaiian Department maneuvers. The provisional police were invited to participate in these maneuvers. Five hundred eighty-two (582) members of the Provisional Police Guard did so participate. Officers and non-commissioned officers of the Army were designated to supervise and instruct the guard in the use of riot shotguns, as

reflected in the copy of letters of instructions dated May 5, 1941, from General Short to the Commanding General, Schofield Barracks, set forth in full as Exhibit "L." Five rounds of ammunition per man were furnished by the Army. Silhouette type targets were provided. Instructions for guards at bridges and other installations to [14] guard against sabotage by persons approaching on the ground or descending from the air by parachutes were spelled out specifically. Reports indicated all guards performed satisfactorily, keen and alert in the performance of their duty.

Soon after this alert, T. G. S. Walker, Coordinator, Provisional Police Plan, was selected by the Mayor, City and County of Honolulu, to act as Coordinator of the Emergency Disaster Council commencing June 17, 1941. Major Douglas King, Assistant to the Chief of Police, was designated by Chief of Police Gabrielson to continue the work of Coordinator in matters pertaining to this police guard organization. Throughout the remaining months until December 7, 1941, instruction continued unabatedly. The Army was requested and did furnish the non-commissioned officers to give instruction in the use of firearms. Instruction talks by the Chief of Police, the Chief of the Federal Bureau of Investigation, and the Department Provost Marshal were arranged at the various provisional guard units. Courses of instruction in First Aid which the Army authorities considered most necessary were also undertaken.

Immediately prior to December 7, 1941, this provisional guard detail totalled between 1500 and 1800 plantation employees. This unit swung into action on December 7th assuming guard duties immediately according to prearranged plan, thereby relieving Army personnel for duty elsewhere. They stood at their posts for many hours during the early days of the war pending final arrangements whereby many of these men became air raid wardens, or assumed other active defense duties.

VI. The Hawaiian Sugar Planters' Association Developed a Comprehensive Emergency Food Subsistence Program Long Prior to the War

For a long period prior to the war, the Hawaiian Sugar Planters' Association had been directing attention to problems of local food subsistence. In 1935 the Association had created and established a Diversified Crops Committee composed of men representing all phases of agricultural activity in the Territory. Originally concerned primarily with study and research directed towards ascertaining what food crops could be grown in the tropical Hawaiian climate with profit to the growers and also as a phase of plantation activities, the Committee devoted considerable attention and effort to plans for producing locally crops in such quantities and of such a nature as would provide the entire population with adequate subsistence if any emergency stopped the flow of foodstuffs into the Territory from outside sources.

Successive Commanding Generals of the Hawaiian Department had been emphasizing subsistence food production as a major defense problem of the Territory, as a phase of the mission of the military forces. For a period of at least eight years before the emergency resulting from war in Europe, plans were being formulated, developed and revised by the Department Service Command and by the Civil Affairs Section, G-5, Headquarters Hawaiian Department.

Being fully cognizant of the activities of the Army in emergency food subsistence planning, Major General Briant H. Wells (Ret.), former Commanding General of the Hawaiian Department, and Secretary of the Hawaiian Sugar Planters' Association following his retirement from the Army, had invited the Army to designate a representative to attend meetings of the Diversified [15] Crops Committee and work with the Committee in coordinated planning. Lt. Col. James A. Ullo had been designated in 1937 by the Commanding General, Hawaiian Department and thereafter an Army representative was appointed each year. The close relationship between the Diversified Crops Committee and the Army authorities is reflected in a memorandum of Lt. Col. Ullo in 1937, explaining the objectives of the Diversified Crops Committee. Copy of this Memorandum is set forth in full as Exhibit "M".

In the latter part of 1940 the plans developed by the G-5 Section were officially made known to various civilian groups. With these expressions of mutual recognition by the military and civilian groups of the necessity for adequate planning to meet any emergency, new impetus was given to the activities of the Committee. The Pineapple Producers Cooperative Association also appointed a special food production committee which immediately undertook to determine

the extent to which pineapple lands on Oahu could be used to supplement cane and small farmers' lands in food production.

The close coordination between the Hawaiian Sugar Planters' Association and the Army is reflected in the letter dated February 1, 1941, of Lieutenant General Herron to the Association previously referred to and set forth in full as Exhibit "G". In this letter General Herron stated in part:

"The attitude of all of your personnel is beyond praise, but I feel that I should especially express appreciation of the invaluable aid of your Secretary, General Wells, and of the vital and highly intelligent work done by your Diversified Crops Committee and its members."

In this connection, it should be kept in mind that every effort was made by the Trustees, President and Secretary of the Hawaiian Sugar Planters' Association to include on the Committee expert agriculturists although they might not be directly employed by the sugar plantations or the Association. For example, the Standing Committee appointed by Mr. H. A. Walker as President for 1941 included Dr. H. L. Lyon, Chairman, Director of Experiment Station, Hawaiian Sugar Planters' Association; Mr. H. P. Agee, Agricultural Consultant for Castle & Cooke, Limited, sugar factors, and Hawaiian Pineapple Company, Ltd.; Dr. J. H. Beaumont, Director of the Experiment Station, U. S. Department of Agriculture; Dr. D. L. Crawford, President, University of Hawaii; Dr. A. L. Dean, Vice President, Alexander & Baldwin, sugar factors; Col. Casey Hayes, G-5 Section, Hawaiian Department; Mr. L. D. Larsen, Director Plantation Activities, and Vice President, C. Brewer & Co., Ltd., sugar factors; Mr. W. W. G. Moir, Agriculturist, American Factors, Ltd., sugar factors; and Mr. H. H. Warner, Director, Agricultural Extension Service, University of Hawaii. This representative group of agriculturists therefore included experts whose services the Army could not have obtained otherwise.

On January 30, 1941, sub-committees were appointed as active operating committees. These included an Animal Husbandry Sub-Committee, to promote production of meat, milk and eggs; a Chemical Supplies Sub-Committee, to ascertain requirements in fertilizers, fungicides, insecticides, weed killers, etc., and take steps to insure an adequate supply of each; a Field Operations Sub-Committee, to plan appropriate food crops on requisitioned land in sufficient quantities to assure an adequate diet for every person on Oahu; an Inventories and Disbursements Sub-Committee, to keep track of the fluctuating food supply and advise as to its equitable distribution, with particular [16] attention to inventories and the promotion of food conservation and food storage; a new crops Sub-Committee, to locate and demonstrate new food crops that might be grown to advantage; the Pineapple Producers Cooperative Association Relations Sub-Committee to coordinate the efforts in food production of the two respective organizations; and a Truck Gardens Sub-Committee, to stimulate production of truck crops on plantations, on small farms and in home gardens by independent growers. On February 7, 1941, an additional Army representative, Major A. R. Lamb, Sanitary Corps, was appointed to the Diversified Crops Committee as alternate for Colonel Hayes.

Indicative of the seriousness with which the Diversified Crops Committee undertook to develop comprehensive plans for emergency subsistence is the distinction made by it between plans developed for "Emergency A" and those developed for "Emergency B". "Emergency A" was defined as a condition of total blockade and complete isolation of Oahu from the mainland and off-islands. "Emergency B" contemplated a condition of total blockade and isolation of the Territory of Hawaii from the mainland or other sources of food and feeds.

Starting out in January, 1941, to develop intensively a plan of emergency subsistence for Oahu, the Field Operations Committee enlarged its personnel in May, 1941, by the addition of representatives on the islands of Maui, Hawaii and Kauai, with the additional responsibility of developing, with the assistance of the representatives of the Planters' Associations of the several islands, a Territorial emergency subsistence plan in which each of the islands might contribute to the subsistence of the civilian and military population of Oahu to an extent most consistent with their own and general Territorial interests. The enlargement of the Committee contemplated also the development of emergency subsistence plans for each of the islands with the assistance of the Planters' Associations of the several islands.

These efforts, directed as they were to the extreme emergency, Emergency "A", were entirely of a cooperative nature, to be coordinated with the military and government authorities. Final plans as submitted contemplated the requisition-

ing of lands, that good land would be taken out of cane production by authority of a food administrator, the withdrawal of such lands to be planted and managed in accordance with the plans developed.

Further indication of the close coordination between the committee of the HSPA and the Army is found in listing of appropriate food crops in the final plan as submitted on October 23, 1941, evolved to meet the extreme situation, Emergency A. The crops listed in the Army plan in September 1940, with two deletions and one addition were alone considered to be "appropriate food crops."

That the Hawaiian Sugar Planters' Association and the Diversified Crops Committee and its sub-committees were at all times proceeding under clear recognition of the importance of the development of comprehensive emergency planning is clearly illustrated by the tone of a letter addressed to the then Territorial Governor, the Honorable Joseph B. Poindexter, on June 19, 1941, signed by Harold L. Lyon, Chairman of the Diversified Crops Committee and Director of the Experiment Station of the Hawaiian Sugar Planters' Association, following a conference of General Wells, Secretary of the Hawaiian Sugar Planters' Association, and Dr. Lyon with the Territorial Governor. He pointed out that the Committee had available at that date feasible plans for food and feed production in the Territory with the intention of placing these plans at the disposal of a food Administration if, and when such Administration [17] was created. He also made clear the extremes which the Committee assumed for purposes of the planning:

"If the extreme situation develops—That is, complete isolation of Oahu—the conditions which make this possible will render such exposed sections of the Island as Waiānae, Kahuku, and Waimanalo unfit and unreliable for farming operations; therefore, plantings for the extreme emergency should be confined to the four major and centrally located plantations."

This letter is set out in full as Exhibit "N".

In the first few months of 1941, the Diversified Crops Committee had already evolved extensive plans of such a complete nature that Walter C. Short, Lieutenant General, United States Army, Commanding General, Hawaiian Department, accepted the plans as submitted as the basis for all planning for Oahu. In a letter dated May 15, 1941, addressed to the Secretary of the Hawaiian Sugar Planters' Association, General Short stated:

"Please express my thanks to the Trustees of the Hawaiian Sugar Planters' Association for the Report of the 'Field Operations Committee' and for the 'Emergency Planting Plan' of the Diversified Crops Committee.

"I feel that the Report, together with the Plan, is the best and most complete study on the subject of local emergency food production yet accomplished, and that this work will constitute the basis for all planning on this subject for Oahu.

"In this connection I have directed that the Planting Plan with such minor changes as may be necessary from a military standpoint, be incorporated in our current Food Production Plan for application to Army use should this ever be required.

Copy of this letter is set forth in Exhibit "O".

Efforts of the Hawaiian Sugar Planters' Association, its member plantations, and the various food specialists who had joined in the comprehensive emergency subsistence planning did not cease, however, with this approval, but continued throughout the rest of the year. On October 23, 1941, the Field Operations Committee submitted to the Diversified Crops Committee of the HSPA a complete "Emergency Food Production Plan," its comprehensiveness being indicated by the fact that it consisted of over one hundred and twenty-five pages of estimates, charts, graphs and compilations, representing a complete plan for any emergency. Commencing with careful estimates of the requirements for emergency subsistence rations for all the people in the Territory, the plan then specified the kinds of vegetables that should be grown, how many acres should be planted, how many pounds of seed obtained, what the initial seed orders should be, with computations of average yields per acre, and determination of the number of acres of sugar cane land, and pineapple lands to be planted and harvested each month and day. Fertilizer requirements were estimated for the various crops, and amounts determined on the basis of acreage requirements. Insect control requirements were also computed. Equipment, tools and machinery requirements were [18] also determined, and the number of the various kinds specified, with a listing of the priority of procurement. Tentative allotments of acreages of emergency crops among the various plantations were attempted with guidance from the military authorities in allotting subsistence food crops on Oahu to the four central plantations, Oahu Sugar Company Ltd., Waiālua Agricultural Company, Ltd., Ewa

Plantation Company, Ltd., and Hoholulu Plantation Company, Ltd., assigning forage and feed crops to Kahuku, Waianae and Waimanalo, located outside the pocket of Honolulu, Pearl Harbor and Schofield Barracks.

Assuming the necessary seeds and equipment were procured, and planting undertaken, it was still recognized that it would require considerable time for the crops to mature for harvesting. The Committee therefore compiled a list of staple foods and the amounts needed of each which the Committee recommended for storage and considered necessary to carry over an estimated six months period from the beginning of the emergency to the initial production of food crops. This list was later the basis for the imports and storage by the Federal Surplus Commodity Corporation acting in conjunction with the military authorities and the Food Control Section of the Office of the Military Governor.

The number of animals required, the number needed to be imported, the number that should be culled for economy of feed, the requirements of feeds and forage, and the acreages needed to be planted and harvested were computed carefully. The seed requirements for this feed were also tabulated, and the fertilizer needs for feed production, and the machinery required for feed crops. Considerations relative to increasing banana and papaya production and increasing the consumption of pineapples were explored carefully. Culture of yeast from sugar was explored as a means of supplying protein needs.

It was this plan which represented the culmination of years of attention and active experiments. It was this plan which the Army adopted as a basis for all emergency food subsistence planning.

As early as 1937, the Hawaiian Sugar Planters' Association had appropriated money for food crop experiments and continued these experiments at some expense over a period of years. Money was also appropriated for the purchase of agricultural equipment required for cultivation of these emergency food crops and some equipment was purchased and delivered prior to the outbreak of war.

Considerable optimism has always been expressed by the uninitiated over the possibilities of growing temperate climate food crops in Hawaii, and considerable effort has been directed to this. The Hawaiian Sugar Planters' Association spent time and money, with all of the technical assistance of the extensive facilities of the experiment stations in experiments directed towards selectivity of suitable crops. The experiments conducted were without question worth many more times their cost, for they included the lessons gained from the experiments of expert talent familiar with climate and soil.

While these developments proceeded, in full coordination between the Hawaiian Sugar Planters' Association and the Army, other committees were established such as the Food Committee appointed by the Mayor, City and County of Honolulu, in 1940, the Governor's Committee on Food Storage in March 1941, and the Governor's Emergency Food Commission in June 1941. Membership of these committees was closely integrated [19] with that of the membership of the Diversified Crops Committee.

Subsequent to December 7, 1941, an Advisory Committee for Food Crop Production was established by the Military Governor. However, the experiments and plans of the Diversified Crops Committee, Hawaiian Sugar Planters' Association, provided the basis for subsequent efforts directed towards local emergency food subsistence.

Any additional information desired relative to the extensive plans prepared for emergency food subsistence can be furnished promptly by the Hawaiian Sugar Planters' Association.

VII.—Oahu Sugar Plantations Provided the Basis for the Development of an Efficient Civilian Defense Organization Throughout Rural Oahu Prior to the War

Having organized an extensive provisional police organization throughout all of the plantations as early as 1940, and participated in blackout practices as early as 1939, the plantations were prompt in undertaking the development of civilian defense organizations in 1941, so that by December 7, 1941, each plantation had trained its personnel to swing quickly into action when the emergency arose.

Early in August, 1941, the Mayor of the City and County of Honolulu appointed Mr. Stafford L. Austin, Manager of Honolulu Plantation Company, as a member of the Major Disaster Council. Mr. Austin proceeded immediately to organize

a Rural Oahu Committee, with districts corresponding to the areas occupied by the plantations except for the Wahiawa area composing the town of Wahiawa and the pineapple plantations, and the Kaneohe area on the windward side of Oahu. Each of these divisions was in turn in charge of the plantation manager, he in turn supervised various defense committees which prepared plans and mobilized all available plantation facilities for defense emergencies.

An appreciation of the extensive and efficient preparedness organization possible under this procedure requires appreciation of the facilities which the plantations were able to make available. In addition to the executive talent, and the existing organization of superintendents, supervisors, and all plantation workers, there were all of the physical plant facilities of each plantation, including power and light, fire fighting equipment, trucks, cranes, and fully equipped, completely staffed hospitals. Accustomed to working as units, the plantations provided efficient organizations to develop promptly elaborate civilian defense preparations. The assistance which the plantations were able to provide on the morning of December 7, 1941, not only to civilians in the vicinity of plantations but also to Army and Navy personnel and installations is ample proof in itself of the close coordination of the plantations and the military authorities, the integration of the plantation facilities with the military requirements, and the effectiveness of the defense preparations made by all plantations.

Without burdening your Committee with an exhaustive presentation of the activities of each plantation in the development of civilian defense organizations, the organization developed by Honolulu Plantation Company provides an example of similar organizations developed by all plantations, closely coordinated through the Chairman of the Rural Oahu [20] Committee of the Major Disaster Council.

Throughout August and September, each plantation designated committees which proceeded to hold regular meetings, engage in training, and organize plantation facilities. Committees were established for the following: Transportation-Evacuation, Police, Medical, Fire and Air Raid Warning, Communication and Intelligence, Food Administration, Electric Power and Light, Rural Water, and Engineering. There is attached herewith as Exhibit "P", an outline of the Major Disaster Organization developed at Honolulu Plantation Company and distributed on October 3, 1941, by the Chairman of the Rural Oahu Committee to all Plantation districts.

The Fire and Air Raid Warning Committee proceeded to train its personnel, already trained in fire fighting, in the methods of handling incendiary bombs and fires resulting from other enemy action. This Committee distributed instructions, and conducted lectures and demonstrations for the education of the public in accordance with the procedure that became common throughout the mainland after the outbreak of the war.

The Medical Committee prepared plans to supply medical aid during the time of disaster, designating collecting points, conducting first aid training for all plantation personnel, and encouraging training of nurses. Since each plantation as a matter of policy had complete hospital and medical facilities engaged in the treatment of injuries and sickness of plantation personnel, and had long experience in the maintenance of public health, these additional preparations were able to be completed promptly and in manner hardly to be duplicated in any other mainland locality. Moreover, the location of the plantation hospitals throughout the island, and in many cases in close proximity to Army airfields and posts, and as in the case of Honolulu Plantation Company, within a few miles of Pearl Harbor, naturally resulted in attention being given to possible need of the plantation facilities for military personnel. Close liaison existed between the plantation doctors and Army and Navy Medical officers.

The Police Committee prepared plans for the protection of transportation routes, and the guarding of installations, the directing of traffic, maintenance of order in time of disaster, instruction of behavior in case of air raid alarm and of blackout, and the prevention of looting. The existing plantation provisional police provided personnel already trained for these functions and responsibilities.

The Food Administration Committee prepared plans for extensive company food production, coordinating these plans with the Diversified Crops Committee of the Hawaiian Sugar Planters' Association. Educational campaigns were commenced for the development of home gardens.

The Transportation and Evacuation Committee prepared listings of all available transportation, and compiled organization charts for motor and rail transportation personnel. Maintenance of all equipment was a responsibility of this committee. In effect, the work of this committee was a pooling of all existing transportation facilities of the plantation to direct their utilization for emergency purposes when required, for operation and maintenance of equipment was of course part of the daily plantation operation.

The Communication and Intelligence Committee, in addition to communication liaison between the various headquarters of the Major Disaster Organization, also engaged in intelligence activities to ascertain any subversive activities, false rumors, unrest or other developments which might be of value to the military intelligence agencies and the Federal Bureau of Investigation, or which might be of assistance to the plantation provisional guard in maintaining order.

The Electric Power and Light Committee was organized for the purpose of proper maintenance of the plantation electric system which all persons, civilian and military, recognized as an important source of power for standby service in case of damage to the Hawaiian Electric Company plant, the island's main source of electric power.

The Rural Water Committee outlined alternate sources of water in case of destruction or obstruction of the existing system, and planned emergency transportation of drinking water if required.

The Engineering Committee was established to plan for construction of air raid shelters, and formation of damage repair crews.

These committees met regularly and were not mere paper committees. The plans developed by these committees at Honolulu Plantation Company were the basis for action on December 7, 1941, just as each plantation on Oahu was engaged in identical activities. First aid classes were well attended in close coordination between the plantation hospital staffs and the Medical Preparedness Committee of the Honolulu County Medical Society. Equipment needed in fighting fires resulting from enemy air raids was obtained and individual householders had been instructed to obtain necessary fire fighting equipment as early as September 27, 1941. This equipment was specified to include bags of sand, ladders, receptacles for spare water supply, and a fire extinguisher if possible.

Householders were encouraged to store additional food, and for this purpose basic subsistence items were imported in quantity by plantation stores. Special precautions were taken to keep careful account of all explosives, and in addition to the customary precautions additional inspections were made daily of all explosives stores. Close coordination was at all times maintained with the other plantations and the respective districts, and with the various committees of the Major Disaster Council.

The plantations, and plantation personnel, were proud of the civilian defense organization they developed and they are proud of the immediate response they were able to make on the morning of December 7, 1941. It is submitted that the civilian defense preparedness achieved by the sugar plantations through the organization of the various committees on each plantation, and coordinated through the Rural Oahu Committee of plantation managers, represents one of the best examples of such organizations then in existence.

There is attached herewith as Exhibit "Q" a report of the Chairman of the Rural Oahu Committee which presents in summary from the activities of the rural civilian defense divisions on the morning of December 7, 1941 and immediately thereafter.

[22] *VIII.—The Personnel and Facilities of Hawaii's Sugar Plantations Provided Immediate and Valuable Assistance to the Army and Navy in Meeting the Emergency Resulting from the Attack on Pearl Harbor*

The preparedness of the plantation provisional police units has been discussed as has the preparation of the Civilian Defense of Major Disaster Committees. These organizations undertook their assignments immediately. The planning of the Diversified Crops Committee of the Hawaiian Sugar Planters' Association, for emergency food subsistence, was utilized thereafter.

In addition to these pre-Pearl Harbor defense preparations by all of the sugar plantations, there was the further direct participation of the plantations with the Army and Navy in rallying to meet the sudden emergency. The material and in many ways almost indispensable aids provided to the Army and Navy by the sugar plantations on December 7, 1941 and thereafter was not alone the

uniting of forces to meet a common enemy. It was also organized assistance, reflecting the appreciation of the sugar industry over a long period of years of the integrated relationship existing between the sugar industry and the military authorities and the essential part of the plantations in the plans of the military for the defense of Hawaii.

At the request of Army authorities all sugar plantations had at various times prior to the war submitted information concerning the defense potential of the sugar plantations. There was every indication in the manner by which this information was requested and compiled that the Army considered the plantation facilities as an integral part of the plans of defense of Hawaii. The sugar plantations, and the Hawaiian Sugar Planters' Association had proceeded accordingly. As has been previously pointed out, the Hawaiian Sugar Planters' Association, particularly under the guidance of the Vice-President and Executive Secretary, Major General Briant H. Wells (Ret.), former Commanding General of the Hawaiian Department, proceeded on established policy of close coordination and cooperation with the military forces.

On the morning of December 7, 1941, every plantation mobilized to aid the military forces in whatever way or manner assistance might be given. The war record of the sugar industry, particularly on that fateful day and for months thereafter is a record which would require volumes to record. It covers much more than civilian preparedness. It includes direct assistance to the armed forces themselves, in a manner that can be appreciated fully only as the location of the plantations in close proximity to Pearl Harbor, Army, Navy and Marine airfields and other installations is recognized with the extensive facilities of each plantation in machinery, equipment and manpower and the close relationship that has at all times existed between the plantation personnel and the personnel of the military forces, and the practical liaison with the military commanders which Major General Wells continued. It can truly be said that the sugar plantations were in the war immediately alongside the Army and Navy.

It is submitted that the part played by the sugar plantations in meeting this emergency has no parallel in any part of our country. A few examples serve to illustrate this.

[23] *Plantation Hospitals Received Many of the Wounded Service Personnel*

Some plantations were subjected to enemy strafing fire the morning of attack and suffered casualties. Plantation hospitals were immediately receiving victims of the attack. These casualties received at plantation hospitals on Oahu included Army, Navy and Marine personnel as well as civilians.

Plantation Equipment was Dispatched to Installations Attacked by the Enemy

Plantation trucks and cranes with plantation personnel to man the equipment were dispatched to Pearl Harbor, Ewa Marine Air Station, Hickam Field, Wheeler Field and other Army and Navy installations as requested or required. Equipment dispatched by Ewa Plantation Company on the Seventh is illustrative of this aid and assistance. At the request of the Ewa Marine Aviation Group, three cranes and two caterpillar tractors with twelve equipment operators were engaged in aiding the Marine Air Station in the removal of aerial bombs from magazines and loading them on bomb carts and distributing the loaded bombs as directed. This crew stood by at the air station throughout the night of the Seventh. Another crane and two additional tractors were dispatched on December 8th to expedite this work. From that time until December 21, 1941, some Ewa Plantation men and equipment remained at the Marine Air Station. The men were even trained in fusing aerial bombs and placing them in the bomb racks of planes.

Shortly after the attack the Navy requested all possible assistance in supplying pumps, welding units, and cranes for use at Pearl Harbor. This equipment was dispatched promptly, remaining in use in some instances for many months.

Construction equipment from the plantations was made available throughout Oahu and all other islands for emergency construction of airfields and other installations. In many cases this equipment was of primary importance in making possible the rapid development and completion of airfields at a time when the utmost speed was essential to insure airfield facilities on Oahu, and the other islands.

3370 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Plantation Labor Provided a Large Construction Force for the Army

The pool of plantation manpower with many men trained in equipment operation was also available for emergency construction. Army recognition of the aid and assistance which the plantations could provide is reflected in the final pooling of these available resources for dispatch at the call of the military through a central Coordinator for the plantations. Through this central coordinator's office, foremen and skilled and unskilled laborers were dispatched to a great variety of projects. Coordination of this plantation labor was not limited to Oahu but included the other islands of Hawaii also, where the plantation labor supplied for Army construction was of extreme importance since the plantations were virtually the only source of labor on these islands and virtually no defense construction had been undertaken prior to the war, thereby emphasizing the urgency of construction which the plantations were able to expedite.

Stevedores and dock working crews were obtained from plantation labor tractor and crane operators, carpenters, [24] welders, electricians, garages and machine shop mechanics, truck drivers, blacksmiths, painters, plumbers, sheetmetal workers, power plant operators, locomotive operators and trainmen, accountants—these categories of labor supplied by the plantations to the Army, and reporting where directed, are illustrative of the type of labor furnished well trained in their respective skills. Man-hours of labor supplied under this procedure to the Army during the time of emergency until the Army was able to recruit the necessary workers, both locally and from the mainland, illustrates the importance of this labor to the Army:

Year:	Man-Days of Plantation Labor Supplied to Army Engineers
1941 (December) -----	66, 08
1942 -----	390, 17
1943 -----	54, 39
1944 -----	3, 52
Total -----	514, 13

Power was Supplied from Plantation Electric Power Plants

On December seventh, all plantations immediately undertook standby service at their electric power plants as units in the island-wide coordination of generating plants. On a number of occasions subsequent to the Seventh, various plantations were called upon to carry the electrical load in their localities whenever emergencies arose such as those resulting from accidents, from major repairs, or emergency demands for additional power at the shops at Pearl Harbor and elsewhere. In these cases the coordination of the available sources of power through the central control of Hawaiian Electric Company proved of inestimable value to the armed forces in meeting the unprecedented demands for power that followed the enemy attack with the development of the defenses of Hawaii, and the expansion of the fleet repair shops at Pearl Harbor. Recognition by the military authorities of the value and importance of the plantation power facilities demonstrated by the construction of a 300,000 gallon concrete fuel oil storage tank at Ewa Plantation to serve the plantation power plant. This construction was undertaken at the direction of the Corps of Engineers:

Plantation Repair Shops were Utilized Constantly by the Army and Navy

Following the attack, plantation machine shops were utilized for a wide variety of repairs as well as for the fabricating of substantial armament units. The machine shops of Ewa Plantation Company, for example, fabricated tank barriers, 30-caliber gun mounts, 37-, 75-, and 155-millimeter gun mounts, tank repair stands and fuel storage tanks. Equipment was repaired and rebuilt. At this one plantation, 37 percent of the total man-hours worked by the machine shop crews during the period from January 1st to September 30th, 1942, was for the account of the Army.

Other plantation shops such as plumbing, carpenter, and blacksmith shops were similarly engaged in repair, fabrication and construction work for the armed forces.

[25] *Plantation Water and Inventories of Supplies were Available to the Armed Forces*

Plantation water supply systems proved of great aid to the armed forces at this time of emergency. An example of this is the furnishing of water to Barber's Point Naval Air Station and to Ewa Marine Air Station by Ewa Plantation Company. The scarcity of water on the arid Ewa plain presented a serious problem in normal times. Had the Navy been required to develop new sources of potable water before construction work could have started, valuable time would have been lost. Although furnishing of this water created a substantial drain on the plantation system, the plantation was able to maintain fairly constant pressure while meeting the Navy's requirements. From December 7, 1941 through September 1942, Ewa supplied the Navy a total of 77,260,000 gallons of water.

Miscellaneous materials were obtained from the plantations for a multitude of requirements particularly during the very early days of the war. The supply of sugar bags was immediately seized upon for the use of the armed forces and the civilian defense authorities to be filled with sand for protection of vital installations and gun positions.

Volunteer Units Were Formed With Plantation Personnel

Plantation Personnel was trained to form organized volunteer units to aid in guarding essential installations and in the active defense of Hawaii. These volunteer units, organized as regiments in rural Oahu and on the other islands were trained in the use of weapons and in combat methods, thereby providing assistance to the military through release of troops for other combat assignments. Organization of these units, with the organization of businessmen in Honolulu was accomplished in close coordination with the military authorities. These volunteer units, important as they were on Oahu, were of even greater importance on the other islands as troops were moved to forward areas for offensive operations.

These examples of the participation of the plantations in the defense of Hawaii can be no more than illustrative of the many activities in which the plantations engaged in active support of the military during the war. All plantations of Hawaii participated in this close coordination with the military forces. The role played by the plantations located on the islands of Hawaii other than Oahu was demonstrably of primary importance to the Army in the emergency of defense preparations.

It is submitted that here in the war record of Hawaii's sugar plantations there is more than response to a common emergency; that in this record there has been a degree of organized assistance which could have been achieved only after careful consideration and planning on the part that the plantations could play in an emergency as a natural phase of the close coordination and cooperation with the military forces which the management of the sugar industry and the officials of the Hawaiian Sugar Planters' Association had developed as a matter of established policy long prior to the war.

[26] *IX.—Under War Conditions and in Spite of Serious Limitations in Manpower, Hawaii's Sugar Plantations Continued to Maintain Sugar Production at Nearly Peacetime Levels During the War Years*

Sugar and its byproduct, molasses, have been basic agricultural commodities required in the prosecution of the war to a successful conclusion. It has long been recognized how essential it is that sugar production be maintained at the highest possible level. Hawaii's sugar plantations did not fail therefore to direct the utmost effort to continue the production of sugar in accordance with directives from Washington to exert every effort to this end.

Problems of decreasing manpower, as a result of the attraction of employment with the Army, Navy, and their Contractors, presented great difficulties. Equipment required for Army and Navy construction involved delays in planting and harvesting. Scarcity of materials affected maintenance and impeded operations. Blackout restrictions and other military regulations reduced the hours of work and resulted in problems of working conditions requiring constant adaptation.

In spite of these considerations, however, Hawaii's sugar plantations exerted additional effort towards meeting the multitude of problems presented, directing more intensive effort to achieving exceptional total tonnage production for these war years.

3372 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

There is attached herewith as Exhibit "R" a chart comparing sugar cane acreage, sugar production, average number of male adult employees (unskilled) and total men days of all employees (unskilled) on Hawaiian Sugar Plantations from the period 1936 through 1944. This chart shows a production of 870,109 tons in 1942, 885,640 tons in 1943, and 874,947 tons in 1944. Hawaii's sugar industry is proud of this record, and the great contribution that this represents to the Nation's successful prosecution of the war.

This record has not gone unacknowledged. By letter dated November 2, 1944, addressed to the Hawaiian Sugar Planters' Association, the Secretary of Agriculture acknowledged this production record in observing:

"The work of your institution, I am told, proved especially significant in the recent war period. Notwithstanding rigid military regulations and a very trying manpower situation, the Hawaiian Islands maintained their sugar production near peacetime levels. For this accomplishment the Nation can be grateful.

This letter is set forth in full as Exhibit "R".

X.—Conclusion

It is submitted that this record of the sugar industry in Hawaii in its cooperation with the military authorities in preparedness activities prior to the war, and in coordination of activities with the military throughout the war is an outstanding record, representing a complete refutation of any of the inferences and statements contained in the report [27] of the Army Board to Investigate Pearl Harbor which might reflect upon this record.

Hereafter there are attached the statements of persons in the civilian community of Hawaii who participated in the preparedness activities of the civilian community of Hawaii prior to the war. These illustrative statements are presented so that your Committee may be cognizant of the part played by the people of Hawaii to prepare for any emergency which might arise. It is submitted that the degree of civilian preparation thereby achieved reflects to the last credit of Hawaii.

It is respectfully requested that this statement of the Hawaiian Sugar Planters' Association with the statements of civilian preparedness in Hawaii set forth hereafter be made a part of the record of your Committee to the end that the grave injustice to the Territory of Hawaii resulting from the incorrect and misleading statements and inferences in the report of the Army Board to Investigate Pearl Harbor relative to Hawaii's cooperation with the Army during the critical period prior to the war may thereby be corrected in the manner which the excellent war record and preparedness activities of the sugar industry and Hawaii prior to the war so amply justifies.

HAWAIIAN SUGAR PLANTERS' ASSOCIATION
P. E. SPALDING, *President*.

DECEMBER 1, 1945.

I, Chauncey B. Wightman, of the City and County of Honolulu, Territory of Hawaii, and Secretary of the Hawaiian Sugar Planters' Association, have seen the original documents from which copies were made and are attached exhibits in the statement submitted herewith to the Joint Congressional Committee to Investigate Pearl Harbor, submitted to the committee on behalf of the Hawaiian Sugar Planters' Association and their member plantations and copies contained in the statements submitted by Mr. Alfred L. Castle, relative to the preparedness activities of the Hawaii Chapter, American Red Cross; Mr. T. G. S. Walker, relative to the preparedness activities of the Major Disaster Council, City and County of Honolulu, Territory of Hawaii; Dr. H. L. Arnold, relative to the preparedness activities of the Medical Preparedness Committee, Honolulu County Medical Society; Dr. F. J. Pinkerton, relative to the preparedness activities of the Honolulu Blood Plasma Bank; Addison E. Kirk, relative to the preparedness activities of the Transportation Committee, Major Disaster Council, City and County of Honolulu; and Mr. Heaton L. Wrenn, relative to the preparedness activities of the Honolulu Police Reserve, do hereby certify that said copies as contained in this statement submitted herewith to the Jo

Congressional Committee to Investigate Pearl Harbor are true and exact copies of the original documents thereof.

[28] EXHIBIT "A"—EXCERPT OF TESTIMONY OF MAJOR GENERAL HENRY T. BURGIN BEFORE ARMY BOARD TO INVESTIGATE PEARL HARBOR (ARMY BOARD REPORT, PP. 173-177 INCLUSIVE)

3. *Antiaircraft Artillery and Coast Defenses.* General Burgin commanded the Coast Artillery Command consisting of seacoast artillery plus all antiaircraft artillery in the Hawaiian Department. He commanded the 53rd Coast Artillery Brigade composed of the 64th Regiment, 251st Regiment, and the 98th Regiment.

He testified that the Interceptor Command was being organized on a temporary basis saying:

"We had constant training and maneuvers, practice, where that particular thing was stressed, and the antiaircraft was turned over to Interceptor Command. * * * For at least six weeks or two months prior to December 7, we had, every Sunday morning, one of these exercises with the Navy. Our AA would go out in the field and take their field positions, they would know that the Navy was coming in, with carrier-based planes, and they would simulate an attack on the island, and we put our guns out mainly along the roadways, sometimes in position, and practiced simulating fire against this simulated attack made by the Navy. And we were out just one week prior to December 7. * * * On Sunday; but, by some stroke, we did not go out on December 7. The fleet was in the harbor."

And again he said, as to the Interceptor Command:

"It worked, yes, because we would get the information of the planes coming in, and immediately the Interceptor command would take over. All that is, so far as turning it over to the Interceptor command, is that the Interceptor command tells you when to hold fire and when to resume fire." (R. 2602-2604).

This brought him to his opinion expressed in the record that if the Interceptor Command had worked during the drills and exercises on the morning of December 7, then it could have worked for the attack. He said in his opinion it would not have made any difference anyway, "because we didn't have ammunition with our mobile antiaircraft. If they had been out in the field without any ammunition, they would have been worse off than they actually were." (R. 2604)

He said of his antiaircraft batteries:

"They were all ready to go into action immediately, with the exception that the mobile batteries did not have the ammunition." (R. 2604)

A reference to the next section will show that it was General Short who supported the Ordnance Department in refusing to issue this ammunition to troops when they went out for exercises in the field.

Additionally, General Burgin found that he could not. [29] even put his guns into final position because of the conditions now described.

General Burgin pointed out one of the great handicaps to development of field artillery positions was resistance from land owners to letting the artillery go on the land or lease it for the placing of battery positions. He described the situation as follows:

"General RUSSELL. Is it true, therefore, General, that prior to December 7, 1941, so far as you can recall, you had never had all of your mobile batteries in the positions which they were to occupy in the event of hostilities?

"General BURGIN. That is correct; they had not all been in the actual position they were to go in.

"General FRANK. Was that because of this opposition to the people who owned the land?

"General BURGIN. Yes, and the fact that we had not yet gotten the leases all fixed up, so that we could move into those positions for practice." (R. 2628)

He also pointed out that if General Short had gone to Alert No. 3 there would have been great opposition from important and influential civilians on the island and particularly those who compose what is known as the Big Five.

As to this he said:

"General RUSSELL. Is there in your mind some thought that there would have been developed a considerable opposition among the influential civilian population here on the island toward the results of Alert Number 3?

"General BURGIN. I think there is no doubt about it, in the world.

"General RUSSELL. In other words, if General Short had ordered Alert Number 3—and I am asking this question in the interest of clarity—if General Short had ordered Alert No. 3 and thrown all of his people into readiness for immediate combat, including the issuing of ammunition, it might, or, in your opinion, it would have provoked opposition on the part of some of the responsible and influential civilian population here on the island?

"General BURGIN. I feel positive it would.

"General GRUNERT. Even though he might have explained that to the influential citizens, there would still have been opposition?

"General BURGIN. I don't believe you could have explained it, at that time.

"General GRUNERT. Who are some of those influential citizens that you think might have voiced their objection?

[30] "General BURGIN. Oh, my!

"General GRUNERT. Is Dillingham one of them?

"General BURGIN. Mr. Dillingham, Mr. Walker.

"General FRANK. Which Walker?

"General BURGIN. I don't know. He is a sugar man. General Wells." (R. 2629)

He said amongst those people were the Hawaiian Sugar Planters' Association, and those having the land and crop interests in sugar, pineapples, etc.

In this connection it should be noted that there is proof in this record that one of the things that may have influenced Short in Selecting Alert Number 1 and not stirring up the Japanese population was the opposition that developed then and later from the large commercial interests on the island using Japanese labor, that they did not want it disturbed and that they would be shut down in their business if a substantial portion of it was either deported or interned. (R. 2654)

As General Burgin testified, if the tables had been reversed and Americans had been situated in Japan like the Japanese were in Hawaii they would have been locked up before the war started and not afterwards. (R. 2649)

EXHIBIT "C"

NOVEMBER 8, 1940.

Lieutenant General C. D. HERRON,
Commanding, Hawaiian Department, Fort Shafter, T. H.

DEAR GENERAL HERRON: During the past 17 years the Army has at times used our roads and lands for maneuvers and each time your staff has requested our permission before carrying out these exercises. During this period we have never had an occasion to complain about the condition in which our roads and lands were left by the Officers and men under your command. With this in mind I wonder if, during these strenuous times, it would be of any help to you and your staff to have for maneuvering purposes, a blanket okeh covering the use of the roads and lands under our control. If so, I will be glad to have it forwarded immediately.

This will also cover the use of plantation water and any other facilities that you might deem necessary to successfully carry out maneuvers.

If there is any other way in which we can cooperate please do not hesitate to call on us.

Yours very sincerely,

/s/ JAMES N. ORRICK,
Manager, Kahuku Plantation Company.

JNO:L

[33] Commanding General

WAR DEPARTMENT,
HEADQUARTERS HAWAIIAN DEPARTMENT,
Fort Shafter, Territory of Hawaii, November 13, 1940.

To: Mr. JAMES N. ORRICK,
Manager, Kahuku Plantation Company, Kahuku, Hawaii.

MY DEAR MR. ORRICK: I am in receipt of your exceedingly gratifying letter of November 8th in regard to the use of the plantation lands by the troops of this command. What you say in regard to the good conduct of troops on your lands and your most generous offer of a blanket permission give me the greatest pleasure. Please accept my sincere thanks for and my appreciation of your very helpful offer.

We shall be delighted to have the blanket permission and I trust that should any transgression occur, as it must in time, you will immediately notify us in order that we may make prompt restitution and take the necessary preventive measures against repetition.

Yours sincerely,

/s/ C. D. Herron
C. D. HERRON,
*Lieutenant General,
Commanding.*

[34]

NOVEMBER 18, 1940.

THE COMMANDING GENERAL
*Headquarters, Hawaiian Department,
Fort Shafter, Oahu, T. H.*

DEAR SIR: Until further notice you and your command are hereby permitted for maneuvering purposes the free use at any time of all roads and lands under our control at Kahuku.

Permission is also granted for the withdrawal of domestic water from the pipeline situate on the Kamehameha Highway near our Main Store at Kahuku.

Yours very truly,

KAHUKU PLANTATION COMPANY.
/s/ JAMES N. ORRICK, *Manager.*

[35]

HEADQUARTERS 64TH COAST ARTILLERY (AA)
OFFICE OF THE REGIMENTAL COMMANDER
Fort Shafter, T. H., February 11, 1941.

In reply refer to: 680

OAHU SUGAR Co.,
Waipahu, Oahu, T. H.

GENTLEMEN: In carrying out training in various missions for the defense of Oahu this regiment must use positions, usually on the sides of roads, for searchlight units. Each of these units consists of about ten men and the searchlight equipment. The units arrive at the positions just before dark, occupy them for three or four hours and then depart. Four of these positions are located on your property.

1. 1000 yards southeast of pump camp #5 at first locked gate on the road to Manawahua.

2. At a railroad crossing 0.6 miles north of the road which begins just west of the Waipahu Grade School.

3. On a cane field road at the east end of the stables which are just off Kunia Road near Kunia Camp #1.

4. On cane field road at the southwest edge of a reservoir by the camp 1 1/4 miles north of Ewa Junction and about 1/4 mile east of Kam Highway.

As the various missions and plans change from time to time, new positions have to be occupied, and as each position requires permission it is readily seen that freedom of movement to meet each situation is hampered. It is therefore requested that this regiment be granted blanket authority to occupy positions from time to time on the property owned and controlled by you.

This of course would be granted with positive assurance that every care will be exercised to prevent damage to the property.

Very truly yours,

(Signed) C. K. Wing
C. K. WING,
Colonel, 64th CA (AA) Commanding.

WAIPAHU, OAHU, T. H., February 17, 1941.

To: Colonel C. K. Wing, Commanding 64th C. A. (AA), Fort Shafter, T. H.

Permission to use specific positions as described in the [36] above letter is hereby granted.

Your request for blanket authority to move to other positions not specifically described herein is also granted.

Yours very truly,

OAHU SUGAR COMPANY, LIMITED,
(Signed) H. L'ORANGE, Manager.

HL'O:W

[37]

HEADQUARTERS 64TH COAST ARTILLERY (AA),
Fort Shafter, T. H., November 16, 1939.

In reply refer to: 680 (P&T)

HONOLULU PLANTATION Co.,
Aiea, Oahu, T. H.

GENTLEMEN: In carrying out training in various missions for the defense of Oahu this regiment is in need of positions usually along side of roads to place small groups of men with equipment such as searchlight units with a crew of about 8 to 10 men. Some of the desired positions are located on property belonging to or controlled by your company. It is requested that permission be granted this regiment to place these groups of men with their equipment of the following locations:

A position on Aiea Heights

A position on Red Hill

The men arrive at these positions with their equipment just before dark, occupy them for three or four hours and then depart.

3378 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

As these various missions and plans change from time to time, new positions have to be occupied and as each position requires permission, it is readily seen that freedom of movement to meet each situation is hampered. It is therefore requested that this regiment be granted blanket authority to occupy positions on the property owned or controlled by you from time to time. This of course would be granted with positive assertion that every care will be exercised to prevent damage to the property and interference with traffic on roads.

Very truly yours,

/s/ C. K. Wing
C. K. WING,
Colonel, 64th CA (AA),
Commanding.

[38]

NOVEMBER 21ST, 1939.

Colonel C. W. WING,

Commanding, 64th C. A. (AA), Fort Shafter, Oahu.

DEAR SIR: We will be pleased to grant you permission to occupy any position you wish, on the plantation, so you may carry out your various missions and plans, as requested in the last paragraph of your letter of November 16th, 1939.

Yours truly,

HOUOLULU PLANTATION COMPANY,
STAFFORD L. AUSTIN, Manager,

SLA:ESB

[39]

EXHIBIT "D"

JUNE 4, 1941.

Captain J. E. YOUNG, Q. M. C.,

Real Estate Officer, Fort Shafter, T. H.

LAND MATTERS

DEAR SIR:

In connection with Ewa Plantation Company's leasing to the Army of three sites of approximately three acres each (not referred to in our letter to you of May 29, 1941) the locations of which were tentatively agreed upon between Acting Manager Slater Miller and your Lieutenant Colonels Lynd and Taliaferro, we wish to say in this respect that Ewa Plantation Company is prepared to discuss with you the terms and conditions to be embodied in such a lease, and for this purpose we accordingly ask that you telephone or write us to arrange a place and date of meeting.

As we understand, the site proposed by Lieutenant Colonel R. F. Lynd for the Sub-Sector Command Post lies in the vicinity of Ewa Field 20.1 crossed by the 200-foot contour ditch. Of the other two sites selected by Lieutenant Colonel E. H. Taliaferro for anti-aircraft gun sites, one lies in the reclaimed area adjacent to Ewa Field 64 and the other on the North slopes of Honouliuli Valley in the neighborhood of Ewa Field 32.

For your information, before any lease can be entered into with the Army covering these three sites, we believe it will be necessary for you to locate same on the ground and prepare maps and descriptions. Further, if you intend to record the lease, it will require the subdivision, for land court purposes, of certain lots on which these sites are located, all such work to be undertaken at your expense.

If, however, the importance of this matter to the National Defense Program is such as to require immediate occupancy by the War Department of the areas proposed to be taken, Ewa will be agreeable to such a plan, upon the understanding that, at a later date, maps delineating the specific areas will be furnished by you, together with a formal document. If, in the immediate taking of such areas, cane crops are thereby damaged, you will reimburse or compensate Ewa Plantation Company for all such crop damages and all other damages incidental to such taking.

Very truly yours,

/s/ A. S. D.
A. S. DAVIS,
Vice-President, Ewa Plantation Company.

[40]

MAY 29, 1941.

QM 680. C-RE (Gen.)

Captain J. E. YOUNG,

*Q. M. Corps, Real Estate Officer,**Headquarters, Hawaiian Department, Fort Shafter, T. H.*

DEAR SIR: This will acknowledge receipt of your letter of 22 May, 1941, requesting confirmation of verbal permission for the use of certain small areas of land by the War Department for military purposes.

Permission is hereby granted the War Department for military use, as requested, of the small areas of land desired. It is understood that maps delineating the specific areas will be furnished with a formal instrument covering same at a later date. This permission covers the following approximate sites:

Seven gun emplacements and three bomb-proof shelters to be constructed at various locations along Puuiki Beach, all located on Lot A of Land Court Application 1089.

One gun emplacement at Kaiaka Bay, located on Grant 1976, Apana 3, under lease to Waialua Agricultural Co., Ltd., from Dortha Emerson.

Two mortar positions, located on land leased from the Bishop Estate by Waialua Agricultural Co., Ltd., near the City of County Reservoir at Haleiwa.

Permanent trenches and fortifications, located just above the Wahiawa Ditch and below the road leading across Helemano 6 Reservoir on Land Commission Award 7713, Apana 34.

The permission to use these various sites for military purposes is granted subject to the following provisions:

1. No growing crops are to be disturbed.
2. No plantation facilities, such as irrigation ditches, pipe lines, etc., are to be disturbed without making prior arrangements.
3. All fences or gates leading to the various sites will be closed at all times.
4. That the use of these various sites by the government will not in any way constitute a release of title to the land by Waialua Agricultural Co., Ltd.
5. The permission granted for the use of lands which are leased by Waialua Agricultural Co., Ltd., from other parties only extends until the expiration of the leases involved.

6. Permission to use the above sites is granted for the extent of the present National Emergency, and in the event that the use of sites is desired beyond said emergency, [41] then it is felt that same should be covered by a formal document properly executed by all parties and interests.

I hope this fulfills your immediate request and that it will serve until the necessary formal instruments can be prepared for approval.

Very truly yours,

WAIALUA AGRICULTURAL CO., LTD.,
/s/ JOHN H. MIDKIFF, *Manager.*

Mr. H. A. WALKER,
President, Waianae Company,
% American Factors, Limited, Honolulu, T. H.

DEAR MR. WALKER: This is to acknowledge receipt of Mr. Bailey's letter dated 17 April 1941 transmitting to me a document and three duplicate copies of a license for the railway to be located on the land owned by your company at Mail, Lualualei, Oahu.

Pending final acceptance of this document by the Secretary of War, it is requested that the Army be permitted to initiate the construction of these spurs.

I desire to express my sincere thanks for your prompt and helpful attitude that you and other officers of your Company have adopted toward the furtherance of this military project. Your hearty cooperation exemplified fine support of the national defense of your country.

Very truly yours,

WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

EXHIBIT "F"

SCHOFIELD BARRACKS, T. H., January 13, 1941.

Mr. H. R. SHAW,

Waialua Agricultural Co., Waialua, T. H.

DEAR MR. SHAW: There follows a very peculiar request. General Murray is very anxious to make some experiments with the possibilities of camouflaging gun positions in cane fields. In order to accomplish this we have to have the cooperation of some plantation. You and the Waialua Co. have been most cooperative and for that reason I feel that I may be "working a willing horse to death." Please feel free to refuse if you so desire.

Here is the proposition: We would like two plots of cane approximately 40' x 40', one side of which to be directly on a road with no irrigation ditch to cross. Some of the cane will be cut out of these plots and we will run a gun into each, stretch a camouflage net over it and experiment with various methods of placing the cut cane on the nets until we find the method which shows least change in an air photo. This experiment to be made during February 25-27. We need a full growth of cane to get as much height as possible and thought if you were planning to burn a field about that time, the cane cut for the experiment would not be wasted.

I realize that you are in business and that your concern is not set up to be an auxiliary to the Army, so please be frank in your reaction to this request.

Cane, covering so much of the lowlands, as you know, is one of our problems and we can think of no other way to solve it.

Very truly yours,

/s/ R. W. van de Velde
R. W. VAN DE VELDE,
Captain, 11th F. A. Brigade.

OK
M

[48]

JANUARY 14, 1941.

CAPTAIN R. W. VAN DE VELDE,

*11th Field Artillery Brigade,
Schofield Barracks, T. H.*

DEAR CAPTAIN VAN DE VELDE: Your request of January 13th for cane areas in which to make tests on camouflaged gun positions has been received, and I believe we can make the necessary arrangements.

As you anticipated, it would be necessary to arrange the test in an area which would be harvested within three days of the date of the experiment. Whether an area which would suit your purpose from the viewpoint of roadset and topography would be available between the exact dates of February 25-27 cannot be predicted this far in advance.

My suggestion would be that about February 15-20 we make an inspection together of the areas which will be harvested between that time and March 1st. By choosing several alternate positions, I could notify you several days in advance of the date each area is to be cut, and you could make final arrangements as influenced by availability of a gun battery or of Air Corps participation.

As always, we shall be happy to cooperate with the Army in this experiment, and are sure that you will cooperate to minimize disturbance of our normal production operations.

Very truly yours,

HAROLD R. SHAW,
Waialua Agricultural Co., Ltd.

[49]

HEADQUARTERS TWENTY-SEVENTH INFANTRY,
OFFICE OF THE REGIMENTAL COMMANDER,
Schofield Barracks, T. H., September 23, 1941.

Superintendent,
Oahu Sugar Plantation Co.

DEAR SIR: It has been brought to my attention recently that the property adjacent to the Waipio Sub Station has been cleared of cane.

If it would be convenient to you I would like to request that new plantings be started about five (5) yards from the fence line in order that defense of the Sub Station against sabotage may be facilitated and at the same time be made more effective.

Sincerely yours,

/sgd/ Wm. A. McCulloch,
WM. A. McCULLOCH,
Colonel, 27th Infantry,
Commanding.

[51]

JULY 21, 1939.

Lieut. CLYDE B. McBRIDE,
2nd Bn., 13th Field Artillery,
Schofield Barracks, T. H.

DEAR SIR: In reference to your letter of July 17, 1939 requesting data on the Waialua Plantation of possible military interest and value, we are glad to supply the following information:

(A) Personnel data as of June 30, 1939:

(1) Adult Male Personnel Employed				(2) Total Plantation Population			
Ancestry	Citizen	Non-Citizen	Total	Men	Women	Children	Total
Japanese.....	275	176	451	536	425	833	1,794
Filipino.....	17	808	825	804	152	501	1,457
Chinese.....	5	5	10	14	6	17	37
Korean.....	14	20	34	46	34	68	148
Porto-Rican.....	12	10	22	27	18	45	50
Portuguese.....	110	9	119	137	119	171	447
Hawaiian.....	24	-----	24	26	14	23	63
Anglo-Saxon.....	57	1	58	62	60	51	173
All Others.....	17	-----	17	18	10	25	53
Total.....	531	1,029	1,560	1,670	838	1,754	4,262

Estimated total population of Haleiwa Village (Non-Plantation)----- 4

(B) Engineer and Motor Equipment Available:

(1) Trucks and Trailers, 19.

Total Cargo Capacity, 65 Tons.

Passenger Capacity, 1105 persons.

(2) Tractors rated by horsepower:

HP	22	30	35	40	65	70	75	95	Total
No.	13	2	1	5	2	2	2	2	29

(3) Miscellaneous Engineer Material:

Mobile Cane Loaders, 7.

Excavator Bucket, 1.

Drag Line Bucket, 2.

Road Grader, 10', 1.

Bull-dozers, 2.

Tractor-trailers, 3.

Heavy Breaking Plows, 2.

Heavy Disc Plows, 2.

Portable Air Compressors, 2.

Portable Welding Machines, 2.

Portable Concrete Mixers, 2.

Detailed list of hand tools and normal warehouse supply submitted to Demment Service Command in August, 1938.

(C) Railroad Equipment:

(1) Length Permanent Narrow-Gage Main Line, 55¼ miles.

(2) Length Portable Track (12-foot section), 10 miles.

(3) Number of Locomotives, 7.

(4) Number of Cane Cars (3 to 4 tons cargo capacity), 736.

(5) Number of Labor Cars (Beating Capacity—25 men), 25.

(6) Number of Flat Cars, 36.

(7) Number of Oil Cars, 2.

[52] (D) Time required to lay one mile narrow gage portable track proximately 20 mandays of 8 hours. Our average figure to date for 16-man crew in each harvest field is 3.83 man-days for 1,000 feet of portable track.

(E) Time necessary to burn and clear one acre of cane land highly variable depending on weather conditions and yield of cane, and whether for commercial or military purposes. A working approximation would be 8 man-days to and cut one acre of cane, plus 7 man-days with proper equipment to load clear the area.

(F) Possibility of cutting off water supply of Haleiwa and Wai'alua feasible at individual sources of supply, as we maintain 19 pumps supplying 108 million gallons per 24 hours from 114 wells. Destruction of power lines at (1) Wai'alua Mill and (2) Hawaiian Electric Transformer station, and concrete reservoir at Haleiwa would probably accomplish purpose.

(G) Plantation roads and ditches are semi-permanent in the sense that are placed on key terrain features, and are seldom moved.

(H) The legend that plantation water supply is poisoned is entirely mythical. Practically all pump water is potable but subject to contamination in channels; gravity mountain water is usually very turbid as well. During few months of the year, fertilizer is applied in the irrigation water within field but not in main supply canals. Arsenic herbicides are applied direct vegetation along roads and ditches and within cane fields—never in the irrigation water.

(I) Other Features of Possible Interest:

(1) The plantation maintains complete shops for railroad, electrical mechanical repairs. Detailed list of power tools available submitted to Demment Service Command, August, 1938.

(2) Electric Power—Mill Power Plant, 3,000 KWH; Hydroelectric plant Brigade Woods, 385 KWH.

(3) Billeting—total number of dwellings, 1,087; average floor area dwelling, 900 square feet.

(4) Livestock—65 mules, 15 pack-mules, 14 horses.

(5) Wai'alua Tunnel—four miles long, 4 feet by 6 feet cross section, completely covered and concealed route for foot troops from Kaukonahua Bay near Artillery Gate, Schofield, to Brigade Woods.

A similar tunnel on east side of Kawaiioa Gulch gives covered approach from Wahlawā-Pupukea Road to Eucalyptus Forest.

Very truly yours,

H. P. SHAW,
Irrigation Overseer.

HAWAIIAN SUGAR PLANTERS' ASSOCIATION,

Honolulu, Hawaii.

GENTLEMEN: It would be unseemly and ungrateful to quit my command of the Hawaiian Department without expressing the appreciation of the Army for the continued and substantial contributions of your Association to National Defense.

The attitude of all of your personnel is beyond praise, but I feel that I should especially express appreciation of the invaluable aid of your Secretary, General Wells, and of the vital and highly intelligent work done by your Diversified Crop Committee and its members.

Your Forester, Mr. George A. McEldowney, has for many years in his own time advised and assisted the Schofield Barracks authorities in their reforestation program and the very substantial progress made in the last two years is largely due to him.

Please believe that the liberal and helpful attitude of the Association is not lost upon the Army and we are grateful. For my successor, General Short, I bespeak your good offices and a continuance of the generous assistance you have always given to the Army in Hawaii.

With all good wishes and sincere thanks, I am,

Sincerely,

C. D. HERRON,
*Lieutenant General,
Commanding.*

Mr. HANS L'ORANGE,

Manager, Oahu Sugar Company,

Waipahu, T. H.

DEAR MR. L'ORANGE: The success of the maneuvers, completed May 25, 1940, has in a great measure been facilitated by the cooperation of private land owners in allowing the Hawaiian Division to use land during this period.

Every effort was made to prevent damage to property and inconvenience to land owners. A survey is being made to insure the repair of any damages caused by troops during maneuvers. If property, under your control, has been damaged, incident to its use by troops, a report from you giving details will be appreciated.

Please accept my appreciation for your cooperation and generosity in allowing the army to use your lands during this maneuver, and for all past favors.

Very truly yours,

(Signed) Wm. H. Wilson

Mr. HANS L'ORANGE,
Manager, Waipahu Plantation,
Waipahu, T. H.

DEAR MR. L'ORANGE: After considerable study and investigation, the War Department has decided that the additional airport to be constructed on this Island should be located in the vicinity of Kahuku Point rather than in the vicinity of Kipapa Gulch where I originally recommended its construction.

I wish to thank you for your efforts in assisting members of my Staff with the location, surveys and layouts of the airport in the vicinity of Kipapa. Your knowledge of local conditions was of great value in this study. Since there is still a possibility of future expansion of the air forces in this department, Kipapa may re-enter the picture at some later date. However, all action upon that site has been stopped at the present time.

Very truly yours,

(Sgd.) Walter C. Short

POLICE HEADQUARTERS,
Honolulu, Hawaii, July 30, 1940.

Confidential Memorandum

To All Sugar Plantation Managers Oahu, T. H.

Owing to current events, the Oahu Sugar Managers Association at a special meeting held at Waipahu July 19th, in conjunction with the Army and Police Authorities, appointed the writer as co-ordinator of plans for any Emergency which might arise. It was, however, carefully pointed out that this is purely a precautionary measure and does not necessarily denote a belief that such an Emergency is near or even bound to come.

However, the Plantation Managers are faced with the necessity of having plans for two phases.

I. The Alert—Plan No. 1.

II. Sudden and unpredicted overt acts by disloyal inhabitants whether accompanied or not by hostile "Blitzkreig" from air or sea—Plan No. 2

Plan No. 1:

This will come in force the instant that information received or other indications denote the advisability of putting in precautionary measures. This plan is taking shape rapidly, and I hope to report to you more fully on this in the next week or so.

However, it might be well for you to remember that the Alert will probably mean that:

- (a) As far as possible Plantation work should proceed as normally as possible.
- (b) Previous plans to keep people calm should be put in force.
- (c) All personnel for guard duty, transportation, housing facilities, etc., promised under this plan would probably be immediately required by the Police.
- (d) Further guards for your own private property and buildings would be required. Cane fire preventive patrols might be advisable.
- (e) Arrangements for putting plan No. 2 into effect would have to be made.

Plan No. 2:

I will discuss this in a future memorandum and also verbally with individual managers.

[57] It is requested that this work be kept as confidential as possible and the Police be mentioned as the instigators rather than the Army.

Yours very truly,

/s/ T. G. S. WALKER,
Co-ordinator Emergency Plan.

[58]

POLICE HEADQUARTERS,
Honolulu, T. H.

Confidential

Memorandum: *Provisional Police Plan*

A meeting was held at the H. S. P. A. Board Room 10 A. M. Tuesday, August 6th, 1940.

The following were present: Major Melvin L. Craig, Major W. O. Poindexter, Chief of Police W. A. Gabrielson, Mr. George Y. Bennett, Waimanalo Sugar Co.; Mr. J. N. Orrick, Kahuku Plantation Co.; Mr. J. H. Midkiff, Waialua Agricultural Co.; Mr. Hans L'Orange, Oahu Sugar Co.; Mr. J. D. Bond, Ewa Plantation Co.; Mr. Robert Fricke, Waianae Plantation Co.; Mr. S. L. Austin, Honolulu Plantation Co.; Mr. T. G. S. Walker.

Chief of Police Gabrielson presided. Details as to number of personnel, trucks and living quarters to be supplied by each organization were discussed. District and Beat Boundaries were explained.

Dates for lectures by Police to Provisional Police were fixed to start as follows:

Kahuku Plantation Co., 5 P. M., Monday August 19.

Waimanalo Plantation Co., 7:15 P. M., Monday August 19.

Waianae Plantation Co., 5 P. M., Tuesday Aug. 20.

Ewa Plantation Co., 7 P. M., Tuesday Aug. 20.

Waialua Plantation Co., 5 P. M., Wed. August 21.

Waipahu Plantation Co., 7 P. M., Wed., August 21.

Honolulu Plantation Co., 4:30 P. M., Thurs. August 22.

Subsequent meetings will be announced later, though it was thought if possible lectures and instructions should be given weekly at same time and place until course is finished.

Major Craig expressed General Charles D. Herron's thanks for the splendid co-operation being shown by the Plantation Managers.

Meeting adjourned 11:20 A. M.

/s/ T. G. S. WALKER,
Co-Ordinator Provisional Police Plan.

OFFICE OF THE CHIEF OF POLICE,
Honolulu, T. H., August 12, 1940.

PROVISIONAL POLICE PLAN FOR EMERGENCY GUARD DIVISION

PLAN FOR THE ORGANIZATION BY THE CHIEF OF POLICE OF THE VOLUNTARY GUARD DIVISION

Maps: Island of Oahu 1/62,500 w/4 overlays attached hereto; Island of Oahu, 1/62,500 (SECRET) showing Signal Corps installations to be distributed by Army when emergency occurs.

1. The Provisional Police Plant is to provide the personnel and other means necessary to protect from overt acts all agencies and establishments, both civil and military, which are essential to the defense of the Island of Oahu, the defense of which is not charged to combat elements nor located on military reservations. In the performance of this mission, the City and County of Honolulu Police Department will take over when directed by the Department Commander.

2. The Island of Oahu is divided into four (4) police districts, namely, Police District No. 1, City of Honolulu; and Police Districts Nos. 2, 3, and 4, comprising the rural districts.

3. a. There will be a Captain of Police in charge of the Provisional Guard Division, who will have two assistants, namely,

(1) The Captain of Police in Charge of Police District No. 1; and

(2) The Captain of Police in charge of rural Oahu Districts Nos. 2, 3, and 4.

b. There will be a lieutenant of Police in charge of each Police District No. 2, 3, and 4; and to assist these lieutenants of Police will be three (3) Sergeants of Police for each Police Beat.

c. The personnel required within Police Districts will be supplied from the following sources:

(1) *DISTRICT NO. 1*—Police officers on pension, the American Legion, Veterans of Foreign Wars, Public Utilities, Pineapple Companies, and other citizens of the City of Honolulu.

3388 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(2) DISTRICT NO. 2

Beat 1: Waiamea Bridge to Brigade Woods (Inclusive). Waiālua Agricultural Co., Ltd.—Mr. John Midkiff.

(a) List of men required for Provisional Police Guards and Patrols—79 men.

(b) Housing, sleeping and cooking facilities.

[60] (c) One (1) truck for shift changes.

Beat 2: Brigade Woods to Kipapa Gulch (Inclusive). Three Pineapple Plantations:

(a) California Packing Corporation

(1) List of men required for Provisional Police Guards and Patrols—55 men.

(2) One (1) truck (riot).

(b) Hawaiian Pineapple Company.

(1) List of men required for Provisional Police Guards and Patrols—55 men.

(c) Libby, McNeill & Libby.

(1) List of men required for Provisional Police Guards and Patrols—32 men.

(2) One (1) truck for shift changes.

(3) DISTRICT NO. 3

Beat 1: Pearl Harbor Junction to Pearl City Junction (Inclusive). Honolulu Plantation Company—Mr. Stafford Austin.

(a) List of men required for Provisional Police Guards and Patrols—58 men.

(b) Housing, sleeping and cooking facilities.

(c) One (1) truck for shift changes.

Beat 2: Pearl City Junction to Kunia Road. Oahu Sugar Company—Mr. Hans L'Orange.

(a) List of men required for Provisional Police Guards and Patrols—66 men.

(b) Housing, sleeping and cooking facilities.

(c) Two (2) trucks; 1 riot and 1 for shift changes.

Beat 3: Kunia Road to Nanakuli (Inclusive). Ewa Plantation—Mr. Douglas Bond.

(a) List of men required for Provisional Police Guards and Patrols—63 men.

(b) Housing, sleeping and cooking facilities.

(c) Two (2) trucks for shift changes.

Beat 4: Nanakuli to Kaena Point (Inclusive). Waiānae Plantation—Mr. Robert Fricke.

(a) List of men required for Provisional Police Guards and Patrols—112 men.

[61] (b) One (1) truck for shift changes.

(4) DISTRICT NO. 4

Beat 1: Makapuu Point to Kokokahi Road, Waimanalo Plantation—Mr. George Bennett.

(a) List of men required for Provisional Police Guards and Patrols—40 men.

(b) Housing, sleeping and cooking facilities.

(c) One (1) truck for shift changes.

Beat 2: Kokokahi Road to Kahana Bridge. (Not inclusive). Mr. George Bennett.

(a) List of men required for Provisional Police Guards and Patrols—30 men.

(b) One (1) truck for shift changes.

Beat 3: Kahana Bridge to Waiamea Bridge (both inclusive). Kahuku Plantation—Mr. J. W. Orrick.

(a) List of men required for Provisional Police Guards and Patrols—102 men.

(b) Housing, sleeping and cooking facilities.

(c) Two (2) trucks: 1 riot and 1 for shift changes.

d. Each police district commander will be responsible for the guarding and protecting of all vital installations, both civil and military, and within his respective district.

e. Training.

(1) Guards will be selected, after their records have been carefully scrutinized, from lists supplied by organizations detailed to do so in the Provisional Police Plan. Information as to details of training will be published in a separate Police Memorandum.

f. Divisional strength:

District Patrols & Guards	Shift	Total
I. Channel Street to Awa Street (Patrol).....	8	24
Awa St. to Pier 37, via RR (Patrol).....	6	18

Fire and Police Alarm (City Hall).....	1	3
	48	144

g. Prior to the date that this plan is to be effective, the Army will furnish the Police Department with a detailed map of installations that are to be guarded.

4. a. Campsites—Locations of:

- (1) Police District No. 2:
Wahiawa—CCC Camp
Waialua—Waialua Agricultural Co.
- (2) Police District No. 3:
Aiea—Honolulu Plantation Co.
Waipahu—Oahu Sugar Co.
Ewa—Ewa Plantation Co.
Waianae—Army Military Reservation.
- (3) Police District No. 4:
Kaneohe (to be erected)
Kahuku—Kahuku Plantation Co.
Waimanalo—Waimanalo Sugar Co.

b. All sugar plantation managers, excepting Waianae Company, which is not supplying housing, have agreed to provide the messing and housing facilities for the personnel furnished from their respective plantations.

c. One (1) riot truck, equipped with armor plate or sandbags and armed with machine gun and sufficient personnel, will be located at every police district headquarters. One (1) pick-up truck will be located at each police beat headquarters. (Until proper arrangements can be made, the sugar plantations will furnish the above named trucks.)

d. The tour of duty on each installation by the various guards, pay, etc., will be published in a later Police Bulletin. The same will be based upon the decision of the Commanding General of the Hawaiian Department prior to the effective date of this plan.

3390 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

e. There will be designated a Lieutenant of Police as Supply Officer, who will be in charge of all supplies for all police districts. He will function directly under the Chief of Police.

f. All guards will be furnished with distinctive markings, insignias, uniform, etc., which will readily designate them as special police guards. (Suggested uniform for these guards would be the Army fatigue clothing, plus fabricated sun helmet of proper design).

g. Arms (service riot guns), ammunitions and equipment, sufficient for the proper discharge of these duties will be furnished by the U. S. Army.

5. a. Each riot truck, patrol car, and sub-district headquarters will be equipped with radio. (It is recommended that [63] the Territory of Hawaii extend the use of its voting booths for headquarters in the several sub-police districts.)

b. Command Posts:

Chief of Police, Honolulu Police Station.

Captain of Police-in-charge Division, Honolulu Police Station.

Captain of Police, District 1, Honolulu Police Station.

Captain of Police, Districts 2, 3, 4, at Wahiawa.

Lieutenant of Police, District 4, at Kaneohe.

Lieutenant of Police, District 2, at Wahiawa.

Lieutenant of Police, District 3, at Pearl City.

W. A. GABRIELSON,

Chief of Police,

City and County of Honolulu.

Confidential

POLICE DEPARTMENT,

CITY AND COUNTY OF HONOLULU,

*Territory of Hawaii, December 17, 1940.***Subject: Suggested Exercise for Plantations.****To: All Plantation Managers and Mr. Leo Rodby.**

The Army authorities very kindly asked me as your representative to sit in on their Headquarters Staff exercises to cover war conditions.

In these exercises, only the staffs of the various units work, being told that theoretically they have so many men and such and such equipment under their control. Each officer affected is given a bunch of sealed envelopes with instructions to open them up at the different specific times stated on each envelope. Inside these sealed envelopes are messages stating that such and such an event has taken place; the officer then has to state in writing whom he contacted and what action he would take with the theoretical force at his command to handle the situation.

During these exercises, Colonel Craig took me around and introduced me to the various Headquarters Staffs who would be especially cooperating with the Plantation Managers and civic authorities.

Colonel Hayes, the Chief of Staff, tentatively suggested that the Plantation Managers and some of their executive staffs might care to have a similar exercise worked out for them with regards to the possible conditions which might face them in time of emergency. It was suggested that Colonel Poindexter might work out such a plan with the Chief and me, and at some mutually agreed on date suitable to all the Plantations, the Plantation Managers and their executive staffs might go through an exercise with Poindexter, the Chief and possibly myself, acting as neutral judges.

Would you please let me know what you think of the above plan, and if you wish me to go further into the matter with the Army and Police authorities.

Please keep this confidential until a final decision is made on the matter.

/s/ T. G. S. Walker,
T. G. S. WALKER.

Co-ordinator, Provisional Police Plans.

EXHIBIT "L"

HEADQUARTERS HAWAIIAN DEPARTMENT,

*Fort Shafter, T. H., 5 May 1941.***Subject: Participation of Provisional Police Guards in Department Maneuvers during period 17 May to 18 May 1941.****To: Commanding General, Schofield Barracks, T. H.**

1. In connection with Department Maneuvers to be held in May, five hundred eighty-two (582) members of the Provisional Police Guard will participate during the period 12:00 noon, 17 May to 12:00 noon, 18 May 1941, inclusive. The contemplated plan calls for the employment of one hundred ninety-four (194) of those men for each relief while guarding installations located within Police Districts II, III and IV.

2. It is desired you designate nine (9) officers (junior grade) and nine (9) non-commissioned officers to supervise and instruct these guards in the use of the Riot Shot Gun, and nine (9) Medical Corps enlisted men who are capable of administering first aid. This personnel to report to the office of the Department Provost Marshal at 10:00 am, 10 May 1941. It is further desired that a total of 235 Riot Shot Guns and a total of 2,910 rounds (5 rounds per man) of ammunition for same be made available for target practice, and a total of 235 targets—E. Silhouette type.

3. The personnel mentioned above will be stationed as indicated and the Riot Shot Guns and ammunition for same distributed as shown below:

3392 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Police District II

EXHIBIT "M"

Subject: Objectives of the Diversified Crop Committee of H. S. P. A.

1. Basic Considerations.

a. The purpose of crop diversification should be dual, namely, to make the local community more self-sufficient in time of peace and to develop local facilities so that Oahu may be made entirely self-supporting in time of war.

b. A broadened agricultural base to include a greater diversification of food crops will be of great value in a depression, will be an influence to improve the well-being of local labor at all times and may well be the determining influence in the defense of these islands in time of war. The cost of the development of diversified agriculture may be considered as a very reasonable insurance premium protecting an investment of many millions.

c. The local climate and other conditions make it economically sound to put the major agricultural effort of the islands into sugar and pineapple production. The major emphasis on these two products should not be altered.

d. Present trade relations with the West coast in food commodities provide a valuable mainland tie which should not be severed.

e. A reasonable objective should be to accomplish a 50% self-sufficiency in time of peace accomplished by putting major emphasis on those things which are most suited to local production.

f. Crop diversification in the Hawaiian Islands, to be effective must be within the plantation system. This is apparent in view of the fact that plantations control all suitable land, control most of the labor and are financially the only agencies capable of undertaking any such activity.

g. Crop diversification should be given "infant industry" assistance and protection. This is necessary in view of the fact that the local agricultural field is completely occupied.

h. Diversified agriculture should be developed under conditions such that a relatively small amount of land in the most suitable location will be devoted to it. This will require land in an area outside the heavy rain belt and where irrigation is easily feasible.

i. Food production must be so organized as to provide for a continuous flow of produce to the market. Retailers will patronize the agency which can promise continuity of supply. This will require control by the plantations, the H. S. P. A. or a growers associations such as the Maui Association.

/s/ J. A. ULIO.

EXHIBIT "N"

EXPERIMENT STATION OF THE HAWAIIAN SUGAR PLANTERS' ASSOCIATION

APPENDIX SEC. III-B-(1)

JUNE 19, 1941.

The Honorable JOSEPH B. POINDEXTER,

Governor of Hawaii, Iolani Palace, Honolulu, T. H.

MY DEAR GOVERNOR POINDEXTER: In compliance with your request, I submit the following brief statement regarding what has been done and what should be done to insure an adequate food supply for Hawaii in case of an emergency.

The Diversified Crops Committee.

In 1935, the H. S. P. A. called together, as a Diversified Crops Committee, a group of men representing all phases of agricultural endeavor in the Territory.

3394 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Ever since its inauguration, this Committee has functioned continuously and at the present time its membership is as follows:-

J. H. Beaumont
H. P. Agee
F. W. Broadbent
D. L. Drawford
A. L. Dean
A. D. Ednie

Col. Casey Hayes
L. D. Larsen
H. L. Lyon
W. W. G. Molr
H. H. Warner
Neil Webster

While the primary function of the Diversified Crops Committee was to find new crops that could be grown in the Territory with profit to the growers, it has from the very first given much attention to plans for producing, locally, crops in such quantities and of such a nature as would provide the entire population with adequate subsistence in case some emergency stopped the flow into the Territory of foodstuffs from outside sources. During the past year, all the efforts of this Committee have been focussed on this one objective.

A Food Administration with Authority an Obvious Necessity

The Diversified Crops Committee has at all times held the opinion that whenever an emergency develops necessitating the local production of a large part or all of the food required to feed the people in this Territory, a Food Administration would be set up and financed by the Federal Government, and given unlimited powers to requisition land, water, labor, machinery, fuel and all seeds and cuttings of food plants.

The Diversified Crops Committee has, through long continued efforts on the part of its members and their associates, worked up feasible plans for food and feed production in this Territory with the intention of placing these plans at the disposal of a Food Administration if, and when, such [70] an Administration was created.

On request, the Diversified Crops Committee can supply inventories of stocks of essential foods, feeds, fuels, etc. present at the time in the Territory and can also provide an estimate of the cost of any operation which it recommends.

If Prepared for the Worst, any lesser Emergency can be Easily Handled.

It is quite probable that if an emergency develops, the Territory will experience a gradual curtailment of transportation facilities but we should be prepared to promptly meet the worst possible situation. As the bulk of the Territory's population resides on the Island of Oahu, the most serious situation that can arise is the complete isolation of Oahu, not only from the mainland but from the other Islands in the group as well. The Diversified Crops Committee has prepared a food production plan to meet this critical situation should it ever arise. If some agency is authorized and financed to carry out this plan to meet the worst possible situation, it will be able to cope rather easily with any situation of lesser severity which may be inflicted upon us. The Diversified Crops Committee has, therefore, drawn up a Basic Plan to meet the extreme situation; this plan being so drawn that it can be put into effect by increments, the entire plan becoming effective only when the extreme situation is about to be realized.

Adequate Funds should be made Immediately Available.

If the extreme situation develops—that is, complete isolation of Oahu—the conditions which make this possible will render such exposed sections of the Island as Waianae, Kahuku and Waimanalo unfit and unreliable for farming operations; therefore, plantings for the extreme emergency should be confined to the four major and centrally located plantations. The lands of these plantations are among the most highly productive in the Territory and their use for growing diversified crops will represent a heavy financial investment. The minimum area of irrigated lands required for planting under the Basic Plan is 8,700 acres. These sugar cane lands, when requisitioned, will all be carrying heavy crops of cane and it will require much energy, labor and expense to get this cane out of the ground, put the land in shape and plant other crops. Seeds and propagating material for the crops to be planted must be grown or purchased.

Seeds for some crops can be purchased from outside sources but that for others, such as pigeon pea, must be grown locally. The sweet potato should be our most extensively planted food crop as it is our most reliable, but we shall have to have much more propagating material than is now available in the

Territory. Steps should be taken at once to secure appropriate land and grow thereon the propagating material of the essential crops which will be required for the initial plantings under the Basic Plan.

The planting, cultivating and harvesting of the food crops that must be grown will require special machinery not now to be found on sugar plantations or elsewhere in the Territory. The procuring of this machinery should be attended to at once as it will take time to get it here from the mainland. Following recommendations of the Diversified Crops Committee, the H. S. P. A. has already invested several thousand dollars in [71] emergency machinery, but this will only serve to demonstrate what is needed. The H. S. P. A. has also spent many thousands of dollars on the promotion of diversified crops through field and feeding experiments carried on under the supervision of the Diversified Crops Committee.

We Must Grow Crops for Feed.

In addition to growing food crops for human consumption, we must grow crops to feed beef cattle, dairy cattle, hogs and and poultry, for we must have meat, milk and eggs. The by-products of the sugar and pineapple industries will be employed to advantage as feed, but these will not go very far towards fulfilling requirements. We must grow forage crops for cattle, root crops for hogs and seed crops for poultry.

Protein Foods and Feeds.

A life sustaining diet for all animals including man must provide a considerable amount of protein, that is, organic compounds containing nitrogen. Hawaii's standard crops are notoriously rich in carbohydrates but very low in protein. As a consequence, the Territory imports, under normal conditions, large amounts of foods and feeds which supply protein. To provide adequate protein for human consumption and for stock feed will be one of the most serious problems to be solved in an extreme emergency.

All plants can make protein out of carbohydrates and inorganic nitrogen, but animals do not possess this ability, so must derive all their proteins from plants. The sugar cane, pineapple and banana make protein for their own bodies, but place very little of it in the products which we recover, so, in an emergency, we must grow plants that put protein in that portion of their bodies which we, as humans, use for food. Bean plants deposit a lot of protein in their seeds and, as we can grow many varieties of beans successfully in Hawaii, they constitute one crop on which we can rely for a considerable part of our protein in an emergency.

Another crop rich in protein, the cultivation of which is being advocated by the Diversified Crops Committee, is yeast. This lowly organism can be grown easily in a weak sugar solution to which has been added ordinary fertilizer salts. It feeds on the sugar and, picking up the nitrogen and mineral elements, builds up protein, growing at a prodigious rate. The yeast organism does not construct a complicated body but merely clothes its living substance with a thin membrane. A mass of dry yeast, therefore, is largely protein. Under favorable conditions, which are easily maintained in any climate, a crop of yeast grows to maturity in less than 24 hours, so it is quite possible to harvest a crop every day in the year.

At a pilot plant in Honolulu, financed by the H. S. P. A., all the details of yeast production as a commercial crop has been worked out. The dry product is 50 per cent protein and very rich in the vitamins of the "B" complex. It is quite palatable and a number of people have, for some time, been eating it regularly to determine its value as a source of protein in the human diet. Their reactions are all very favorable. Up to the present time, most of the output of this pilot plant has been used in feeding experiments at the University with cattle, hogs and poultry. The results of these experiments clearly indicate that yeast is an excellent source of protein for these food-yielding animals. However, since this yeast has proven to be a good protein food for humans, it would be poor economy to feed it to beef cattle in an emergency, for it will [72] be necessary to feed at least 10 pounds of yeast protein for every pound of protein recovered in beef.

Since an abundance of sugar will always be available on Oahu, the Diversified Crops Committee recommends that adequate facilities be provided so that in an emergency yeast may be produced in large quantities for food and feed. Under our conditions, the culture of yeast affords the surest and quickest method of producing the essential protein.

Stores and Storage Most Essential.

It will be at least 6 months after operations under the Basic Plan have been started before its returns will fully meet the needs of the population, so it is essential that we have on hand supplies of food and feed to carry us through this critical period.

We have learned by experience that crops cannot be successfully grown on our lands unless they are supplied with adequate fertilizers and as all fertilizers used in Hawaii are brought in from outside sources, it is essential that an adequate supply of these materials be imported and held in reserve for use in case an emergency develops.

In order to combat the diseases and insect pests which are certain to attack the divers crops which we must grow in an emergency, we should have on hand an adequate supply of appropriate insecticides and fungicides. These materials should be brought into the Territory while transportation facilities are still available.

Most of the energy consumed in the Territory outside of sugar factories is derived from fuel oil, diesel oil and gasoline brought from the mainland. We cannot have electric lights and electric power if the flow of these fuels from the mainland is stopped. Most of the water used for domestic purposes and irrigation on Oahu is pumped from wells with power derived from fuel oil. Deprive Oahu of fuel oil, and the water supply of Honolulu would fail completely, while most of the can fields on the Island would have to go without water and the crops which they carry would be ruined. Deprive Oahu of Diesel oil and gasoline and it would be impossible to operate the machinery necessary to the cultivation of field crops. It is most essential, therefore, that if an extreme emergency is impending, large supplies of fuel oil, Diesel oil and gasoline be held in storage on Oahu for, if our power supply fails, we will be unable to long survive.

Cultivation of Truck Crops in Hawaii Not Profitable under Normal Conditions

The chief aim of agriculture is to capture radiant energy by means of crops which store it in products which can be utilized by man. Of all known crops, sugar cane is the most efficient producer of such products and, consequently, its cultivation adds more to our national resources in a given time than can the cultivation of any other crop. So long as normal transportation between Hawaii and the mainland can be maintained, Hawaii can contribute most to our national resources by growing sugar for shipment to the mainland, and most to our national prosperity by buying from the mainland products produced more efficiently there than they can be produced in Hawaii.

[73] Hawaii is tropical and its fields are not suitable to the cultivation of temperate zone crops. If such crops are grown, the yields are not comparable to those obtained in temperate climates.

It should be obvious to any student making a careful examination of the situation that anyone undertaking the production of truck crops in Hawaii on a scale sufficient to satisfy the local demand for these crops is embarking on a course that will lead to financial disaster if mainland produce has continued access to our market. If Hawaii must undertake the production of food crops to tide her through a national emergency, the Federal Government should underwrite the enterprise, as it cannot survive when the emergency is passed and will be liquidated at a considerable loss to its promoters.

Yours respectfully,

(Signed) HAROLD L. LYON, *Director.*

HEADQUARTERS HAWAIIAN DEPARTMENT,
OFFICE OF THE DEPARTMENT COMMANDER,
Fort Shafter, T. H., May 15, 1941.

Major General BRIANT H. WELLS (Ret.)
Hawaiian Sugar Planters' Association,
Honolulu, T. H.

DEAR GENERAL WELLS: Please express my thanks to the Trustees of the Hawaiian Sugar Planters' Association for the Report of the "Field Operations Committee", and for the "Emergency Planting Plan" of the Diversified Crops Committee.

I feel that the Report, together with the Plan, is the best and most complete study on the subject of local emergency food production yet accomplished, and that this work will constitute a basis for all planning on this subject for Oahu.

In this connection, I have directed that the Planting Plan with such minor changes as may be necessary from a military standpoint, be incorporated in our current Food Production Plan for application to Army use should this ever be required.

Very truly yours,

/s/ Walter C. Short
WALTER C. SHORT,
Lieutenant General, U. S. Army,
Commanding.

EXHIBIT "P"

RURAL OAHU COMMITTEE,
MAJOR DISASTER COUNCIL,
October 3rd, 1941.

To All District Chairmen

GENTLEMEN: For information and guidance, I am enclosing herewith the Outline of Organization as used by Mr. Penhallow of District "8". The functions under such sub-committee may be changed to suit local conditions in each district. Further information regarding the function of each committee, will be found in the "Outline of Plan for Protective Measures for Civilian Population of Oahu in case of Bombardment," recently delivered to you.

We have also received a letter from Dr. R. B. Faus, In Charge of Detail Plans and Training, which we give you herewith:—

"At the request of Mr. Walker, I am pleased to inform you that one unit of the Emergency Medical and Ambulance Service has been formed at Kailua under the direction of Dr. Chinn. I know one is being formed at Kaneohe under the direction of Dr. Ching and a third at Wahiawa under Dr. Mack.

"First Aid classes have been conducted at Kahuku and Wai'alua under Drs. Rothwell and Davis. (Classes have been and are being held at Alea under Dr. Thompson). Dr. Garton Wall informs me that he is all set at Ewa Plantation. I have not been informed as to what further assistance they may need in the way of equipment and man-power to develop their units."

From the foregoing, it is evident that any information and assistance needed for the formation of Medical units in the various districts, will be gladly given by Dr. Faus and his committee. Please address all communications to Dr. Faus thru these headquarters.

Yours truly,

/s/ S. L. Austin

EXHIBIT "Q"

RURAL OAHU COMMITTEE,
 CIVILIAN DEFENSE CORPS,
 December 21st, 1941.

Mr. T. G. S. WALKER,

Director, Civilian Defense Council, Honolulu, Hawaii.

DEAR SIR: With reference to your memorandum of December 30th, 1941, on the subject of Civilian Defense, I give you the following. I am enclosing herewith the Organization Chart of the Rural Oahu Committee of the Civilian Defense Council, so that you may get a clear picture of the set-up in Rural Oahu.

Within an hour of the attack on Pearl Harbor by the Forces of the Rising Sun, this whole rural organization was functioning 100% in all capacities. The various committees were standing by at their designated Stations for immediate action.

From then on everything moved along smoothly and the civilian activities were taken care of in all the districts without delay. All vital public utilities installations were placed under guard and plantation power plants were standing by to come onto the main lines at the moment's notice of a power failure.

In the weeks following the "Blitz", all defense requirements of labor, equipment and supplies for both the Army and Navy were handled through this office for the Rural Districts, which turned out to be a tremendous job. However, we believe that the wants of the Army and Navy were well taken care of. In fact, all labor, equipment and supplies were pooled for their immediate use. One special article of which they were in dire need, was sand bags and their wants in this line were quickly made available to them from the stocks of sugar bags on hand at the plantations. Approximately 1,000,000 bags were requisitioned for this purpose.

All food inventories were taken care of with dispatch by the Committee of Food Administration which was ably handled by the Chairman, Mr. W. W. Morrell. This licensing of stores was also done by the same group of men in the Rural Areas.

Our Rural Engineering Committee is busy at this time, gathering all information on utilities in the Rural Districts to make it available to the U. S. E. D. Department of Utilities, who has asked that this be done by our Rural Civilian Defense Committee.

The rationing of gasoline in the Rural Districts is being well taken care of by the nine district chairmen. This is a big job in itself and the chairmen are to be congratulated on the fine manner in which they handled all the various and sundry items that were asked of them to do. All this work being done on their own time and everyone has given freely of their time.

[79] We want to take this opportunity to express our appreciation for the fine work done by your office and the excellent and efficient manner in which all our problems were handled by your organization. I do believe that the Oahu Defense Organization really put their hearts into the job at hand, and made it go with a minimum of delay. The chairman of the Rural Committees did a swell job and as Chairman of the Rural Oahu Committee, I have nothing but praises for the fine work these gentlemen have done and are still doing.

Sincerely,

/s/ Stafford L. Austin,
 STAFFORD L. AUSTIN,

Chairman, Rural Oahu Committee, Civilian Defense Corps.

SLA:ESB

EXHIBIT "S"

DEPARTMENT OF AGRICULTURE,
Washington, November 2, 1945.HAWAIIAN SUGAR PLANTERS' ASSOCIATION,
Honolulu, Hawaii.

GENTLEMEN: I regret very much that previous commitments have made it impossible for me to accept the kind invitation extended by your President, Mr. P. E. Spalding, to attend the 50th Anniversary dinner of the Hawaiian Sugar Planters' Association.

Please extend my congratulations to the officials of your association's experimental station in their observance of its 50th year of operation. Your association has earned recognition as a research organization through the persistent efforts of its scientific personnel. It is only necessary to compare the per-acre production of sugar cane in your area with the similar results of any area in the world to realize the outstanding scientific progress made by the Hawaiian Sugar Planters' Association. The work of your institution, I am told, proved especially significant in the recent war period. Notwithstanding rigid military regulations and a very trying manpower situation, the Hawaiian Islands maintained their sugar production at near peacetime levels. For this accomplishment the Nation can be grateful.

The scientific knowledge your association has acquired through the years provides the best kind of basis for further important research. Knowledge is one thing which can never be surplus. In building the kind of free world for which we have fought, we shall have use for all the knowledge we possess and can acquire. One way or another, we must build a world of plenty for all people. That is the only way the world can survive. Let us work together, using all available knowledge, to expand the world's economy and meet the needs of mankind.

Sincerely yours,

/s/ CLINTON P. ANDERSON, *Secretary*.[82] CIVILIAN PREPAREDNESS ACTIVITIES AND ESTABLISHMENT OF MAJOR
DISASTER COUNCIL, CITY AND COUNTY OF HONOLULU

T. G. S. Walker, Honolulu, Hawaii

[83] Probably no community in the United States has been more closely geared to the activities of the Army and Navy throughout its entire history than has the community of the Territory of Hawaii and more particularly the Island of Oahu and the City and County of Honolulu.

It is believed that the Territory of Hawaii was among the very first, if not the first, integral part of the United States of America, to realize that war with Japan was becoming inevitable and that the civilian population would not only be vitally affected by the war but should organize to take care of as many of the civilian public as possible without calling on the military authorities and Army troops for help.

BLACKOUT PRACTICES

As early as 1939, the City and County government of Honolulu, with the cooperation of Army authorities, organized and carried out a comprehensive total blackout for the Island of Oahu. The cooperation of the public was outstanding and the mechanics of blacking out for the island in case of a sudden attack proven satisfactory. Similar blackout practices territorial-wide were carried out in 1940 and 1941 with equally favorable response from Army authorities. A copy of the radio statement of General Short following the blackout test of Hawaii on May 20, 1941, is attached herewith in full as Exhibit "A".

ORGANIZATION OF EMERGENCY RELIEF COMMITTEE

In July 1940, one of the Supervisors of the Board of Supervisors, City and County of Honolulu, Mr. A. S. Cleghorn Robertson, had proposed the formation of a committee to prepare a major emergency disaster plan and to draft a bill to effectuate the same for submission to the Board of Supervisors. At a meeting of a general committee of businessmen and leaders of the community held at the Mayor's office on July 8, 1940, a motion had been made by Mr. Cain which was duly passed reading in part "to determine how much money, if any, would be needed and how much work would be involved in the establishment of such a committee."

By letter dated July 16, 1940, Mayor Crane, the Mayor of the City and County of Honolulu, appointed a subcommittee with instructions "to study more fully the Emergency Disaster Plan." This subcommittee, at this early date of July, 1940, proceeded to consider a broad Emergency Disaster Plan contemplating "sabotage during the period of strained relations; war with its attendant possibilities of partial blockade; blockade; bombardment; bombing, landing parachute troops; landing of major boats or troops." The agenda states that by "strained relations", the subcommittee envisaged conditions to exist in which it seems possible that a foreign power will attempt sabotage and preparations for an attack on this Territory and that during such a period government of the city would be conducted as in normal times up until the time [84] That the Governor declared martial law. At such time the subcommittee envisaged that the Governor would take charge of the administration with the aid of the National Guard and the Emergency Disaster Plan could therefore provide for the cooperation of our citizenship with the Governor and the National Guard. At the discretion of the Governor, assistance of Federal troops, Army and Navy, could be obtained at this time and cooperation with those forces should be foreseen and provided for. The agenda also conceived the possibilities that upon the inception of war the government of the Territory would presumably be taken over by the military authorities. Therefore, any proposed emergency disaster plan could provide for cooperating with the military force "so that as little burden as possible falls on the shoulders of troops who will be necessary in the field."

Following this expression of community interest in preparedness activities, the Hawaiian Sugar Planters' Association and the Oahu Plantation Managers Association had initiated at their own expense the training of a Provisional Guard Unit at their own expense. This development is discussed in the statement of the Hawaiian Sugar Planters' Association.

On April 3, 1941, Mayor Lester Petrie who succeeded Charles S. Crane as Mayor of the City and County of Honolulu called a meeting of the Board of Supervisors with various department heads to "consider the formulation of and participation by the City and County government in a major disaster plan for this community." The undersigned, as Coordinator for the Plantation Provisional Police Unit was present at this meeting. Mayor Petrie explained that "the object is really to coordinate our plans and schedules with the military service so that in the time of extreme emergency, the military service will not be hampered unnecessarily by civilian problems which we can well take care of ourselves." He explained that he had discussed these proposals with General Herron and with General Short. General Short was then expected to discuss these civilian activities at the Army Day luncheon, which he did on April 7, 1941.

At this time, also, the Honolulu Medical Society was proceeding with its organization of an Emergency Preparedness Committee. At the meeting of the Mayor, Dr. Clarence E. Fronk and Dr. Thomas Mossman of the Medical Preparedness Committee pointed out that the Committee was then working on some twelve aid stations possibly increasing that to twenty to be located throughout the city, operating on a twenty-four hour basis in time of emergency. Different concerns in town had already volunteered about one hundred commercial trucks for ambulances. About sixty drivers had volunteered for training and a first aid unit was being set up for display and training.

The Chief of Police explained that at that time a force of between 2,000 and 2,500 men had been organized to guard public utility companies, plantations, both sugar and pineapple, the City and County, the oil companies, and other installations. This plan contemplated complete tie-up with the Army and the civilian police.

The Mayor explained that the purpose of the meeting was to discuss organizational activities possible on the part of the City and County of Honolulu in view of the existing defense activities being carried forward by individual groups and organizations and the discussions in the Territorial Legislature. [85] As a result of this meeting a temporary committee of five was appointed by the Mayor which in turn called upon the undersigned to assist in studying emergency disaster plans. This committee recommended to the Mayor the appointment of a Major Disaster Council composed of City and County department heads with certain representatives of the utility companies. Appointment of a full-time Coordinator was also recommended, and a proposed resolution was submitted urging the Territorial Legislature to allocate sufficient funds for a major emergency. Representatives of the Army, Navy and Territorial Government were to be appointed to the Council.

In the meantime, on April 8, 1941, an ordinance was proposed before the Board of Supervisors of the City and County of Honolulu, to create a Major Disaster Council. This ordinance was approved on April 26, 1941. The Major Disaster Council so created was to consist of the Mayor, a City and County department head as Vice-Chairman, and such other persons as the Mayor might appoint with the approval of the Board of Supervisors. This Council was charged with the coordination of all community resources and by means of mutual cooperation and effort to create a plan for utilizing all resources for relief and general welfare of the people in the event of some major disaster. The Mayor was empowered to declare when an emergency disaster existed. The divisions of the Council were set forth to include, among others, transportation, communications, power and light, law and order, fire protection, water and water supply, medical, Red Cross, rescue demolition and gas protection, air raid warning, mortuary work, finance and supplies, and rural Oahu. The Ordinance authorized a coordinator to be responsible for the entire plan.

The Mayor proceeded, therefore, with the appointment of the Council and the undersigned Coordinator. The first meeting of the Major Disaster Council was held on June 24, 1941. Copy of the Minutes of this first meeting is attached herewith as Exhibit "B." Also attached as part of the same exhibit is an organizational chart of the Council as originally established.

Close coordination was maintained with the Army through the designation by General Short of Lt. Colonel Casey Hayes, F. A., U. S. Army, of G-5 Section, Hawaiian Department, and Col. H. K. B. Lyman, CE, U. S. A., Department Engineer, as advisors of the Council. Capt. C. C. Baughman, USN, Captain of the Yard, Pearl Harbor, was designated by the Commandant, Fourteenth Naval District, as Navy Advisor. By October, 1941, the Department Surgeon, Colonel Edgar King, USA, had been designated an advisor.

The undersigned as Coordinator, with the Executive Committee of the Council, proceeded to set up suitable headquarters, organized and trained volunteers, tabulated available transportation and evacuation facilities, designated emergency reporting points for all personnel equipment, and took all other possible steps to cushion the shock to civilians in any emergency that might arise. The necessity for relief of trained Army personnel for actual combat by having civilians handle as many of their own problems as possible was a paramount consideration in all of the above plans and activities.

The provisional police organization as developed subsequent to June, 1940, was merged with the Major Disaster Council. All plantation managers and other chairman of the various districts were appointed Major Disaster Council chairmen with the fullest possible power to act for the Council in their own districts in case of an attack.

[86] On July 1, 1941, the Emergency Medical and Ambulance Committee of the Honolulu Medical Society which had been training volunteers several months with funds supplied by the Honolulu Chamber of Commerce and some considerable assistance from the Hawaii Chapter, American Red Cross, was made a Major Disaster Committee with Dr. H. L. Arnold as Chairman and Dr. Robert Faus as Vice Chairman. The Mayor and Board of Supervisors allocated \$6,000 to cover this Committee's expenses for the period from July 1-December 31, 1941. The above sum was augmented by \$5,000 from proceeds of a benefit football game. A full report of the activities and medical preparedness by Dr. H. L. Arnold is set forth hereafter. Private individuals, the Chamber of Commerce, and Committee Members themselves made contributions to the activities of the Major Disaster Council. The contributions were

not limited to any racial group but included all nationalities—Caucasian, Hawaiian, Filipino, Chinese, and Japanese.

The Coordinator for the Major Disaster Council from the time of appointment to December 7, 1941, delivered approximately 150 talks to business and fraternal organizations, parent-teachers association groups, etc., emphasizing the need for preparedness and the need for volunteers. The response of the community to these talks, and the response of the publicity given to the activities of the Major Disaster Council in the formulation and preparation of plans was considerable.

Mayor Lester Petrie and the Board of Supervisors of the City and County of Honolulu approved the purchase on City and County funds of medical equipment totalling \$50,000; medical supplies \$10,000; fire fighting equipment worth \$72,500 and two-way radio equipment \$7,500. Most of this equipment arrived in November, 1941, and was of inestimable value on December 7, 1941. In the purchase of fire equipment, able assistance provided by Mr. Charles W. Schruth, Federal Works Engineer, was of great value in permitting procurement through the Lanham Act. This equipment started arriving in Honolulu in February, 1942. Close liaison was maintained with Army and Navy Intelligence as well as with the Federal Bureau of Investigation. In its coordinating activities, the Major Disaster Council joined with Army, Navy and FBI representatives in establishing a committee with prominent representatives of each racial group resident in Hawaii for the purposes of formulating plans for meeting the problems attendant upon any war emergency with the variety of racial groups present in the Territory.

In conjunction with the Army authorities and parallel with the public appeal of Lieutenant General Walter C. Short, Commanding general, Hawaiian Department, a campaign was initiated to get householders to purchase canned goods for storage up to the limit of their cupboard space. In this manner large spaces in warehouses and store shelves were cleared permitting merchants to make large purchases in shipments from the Coast in October and November, 1941. The amount of shipping space thus released for war materials was appreciable.

COOPERATION WITH TERRITORIAL OFFICIALS—M-DAY LAW

During this period it was becoming more and more apparent that the situation called for wider authority and more financial backing than that possible under City and County financing. The Major Disaster Council urged Governor Joseph Poindexter to call a special session of the Legislature to [87] enact an M-Day law, giving the Governor unusual emergency powers. This session was called by the Governor on September 15, 1941. And at the request of the Governor and President of the Territorial Senate, a special committee of the Major Disaster Council under the chairmanship of Mr. Fred Ohrt, compiled a financial report showing what "M-Day funds" in their opinion should be set aside for preparedness activities and in case of an attack. This recommendation was for \$1,500,000 the first year and a total of \$8,000,000 in case of a war of three years. Also at the request of the Territorial Senate, the Coordinator and members of the Major Disaster Council attended this session and gave advice regarding the M-Day Bill.

It was at this session that Lt. General Walter C. Short appeared at the request of the Territorial Government and gave a strong talk on the danger of the situation and the urgent needs. The Territorial Legislature passed the M-Day Bill allocating \$500,000 to this Administration and setting up a reserve fund of \$1,000,000.

The work of the City and County Major Disaster Council had undoubtedly alerted large numbers of the population to the dangers involved in the Pacific and the necessity for serious, intensive defense preparedness. It is impossible to present briefly any complete picture of the extensive preparations that were made and the training and preparations carried through. In any event, however, the rapidity with which the personnel of the Major Disaster Council organization reported for duty immediately after the attack on December 7, 1941, and proceeded to discharge their pre-assigned duties efficiently and effectively is ample proof of the excellent organization that had been developed. There is attached herewith as Exhibit "C" a copy of a summary prepared by the undersigned of the activities of the Council following the attack. This report was prepared on January 2, 1942, following the activities of that fateful time. Additional reports of the various sub-committees are available if desired.

CONCLUSION

By this summary of defense activities, the undersigned has attempted to present in summary form only the extensive preparedness activities undertaken by the civilian community prior to the war. Additional brief statements of the chairmen of the Hawaii Chapter of the American Red Cross, the Medical Preparedness Committee, the Transportation Committee, the Blood Bank, and the Reserve Police follow this statement.

It is believed that after a review of these statements it will be evident that the civilian community had succeeded, long prior to Pearl Harbor, in developing elaborate preparations for any major disaster and demonstrated complete co-operation with the Army and the Navy with active response to any of the desires or suggestions of the military authorities for civilian preparedness. It is believed that this is certainly a matter to be entered into the record of the Honorable Investigating Committee to counteract any inferences or impressions in the testimony and report of the Pearl Harbor Army Board which might be construed to the contrary.

Additional information and material is available relative to the activities of the Major Disaster Council should the Committee so desire.

EXHIBIT "A"

GENERAL SHORT'S BLACKOUT BROADCAST TALK, 20 MAY 1941

General SHORT (Following introduction by announcer): I am speaking to you from the command post of the Hawaiian Department somewhere on the Island of Oahu. Into this command post tonight have streamed the messages from the many vantage points both on this island of Oahu as well as from Hawaii, Maui, Lanai, Molokai and Kauai, telling the story of the great job the Territory of Hawaii has done in blacking out the Islands.

Far underground in the command post are located the vital nerve centers of command and communications of the Hawaiian Department. Staff officers have been receiving these reports both from Army airplanes and observation posts. In an actual emergency it is into these C. P.s that the story of the blackout would stream.

From a vantage point in an observation post nearby I have with my own eyes witnessed the complete blackout of Honolulu, the great Pearl Harbor naval base, Schofield Barracks, and the Army's Hickam Field.

I have watched the swift and expeditious manner in which this job was done. From the reports pouring into the command post and handed to me here, I have been apprised of the success of the exercise throughout the entire Territory.

Hawaii has had, probably, more practice in blackout than any other major American community. But she has out-done her previous efforts tonight. Loyalty and cooperation with your Territorial Blackout Committee has spelled success in a job which would have made the task of enemy bombers a difficult one.

With such a spirit activating all Americans in this time of national trial I think we can meet with confidence all threats of enemy encroachment even that of bombardment from the air.

Governor Poindexter, Mr. Sinclair and members of the Territorial Blackout Committee, and to the people of the Territory of Hawaii, I extend my praise and congratulations, and giving you my aloha, I say Good Night.

[89]

EXHIBIT "B"

MINUTES—MAJOR DISASTER COUNCIL, CITY AND COUNTY OF HONOLULU

The first meeting of the Major Disaster Council of the City and County of Honolulu was called to order by Mayor Lester Petrie, at 1:30 P. M. on Tuesday, June 24th, 1941, in the Assembly Room of Honolulu Hale.

Mayor Petrie opened the meeting by announcing that while a Council such as this had been under consideration for some time, it was necessary to get official backing before anything of importance could be done. The Board of Supervisors of the City and County of Honolulu had, therefore, on April 8th, 1941, passed Ordinance No. 891, Bill No. 24, creating the Major Disaster Council of the City and County of Honolulu, outlining its duties and functions, and providing for its maintenance. Mayor Petrie explained that the work had been delayed while the "M" day bill was under consideration in the Territorial Legislature, but now that it seems advisable, the organization of the Council would proceed immediately.

The Mayor expressed his appreciation for the response given by the downtown business men to his invitation to serve on the Council, and their indication of willingness to serve on this committee.

Mayor Petrie announced that he had appointed Mr. T. G. S. Walker as Co-ordinator of the Major Disaster Council, and that Mr. Walker had his staff organized and was at the service of the members.

A call of the roll showed all members of the Council present or officially represented.

Mr. T. G. S. Walker, Co-ordinator, gave a resume of what has been done by, and what could be expected of, the co-ordinator's office. He said that the principal aim was to try and stop the overlapping of individual organizations, and to get all civilian defense workers under the authority of the Mayor and Board of Supervisors. Mr. Walker said that in the main the committees would be run by City and County executives, but that no defense plan would be complete without the cooperation of the industrial and business leaders, and for this reason the splendid response of these leaders was greatly appreciated.

The Co-ordinator announced that the policy would be that the Co-ordinator will simply be the liaison man, who will work with the Army and Navy authorities so that our efforts will coordinate with their defense plans. He stated that both the Army and the Navy had been asked to serve on the Major Disaster Council in an advisory capacity, and that General Short had delegated, as representatives of the Army, Col. A. K. B. Lyman and Col. Casey Hayes; while Admiral Block had sent as the representatives of the Navy, Captain C. C. Baughman.

Mr. Walker stressed the fact that the work of the Council would of necessity be done by the chairmen of the various committees which the Mayor would appoint later in the meeting, and by their assistants, but that his office and staff would at all times be available for information or assistance. [90] He suggested that in order to facilitate the handling of major problems, and to save the members of the Council from having to meet too frequently, an Executive Committee be appointed, and that it be comprised of the chairmen of the main committees of the Council.

Mayor Petrie said that he considered this the best procedure. He then asked the approval of the Council on the following appointments to the chairmanships of the various committees set up by Ordinance 891:

1. Co-ordination—T. G. S. Walker
2. Transportation—Addison E. Kirk
3. Communications—Alvah A. Scott
6. Law and Order—W. A. Gabrielson
8. Fire Protection—W. W. Blaisdell
9. Water and Water Supply—Frederick Ohrt
10. Streets and Highways—Joseph F. Kunesch
- 11-12. Medical: Health & Sanitation—T. M. Mossman, M. D.
- 13-14. Red Cross; Rescue etc.—John F. Gray.
20. Finance—George Waterhouse

The Mayor added that he had requested the Board of Supervisors to approve the name of W. W. Beers as a member of the Council, and that this action would be taken at the Board meeting today. Mr. Beers would then be appointed in charge of a new committee to handle the Food problem.

It was moved, seconded and unanimously carried that the list of chairmen submitted by Mayor Petrie be approved.

Mayor Petrie then asked that each member of the Council submit in writing to the Co-ordinator, the name, address and telephone number of an alternate who could represent him in case of enforced absence from a meeting of the Council.

The Mayor then suggested that the Executive Committee be comprised of the following:

Mayor Lester Petrie, Chairman
Joseph F. Kunesh, Vice-Chairman
W. A. Gabrielson
Frederick Ohrt
W. W. Blaisdell
T. M. Mossman, M. D.
John F. Gray
Alvah A. Scott
Addison E. Kirk
Supervisor John M. Asing
George Waterhouse
W. W. Beers
Col. A. K. B. Lyman
Col. Casey Hayes
Captain C. C. Baughman
T. G. S. Walker, Co-ordinator

The list was accepted as presented.

The suggestion was made, however, that the Council be kept advised at all times of the action taken by the Executive Committee, and this was agreed to be a necessary procedure.

The Mayor then presented for discussion the subject of finances. He pointed out that all phases of the work were handicapped by the lack of funds, and he stated that the City and County had reached its limit in supplying money to carry on the work. He then asked for suggestions as to a solution of the problem.

[91] A long discussion followed as to ways and means of financing the work of the Disaster Council.

Mr. Dillingham suggested that at least part of the cost should be borne by the Federal Government, and suggested that immediate contact be made with the Office For Emergency Management at Washington. Major General Wells concurred in this view. The Co-ordinator explained that this had already been done; and Mayor Petrie pointed out that the Governor and Dr. Fronk were now on their way to Washington to present the territorial situation to the Chairman of the Emergency Office. It was agreed that no direct action could be taken by this group that would in anyway interfere with the Governor's program.

Mayor Petrie announced that just prior to his departure for the mainland, Governor Poindexter had appointed the following Territorial Advisory Defense Council:

Honorable Lester Petrie, Chairman
Dr. H L Arnold
Honorable William Ellis
Col. Perry M. Smoot
Honorable A. S. Spencer
Honorable S. M. Spencer
General Briant H. Wells

The Mayor read to the Council a letter from Admiral Block, in which he stated his willingness to cooperate with the Major Disaster Council; and he greeted the representatives of the Army and Navy who were present, thanking them for the wonderful cooperation they had given and were giving.

Mayor Petrie then stressed the necessity for the various committee chairmen keeping the Co-ordinator informed on all activities within their committees, furnishing him with copies of all pertinent correspondence, and also with a list of the personnel of the committees, together with office and home addresses and telephone numbers.

It was suggested and agreed that all publicity should be released through the office of the Co-ordinator.

After some discussion it was agreed that afternoon meetings were most convenient for the majority of the members, and the first meeting of the Executive Committee was called for 2 P. M. on Thursday, May 26th, 1941, in the office of the Mayor.

3408 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Mayor Petrie announced that all members of the Major Disaster Council must sign the Oath of Loyalty, and stated that notaries would be present in the Assembly Hall at the close of the meeting to administer the oath.

The meeting adjourned at 2:30 P. M. to meet again at the call of the Chair.

EXHIBIT "C"

SUMMARY OF THE FUNCTIONS OF THE MAJOR DISASTER COUNCIL, CITY AND COUNTY OF HONOLULU, FROM DECEMBER 7TH TO 31ST, 1941, INCLUSIVE

The Co-ordinator of the Major Disaster Council of the City and County of Honolulu notified the Mayor promptly upon receipt by him of word that the Island of Oahu was being bombed, by enemy Japanese planes. He then proceeded immediately to his headquarters at the City Hall.

All Committee Chairmen and members of the Council were notified by telephone and radio to report immediately to the City Hall for duty. Within an amazingly short time all Chairmen and sub-chairmen of the twenty-six committees under the Major Disaster Council, had reported, and organizations composed of committee members and volunteers proceeded according to previously laid plans.

Mayor Petrie, who is also Chairman of the Major Disaster Council, authorized the Co-ordinator to use the facilities of the City Hall for headquarters, as he saw fit, thus making it possible to concentrate the majority of the work near the office of the Co-ordinator.

The Co-ordinator was then appointed Director of Civilian Defense for the Island of Oahu by the Territorial Director.

A clerical staff, composed of City and County employees, court workers, and volunteers from private industry, and others, was organized to handle the dissemination of information and instructions from the Co-ordinator to his Chairmen. This staff worked steadily all day Sunday and through the night. On Monday an arrangement was made to divide the staff into three groups, each working an eight hour period, viz; 8 A. M. to 4 P. M.; 4 P. M. to 12 midnight; and 12 midnight to 8 A. M. A competent person was appointed to direct the work of each group. These volunteers continued in full force for the first week—there being several hundred of them—after which the government employees returned to their departments, where they were needed as many department heads are also chairmen of Major Disaster Council committees. From that time on a strictly volunteer staff has carried on. In the past week it has been possible to cut this group down to approximately thirty-five persons during the day, and a smaller number of volunteers at night, but a crew has been maintained on twenty-four hour duty in the Co-ordinator's office since the commencement of the war on December 7th, 1941.

In accordance with arrangements which had been made during the preparatory period, the American Legion delegated twelve men for use by the Co-ordinator in his office. These Legionnaires served as assistants to the Co-ordinator, and as guards and aides, performing any service asked of them willingly and efficiently. Two of these Legionnaires were appointed as Shift Directors in the office of the Co-ordinator. One other Shift Director and three Liaison Officers were also appointed by the Co-ordinator to assist him in the handling of the tremendous volume of work which centered in his office during the first three days following the attack. With these Shift Directors and Liaison Officers there were stenographers, typists and clerks on duty day and night.

[95] Attached to this resume are copies of the reports of activity by the various individual committees during the period from December 7th to December 31st, 1941. These reports speak for themselves, and I can add nothing but the highest praise of the manner in which directions and instructions forwarded from the Co-ordinator's office to the Committee Chairmen, were followed out by the Chairmen and their workers.

As martial law was declared immediately after the disaster, and all civilians ordered off the streets, it was necessary that some means of identification for civilian defense workers be devised.

The Military Governor ruled that only Major Disaster Council identification cards would be recognized, and for several days this office issued identification cards, each bearing a number; arm bands (white with a large, red "CD" printed on them); and red, white and blue "CD" stickers for automobiles to all persons presenting proof that they were engaged in civilian defense operations. A record was kept of all cards, bands and stickers issued.

The number and type of volunteers was amazing, and most gratifying. They ranged from Army and Navy wives, resident civilians etc., to mainland salesmen whose work was interrupted and tourists who were stranded in Hawaii and anxious to do their bit. All came forward and offered their services, then served faithfully in whatever task was assigned them. One City and County official

stepped into a job of manual labor in order to get help quickly to people in distress. Many volunteers gave up any possibility of income to serve in civilian defense as long as they were needed; others found themselves without employment for one reason or another, when they returned to their businesses at the end of the first few strenuous days. Many of these latter have continued to work long hours without remuneration and without complaint.

During the first two or three days practically all questions regarding all phases of the problems facing the City and County of Honolulu came to this office. Clerks were on duty twenty-four hours a day to answer these calls and aid persons in need of information and assistance. Queries ranging from an inquiry from a Navy wife asking if her husband had been killed at Pearl Harbor, and service men attempting to locate their evacuated families, to simple questions of whether or not we were still being bombed, passed over the desks of these clerks, were disposed of, and a record kept of them. In the first two nights of the Blackout hundreds of calls were received. Some reported suspicious lights and signalling which warranted the investigation they received; others proved to be very bright stars twinkling in our blue Hawaiian sky. One woman threatened to go through the Governor to the President of the United States if guards were not placed on a downtown hotel, which was at the moment heavily guarded. Others reported incidents which were passed on to the Federal Bureau of Investigation.

To sum up the activities of the Co-ordinator's office, for the first three days all placing of evacuees, taking over of schools for first aid stations, directing and instructing fire wardens, securing guards for buildings, utilities, etc., were directed and supervised by the Co-ordinator, and the work was carried out by the Committees of the Major Disaster Council as the Civilian Defense for the Island of Oahu.

[96] For the last two weeks the office has continued to function, carrying out the instructions and orders of the Military Governor, and Civilian Governor and the Territorial Director of Civilian Defense, and generally carrying on civilian defense operations. For the third week of the War there has been maintained in the City Hall a skeleton crew on twenty-four hour duty—all committees having returned to their own headquarters. There is, however, a large staff on call which can be rounded up and ready to work within an hour from the receipt of any announcement of an alert.

/s/ T. G. S. W.

T. G. S. WALKER,

Director, Civilian Defense for the Island of Oahu.

JANUARY 2nd, 1942.

[97] HAWAII CHAPTER, AMERICAN RED CROSS—ITS PART IN THE CIVILIAN PREPAREDNESS PROGRAM

Alfred L. Castle, Honolulu, Hawaii

[98] The Hawaiian Chapter, American Red Cross, was set up in World War I on a Territory wide basis. It maintained a certain amount of service on Oahu after the war, and a skeleton organization throughout the Territory. There was no difficulty therefore for the Chapter to swing into any preparedness program for World War II.

PRELIMINARY

In June of 1940 the Hawaii Chapter decided that it should prepare itself and likewise take active part in the production and shipment of needed articles to our probable Allies, particularly Britain. At the Executive Committee meeting of June 13, 1940 a Production Committee was set up with Mrs. H. V. Von Holt, Chairman; Mrs. S. R. Damon, vice-chairman; and Mrs. Arthur Molyneux, chairman of Production. Mrs. H. S. Turner, was chairman of Surgical Dressings; Mrs. David Akana, chairman of Supplies, Instruction and Supervision; Mrs. Heaton L. Wrenn, chairman of Knitting; and Mrs. Peter K. McLean, chairman of Volunteer Special Services funds. After this same meeting contact was made with supply houses in Honolulu to the end that raw materials and supplies would always be on hand. It was pointed out that Hawaii might be the object of attack. Groups on Oahu, Molokai, Kauai, and at three localities on Hawaii were already at work on surgical dressings. From then on, for a period of 9-10 months, the majority of dressings and garments of various sorts produced

3412 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

were sent to the British Red Cross. Contact was, however, maintained with the Army here, for at the meeting on November 28, 1940 Mrs. von Holt reported that the Army had recommended that one quota of surgical dressings be kept here for local use, a quota being approximately 17,000 dressings. At that meeting, however, it was felt that about 50,000 dressings should be kept here, which was done for those early stages.

EXPANDED WORK

By March of 1941 the Chapter had materially increased its work, and was more definitely pointing to the need for local preparedness. It was reported that from our local production 145,000 surgical dressings, and over 6000 knitted garments had been made and shipped to the British Red Cross, but from then on policy changed and production was held here. At the meeting of March 21, 1941 the pending M-day bill in the Hawaiian legislature was discussed. The First-Aid Committee reported some 1000 women had completed courses. Mrs. Molr reported that two Motor Corps classes had been completed, one at Schofield Barracks totalling 30 women and one in Honolulu with 28. Further steps were taken at that meeting to set up again the formal Branch organizations on the outside islands.

MAJOR DISASTER COUNCIL

In April of 1941 the Supervisors of Honolulu created a Major Disaster Council to coordinate the resources of the City, with residents, firms, agencies and organizations to meet any major disaster or emergency. The Red Cross, acting under National charter, could not surrender in any way either its direct prerogatives or obligations, but the Hawaii Chapter immediately cooperated with such Council and throughout did its agreed-upon part. Because of their long experience, Mr. John Gray, for nearly 20 years with the Red Cross in Hawaii and executive secretary of the Chapter, and Alfred L. Castle, [99] Chapter vice-chairman, were at once assigned to the preparedness work, both acting as members of the Major Disaster Council and liaison between the Army and Red Cross. Mr. Castle had organized the Hawaii Chapter in World War I, was the first Field Director here, was a deputy commissioner and executive secretary for the Red Cross in Siberia, and special representative to Japan, China, and the Philippines in World War I. The relations between the Hawaii Chapter and the Major Disaster Council were of the best throughout.

WAR PREPAREDNESS

The plans of the Red Cross were laid primarily with a view to air attack by Japan, an attack which might be directed not only against military and naval objects but also against the city, whether deliberate or not. The possibility of bombardment was considered, and, to a small degree, invasion and its effect on the civilian population. Besides repeated conferences with the Major Disaster Council (hereafter called the Disaster Council), conferences were had by Messrs. Gray and Castle, individually or together, with the Commanding General Walter G. Short, and the Department Surgeon, Col. Edgar King and members of his staff. As a result of the conferences with the Army, General Short on May 10, 1941 wrote Mr. Castle a letter which stated in part:

"* * * In the first priority and requiring immediate action are:

"1. The organization and training of aid station groups and the provision of initial equipment for not less than twelve such stations.

"2. The provision of an adequate reserve of medical supplies for the civilian population.

"It is understood that the training of personnel for the aid station groups has been well begun and that a primary objective is to provide funds for completion of the training and for the purchase of initial equipment for twelve stations. The time element is very important as the supplies, both initial and reserve, must, I am informed, be secured on the mainland, not being locally available.

"* * * It also is my understanding that the arrangements for carrying on this work, as contemplated by your organization, are fully concurred in by other local groups now concerned with the same problem."

General Short's letter is attached hereto in full and marked Exhibit "A". Relationships between the Army and Red Cross throughout the entire period to December 7 were of the best.

Under this general title of War Preparedness the work will be grouped under appropriate subheadings.

(a) *First Aid Training and Aid Stations.*

By the end of March 1941 and as a part of the intensive Red Cross program nearly 1,000 persons had received first aid training.

In April of 1941 the Preparedness Committee of the [100] Honolulu County Medical Society, headed by Dr. Harry L. Arnold with Dr. Robert B. Faus as executive officer undertook, in cooperation with the Red Cross, a very intensive first aid training program. Red Cross instruction books were used, and Red Cross certificates awarded for those who passed. Strictly Red Cross classes were also continued separately. While the larger part of this operation was conducted by the Preparedness Committee, and the history will appear in the reports of Dr. Harry L. Arnold, Chairman of that Committee, the net result was that many thousand persons were trained and qualified prior to December 7.

On April 25, 1941 a joint statement on the training plan was issued by the Preparedness Committee and the Red Cross and published in the Honolulu Press. Such statement is hereto attached and marked Exhibit "B".

In September of 1941 the National Red Cross in Washington sent to Hawaii two expert instructors in first aid and water safety to assist in the intensified program.

As a part of the general program it was essential that aid station equipment be obtained so that on an attack there would not only be available trained personnel but aid stations fully equipped, with trained personnel, so that casualties could be effectively handled. It was contemplated that much of the funds necessary would come from the M-Day bill being considered by the Territorial Legislature in April. The bill apparently was lost the last night of the session in the first days of May, and no relief was forthcoming. The Red Cross then at once stepped in and supplied emergency funds, until after June 30 the Board of Supervisors of the City was able to make further appropriations. Had not the Red Cross stepped in at that time the entire program might have been seriously jeopardized. (See letter of Mr. Castle to Dr. Arnold, dated May 13, 1941, marked Exhibit "C", enclosing copy of the letter of General Short (Exhibit "A"), and Dr. Arnold's reply thereto, marked Exhibit "D".)

It was likewise necessary to obtain the actual equipment for first aid stations, which are referred to in the correspondence attached variously as "units," "medical units," "aid stations" and "emergency units," and physically to set these up for operation at carefully selected sites. The Army, in the first instance, came to the rescue, agreeing to loan 20 units to the Red Cross. In early June, sixteen units had been received from the Army, which were immediately put to use. (See excerpt from letter Mr. Gray to Mr. Castle, dated June 10, 1941, marked Exhibit E.)

Meanwhile, to hasten matters and to get further aid from the National Red Cross in Washington, John Gray, executive secretary of the Hawaii Chapter, left here on April 15 for Washington armed with letters from Colonel King, the department surgeon, specifying medical supplies and emergency units necessary for use for the civilian population in case of an attack, and not purchasable locally. The medical supplies will be referred to later. Later in May and June Mr. Castle was in Washington also discussing both subjects with National Red Cross headquarters. Tentative agreements were reached and by the end of July twelve complete medical station units, costing some \$25,000, were ordered for shipment to the Hawaii Chapter. (See excerpt from letter Mr. Mitchell to Mr. Castle, dated July 22, 1941, marked Exhibit F.)

These units all arrived in Hawaii prior to December 7, and were held in accord with a letter from Colonel King, [101] dated July 29, 1941, marked Exhibit "G."

On the Japanese attack, Honolulu had adequately trained personnel and properly equipped first aid stations at 20 separated points, sufficient to meet any emergency existing on that day and for the entire war as it developed. Each station had been adequately supplied far in advance by the Hawaii Chapter, Red Cross, with surgical dressings and other production equipment.

The matter of expansion of hospital facilities referred to in General Short's letter was handled by the Preparedness Committee.

(b) *Medical Supplies.*

The Department Surgeon, Colonel King, felt that emergency supplies of drugs and medicines, not procurable locally, should be on hand for civilian use, with

which we agreed. This list, prepared by Colonel King, was taken on April 15 to the National Red Cross by Mr. Gray and under date of May 16, 1941, the Red Cross here was advised that National would send such supplies. In June the City decided to make certain purchases of medical supplies, but Mr. Castle then in Washington was able to explain that such purchases did not conflict or in any way overlap the articles desired of the Red Cross. The medical supplies requested of the Red Cross were delivered in Honolulu beginning in August, in various batches, up to December 4, 1941, at a cost of about \$40,000.

(c) *Production Department—Surgical Dressings.*

Beginning in April 1941, all production was held in Hawaii, and the character of the production was molded to meet an anticipated attack. The number of workers, all volunteers, who came to the work rooms at the Castle Kindergarten and elsewhere steadily increased. Work done was on surgical dressings, hospital garments, operating robes, convalescent robes, pajamas, knitted goods and other necessary articles. In July the Department Surgeon was given a statement, marked Exhibit "H," showing the disposition of locally produced Red Cross surgical dressings in the Territory, in addition to actually finished goods held in Honolulu. The statement also showed that material had been ordered for approximately 240,000 more surgical dressings.

In August a quota of surgical dressings, about 17,000 dressings, was divided among the 20 aid stations operated by the Preparedness Committee (Drs. Arnold and Faus). Certain hospital garments and other emergency robes or garments were likewise distributed.

Long before December 7 the Red Cross used certain homes, with proper basements, and two school buildings, at widely separated parts of the City, for the storage of such articles that would be used at once in case of an attack. There were more of such storage centers, away from headquarters at Castle Kindergarten, and in them were stored surgical dressings, hospital garments and robes, convalescent robes, and such, women's and children's clothing, and canned goods. All centers were selected with a view to both geographical distribution and quick accessibility.

In October and November the Hawaii Chapter in its surgical dressings production centered on special Army dressings, and between November 25 and December 4 delivered to the Army Medical Department here a total of 58,121 dressings.

[102] On December 7 the parties assigned to headquarters and to the storage centers reported on a prearranged schedule. From one center over 19,600 dressings were released for the Pearl Harbor hospital, together with certain garments, and one quota, about 17,000, was sent to Tripler Hospital from another center, deliveries in each instance being made by the Red Cross Motor Corps.

The foundation laid and the experience gained during the entire year of 1941 made possible the enormous and specialized production for the services, Army, Navy and Marine, which steadily increased throughout the War, in the latter months averaging well over 1,000,000 surgical dressings per month.

(d) *Motor Corps.*

Motor Corps was organized in April and May of 1941, its first work being the collection, sorting and distribution of books and magazines to our armed forces. In order to qualify, members had to take prescribed courses. Regular duty was started on July 21, 1941, with 28 Army wives, 17 Navy and 49 civilian women, married or single. Due to the evacuation policy of service personnel, by December 7 there were only three in Motor Corps directly connected with the Army or Navy, their places being largely filled by local women. In order that the Army and Navy should be fully acquainted with Motor Corps uniform, cars, and insignia, as well as for humanitarian reasons, Motor Corps from July on took convalescents from Military and Naval hospitals for drives and excursions. During the fall months additional training was given in first aid, emergency delivery of babies, military drill, gas and chemical warfare lectures and demonstration, and blackout driving. A complete list of assignments, subject of course for change, was made for attack day, so on December 7 certain Corps members reported at once to assigned posts, and the balance at headquarters.

On December 7, and for the immediate days thereafter, not a single preparation proved to be futile. Motor Corps carried supplies to Hickam, Pearl Harbor, Schofield and other posts, assisted evacuees, and hurried back and forth from all Army and Navy posts on innumerable assignments. Naturally, such posts were

closed to the public on the attack, but the fact that Motor Corps and the Red Cross uniform had been previously well known made it possible to go right through to complete vital assignments, whereas others were turned back. All this was not an accident—it had been carefully thought out and prepared for months in advance; and on that particular day, a Sunday, proved a Godsend.

(e) *Evacuation and Disaster Relief.*

It had been agreed in advance that evacuation, housing and feeding of civilians caused by an enemy attack was primarily a governmental function. Nevertheless, the Red Cross stood by to assist and cooperate. On December 7 Motor Corps assisted in transporting evacuees. The Red Cross took charge, and assumed responsibility for the large group of evacuees housed at the University of Hawaii. Movements of evacuees were quickly coordinated without the slightest friction between the Disaster Council and the Red Cross.

In accordance with prearranged plans the heads of the large supply houses in Honolulu, together with adequate staff and all available trucks and drivers, reported at once on December 7 for duty. Telephone orders from the Red Cross for clothing, mattresses, blankets, canned goods and innumerable items were promptly filled and delivered by the Red Cross [103] Motor Corps or properly authorized civilian trucks, as the case might be. The Red Cross did not have to go through any red tape but orders were taken over the phone and the charges made later. December 7 and the following few days cost the Red Cross some \$50,000.

(f) *Canteen Service.*

This corps was organized in August 1941. It had training in serving convalescents from Navy hospitals on picnics, and certain Allied contingents passing through Honolulu, both in conjunction with Motor Corps. The Navy had loaned the original equipment.

At 10 a. m. on December 7 the Canteen Corps was called to duty and set up service at once in the Iolani Palace grounds, feeding medical unit workers, officials, truck drivers, guards, emergency police, civilians, or any one who needed food in such grounds. Canteen Corps remained on 24-hour duty until December 17 when gradually its work in the Palace was taken over by the O. C. D. Service to evacuees, located and living in other parts of Honolulu was, as stated above, handled by the Relief Council and the Red Cross. By the time O. C. D. took over, the evacuee problem had largely worked itself out.

It is interesting to note that the acting chairman of this unit passed the entrance at Pearl Harbor that morning at 6:30 on an Inter-Island steamer on her return to Honolulu, receiving her call for service at her home shortly thereafter.

(g) *Home Service Department.*

This department, trained to assist service men and their families, was organized in September 1941 but not specifically as a war measure. On December 7, because of its trained personnel, it was at once of value in assisting evacuees to look up separated members of families, render temporary assistance and advice, to assist in new living arrangements, and to answer inquiries from the mainland.

CONCLUSION

The fact that civilian affairs ran so well on December 7 is definitely due to the intensive preparation of the Disaster Council, with all its ramifications, and the Red Cross. There was no panic or any semblance of one. It is remarkable that throughout all the training period there was no friction, but only a "pull-together" and "get-ready" spirit. The closest cooperation prevailed between the Disaster Council, its able director, T. G. S. Walker, Drs. Arnold and Faus, the Army medical department acting under authority of the Commanding General, and the Red Cross. On December 7 the Disaster Council's headquarters were at the City Hall, and the Red Cross at the Castle Klndergarten, both in the same block. The preparedness work as a whole stimulated the Red Cross workers in that period, and certainly assisted as a starting point for the amazing record of the Hawaii Chapter, all of which, except for "military secrets", appears in the printed Chapter reports issued subsequently for each year.

Mr. A. L. CASTLE,
Acting Director, American Red Cross, Honolulu, T. H.

MY DEAR MR. CASTLE: It has been brought to my attention that the local chapter of the American Red Cross has offered to take such action as may be needed, to continue the program of preparation for emergency relief for the civilian population, to become effective in event of disaster particularly such as might eventuate from an enemy air attack on the city. It is understood that the leadership thus assumed will be available until superseded by an appropriate Government agency or until for other reasons it is no longer needed.

That leadership, under those conditions as offered by the American Red Cross, is a source of the greatest satisfaction to me. May I again bring to your attention what seem to be the most urgent local needs. In the first priority and requiring immediate action are:

1. The organization and training of aid station groups and the provision of initial equipment for not less than twelve such stations.

2. The provision of an adequate reserve of medical supplies for the civilian population.

It is understood that the training of personnel for the aid station groups has been well begun and that a primary objective is to provide funds for completion of the training and for the purchase of initial equipment for twelve stations. The time element is very important as the supplies, both initial and reserve, must, I am informed, be secured on the mainland, not being locally available.

Closely linked with the items in the first priority but not of such extreme urgency in point of time are:

1. The expansion of hospital facilities for the civilian population.

2. The provision of an adequate number of vehicles for ambulance service on call.

It also is my understanding that the arrangements for carrying on this work, as contemplated by your organization, are fully concurred in by other local groups now concerned with the same problem.

[105] I consider your proposed action to be both adequate and timely and should like to see it be put into effect in the shortest practicable time in order to meet any disaster or emergency situation.

Yours very truly,

(S) Walter C. Short
WALTER C. SHORT,
Lieutenant General, U. S. Army, Commanding.

EXHIBIT "B"

JOINT STATEMENT OF PREPAREDNESS COMMITTEE AND THE RED CROSS

While the United States is not actually at war, and there is no occasion for war hysteria, the international situation is so critical that the civilian population of Honolulu must realize that the time has come *now*—not tomorrow for intelligent, adequate, civilian defense preparedness. No sane person can think otherwise. The Army and Navy is not here to protect the population of Honolulu; their duty is to defend Hawaii as one of the most vital parts of the American Defense system. In case of emergency the civilian population must be prepared to care for itself.

As one of the first and most constructive steps in this program the Preparedness Committee of the Medical Association has undertaken the task of recruiting, training and getting ready for instant mobilization a large group of civilians who will be so organized that they can quickly render first aid, collect, sort, and transport to hospitals injured civilians with proficiency.

At least 50 doctors are now freely giving their time for this training period.

This program needs men and women who can become thoroughly trained in this work. As a part of the enlistment in this training and work, those taking the course are required to respond to their posts of duty at any call in an emer-

gency. Honolulu must be able to mobilize quickly and efficiently, and its volunteers must be competent to perform tasks assigned.

No program can be carried through without cost. The instruction books and supplies involved cost in excess of \$1.00, but the booklet received is a valuable one for anyone to own. The majority of people taking the course will undoubtedly gladly pay this \$1.00, but certain firms and individuals have contributed enough so that if anyone cannot afford this sum the booklet and supplies will be furnished them free.

At the end of the course examinations will be given in cooperation with the Red Cross, and those passing will receive proper certificates. To qualify for such certificate, the person must have attended instruction classes for at least 20 hours, must pass a written examination and certain demonstration tests in artificial respiration, digital pressure, etc., and practical problems.

The Red Cross, for a long time here in Honolulu and throughout the Territory, has been making up surgical dressings and materials of all types which would be imperatively needed in case of an emergency. The call on the Red Cross is and has been heavy, and will be for some time to come—how long no one knows.

The instruction courses being given by the Preparedness Committee do not overlap or conflict with the First Aid classes of the Red Cross. These latter classes are educational—vitally so now—and will continue as formerly, with the granting of the certificates to those who pass successfully. In less than a year now, 897 persons have successfully passed [107] the work prescribed in the Red Cross courses, providing a most valuable nucleus for any defense work.

(Honolulu, Hawaii, April 25, 1941)

ROBERT B. FAUS,
*Executive Officer in Charge of Plans and Training
for Preparedness Committee.*

ALFRED L. CASTLE,
Vice Chairman Hawaiian Chapter, American Red Cross.

[108]

EXHIBIT "C"

MAY 13, 1941.

Dr. HARRY L. ARNOLD,
*Chairman, Preparedness Committee of the Honolulu Medical Association,
Honolulu, T. H.*

DEAR DR. ARNOLD: Confirming our conversation of recent date, I wish to define the relationship of the Red Cross with your committee in connection with the point of first aid training, the equipment of first aid stations, etc., as originally worked out by your committee.

The program originally proposed by your committee was a very vital part of the plans already prepared for M-Day. It had been assumed that the legislature would pass the M-Day bill, which in turn carried with it an appropriation of \$50,000 for what I may term the "training period," and a further \$250,000 after an emergency should be declared. This bill failed under circumstances not necessary here to relate, and left the entire program somewhat in chaos. Unless something was done for civilian defense, the attitude of Hawaii towards such defense seemed a disgrace.

The work of your committee, and the training in first aid for emergency purpose, were already under way. It seemed criminal to drop this for lack of funds. Accordingly, a tentative arrangement was worked out by which your executive officer, Dr. R. B. Faus, became Chairman of the Disaster Relief Committee of the Red Cross. You are also a member and you are familiar with the personnel of that committee, which consists of six. If you want to suggest another doctor or someone else on the committee please let me know, but, as pointed out below, the work will in practice function through your own committee.

The program so splendidly outlined and started by your committee is not technically a Red Cross function. Your own program is more properly a Government function which would have been carried out through funds provided by the M-Day bill. The Red Cross would in the usual situation function as a relief organization after a disaster has occurred. However, the Red Cross cooperates with other agencies, and in this particular instance it is obvious that work started by you must not stop; it is vital to defense, and is the first step in preparing against a disaster which might be much worse except for adequate preparedness.

3418 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

It will not be the policy of the Red Cross to endeavor in any way to direct or control your work. For that reason we appointed Dr. Faus chairman of our committee, as the work he is heading up seems the most vital to be carried on. However, we will have to supply the funds, budget the same, and have the same properly audited; the same would be true whether you worked with Government funds or Red Cross. There are other matters in connection with disaster relief which we ourselves will have to work out and which were contemplated by the M-Day setup.

If and when Government funds are available the work of your committee will undoubtedly come under the Gov- [109] ernment setup, where it should properly come. There is no thought on the part of the Red Cross to retain any function properly belonging to another group, or in any way to take any credit for the work of the Medical Association. We are only trying to carry on as a stopgap until an M-Day program with Government funds can be perfected for I am convinced this must come sooner or later.

The big problem now is of course finance. I am informed that the minimum requirement of your present program is \$20,000, with more to come if the work is expanded to complete the setup. The Red Cross has not that amount available. It will therefore be our problem to consider ways and means of raising funds and of carrying on the work being done by you, until such time as Governmental funds are available. Please understand that the amount of assistance we can give is limited by the financial problem. I believe the present arrangement, as soon as this is approved by your committee, can be covered by temporary budget allotment.

I feel, also, that the present arrangement is a happy one, as the work of the Production Department of the Red Cross, and its own First Aid classes, very closely dovetails in with your work.

I enclose a copy of a letter from General Short which sets forth this entire matter far better than I can. He is very definite in his statement that this work should continue, and certainly the Red Cross will endeavor to cooperate to the best of its ability. Let me repeat again our assurance that we are not trying to dictate policies to you, or interfere with or control your work, but are merely trying to make possible the continuation of this work until our assistance is superseded by the appropriate Government agency.

Very truly yours,

/S/ ALFRED L. CASTLE,
*Vice-Chairman, Hawaiian Chapter
of the American Red Cross.*

EXHIBIT "D"

HONOLULU, HAWAII, May 13, 1941.

Mr. ALFRED L. CASTLE,
*Vice-Chairman, Hawaiian Chapter of the American Red Cross,
Honolulu, T. H.*

DEAR MR. CASTLE: We are deeply appreciative of your letter of even date, offering the financial assistance of the American Red Cross in making preparations for disaster relief of the civilian population of Honolulu.

It is the unanimous opinion of this committee that we should accept your offer and proceed as rapidly as possible to secure the necessary funds and supplies as outlined in General Short's letter. The amount mentioned in your letter (\$20,000) would not be adequate for the full program, but would provide for the initial training period.

Yours very truly,

HONOLULU COUNTY MEDICAL SOCIETY.
By (s) H. L. ARNOLD, Chairman.

EXHIBIT "E"

Excerpt—letter from John F. Gray, Secretary Hawaii Chapter, to Mr. Alfred L. Castle, dated June 10, 1941.

"Under date of June 7th I wired you to let you know something of what had been happening here. I am now enclosing a clipping from the Advertiser June 5, 1941, outlining in more detail the action taken by City-County officials with regard to providing medical supplies and fire equipment. Bids have been let for the supplies and apparently these will be available in the near future.

In the meantime Mr. Evans, Special Representative from National Headquarters whom you did not meet, has contacted the military and civilian authorities during a brief stay of four or five days and he is to return on June 16th for a ten days' or two weeks stay at which time civilian activities will be coordinated with official agencies. Until then it was deemed advisable that the training of the medical units continue without interruption and the Army agreed to loan us up to twenty units, authority for this having been received from the War Department in Washington.

To date I have signed for sixteen of these units which have been delivered to the Armory in the custody of Dr. Faus and Mr. Fitkin who are assigning units to their various commanders. Mr. Evans also thought it advisable and wired for Washington to ship us twelve complete units for our own use here. Undoubtedly we shall have to set up at least one unit on each of the larger outside islands if for no other than psychological reasons.

Just this morning Mr. Davis of Consolidated Amusement authorized me to give publicity to the donation of the ambulance and that will be released within a day or two.

Production work is progressing very nicely under the leadership of Mrs. Molyneux. Mrs. von Holt was ill going up to the coast, as you may know, and she stayed in Los Angeles only a week before returning. She is not on duty yet but hopes to be very soon."

[112]

EXHIBIT "F"

Excerpt—letter from L. M. Mitchell, Assistant to the Vice Chairman, American Red Cross, to Mr. Alfred L. Castle, Vice Chairman, Hawaii Chapter, dated July 22, 1941.

"Meantime, we are proceeding with the matter of medical supplies and have authorized the purchase of equipment for the twelve stations in accordance with the request transmitted by the Chapter and the letters prepared by the Army authorities. As soon as medical station equipment can be purchased, it will be shipped to your Chapter for assembly in the twelve station units, since it is not feasible at this end to break up the purchases and assemble the units prior to shipping. It is understood that these medical station units will be held for the emergency and that in the event an emergency need does not develop and there is later need for them elsewhere, they will be available for such use. With this understanding, the cost of this equipment is being met by the National organization.

"As indicated in our cable of yesterday to Mr. Gray, we have already ordered the revolving stock of medical supplies requested some time ago as a reserve to be held in Honolulu for immediate use in case of emergency. These supplies have actually been purchased for China and are shipped to Honolulu to protect your ability to meet any emergency that may arise. They should be held intact so that, if necessary, they may be forwarded to China at a later date, or shipped elsewhere as the need arises. It may be advisable with some items to forward the stock on hand in Honolulu to China and replace with fresh supplies in the interest of keeping the stock currently fresh. From time to time, the situation will be reviewed and appropriate action to keep the stock in current condition for immediate use will be made."

(Letterhead of
Headquarters Hawaiian
Department, Fort
Shafter, T. H.)

29 JULY 1941.

Mr. JOHN F. GRAY, *Field Director,*
American Red Cross,
426 Dillingham Building,
Honolulu, T. H.

MY DEAR MR. GRAY: The following plan for the storage and issue of certain amounts of American Red Cross medical supplies, designated as "Reserve" and "Aid Station Equipment (12)", has been approved:

1. Both the Reserve and the Aid Station Equipment will be held in storage for actual use and not issued for training purposes. If items for training purposes cannot be secured from any other source, minimal quantities as approved by this office to be issued for this purpose.

2. All items to be stored under the control of the Commanding Officer, Hawaiian Medical Depot, properly dispersed, Storage to be at the risk of the American Red Cross.

3. Method of Storage:

a. Reserve Supplies. According to usually accepted rules.

b. Aid Station Equipment. Each to be earmarked for a particular local civilian Aid Station group. To be so marked and the proper civilian officials notified.

4. Issue. By order of the Department Surgeon, subject to approval of the Department Commander.

Please notify Captain Paul Nixon, Hawaiian Medical Depot, Fort Shafter, as far in advance of arrival of supplies as your information permits. Include approximate cubic footage space required and list of items.

Reference transportation, request delivery by you at points to be specified by Captain Nixon.

Yours very truly,

EDGAR KING,
Colonel, Medical Corps,
Department Surgeon.

SURGICAL DRESSINGS

HAWAII (1 quota) #—Hilo has material and is making a quota to be stored in Hilo: Mrs. R. M. Lindsay, Hilo, Phone 2006.

KOHALA (1 quota)—Has completed quota, five boxes, stored. Mrs. James M. Beck, Mahukona, Phone, Kohala 368.

KEALAKEKUA (2 boxes)—2 boxes shipped from Oahu. Assorted. To be stored by Mrs. William J. Paris, Kainaliu, Hawaii, Phone, 2 W 716.

LANAI (1 quota)—Ship from Oahu 5 boxes completed by Oahu. To be stored by Mrs. H. B. Caldwell, Lanai City, Lanai, No phone, must wire.

MOLOKAI (1 quota)—Material for 1 quota is being made up on Molokai and will be stored by Mrs. George P. Cooke, Kaunakakai, Molokai, Phone, 7 W 20.

MAUI (2 quotas)—Has material to make one quota Will ship from Oahu quota now being completed by Kahuku. To be stored by Mrs. Stanley Elmore, Spreckelsville, Maui, Phone, 4 W 576.

KAUAI (1 quota)—Has material and is making quota to be stored by Mrs. J. C. Plews, Lihue, Kauai, Phone, Lihue 326.

OAHU (3 quotas)—Will make and store 3 quotas here in three separate places. Material on hand for 3 quotas plus. Material for 14 extra quotas ordered from the mainland.

One quota contains approximately 17,000 dressings.

[115] MEDICAL PREPAREDNESS IN THE TERRITORY OF HAWAII
PRIOR TO DECEMBER 7, 1941

H. L. ARNOLD, M. D., *Honolulu, Hawaii*

[116] MEDICAL PREPAREDNESS

The first organized effort of the medical profession of Honolulu to prepare for the medical aspects of war, began in June of 1940. Dr. Clarence Fronk was appointed by the officers of the Territorial Medical Association to represent them on the National Committee on Medical Preparedness. During the following year, Doctors Fronk, Faus, Wallis, Keay and Burden were appointed as a Territorial Committee on Preparedness. The County Medical Society also appointed a Committee in 1940, consisting of Doctors Fronk, Palma, Fred Lam and James Kuninobu. This Committee met, made plans, and endeavored to interest the profession, but in general, their efforts did not meet with much success. However, on April 11, 1941, following discussions with the Surgeon, Hawaiian Department, Colonel—now Brigadier General—Edgar King, the Honolulu County Medical Society elected a committee, consisting of seven members, Doctors Larsen, Judd, Strode, Pinkerton, Withington, Faus and the writer. These men were called the Preparedness Committee, and were given power to act for the Society in making the necessary arrangements to prepare for the care of civilian casualties in the event of war.

Organization

The first meeting of this committee was held on April 15, 1941. The conviction of every member of the committee that war was imminent and that it was urgently necessary for preparations to be made to care for a potentially large number of injured civilians is reflected in the following excerpts from the minutes of this initial meeting.

" * * * The following specific actions were taken:

Dr. Robert Faus was reappointed to the position which he held under the previous preparedness committee. It was decided that his work was to be facilitated by the Committee in any way which Dr. Faus might suggest.

The actual listing of medical personnel on this Island for duties during war conditions was decided to be an absolutely necessary factor and this work will go forward as rapidly as possible.

Dr. Fronk stated that the Army would be able to furnish beds and linen for the potentially expanded hospitals. Dr. Fronk also stated that it was unlikely that subsidiary hospitals anywhere near the business districts would be useful.

The potential local manufacture of typhoid vaccines was discussed and approved.

The offer of Dr. James Kuninobu of supplying medical personnel from the Japanese Medical Society for service in the event that it is needed was accepted gladly and he will be so notified.

Dr. Pinkerton reported that the blood and [117] plasma bank situation was satisfactory and well under way.

Dr. Faus was given charge of the arranging for supplies of orthopedic apparatus such as Thomas splints and Kirschner stirrups."

The minutes of this first meeting of the Preparedness Committee are attached hereto in full and marked Exhibit "A".

Dr. Robert Faus (now Colonel, M. C., A. U. S.) was made executive officer in charge of plans and training and functioned as such until after December 7, 1941. Subcommittees were formed and additional advisers called in from time to time. Liaison was established with the Army, the Hawaii Chapter, American Red Cross, the Honolulu Chamber of Commerce, the City and County government, the Major Disaster Council under Mr. Walker, the Nursing Association, and innumerable other less important organizations. The close liaison maintained with the Hawaii Chapter of the American Red Cross is reflected in the exchange of correspondence with that organization (See the following letters in the presentation of the Hawaii Chapter, American Red Cross: Letter of Mr. Castle to Dr. Arnold dated May 13, 1941, marked Exhibit "C" enclosing copy of letter from Lt. General Walter C. Short, and Dr. Arnold's reply thereto marked Exhibit "D").

3422 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Training

The physicians of the city were divided into groups and assigned to specific duties in the event of war. One group of surgeons, with their volunteer nurses, was assigned to go to military hospitals and assist military surgeons in caring for their casualties, since it was obvious that the medical staffs of these hospitals for normal times would not be able to deal with a sudden influx of casualties resulting from enemy action. Other groups were assigned to do the same thing for the local civilian hospitals. Still others were assigned to First Aid Stations to care for minor casualties, and to prepare for transportation to the hospital those casualties too badly injured to be taken there without prior treatment. Twenty First Aid Stations were set up throughout the City in schools and public buildings, and in some instances in private buildings through the generosity of the owners, and to each of these a staff was attached. It was obvious that it would be necessary to train large numbers of lay personnel in the primary care of casualties, and there were not enough teachers to do this. Therefore, a course was instituted for "teaching teachers." A large class of teachers was trained by Dr. Faus and given diplomas by the Hawaii Chapter of the American Red Cross, and the work of training the workers themselves then began. In all nearly 3,000 individuals representing all nationalities were given courses and certificates of graduation in the principles of First Aid, Ambulance Training, etc.

All of these training activities included extensive publicity throughout the entire community. Records of the Preparedness Committee show that from the time of its inception to November 30, 1941, members of the committee had delivered a total of 18 public speeches while newspaper publicity had totalled 3,775 inches in the columns of the local newspapers.

Finances were a problem from the beginning. Obviously, it was necessary to have some sort of an office and to have at least a skeleton personnel to do typing, mimeographing, mailing and so forth. The funds for this purpose came very largely from the Hawaii Chapter of the American Red Cross, although the Honolulu Chamber of Commerce, the Committee [118] members themselves, and many other persons of all nationalities contributed liberally of their funds for the purpose. The Army detailed a medical officer to the sole duty of assisting in the work. The large mercantile firms of Honolulu, such as American Factors, T. H. Davies, and many others, were contacted for permission to make arrangements to convert their fleets of trucks into ambulances by the addition of frames to hold stretchers. Two hundred and fifty such trucks were thus fitted and the drivers trained before December 7, 1941.

Nursing Services

A survey of the nursing facilities of the Territory, under Miss Matthews, was instituted and carried out and the nurses available for emergency duty in every community were listed, with their telephone numbers and capabilities.

Hospitals

The hospitals of the City were studied critically, with a view to discovering how their capacities to care for patients could be increased, and how they could be evacuated of the less seriously ill to permit the entrance of large numbers of casualties, should the occasion arise.

Supplies and Equipment

The supplies and equipment of the Aid Stations were in part loaned by the Army, and in part purchased by funds donated by the Hawaii Chapter of the American Red Cross, the Chamber of Commerce, and the City and County of Honolulu. Each Aid Station had at least two doctors assigned to it, two dentists, at least three nurses, a group of nurses' aides, ambulance drivers, and many other types of specialized personnel. These volunteers attended regular weekly meetings from June, 1941, until long after the war had begun.

Ambulances

Three ambulances were donated—one by the Wholesale Liquor Dealers' Association, one by the Consolidated Amusement Company, and one by the Schuman Carriage Company. These vehicles were almost indispensable during the training period for transportation of supplies, equipment and personnel to the various stations. The ambulances which would be depended upon if war came, however, were the converted trucks volunteered by Honolulu business firms. Mass rallies were held on several occasions in the Armory, and in the auditorium of McKinley

High School for the purpose of stimulating interest and furthering the course of training.

On each of the "outside" islands, a chairman was selected by the local County Medical Society and put in charge of the work, as had been done in Honolulu. The preparations were, of necessity, less elaborate and extensive than were in Honolulu, but every island, including Lanai, had made, long before December 7th, definite and detailed plans for what they would do in the event of enemy action.

Evacuation

Evacuation sites were provided for the various hospitals, to serve for a place to put less seriously sick patients, to make room for more seriously injured and to increase their possible capacity. It was also assumed that it was likely that a hospital might well be destroyed by fire or bombing and that the entire organization might find it necessary to move to new quarters. These were selected and arrangements made for transportation to them. The Major Disaster Council's transportation division, under Mr. Kirk, was responsible for these arrangements. In spite of the serious objection of the Bureau of Narcotics of the International Revenue Department, arrangements were made with the Hawaii Chapter of the American Red Cross to have on hand a generous supply of morphine. This was stored in a safety deposit vault, pending the need for its distribution. Typhoid vaccine was arranged for, from the Territorial Board of Health, it being felt that in the event that the people in the community, or any considerable number of them, were evacuated to the mountains, typhoid fever would promptly become a problem.

Blood Bank

The blood plasma bank, which had been established some time before, continued under the management of Dr. Pinkerton, also a member of the Committee, and strenuous efforts were made by him to increase the supply of stored plasma to be ready for an emergency. Due to general lack of public understanding of the blood donation idea, however, the quantity, while large in comparison with most cities was, of course, far from adequate. The work of the Honolulu blood plasma bank is discussed more fully in a separate presentation by Dr. F. J. Pinkerton.

Did the Plan work?

On the morning of December 7th, the Headquarters diary of the Emergency Medical and Ambulance Service at Kaahumanu School shows that the chain telephone system which had been set up in preparation for such an event began to function at 8:20 A. M., when Mrs. Nash called her office staff to duty. At 8:35 A. M., the ambulance trucks from Davies and Company and American Factors, Ltd. were ordered to fit their frames and be ready for call. Other companies were alerted later by Mr. Paul Meyer, officer in charge of the ambulance pool.

At 9:00 A. M., Colonel King, then Department Surgeon, telephoned in a request for twenty-six doctors and twenty nurses to report to Tripler Hospital. These nurses and doctors were called immediately; fortunately, most of the doctors of the City were attending a postgraduate lecture on wound surgery at that hour. At 9:10 A. M., Colonel King requested that as many trucks as possible, fitted as ambulances report to Hickam Field to carry wounded from Hickam to Tripler Hospital. Twelve trucks left immediately and others left as rapidly as they drove in to report. By 9:20 A. M., forty-five trucks were on their way to Hickam Field. Most of the wounded from Hickam Field were transported by these ambulances, and most of the treatment of the wounded was done by civilian physicians, nurses and volunteer helpers.

The Aid Stations were all manned promptly and reported in from time to time as shown on the attached blotter. In all, 2,344 persons were treated for illness or injury on December 7, 1941, by these organizations. Distribution of these treatments and, to some extent, the nature of them, is listed on the enclosed sheet. Lunalilo Station was actually struck by a Japanese bomb, set on fire, and compelled to move to an adjacent building.

Distribution of cases treated at the Medical Unit is shown on the tabulation attached herewith as Exhibit "B."

3424 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[120] The recognition of the Army for the services rendered on December 7, 1941, is reflected in the following memorandum from the Office of the Surgeon, Hawaiian Department, dated January 19, 1942:

"Memo to: Dr. H. L. Arnold, Office of Civilian Defense.

"From: Headquarters Hawaiian Department—January 19, 1942.

"Request that the following statement, which has the approval of the Department Commander, be published in the Honolulu County Medical Journal:

"The Commanding General, Hawaiian Department, wishes to take this opportunity to thank the physicians and their assistants for the splendid aid and cooperation rendered on December 7 and the period following in the care of the wounded. All did a superior job."

"For the Department Surgeon.

"(Signed) SIDNEY POSNER,
"Captain, Medical Corps."

Miscellaneous Activities

The balance of the day's activities was devoted to innumerable details of rendering assistance to sick and injured persons, to hospitals and doctors and to moving supplies and equipment to places where they were needed.

The wisdom and adequacy of the plans and training schedule were, it is submitted, demonstrated by the relatively prompt and smooth functioning of the organization when war came. The devoted service of the volunteer trainees and trainers, who spent hours and hours of time in preparing for war can never be adequately praised.

Major General Norman Kirk, the Surgeon General of the United States Army, in addressing a large group of physicians from the Service and the civilian community on January 26, 1945, at Kamehameha Hospital said, "Before beginning my talk, I want to express the thanks of the Army to the civilian physicians of Honolulu for the magnificent job they did on December 7th, *when they were ready for it and we weren't.*"

H. L. ARNOLD.

[121]

EXHIBIT "A"

MINUTES OF FIRST MEETING OF PREPAREDNESS COMMITTEE OF THE HONOLULU COUNTY MEDICAL SOCIETY—APRIL 15, 1941

All members present, and by invitation Dr. Clarence Fronk and Dr. Thomas Mossman. It was decided that the President of the County Medical Society should *ex officio* be invited to all meetings of the Committee in future, and that these meetings would be held weekly on Tuesday at noon at the Pacific Club when there were matters to be discussed and that notification would be sent out in plenty of time in advance. A quorum will consist of four members and the reporting will be done by the Chairman of the Committee.

The division of the committee into the following categories was approved:

Dr. Robert Faus—Executive, in charge of all phases of the Committee's work.

Dr. N. P. Larsen—In charge of plans for hospital expansion and evacuation.

Dr. Joseph Strode—In charge of hospital teams for civilian casualty care.

Dr. J. R. Judd—In charge of hospital teams for military casualty care.

Dr. Paul Withington—In charge of the collection and primary care of casualties.

Dr. F. J. Pinkerton—In charge of liaison with Chamber of Commerce, the Red Cross, other branches of the County disaster organizations, and Supplies and Publicity.

Dr. H. L. Arnold—In charge of administration, hygiene and sanitation.

It was agreed and considered of vital importance that all medical personnel be under the control of this committee and assignments of such personnel be made only under its sanction.

The following specific actions were taken:

Dr. Robert Faus was reappointed to the position which he held under the previous preparedness committee. It was decided that his work was to be facilitated by the Committee in any way which Dr. Faus might suggest.

Dr. Mossman stated that he was in the process of preparing a master list of the available medical supplies on Oahu and he is to continue this work.

[122] The actual listing of medical personnel on this Island for duties during war conditions was decided to be an absolutely necessary factor and this work will go forward as rapidly as possible.

When and if the Disaster Board of the City and County lays plans for the construction of evacuation camps or shelters, recommendations for the hygiene and sanitation of these camps will be offered. Dr. Enright and Dr. Haralson were to be approached regarding the desirability of publicity concerning the need for typhoid and smallpox vaccination on a voluntary basis as soon as this can be done.

Dr. Fronk stated that the Army would be able to furnish beds and linen for the potentially expanded hospitals. Dr. Fronk also stated that it was unlikely that subsidiary hospitals anywhere near the business district would be useful.

The potential local manufacture of typhoid vaccines was discussed and approved.

The offer of Dr. James Kuninobu of supplying medical personnel from the Japanese Medical Society for service in the event that it is needed was accepted gladly and he will be so notified.

Dr. Pinkerton reported that the blood and plasma bank situation was satisfactory and well under way.

Dr. Faus was given charge of the arranging for supplies of orthopedic apparatus such as Thomas splints and Kirschner stirrups.

A committee consisting of Drs. Fronk, Judd and Strode will confer upon two matters: one, the appointment of hospital teams for the care of hospitalized patients in both military and civilian hospitals and also upon the standardization of the treatment for burns and the acquisition of necessary supplies for this work. It was suggested that the physicians of the city be circularized as to what good and serviceable instruments they have which would be available for the use of the general disaster committee in the event of serious need for such instruments.

The principle was laid down that doctors who are asked to teach in the evacuation units now being organized will not of necessity be expected to serve in these units in the actual emergency but all doctors who are asked to do this work of teaching are urged to cooperate to the fullest extent.

Captain Gay is caring for the coordination of medical services during potential disaster with the other functions of the general disaster committee.

It was decided that all actions taken by the Committee should be given publicity by posting them in the office of the Honolulu County Medical Society.

There being no other business, the meeting was adjourned.

/s/ H. L. ARNOLD,
Chairman, Preparedness Committee,
Honolulu County Medical Society.

[124] PREPAREDNESS OF THE HONOLULU BLOOD PLASMA BANK PRIOR TO DECEMBER 7, 1941

F. J. Pinkerton, M. D., Honolulu, Hawaii

[125] During the year 1940 many informal discussions were had by the physicians in Honolulu concerning the merits of a Blood Bank and the importance of such in the event that war developed between the United States and Japan. Ways and means were discussed pro and con by a few of the more interested and far-thinking physicians. Finally, at the suggestion of the Public Health Committee of the Chamber of Commerce, a letter was written to the chairman of the committee putting the general thoughts of the various discussions in letter form and suggesting that the Public Health Committee might be interested in financing and operating such a Blood Bank.

Since such a project involved the voluntary donations of blood from a favorable group, the matter was discussed with representatives of the Junior Chamber of Commerce and their interest and support solicited with the thought in mind that the membership, composed of young men, would be the best group to call upon for voluntary blood donations.

In February, 1941, an outline of the proposed blood and plasma bank was presented to the Public Health Committee of the Honolulu Chamber of Commerce and a committee was appointed by the chairman to supervise and inaugurate and begin operations of the blood bank. This committee was composed of the following:

Chairman of Public Health Committee, Chamber of Commerce, as chairman.
A representative of the Health Committee from the Jr. Chamber of Commerce.

A Pathologist.

A representative of the Surgeon of the Hawaiian Department, U. S. Army.
The Territorial Commissioner of Health.

The Medical Director of the Queen's Hospital.

The City and County Physician.

Principal provisions of the plan were:

1. A central bank was to be established in the City and County Emergency Hospital to draw blood and prepare plasma.

2. The Hawaii Chapter of the American Red Cross was asked to assume charge of publicizing the project and securing donors.

3. The supply of plasma and its production for the Blood Bank was to be under the direction and control of the Public Health Committee of the Chamber of Commerce of Honolulu.

4. No blood or plasma was to be offered for sale.

5. As a beginning the central supply was to consist of 100 flasks of plasma, 250 cc. each.

6. Certain equipment was to be purchased for hospitals on Oahu desiring to prepare plasma in addition to that of the central bank. (In order to decentralize and to encourage widespread interest in the technical preparation of plasma and the operation of a blood bank it was decided to offer to all the hospitals minimum equipment which could be brought into [126] operation when an emergency arose and to train the technicians of those hospitals in the technic.

Budget: A budget of \$2,000, later increased to \$3,000 was appropriated by the Public Health Committee of the Senior Chamber to convert space at the City and County Emergency Hospital into a laboratory, and to purchase equipment and pay salaries. A physician, a medical technologist and a bacteriologist were employed to supervise the laboratory. Eight hospitals on Oahu, (six in Honolulu and two in rural Oahu) agreed to participate in the program. Equipment was purchased for all of them and their own technicians were trained in plasma technic by the Blood Bank technologist.

Opening of bank: After four months of preparation and securing equipment from the mainland, the first blood was drawn on June 2, 1941. A schedule of bleeding nine to twelve donors a week was maintained. At the end of three months, 96 men and women had given blood and 77 flasks of plasma were on hand.

Additional appropriation: \$1,000 additional was appropriated by the Chamber of Commerce and a plan approved for doubling the goal to 200 flasks and to speed operations to care for about 30 donors a week. Under the new schedule, within five weeks 153 donors had given blood and the goal of 200 flasks had been passed.

Cost: The cost of the last 138 flasks came to \$7.25 per 250 cc., as compared to the cost of \$19.50 to \$27.50 per 250 cc., for commercial plasma.

Red Cross: In October of 1941 the Blood Bank project was offered to the American Red Cross but this organization did not accept the offer because of lack of approval from Washington.

Closing of bank: In November of 1941 the Chamber of Commerce feeling that the demonstration had been successful and that enough experience had been had to insure protection to the community in the event of war, closed its doors. Several weeks were required to draw and culture the plasma then in the process of production and to take inventory of the equipment.

Storage: On December 1, 1941, 203 flasks of plasma were placed in the cold storage warehouse at the Hawaiian Electric Company and plans were made to turn the central laboratory over to the City and County Hospital for an indefinite period (to carry on the functions of a central blood bank for emergency needs if required).

Sneak attack on December 7, 1941: On December 7, 1941, our Army and Navy bases were attacked and an urgent appeal by Service hospitals went out for plasma. The chairman of the Public Health Committee of the Chamber of Commerce delivered 75 flasks to the Tripler General Hospital, 80 flasks to the Queen's Hospital for civilian use and 45 flasks to the Pearl Harbor Naval Hospital. Within six hours the total supply, the product of months of effort, was exhausted. The doctors who attended the wounded that day tell of men who were carried in, very evidently marked for death, and they also tell how many of these men still live because of the life-giving plasma being on hand and ready for instant use to be poured back into their veins.

[127] *Immediate expansion of blood bank:* Now the value of those months of preparation, of standardizing technic, of training technicians, was felt. A call for donors was broadcast over local radio stations and the response was overwhelming. A schedule of 50 donors per hour, 10 hours a day, 7 days a week was maintained for two weeks. Every available doctor and nurse was enlisted to assist. Between 20 and 30 doctors worked on a volunteer basis from 3 to 5 hours daily in taking the donors, many of them in addition to their First Aid Station duties. Men and women from all walks of life and all economic levels stood in line for hours. War workers came after their long shift of duty, as did dock workers and workers in the sugar and pineapple fields. The original blood bank laboratory was placed on 24 hour duty, the personnel working in three eight-hour shifts, sterilizing equipment, preparing sodium citrate, culturing plasma and dispensing it.

The laboratory at the Queen's Hospital typed the donors, ran serological tests on the blood, prepared plasma and dispensed blood and plasma.

Units were instituted at the Experiment Stations of the Hawaiian Sugar Planters' Association and the Pineapple Producers' Cooperative Association. Equipment and technical assistance were borrowed from the University of Hawaii.

The other seven hospitals absorbed part of the load of plasma preparation with equipment provided by the Public Health Committee in advance of the attack. Personnel of all these hospitals had been trained during 1941 for just such an emergency.

The Blood Bank was again offered to the American Red Cross but this offer was not accepted; it was then taken over by the Office of Civilian Defense who assumed responsibility for expenses incurred as of December 7, 1941.

3428 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[128] PREPAREDNESS ACTIVITIES OF THE TRANSPORTATION COMMITTEE, MAJOR DISASTER COUNCIL, CITY AND COUNTY OF HONOLULU, TERRITORY OF HAWAII, PRIOR TO DECEMBER 7, 1941

Addison E. Kirk, Honolulu, Hawaii

[129] THE CONGRESSIONAL COMMITTEE INVESTIGATING PEARL HARBOR

The following is a brief summary of the activities of the Transportation Committee, Major Disaster Council, City and County of Honolulu, prior to the attack on Pearl Harbor. Unfortunately, the records of this Committee have been forwarded to Washington, D. C., with the files of the local Office of Defense Transportation.

The Major Disaster Council was formed on June 24, 1941, with each member assigned as chairman of a committee. The Transportation Committee was formed immediately thereafter with members heading some committee, each of which dealt with a particular type of transportation with the exception of the Engineering Committee. Various meetings were held, including joint meetings, with the representatives of the Evacuation Committee and other committees affected by transportation.

In the beginning the Committee's activities consisted of a complete survey of all types of transportation including railroad, highway, ships, barges, tugs and airplanes. The Engineering Committee made a survey and an analysis of each garage, service station and repair shop on the island. The information secured was tabulated and cross indexed. Prior to December 7th, roughly 5,000 trucks, buses and vehicles of all types were listed. This listing included the individual responsible for the unit, key personnel in larger companies with telephone numbers and addresses for out of hour calls.

The list of vehicles ranged from heavy duty trucks to small pick-up trucks and included refrigerated units which might be used for the temporary storage of food at evacuation centers.

The Engineering Committee, in its survey of garages, had a complete list of the machines, tools and other equipment available for emergency repairs as well as major overhauls. Personnel of each garage was listed and special training noted. Compilation of the capacity of all gasoline storage was included, both for the purpose of refueling during an emergency and for the dispersion of this highly necessary fuel.

The "danger zone" which had been established by the military authorities was divided into four zones with a committee member in charge of each.

In classifying transportation vehicles, including buses, the listing was divided with those available in the city of Honolulu in one and those in the country districts in the other. As stated before, by December 7th, there were approximately 5,000 of these vehicles listed. These did not include certain trucks which had been turned over to the Medical Committee for use as ambulances. Prior to December 7th these vehicles had been outfitted as ambulances with removable equipment which could be installed in a very few minutes.

With the attack on December 7th, all committee members reported to their posts and calls for transportation equipment began to come in shortly after the attack.

I am pleased to report that the cooperation of those people volunteering their equipment was 100%. The volunteer drivers exceeded the requirements. I am happy to report that all requests for transportation received after [130] 9 a. m. December 7, 1941, were filled satisfactorily and in each instance, the vehicles were dispatched not later than twenty minutes after the call came in.

The largest single job done that day was the evacuation of the women and children from Schofield Barracks and from Hickam Field to various cafeterias equipped schools in Honolulu. The movement from these posts was done in total blackout without serious incident.

Respectfully submitted.

A. E. Kirk,

A. E. Kirk,

Chairman, Transportation Committee,
Major Disaster Council.

[131] ORGANIZATION OF THE CIVILIAN POLICE RESERVE IN THE CITY AND COUNTY OF HONOLULU PRIOR TO DECEMBER 1, 1941

Heaton L. Wrenn, Honolulu, Hawaii

[132] On July 28, 1941, with the approval and under the authority of the Honolulu Police Department and Chief of Police W. A. Gabrielson, the Honolulu Police Reserve was organized under the leadership of Major Douglas G. King a former officer in the British Army. The purpose of the Police Reserve was to provide a trained body of citizens who could assist and augment the regular Honolulu Police force in time of emergency. 144 men enrolled in the first group and these men were given a course in police training. This training consisted of 14 lectures by police instructors. The subjects included the apprehension of criminals, search and seizure, judo, the law of arrest, criminal law, criminal investigation, traffic work, identification work, first aid and other pertinent subjects. The lectures were held once a week on Monday evenings at the Central Intermediate School from 7:30 to 9:00 P. M. The final evening lecture was concluded on October 27, 1941. Thereafter the men were given training during the daytime in drilling, judo, riot guns and pistol shooting. 24 of those enrolled in the first class dropped out during the course of instruction. 120 of the first class were commissioned as officers of the Honolulu Police Department on November 3, 1941.

Beginning on September 9, 1941 the members of the class started accompanying regular police officers on their beats on every eighth day. On the graduation of the class it was decided that the group would meet once a month for further instructions. The first meeting of the group was held on December 1, 1941 at the Central Intermediate School.

A second class of 38 men was started on November 25, 1941. This course of instruction was interrupted by the events of December 7, 1941.

On December 7, 1941, 114 of the first class and 28 of the second class went on active police duty.

On December 7, 1941 the 142 members of the Police Reserve did regular police duty guarding important installations, working with the Federal Bureau of Investigation in picking up enemy aliens and persons suspected of being dangerous to the security of the community, guarding the office of the Japanese consulate, evacuation work in bombed areas, traffic duty, and in fact doing the same type of work as the regular police officers. Following December 7, 1941 the members of the Reserve for a time did duty every day and night for several weeks then the group was divided so that they did duty every other day. Subsequently the Reserves were divided into six groups, each of which did regular beat work during the third watch for one night a week and on two nights a week every seventh week.

The members of the first class who went on duty on December 7, 1941 represented the several racial groups comprising our population and were largely business men. For example, the group numbered among its members an undertaker, a physician and surgeon, an interior decorator, bank tellers, a dentist, trust company officials, salesmen, accountants, lawyers, an instructor in physical culture, steamship executives, newspaper executives, contractors, an industrial relations director, radio executives, chemists, clerks, architects, dairymen, investment brokers, bankers, merchants, hotel executives, insurance salesmen, securities salesmen, theater executives, a veterinarian, florists, bookkeepers, scientists, mechanical engineers and agriculturists.

[133] Following December 7, 1941 additional groups of Reserves were given intensive police training, commissioned as officers and did active police duty. The Reserves for a substantial portion of the time they were on active police duty numbered approximately 300 men at one time on active status.

The Honolulu Police Reserve was the first organization of its kind organized in the United States and probably the only group whose members went on regular duty as commissioned uniformed police officers performing all the functions of regular police.

The Police Reserve continued on an active status until October 13, 1945.

Major General H. H. ARNOLD, U. S. A.

*Commanding General, Army Air Forces,
Washington, D. C.*

MY DEAR GENERAL ARNOLD: There has been mailed under separate cover a secret study which was being made at the time the memorandum from the Secretary of the General Staff was received requesting that "a study be made of the air situation in Hawaii."

This study was originally made by Colonel Farthing as Commanding Officer of the 5th Bombardment Group (Heavy) assisted by Major Rose and Captain Codrington. It has been prepared as a staff study and carefully checked as to its contents with certain additions being made by the G-3 Section of the Hawaiian Air Force. It represents to me the complete possibility of the Hawaiian Islands being defended from attack by carrier-based aircraft. It is not making a statement which can not be fully realized upon to say that, "The defense of the Hawaiian Islands can be accomplished with the 180 heavy bombardment airplanes which are setup for this mission by this study." That being true, then, by occupying outlying fields on this island group and with the requisite number of airplanes and the combat crews as called for by this study, the defense of the Hawaiian Islands has been accomplished and need cause the War Department nor the Army Air Force further concern.

The original of this report is being forwarded through the Department Commander of the Hawaiian Department but I am sending you a copy direct so that you may have an opportunity to consider this study prior to the original arriving in the War Department.

Most sincerely,

(S) F. L. Martin,
F. L. MARTIN,
Major General, U. S. Army.

[2]

20 August 1941.

Subject: Study of the Air Situation in Hawaii.

To: Commanding General, Army Air Forces, Washington, D. C.

Thru: Commanding General, Hawaiian Department, Fort Shafter, T. H.

1. In compliance with copy of corrected memorandum for the Commanding General, Army Air Forces, OCS 17234-25, from the Secretary, General Staff, dated July 17, 1941, "that a study be made of the air situation in Hawaii", there is attached for consideration of the War Department a plan for the employment of long-range bombardment aviation in the defense of Oahu. This plan clearly presents the air defense of the Hawaiian Islands. Attention is called to the recommendations therein.

2. No increase in personnel of the permanent air garrison of Hawaii is necessary to bring the actual heavy bombardment strength to one group. Under provisions of Table of Basic Allowances No. 1, War Department, dated December 1, 1940, fourteen additional heavy bombardment airplanes will be required to provide a total strength of one group of thirty-five B-17D type airplanes. This force is so small for the mission to be performed that it is considered entirely inadequate.

3. When the RDF installation is completed and the 15th Pursuit Group has its full complement of 80 fighters no further increase for pursuit aviation is considered necessary. Provision should be made to maintain at all times the 14th Pursuit Wing at full combat strength of 80 fighters and 105 interceptors. It is contemplated that pursuit aviation will perform its normal mission in the defense of these islands by intercepting and destroying enemy aircraft in the vicinity of or over the Island of Oahu. This is considered an adequate force to perform the pursuit mission in the defense of these islands.

4. A combination medium bombardment-torpedo force is considered highly desirable in order that attack can be made under conditions of low visibility when horizontal bombing is not feasible and is therefore recommended as a component part of the Hawaiian Air Force. (See Study No. 2 in attached plan).

5. On the assumption that there is a possibility of enemy surface craft reaching the shores of Oahu, one squadron of dive bombers is [3] considered necessary to assist the ground forces in withstanding an invasion effort by concentrating on denying the enemy any opportunity to establish beach heads. The quick and accurate striking power of dive bombers makes them particularly effective for close-in support of the ground forces and this premise is borne out by information contained in intelligence reports received on the war in Europe. Dive bombers would also be employed against hostile surface craft and submarines which had penetrated close to the shores of Oahu.

6. With the addition of the force of medium bombardment-torpedo airplanes and one squadron of dive bombers no further increase in the number of light bombardment airplanes is required.

7. One additional observation squadron should be assigned the Hawaiian Air Force to supplement the new ground organization of the Hawaiian Department which is being re-organized into two triangular divisions. The ground forces of the Hawaiian Department should be provided with three observation squadrons. At present there is assigned one observation squadron (C&D) and one light bombardment squadron which could be diverted to observation duty.

8. To increase the number of aircraft in the Hawaiian Air Force as outlined in this letter and in the attached plan it is estimated that approximately 3,871 additional men should be assigned. A minimum of 216 combat crews and 180 maintenance crews are necessary to operate 180 B-17D type airplanes. Sufficient personnel are now present in the Hawaiian Air Force to man 70 combat crews and 70 maintenance crews for heavy bombardment aircraft. Additional personnel equal to the differences above should be assigned to the Hawaiian Air Force to meet these requirements. Further personnel increases should be made to activate two medium combination bombardment-torpedo squadrons, one dive bomber squadron, one additional observation squadron and five air base squadrons. The five air base squadrons will be used to maintain the outlying fields tabulated below which will house heavy bombardment squadrons as indicated. The two Air Base Groups (S) are to be used to maintain Bellows Field and the site selected for the station of the 15th Pursuit Group.

Barking Sands.....	2
Morse Field.....	2
Hilo.....	1
Lanai.....	1
Parker Ranch.....	1

9. The dive bomber squadron and three observation squadrons with allied services will become, in effect, an air support command and will be stationed at Bellows Field.

[4] 10. Tables of Organization prescribe five enlisted men for each heavy bombardment combat crew. For continuous daily operation a minimum of fourteen men will be necessary for each heavy maintenance crew. Using these figures as a basis, personnel requirements have been computed as shown in Inclosure No. 2.

11. There is at present available, under construction and awaiting approval of the War Department, housing for 12,288 enlisted men. This study will require housing for a total of 12,813 men to provide for all Air Corps and associated personnel. This leaves but 525 men to be cared for in a future project which will be submitted when this study has been approved. For detailed analysis of housing see Inclosure No. 3.

3432 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

12. It is my conviction that by increasing the present strength of the Hawaiian Air Force by one observation squadron, a minimum of one dive bomber squadron, two squadrons of combination medium bombardment-torpedo airplanes and by increasing the strength of long-range bombardment to a total of 180 airplanes a positive defense of the Hawaiian Islands can be assured without any assistance whatever from the naval forces giving the Navy complete freedom of action.

[6]
Major General F. L. MARTIN,
Hawaiian Air Force,
Honolulu, T. H.

SEPTEMBER 25, 1941.

DEAR MARTIN: There has just been brought to my attention the Hawaiian Department Tentative Standing Operative Procedure publication July 14, 1941. I note under Section 2 that the Hawaiian Air Force is charged with being prepared to release a provisional battalion totaling 500 men to assist the auxiliary police force. It is further observed that the Hawaiian Air Force is charged with defending Schofield Barracks against ground and sabotage attacks.

The combat units, together with the auxiliary and service units set up for the Hawaiian Department, have been designed primarily to insure the full effectiveness of air force operations during that critical time indicated under the Hawaiian Department Alert No. 1. It would appear, however, that we have overestimated the requirements for the Hawaiian Air Force. Obviously, it would be impossible for the Hawaiian Air Force to carry out the mission above noted, in addition to its Air Force combat mission, unless there were a surplus of Air Corps and related troops.

As we are so short of trained officers and personnel in the Air Force, it is most undesirable to employ such personnel for other than Air Corps duties, except under most unusual circumstances.

It would seem that the proper step to be taken would be a request made on the War Department to increase the Hawaiian Department by the number of personnel required to assist the auxiliary police force and to defend Schofield Barracks. Our action would then be to reduce the numbers of Air Corps and auxiliary personnel by that number.

However, before any official steps are taken, I would appreciate your unofficial and informal comment.

Sincerely,

H. H. ARNOLD,
Major General, U. S. A.,
Chief of the Army Air Forces.

[7]

3 NOVEMBER 1941.

Major General H. H. ARNOLD,
Chief of the Army Air Forces,
Washington, D. C.

DEAR HAPPY: In reply to your request for unofficial and informal comment upon the use of Air Corps troops as ordered by "Hawaiian Department Tentative Standing Operating Procedure," dated July 14, 1941, the following information is submitted.

During the department maneuvers, which lasted from the 12-24 May of this year, the Department Commander, General Short, became very much interested in the proper employment of all military personnel in a last stand defense of Oahu. At that time he mentioned the fact that the Air Force had approximately 4,000 enlisted men at Hickam Field and nearly 3,000 at Wheeler Field; he saw no reason why these men should not receive some training as Infantry so that after the Air Force was destroyed they could assist the ground forces in the defense of the island. I told him it was not possible to give such training at this time as the Air Force's first mission, that of training combat crews, was in a most unsatisfactory state. In order to obtain these combat crews the men must be processed through our technical schools and in addition thereto gain experience in the actual performance of these duties under proper supervision.

As no further comment was made at the time, I thought the matter was a closed issue. Without further warning a letter was received from the Hawaiian Department, dated 5 June 1941 on the subject of training Air Corps personnel for ground defense missions. This letter directed that—

a. *At Hickam Field*: The training of two battalions of 500 men each to perform the following missions:

(1) One battalion to provide ground close-in defense for Hickam Field.

(2) One battalion to be prepared to take over initially under the direction of the Provost Marshal, Hawaiian Department, the anti-sabotage mission within Police District No. 1, City and County of Honolulu, now assigned to the 1st Battalion, 27th Infantry, under the provisions of FO #1, OHD 38.

[8] b. *At Wheeler Field*: The training of one battalion of 500 men to perform the following missions:

(1) Provide ground close-in defense of Wheeler Field.

(2) Be prepared to take over initially under the direction of the Headquarters Commandant, Hawaiian Division, the protection of the Schofield Area now assigned to the 2d Battalion, 21st Infantry, under the provisions of FO #1, OD 40.

The training of these 1,500 men was conducted under the supervision of Infantry instructors, after three o'clock in the afternoon, four afternoons per week. The men who were placed in these battalions were the most recent arrivals in the islands, plus a certain number of noncommissioned officers required in the organization. The officers for these battalions were reserve officers regularly assigned to these two stations but from other arms of the service. As the Air Corps training for the enlisted men in these battalions progressed they received assignments with the Air Corps commensurate with their ability and training. The Infantry drill in the afternoon, which usually lasted from 3:00 p. m. to 4:30 p. m. interfered a great deal with the performance of their normal duties and when an alert was called these men were required to take their defensive positions which took them away from their Air Corps assignments. This left the organizations to which these men belonged extremely short of the necessary personnel for carrying-on the functions required of the Air Corps organizations. In other words, there was imposed upon these men the performance of a duty assigned to them for the last defense of this island when the Air Force was still carrying-on its primary mission in the defense of the island. As soon as sufficient reliable data could be collected as to the inroad this was making on Air Force activities, a letter dated August 25, 1941, was prepared on this subject and taken to the Department Commander, General Short, in person showing that it was inconsistent with the Air Force mission to require its men to train as Infantry and to take their Infantry positions when an alert was called, leaving vacant their proper assignment with the Air Force. The only relief from the performance of these duties General Short would give at the time was that those assigned to such duties and properly trained for the performance of these duties need not receive more training than was necessary to insure that they would be properly prepared to assume these duties when called upon.

A new "Standing Operating Procedure" is being prepared but has not yet been published. A copy of this procedure which was submitted to this headquarters for comment made no mention of the assignment of Air Corps troops for Infantry missions, other than that Air Corps troops will be trained for the close-in defense of Army airdromes on the Island of Oahu. I have delayed answering your letter awaiting the publication of this "Standing Operating Procedure", that I might be sure that the provisions of the existing "Standing Operating Procedure" had been changed as indicated above.

[9] It is my belief that the letter which I mentioned above, pointing out the unnecessary handicaps placed upon the Air Force in training as Infantry at a time when they were unable to conduct sufficient training to meet their primary mission as Air Force troops, has received consideration. In this letter I asked the Department Commander to rescind his instructions requiring Air Corps troops to train as Infantry at least until such time as we had developed sufficient combat and maintenance crews to meet the Manning Tables for the number of airplanes allotted to the Hawaiian Air Force. I am attaching hereto a copy of the letter on the subject of diversion from Air Force training, dated August 25, 1941.

It is my firm belief that no attempt would be made by an enemy force to make a hostile landing on these islands until the Hawaiian Air Force has been destroyed or reduced in effectiveness to the point where they could offer little if any resistance. When the present allotment of airplanes has been received and these airplanes are properly manned by competent combat crews, there is no enemy in these waters strong enough to destroy the Hawaiian Air Force or effect a landing on these shores.

I can well understand how one charged with the defense of these islands, assuming that the Hawaiian Air Force had been destroyed, would wish to utilize to the fullest extent the military man power available to him in carrying out his mission of the defense of Oahu. For Air Corps troops to be effective under such circumstances they should be properly trained for the parts they are required to play in such defensive action but I just do not wish my Air Force troops to receive training for this "last ditch fight" until they have been properly trained for their primary mission with the Air Force.

General Short is a very reasonable man of keen perception. It is now my belief that he sees more clearly the training problems confronting the Air Force and realized its enormous proportions. I do expect that the training of Air Force troops as Infantry will not be permitted to seriously interfere with their proper training for their normal mission.

I feel very strongly that a War Department policy should be established or orders issued which will prescribe that troops from the ground forces have the responsibility of the defense of airdromes and performance of interior guard duty. If the interior guard duty is to be performed by Air Force troops, then a special table of organization should be issued for a Military Policy Company to be established at each post for the performance of interior guard duty. Due to the importance and value of property on Air Corps stations, troops performing interior guard duty should be especially well trained for this service. These services can never be efficiently performed except by those who are regularly and permanently assigned to such duty. The duties to be performed by troops for the close-in defense of an airdrome are quite similar and require the same training as that given to all ground troops for a similar mission. As to [10] the number of men required, it makes no difference whatever whether the defense of airdromes and interior guard duty are performed by Air Force troops or troops from other arms. In either case troops performing these duties must have this as their sole responsibility and assignment.

I am happy to say that this problem of training Air Force troops with Infantry, which has caused me such deep concern, seems now on its way to a satisfactory solution. Having given me this opportunity to unofficially and informally bring this matter to your attention I shall, if in the future this burden becomes unbearable, bring it to your personal attention.

I am forwarding under separate cover a study which has been made of our personnel requirements to meet the allocation of airplanes for the Hawaiian Air Force. As you will observe tables of organizations for the respective units have been adhered to as far as possible. Our experiences indicates the num-

ber of men in these organizations barely meets the demands on this personnel for our operations.

Expressing to you my high esteem I beg to remain,
Most sincerely,

F. L. MARTIN,
Major General, U. S. Army.

[11]

Nov. 27, 1941.

Major General F. L. MARTIN,
Commanding General, Hawaiian Air Force,
Hickam Field, T. H.

DEAR FRED: Your letter of November 3, 1941, was very enlightening on the use of Air Force troops in Hawaii. I am happy to learn that in your opinion a satisfactory solution to the problem will be arrived at shortly.

When the new "Standing Operating Procedure" of the Hawaiian Department is published, I would be interested in knowing the policy which it expresses toward air troops and their employment in local defense of air bases. These matters are of vital interest and the decisions reached in Hawaii may aid in the solutions of similar situations in the United States or in other theaters.

In your letter you urged that a War Department policy be issued which will prescribe that ground forces assume the responsibility of airdrome defense. The broad policy governing local ground defense of air bases has been published in War Department Training Circular No. 47, dated July 18, 1941. Paragraph 16 of this circular states the order of availability of troops for defense, and Air Corps troops are listed in the 4th priority with a notation that their primary mission is operation, maintenance and repair of aircraft. I believe that this is a plain statement of current War Department policy on this matter.

I am appreciative of your efforts to keep me abreast of developments affecting your command.

Yours very truly,

H. H. ARNOLD,
Major General, U. S. A.,
Chief of the Army Air Forces.

EXHIBIT NO. 155

(Exhibit 155 is the original Radar Plot of Station OPANA, December 7, 1941 and will be found reproduced as Item No. 38 in Exhibits—Illustrations to Proceedings of Joint Committee)

EXHIBIT NO. 156

Far Eastern Section, 0-2
June 21, 1941

TO: ASSISTANT CHIEF OF STAFF, 0-2.

Subject: Final Recommendations Far Eastern
Intelligence Organization.

I have the following recommendations to submit:

1. That the Military Attache, Thailand and the Military Attache Observer, Singapore be removed from jurisdiction of the Philippine Department and placed directly under the War Department. As things now stand, we have an inconsistent situation in that these two are under the Philippine Department, while our offices in Japan and China are of course under the War Department. To correct the situation a reorganization should be sent to the Commanding General, Philippine Department substantially as follows:

Inform Jackson and Brink that effective this date they are placed under War Department jurisdiction. The War Department desires that they continue to send a copy of all reports direct to Philippine Department.

2. That Burma, Malaya, the Dutch East Indies and French Indo-China be transferred to the Far Eastern Section. In support of this it is obvious that Burma should be grouped with China, primarily on account of the Burma Road, and secondarily, because of the communication net. Respecting the transfer of the other three places named, all of Southeastern Asia should in my opinion be considered as one large operational area, very closely related to China, Japan and Philippine Islands. Should this transfer be approved there should of course be transferred to the Far Eastern Section the clerical personnel tentatively set up for their handling in the British and Western European Sections.

3. That instructions be issued that the Commanding General, Philippine Department, the Military Observer, Singapore, the Military Attache, Thailand, the Military Attache, China, and the Military Attache, Japan substantially as follows:

The War Department desires that there be full and complete cooperation with British Intelligence Agencies in the area under your jurisdiction, such cooperation to include exchange of information on the strength and disposition of our own forces, as well as of other countries in which we may be mutually interested.

File

6-21-41, 11-15-41

- 2 -

In this connection it is further recommended that the Director of Naval Intelligence be asked to consider issuing similar instructions to our corresponding Naval organisations and Intelligence agencies. According to General Lee in London, the British have already instructed the Far Eastern people to this same end and particularly desire that Naval information be included.

4. That we form a Secret Service organisation to operate in the Far East. From my conversations with the Far Eastern Combined (Intelligence) Bureau and also the Chief of the British Secret Service (also Singapore), I am convinced that much information, particularly as regards areas under Japanese control and other remote areas, can be secured only through the operations of such a system. Such a system obviously must be kept separate from our normal Intelligence organisation, and we should, I think, lean heavily upon British advice and experience in organising. The Chief of the British Service in Singapore informed me that in case we should desire to organise a similar system, he was prepared to assist us in every way, including the recruitment of native operatives. In as much as it is highly desirable for obvious reasons not to have a regular army officer directing such organisation, I recommend that Major Warren Clear, a retired officer now on duty in the Public Relations Section and a Japanese language graduate, be sent to Singapore to consult with the Chief of the British Secret Service there regarding the details of organization and the selection of an operating headquarters, which should probably be either in Singapore or Hongkong.

5. PERSONNEL

A. Abroad

(1) I recommend that the Air Corps be requested to furnish a well qualified and well rounded officer for duty in Singapore where there is a great mass of information on the air forces and the air fields of the entire Far East. He should of course be accredited to Singapore.

(2) I repeat my former recommendation that we send to Singapore one of our very best Japan men. The present Military Observer, Lt. Col. Brink, is well qualified to cover Malaya, the Dutch East Indies and French Indo-China. Additionally, however, since much of the work of the Far Eastern Combined Bureau and most of the work of the British Secret Service is oriented on Japan, I consider it essential that we have in Singapore a Japan man who is thoroughly familiar with our present information on Japan. Major Robin Page, at present Asst. Military Attache in Tokyo, answers the requirements fully and would, in addition, be of value to the British in evaluating information on Japan, and would thus enable us to give something back to the British in return for the information that we

- 3 -

extract from their files. So little information is obtainable at present in Japan that I feel we should at once transfer Pape to Singapore. Pape should likewise be accredited to Singapore.

(3) My original radio recommendations concerning the Singapore office called for two full-time clerk-stenographers. The radio recommendations naturally reached Washington in advance of my letter explaining the necessity for the personnel, and in reply to the radio only one clerk and a messenger were authorized. The messenger is of course necessary and should have been included in my original recommendations. At least one additional clerk-stenographer, however, will be necessary, and I recommend that Brink be authorized by radio to hire one additional clerk at a salary of \$1800.-

(4) Since the British Branch Intelligence Office in Hongkong is largely oriented on Japan, I feel that we should likewise have a Japan man in Hongkong (in addition to our China man stationed there). Major Joseph J. Feitky, M. E., a Japanese language graduate, is qualified and desires the detail. It is recommended that he be ordered to Washington for a short period of orientation and then sent to Hongkong. He should of course be accredited to Hongkong as an official observer.-

(5) The transfer of Pape to Singapore will of course have some effect upon the Tokyo office. In case my recommendations concerning the establishment of a Secret Service organization in paragraph 4, above are not favorably considered, I recommend that Clear be sent to Tokyo as Assistant Military Attache. Otherwise, Tokyo can still carry on by utilizing the services of Major G. Stanton Babcock, Cavalry, who has just completed his formal language study, who is already an M. A. in name, and who is, in fact, at present actually working in the Tokyo office as Pape's assistant.

(6) Since temporary promotion for our observers and and attaches abroad is apparently out of the question, I recommend that we do what we can to increase their prestige by making such of them as are not at present, either GSC or Acting GSC. While this may seem somewhat inconsequential here in Washington, in my opinion it will definitely enhance their prestige abroad.

3. Within the Far Eastern Section

While the tentative allotment of Reserve and Civilian personnel is in general satisfactory, I consider it essential that we at once place a well qualified China language graduate (regular Army) in charge of the China desk, so that as the Reserve and Civilian personnel now being selected becomes available we will have someone already familiar with the China situation to direct their activities. While there are a number of China graduates on our books, I feel that, particularly in

view of the present aid to China program and the possible formation of a large military fleet, we should have a full-time expert of our very best men. One China expert, Major Francis H. Hays, has already been made available to us by virtue of his work with the G. I. Section, and probably the best man available for the job. Major Francis H. Hays, has only recently joined the G. I. Section. I recommend that Major Roberts be at once transferred to the War Sector. Decision to take action on the China desk before he likewise will have spent an equal time with us so that it will be considered inadvisable to move him as a replacement for Roberts in the G. I. Section. I desire to recommend Major Joseph K. Ryan, presently now on duty in the office of the Assistant Secretary, Major Ryan has been executive of the Chinese Liaison Office, also in direct charge of their Counter Intelligence Section, and is thus extremely well qualified for the job. His tour in the Philippine Department will expire shortly. He desires to remain, and I recommend that he be ordered to duty in connection with the new situation, and released reserves for the same work.

cc: Assistant Secretary G.I.

General

I am informed by Mr. Col. Toland in the Finance Section that steps have already been taken to equalize the allowances of our attachés abroad with those of the Navy. This is an important step that I believe applies to attachés only and still leaves observers in the old \$140 per month basis. There are reasons and that the Finance Section arrange for additional allowances to be paid from contingent funds of the next fiscal year and that the total personnel allowances be made as follows:

- (1) Airplane - observer - \$200
 Air Observer - \$100
 Naval Observer - \$100
- (2) Airplane - Naval Observer - Equalized with allowance of Assistant Military Attaché, Hong Kong.
- (3) Naval Service (if authorized) - \$250

Travel

I recommend the following travel allowances be established for the next fiscal year:

3440 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 5 -

- (1) Thailand - \$1500
- (2) Singapore - { (a) Observer - \$500
 { (b) Air Observer - \$5000
 { (c) Japan Observer - \$1500
- (3) China - { (a) No. 1, Chungking - \$2500
 { (b) No. 2, Chungking - \$1000
 { (c) No. 3 (air), Chungking - \$2000
 { (d) No. 4, Hongkong - \$1000
 { (e) No. 5, Peking - \$500
 { (f) Japan Observer, Hongkong - \$1200
- (4) Japan - { (a) No. 1, Tokyo - \$1000
 { (b) No. 2, Tokyo - \$500
